In former times, men were chiefly concerned with the surface of the sea, together with the near-surface waters and shallow seabed that were accessible to fishermen. As our technology advances, however, our ability to penetrate and use the entire huge volume of the ocean and to explore and exploit the seabed, even to the greatest depths, is rapidly increasing. The shape of the sea floor, the properties of the deep waters and the distribution of deep-sea resources have thus become of much greater interest than previously.

The margins of the oceans surrounding the continents, containing the continental shelves and slopes and the deeper continental rise, are probably the principal location for the most important mineral resources underneath the sea: petroleum and natural gas. The living resources seem to exist almost entirely in the upper 1,500 meters, and like the fossil fuels they are most concentrated over the continental shelves and slopes.

Submarine vehicles for both military and peaceful purposes are a spectacular element of the new marine technology. From a military point of view, the great advantage of submarines rests on the low transparency of sea water for visible light and radio waves. A deeply submerged submarine can neither be seen visually nor be detected by radar. The submarine itself would be equally blind were it not for one of the most remarkable qualities of the ocean: its capacity to transmit low-frequency sounds over great distances.

The explosion of a one-pound block of dynamite in the air can be heard for about half a mile. Such an explosion at the middepths in the ocean can be heard for many thousands of miles.

The ocean is far from being a perfect acoustical transmitter, however. It is full of background noises made by animals and volcanoes; the surface and the bottom scatter and absorb sound; variations in temperature and density bend and distort sound waves in complicated ways, and the ocean rings with echoes like a badly designed auditorium. To elucidate and overcome these imperfections in sound propagation is one of the major problems of marine technology.

AN INTERNATIONAL REGIME

We may confidently expect that the ocean will be far more important to mankind in the future than it has ever been in the past.

Recognition of the new opportunities in the ocean has brought a widening realization that the organization of human society into national states, which works, however imperfectly, on the land, is not well suited to the optimum utilization of the sea. A new kind of regime is needed in which the interests of all states are protected but those of humanity as a whole are paramount.

The possible nature of such a regime is now being widely discussed in the United Nations and other international forums. It is too early to forecast what may emerge. Nevertheless, it can be hoped that agreement will be reached on a set of principles somewhat as follows:

1. The resources of the high seas and the underlying seabed, outside those areas adjacent to the coasts in which the coastal states exercise certain exclusive rights, are the common heritage of mankind and shall be used and conserved in the common interest of all men. All countries shall participate in an equitable manner in the benefits gained from these resources. Individual states shall not appropriate any part of the high seas or of the underlying seabed.

2. The areas adjacent to the coasts in which coastal states exercise certain exclusive rights shall be as small as feasible, and the outer limits of these areas shall be fixed by a definite depth or distance from shore or by a formula involving both depth and distance. This outer boundary, together with the nature of the exclusive rights to be exercised, should be determined by international agreement as soon as possible.

3. Internationally coordinated action must be taken to prevent pollution of the ocean, including control of pollutants coming from the land or the air, such as pesticides, radioactive substances, poisonous chemicals and sewage; from ships, submarine or other equipment used at sea, and from exploitation of marine resources, for example, exploration, production, storage and transportation of oil and gas.

4. The freedom of scientific research in the ocean shall be kept inviolate. The exclusive rights granted to the coastal states shall not include the right to interfere with scientific research provided that the coastal state is given prior notification of the plan to conduct the research, has full opportunity to participate in it and has access to all the data obtained and samples collected, and provided that the research does not deleteriously affect marine resources or other uses of the sea.

5. Greatly intensified international cooperation and coordination in all peaceful uses of the ocean is needed to encourage and advance beneficial exploitation of marine resources and technological developments for this purpose, to ensure the conservation and rational use of resources and to minimize interference among uses of different resources and among different uses of the same resource.

6. The military uses of the ocean floor shall be as limited as practicable; in particular, no nuclear weapons shall be planted on it.

Agreement on these principles and on creation of an international regime to secure them depends largely, although by no means entirely, on the U.S. It is to be hoped that our government and people will be far-sighted enough to see that their own long-range interests lie in a generous approach to the new age of the oceans.

SERIES ON "LAW AND ENVIRONMENT"—PART IV

(Mr. SAYLOR asked and was given permission to extend his remarks at this

point in the RECORD and to include extraneous matter.)

Mr. SAYLOR. Mr. Speaker, the fourth article in the Christian Science Monitor series on law and environment approaches the subject from yet another perspective. Having pointed out some of the legal problems, tactics, and strategies, and some of the deep constitutional issues involved, the focus in the current article is on legal manpower. Legal solutions to environmental problems will not come without trained lawyers. The article underscores the poignant fact that too few of the Nation's legal minds are concerned with conservation. Potential short-term remedies to this situation were suggested at the recent Arlie House conference sponsored by the Conservation Foundation and the Conservation and Research Foundation, but the long-range problem is one of training and that probably means a significant shifting of focus in law school curriculums.

Perhaps this is the first time in legal history where the opportunity to develop a new law speciality was known prior to the time of the full development of what can be called the body of law in the subject. As the previous series articles have clearly shown, there is no legal corpus on environmental problems. With pressure from the law schools combined with pressure from the public, the drive for such a collection would be increased, thereby advancing the time when the public can be assured of full legal protection of the Nation's natural heritage.

The article follows:

CONSERVATIONISTS HAMPERED BY LACK OF LAWYERS

(By Robert Cahn)

WASHINGTON.—The public interest is rarely as ably represented legally in environmental issues as are the private interests, Dr. Charles H. W. Foster told the first Conference on Law and the Environment.

Dr. Foster was reporting the results of a survey he had conducted among leaders of conservation groups and public officials. The causes were not hard to pinpoint: Lack of financial resources by citizens or conservation groups to hire experienced lawyers; a scarcity of lawyers with experience in environmental cases, even when funds are available.

Thus, while the conservation movement has never been healthier, and is loaded with citizen volunteers, it is at a decided disadvantage in the often protracted, time-consuming legal battles the conservationists seek to initiate against encroachments from private and public developers and polluters.

NEW FRONTIER IN LAW

This situation and what to do about it was one of the principal topics of the recent two-day conference at Warrenton, Va., sponsored by the Conservation Foundation of Washington, D.C., and the Conservation and Research Foundation of New London, Conn.

It is difficult for an individual lawyer to specialize exclusively in the comparatively new field of environmental law, and still make a living, conference participants agreed.

Yet unless the lawyer does specialize, he is severely handicapped in this complicated area in which most of the precedents are on the side of the development interests. And the large law firms, financially capable of subsidizing experts in environmental law, are often unwilling to do so because they depend upon the fees of clients whose interests may conflict with defenders of the environment.

PUBLIC-DEFENDER PLAN EYED

One answer to this situation, lawyers at the conference suggested, would be to establish a system of environmental public defenders organized along the lines of groups operating in the civil-rights field such as the American Civil Liberties Union and the Legal Defense Fund of the National Association for the Advancement of Colored People.

Such a system might be coordinated by a national nonprofit legal environmental institute capable of conducting research and carrying out litigation.

No prospect of such a system is in sight.

Comments Mrs. Gladys Kessler, member of a small, new law firm in Washington: "We cannot even get adequate public defenders in the field of criminal law. In environmental law, it is a million years away."

In the meantime, however, there is encouraging evidence that some environmental legal service needs are being provided to the public.

Most of the lawyers and law professors at the conference are donating a good share of their time to public-interest cases, or working for far less than usual fees.

FIRM DONATES TIME

The firm of which Mrs. Kessler is a member—Berlin, Roisman & Kessler—is dedicated primarily to environmental and consumer interests, and all three of the young partners took part in the conference. So did Ralph Nader, who devotes almost all of his time to the public interest in fighting for consumer and environmental issues.

A conference observer was Bruce Montgomery of the prestigious Washington firm of Arnold & Porter. The firm is allowing Mr. Montgomery to spend all of his time for a year in an experimental effort to organize, institute, and stimulate larger involvement in pro bono publico (for the public good) work in the fields of poverty law, civil rights, and the environment.

CLIENT IMMUNITY REQUIRED

Mr. Montgomery says he has the right to draw on up to 15 percent of the time of any or all of the 65 members of Arnold & Porter for pro bono work, which is essentially without charge to the clients.

Mr. Montgomery admitted that environment related pro bono work would necessarily have to exclude the firm's clients. And it also might be difficult or impossible to bring an environmental case against a company involved in the same business as an Arnold & Porter client, because it might establish a precedent which could later affect that client.

Mrs. Ann Louise Strong, director of the Institute for Environmental Studies at the University of Pennsylvania in Philadelphia, said she had run into the same problem when trying to get Philadelphia firms involved in pro bono environmental litigation.

"A major firm agreed to release time of their people for environmental cases," Mrs. Strong said. "The first two situations we brought them were in airport location and stream pollution. They said that clients were involved in both. Then they said: 'Find something that won't be controversial.'"

Another pioneer in the field is the Environmental Defense Fund, a nonprofit group of scientists and attorneys based in Stony Brook, N.Y. The group hires counsel to pursue scientific objectives. It has been a leader in the fight to ban DDT.

STUDY PROGRAM PROPOSED

James Moorman left his legal work with the Department of Justice this year to become the environmental attorney for the Center for Law and Social Policy, a nonprofit educational organization established in Washington. The center seeks to handle cases in which clients cannot afford counsel.

A large new area of opportunity lies in development of environmental programs in more of the nation's law schools, the conference was told by Daniel Tarlock, professor of law at Indiana University. Student interest in the environmental area is on the rise, he said. But law schools have been slow to establish necessary curriculum reform.

"In most law schools, the compulsory courses are those required to pass the bar exam: tax law, corporation law, accounting, modern real estate, contracts," says Malcolm Baldwin of the Conservation Foundation. "They are not as illustrative of social conflicts and relevant community needs as courses on environmental law."

AMERICA'S WORKING WOMEN

(Mr. GETTYS asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. GETTYS. Mr. Speaker, the Business and Professional Women's Clubs which are active in my district and in every congressional district in this country have been a potent force in improving opportunities available for working women and in bringing additional dignity and prestige to the roles which women play in business and industry and government.

These fine organizations have, along with many other worthwhile activities, supported with vigor and effectiveness responsible and significant legislative programs. And they have done much to provide stimulating associations and incentives for advancement for individual working women and to instill in them renewed pride in the usefulness of their occupations and professions.

During this National Business Women's Week, I think it fitting that we pay tribute to those women of America who now staff counters and desks and offices and laboratories and clinics and operating rooms in almost all possible careers. They are doing well and creditably a lot of hard, demanding, responsible jobs. And in the course of earning a livelihood and making their contribution of efficiency and resourcefulness to their callings, they add a measure of feminine grace to the work-a-day world in which we men strive to keep up with them.

OCCUPATIONAL SAFETY AND HEALTH ACT

(Mr. SANDMAN asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. SANDMAN. Mr. Speaker, it is ironic that while we work and pray for peace in Vietnam, more Americans have been killed on the job in the past 4 years than on those battlefields. Few know that occupational injuries kill more than 14,000 persons every year, disable another 2 million, and cost 250 million man-days of production.

Unless a catastrophe occurs, like the West Virginia coal mine disaster, no newsmen or TV cameras alert the Nation as its workers die, or are maimed, singly and alone. These industrial casualty lists go on year after year despite a half century of organized safety activity in industry, by unions, and in State and Federal Governments.

Pioneers in industry and elsewhere have taught us how to control most work hazards; how to prevent most accidents and injuries; yet the Nation's injury rate

still rises. This can only mean that we have failed to apply universally the safety know-how we have.

Now the time has come for a comprehensive occupational safety and health act which will build on the experience and expertise we have so painfully acquired; which will utilize the resources of State and Federal agencies to research job health and safety problems; to develop and enforce National standards. President Nixon has presented such a bill to Congress. I earnestly urge its passage.

CONFERENCE REPORT ON H.R. 10595, GREAT PLAINS CONSERVATION PROGRAM

Mr. POAGE submitted the following conference report and statement on the bill (H.R. 10595) to amend the act of August 7, 1956 (70 Stat. 1115), as amended, providing for a Great Plains conservation program:

CONFERENCE REPORT (H. REPT. No. 91-584)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 10595) to amend the act of August 7, 1956 (70 Stat. 1115), as amended, providing for a Great Plains conservation program, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"That section 16(b)(1) of the Soil Conservation and Domestic Allotment Act, as amended, is amended to read as follows:

"'(1) the Secretary is authorized, within the amounts of such appropriations as may be provided therefor, to enter into contracts of not to exceed ten years with owners and operators of land in the Great Plains area having such control as the Secretary determines to be needed of the farms, ranches, or other lands covered thereby; but such contracts shall be entered into with respect to lands, other than farms or ranches, only where erosion is so serious as to make such contracts necessary for the protection of farm or ranch lands. Such contracts shall be designed to assist farm, ranch, or other land owners or operators to make, in orderly progression over a period of years, changes in their cropping systems or land uses which are needed to conserve, develop, protect, and utilize the soil and water resources of their farms, ranches, and other lands, and to install the soil and water conservation measures and carry out the practices needed under such changed systems and uses. Such contracts may be entered into during the period ending not later than December 31, 1981, with respect to farms, ranches, and other lands in counties in the Great Plains area of the States of Colorado, Kansas, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming, designated by the Secretary as susceptible to serious wind erosion by reason of their soil types, terrain, and climatic and other factors. The land owner or operator shall furnish to the Secretary a plan of farming operations or land use which incorporates such soil and water conservation practices and principles as may be determined by him to be practicable for maximum mitigation of climatic hazards of the area in which such land is located, and which outlines a schedule of proposed changes in cropping systems or land use and of the conservation measures which are to be carried out on the farm, ranch, or other land during the contract period to protect the farm, ranch, or other land from erosion and deterioration by natural causes. Such plan may also include practices and measures for (a) enhancing fish and wildlife and recreation resources, (b) promoting the economic use of land, and (c) reducing or controlling agricultural related pollution. Inclusion in the farm plan of these practices shall be the exclusive decision of the land owner or operator. Approved conservation plans of land owners and operators developed in cooperation with the soil and water conservation district in which their lands are situated shall form a basis for contracts. Under the contract the land owner or operator shall agree—

"'(i) to effectuate the plan for his farm, ranch, or other land substantially in accordance with the schedule outlined therein unless any requirement thereof is waived or modified by the Secretary pursuant to paragraph (3) of this subsection;

"'(ii) to forfeit all rights to further payments or grants under the contract and refund to the United States all payments or grants received thereunder upon his violation of the contract at any stage during the time he has control of the land if the Secretary, after considering the recommendations of the soil and water conservation district board, determines that such violation is of such a nature as to warrant termination of the contract, or to make refunds or accept such payment adjustments as the Secretary may deem appropriate if he determines that the violation by the owner or operator does not warrant temination of the contract;

"'(iii) upon transfer of his right and interest in the farm, ranch, or other land during the contract period to forfeit all rights to further payments or grants under the contract and refund to the United States all payments or grants received thereunder unless the transferee of any such land agrees with the Secretary to assume all obligations of the contract;

"'(iv) not to adopt any practice specified by the Secretary in the contract as a practice which would tend to defeat the purposes of the contract;

"'(v) to such additional provisions as the Secretary determines are desirable and includes in the contract to effectuate the purposes of the program or to facilitate the practical administration of the program.

"'In return for such agreement by the landowner or operator the Secretary shall agree to share the cost of carrying out those conservation practices and measures set forth in the contract for which he determines that cost sharing is appropriate and in the public interest. The portion of such cost (including labor) to be shared shall be that part which the Secretary determines is necessary and appropriate to effectuate the physical installation of the conservation practices and measures under the contract;'

"SEC. 2. Section 16(b)(2) of said Act is amended to read:

"'(2) the Secretary may terminate any contract with a land owner or operator by mutual agreement with the owner or operator if the Secretary determines that such termination would be in the public interest, and may agree to such modification of contracts previously entered into as he may determine to be desirable to carry out the purposes of the program or facilitate the practical administration thereof or to accomplish equitable treatment with respect to other similar conservation, land use, or commodity programs administered by the Secretary;'

"SEC. 3. Section 16(b)(7) of said Act is amended, to read:

"'(7) there is hereby authorized to be appropriated, without fiscal year limitations, such sums as may be necessary to carry out this subsection: *Provided*, That the total cost of the program (excluding administrative costs) shall not exceed $300,000,000, and for any program year payments shall not exceed $25,000,000. The funds made available for the program under this subsection may be expended without regard to the maximum payment limitation and small payment increases required under section 8(e) of this Act, and may be distributed among States without regard to distribution of funds formulas of section 15 of this Act. The program authorized under this subsection shall be in addition to, and not in substitution of, other programs in such area authorized by this or any other Act.'" and the Senate agree to the same.

That the House recede from its amendment to the title of the bill and agree to the same.

W. R. POAGE,
FRANK A. STUBBLEFIELD,
GRAHAM PURCELL,
PAGE BELCHER,
CHARLES M. TEAGUE,
Managers on the Part of the House.

JAMES O. EASTLAND,
SPESSARD L. HOLLAND,
B. EVERETT JORDAN,
GEORGE D. AIKEN,
HENRY BELLMON,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two houses to the amendment of the Senate to the bill (H.R. 10595) to amend the Act of August 7, 1956 (70 Stat. 1115), as amended, providing for a Great Plains conservation program, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report.

The differences between the House bill and the Senate amendment and how those differences were reconciled in the conference are as follows:

(1) The Senate amendment included specific language to give the Secretary more flexibility in entering into contracts where customary control is through annual leasing. Both the reports from the U.S. Department of Agriculture and the House Committee on Agriculture and stated this as a purpose of the legislation. The House conferees accepted this Senate amendment.

(2) The Senate amendment also included specific language to limit the Secretary's contract authority on land units that are not generally considered as farms or ranches to instances where erosion control is necessary. Both the reports from the U.S. Department of Agriculture and the House Committee on Agriculture had stated this as a purpose of the legislation. The House conferees accepted this Senate amendment also.

(3) The Senate amendment retained the $150 million authorization in present law which *excludes* administrative costs and runs through December 31, 1971. The Senate amendment also authorized an additional $250 million for the 10-year period ending December 31, 1981, but *included* administrative costs within this authorization. The House bill carried a total authorization of $300 million for the Great Plains program through calendar year 1981 and *excluded* all administrative costs from this authorization.

The net effect of the Senate amendment was to authorize some $25 million to $37.5 million more for cost-sharing than the House version. Since the authorized expenditures under the present law must be subtracted from the $300 million authorization provided in the House bill, the House version, even though *excluding* administrative costs, provided a smaller authorization during the next 12 years than the Senate amendment. The Conference Committee accepted the House language in regard to both the authorization and the exclusion of administrative costs.

(4) There were several typographical and clerical changes in the Senate amendment

which were accepted by the House conferees.

(5) The Senate amendment changed the title of the bill so as to amend Section 16(b) of the Soil Conservation and Domestic Allotment Act. The title of the House bill provided for the amendment of the Act of August 7, 1956 (70 Stat. 1115), the original statute enacting the Great Plains program. The House conferees accepted this Senate amendment.

W. R. POAGE,
FRANK A. STUBBLEFIELD,
GRAHAM PURCELL,
PAGE BELCHER,
CHARLES M. TEAGUE,
Managers on the Part of the House.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. MAILLIARD, for the remainder of the week, on account of official business.

Mr. CORMAN, for Tuesday, October 21, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BROWN of California, for 60 minutes, on October 23.

Mr. PATMAN, for 60 minutes, on October 21, and on October 22, for 60 minutes.

Mr. HECHLER of West Virginia, for 1 hour, today.

Mr. GROSS, for 30 minutes, today.

Mr. CONTE (at the request of Mr. LANDGREBE), for 20 minutes, today; to revise and extend his remarks and include extraneous matter.

(The following Members (at the request of Mr. PREYER of North Carolina), to revise and extend their remarks and include extraneous matter:)

Mr. REUSS, for 30 minutes, today.

Mr. GONZALEZ, for 10 minutes, today.

Mr. RYAN, for 60 minutes, on November 14.

EXTENSIONS OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SAYLOR.

Mr. ANNUNZIO (at the request of Mr. BARRETT) to extend his remarks in Committee of the Whole following Mr. BARRETT.

(The following Members (at the request of Mr. LANDGREBE) and to include extraneous matter:)

Mr. ROUDEBUSH.
Mr. BUTTON.
Mr. MCKNEALLY in two instances.
Mr. WYMAN in two instances.
Mr. BROOMFIELD.
Mr. CHAMBERLAIN.
Mr. NELSEN.
Mr. BRAY in three instances.
Mr. ASHBROOK in two instances.
Mr. CONTE in two instances.
Mr. RHODES in five instances.
Mr. SCHWENGEL in two instances.
Mr. WOLD.
Mr. LANDGREBE.
Mr. KUYKENDALL.
Mr. CRAMER.
Mr. DUNCAN.
Mr. WYDLER.
Mr. ANDREWS of North Dakota.
Mrs. MAY.
Mr. HOGAN.
Mrs. DWYER.
Mr. SCOTT.
Mr. WIDNALL.
Mr. WYATT.
Mr. DERWINSKI in two instances.

(The following Members (at the request of Mr. PREYER of North Carolina) and to include extraneous matter:)

Mr. BOLAND.
Mr. GAYDOS in three instances.
Mrs. GRIFFITHS.
Mr. PEPPER.
Mr. DINGELL in three instances.
Mr. PURCELL.
Mr. MIKVA in six instances.
Mr. GONZALEZ in two instances.
Mr. MURPHY of New York.
Mr. TUNNEY.
Mr. LEGGETT.
Mrs. SULLIVAN in four instances.
Mr. RARICK in two instances.
Mr. NICHOLS in two instances.
Mr. THOMPSON of New Jersey in four instances.
Mr. KYROS.
Mr. EILBERG.
Mr. WILLIAM D. FORD in two instances.
Mr. KASTENMEIER in two instances.
Mr. OTTINGER.
Mr. HAGAN in two instances.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule referred as follows:

S. 2264. An act to amend the Public Health Service Act to provide authorization for grants for communicable disease control and vaccination assistance; to the Committee on Interstate and Foreign Commerce.

S. 2452. An act to amend section 211 of the Public Health Service Act to equalize the retirement benefits for commissioned officers of the Public Health Service with retirement benefits provided for other officers in the uniformed services; to the Committee on Interstate and Foreign Commerce.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 74. An act to place in trust status certain lands on the Standing Rock Sioux Indian Reservation in North and South Dakota;

S. 775. An act to declare that the United States shall hold certain land in trust for the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota; and

S. 921. An act to declare that certain federally owned land is held by the United States in trust for the Cheyenne River Sioux Tribe of the Cheyenne River Indian Reservation.

BILLS PRESENTED TO THE PRESIDENT

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee did on the following days present to the President, for his approval, bills of the House of the following titles:

On October 20, 1969:

H.R. 12781. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending June 30, 1970, and for other purposes; and

H.R. 13194. An act to authorize special allowances for lenders with respect to insured student loans under title IV–B of the Higher Education Act of 1965 when necessary in the light of economic conditions in order to assure that students will have reasonable access to such loans for financing their education, and to increase the authorizations for certain other student assistance programs.

On October 21, 1969:

H.R. 11039. An act to amend further the Peace Corps Act (75 Stat. 612), as amended.

ADJOURNMENT

Mr. PREYER of North Carolina. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 57 minutes p.m.) the House adjourned until tomorrow, Wednesday, October 22, 1969, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1268. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to authorize and foster joint rates for international transportation of property, to facilitate the transporation of such property, and for other purposes; to the Committee on Interstate and Foreign Commerce.

1269. A letter from the Executive Director, National Conference on Citizenship, transmitting the annual audit of the Conference for the fiscal year ended June 30, 1969, pursuant to the provisions of section 2, Public Law 88–504; to the Committee on the Judiciary.

1270. A letter from the Comptroller General of the United States, transmitting a report of a special review of the administration of aid to families with dependent children in New York City, conducted jointly by the Department of Health, Education, and Welfare and the New York State Department of Social Services; to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. STAGGERS: Committee of conference. Conference report on S. 1689 (Rept. No. 91–581). Ordered to be printed.

Mr. WAGGONNER: Committee on House Administration. H.R. 13949. A bill to provide certain equipment for use in the offices of Members, officers, and committees of the House of Representatives, and for other purposes (Rept. No. 91–582). Referred to the Committee of the Whole House on the State of the Union.

Mr. GALLAGHER: Committee on Foreign Affairs. House Concurrent Resolution 178. Concurrent resolution to express the sense of Congress on participation in the Ninth International Congress on High Speed Photography, to be held in Denver, Colo., in August 1970 (Rept. No. 91–583). Referred to the House Calendar.

Mr. POAGE: Committee of conference. Conference report on H.R. 10595 (Rept. No. 91–584). Ordered to be printed.

Mr. YOUNG: Committee on Rules. House Resolution 586. Resolution providing for the consideration of H.R. 14001, a bill to amend the Military Selective Service Act of 1967 to authorize modifications of the system of selecting persons for induction into the Armed

Forces under this act (Rept. No. 91–585). Referred to the House Calendar.

Mr. SISK: Committee on Rules. House Resolution 587. Resolution providing for the consideration of H.R. 6778, a bill to amend the Bank Holding Company Act of 1956, and for other purposes (Rept. No. 91–586). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DERWINSKI:

H.R. 14425. A bill to provide for the issuance of a commemorative postage stamp in honor of the 1,000th anniversary of the birth of St. Stephen of Hungary; to the Committee on Post Office and Civil Service.

By Mr. SAYLOR:

H.R. 14426. A bill to provide additional penalties for the use of firearms in the commission of certain crimes of violence; to the Committee on the Judiciary.

By Mr. FULTON of Tennessee:

H.R. 14427. A bill to provide for the more efficient development and improved management of national forest commercial forest land, to establish a high timber yield fund, and for other purposes; to the Committee on Agriculture.

H.R. 14428. A bill to authorize the Federal National Mortgage Association to purchase conventional mortgages, and for other purposes; to the Committee on Banking and Currency.

H.R. 14429. A bill to increase the availability of guaranteed home loan financing for veterans and to increase the income of the national service life insurance fund; to the Committee on Veterans' Affairs.

By Mr. GILBERT:

H.R. 14430. A bill to amend the Social Security Act to provide increases in benefits under the old-age, survivors, and disability insurance program, to provide health insurance benefits for the disabled, and for other purposes; to the Committee on Ways and Means.

By Mr. GILBERT (for himself, Mr. ADAMS, Mr. ADDABBO, Mr. ANNUNZIO, Mr. BIAGGI, Mr. BRASCO, Mr. BURTON of California, Mr. BUTTON, Mr. BYRNE of Pennsylvania, Mr. CAREY, Mrs. CHISHOLM, Mr. CLARK, Mr. CONYERS, Mr. DENT, Mr. EDWARDS of California, Mr. FARBSTEIN, Mr. FEIGHAN, Mr. FLOOD, Mr. GRAY, and Mrs. GREEN of Oregon):

H.R. 14431. A bill to amend the Social Security Act to provide increases in benefits under the old-age, survivors, and disability insurance program, to provide health insurance benefits for the disabled, and for other purposes; to the Committee on Ways and Means.

By Mr. GILBERT (for himself, Mr. HALPERN, Mr. HECHLER of West Virginia, Mr. HICKS, Mr. HOWARD, Mr. KLUCZYNSKI, Mr. KOCH, Mr. LEGGETT, Mr. MADDEN, Mr. MATSUNAGA, Mr. MIKVA, Mr. O'KONSKI, Mr. OLSEN, Mr. O'NEILL of Massachusetts, Mr. PODELL, Mr. POWELL, Mr. PRICE of Illinois, Mr. PUCINSKI, Mr. REES, Mr. ROONEY of Pennsylvania, Mr. SCHEUER, Mr. TIERNAN, and Mr. TUNNEY):

H.R. 14432. A bill to amend the Social Security Act to provide increases in benefits under the old-age, survivors, and disability insurance program, to provide health insurance benefits for the disabled, and for other purposes; to the Committee on Ways and Means.

By Mr. KOCH:

H.R. 14433. A bill to provide long-term financing for expanded urban mass transportation programs, and for other purposes; to the Committee on Banking and Currency.

By Mr. NICHOLS:

H.R. 14434. A bill to provide a pension for veterans of World War I and their widows; to the Committee on Veterans' Affairs.

By Mr. RYAN:

H.R. 14435. A bill to amend section 236 of the National Housing Act and section 101 of the Housing and Urban Development Act of 1965 to reduce from 25 to 20 percent of the tenant's income the maximum rent which may be charged for a dwelling unit in a section 236 project or a dwelling unit qualifying for assistance under the rent supplement program; to the Committee on Banking and Currency.

By Mr. TEAGUE of Texas (by request):

H.R. 14436. A bill to amend title 38, United States Code, to provide special rates of dependency and indemnity compensation for widows of veterans who had certain service-connected disabilities, to provide a death gratuity for such widows, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. YATRON:

H.R. 14437. A bill to amend title II of the Social Security Act to provide a 50-percent, across-the-board increase in monthly benefits thereunder, with the resulting benefit costs being borne equally by employers, employees, and the Federal Government; to the Committee on Ways and Means.

By Mr. BOLAND:

H.R. 14438. A bill to protect interstate and foreign commerce by prohibiting the movement in such commerce of horses which are "sored," and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. CRAMER:

H.R. 14439. A bill to amend the Internal Revenue Code of 1954 to increase the penalties for the unlawful transportation of narcotic drugs and to make it unlawful to solicit the assistance of or use a person under the age of 18 in the unlawful trafficking of any such drug; to the Committee on Ways and Means.

By Mr. HASTINGS:

H.R. 14440. A bill to encourage the growth of international trade on a fair and equitable basis; to the Committee on Ways and Means.

By Mr. JOHNSON of California (for himself, Mr. DON H. CLAUSEN, Mr. WYATT, Mr. DELLENBACK, and Mr. SISK):

H.R. 14441. A bill to provide a method for paying costs of fires caused without negligence in connection with national forest timber sales operations; to the Committee on Agriculture.

By Mrs. MAY:

H.R. 14442. A bill to provide for payments on certain outstanding bonds or other obligations secured by lands acquired for Federal reclamation projects, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MELCHER:

H.R. 14443. A bill to amend the Tariff Act of 1930 so as to exempt certain private aircraft entering or departing from the United States and Canada at night or on Sunday or a holiday from provisions requiring payment to the United States for overtime services of customs officers and employees; to the Committee on Ways and Means.

By Mr. MILLER of Ohio:

H.R. 14444. A bill to encourage the growth of international trade on a fair and equitable basis; to the Committee on Ways and Means.

By Mr. NELSEN:

H.R. 14445. A bill to amend the Internal Revenue Code of 1954 with respect to the additions to the reserves for bad debts of certain agricultural and livestock credit corporations; to the Committee on Ways and Means.

By Mr. WHITE:

H.R. 14446. A bill to provide for the construction and maintenance of a fence near the international boundary between the United States and Mexico in the city of El Paso, Tex.; to the Committee on Ways and Means.

By Mr. CHARLES H. WILSON:

H.R. 14447. A bill to provide additional benefits for optometry officers of the uniformed services; to the Committee on Armed Services.

By Mr. ABERNETHY (for himself, Mr. WAGGONNER, Mr. DOWDY, Mr. HENDERSON, Mr. MONTGOMERY, Mr. BLANTON, Mr. GETTYS, Mr. GRIFFIN, Mr. ANDREWS of Alabama, Mr. MCMILLAN, and Mr. HAGAN):

H. Con. Res. 420. Concurrent resolution expressing the sense of the Congress with respect to the revocation of the United Nations economic sanctions against Southern Rhodesia; to the Committee on Foreign Affairs.

By Mr. DE LA GARZA:

H. Con. Res. 421. Concurrent resolution urging the adoption of policies to offset the adverse effects of governmental restrictions upon the housing industry; to the Committee on Ways and Means.

By Mr. NICHOLS:

H. Con. Res. 422. Concurrent resolution urging the adoption of policies to offset the adverse effects of governmental monetary restrictions upon the housing industry; to the Committee on Ways and Means.

By Mr. WAGGONNER:

H. Con. Res. 423. Concurrent resolution expressing the sense of the Congress to the revocation of the U.N. sanctions against Southern Rhodesia; to the Committee on Foreign Affairs.

By Mr. WILLIAM D. FORD:

H. Res. 585. Resolution establishing a Select Committee on Congressional Mailing Standards; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FRELINGHUYSEN:

H.R. 14448. A bill for the relief of Catrina Nappo; to the Committee on the Judiciary.

By Mr. SHRIVER:

H.R. 14449. A bill for the relief of Eugene M. Sims, Sr.; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

300. By Mr. COUGHLIN: Petition of resolution of Upper Gwynedd Township, Montgomery County, Pa., regarding tax status of muncipal bonds; to the Committee on Ways and Means.

301. By the SPEAKER: Petition of the City Council, Marysville, Calif., relative to the Army Corps of Engineers flood control project fund for the fiscal year 1970–71; to the Committee on Appropriations.

302. Also, petition of Board of Levee Commissioners, Marysville, Calif., relative to the Army Corps of Engineers flood control project fund for the fiscal year 1970–71; to the Committee on Appropriations.

303. Also, petition of Lake City Council No. 26, Junior Order United American Mechanics, Lake City, Tenn., relative to placing the flag in public school classrooms; to the Committee on Education and Labor.

304. Also, petition of the Board of Commissioners, Livingston County, Mich., relative to achieving peace in Vietnam; to the Committee on Foreign Affairs.

EXTENSIONS OF REMARKS

THE PROSPECTS FOR WYOMING—"WE SHOULD NOT FEEL LONESOME"

HON. JOHN WOLD

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. WOLD. Mr. Speaker, last week Senator CLIFFORD HANSEN of Wyoming and I responded to a story in the Wall Street Journal which gave a gloomy forecast for the future of my district, the great State of Wyoming. We pointed out the article had missed many developments in our State and, more than that, had made an erroneous appraisal of our State's economic and demographic potential. Indeed, many of what the author called liabilities seemed to us to be assets.

It is heartening to know that there are observers whose assessments of Wyoming's future are optimistic. Therefore, I would like to insert at this point an editorial from the Casper Star-Tribune of October 14, 1969, which incorporates an editorial from the Denver-Post concerning the article on Wyoming:

WE SHOULDN'T FEEL LONESOME

The Denver Post had an editorial comment Sunday on the Wyoming population and economic picture. We believe it is a very fair appraisal of the situation. As an out-of-state newspaper, the Post can look at it with a somewhat more unbiased view than those of us who are in the midst of these problems.

The Post's editorial is quoted in full:

"Wyoming has lost population since the 1960 census which showed 330,000 residents and that's a disgrace in the usual up-and-at-em frame of mind prevalent since the pioneers decided the West had to be won.

"We think differently.

"Obviously, it is painful to lose population. A town that needs all the taxes it can possibly get to run its school system, or town hall, is hurt every time a house or business building turns up vacant.

"But thinking of Wyoming as a whole there's a lot to be said for having a small, manageable population—at least at this point in history.

"The entire country is just waking up to the fact that environment is a lot easier to protect from air and water pollution and urban decay before they start than to try to salvage affairs after the damage has been done.

"In that regard Wyoming has a wonderful opportunity to guide its development—to set standards for industry, to watch where the Atomic Energy Commission buries its bombs and, above all, to be selective in the type of industry it seeks out.

"Elsewhere in today's Denver Post there is a story detailing plans for a new uranium mining town to be built near Medicine Bow. Within a year there will be more than 1,000 residents, with more to come.

"If stories like that do not reassure develop-or-bust Wyomingites, we feel confident in assuring Wyoming that growth will come. The mathematics of U.S. population growth underwrite the inevitability of growth. Just as is the case with Colorado, the chance of locating new industry in a clean, recreation-rich Western state will prove an overpowering lure to more industrialists than we need.

"So to those Wyomingites who read disaster into last week's article in the Wall Street Journal entitled, 'The Lonesome Land,' we'd say, 'Cheer up.' You'll soon have more industrial suitors than a school marm in an oldtime Wyoming cowtown on Saturday night. It'll be a case of picking out the good-looking ones."

A MEMOIR BY FORMER SENATOR CARL HAYDEN

HON. LEE METCALF

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Tuesday, October 21, 1969

Mr. METCALF. Mr. President, I invite the attention of Senators to an article published in the September 1969 issue of Highway User. It was written by the former sheriff of Maricopa County, our beloved Senator Carl Hayden, who retired last year but who, it is refreshing to note, has maintained his interest in the national scene, in the Senate, and in Congress and its many problems—in this instance, highways.

I ask unanimous consent that Senator Hayden's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IN RETROSPECT: "I FEEL FULLY REPAID"

(By former U.S. Senator Carl Hayden)

As chairman of the Senate Committee on Appropriations, it was my job to see that the Interstate Highway System received a fair share of the money collected from the American taxpayers.

Since my final return from Washington, I have not failed to observe the thousands of automobiles that move with speed over an abundance of paved highways. This reminds me that when I was the sheriff of Maricopa County over a half century ago I pleaded with the Board of Supervisors to buy an automobile for official use by me and my four deputies. The supervisors turned me down cold. To serve a warrant or a summons we had to ride horseback and be compensated at a rate of 30 cents a mile.

My recollection is that in 1916 Congressman Dorsey W. Shackleford, of Missouri, sponsored a good roads bill, that passed the House of Representatives, which authorized Congress to appropriate funds to assist in the building of State roads. When the bill came over to the Senate, Senator John Bankhead of Alabama took charge of it. It became known as the Bankhead Act of 1916.

TO THE WHITE HOUSE

One day, Senator Bankhead said to Senator Kenneth McKellar of Tennessee: "President Wilson doesn't like me, but he likes you. I want you to go with me to the White House to see if he will agree to the appropriation of money in accordance with my road bill." Senator Bankhead told Senator McKellar that he would be glad to obtain $5 million for that purpose.

When they brought up the subject with President Wilson, he said that he had grave doubts about whether he should have signed that bill—that it was a State, and not a Federal, function to build roads.

The First World War was then going on in Europe. Senator McKellar said that in the event of war, good roads would expedite the movement of troops. The President said he had not thought of that, and asked how much money they wanted. McKellar replied that they would leave that to his judgment. They were delighted when President Wilson suggested $15 million, and that was the beginning of Federal aid to highway construction in the United States.

After I became a member of the Senate in 1927, I was made chairman of the Committee on Roads, and in that way, became acquainted with officials of the State highway departments, who appeared each year to ask for Federal aid for the construction of roads.

When Franklin Roosevelt became President, the nation was in what was called the Great Depression, and he was anxious to provide work for the unemployed.

I went to the White House and told him that there was no better way to accomplish that purpose than by the construction of highways.

He asked me how much it would cost, and I said $400 million. The President wanted to know how I arrived at that figure. I told him that I had asked each State highway department how much it could usefully spend and $400 million was the amount recommended. He said to go tell Bob Wagner to put it in the Work Relief Bill, which became a law on June 14, 1933.

NATIONAL SYSTEM

In 1934, Congressman Cartwright of Oklahoma sponsored the customary Federal aid to roads bill. When the State highway officials appeared before my Senate committee, I told them to go home and come back within a month with a draft of a bill providing for a national highway system. They did that, and the bill became a law on March 26, 1934.

Indian reservations make up so much of the area of Arizona and New Mexico, that I inserted a provision in the Federal Highway Act, which provides that the States do not have to match Federal funds expended on Indian reservations. One year, the Arizona State Highway Commission was "hard up," so a highway was constructed within the San Carlos Indian Reservation which passed over the top of the Coolidge Dam. A more direct and much better highway connecting Gila and Graham Counties has since been constructed.

I have been asked a number of times why Arizona needed Interstate highways. My answer was that in northern Arizona we have the Petrified Forest and the Grand Canyon, which we want the American people to see, and in southern Arizona we have one of the finest winter climates anywhere in the United States, to which we want all of those who ride in automobiles to have access.

When on a hot summer day I get seated in an automobile and can be up into a pine forest in less than two hours, I feel fully repaid for all the time I devoted to Federal aid to the construction of highways.

MR. AGNEW DOES NOT UNDERSTAND

HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. THOMPSON of New Jersey. Mr. Speaker, last Sunday at a Republican fundraising dinner in New Orleans, the Vice President—although he did not use my name—said I was an effete, impudent,

and masochistic snob. He also managed to include in that invective countless Americans, perhaps even a majority of Americans.

My crime, and theirs, was to support, and in many cases, take part in the October 15 moratorium to protest our involvement in Vietnam.

As one who has often found humor in the Vice President's antics, I find this latest bit of sounding off both outrageous and incredibly stupid.

It is not the name calling that I mind so much as Mr. AGNEW's implication that I and many other Americans are disloyal to our country. I consider myself a loyal American, and I consider most of those in this country who supported the moratorium to be loyal Americans.

Mr. AGNEW is terribly confused; he equates policies to principles.

Mr. AGNEW does not understand that the test of loyalty is adherence to principles, not to policies. Whenever I believe our principles are not being reflected in our policies, I will protest—as every good American should and as many did on October 15.

I agree with the headline on an editorial in today's Washington Post that Mr. AGNEW is "no longer a laughing matter." I include it and an editorial from the New York Times entitled "Mr. AGNEW Doesn't Understand" into the RECORD:

[From the Washington Post, Oct. 21, 1969]

MR. AGNEW: NO LONGER A LAUGHING MATTER

By writ and by tradition the vice-presidency is an office in which there is practically nothing to do. The trick of course lies in doing it well—in standing back and learning, in readying oneself for any emergency, in supporting the President backstairs where one can and in doing nothing that goes against his interest. Clearly, then, in the case of Vice President Agnew we are faced with one of two possibilities. One is that Mr. Agnew with his ten-month roadshow of gaffes, goofs, and raw demagoguery hasn't caught on to his job. The other is that he has—that Mr. Nixon is authorizing and/or approving the Vice President's public dicta as part of some elaborate (and foredoomed) political game. Neither is particularly reassuring, but if the latter is the case, we should be told.

In New Orleans on Sunday the Vice President made this necessary with his comments on the war and on the motivations of those involved in last week's Vietnam moratorium:

"If the moratorium had any use whatever, it served as an emotional purgative for those who feel the need to cleanse themselves of their lack of ability to offer a constructive solution to the problem."

And again:

"A spirit of national masochism prevails, encouraged by an effete corps of impudent snobs who characterize themselves as intellectuals. It is in this setting of dangerous oversimplification that the war in Vietnam achieves its greatest distortion."

And again:

"Great patriots of past generations would find it difficult to believe that Americans would ever doubt the validity of America's resolve to protect free men from totalitarian attack. Yet today we see those among us who prefer to side with an enemy aggressor rather than stand by this free nation."

Mr. Agnew also let it be known that those who participated in the moratorium were guilty of the crime of supporting "a massive public outpouring of sentiment against the foreign policy of the President of the United States" and of not caring to "disassociate themselves from the objective enunciated by the enemy in Hanoi."

Now what is interesting in all this is certainly not the Vice President's line of thought or his ham-handed effort to discredit the motivation and question the loyalty of a large and respectable part of the political community: we have seen and heard all that before. It is not even to the main point to observe that Mr. Agnew has outdone himself in assuring the hostility of a part of the electorate Mr. Nixon has some interest in calming down. Nor does the subject upon which Mr. Agnew chose to discourse with such vehemence permit his remarks to be received with the national giggle they so frequently inspire. This time around the only question worth asking is what the President thought of what Mr. Agnew said.

Mr. Nixon is engaged in a highly chancy and complicated maneuver to end the war in Vietnam in a way which will not do utter violence to this country's interests abroad and which will not result in a terrible rending of the social fabric at home—in a right-to-middle uprising based on charges of betrayal and sell-out. At least that is what you can hear any day of the week from those behind the scenes in his administration who argue the case for his method of disengagement and who beg understanding of it. Simultaneously we witness Vice President Agnew out fomenting precisely the kinds of emotions others in the White House profess to fear and claim their strategy is designed in large measure to avoid. It really will not do for Mr. Ziegler, the White House spokesman, merely to indicate that vice presidential speeches for party gatherings are not cleared in advance by the White House. If Mr. Nixon wishes to be in any way convincing in this matter or to preserve the notion that he is acting in good faith, then he must repudiate the excesses of his Vice President or silence him or—ideally—do both.

[From the New York Times, Oct. 21, 1969]

MR. AGNEW DOES NOT UNDERSTAND

Vice President Agnew demonstrated a truly monumental insensitivity to the most profound concern of millions of Americans—and particularly the nation's youth—when he described last week's Vietnam Moratorium as the creation of "an effete corps of impudent snobs who characterize themselves as intellectuals." He has learned nothing from the remarkable demonstration in which idealistic young men and women from the nation's campuses were joined by Americans of every generation and from all walks of life in an urgent appeal that the United States Government follow a more effective path to peace.

The purpose of the Moratorium was to underscore the need for active pursuit of peace in Vietnam. Far from undermining the President's position of leadership, it presented him with a strengthened mandate to carry out with more vigor and more determination the basic policy he says he is pursuing. Neither he nor Mr. Agnew gives evidence of understanding what the Moratorium was all about.

Mr. Agnew darkly hinted at some treasonable duplicity because the planners of the Moratorium had failed to renounce support from Hanoi—a support they had never asked.

He sought easy applause from a Republican fund-raising audience in New Orleans by ascribing the success of the Moratorium to "a spirit of national masochism."

In the same speech, he lambasted the nation's youth in sweeping and ignorant generalizations, when it is clear to all perceptive observers that American youth today is far more imbued with idealism, a sense of service and a deep-humanitarianism than any generation in recent history, including particularly Mr. Agnew's.

The ominous strains in Mr. Agnew's words are that they equate support of the war with manliness, while describing as effete those who call for a redoubling of the nation's dedication to peace. It is the mark of insecure nations and politicians to mistake unquestioning support of military ventures as the test of patriotism. This is exactly the approach to the American destiny which the most articulate and politically alert sector of the nation's young intellectuals have questioned and rejected. Mr. Agnew's incredible obtuseness can only add to the frustration of millions of Americans—young and old alike—who believe that rational dissent must be given a fair hearing. His insensitivity to this principle of American democracy will give comfort to those who preach the gospel of disruption and violence.

AWARDS PRESENTED FOR HANDICAPPED EMPLOYMENT EFFORTS IN WEST VIRGINIA—EUGENE T. TURNEY DELIVERS THOUGHTFUL ADDRESS

HON. JENNINGS RANDOLPH

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Tuesday, October 21, 1969

Mr. RANDOLPH. Mr. President, recently the first annual awards dinner of the Monongalia County Advisory Committee on Rehabilitation and Employment of the Handicapped was held in Morgantown, W. Va.

This event was truly an outstanding event, calling attention to the strides made in overcoming misconceptions about the ability of handicapped persons to be useful and productive members of the community. It also was the occasion for citing farsighted employers who have been willing to include handicapped people on their staffs.

More than 300 people attended the dinner, which itself was a tribute to the Monongalia County committee for its diligent work in advancing the cause of the handicapped in the area. Members have devoted considerable time and energy to the very worthwhile goal of opening new doors of opportunity.

I was privileged to have assisted J. Richard Downes, chairman of the advisory committee, and an untiring leader in its work in the presentation of awards.

For making special efforts to employ handicapped persons, awards were presented to Dr. James G. Harlow, president of West Virginia University; J. Wesley Ruby, president of Sterling Faucet Co.; James Berry, owner of Berry's Office Service; and Glenn W. Thorne, president of Kelly Cab Co.

Individual awards were made to Stanley Lee Dixon, who was injured in a coal mine accident and now works for the J. P. Hanger Limb Co., and Viola Elizabeth Smith, a medical secretary at West Virginia University who has been blind since birth.

Honors also were presented to two Fairmont, W. Va., men, Jack Martin, a victim of cerebral palsy and a barber, and Robert J. Helmick of the Helmick Corp.

Michael A. Oliverio, Morgantown supervisor of the West Virginia Division of Vocational Rehabilitation, was toastmaster for the dinner. Morgantown Mayor Terry T. Jones made the welcoming address.

Robert C. Goodpasture of New York,

executive vice president of National Industries for the Blind, spoke on the development of his organization as a result of the 1938 Wagner-O'Day Act under which the Federal Government purchases goods manufactured in sheltered workshops. He reported that a feasibility study is being made concerning establishment of such a workshop in West Virginia.

I commended Mr. Goodpasture for his cooperation in this evaluation in West Virginia.

Mr. President, the principal address was delivered by Eugene T. Turney, president of Anodyne Inc. of North Miami Beach, Fla. Mr. Turney has long been an advocate of hiring handicapped workers in business and industry. Sixty percent of his firm's workers could be classified as handicapped, and he has earned many awards for his leadership in this field. Mr. Turney is a member of the President's Committee on Employment of the Handicapped and vice chairman of the Miami-Dade County Chamber of Commerce Committee on Total Employment.

Mr. Turney's remarks were truly thought provoking and inspiring. I ask unanimous consent that his address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS OF EUGENE T. TURNEY, JR.

I certainly appreciate the opportunity of addressing this most distinguished gathering, for in this audience are the epitome of this Nation, people who have come to realize that they will only get out of life what they put into it.

This last week, as it has been so for many years, people all across the Nation were prompted and urged to think of those who were handicapped, and what they and we might do for them.

But for each of you, the problems of the handicapped are not problems which you pause to recognize once each year. On the contrary, we must and we will fight for the handicapped each and every day.

In fact, in the hands of this audience rests much of the hope of the handicapped, and because this is so, you and I have a grave and very serious responsibility to do much more than to merely meet here and then adjourn.

As you leave here today, you must be fully charged with new ideas, for no matter how hard you have worked in the past, no matter how imaginative you have been in the past, the old ideas and the old energy have been, in reality, only sufficient to barely keep pace with—but not overcome—a mighty rising tide.

This tide is rising, of course, because the people of the Nation, and particularly the people of this area, continue to rise.

Now, in addition to the natural population growth, we are in the middle of a savage war which each hour, each day, each month, each year returns to us hundreds upon hundreds of men who must join the ranks of the handicapped.

Many of these men left home as boys, boys full of the promise of the future, who viewed Vietnam as a dangerously unpleasant interruption in the pursuit of their lifetime dreams and ambitions.

But somewhere along the way a land mine, a booby trap, a rifle slug, or sharpnel from a mortar destroyed those dreams and ambitions, and if he was not killed outright, he then returned to us as a handicapped American veteran, his boyish looks and eagerness replaced by the hardened facts of war.

It is our job to make absolutely certain that when these boys who are now men come home, we are prepared to offer them hope—hope for effective readjustment; hope for jobs, so that they can look to a meaningful and productive future.

We can and we must reassure these young men who have given so much that, after all, what really matters is ability, and we must show them that we have the capability to help develop specific abilities irrespective of their handicaps.

Now, by the very virtue of your being here, this is the job that you have been doing, but isn't this meeting the right place and right time to ask yourself how well you are doing that job? And if the answer to that question is something less than 100%, then you should easily be able to identify where you have failed, where your weaknesses have been, and that you will leave here tonight committed to do a better job in every conceivable way and in any conceivable manner.

The biggest obstacle you face today is not the handicapped person, not rehabilitation, not preparing the handicapped for employment, but the public; specifically, the employing public—the employers.

There is, throughout America, a gap, a wide gap which separate handicapped men and women from full participation in our world of work. It is a gap, a chasm, based on years of old prejudice, on ancient myths, and in many areas stupid bigotry.

And for just as many years as these prejudices and myths have prevailed, men and women just like you and me have been trying to bridge that gap, trying but never quite fully succeeding. Unemployment and underemployment among the handicapped continue to run unnecessarily high.

Bridging the gap—educating the employing people and convincing them—is at least one-half, and possibly more of a mammoth battle. Until misconceptions can be penetrated, until the prejudices can be overcome, until the bigot can be out-bigotted, and until all the phony myths can be completely destroyed; you will never be successful in winning the other half of the most important part of the battle.

We have to prove to employers everywhere and, believe me, this is one area where there is tremendous room for improvement in our efforts, we have to prove to would-be employers all of the facts about the handicapped which you and I know to be true. We have to be better salesmen and display our industrial diamonds, our handicapped person who tolerates no lateness, no absenteeism, no tardiness, and produces 21% more production, for here indeed are untapped reserves of profit.

We have to sell the proven virtues of the handicapped worker, facts and figures have for many years clearly pointed out that the handicapped worker is tops in reliability, diligence, punctuality and, taken collectively as a group, there are just no handicapped people, only people. For every type of job there is someone within the ranks of the handicapped who can handle it. Consequently, for the handicapped person, there is always a job that fits his or her disability.

In this space age when nothing seems impossible, there really are one-armed paper hangers, blind persons with their acute sense of smell testing chemicals, deaf school teachers, handicapped potato peddlers, and telephone operators with no hands, but with two good feet and ten good toes.

There is, then, absolutely no reason why there should be unemployment—or even underemployment based solely on an alleged handicap.

And equally true, there is no earthly reason why you and I should not be able to sell these facts to the employing public.

Think of yourselves, then—if you will—as salesmen. This is the message I would leave with you. Be merchandisers; not merchandisers of pity or sorrow, but merchandisers of ability, and sell the outstanding abilities of the handicapped. Use the telephone—go door to door—never take no for an answer—and by all means, never be discouraged should someone slam the door in your face. Keep going back and back until you have made a sale, for truly, the more calls you make, the more the odds are in your favor.

I hope to again visit with you next year, and I know without a shadow of doubt, that if you will pursue this hard sell, and I repeat hard sell, for that is just what it is, that you will find great encouragement, not only among those for whom you are performing this service, but also in your own soul, and that as you rise in the morning and you look at yourself in the mirror, you will not only feel a better person but you will actually be one, for bread cast upon the waters returns its rewards in many intangible areas.

I thank you.

Mr. RANDOLPH. Mr. President, in introducing Mr. Turney, I pointed out that some of the attitudes of the public toward the handicapped were indicated by a recent poll. It showed that 50 percent believe that the only way to take care of blind people is in an institution; only 45 percent approved of sheltered workshops; 44 percent think blind people cannot hold regular employment; and 50 percent believe industry should not give regular jobs to the blind.

Handicapped people not only possess the proper attitude toward employment, but they also have the aptitudes necessary for work. They have been shown to be superior employees in many instances. They are regular in their habits, work safely, are punctual, change jobs infrequently, and give an employer a full hour of work for every hour of pay.

I commend Turney and other employers like him for their hard-nosed good business sense in employing the handicapped without any feeling of paternalism.

YOUNG LIVES OUTWEIGH OLD MEN'S PRIDE

HON. ROBERT L. LEGGETT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. LEGGETT. Mr. Speaker, I stated last week during the national student moratorium that I did not support any spirited effort to stampede the President to a decision in Southeast Asia. However, I did think it appropriate to take an inventory of our position in relation to time, our economy, and the enemy order of battle.

I stated that the alternative to being pushed into the Tonkin Gulf in 1965 was not exclusively a $40 billion per year war in 1969 and through the 1970's. I noted Mel Laird's criticism of administration policy in 1966 as chairman of the Republican policy committee when he stated in "The War and Vietnam" publication that no SEATO treaty required our massive Vietnam involvement in men and dollar expenditure.

My colleague, the gentleman from California, JOHN TUNNEY, gave a short inspirational address also on moratorium day at the Occidental College campus in California. He emphasized that old men's pride in the war should not be bal-

anced with the lives of our young men. His statement follows:

STATEMENT BY CONGRESSMAN JOHN V. TUNNEY

I am deeply honored to participate in this peaceful assembly of free men. It is eloquent rebuttal to those who say that the outcry sweeping our land today is un-American.

This responsible, nonviolent exercise of our basic freedoms will go far in winning back friends around the world who have been repulsed by our persistent, blind arrogance.

But we must make clear that today's moratorium on the war is not—as some have suggested—an attempt to bring down a President, but rather an attempt to encourage the adoption of policies that will end a war.

President Nixon has written of his "six crises." And now, many Americans—including possibly Mr. Nixon himself—have come to think of the war which he inherited as his "seventh crisis."

But this is not his crisis—it is ours. It is shared by all of us who feel its adverse impact on our society, not just by young men being sent into South Vietnam or by the families of the men who have died there.

This crisis manifests itself in a deep division that threatens our national fiber. It has shaken our economic foundation and has prevented us from attending to serious social problems at home.

And it poses a significant crisis for our representative, congressional form of Government. Those who today support this expression of national discontent, must also recognize that the war is a symptom of a serious national illness which must be checked.

In this era of push-button undeclared warfare, our governing processes have lost contact with reality and with humanity.

To prevent other catastrophic mistakes—be they in Laos, Thailand, or in Latin America where we today are bankrolling military dictatorships which ignore the will of their people—we must reform our Government so that priorities for national commitments truly reflect the will of our people.

I recognize that because of the inherent split-second decisions necessary, the power to retaliate must rest in the hands of the President in the event of a nuclear attack on our country. But in the case of the movement of troops overseas in advisory or combat roles, Congress must have the power to approve or disapprove. There must be thoughtful debate and dialogue, not merely a rubber-stamped fiat accompli.

Congress must regain the constitutional power—and accompanying responsibility—which has slipped by default into the hands of the President. He has the power to listen to the Pentagon or to the people; he must listen to the people.

Americans, through their elected Representatives, should be able to tell the Pentagon that saving a corrupt foreign regime from its own people is not worth the investment of 39,000 American lives and $30 billion a year.

The tragedy of Mr. Nixon's apparent war policy is that the goal he seeks is unattainable.

In September, he said America's principal goal was to assure "the right of the people of South Vietnam to choose their own leaders without outside imposition—either by us or by anybody else."

However, the Thieu-Ky government wants to maintain its own power by means of a U.S. military victory. So long as we support their efforts with American lives and dollars, there is no incentive for them to make the accommodations necessary to achieve the goal set by the Nixon administration.

In short, the goals of the Saigon regime are inconsistent with the avowed policy of Mr. Nixon.

The time has come to call an end to this travesty. The Saigon regime must be convinced that we will no longer protect them from their people through our military and financial assistance.

For that reason, I propose that we withdraw all our military and civilian force on a systematic calendar basis over the next 18 months.

This is more than enough time for a willing regime to reach accommodations with all political and religious factions necessary to its survival.

A frightening aspect of the war is the disunity it has caused among the American people.

Mr. Nixon's administration, like that of his predecessor, has tried to make support of its war policy synonymous with patriotism. As a result, those who dissent are accused of giving aid to the enemy.

Americans thought they were expressing dissent one year ago at the ballot box when they voted for Mr. Nixon because he said he had a plan to end the war. But now, after being in office 10 months—during which time, 9,500 American men have been withdrawn from the war in coffins—Mr. Nixon should not be surprised by the public's desire to be heard once again, to ask where is the plan, to demand action—not rhetoric—to end the biggest mistake this country ever made.

In addition to the spectre of a congress unable—perhaps unwilling—to represent the will of the people, we have a president who says he will not listen to the people.

During his campaign, Mr. Nixon stated that the office of the President should be "a place of moral leadership." He also said, "a President cannot stand aside from crisis; he cannot ignore division; he cannot simply paper over disunity."

Yet, now that an issue has reached the point of obvious crisis—now that public disaffection with the endless war builds higher and higher—his reaction is to do just what he said a president should not do.

He has stood aside; he has ignored division; he has glossed over disunity. He has remained passive, plugged his ears and retreated into himself. He has shrugged off the burden of action. He has given the warning that he will under no circumstances be affected by today's outcry.

He has closed his mind to the rising concern of millions of Americans who want to speed the vietnamization of the war, and who want to stop the senseless slaughter of our young men.

Our soldiers fight today—not to gain a military victory—but only to underscore a point at the conference table, only to give bloody substance to the statement that we are tough, that we mean business.

The list of the dead and maimed grows longer as the President asks us to table the whole issue and to avoid public discussion for 60 days. Is this when the next White House meeting will take place, when the issue of Vietnam will again be taken up?

Unfortunately, the war now has become a case of old men's pride and young men's lives.

THE VISIT BY DR. FRANZ JOSEF STRAUSS TO SOUTH CAROLINA

HON. STROM THURMOND

OF SOUTH CAROLINA

IN THE SENATE OF THE UNITED STATES

Tuesday, October 21, 1969

Mr. THURMOND. Mr. President, last week Dr. Franz Josef Strauss, who was then Finance Minister of West Germany, appeared in the capital of my State of South Carolina and delivered an extremely interesting address concerning American-European partnership. The morning newspaper of Columbia, the State, took time to reflect upon the message that Dr. Strauss brought to South Carolina and to the United States. The State's opinion is particularly timely in light of yesterday's change in the West German Government in which Willy Brandt was elected as the new Chancellor. The State says "Americans should heed the Strauss evaluation."

Although the new Chancellor has indicated that he does not intend any drastic change in German foreign policy, it is well known that he is at odds with Dr. Strauss on many issues, including that of NATO defense. Brandt has long emphasized a policy of closer relations with the Soviet Union, characterized by a warm feeling of détente.

Dr. Strauss has also favored dealing with the Soviets, but on a realistic, eyes-open policy which would take note of the fact that the Soviets have not given up their desire to dominate the world.

In its editorial, the State says that Strauss reads the common interest of the United States and West Germany clearly.

He sees the continued threat of Soviet aggression—by whatever means available—in Western Europe. He appreciates the necessity of maintaining NATO as a cohesive and powerful force-in-being to counter the Soviet threat. And he knows that a firm collective will must undergird that force if NATO is to be an effective and credible deterrent.

Americans must keep the Strauss evaluation in mind as they observe developments in Germany. The State has produced a very fine and thought-provoking editorial on this topic. I ask unanimous consent that it be printed in the Extensions of Remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From The State, Oct. 14, 1969]

AMERICANS SHOULD HEED THE STRAUSS EVALUATION

Eight years ago, as West Germany's defense minister under the late Konrad Adenauer, Franz Josef Strauss stood before a group of American newsmen visiting Bonn and warned that the long-range goal of Soviet Russia was to split the unity of Western Europe and thereby split West Europe away from the United States.

Sunday, speaking here in Columbia as the finance minister of Kurt Kiesinger's outgoing government, Strauss brought the same message in person to the people of America.

Now, as then, the burly head of the Christian Social Union sees the North Atlantic Treaty Organization as the prime and irreplaceable force to thwart the Soviet aim of dominating Europe. But today he feels that Western Europe should be playing a larger role within NATO—militarily, politically, and financially—than it has done in years.

It is understandable that an individual with strong feelings of German nationalism and Western European regionalism should advance that idea. But Strauss is prompt to spell out his conviction that United States participation must continue to be a major, if perhaps diminishing, ingredient in Western Europe's defense posture.

Strauss plainly recognizes, that the United States, as he puts it, is not now "inexhaustible paradise" capable of financing the security or the development of the rest of the Free World.

The United States, he says, can well ask why Europeans do not assume a greater

share of the burden. He goes on to provide his own answer, attributing Europe's failure to its "anachronistic political organization." Not yet, or at least not here, is he specifying just what sort of a regional reorganization he has in mind, but he does give this much of an indication of his thinking:

"Europeans must cooperate more closely in the field of defense, and must step up their military effort, gradually integrating their armed forces. On this basis, a new shape of the Alliance will have to be worked out with the United States within the framework of NATO reform."

Such talk occasionally has brought charges of his being anti-American, charges which he labels, with characteristic bluntness, "stupid." From what we know of the man, we agree with his assessment. Franz Josef Strauss impresses us as being a friend of the United States, but not just for the sake of friendship.

"Friendship," he says, "is the superstructure on the infrastructure of common interests."

Strauss, we are persuaded, reads those common interests correctly. He sees the continued threat of Soviet aggression—by whatever means available—in Western Europe. He appreciates the necessity of maintaining NATO as a cohesive and powerful force-in-being to counter the Soviet threat. And he knows that a firm collective will must undergird that force if NATO is to be an effective and credible deterrent.

He is a man of strong will himself, this Franz Josef Strauss, and Americans can watch—indeed, they can hope—for his further involvement in the affairs of West German, Western Europe, and the North Atlantic Alliance.

RESULTS OF POLL CONDUCTED ON VIETNAM WAR POLICY BY CHICOPEE, MASS., HIGH SCHOOL

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. BOLAND. Mr. Speaker, Chicopee High School in Chicopee, Mass., a community within my congressional district, has conducted a poll among its students on this Nation's war policy in Vietnam. The poll—part of Chicopee High School's observance of moratorium day—showed most students oppose further military escalation in Vietnam and feel the administration should strive harder for a negotiated settlement to the war.

The results of the poll:

CHICOPEE HIGH SCHOOL VIETNAM POLL,
OCTOBER 16, 1969

We ask you to complete the following poll as part of the schools Peace Day program. The results of the poll will be published in all area newspapers and will be entered in the United States Congressional Record.

[All answers in percent]

(1) Do you favor an immediate withdrawal of all U.S. troops in Vietnam?

Yes	50.5
No	43
No opinion	6.5

(2) Do you favor an escalation of our war effort in Vietnam?

Yes	25
No	54
No opinion	21

(3) Do you favor President Nixon's Vietnam policy?

Yes	23
No	55
No opinion	19

(4) Do you think President Nixon is pushing hard enough for peace in Vietnam?

Yes	22
No	70
No opinion	8

(5) Do you feel that matters of war and defense should be handled solely by the military chiefs?

Yes	28
No	58
No opinion	14

(6) Do you feel that the Paris peace talks will lead to a negotiated settlement of the Vietnam War?

Yes	15
No	71
No opinion	14

(7) Do you feel our government should concentrate on domestic rather than foreign problems?

Yes	68
No	15
No opinion	17

(8) Do you believe the presence of the U.S. in Vietnam is morally justifiable?

Yes	33
No	49
No opinion	18

(9) Do you think the national moratorium will: (a) bring about a quicker settlement to the war in Vietnam?

Yes	23
No	61
No opinion	16

(b) hinder our efforts for a settlement?

Yes	31
No	50
No opinion	19

(10) Are you as an individual *really* concerned with the problems facing the world today?

Yes	86
No	7
No opinion	8

PRESIDENT NIXON'S APPROACH TO EDUCATION

HON. LEE METCALF

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Tuesday, October 21, 1969

Mr. METCALF. Mr. President, not too long ago, Attorney General Mitchell, speaking on desegregation, said he wished we would pay less attention to what the administration says than to what it does. I believe that perhaps the Attorney General should not have confined his statement to one issue, for it aptly describes President Nixon's approach to education.

Recently brought to my attention was an October 1968 solicitation by the National Committee of Teachers for Nixon-Agnew, asking for help in the closing days of the presidential campaign. The main body of the solicitation consisted of a letter, over Mr. Nixon's signature, and addressed: "To My Fellow Americans." Of one of the goals to which he and Mr. AGNEW were dedicated, Mr. Nixon said:

When we talk about cutting the expense of government—whether Federal, State, or local—the one area we can't short-change is education.

I have not forgotten that, as Vice President, Mr. Nixon voted on February 3, 1960, to break a tie in the Senate to block the reconsideration of a proposal to authorize increased aid for school construction and teachers' salaries. But I had hoped that since casting this vote against a major Federal education bill, Mr. Nixon would have learned a little. I am afraid my hope has been dashed.

In that October solicitation, Mr. Nixon said that we cannot talk about cutting the expense of government when it comes to education. Yet that is exactly what the Nixon administration proposes to do. In fiscal year 1969, the Office of Education received $3,669,358,967 in Federal funds. The Nixon budget for fiscal year 1970 proposed that the Office of Education receive $3,221,745,455 in Federal funds. This was a proposed reduction of $448,613,512.

Mr. President, if the area of education was not being shortchanged by the Nixon administration, I would like someone from the administration to explain how this is so. We can, of course, be sure that the administration will forbear to point with pride to the fact that House liberals, by restoring more than $1.2 billion for the Office of Education, have held Mr. Nixon to his campaign promise in spite of himself.

Interestingly enough, the headquarters for Teachers for Nixon-Agnew was located in the now defunct Willard Hotel. Mr. President, I am afraid the Willard is not the only thing that is now defunct.

I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

I ASK YOUR HELP

(By Richard M. Nixon)

WASHINGTON, D.C.,
October 1, 1968.

TO MY FELLOW AMERICANS: As we wind up the 1968 campaign, I ask your help in achieving the goals to which Governor Agnew and I are dedicated:

American opportunity begins in the classrooms of this nation for young and old alike;

When we talk about cutting the expense of government—either federal, state, or local—the one area we can't short-change is education;

Education is the area in which we must keep doing everything that is necessary to help achieve the American Dream;

We call upon every citizen to join with us in an Action Program for Education.

In the final weeks ahead, the campaign will be an exciting adventure. I ask you to participate in that adventure by volunteering to help me and Governor Agnew. People who are committed to our goals of a better America can reach out to their friends and neighbors and enlist them in our campaign.

Only through people-to-people contact can we hope to restore decency and stability to our national life and create a better society for all. Your influence in our behalf is our most powerful campaign tool.

Will you volunteer to help? Write me in Washington.

Sincerely yours,

RICHARD M. NIXON.

THE MEANING OF MORATORIUM DAY

HON. PETER N. KYROS

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. KYROS. Mr. Speaker, as the events of October 15 pass into memory and perhaps into a page of our Nation's history, many differing opinions have been voiced as to the meaning and effect of these observances. I was particularly impressed by the views set forth in the October 19 Maine Sunday Telegram, the most widely read newspaper in my State. The editorials of this newspaper have achieved a reputation for integrity and independent thinking, as well as for their rich journalistic style. It was especially encouraging to read that the "message and meaning of moratorium day should not be negatively interpreted by President Nixon as hostile criticism to be ignored," for this is a view fully in accordance with my own objectives in joining several moratorium observances. This editorial stated further that moratorium day was "a finely motivated display, for the most part, to urge the President to show more convincingly the overriding priority he is giving to finding a peace." These opinions are also in full agreement with my own, as I stated recently in my own position paper on Vietnam, in which I pointed out that the President has inherited a war not of his own making, but that he still has the opportunity to avoid the divisiveness which has surrounded our Vietnam involvement in recent years.

There are of course many other interpretations as to the meaning of this day, but I am very proud to bring this example of Maine thinking and writing to the attention of my colleagues, as follows:

MEANING OF MORATORIUM DAY

Four days after the rallies and the marchers have dispersed, after the tolling of church bells and the reading of lists of war dead have ended—what, is the lasting meaning, if any, of Moratorium Day?

We think these points have lasting meaning.

1. Protest about Vietnam is not, as Agnew and Reagan, for example, stupidly and scroffulously imply, the work of disloyal, maladjusted, young malcontents. The demand for swifter political and military action to get America out of the war is coming from all elements of the nation. The Administration, elected to achieve peace, should welcome, rather than rebuff, this.

This fact was clearly, and bitterly, seen by President Johnson. Because he realized the feeling was strong enough to swamp him at the polls, Lyndon Johnson was smart enough not to run against it. This lesson should be pasted on every White House wall.

The victory of Richard Nixon last November, by a nose, was less his personal triumph, but the defeat rather of Johnson's Vietnam policy.

2. The phenomenal number and diversity of the participants in last Wednesday's protests signaled that the policies of Nixon, as seen by the public, do not yet add up to the degree of change they wanted when they changed Presidents. We doubt that Nixon will indeed turn a deaf ear to the Moratorium, as it was executed, though he implied such a course at his news conference before the event.

Our view is that Nixon, rightly, will not be stampeded to risky action merely by the size or fervor of the Moratorium Day demonstrations. However we think, having witnessed the unparalleled number and diversity of its participants, Nixon is likely to hurry faster along the course he has already set to end the war.

Politically, this would be wise. For ending the war, at best, will be a perilous and humiliating business for the President of the United States. Any President doing it, especially one elected in a hair-breadth victory, will surely need the full support and confidence of the nation behind him. Nixon can now gain this support by hurrying his pace toward the goal of peace, for which he was elected.

3. It is bad enough that the North Vietnamese so grossly misunderstand the meaning of Moratorium Day, as being support for their side, as claimed in their gross letter to the American public last Tuesday.

But it is infinitely worse that our own Vice President Agnew should commit the same error as the leaders of North Vietnam.

Agnew unjustly and harshly implied that those supporting the Moratorium would be aiding the enemy and prolonging the war. This mistake in his reading of the motives of millions of Americans harmed the Administration, by further alienating much of the nation which he should be seeking to unite.

4. Finally we ask—why the Moratorium, why the dissent?

One part of the answer is that no Administration yet has been able to justify the size of U.S. participation in this war as a necessity to U.S. security.

This war has never been accepted as an "American" war by the American people, though it is labeled as such by friend and foes alike overseas.

Second part of the answer is that this war has lasted far too long, without achieving any worthwhile goal. Whatever the rights and wrongs of the American part in the conflict, the root of widespread opposition to the war today is less a moral one than a pragmatic one.

The war has cost too much in lives, in money, in lost opportunities to better America at home; and, despite all this, America has not come close to winning. The thousand billion dollars spent on the military establishment since World War II has not given us a military machine able to extinguish this kind of guerrilla conflict. The American people are growingly opposed to more lives, more money, being spent in a war which the President himself has said we can never win. There is no moral fervor in support of this war among the American people. Indeed, there is mounting doubt in America whether American lives and money are being spent to support a South Vietnamese government which merits neither.

The people who protested on Moratorium Day are criticized because they do not have a practical new plan for ending the war. It is not fair to demand that the man in the street should develop such a plan. This is the job which he pays the President, and the millions of workers under his jurisdiction, to perform.

On the other hand, it is not fair for protesters to ask the President to show his negotiating cards out for all to see.

Moratorium Day did not demand any "bug-out", as some say, It was, we think, a finely motivated display, for the most part, to urge the President to show more convincingly the overriding priority he is giving to finding a peace; to encourage him to demand more effort toward peace by the leaders in South Vietnam.

Obstacle toward peace may line in some areas around the White House and in the Pentagon. But a bigger obstacle lies in Saigon. Probably the biggest lies in Hanoi.

Over this last obstacle, we have no direct influence. But over the first obstacles, in Washington and Saigon, American opinion most certainly does have influence.

The message and meaning of Moratorium Day should not be negatively interpreted by President Nixon as hostile criticism to be ignored. Rather, he might better harness this display as support for him to move more swiftly than he has hitherto moved, toward achieving the goal of peace for which he was elected.

Here is a tool for him to prod himself, prod his advisors, and above all prod South Vietnam to end the fighting and arrive at the best settlement feasible. We doubt that a settlement everlastingly postponed while fighting goes on, will be as good as one that might be negotiated before next November rolls around.

TOOTHLESS TIGER OR DEFENDER OF THE WEAK?

HON. WENDELL WYATT

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. WYATT. Mr. Speaker, the Capital Journal of Salem, Oreg., one of our leading Oregon newspapers published an editorial concerning Vietnam and moratorium day which I commend to my colleagues:

TOOTHLESS TIGER OR DEFENDER OF THE WEAK?

It's mighty difficult for a democratic government to wage any but a self-defense sort of war, as Vietnam Moratorium Day illustrates.

The right, even the duty, to debate public issues is at the heart of democratic government.

Yet the sort of debate that has raged over Vietnam almost assures the failure of our government's objectives there. For, given continuing dissent in this country, the Communists know the Americans won't have the political strength to stick it out. So why should they negotiate seriously, much less concede South Vietnam the right to determine its fate by free election?

We don't suggest our democracy wouldn't prove cohesive if the United States itself were under attack. When the Japanese attacked Pearl Harbor, for example, few disagreed with our declaration of war. (Would the same have been true if the only aggression involved Hitler's Nazis in Europe? Would it be true today if the Soviet Union moved against West Germany?) But given significant internal dissent—which seems almost inevitable in a long and costly struggle to defend anyone but ourselves—our government can hardly fight effectively.

Many Americans will say that's a good thing, that the U.S. has no business fighting in other than self-defense wars. And we would agree, if there were somebody else to protect weak nations from aggressors.

But there isn't.

If U.S. will to defend South Vietnam continues to wither, American defense commitments to dozens of foreign nations won't have much value. The leaders of these countries will quit counting upon significant U.S. help. More importantly, potential aggressors will recognize they have a hunting license to prey upon weakly defended peoples and territories. They won't continue to be held in check by fear of or respect for American might. They will recognize the world as a jungle and the U.S. as a toothless tiger.

The critics will continue to argue that South Vietnam isn't worth all the lives and dollars we have invested there. Viewed by itself, few would argue the point. But if

South Vietnam isn't, then what foreign land is? India? Israel? West Germany?

The United States has been a powerful force for stability and order for more than two decades. Those who cry today for a rapid and irresponsible withdrawal from South Vietnam are threatening far more than a few million South Vietnamese.

FIFTY YEARS OF PROGRESS FOR THE AMERICAN WORKING WOMAN

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. WYDLER. Mr. Speaker, National Business Women's Week is being observed this year from October 19 to 25 and, as this is the 50th anniversary year of the founding of the National Federation of Business and Professional Women's Clubs, it is fitting that we should mark the progress of America's working women in the past half-century.

In 1919, there were about 8 million women workers over age 14, and women made up 20 percent of the American work force. Today, 37 percent of our workers are women age 16 and, as of 1967, there were 26.6 million female workers in America.

Women began to gain opportunities in the labor market during the First World War, when the Armed Forces claimed the service of many of our young men, and workers were needed to fill vacant jobs and to contribute to the war effort in munitions factories and related fields. By 1919, 50 years ago, women had proved that they were capable of filling many positions believed earlier to be solely within the male domain. Thus, in the 1920's, it was no longer shocking for young girls to finish high school and go to the city to become secretaries or file clerks, as well as staying home to become teachers, or work in the local factory, on the assembly line, or in dressmaking shops.

During the depression, jobs were unavailable to much of our population, but the first to be fired and last to be hired were women, along with other minorities. Upon America's entry into World War II, women were again called upon to fill the jobs vacated by our soldiers, and they were also allowed to fill places left in our colleges and universities. By the end of the Second World War, women had again broken into professions once barred to them, as well as gaining education that would ordinarily have been denied them. While many of our veterans returned to school to complete an interrupted education, their wives continued to work to support the family.

Thus, women gradually gained access to many fields of employment. However, the expanding participation of women in the labor force has not been accompanied by improved utilization of their abilities, as evidenced by women's disproportionate and increased concentration in the lesser skilled, less rewarding, and less rewarded occupations. In 1940, women held 45 percent of all professional and technical positions. In 1936, they held only 36 percent of such jobs. On the other hand, the proportion of women among all service workers has increased by 14 percent since 1940.

The problem is not a legal one. During this decade much progress has been made in implementing the needs of working women. Legislation to assure women equality of pay and nondiscrimination in employuent has been passed at the Federal and State levels. The Federal Equal Pay Act of 1963 assures women equal pay for equal work. Title VII of the Federal Civil Rights Act of 1964 prohibits discrimination in employment on the basis of sex.

Yet, all of us are aware that, in reality, women are not afforded the same occupational opportunities afforded men. The reasons for this cannot be changed by acts of Congress, for they consist of the traditions and folkways of our people. We are used to the idea that woman's place is in the home; that her role is that of homemaker and mother, and not career woman and breadwinner. But in these changing times, a combination of conditions, such as the move from rural to urban living for the average American, the growth of industry, improved working conditions and shorter working hours, labor-saving devices in the home, and the emphasis on education in our society, are all working to press our women toward the working world. They have gained, in the past 50 years, some opportunity, the desire to work, and legal equality with men. The obstacle that remains is one of attitude, and it is the most difficult to overcome.

I should like to take this opportunity to salute the working women of America and to wish them the best of success in the years to follow. We need the talent and dedication of all our citizens if we are to meet and overcome the grave challenges that face this Nation today.

FUEL SHORTAGE

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. CONTE. Mr. Speaker, those of us who have warned of a possible fuel shortage in New England this winter have received soothing words from the Department of the Interior and the oil industry denying there is any real danger. Unfortunately, these words and assurances are not supported by the most recent figures on distillate—heating oil—stocks. October 10, 1969, compared to October 11, 1968, according to American Petroleum Institute:

In districts I–IV, the area east of the Rockies, total distillate stocks are 14.1 million barrels, or 7.1 percent below last year.

Along the east coast, total distillate stocks are 10.3 million barrels, or 11.3 percent below last year.

On the gulf coast—Texas and Louisiana—the area from which New England is also supplied—total stocks are 8.3 million barrels, or 20.6 percent below last year.

RECENT MORATORIUM EDITORIAL COMMENTS

HON. RICHARD L. ROUDEBUSH

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. ROUDEBUSH. Mr. Speaker, the recent Vietnam moratorium activities resulted in some interesting editorial comment in Indiana.

The editorials should provide reassurance that mid-America has not lost its perspective of the principles that made the United States the hope of the free world.

Newspapers in Indiana called the Communist-inspired general strike for what it was, "a toy in the hands of unbelievably inept, the criminally treasonous, the incredibly naive."

I believe a careful reading of these editorials will provide an insight into what Americans really believe in this critical period of American history.

The editorials are from the Kokomo Tribune, Hartford City News-Times, the Lebanon Reporter, Marion Chronicle, and the Hammond Times as reprinted in the Logansport Pharos-Tribune. The editorials follow:

[From the Kokomo (Ind.) Tribune, Oct. 15, 1969]

BLAMING AMERICA

One of the national figures who spoke up in support of the Vietnam day of protest was W. Averill Harriman, former chief U.S. negotiator at the Paris peace talks. He endorsed Wednesday's anti-war demonstrations as a "move toward peace."

This presents an odd spectacle. The protests against the war were anti-Nixon expressions because they represented disagreement with the President's policy of trying to end the war. So, in effect, Harriman was joining in criticism of Nixon.

What made this such a strange spectacle was the fact that Harriman himself wasn't able to make any headway toward getting the war stopped when he was talking with the Communists at Paris. Here is a man who failed to achieve anything like a "move toward peace" now criticizing a President who has moved much farther in trying to end the war than Harriman did.

We suspect that Harriman, who has been in the national and international limelight so long, is loath to be out of it. We wouldn't want to say that he was not motivated by sincerity, but some national figures like to get on a bandwagon when they think they see one, and the peace drive could have looked like a bandwagon to Harriman.

It seems significant to us that the Wednesday protesters directed their reproaches to their own government and not to the real barrier to peace—Hanoi. Most Americans know that it takes two to make peace, and they know that up to now the North Vietnamese have shown no interest in it.

The tendency to blame the United States for failure to end the war follows the odd posture of those critics who have always set up a clamor over U.S. bombings and U.S. "war brutality," but remained silent whenever a shocking Communist atrocity like

the mass murders of civilians at Hue came to light. Maybe there's some sort of rationale to this strange attitude, but if so a lot of Americans can't perceive what it is.

There never was a time in American history when so much fault was found with the United States and so little with the enemies of the United States. Is the U.S. the giant villain so many liberals are painting it? We can't believe a majority of the American people think so.

Usefully, Columnist David Lawrence brings up a point worth considering at this juncture in history. It is that the American people as a whole have not been given an opportunity to say whether they want peace at any price. No public opinion poll has directly asked the question whether the people favor surrender.

The customary queries have been whether the war is being handled properly or if it should be brought to an end, without reference to how this could be achieved. The issue has not been clearly put to the people. If it were, in Lawrence's view, Americans would reject any humiliating policy amounting to "peace at any price."

None of the resolutions offered in Congress or proposed by various organizations which planned demonstrations Wednesday, insisting that the U.S. make peace at once, required as a condition any reciprocal action to be taken by North Vietnam. Yet 17 senators and 47 House members supported the demonstrations.

Little wonder that Hanoi rejoiced over Wednesday, Oct. 15, which marked a show of disunity in America.

[From the Hartford City News-Times, Oct. 15, 1969]

MORATORIUM'S FOLLY

It is with great sorrow that we see so many Americans turning their backs on our great country. Many are sincere in their belief that withdrawal of United States troops from Vietnam would solve our problems. Many others know this is not true, but because of political expediency or outright communistic leanings support the idea.

We feel that politicians, who should know better, yet still try to further their own political ambitions by advocating immediate withdrawal are coming perilously close to treason.

All of us would like to see an end to all wars. We would like to see a world where all men could live in peace with their neighbors. A world free of hunger, disease, discrimination and crime. The United States can lead the way to such a world, but we cannot be a leader if we are weak and divided in our aims. We must be strong. We must be able to say to all nations, "America stands for freedom and justice for all men," and we must be able to prove it.

To those who would have us retreat each time there is a confrontation with communism we can only say, "God help you," for you are aiding and abetting the greatest enemy to freedom the world has ever known.

The danger of communistic aggression should be plain to every citizen. They have shown in their treatment of Czechoslovakia, Hungary, Poland, East Germany, Cuba and many other countries that when communism wins all freedom is lost.

Communism knows but one creed, force, and we must be strong enough to say, "you will go this far and no farther," and be able to make it stick.

The very fact that the communistic leader of North Vietnam would send an open letter to those Americans who are pressing for immediate withdrawal of our troops, encouraging them in their efforts, should make all of us realize the folly of such a decision.

America, to survive, must be strong and must be united in her aim of Freedom for All Men.

[From the Lebanon (Ind.) Reporter, Oct. 15, 1969]

FLYING FLAGS PLENTIFUL IN LEBANON MORATORIUM—BOONETTES SHOW SUPPORT FOR UNITED STATES

Boone County flags flew in place of moratorium marches and defense of the president superseded any pray-ins or protests.

No demonstrations marred the cool, autumn day in Lebanon in connection with the nation-wide planned marches, seminars and demonstrations against the Vietnam war. Business went on as usual. Few people showed concern with what had been hoped to be a nation-wide move.

In on-the-street-interviews various Lebanonites expressed views opposing the demonstrations. Said Mrs. Tom West, housewife, "I think the president should run the country. I'm not in favor of the war but he knows more about it than I do."

A retiree, who said he had several grandchildren in the war also commented, "It's nutty! I don't believe in walking out with a job only half done. This is just helping the enemy."

Mrs. Donald Sloan, housewife and mother, said, "I agree with the demonstrators in principle, but not in their actions. Certainly I'm against the war but these people are jumping to the wrong conclusions."

Schools throughout the county conducted a normal class day.

Lebanon American Legion commander, Bob Laflin commented, "I don't agree with a lot of people today. I am in favor of peace, but not this way. It plays right into the North Vietnam's hands. I definitely am opposed to the demonstrations."

Adjutant of Disabled American Veterans, Ernie Cross said, "This is a great defeat for the sacrifices made by our men in Vietnam. It can only help Hanoi. We're all opposed to war but sometimes it is necessary to maintain freedom. President Nixon is moving in the right direction and will get it settled if we give him enough time."

Many said that they made a special point to fly the flag today.

It was also noted that those interviewed under the age of 30 preferred not to be quoted or expressed "no comment" or "no opinion." Several, who expressed opinions against the demonstrations, said they preferred not to become involved because of possible reprisals.

Indiana colleges and universities peacefully observed the nationwide Vietnam war moratorium today, highlighted by a candlelight march on the Indiana University campus at Bloomington with 3,000 participating shortly after midnight.

But despite the quiet tenor of the observances, State Police Supt. Robert K. Konkle had his trooper forces on the alert for possible disturbances, saying "this sort of thing is totally unpredictable—you never know when someone not directly associated with the observances could inject trouble."

Konkle said he had observers on duty "in college towns and the major metropolitan centers which is where the greatest activity is."

Indiana's candlelight march preceded a "peace fair" on Dunn Meadow, featuring talks, entertainment and distribution of literature. Most of the activities were scheduled for later in the day, including an address by Bishop James Armstrong of the North and South Dakota United Methodist Church.

[From the Marion (Ind.) Chronicle Tribune, Oct. 17, 1969]

HELP FOR HANOI

Now that the Hanoi sympathizers, left-wing liberals and political opportunists have had their Vietnam War moratorium and while the promoters of surrender are crowing about the "success" of demonstration, two points are quite clear: The national government does not intend to allow the protesters to force it to accept less than an honorable peace in Vietnam and the vast majority of America's citizens did not support the demonstrators.

The total turnout for the protest movement over the country can be numbered in the thousands. The population of the United States, is over 200 million.

While many of those involved in the demonstrations no doubt are sincere in their beliefs and their efforts to end the war, the fact remains that they have been duped. The leaders of the moratorium claim they are peacefully dissenting, but they did not reject—did, in fact, welcome—the support of North Vietnam, domestic Communists and the infamous Chicago Eight, now on trial for conspiracy in the Chicago riots last summer.

Some of the events were disturbing, such as former Supreme Court Justice Arthur Goldberg, addressing a crowd of moratorium demonstrators and refusing to renounce the support of Hanoi.

Some were ludicrous—Sen. Ted Kennedy, whose brother started the Vietnam escalation, demanding that President Nixon bring home the troops within a year.

Some of it was insulting—Radical David Dellinger reading the names of honorable men killed in the service of their country.

Around the country, others read the names of the 40,000 Americans killed fighting for freedom to advance their own ends, a shameful maneuver. The father of a serviceman killed tried to get a court order to prevent the protesters from reading his son's name.

Here in Indiana, the Viet Cong flag was run up a flag pole at Indiana University after the American flag had been removed. How's that for "loyal citizens honorably dissenting"?

And the whole thing played into the hands of the Communists, just as President Nixon said it would. Within hours, Hanoi was demanding that President Nixon give the Reds a timetable for withdrawal of all American troops.

A great many of those involved were lending support simply to try to gain political gains and discredit the President if possible, including Indiana's two senators.

The fact is that President Nixon is moving to get the Americans out of Vietnam as rapidly as possible without leaving the South Vietnamese at the mercy of the murdering Communists. On the day of the moratorium, hundreds of more bodies of murdered Hue residents were uncovered. They were executed when the Reds briefly held the city last spring.

If all U.S. troops pull out immediately, this is what will happen to thousands of Vietnamese who have fought to remain free. Is this what the "humanitarians" taking part in the moratorium seek?

President Nixon appears to be doing more to get American combat forces out of the war than his two immediate predecessors, which makes the true motive of the moratorium sponsors all the more suspect.

The Nixon Administration should continue on its course to bring home American troops, but at the same time training and equipping the South Vietnamese to bear the burden of the war. This program meets with the approval of the vast majority of Americans, but those who support a constructive proposal are not so outspoken or demonstrative as those bent on destruction.

[From the Logansport (Ind.) Pharos-Tribune Press, Oct. 17, 1969]

THERE'S A PRICE WE PAY FOR LIVING

For each of us, there is a price for living.
Getting up at crack at dawn . . .

Smiling through the boredom of 40 years at one job . . .

Growing old . . .

Suffering sickness, pain and death . . .

For all of us, in the community we call a nation, there is a price for living.

Selflessness, sometimes at great personal cost, for the common good. . .

Postponement of dreams . . .

Smiling through the frustrations of collective bargaining and group decision-making . . .

Abridgment of individual rights . . .

That's part of the cost of living together. It's called "responsibility."

We do not escape, no matter our twisting, our wailing, our Niagaras of tears. The toll is as old as the planet, on the one hand; as old as civilization, on the other.

Because we are "aware" and able, we try to escape.

We "improve" our environment; pollute the air and the waters, eviscerate the watersheds.

We introduce the rabbit to Australia, LSD to the dormitory, the SDS to Chicago.

We replace the horse and lose our horse-sense; our vaunted "awareness."

Now we would fight a war from the streets; let poets map strategy; coeds protect our flank; pivot the fate of the nation on the temper of the mob.

Wednesday's so-called "Moratorium Against the War" is a fancy name for a general strike. Indeed, it was originally conceived as a general strike; an arbitrary paralyzing of America. It evolved by scheme to the less incendiary term because "Moratorium" is more palatable to Americans who have not yet forgotten who or what or why they are.

This "Moratorium," no matter its fancy decor, aids and abets an enemy.

In high glee the Viet Cong and the North Vietnamese in Paris have ignored our negotiators and appealed directly to the American people for further discord.

The very hope of Paris has died in the heat of Hanoi's belief that the anti-war mob here will win the war for the Communists.

American democracy has—and has had for almost 200 years—effective machinery for dissent. It is the world's most responsive government to the opinion of its electorate. The machinery has maintained itself admirably; still responds with alacrity when there is bona fide stimuli.

This "Moratorium" is not part of that machinery. This "Moratorium" is a toy in the hands of the unbelievably inept, the criminally treasonous, the incredibly naive.

This "Moratorium" is part of the machinery of delay.

The delay spills American blood; spells more war.

We are tired of war, as all the American people and most people in the world are tired of war. But war will not go away just by virtue of our sticking our heads in the sand. A murderer will not desist just because we say "please," because we throw our guns away and say "we're not playing any more."

Please God someday we or our children can live in a world without war.

But today is not that some day.

Today we have to face the reality of a treacherous and desperate foe whose philosophies and mores and motives are totally alien to our historical experience.

He does not subscribe to the Sermon on the Mount.

And he views Wednesday's so-called "Moratorium" as a sign of ultimate weakness; the people partaking thereof as addle-pated idiots.

We're inclined to agree.

HAMMOND TIMES.

STUDENT FAST FOR FREEDOM

HON. EARL F. LANDGREBE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. LANDGREBE. Mr. Speaker, on Friday, October 10, I had the privilege of speaking to a most extraordinary group of student peace demonstrators, known as the "Student Fast for Freedom." Unlike those who participated in the October 15 moratorium, these young men and women recognized that Hanoi, not Washington or Saigon, is the true villain in this tragic war we are fighting. Their call was for "Peace With Freedom" in Vietnam, realizing that the peace with slavery which would be imposed by an immediate American betrayal-by-surrender would be more frightful for the Vietnamese people than continuation of the war.

Their gathering on Friday night was small, but I daresay the first meeting of the SDS was at least as tiny. It grew from about 30 people on Friday to a more respectable 200 by Sunday night, so there is some hope that the so-called "silent majority" on our Nation's campuses has at last begun to break its silence.

At Friday's rally, the students distributed a handbill, which is perhaps the most lucid presentation of the anti-Communist position on Vietnam that I have ever seen. At this point, I am inserting the text of this handbill into the RECORD:

STUDENT FAST FOR FREEDOM

The participants in the Student Fast for Freedom include Democrats, Republicans, independents, conservatives, and liberals. Despite differences of viewpoints, we are bound together by a common belief in both the morality and the political wisdom of our commitment to the freedom of Southeast Asia.

Our commitment is morally right because there can be no morality without freedom, and because there has been no political system in history so mercilessly antithetical to freedom and human dignity as the communist systems.

Our commitment is politically right because the fate of freedom everywhere is bound up with the defense of freedom in Southeast Asia. Communist aggression must be halted in Southeast Asia in order to protect the security of the entire free world. It is as simple as this.

We do appeal to the American people at large on the basis of the values to which we know they adhere. And we also appeal to the many thousands of students who have joined the opposition to the war in Vietnam, not because they are nihilists but because they feel that the war is an affront to humanity and that it violates the values to which they are personally committed.

We share the belief of these students that human life and human dignity are sacred things, and that they are important factors—indeed, essential factors—in any equation of the Vietnam war.

Accepting this belief, we deplore the cost in human life and human suffering of the Vietnam war. But accepting this belief, we must also ask ourselves what the consequences of a Viet Cong victory would be.

If the expert estimates are true that communism in Russia has exacted a toll of 75 million human lives and that communism in Red China, during its much briefer career, has taken a toll of some 35 million lives; if it is true that tens of millions in both major communist countries have been executed or incarcerated without any cause—then those who posit their opposition to the Vietnam war on humanitarian grounds have the moral duty to explain to us, and to explain to themselves, why they believe that communism in South Vietnam will be less bloody and less destructive of human life than it has been in other countries that have passed under the yoke of communist totalitarianism.

And those who invoke the sacred name of freedom to justify their opposition to the Vietnam war have the further duty to explain to us how this justification can be reconciled with the total tyranny of the North Vietnamese regime.

We know that the South Vietnamese government is not a perfect democracy. But democracy is essentially a matter of degree. Our own country, for that matter, is not a perfect democracy, although we probably come almost as close to this goal as any other country in the world. By American standards Vietnamese democracy still leaves much to be desired. But in terms of the freedom it grants to its citizens, we would have to rank it substantially ahead of most of the member nations of the United Nations—and this achievement is all the more remarkable in an infant nation which has since its inception been fighting a bitter war against communist subversion.

But while there is an imperfect freedom in South Vietnam, in North Vietnam there is not a scintilla of freedom. There is no free press. There is no freedom of expression, even of the most limited kind. There is no right of dissent for students or any other sector of the population. There are no free political parties and no free elections.

And those students who, in their thoughtless opposition to the war, have sometimes chanted "Ho-Ho-Ho Chi Minh," have in effect been endorsing a political and intellectual tyranny as total and as merciless as the Nazi tyranny at its worst.

American and European students who oppose the Vietnam war from a distance would do well to ponder the fact that, virtually without exception, the governments that are geographically close to the conflict support our commitment to the freedom of Southeast Asia.

The opposition to the Vietnam war on the campuses has been exceedingly vocal and well financed. Because of this, it has been able to create the impression that it represents the great majority of the student body. We are convinced from many things that this is not so.

In the period before the Tet offensive, this was demonstrated in numerous polls on campuses across the nation—which, for one reason or another, received virtually no publicity.

In the period since Tet, there has unquestionably been a weakening of support for the war, but this loss of support has been based not on any increase of affection for Ho Chi Minh's communism, but on an understandable weariness with a long and costly war that has had a particularly disturbing effect on the lives of American students.

We take the stand that, in determining our attitude toward the Vietnam war, we must above all be guided by principle, by moral values, and by an enlightened concern for the security of free nations throughout the world. In particular we believe that the epithets and violence which have characterized the opposition to the war must give way to a reasoned dialogue on our campuses between those who oppose and

those who support our commitment to the security of Southeast Asia.

All that is necessary for the forces of evil to triumph in the world, is for enough good men to do nothing.—Edmund Burke.

DRAFT BOARD LEGISLATION

HON. BILL NICHOLS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. NICHOLS. Mr. Speaker, later this week the House will be asked to consider the draft board legislation which was approved by our Armed Services Committee earlier this week. During hearings on this legislation, many individuals and organizations made their views on the draft known. One statement which I found to be particularly impressive was made by Mr. James R. Wilson, Jr., a representative of the American Legion. So that our colleagues who will be called upon to act on the draft reform legislation can have the advantage of the thinking of the American Legion on this subject, I include Mr. Wilson's statement in the RECORD at this point:

STATEMENT OF JAMES R. WILSON, JR., DIRECTOR, NATIONAL SECURITY DIVISION, THE AMERICAN LEGION, TO THE SUBCOMMITTEE ON THE DRAFT, HOUSE COMMITTEE ON ARMED SERVICES, OCTOBER 3, 1969

Mr. Chairman: The American Legion welcomes this opportunity to express its views on draft reform proposals.

Last March 15, our National Executive Committee created a Select Committee on Manpower to update its position on manpower and to prepare its views to present to the President's Commission on an All-Volunteer Armed Force, to the public at large and to the appropriate committees of Congress. The responsibilities of the select committee were:

(1) to investigate alleged inequities in the Selective Service System and to make recommendations for their correction:

(2) to study all proposals for an All-Volunteer Armed Force and make a report on the feasibility of instituting such plans for the defense of this Nation: and

(3) to study and make recommendations on all manpower needs of this Nation as they may relate to national security and defense.

Appended to this brief statement is the final report of the select committee which was submitted to our National Executive Committee at its meeting in Atlanta, Ga., August 24, 1969.

A brief summary of the select committee's recommendations, which also covered the six-points President Nixon requested Congress to approve, are:

I. ALLEGED INEQUITIES OF SELECTIVE SERVICE

Selective service throughout its history has proved to be an essential implement in the enforcement of the obligation of every male citizen of the United States to serve his country in its military forces whenever required by our national security. It is vital to the needs of the Nation that the selective service laws be continued in operation subject to minor variations by law or Executive order.

(a) Youngest first: The order of induction should be revised so that the youngest men, beginning at age 19, are taken first. Military service at this age causes less disruption in the life of the youth. From the military viewpoint, younger men are generally preferred for combat service.

(b) The lottery: The most extensive publicity of alleged inequities in the Selective Service System has been given to the uncertainties as to the time of induction. A lottery for class 1–A's (after deferments have been determined) should eliminate this uncertainty. Such a lottery is recommended. If it develops greater inequities in operation, it should be abandoned.

(c) Undergraduate deferments: Undergraduate deferments should continue as under the present act so long as the student is making normal progress toward a degree. The need of the military service for commissioned officers is largely met by college students obtained through ROTC and the officer training camps.

(d) Graduate deferments: Graduate deferments should be granted only in critical areas essential to national security as provided in the present act by standards adopted by the National Security Council.

(e) Occupational deferments: Occupational deferments should be continued in employment, apprenticeship, and training which are essential to national security, by standards adopted by the National Security Council.

(f) Conscientious objectors: The amendments to the 1967 Selective Service Act governing conscientious objectors have caused a multitude of controversies. Many of them could be eliminated by returning to the standards provided in section 5(g) of the 1940 act.

II. ALL-VOLUNTEER ARMED FORCES

(a) Feasibility: The history of this country from colonial days to the present date has shown that an all-volunteer Armed Force is not feasible. In no war has a volunteer army met the country's needs. Only two nations in the world do not have some form of conscription. Great Britain has failed to achieve the greatly lowered authorized strength of its military forces by volunteers and the army of Canada is too small relative to its population for comparative purposes. It is obvious that Canada relies upon the aid of the United States in time of international danger.

(b) Desirability: A volunteer Armed Force tends to become a mercenary one. If the rate of pay and other incentives are equal to that of private industry, then an enlistment becomes a job instead of performance of service to one's country. The quality of the personnel is lowered as demonstrated in the 1947–48 period when the Selective Service Act was permitted to expire. There was a distinct lowering in the average mental and educational level.

(c) Effect on Reserve components: The facts stated in this report are conclusive of the disastrous effect of the elimination of selective service upon the National Guard and Reserve forces. The external and internal security of the country would be imperiled by reducing them to skeleton forces which would inevitably result by the elimination of selective service and the establishment of an all-volunteer armed force.

(d) Economics: The cost of attaining and maintaining a volunteer armed force from 1½ to 2½ million men has been estimated by the Defense Department at from 4 to 17 billion dollars in additional annual expenditures. This would be a serious drain upon the economy of the country. Multiply these figures by 2, 3, or 4—the cost of an armed force which would be necessary in the event of conflict with a major power and the cost could be disastrous.

The committee concludes that an all-volunteer armed force is detrimental to the security of the United States and should not be established.

III. MANPOWER NEEDS OF COUNTRY

It is not wise to discard a system of military manpower that has served this country so well and had sufficient flexibility to enable the Armed Forces to expand and meet the emergencies of international warfare.

Since its infancy, this Nation has relied upon the "citizen soldier" to back-up a comparatively small Armed Force. This concept of reenforcement of combat troops has been accomplished by the National Guard and the Reserve forces. To continue this concept, the Reserve components must be manned with the aid of selective service and must be well trained and fully equipped.

ROTC must be continued in our universities and colleges to meet the demand for well-educated commissioned officers.

No one has the right to enjoy all of the freedoms and rights guaranteed to him by the Constitution of the United States unless he is willing to discharge his duties of citizenship. Paramount among these obligations of citizenship is to serve his country in time of war as well as in peace.

Because only a comparatively few are ever called upon to serve in the military forces, a host of others tend to forget and belittle their obligations.

A system of universal military training would make performance of military obligations uniform and all-inclusive. It is realized that universal military training cannot be established overnight. Recognition must be given to the demands now placed upon the manpower, equipment, and facilities required for our Armed Forces stationed in this country and throughout the world.

A different situation will confront us when peace is restored in Vietnam and hundreds of thousands of servicemen are returned to civilian life.

Requirements, standards, times, and duration of training under universal military service may well be drawn to meet the needs of the Nation.

Universal military training will inculcate into the individual a realization of his obligations to his country and will, it is believed, develop into a most equitable and desirable long-range military manpower program.

I respectfully request that the printed record of the hearings of this subcommittee carry the full text of the report of the American Legion's Select Committee on Manpower.

LIVESTOCK PROCESSING COST HIKES ADVERSELY AFFECT BOTH CONSUMERS AND FARMERS

HON. MARK ANDREWS

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. ANDREWS of North Dakota. Mr. Speaker, as a farmer I have read with more than passing interest the testimony given last week before the Special Studies Subcommittee of the House Government Operations Committee on retail beef prices.

The testimony given before the subcommittee shows that there is real need for the livestock and meat industry to achieve better public understanding of the economics behind price changes and why they frequently appear to be too high to consumers. One area to which I would like to address my remarks, as a contribution to bringing about a better understanding, concerns the problems of the beef packing industry, particularly in the Upper Midwest, in maintaining a satisfactory level of earnings and how these problems may well cause higher prices to consumers or lower prices to farmers or both.

Since the end of World War II the beef packing industry has undergone major adjustments which have resulted in the demise of the traditional terminal-market operations in Chicago, and the beginning of a trend toward locating slaughtering plants in small towns and cities in what has come to be known as the "Beef Belt" of Mid-America.

Accompanying this trend has been the modernization of beef packing plants and the introduction of automated, assembly line techniques. One plant recently opened has the capacity to process 10,000 head of cattle per week. Although this has resulted in greater efficiency and reduced operating costs, profits in the beef packing industry have continued to dwindle despite rising beef prices. A major contributing factor, apart from rising labor costs, has been the substantial increase in slaughter capacity without a corresponding rise in the number of cattle available for slaughter.

In the five-State area of North and South Dakota, Nebraska, Iowa, and Minnesota, for example, slaughter capacity today exceeds available cattle supplies by over 2 million head. The effects of this excess capacity on the earnings of three major independent beef packers in the area is clearly demonstrated in the following table:

SLAUGHTER CAPACITY AND AVAILABILITY OF FED CATTLE IN IOWA, NEBRASKA, NORTH AND SOUTH DAKOTA, AND MINNESOTA VERSUS NET EARNINGS OF 3 BEEF PACKERS

Year	Slaughter capacity [1] [2]	Cattle availability [2] [3]	Capacity overage	Average earnings of the 3 largest regional packers in the upper Midwest, dollars per share [4]
1964	8.8	8.8	----------	$2.10
1965	9.8	8.9	0.9	1.74
1966	10.3	9.8	.5	1.38
1969 [5]	12.7	10.5	2.2	.82

[1] Federally inspected plants on a 40-hour basis, varying dates, Apr. 1, 1964, Oct. 1, 1965, Nov. 1, 1966, Apr. 1, 1969. Based on Government reports.
[2] Source: U.S. Department of Agriculture.
[3] Cattle on feed Apr. 1 multiplied by 2.3 to equal availability of cattle on an annual rate basis.
[4] Based on published reports of 3 Midwest companies primarily engaged in beef slaughtering.
[5] Slaughter capacity figures not available for 1967 and 1968.

As the table indicates, the ability of the packer to turn a profit is contingent upon the ratio of slaughter capacity to available cattle supplies. In 1964, for example, when capacity and supply were about equalized, the average earnings of the three packers, as shown in the table, peaked to $2.10 per share. Since then, as the imbalance between capacity and supply has expanded, there has been a proportionate decrease in the earnings of these and other beef packers in the Upper Midwest.

This situation has created serious and far reaching economic problems for an industry which is vital to the prosperity of an important segment of the American economy. Instability in the industry has resulted in the closing of several major plants in the Upper Midwest region in the past 5 years. Recently a major packer canceled plans to complete the construction and opening of a new plant at Tama, Iowa. Consequently, the investment community has shown a lessening of confidence in the viability of the industry.

In addition, there have been at least two beef packing plant bankruptcies in the past 3 years. Since investors in these plants are characteristically residents of the community where the plant is located, failure can mean regional economic disaster. In one instance, total losses amounted to $1,800,000. Of this amount, some $650,000 was lost by stockholders, and, just as significantly, livestock producers who were creditors of the plant lost in excess of half a million dollars.

But despite the closing of plants and a continued, but moderate increase in the growth rate of beef cattle throughout the Upper Midwest, the problem of excess of slaughter capacity over supply still remains a critical one to the beef packers in the area.

This can be better understood by looking at the relatively simple economics of the beef packing business. The packer buys the steer, slaughters it and sells the carcass and offal. The difference between the price paid for the live animal and the price received for the end products is gross margin. Gross margin, however, is largely a market function not entirely controllable by management of any one company. In periods when cattle supplies are reduced, prices normally and naturally trend up. Added to this price hike on the farm is the fact that since the plants are slaughtering at less than optimum level, the fixed cost per head for plant facilities also rises creating a double impact that has to be taken out of the farmer or the consumer.

To determine the profit a company makes per head in its slaughter operation, killing costs—which include direct and indirect labor costs, overhead, and so forth—are deducted from the gross margin. If gross margin shrinks, the profit has a tendency to be reduced even more percentagewise, as killing costs generally rise in periods of reduced supply since overhead costs are being spread over fewer units.

Some progress has been made by the industry in coping with the problem of excess capacity. However, in construction of new plants the further expansion of slaughter capacity will only serve to further aggravate the situation. If other capacity results in a higher cost per animal slaughtered this higher cost can only be passed on to the housewives—already marching in revolt against increasing beef prices—or far more likely to the farmer who is the one individual who cannot set his own prices and has to take what the market will give him. No one, thereby, benefits from this overconstruction of new plants.

Part of the blame for the growth in slaughter capacity must be laid at the door of newly formed management groups. With the great success of a few publicly owned regional slaughterers being widely publicized they have found it relatively easy to convince the investing public and financial institutions of the ease of profitability by exploiting theories of ability of producing cheaper and more efficiently than existing facilities through construction of high-volume, highly automated slaughtering plants. The construction of these plants has led to some of the problems now faced by packers as well as unfortunate experiences for investors and communities which have aggressively competed for the construction of new plants within their areas.

The time has, therefore, come for both the industry and the investing community to more closely scrutinize their plans for increasing slaughter capacity beyond that which given areas can supply or are willing to supply in fed livestock, such as has happened in recent years in the upper Midwest.

IMPOSSIBLE DREAM

HON. DAN KUYKENDALL

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. KUYKENDALL. Mr. Speaker, I would like to include an editorial in the RECORD telecast by one of the leading TV newscasters and editors in Memphis, Tenn., Mr. Norman Brewer, news editor of WMC–TV.

I am extremely proud of the efforts of the Memphis Police Department in working for the total elimination of all crime, and would like to share this idea for a maximum effort for a one crime-free day with the hope that it could grow into 365 crime-free days.

Mr. Brewer's comments follow:

Each of us, I suppose, has his own "impossible dream." For me it's one round of golf under par. For Spook Murphy it's one season without fair-weather fans. And for Frank Holloman it's one day without crime.

Mr. Holloman is about to test his particular dream but he will need a lot of help. Tomorrow, October 10th, is the day the Memphis Police Department has chosen to work for the total elimination of all crime. For a couple of weeks now, the citizens have been urged to "light, lock and look" tomorrow. That means, light the houses and businesses, lock all doors, and look for suspicious people and suspicious circumstances. The police will have every available man and machine on the streets. The message has been carried to the people of Memphis in the newspapers, and on the radio and television stations. In addition, volunteers from the Memphis Real Estate Board and from several of the charitable agencies have taken the word in door-to-door marches through the neighborhoods. In short, Memphis has been informed. We hope Memphis is ready.

The idea for a maximum effort at one crime-free day is a good one. It is also unrealistic, but that does not mean that the police and the citizens of this city shouldn't try. There is no doubt that the level of crime can and will be sharply reduced. An alert city and an overwhelming force of police manpower can prove an effective, if not irresistible, combination. Together they can make a dramatic demonstration of how to fight crime, and not only for one day. The real hope and worth of this effort is that citizen alertness—lighted homes, locked doors, and watchful eyes—will continue after October 10th. If it does, Mr. Holloman will enjoy a measure of his impossible dream. For me, and probably for Spook, there's much less hope.

JUDGE JOHN L. NIBLACK, OF MARION COUNTY, IND., CIRCUIT COURT, WRITES ON VALUE OF NEIGHBORHOOD SCHOOLS

HON. WILLIAM G. BRAY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. BRAY. Mr. Speaker, one of the major, burning questions in education today is, shall we retain the neighborhood school concept, or shall we bus schoolchildren all over.

Hon. John L. Niblack, judge of the Marion County, Ind., Circuit Court, wrote an eloquent defense of the neighborhood school in a letter to the editor of the Indianapolis News, on October 16, 1969. The letter follows:

NEIGHBORHOOD SCHOOLS

TO THE EDITOR OF THE NEWS: While the debate continues unabated as to the virtues of the neighborhood school as opposed to the virtues of busing children hither and yon, I would like to add one more note to the general discussion.

In the first place, it is apparent that most children and their parents are opposed to busing. People have pride in the neighborhood schools. It is convenient to attend and it is more convenient for the PTA Association, and to have the parents visit open house. Likewise, most people will object to the time consumed in having their children hauled from one end of the county to the other. Finally, there is the expense involved of buying buses and what not, when the schools do not have enough money to pay the teachers the salary they deserve.

In the second place, our reformers and liberal pundits who believe all ills of the nation can be cured by busing school children around blithely ignore the provisions of the 1964 Civil Rights Act, which reads as follows: "Desegregation shall not mean the assignment of the students to public schools in order to overcome racial imbalance." To start drawing the school district lines in the face of this congressional act will invite more litigation.

As to the logic of the situation, these Northern "liberals" who would bus children all over the county away from their neighborhood schools are rowing in the same boat with the Southern gentleman of the Democratic party, who, for a hundred years, insisted that children of one color must go to certain schools while children of other colors must go to another school. They say, in effect: "You shall be assigned to a special school because your color is green, or your color is yellow." They refuse to recognize that all children as well as all adults stand equal before the law and that no child should be discriminated against because of his color or race.

One of the intense advocates of busing children, a while back, expressed a view that the neighborhood school was a "sacred cow" in the eyes of people who do not believe in progress and that it was not such an American tradition at all. The neighborhood school has been an American tradition ever since the schools have been instituted. Everybody went to the nearest school and took intense pride in their own local school. There has been too much destruction of American tradition in destroying the home and the church, and now the folks want to scramble the school system so no child would have his loyalty to his own neighborhood school.

Under the United States law and under the law of common sense, the neighborhood school should be our ideal.

JOHN L. NIBLACK,
Judge, Marion County Circuit Court.
INDIANAPOLIS.

J. P. STEVENS & CO. AND JUDGE HAYNSWORTH

HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. THOMPSON of New Jersey. Mr. Speaker, last year the Special Subcommittee on Labor of the Committee on Education and Labor conducted hearings and rendered a report on the sufficiency of existing remedies under the National Labor Relations Act. The subcommittee concluded that these remedies are wholly inadequate to protect the rights the National Labor Relations Act purportedly confers upon workers to form unions and bargain collectively, if they so choose. Through wide areas of the country these supposed guarantees of the statute have become a mockery.

Some of the testimony before the subcommittee dealt with J. P. Stevens & Co. J. P. Stevens is the Nation's second largest textile manufacturer.

And it is the Nation's most flagrant and persistent violator of the National Labor Relations Act.

In 1963 Textile Workers Union of America, AFL–CIO, began a drive to organize Stevens' employees in over 20 of its North and South Carolina mills. Stevens responded with widespread violations of the National Labor Relations Act, including firing 71 workers for joining the union. (See J. P. Stevens & Co., 157 NLRB 869, enforced 380 F. 2d 292, cert. denied, 389 U.S. 292.)

While the legal proceedings stemming from Stevens' first wave of violations were underway, Stevens engaged in a new series of blatant violations, including discharging employees who had testified against it. (See J. P. Stevens & Co., 163 NLRB No. 24, enforced 388 F. 2d 896, cert. denied, 393 U.S. 836.) In this second proceeding the NLRB trial examiner stated:

The record of the 1965 hearing reflects the continued, systematic determination of this employer as revealed by the record of the 1964 hearing, to destroy the union root and branch by discharging its most active members on any pretext which might come to hand, or could be intended, by threatening to discharge others unless they came to management and renounced the Union, and by provoking the resignation of still others from Respondent's employment. No other conclusion can be drawn than that Respondent has largely succeeded in its purpose.

While the second round of hearings was in progress Stevens engaged in yet further flagrant violations of law. In this third round of legal proceedings the trial examiner was Boyd Leedom, Chairman of the NLRB during President Eisenhower's administration and former judge of the South Dakota Supreme Court. Judge Leedom found that 13 more workers had been discharged either because of their union activity or because they had given testimony in the prior board proceeding, and he declared that company witnesses were almost uniformly untruthful on the witness stand. And he pinpointed the true nature of Stevens' plot to deny its workers the right to have a union:

It is clear to me that substantially all the law violation of the Respondent, as I have found it to exist from the record of the evidence here and my best interpretation of it, must stem from the decision of one man or a very few men at the top would not only correct the offenses committed against the employees, but would relieve personnel in the lower levels of management of the obviously distasteful duty of participating in an active program of perversion of justice.

And so it has gone. Incredible as it may seem, the NLRB is now issuing a complaint on the ninth series of unfair labor practices committed by Stevens in this one organizing campaign. In addition contempt proceedings have been brought by the Board in Stevens I, and the court of appeals in New York has designated a special master to hear these proceedings.

In Stevens I the company has, under court order, paid out $654,673.56 in backpay, and has offered reinstatement to 70 illegally discharged employees. However, at last report only 16 of these workers were working in Stevens plants. Most had declined to come back. Thus Stevens has effectively destroyed the union cadre in the plants, and presumably it regards that as worth the cost.

A few days ago the Court of Appeals for the Fifth Circuit decided what is called Stevens V—it deals with the fifth successive round of unfair labor practices by that company. The court's decision substantiates everything that the special subcommittee found.

Here is what the court said:

Brown, Chief Judge: Only three things distinguish this case from the run-of-the-mill §§ 8(a)(1), 8(a)(3) labor cases. The first is the tenacity with which the Employer persists in the exercise of deep seated anti-union convictions. The second is the succession of formal cases culminating in the present one bearing five service strips in which, except for minor variations, the Board's findings of spectacular Employer violations of §§ 8(a)(1), 8(a)(3) and 8(a)(5) of the Act have been upheld by three Courts of Appeals. The third is the Board's efforts to devise some character of remedy which has at least some prospects of keeping the recalcitrant Employer's intransigence within the bounds of vigorous but lawful opposition to Union attempts to organize units in a multistate industrial complex.

As Stevens V, this case, joining the list of predecessors, has a like outcome. We enforce.

Stevens has been engaged in a massive multistate campaign to prevent unionization of its Southern plants. This campaign has involved numerous flagrant unfair labor practices including coercive interrogation, surveillance, threat of plant closings, and economic reprisals for Union activity. Moreover, the threats have been made good by extensive discriminatory discharges.

I have asked permission that the entire

opinion be inserted in the RECORD at the conclusion of my remarks.

This latest revelation about the lawless, union-busting activities of J. P. Stevens is of particular interest in connection with the nomination of Judge Haynsworth to the Supreme Court.

For Judge Haynsworth has held stock, and a substantial block of it, in J. P. Stevens ever since he has been on the Federal bench. It was a principal client of his, and he continued to feel so close to it, even after he went on the bench, that he would not have sat on its cases, he said, even if he had not held stock.

Judge Haynsworth does not feel that degree of intimacy with any other company, for he has sat on lots of cases involving former clients and lots of cases where he held stock in one of the litigants.

I think it is nice that Judge Haynsworth does not seem to have sat on any cases involving Stevens itself, but he has sat on cases of vital importance to the whole textile industry, such as the famous Darlington case. And I find it disturbing that a Federal judge has chosen throughout his judicial career to hold stock in a company which habitually and flagrantly violates the National Labor Relations Act as a deliberate corporate policy.

That sort of association raises the gravest doubts in my mind whether Judge Haynsworth is capable of enforcing the Nation's labor relations laws fairly and impartially.

The opinion referred to follows:

[In the U.S. Court of Appeals for the Fifth Circuit]

J. P. STEVENS & CO., INC., PETITIONER-RESPONDENT, *v.* NATIONAL LABOR RELATIONS BOARD, RESPONDENT-PETITIONER—No. 26246

(And reverse title)

(Petition for review and cross-application for enforcement of an order of the National Labor Relations Board (Georgia case) (October 3, 1969))

Before Brown, Chief Judge, Ainsworth, Circuit Judge and Comiskey, District Judge.

BROWN, Chief Judge. Only three things distinguish this case from the run-of-the-mill §§ 8(a)(1), 8(a)(3) labor cases. The first is the tenacity with which the Employer persists in the exercise of deep seated antiunion convictions. The second is the succession of formal cases culminating in the present one bearing five service stripes in which, except for minor variations, the Board's findings of spectacular Employer violations of §§ 8(a)(1), 8(a)(3) and 8(a)(5) of the Act have been upheld by three Courts of Appeals. The third is the Board's efforts to devise some character of remedy which has at least some prospects of keeping the recalcitrant Employer's intransigence within the bounds of vigorous but lawful opposition to Union attempts to organize units in a multistate industrial complex.

As *Stevens V* this case, joining the list of predecessors,[1] has a like outcome. We enforce.

The Board concluded that Stevens had violated [2] §§ 8(a)(1) and (3) by discriminatorily discharging four employees, engaging in surveillance of Union activity, interrogating employees about Union activity, and making threats of discharging employees for Union activity and threats of closing plants if the Union [3] was recognized.

To the usual, traditional requirement of reinstatement and back pay for the § 8(a)(3) dischargees and cease and desist order of § 8(a)(1) violations with posting for a specified period, the Board's order additionally required that (1) the notice to employees be read to the assembled employees on shift-time, (2) it be mailed to the employees homes, (3) the Union, upon request, be given access for one year to the company bulletin boards and (4) the Union be furnished a list of the names and addresses of all Stevens employees working in the plants where the violations occurred.[4]

We focus on requirements of the order (d), (e), (f), and (g) since the §§ 8(a)(1) and (3) violations warrant no detailed treatment. In the first place, with no real concession at all, Stevens has apparently abandoned its attack on the record support for the findings of coercive surveillance of Union activity, interrogation and threats, which are classic, albeit crude, unlawful labor practices.[5]

Although Stevens does claim that there is not substantial evidence to support the finding that the four employees were discriminatorily discharged,[6] our examination of the record convinces us that in these run-of-the-mill incidents on which the Board, not the Court, has to pass upon the credibility of the witnesses, we cannot say the findings are unsupported by substantial evidence on the record as a whole. *Great Atlantic & Pacific Tea Co.* v. *NLRB*, 5 Cir., 1966, 354 F.2d 707, 709. Nor can we say the record reflects bias or unfairness on the Trial Examiner's part as Stevens seems to contend. See *NLRB* v. *Bush Hog, Inc.*, 5 Cir., 1968, 405 F.2d 755; *NLRB* v. *Dixie Gas Inc.*, 5 Cir., 1963, 323 F.2d 433, 437.

But to the special requirements of the Board's [7] order (see note 4 *supra*) it once again levels its full but unsuccessful broadside.

Stevens has been engaged in a massive multistate campaign to prevent unionization of its Southern plants. This campaign has involved numerous flagrant unfair labor practices including coercive interrogation, surveillance, threat of plant closings, and economic reprisals for Union activity. Moreover, the threats have been made good by extensive discriminatory discharges. As a result of these practices, several unfair charges have been brought before the Labor Board (see note 7 *supra*) and, except for slight variations, the orders of the Board have been enforced by two other Circuit Courts of Appeals in *Stevens I, II, and III and IV* (see note 1 *supra*). As the Fourth Circuit said in assessing the company's conduct in *Stevens III and IV*, "the Board properly took into consideration the unfair labor practices that *Stevens I* and *II* disclosed, and we, in turn, cannot ignore this evidence. Maphis Chapman Corp. v. NLRB, 386 F.2d 298, 303 (4th Cir. 1966)". *Stevens III and IV* at 1019. Nor can we, in our subsequent turn, ignore the unfair labor practices disclosed in *Stevens III and IV*. To these we add the incidents and violations found by the Board to have occurred in the Georgia plants. Thus we assay the order in this atmosphere of persistent, long continued, flagrant violations occurring after and in spite of repeated declarations of illegality by Board and reviewing Courts.

In determining whether a particular affirmative action ordered by the Board pursuant to its powers under § 10(c), 28 U.S.C.A. 160(c), is appropriate, the reviewing Court must pay an unusually high degree of respect to the Board's conclusion—these remedies are "peculiarly a matter of administrative competence." *Fibreboard Paper Products Corp. v. NLRB*, 1964, 379 U.S. 203, 216, 85 S.Ct. 378, 406, 13 L.Ed.2d 233, ———. In *Virginia Electric & Power Co. v. NLRB*, 1943, 319, U.S. 533, ——— S.Ct. ———, 87 L.Ed. 1568, the Supreme Court stated it in stringent terms: "[The order] should stand unless it can be shown that the order is a patent attempt to achieve ends other than those which can fairly be said to effectuate the policies of the Act." at 319 U.S. 540, ——— S.Ct. ———, 87 L.Ed. 1574. Fresh emphasis on the peculiar respect due Board determination of remedies has been given by the Supreme Court in *NLRB v. Gissel Packing Co., Inc.*, ——— U.S. ———, ——— S.Ct. ———, 23 L.Ed.2d 547:

"It is for the Board and not the Courts * * * to make [the] determination [of remedies], based on its estimates as to the effects on the election process of unfair labor practices of varying intensity. In fashioning its remedies under the broad provisions of § 10(c) of the Act * * * the Board draws on a fund of knowledge and expertise all its own, and its choice of remedy must therefore be given *special* respect by reviewing Courts." at ——— U.S. ———, 89 S.Ct. ———, 23 L.Ed.2d 577, n.32 (emphasis added).

And, in upholding a Board's order compelling the payment of fringe benefits as a part of the remedy for a §8(a)(5), violation the Court said of § 10(c) this "Grant of remedial power is a broad one." *NLRB v. Strong*, 1969, ——— U.S. ———, 89 S.Ct. ———, 21 L.Ed. 546.

The policy behind *Virginia Electric, supra, Gissel Packing Co., Inc., supra*, and the many others, see, e.g., *Phelps Dodge Corp. v. NLRB*, 313 U.S. 177, 194, 61 S.Ct. 845, ———, 85 L.Ed. 1271, ———; *J. H. Rutter-Rex Mfg. Co. v. NLRB*, 5 Cir., 1968, 399 F.2d 356, as § 10(c) expresses, is to require the recalcitrant offender "to take such affirmative action * * * as will effectuate the policies of this [Act]." That sweeping permissive command brings into play the equally broad declarations of the basic rights of employees under § 7, 29 U.S.C.A. § 157.[8] In order to enable employees to enjoy these rights, especially in lawful efforts to organize for collective representation, there are many instances in which the inescapably negative cease and desist order will not suffice. Nor is the reinstatement with backpay order universally and fully effective. In the first place, this merely assuages the direct economic injury suffered by the victims of unlawful discrimination, except to hold out some hope that the incidents will not recur because each will be met by this mild sanction, the backpay order's impact on the efforts of the remaining employees to organize is at best uncertain.[9]

In many instances the combination of a cease and desist order with reinstatement and backpay and a traditional posting of the notice will be adequate. But where the employer demonstrates not once or twice, or three or four times, but five times that it will not abide by the demands of the law, to limit the Board to these remedies would leave both the Board and the Court of Appeals in frustrating helplessness. This would be to deny the obvious Congressional purpose behind § 10(c)—to have available remedies necessary "as will effectuate" the Act.

The Courts not only may, they must, permit a good deal of flexibility and adaptation in the remedies prescribed. The obligation to respond to contemporary demands for resourceful and imaginative judicial ingenuity, *Bros. Inc. v. W. E. Grace Mfg. Co.*, 5 Cir., 1965, 351 F.2d 208, 209, n.1, *cert. denied*, 1966, 383 U.S. 936, 86 S.Ct. 1065, 15 L.Ed.2d 852, ought not to be left to Judges alone. The responsibility must rest on all adjudicators.[10] Certainly, as this Court recognizes, meeting this obligation involves being hospitable to the distinctions born of differences.[11]

In light of these general principles, how fares the objections urged by a four time loser to the specific elements of the order? First, and easily dealt with, is the requirement that a notice of the Board's order (see subparagraph (d) and "Notice to employees" note 4 *supra*) be sent to each employee's home.[12] This requirement does not place any real financial strain on Stevens and imposes no serious technical problems. Moreover, it surely aids in dispelling the chilling effect of

Footnotes at end of article.

Stevens' practices by giving the employee an opportunity in the privacy of his home to see that someone stronger than J. P. Stevens & Co. has a voice in protecting those who wish to support the Union. *Stevens I* at 305, *Stevens II* at 906, and *Stevens III and IV* at 1022; *Standard Oil Co. v. NLRB*, 9 Cir., 1968, 399 F.2d 639; *NLRB v. H. W. Elson Bottling Co.*, 6 Cir., 1967, 379 F.2d 223.

The second element of the order requiring the Company to read the notice to the employees (see subparagraph (g) note 4 *supra*) would perhaps present a more difficult question if, as Stevens urges, we have to read *NLRB v. Laney & Duke Storage Warehouse Co., Inc.*, 5 Cir., 1966, 369 F.2d 859 as the law of the Medes and Persians which altered not. But we think Judge Feinberg in *Stevens I*, at 304–5 characterized our action correctly as "albeit without much discussion * * * [and] although it had enforced such a provision in the past. *Jackson Tile Mfg. Co. v. NLRB*, 272 F.2d 181 (5th Cir., 1959)." While on that record, for the needs of that case, we declined to enforce a Board order requiring the employer to read a notice "to each employee, singly or collectively", because it was unnecessarily embarrassing and humiliating to management, *NLRB v. Laney & Duke Storage Co., Inc., supra* at 869, embarrassment takes on a minor value when outweighed by the necessity of effectuating the policies of the National Labor Relations Act. The necessities which become exigencies are as variable as industrial life itself. Thus, in *NLRB v. Texas Electric Cooperative, Inc.*, 5 Cir., 1968, 398 F.2d 722, we enforced a Board order requiring the employer to read the notice because it was shown that a large number of the employees were illiterate. Moreover, in *NLRB v. Bush Hog, Inc.*, 5 Cir., 1968, 405 F.2d 755, against a similar *Laney & Duke* assault, this Court also enforced a Board order requiring the employer to read the notice. There we said:

"Where . . . the Board has found numerous infringements of protected rights and a low literacy level among the company employees, we cannot hold that the Board abused its discretion in the notice reading requirement of the present order."
405 F.2d at 759.

But it misreads the categorical imperative of § 10(c) and the elasticity woven into it by *Gissel*, and others, to think that illiteracy or low intelligence levels are the only justifications for this remedy. After all, the traditional posting of the notice has a therapy beyond mere communication. In a world of widespread publicty, aided by vigilant or militant organizers, it is unlikely that a Board order or the Court enforcement of it would be unknown to the affected workers. A part of the medicine is the traditional acknowledgement that the employer has, but will not again, deny employees' rights. For repeated violations persisted in despite intervening declarations of illegality, the Board is warranted in impliedly concluding that such conduct has created a chill atmosphere of fear and, further, in recognizing that the reading requirement is an effective but moderate way to let in a warming wind of information and, more important, reassurance.[13] Certainly it is not "a patent attempt to achieve ends other than those which can fairly be said to effectuate the policies of the Act." *Virginia Electric & Power Co. v. NLRB*, 1943, 319 U.S. 533, 540,——— S.Ct. ———, ———, 87 L.Ed. 1568, 1574.

We likewise enforce that part of the Board's order requiring the company to give the Union reasonable [14] access for a year to the company bulletin boards (see subparagraph (e) note 4 *supra*). We do this even though there was no specific showing that the Union was unable to disseminate its lawful propaganda.[15]

Here the employees who were active in the Union effort and who distributed Union literature were discriminatorily discharged. More than that, the Employer's opposition leading to illegal excesses was not localized to the Georgia plants. Employees, too, may get the word. And that word was the story revealed by *Stevens I, II, III and IV*. The warning was there for all to heed. And yet communication of a desire to try—if not to succeed—in organizing for collective action in dealing with this huge and powerful business, is one of the basic aims of the Act. But how to communicate when history proves that identifiable activity imperils the job of the actor? In light of the fear and reluctance on the part of the employees to engage in lawful solicitation that Stevens' conduct must have engendered—a likelihood which §§ 8(a) (1) and (3) show was within congressional contemplation—providing the Union with access to a bulletin board was clearly not a "patent attempt to achieve ends other than those which can be fairly said to effectuate the policies of the Act." *Virginia Electric, supra*. Surely, the Board could conclude that this rather impersonal outlet for Union views was necessary to eliminate the employees' apprehension of incurring the risk of discharge or other retaliation if they engaged in personal solicitation either in or out of the plant.[16] See *NLRB v. H. W. Elson Bottling Co.*, 6 Cir., 1967, 379 F.2d 273.

For like reasons we enforce the portion of the Board's order requiring Stevens to make available to the Union a list of the names and addresses of the plants' employees. (See subparagraph (f) note 4 *supra*.) Stevens argues that the Board's remedy is not appropriate because the "obvious and unabashed objective behind this 'remedy' is to aid the Union in organizing Stevens' employees * * *."

That it may be. But so is a publicized cease and desist order or wild-fire awareness of a reinstatement and backpay order for four employees. See *Stevens II* at 905–06. On the surface, this may appear to be making the lot of the Union easier. But, it is being made easier solely because the employer has made that lot *harder* than the law tolerates.

It bears emphasis that the protected collective activity—and conversely the object of formidable employer opposition—was attempting to organize. A remedy "to effectuate the policies of * * * this [Act]", § 10(c), must dispel, compensate for, or at least neutralize, the frustrating effects of persistent illegal activity. One way, of course, is to assure accurate, effective communication by methods or means which can be demonstrably free from employer retaliation.[17] A list of names and addresses affords two ready ways insulated from discriminatory reprisal—(1) personal visitation and (2) direct mail.

And, while invoked and enforced here to meet the exigencies of unregenerate employer illegality, this remedy gives a certain symmetry in the administration of the Act. Quite apart from, and even in the absence of, employer unfair labor practice opposition, the Board has the power to compel the employer to furnish the names and addresses of employees prior to, and as a part of, a board conducted election. The Board's *Excelsior* rule, earlier upheld by this and the Fourth Circuit [18] was expressly approved in *NLRB v. Wyman-Gordon Co.*, 1969, —— U.S. ——, 89 S.Ct. ——, 22 L. Ed. 2d 709.[19]

This nominally puts us in opposition to the Second Circuit's holding in *Stevens II*, at 905, in which that Court relied on *NLRB v. Babcock & Wilcox Co.*, 1956, 351 U.S. 105, 76 S.Ct. 679, 100 L. Ed. 975, which denied non-employees access to the company's property for distribution of Union literature. But not really, for that Court, virtually confessing its own mistake in, having denied a transfer of *Stevens I*, at 306 n. 16, from the Second to the Fourth Circuit where geographically "the action is", would undoubtedly now enforce this provision because, first, the Fourth Circuit has done so in *Stevens III and IV* at 1022–25, and second, *Stevens III, IV* and *V* prove that the remedy of *Stevens II* was not stringent enough.[20]

As the leitmotif in this opus in a major or minor key is the necessity that, within permissible limits, the remedy be tuned to the exigencies of the case, we would emphasize as do all the cases approving adaptaability that this opinion does not stand as a precedent for the use of any one or more or all of subparagraphs (d) (e) (f) (g) (see note 4 *supra*) in any particular case. It all depends.

We deny the petition for review and grant the crosspetition to enforce.

Order enforced.

FOOTNOTES

[1] For ease of reference we continue the numerical identification employed by the Fourth Circuit in Stevens *III and IV:*

Stevens I: J. P. Stevens & Co. v. NLRB, 2 Cir., 1967, 380 F.2d 292, *cert. denied*, 389 U.S. 1005, ——— S.Ct. ———, ——— L.Ed. (2d) ———.

Stevens II: Textile Workers Union of America v. NLRB, 2 Cir. 1967, 388 F.2d 896.

Stevens III and IV: J. P. Stevens & Co. v. NLRB, 4 Cir., 1968, 406 F.2d 1017.

The present case, which reviews the Board's June 12, 1968 order, will be referred to as *Stevens V*.

[2] The violations in this case ocurred in Stevens' Dublin, Georgia plants, which are two of approximately 70 plants operated by the company throughout North and South Carolina and Georgia, in which the company is engaged in the manufacture and sale of cloth goods and other products.

[3] The union involved in this case is the Textile Workers Union of America.

[4] The order provided:

"(d) Inform the employees of their rights under the Act and assure them that Respondent will not engage in the conduct from which it is ordered herein to cease and desist, and that Respondent will comply with the affirmative requirements of this order by mailing a copy of the attached notice marked "Appendix A" to each employee of its Dublin and Nathaniel plants, Dublin, Georgia, and posting copies thereof at the said plants for 60 consecutive days thereafter, in conspicuous places, including all places where notices to employees are customarily posted. Reasonable steps shall be taken by the Respondent to insure that said notices are not altered, defaced, or covered by any other material."

"(e) Upon request of the Union, immediately grant the Union and its representatives reasonable access at the Dublin and Nathaniel plants, for a 1-year period, to its bulletin boards and all places where notices to employees are customarily posted."

"(f) Upon request of the Union, made within 1 year of the issuance date of this Decision, immediately give to the Union a list of the names and addresses of all employees in its Dublin and Nathaniel plants."

"(g) Convene during working time, by departments and by shifts, all its employes in the said plants, and a responsible official of the Respondent, at department supervisor level or above, or a Board agent shall read to department employees the contents of the attached Appendix A."

"(h) Notify the Regional Director for Region 10, in writing, within 10 days from the date of the Order, what steps have been taken to comply herewith."

The notice to be read and mailed to employees reads:

"Notice to all employees pursuant to the recommended order of a trial examiner of the National Labor Relations Board and in order to effectuate the policies of the National Labor Relations Act we hereby notify our employees that:

We will not discharge any employee because of union activities or for antiunion reasons or for filing charges with the Labor Board.

We will not spy on union meetings or on employees attending them or on any union activities.

We will not threaten employees with loss of jobs or the closing or moving of the plant or with any kind of different treatment because they attended union meetings or engaged in union activities or chose a union to represent them.

We will give back to Robert Brown, Rollin Dewitt Loyd, Larry Kelley, and Larry Greenway their jobs and seniority, and we will make up the pay they lost and also pay them 6 percent interest.

The National Labor Relations Act gives all employees these rights:

To organize themselves.

To form, join, or help unions.

To bargain as a group through a representative they choose.

To act together for collective bargaining or other mutual aid or protection.

To refuse to do any or all of these things we will not interfere with any of these rights including your rights to join or assist Textile Workers Union of America, AFL–CIO, or any other union of your choice.—J. P. Stevens & Co., Inc. (Employer)".

[5] See [surveillance] NLRB v. Southland Paint Co., 5 Cir., 1968, 394 F.2d 717, 719–20; NLRB v. Bouden Co., 5 Cir., 1968 392 F.2d 412, 414, n.3; NLRB v. Citizens Hotel Co., 5 Cir., 1963, 313 F.2d 708; [interrogation] NLRB v. Camco Inc., 5 Cir., 1965 340 F.2d 803, 807 *cert.* denied, 382 U.S. 926, ——— S.Ct. ———, ——— L. Ed. 2d ———; NLRB v. Griggs Equipment Co., 5 Cir., 1962, 307 F.2d 275, 278; [threats] Textile Workers v. Darlington Mfg. Co., 1965, 380 U.S. 263, 274, n.20, ——— S.Ct. ——, ——, —— L.Ed.2d ——, ——; NLRB v. Neuhoff Bros. Packers, Inc., 5 Cir., 1967, 375 F.2d 372, 374.

[6] Stevens was charged with discriminatorily discharging six employees. The Trial Examiner found that two of the discharges were for cause. The Board approved this finding and it is not challenged here.

[7] The portions of the order to which the company vigorously objects were not part of the Trial Examiner's recommended order, but were added by the Board. The Board stated its reasons as follow:

"In its exceptions, the Charging Party requested the Board to grant an order similar to that granted in *J. P. Stevens & Co., Inc.*, 167 NLRB No. 38, with some extension of its scope. Upon review of all the relevant factors herein, including the Respondent's company-wide history of extensive unfair labor practices as reflected by our decisions in *J. P. Stevens & Co., Inc. (I)*, 157 NLRB 869, *J. P. Stevens & Co., Inc. (II)*, 163 NLRB No. 24; *J. P. Stevens & Co., Inc. (III)*, 167 NLRB No. 37, and *J. P. Stevens & Co., Inc. (IV)*, 167 NLRB No. 38, we are persuaded that 'the conventional remedies would not be adequate to disabuse the employees of the effects of the Respondent's flagrant conduct. . . .' Accordingly, we shall conform our order herein to that adopted by the Board in *J. P. Stevens (IV)*. We shall, however, modify the scope of the *J. P. Stevens (IV)* Order, by requiring Respondent herein to mail copies of the notice to employees of the Dublin and Nathaniel plants, to post copies at the Dublin and Nathaniel plants, and to furnish the Union a list of employees at these plants."

The Board, however, refused to accede to the Union's demand that Stevens also be ordered to give to the Union access to the company parking lots to distribute literature and give the Union an opportunity to reply to any anti-union speech made by company personnel.

[8] "Employees shall have the right to self-organization, to form, join, or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection, and shall also have the right to refrain from any or all of such activities except to the extent that such right may be affected by an agreement requiring membership in a labor organization as a condition of employment as authorized in section 153(a)(3) of this title." 29 U.S.C.A. § 157.

[9] There is a substantial danger that the backpay award has degenerated into "a license fee for union busting." Staff of Subcommittee on NLRB, House Committee on Education and Labor, 87th Cong., 1st Sess., Administration of the Labor-Management Relations Act by the NLRB 2 (Comm. Print 1961). See also *Stevens I*, at 303–04.

[10] Resourceful and imaginative NLRB orders are essential. The labor-management relations of industry are varied and complex. Courts of Appeals cannot require the Board to use only round pegs when the holes may be square, triangular, rectangular, or even pentagonal. See Bok, The Regulation of Campaign Tactics, in Representation Elections under the National Labor Relations Act, 78 Harv. L. Rev. 38, 124–41 (1964); Note, The Need for Creative Orders under Section 10(c) of the National Labor Relations Act, 112 U. Pa. L. Rev. 69, 90–94 (1963); Note, A Survey of Labor Remedies, 54 Va. L. Rev. 38, 94–95 (1968).

[11] Thus, this Court has held that when an employer has shown a "proclivity" to violate the Act, the Board can frame its order to cease and desist in broad terms—cease and desist from "in any manner" interfering with employee rights—while if no "proclivity" to violate the act is shown, the Board must limit the scope of the order more nearly to the conduct of the particular case. Southwire Co. v. NLRB, 5 Cir. 1967, 383 F. 2d 235; NLRB v. Bama Co., 6 Cir., 1965, 353 F. 2d 230.

[12] Although the Board usually requires only that the notice be posted on the Company bulletin board, the Board has often used alternative means to insure the notice is communicated to the employees. See NLRB v. Bush Hog, Inc., 5 Cir., 1968, 405 F. 2d 755, 758 n. 5.

[13] The Second and Fourth Circuits have approved the requirement that the notice be read to the employees in all the previous Stevens cases. *Stevens I*, at 304–05; *Stevens II*, at 904; *Stevens III and IV*, at 1022. See also Judge Wright's dissent in International Union of Electrical, R & M Workers v. NLRB, D.C. Cir., 1967, 383 F. 2d 230, 234.

[14] There are ample resources to assure that the Union will abide by the Board's limitation to "reasonable access." This limitation should prevent the Union, as Stevens fears, from taking over control of the Company's plant.

[15] The portion of the order giving the Union reasonable access to Company was not enforced by the Second Circuit in *Stevens I*, at 305, but in *Stevens II*, at 905, on a record the Company says was identical with *Stevens I*, that Court enforced the order. Of course, by this time the Board and Court had seen the ineffectiveness of the order in *Stevens I*.

[16] When an employer has engaged in massive unfair practices, there can be a resulting fear of reprisals that must be dispelled before the situation is restored. See Bok, The Regulation of Campaign Tactics in Representation Election under the National Labor Relations Act, 78 Harv. L. Rev. 38, 140–41 (1964); Note, The Need for Creative Orders under Section 10(c) of the National Labor Relations Act, 112 U. Pa. L. Rev. 69, 90–94 (1963).

[17] The list of employees serves to complement the bulletin board requirement. See subparagraph (e) note 4 *supra*.

[18] Howell Refining Co. v. NLRB, 5 Cir., 1968, 400 F.2d 213; NLRB v. Hanes Hosiery Div., 4 Cir., 1967, 384 F.2d 188.

[19] Even after grant of certiorari in *Wyman-Gordon*, we adhered to *Howell*, note 18 *supra* and granted summary reversal in Groendyke Transport, Inc. v. Davis, 5 Cir., 1969, 406 F.2d 1158, which was one of the early cases in the Fifth Circuit's precalendaring judicial screening procedure. See Murphy v. Houma Well Service, 5 Cir., 1969, 409 F.2d 804.

[20] As do we, the Fourth Circuit in *Stevens III* and *IV*, at 1024, found support in the *Excelsior* analogy. See note 18 *supra* and related text.

CATTLEMEN, RANCHERS, AND MEAT PACKERS MAINTAINED LOW PRICES

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. COLLINS. Mr. Speaker, one of the greatest achievements in productive efficiency has been accomplished by the cattlemen, ranchers, and the meat packers. The other day I was discussing inflation with my friend Roscoe Haynie, who has had many years of experience with Wilson Meat Packers. In discussing the housewives interest in food prices, we made some comparisons on meat.

An interesting base period was September 17, 1951, when the Federal Government had OPS price regulations.

Eighteen years have passed since these ceiling prices were established. Most every other segment of our economy, such as automobiles, appliances, homes, real estate, clothing, and plant wages have all had prices go up tremendously.

We realized that the accomplishments of the meat packing industry cannot be maintained indefinitely. But, here is a special salute to America's great ranchers, cattlemen, and meat packers whose efficiency has brought economy and savings to the American housewife.

Below, we have listed the September 17, 1951, ceiling prices compared to present prices taken out of the daily newspaper:

	Sept. 17, 1951, ceilings	Now
Chicago base, wholesale carcass beef:		
Choice beef	56.00	45.00
Good beef	54.00	43.00
Standard beef	49.00	42.50
Utility beef	47.00	41.50
Cutter and canner	42.50	42.00
Chicago base, beef cuts, wholesale:		
Rounds	61.00	57.00
Chucks	55.00	41.50
Ribs	68.00	60.00
Loins	82.50	81.00
Live cattle prices:		
Choice	34.20	31.50
Good	31.50	29.00
Standard	27.30	27.00
Utility	21.80	21.00
Cutter and canner	19.50	20.00

PFC. DOUGLAS S. WINN

HON. LAWRENCE J. HOGAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. HOGAN. Mr. Speaker, I am delighted to advise my colleagues of an honor which has been bestowed on the son of our distinguished friend, the gentleman from Kansas, Mr. LARRY WINN.

His son, Pfc. Douglas S. Winn, who is stationed with the U.S. Army in Korea, was named "Soldier of the Month" of his battalion.

While I was in Korea last August, I had the pleasure of meeting this fine young man who is a credit to his family and his country.

Private First Class Winn, who has been assigned to the First Battalion, 31st Artillery at Camp Casey in Korea since last April, received the award from his comanding officer along with a 3-day pass.

I know our colleagues will want to join me in extending congratulations to the son of the gentleman from Kansas.

MR. AGNEW WIDENS THE GAP

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. OTTINGER. Mr. Speaker, continuing a tradition he established during last year's campaign, Vice President AGNEW has stooped to name-calling of the most base and vile nature in carrying out his apparent responsibilities as the hatchet man of the administration's southern strategy.

By calling supporters of last week's Vietnam moratorium "an effete corps of impudent snobs who characterize themselves as intellectuals," Mr. AGNEW not only impaired the dignity of the high office he holds, but senselessly lowered the level of Vietnam debate and widened the gap between Americans who, as a matter of conscience and conviction, differ on this issue.

It is curious that in adopting so much of the Vietnam policy of its predecessor, the Nixon administration has also adopted its rhetoric. Last year's "Nervous Nellies" are "effete snobs" in 1969. And in the meantime, more Americans die, national priorities are distorted further, and the divisions in our society grow deeper.

With the hope that someone in the administration will take the time and trouble to counsel the Vice President against giving vent to his baser emotions, I present for the RECORD today's New York Times editorial on Mr. AGNEW's remarks:

MR. AGNEW DOES NOT UNDERSTAND

Vice President Agnew demonstrated a truly monumental insensitivity to the most profound concern of millions of Americans—and particularly the nation's youth—when he described last week's Vietnam Moratorium as the creation of "an effete corps of impudent snobs who characterize themselves as intellectuals." He has learned nothing from the remarkable demonstration in which idealistic young men and women from the nation's campuses were joined by Americans of every generation and from all walks of life in an urgent appeal that the United States Government follow a more effective path to peace.

The purpose of the Moratorium was to underscore the need for active pursuit of peace in Vietnam. Far from undermining the President's position of leadership, it presented him with a strengthened mandate to carry out with more vigor and more determination the basic policy he says he is pursuing. Neither he nor Mr. Agnew gives evidence of understanding what the Moratorium was all about.

Mr. Agnew darkly hinted at some treasonable duplicity because the planners of the Moratorium had failed to renounce support from Hanoi—a support they had never asked.

He sought easy applause from a Republican fund-raising audience in New Orleans by ascribing the success of the Moratorium to "a spirit of national masochism."

In the same speech, he lambasted the nation's youth in sweeping and ignorant generalizations, when it is clear to all perceptive observers that American youth today is far more imbued with idealism, a sense of service and a deep humanitarianism than any generation in recent history, including particularly Mr. Agnew's.

The ominous strains in Mr. Agnew's words are that they equate support of the war with manliness, while describing as effete those who call for a redoubling of the nation's dedication to peace. It is the mark of insecure nations and politicians to mistake unquestioning support of military ventures as the test of patriotism. This is exactly the approach to the American destiny which the most articulate and politically alert sector of the nation's young intellectuals have questioned and rejected. Mr. Agnew's incredible obtuseness can only add to the frustration of millions of Americans—young and old alike—who believe that rational dissent must be given a fair hearing. His insensitivity to this principle of American democracy will give comfort to those who preach the gospel of disruption and violence.

PITTSBURGH WOMAN—BETSY ROSS BROUGHT TO LIFE

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. MOORHEAD. Mr. Speaker, last spring Sophie Wolanin of Pittsburgh appeared as Betsy Ross at the annual fund-raising event for social welfare projects sponsored by the Association of Pittsburgh Business Women's Clubs.

News of the sophisticated lady reached "the mother country" and the story was carried in the August 1969, Dictionary of International Biography, circulated in 112 countries around the world. I believe it is the first time a Pennsylvanian and a Pittsburgher has been so honored.

During this 50th anniversary of the National Federation of Business and Professional Women's Clubs, this week of October 19 to 25 has been set aside to spotlight woman's role in today's world.

It is certainly fitting that we call attention this week to this organization which has done so much toward seeing that women are an informed and active electorate, and to honor them for their civic and social responsibility.

I would like to pay particular tribute to Miss Sophie Wolanin and to the Business and Professional Women's Club of Pittsburgh for presenting this unique and accurate portrayal of a very important woman in our Nation's history, and I take this occasion to include the article at this point in the RECORD for the attention of my colleagues:

BETSY ROSS BROUGHT TO LIFE

Betsy Ross the famous Philadelphia seamstress and American patriot, was recently brought to life when Sophie Wolanin, a member of the Pittsburgh Business and Professional Women's Club, was a model in the "Fashion Trip—America" featured at the annual fund-raising benefit of the Association of Pittsburgh Business Women's Clubs held at the University Club.

The Association, comprising 12 professional and service organizations, represents some 1,100 women. Its purpose is not only active participation in community and public affairs, but benevolent and social welfare projects as well. Much of the Association's effort is channeled towards the social welfare of children—in particular, the handicapped child, and the under-privileged child, who needs extra attention—frequently providing for them in various ways and making financial contributions.

Such benevolence necessitates fund raising and this event usually takes place early in May.

Each of the 12 organizations participating in the historical pageant had one of its members portray some important woman in American history. Miss Wolanin, representing the Business and Professional Women's Club of Pittsburgh, portrayed Betsy Ross, who made the first American flag. More than 325 women attended the benefit.

The beautiful Colonial dress, which Miss Wolanin wore at the pageant was symbolical of the year 1777, when Betsy, then 25, was commissioned by a three-man committee to make the flag. This committee consisted of General George Washington, Robert Morris and George Ross, who was her uncle.

PAINSTAKING RESEARCH

The dress was made by Sophie's sister, Mrs. Stanley J. Brenick of Sharon, Pennsylvania, after careful and painstaking research into the costume history of the period.

Lending a dramatic touch to the Betsy Ross portrayal were Eagle Scout John Flower, Junior, aged 14, and Second Class Scout Jeffrey Craig, 11, both of Troop 228, Bethel, Park, Pennsylvania, who demonstrated the proper way to fold the flag.

The purpose of this demonstration was to pay honour to the flag and to instill patriotism in the citizenry viewing the pageant. The authentic flag used was loaned to Miss Wolanin by the Flag Plaza Foundation through the efforts of Mr. David J. Buerklin, director of relationships, Allegheny Trails Council of the Boy Scouts of America.

Miss Wolanin likewise demonstrated to the audience how to cut a five-pointed star. According to legend Betsy Ross made a suggestion to General Washington that five-pointed stars should be used in the flag when she was commissioned to make it.

As a souvenir of the evening, a colourful commemorative Betsy Ross envelope in which was enclosed a brief history of the first stars and stripes, as well as instructions on making those stars, was given to each woman attending the benefit.

In addition, through the efforts of a fellow co-worker, Mr. Stanley W. Litts, director of sales, Westinghouse Credit Corporation, Miss Wolanin was able to obtain on behalf of the Pittsburgh B.P.W. Club, a small supply of Ross commemorative stamps, which the United States Post Office Department issued in 1952 on the 200th anniversary of Betsy's birth. These 17-year-old stamps, considered as prized collectors items, were purchased by the women in honor of the occasion. This gesture helped increase the net proceeds of the benefit by an unexpected, but welcome, amount.

THE NARRATOR

Narrating the historical portrayal of the Ross story was a fellow B.P.W. member, Miss Grace E. Underwood. According to reports, the entire Betsy Ross Act received the popular acclaim as "best in the show."

Reviewing briefly the early history of the United States, a year after the signing of the Declaration of Independence, on June 14, 1777, the Continental Congress in Philadelphia adopted this resolution:

"That the flag of the United States be 13 stripes, alternate red and white; that the union be 13 stars, white in a blue field, representing a new constellation."

Since Congress did not specify the arrangement of the 13 stars on the blue background, Betsy had them arranged in a circle, based on the idea that no colony should take precedence.

General Washington described the symbolism of the flag as follows:

"We take the stars from heaven, the red from our mother country, separating it by white stripes, thus showing that we have separated from her, and the white stripes shall go down to posterity representing liberty."

In 1916, President Woodrow Wilson proclaimed June 14 as the anniversary of the creation of the first stars and stripes and as Flag Day, which is annually observed throughout America.

Our flag is a proud symbol of the history of our people and our country. Its 13 stripes for the original 13 colonies and its stars for every state will always serve to remind us of our struggle from a small, young country to the greatest nation on earth.

NATIONAL BUSINESS WOMEN'S WEEK

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. PEPPER. Mr. Speaker, the week of October 19 marks the 41st anniversary of the National Business Women's Week, a time specifically devoted to dramatizing the contributions of women to the professional and business world.

The first observance took place in 1928. In the years since then, women have made tremendous advances in our society. From an early effort of business and professional women to achieve acceptance and status based on their ability and accomplishments, NBWW has grown to be a nationwide observance of the contributions of women in every segment of our society.

The objectives of National Business Women's Week are noteworthy: to publicize achievements of business and professional women everywhere, on the local, State, and National levels; and to publicize the objectives and program of the national federation.

The National Federation of Business and Professional Women itself has an impressive membership of more than 180,000 women active in all the 50 States, the District of Columbia, Puerto Rico, and the Virgin Islands. Founded in 1919, its growth is exemplified by its emblem, the Nike—Winged Victory of Samothrace, which symbolizes progress. And the Federation of Business and Professional Women can indeed take pride in the progress it has made toward attaining its objectives, which are fourfold:

First, to elevate the standards for women in business and in the professions;

Second, to promote the interests of business and professional women;

Third, to bring about a spirit of cooperation among business and professional women of the United States; and

Fourth, to extend opportunities to business and professional women through education for industrial, scientific, and vocational activities.

The membership of this federation represents a force which is being effectively molded for the promotion of excellence in business and government. Its voice is the voice of conscience and concern. A leader since its founding in 1919 in the effort to advance women's rights and upgrade the status of women in this Nation, its members are to be commended, encouraged, and supported in their good efforts.

I would like to call the attention of my colleagues to the action items of this year's legislative platform adopted by the Federation of Business and Professional Women at its national convention last summer. These are proposals that would benefit men as well as women, and deserve our careful consideration. They include:

First, continued support for legislation to amend the Constitution of the United States to provide that equality of rights under the law shall not be denied or abridged on account of sex.

Second, active support for pending legislation providing for a broadened head-of-household benefit under the Internal Revenue Code; increased personal exemptions for dependents under the Internal Revenue Code; and a more equitable distribution of the tax burden.

Third, the proposal and support of legislation providing for uniform laws and regulations for men and women as to working hours, working conditions, rates of pay, equal employment opportunity, including retirement for age; equal treatment for working men and women in the area of survivor and retirement benefits; and increased child care deductions under the Internal Revenue Code.

Fourth, the proposal and support of State legislation to provide for uniform jury service and uniform qualifications in the selection of men and women to serve on grand or petit juries in any court.

Fifth, support of legislation that will bring about more effective crime control and law enforcement.

Mr. Speaker, these are legislative matters which have waited long and in vain for congressional attention. For nearly 25 years in both the Senate and the House I have been sponsoring and supporting the equal rights amendment to the Constitution and legislation which would guarantee equal conditions of employment to all American citizens, regardless of age or sex. This session, I have once again introduced such legislation, and once again I hope that it will be passed.

This Nation has only gradually awoken to the energy, creativity, and potential which our womanpower possesses. I think the contributions of women to American life were possibly best summed up by President Kennedy when he said, in 1961, that:

As was foreseen by the early leaders, women have brought into public affairs great sensitivity to human need and opposition to selfish and corrupt purposes. These political contributions and the manifold activities of women in American communities are the outgrowth of a long tradition by pioneering by American women. They stand as an encouraging example to countries in which women are only now achieving equal political and social status.

During this week which is dedicated to publicizing the achievements of business and professional women everywhere, it is with admiration for these able women that I extend my best wishes to them. I congratulate President Harmon and the more than 3,800 local organizations which make up the National Federation of Business and Professional Women's Clubs on their progressive and essential work.

A SELECT COMMITTEE ON CONGRESSIONAL MAILING STANDARDS

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. WILLIAM D. FORD. Mr. Speaker, tc say that the proper use of the franking privilege often raises complex, technical, and difficult questions for Members of Congress is to state the obvious. The franking problem is a continuing one. Every year we are faced with new questions of frankability and past answers do not always fit the new questions that arise. In our fast-paced world there is a constant changing of ideas, events, modes, and methods of communication. The result is often honest confusion for the Member confronted with a totally new franking question.

In the past Members could submit congressional material to the Post Office Department for approval and for rulings on the frankability of the matter. However, last December's decision by the Post Office that it could no longer make such rulings has left a void in this area.

Mr. UDALL of Arizona has proposed a resolution to establish a Select Committee on Congressional Mailing Standards which would fill up this gap. I join with him and with others in supporting this measure as an effective way to meet a continuing and often thorny problem. This proposal would direct the bipartisan select committee "to provide guidance, assistance, advice, and counsel, through advisory opinions or consultations or both, to any Member of the House of Representatives, upon his request in connection with the mailing or contemplated mailing by the Member of franked mail."

Such an advisory body could do much to protect both Members of Congress who had honest doubts on a question of frankability and the public who has the right to make sure that the franking privilege is used in an ethical manner. It would allow any doubts to be resolved in advance and would assure that the franking privilege was not abused.

KOREA TODAY

HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. HANNA. Mr. Speaker, this month's Army Digest carried an interesting and informative article on our military presence in Korea. I include it in the RECORD at this point:

KOREA TODAY: THE VIGIL CONTINUES

Along 17½ miles of tense and troubled frontier, you hear the accents of Iowa farm boys, Georgia mill workers, Harvard Law grads. Some are regulars, long-term professionals; others are perfoming an obligation of citizenship. All have a hard and endless job—watching the line along the American sector of the Demilitarized Zone, which straddles Korea's 38th Parallel.

An entirely new generation has grown up since a gray Sunday in June 1950 when North Korea dispatched 117,000 tough, Soviet-equipped regulars south to strangle the infant Republic of Korea.

From 16 nations came a swift response. American troops spearheaded an international army, the first of its kind and purpose —the United Nations Command. It met the crisis to force the North Koreans, and the Chinese Communists who intervened to rescue them, to the conference table at Panmunjom—where recriminations still fly like shots.

Today, actual shots still fly as Communists continue to break the unquiet peace.

Soldiers of the United Nations Command are involved almost daily in some Communist-initiated act of violence along the 151-mile DMZ. Their vigilance continues against hostile raiders and infiltrators trying to move south. Throughout Korea, UNC forces react swiftly to eliminate enemy agent teams and infiltrators who strike hard and often at their positions.

In January 1968, a 31-man North Korean commando team crept into Seoul on a deadly mission—to assassinate ROK President Chung Hee Park. Intercepted a short distance from the Presidential Mansion, they were hunted down and killed or captured.

Since 1967, there have been about 1,600 incidents involving Communist violations of the Armistice, some 40 percent of which were small firefights. More than 550 enemy infiltrators and agents have been killed and nearly 50 captured.

As General C. H. Bonesteel III, commanding general, UNC/USFK/Eighth U.S. Army, observed: "With the exception of the conflict in Vietnam, nowhere else in the world today is there so direct and inflammable a confrontation between Free World forces and vicious, strong and aggressive Communists as there is along Korea's DMZ."

Despite Communist orations at the Panmunjom truce table, there is nothing to indicate that the situation has changed appreciably since the signing of the Armistice, July 27, 1953, when General Maxwell D. Taylor, then Eighth Army commanding general, told his troops: "There is no occasion for celebration or boisterous conduct. We are faced with the same enemy, only a short distance away, and must be ready for any moves he makes."

Some of the United Nations countries who made Korea a proving ground of Free World resistance to Communist aggression have left token forces. The ROKs themselves man most of the 151-mile armed frontier. And the presence of the U.S. 2d and 7th Infantry Divisions, and 314th Air Division tells the Reds: "We're still here— and still ready."

Across the American sector of the line stretches a security system that includes modern observation devices and a newly completed barrier fence. But the real barrier is in the hearts of the South Koreans, backed by their American and United Nations allies. Behind that protective line, this ruggedly anti-Communist country has achieved political stability and impressive economic progress, making it one of the success stories of the United States assistance program.

STRONG TRADITION

Korea is a proud nation. Its people have kept their national and cultural integrity for thousands of years, despite invasions by the Chinese, Mongols and Japanese.

Korea's location is of strategic importance. Geographically, it occupies a position athwart Communist approaches to the North Pacific. The Korean peninsula lies at the apex of three great power triangles—Russia, Red China and Japan. The capital, Seoul, is less than 500 air miles from Peking, the Chinese Communist capital, and from Harbin and Mukden, China's great industrial centers. It is even closer to Russia's ice-free port of Vladivostok.

Red China and the Soviet Union maintain substantial forces nearby. Just north of the Demilitarized Zone stands the North Korean army, third largest in the Communist world. But the ROKs remain undaunted.

Since the 1953 armistice, the Republic of Korea has built a well-led well-organized and thoroughly capable military force, which numbers among the largest in the non-Communist World. Its force of more than 500,000 is organized into two armies, five corps, 17 divisions. In addition, it has two divisions serving in Vietnam. A newly organized Home Defense militia, composed mainly of ex-servicemen, but including some 15,000 women volunteers, numbers about 1.9 million.

For the past three years, ROK soldiers have served with allied units in Vietnam. Their 48,000-man force there is noted for its toughness in combat and rugged effectiveness in civic action and psychological operations.

PROGRESS

Behind the protective shield of its determined soldiers, Korea has achieved an economic miracle. New roads, highways, factories, the stepped-up tempo of manufacturing and construction mark its long strides toward modern development. Exports, which amounted to only $32 million in 1960, exceeded $500 million in 1968. The Gross National Product has been climbing between 8 and 12 percent a year for the past five years.

Not only new industries but cultural and educational institutions as well are springing up all over the republic. Its literacy rate is among the highest in the world.

Korea's growth as a peaceful, prospering nation provides an inspiring example to other developing countries. In less than two decades, it has shown the world how a society can modernize and prosper under free institutions.

To developing nations around the world, Korea's visible progress toward growth and stability presents an attractive alternative to the repressive methods of totalitarian rule.

Amid the heightened tensions brought about by infiltrations and forays from the north, Korea, the Land of the Morning Calm, maintains its vigil—and its serenity. Today, ROK forces make up the bulk of the United Nations Command. Shoulder to shoulder with other members of the United Nations Command, U.S. Forces Korea and the Eighth U.S. Army, they share a common determination to stand their ground on cold and barren ridgelines to show aggressors that freedom is not an empty catchphrase—that it will be defended whenever and as often as necessary. This is Korea today.

WICHITA FALLS PUBLISHER THE FRIEND OF THREE PRESIDENTS

HON. GRAHAM PURCELL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. PURCELL. Mr. Speaker, Mr. Rhea Howard of Wichita Falls, Tex., was recently singled out by the Dallas Times Herald as a "Friend of Three Presidents." Not only has Mr. Howard been a friend of three Presidents, but he has also been instrumental in the growth and development of his community, his State, and his Nation through his active work in the newspaper business and the Democratic Party.

The Governor of Texas, Gov. Preston Smith, once described Mr. Howard as a man who "had the nerve to walk out front, with his back to the crowd." This rare quality of leadership, Mr. Speaker, has stood for a number of years as an inspiring standard of public service to his fellow Texans. His courage and conviction have championed many causes, and it is with a great deal of pride that I would like to share the accomplishments of this Texan with my colleagues, to whom I commend Rhea Howard as an exemplary statesman:

[From the Dallas Times Herald, Oct. 8, 1969]

HELPS BUILD CITY: WICHITA FALLS PUBLISHER FRIEND OF THREE PRESIDENTS

(By Lois Luecke)

WICHITA FALLS.—A Texas publisher who earned the friendship of three U.S. presidents and whose counsel was sought by the White House says a newspaperman has to be a champion for both the community and the area in which he lives.

"I don't see how any man who runs a newspaper can dig a hole and crawl in, leaving the battleground of civic life. He must be a part of his city. He must take sides in issues. He must help solve the problems," he says.

At 77, Rhea Howard, editor and publisher of the Wichita Falls Times and Record News, a newspaper veteran of 62 years and a longtime Democratic party leader in Texas, daily practices his philosophy of journalism.

"There is no such thing as a city standing still," he will tell you. "Wichita Falls has gone forward and the newspaper has had something to do with it. A man who puts out a newspaper has to keep abreast of the times—maybe ahead of the times—to provide leadership."

Howard followed in his illustrious father's footsteps when he became head of the Times Publishing Co. upon Ed Howard's death in 1948. He was 55 when he took the helm of the newspaper his father founded in 1907. In his 21 years as publisher, associates have seen not only a continuity in the fulfillment of the Times' founding principles but a new era of involvement based on personal commitment and leadership.

He was tapped, and answered the call, for help in nearly every civic endeavor; he threw himself wholeheartedly into his political party's campaigns and has been a delegate to the last five national Democratic conventions.

Howard was one of 22 Texas publishers invited by President John F. Kennedy in October 1961 for a briefing and consultation on national and international affairs—an occasion which Howard deems "the highlight of my newspaper career."

A close friend of former President Lyndon

Johnson from the time Johnson was a freshman Texas congressman, Howard frequently corresponded with the president and talked to him by telephone, or, personally, on his numerous trips to the capital. Recently, Johnson made a special trip to Wichita Falls to have dinner with the Howard family.

Howard worked hard and successfully for the candidacies of both Kennedy and Johnson.

His newspaper was one of the few which supported President Harry Truman in 1948. Associates recall that at the dedication of the Sam Rayburn Library in Bonham, Truman singled out the publisher to shake his hand and comment, "Here's my good friend, Rhea Howard of Wichita Falls."

Howard is a member of the President's Club, a group of professional and business men in the United States. He is committeeman from the 30th Senatorial District of Texas, and a member of the Texas State Democratic Executive Committee.

His involvement in politics—which he says is the "lifeblood of the nation"—reflected an earlier day when his father became one of the "Famous 40" of the Texas Democratic delegation who voted for the hard-fought nomination of Woodrow Wilson in 1912.

But here at home in the Red River Valley, Howard is best known as a protagonist for his city, which was built, some say, on faith, oil, cattle and agriculture—in that order.

He is given much of the credit for the reactivation and growth of Sheppard Air Force Base, the largest technical training center of the Air Force. Military expenditures in the area total some $200 million annually, bolstering the area's economic stability.

Howard served on any number of committees whose efforts culminated in building a $57 million network of highways—the Red River Expressway system.

He has consistently reserved Page One newspaper space to promote the city's foundation fund to attract industries, and has served as a director of Industrial Development, Inc.

The same priority newspaper space is given each year to the United Fund. Popular or not, if the Times believes a bond issue for civic improvements should pass, Howard says so, editorially.

A recent front page Times editorial favoring a tax on alcoholic beverages rather than food and drugs was widely published throughout the state and a high government official said the editorial's influence spelled the difference in the new tax bill in the legislature.

His newspaper was one of the first in Texas to inaugurate a farm news department. Howard himself served some 32 years as a member of the irrigation district board.

The Times has sponsored the luncheon for 4-H Club and FFA members at the annual Junior Beef Show held in Wichita Falls since 1931.

The Times for years campaigned to have Midwestern declared a state-supported college—a dream realized in 1961. Howard now is a member of the board of directors of the Midwestern University Foundation.

Following the principle that you don't spend what you haven't got, Howard is proud "that the last brick was laid" on the Times' new $1 million plant, and employes moved in February 1969, "it was all paid for."

The new plant is a far cry from the original. The Times was started, he recalled, in the late 1890s when his father bought the old Weekly Times," "A shirttail full of type and a George Washington hand press" for $100. On May 14, 1907, daily publication was inaugurated.

Rhea Howard, then a "skinny newsboy," sold the first bundle. He later wrote news stories, sold ads, set type, melted lead, fed the presses and swept out.

After attending Trinity University, then at Waxahachie, and Eastman School of Business in Poughkeepsie, N.Y., Howard returned home to become an officer in the Times Publishing Co.

Howard, like his father, had seen slimmer days. He remembers too well the Depression and the soup lines. A member of the school board, Howard recalls, "We couldn't pay the teachers without discount—only script—and we couldn't feed the children. No one was paying taxes except the utility companies."

It was perhaps this experience that led Howard later to say: "My temperament has always led me to dwell on the virtues of men and institutions rather than upon their limitations; my disposition has always been to build rather than tear down or join the wrecking crew."

It perhaps also was this experience that set afire his community spirit.

Throughout the years, Howard has kept in effect an early-day policy of the Times—no liquor advertisement. The abusive use of alcohol, the Times had concluded, broke up too many families. This policy cost the newspaper some lucrative contracts and at one time the ill will of a company stockholder. "But I think it has paid off," said Howard.

In 1960, the Headliners Club in Texas named him "Publisher of the Year." In May 1966, he was chosen to represent Texas at the Air War College at Maxwell Air Force Base, Ala., where leading Americans were briefed by Pentagon officials on the awesome military power of the nation.

A member of The Associated Press, his father was one of the early-day Associated Press members, and the National Press Club in Washington; he also is active in the American Newspaper Publishers Association; the Southern Newspaper Publishers Association, the American Society of Newspaper Editors and the Texas Daily Newspaper Association. He is a member of Sigma Delta Chi, honorary journalism fraternity.

A 32nd Degree Scottish Rite mason, Howard was honored as a life member several years ago upon completion of a 50-year membership.

On July 25, 1967, an appreciative hometown observed "Rhea Howard Day," by official municipal proclamation. At a luncheon celebration, the then Lt. Gov. Preston Smith described Howard as a man who "had the nerve to walk out front, with his back to the crowd," adding, "You simply can't lead a parade from the rear."

Howard and his wife, the former Kathleen Benson of Wichita Falls, will celebrate their 56th wedding anniversary on Oct. 22, 1969. They have one daughter, Mrs. (Anna Katherine) James B. Barnett of Wichita Falls, four grandchildren and two great grandchildren.

THE NATIONAL GENERAL SERVICES PUBLIC ADVISORY COUNCIL

HON. ANCHER NELSEN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. NELSEN. Mr. Speaker, the newly created National General Services Public Advisory Council has just completed its first series of meetings. I am happy to report that much progress was made in General Services Administrator Kunzig's desire to make his giant agency more responsive to the public.

The council is ably chaired by my friend and fellow Minnesotan, Mr. Robert A. Forsythe, a Minneapolis attorney and former Assistant Secretary of the Department of Health, Education, and Welfare. He is a partner in the law firm of Cant, Haverstock, Gray, Plant, and Mooty of Minneapolis.

Mr. Forsythe was chief counsel of the U.S. Senate Select Committee on Small Business from 1953 to 1955, was administrative assistant to the late Senator Edward J. Thye, has served on the President's Commission on Voter Registration and Participation, was a Republican candidate for the U.S. Senate in 1966, and was the State chairman of the Minnesota Republican Party from 1961 to 1965. Incidentally, he is an announced candidate for the U.S. House of Representatives in 1970.

Forsythe has a long career in public service, and I am happy that he agreed to assume the chairmanship of the National General Services Public Advisory Council. His contribution will be great, and he is to be commended for giving of his valuable time, without pay, in the interest of better government.

THE MORATORIUM

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1969

Mr. MINISH. Mr. Speaker, so much has been said of the moratorium this evening, by supporters and detractors alike, that I shall endeavor to be brief. I believe it is unworthy—and foolhardy—of a democratic society to try to stifle criticism or dissent in the name of patriotism and so I fully support this untrammeled debate in the House. To all I would commend the admonition of Benjamin Franklin to the members of the Convention of 1787, another crucial period of our history, "doubt a little of your own infallibility."

Vietnam is a tortuous and complicated problem to which there are no quick and painless solutions. We may differ as to the wisest method to pursue, but on one point all Americans are united, the attainment of peace is our most immediate and important national goal. The continuing cost of the war in men, money, and national unity makes imperative the liquidation of our commitment in Vietnam with all possible dispatch. The people are anxious that our Government proceed to do so without temporarizing, without attempting to buy still more time in reaching the hard decision on withdrawal and setting it in motion in a phased, orderly plan.

Of course, the military and diplomatic affairs of a nation cannot be conducted by a head count or a show of hands, but the understanding and support of the people are essential in a democracy. To those who are fretful about the image presented to other nations by the moratorium, I would say that our concern must not be with what others say or think of us but how we judge ourselves. Too much concentration on the image imperils the substance. In my opinion, the moratorium reflects the strength and vitality of our democratic processes and puts to rout those critics, domestic and foreign, who label us an imperialistic,

warmongering nation. The people have the right, indeed the duty, to express in lawful assembly their deeply felt convictions on the overriding issue of war and peace. As I have stated to the colleges in my area that are observing the moratorium, let the day be marked as a prayerful affirmation of our commitment to securing an end to bloodshed and a reordering of our priorities.

I have been heartened that many of the measures proposed by me to the previous and present administrations to deescalate the violence and hasten a settlement have been put into effect, but clearly the pace of our extrication must be quickened. I again urge that the President propose a standstill cease-fire without further delay. As I wrote the President some time ago, urging new initiatives for peace, the lives of young men and innocent people cannot be used as pawns in a chess game played at leisurely pace by their elders. A mother of a 24-year-old lieutenant in Vietnam recently wrote me:

Can you in some way urge and keep after President Nixon to cease the war in Vietnam; yes, our 24 year old son is over there and as his mother I am beside myself. But as I said, we don't want riots, burning of draft cards, college unrest. Just some of the ordinary, middle class people that just want this war over with and all our boys home.

Can I or anyone else say with certainty to this anguished mother that her suffering and her son's sacrifice for an indefinite period longer while negotiations drag on interminably in Paris are worth the price?

It is difficult for elders to grant wisdom to the young, with their confidence and righteousness untempered by the vicissitudes of the years, but it may be the better part of wisdom in this agonizing period to heed the voices of the young. After all, they have the greatest stake in the future; they and their children will experience the shape of the world to come. For some 3,500 years man has been at war 9 hours out of every 10. For more than a decade out of the last 3 we ourselves have been engaged in large-scale warfare and for the rest of that period, in the cold war and in evermore costly preparations for war. Let us hope that, out of all these tragedies, culminating in Vietnam, good ultimately will emerge as the generation born in the nuclear age commits itself unequivocally to building a better society at home and an international community living in peace under law.

A BEAUTIFUL MILESTONE: 77TH WEDDING ANNIVERSARY

HON. JOHN P. SAYLOR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. SAYLOR. Mr. Speaker, Mr. and Mrs. George C. Martz, of Mayport, Pa., which is part of the area I represent, celebrated their 77th wedding anniversary on October 5. There is no other way to describe such an event than to say they have achieved a beautiful milestone in life and perhaps in history.

Believing this anniversary to be unique, I made certain inquiries and found that this is the longest recorded marriage in the State of Pennsylvania. To add to further attainment this year, Mrs. Martz celebrated her 100th birthday on June 5 and Mr. Martz celebrated his 98th on June 25.

Since their marriage, George and Arnie Martz have lived and worked on the same farm in Mayport—a farm purchased by Mr. Martz from his father in 1892. Six of the seven children born to the Martz couple, and their families, still reside close to the family farm.

I know my colleagues join with me in extending hearty congratulations to Mr. and Mrs. Martz, and in wishing them many more years of happiness.

CHROME-PLATED RACISM

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. ROSENTHAL. Mr. Speaker, the African Affairs Subcommittee, to which I belong, recently held hearings on American policy in Rhodesia, under the guidance of its distinguished chairman, CHARLES C. DIGGS, JR., of Michigan. These hearings mark the continuation of the subcommittee's important efforts to examine our country policies in Africa's crucial southern tier.

Rhodesia has become a touchstone of American policy in Africa. Under the rule of a renegade white minority, the Rhodesian Government is looking for signs of encouragement from Washington whether based on arguments of economics or politics. The Nixon administration has yet to give a clear answer to these arguments but the recent decision to return our consul general to Rhodesia is being interpreted as a sign of American acceptance of the Ian Smith regime. Whether that interpretation is correct will not be known until other, more crucial decisions are made in Washington.

One of the most critical of these is the administration's attitude on chromium imports from Rhodesia which are now under categorical sanctions imposed—with American support—by the United Nations Security Council.

Carl T. Rowan discussed the administration's hesitancy on Rhodesia in a recent column which follows. I also include a discussion on the chrome situation of Rhodesia prepared by the American Committee on Africa:

NIXON SILENCE ON RHODESIA COSTLY

(By Carl T. Rowan)

President Nixon went to the United Nations with a forlorn plea to the 126 nations represented there to pressure Hanoi into peaceful settlement of the Vietnam war.

Nixon will get no help, no sympathy, no consolation from most of these 126 nations. The reason is that, in the eyes of much of the world, whatever moral justification we once had in Vietnam is rapidly disappearing.

If the President wonders why, all he need do is look at White House policy—or lack of policy—where the racist, outlaw regime in Rhodesia is concerned.

There has been a not-so-subtle shift of attitude in the White House from the Johnson administration to the Nixon administration, with the latter showing a lot more sympathy for the tiny white minority that has seized Rhodesia under conditions where, barring ultimate violent overthrow, that minority will forever rule and suppress the black majority.

For two months, the white House has sat on a State Department recommendation that the United States pull its consulate out of Rhodesia, but the White House has declined to do so. Thus, the U.S. consul general, Paul O'Neill, recently returned to Salisbury, an act that the ruling regime called the best possible boost to the morale of the white minority.

A U.S. that pursues this kind of policy cannot possibly have good relations with black Africa. So whatever little help the African countries might give in extricating the U.S. from a grevious dilemma in Asia is not going to be forthcoming.

A country that ignores basic principles of human worth and decency, that overlooks a brazen trampling of the rights of self-determination in Rhodesia, will never be convincing when it says it is in Vietnam only to guarantee to the South Vietnamese the right to decide their own destiny.

White Rhodesians are in the process of approving a new "constitution that will make that land an even more pernicious police state than it has been these last several years.

That constitution will make it impossible for Rhodesia's 4,800,000 Africans ever to wrest power legally from the 228,000 whites.

In theory, Africans might someday achieve "parity"—that is, an equal number of seats in parliament. But there is a neat little stipulation that this can occur only after Africans pay an equal share of income taxes.

The hooker here is that Africans now pay only about one percent of the taxes. One reason is that while the average wage for a European is about $4,000, it is only $400 for an African.

Not in a millenium will Africans reach the economic level where they can meet the tax qualification. Nevertheless, the Ian Smith regime has raised other qualifications for voters, an act designed to exclude thousands of blacks from elections.

Finally, the whites have put in another hooker providing that even after "parity," half the black seats in parliament would be named by the chiefs, who are mostly Uncle Tom servants of the whites, and thus under effective control of the minority regime.

Another outrage is the way the Smith regime has divided up the land. It has set aside 45 million acres for 4,800,000 Africans and 45 million acres for 228,000 whites.

The regime is now in the process of chasing Africans out of "islands" within the areas reserved for whites. The courts ruled that the Africans had the right to remain, but parliament got around this simply by passing a new law.

The new constitution extends to the government the right to censor the press and other publications, a right already exercised on radio and TV. Enshrined in the new constitution is the right of "preventive detention," without bail or speedy trial, of anyone arrested on charges of trying to overthrow the white dictatorship.

This is the kind of regime the White House can't make up its mind about—despite the existence of a United Nations resolution calling upon member states to withdraw their consulates.

The rationale coming out of the White House is that there are 1,100 Americans in Rhodesia, about 850 of whom are missionaries, and that we need a consulate to look after their interests.

We didn't even have a consulate in Southern Rhodesia until 1949 and the American

missionaries there prior to that time managed to get along fairly well.

The other argument is that we need eyes and ears in Rhodesia to send back reports on what is going on in the southern end of Africa. We could post observers 10,000 miles away and the odor wafting out of Rhodesia would make it clear what is going on.

Someone in the White House apparently scoffs at the notion that morality—racial, social, or otherwise—ought to be a big ingredient in foreign policy. They assume that you go with power, and obviously the whites in Rhodesia have the power. They say you go with strength, and obviously the economic interests who want U.S. relations with Rhodesia to continue have more strength in Washington than do the weak, divided African countries that look with so much anger and disquiet on what is happening in the southern end of their continent.

But it was precisely this disdain for the moral elements in foreign policy, it was this notion that might ultimately makes right, that got the United States in the Vietnam dilemma that becomes a tighter, stronger web around Nixon every week.

A FACT SHEET ON RHODESIA AND THE CHROME SITUATION PREPARED BY THE AMERICAN COMMITTEE ON AFRICA

Recent news reports indicate that certain interest groups are seeking a reversal in American policy against racism in southern Africa. They tend to focus on the fact that sanctions against Rhodesians have forced us to buy chrome from Russia at higher prices.

On the basis of material available from the Department of State, the Department of Commerce and the Department of the Interior, let us note several conditions about chrome imports.

"Chrome" (chromite or chromium ore, and ferrochrome) is one of the 12 Rhodesian products covered by the United Nations Security Council's decision of December 16, 1966, to impose selective mandatory economic sanctions against the British colony of Southern Rhodesia. U.S. restrictions on the importation of Rhodesian chromite, promulgated by a Presidential Executive Order on January 5, 1967, are but one important aspect of our compliance with the Security Council's decision. As the world's leading importer of chromite, the U.S. could not violate the sanctions on that material without damaging the Security Council's program. Such actions would be inconsistent with American obligations under the UN charter.

The major world suppliers of metallurgical grade chromite are the Soviet Union, Southern Rhodesia, Turkey, South Africa, the Philippines, Iran and Pakistan. The United States in recent years obtained the bulk of its supplies from Rhodesia, the Soviet Union, Turkey and South Africa. Although Rhodesia traditionally has been a major source of chromite, so has the Soviet Union, because of the high quality of its ore. During the last four years immediately prior to the UN sanctions against Rhodesia, we imported approximately 30% of our chromite from the Soviet Union. Our consumption of this ore is increasing and for the last two years we have been importing somewhat more than 50% from the Soviet Union.

Concerning the relative prices of Soviet and Rhodesian ore, price quotations on chromite vary according to quality. Soviet ore has traditionally brought premium prices because it is superior to ores from other sources. It has an average cromic oxide content of 54–56% and a 4–1 chrome/iron ratio, whereas Rhodesian chromite averages 48–50% chromitoxide and has only a 3–1 chrome iron ratio. Furthermore, current prices for Soviet ore—about $48 a ton— should not be compared with those prevailing for Rhodesian ore several years ago—about $31.35 a ton. Prices for both metallurgical chromite and ferrochrome have increased since the UN sanctions were imposed. It is impossible to measure the impact of sanctions on prices, and it should be noted that there has been an increased world demand for chromite and ferrochrome and a general price rise for many raw materials, especially minerals. This is due to industrial growth in many countries.

There is no evidence to substantiate the allegation that the United States is purchasing Rhodesian chromite from the Soviet Union. Chromite imported from the Soviet Union, Mozambique, or South Africa is analysed by U.S. customs officials to prevent the importation of Rhodesian chrome into the United States which may have been falsely documented. These tests have not uncovered and disguised Rhodesian chromite.

It is recognized that there would be certain benefits if the 207,000 tons of chromite currently stockpiled in Rhodesia and owned by American companies were licensed for import into the U.S. The companies contend that because this ore has been paid for, no additional benefits would accrue to Rhodesia. However, the granting of an import license for this chromite would be a visible violation of United Nations mandatory resolutions with which the U.S. is in agreement. The political benefits to the Rhodesian authorities of such an open violation of the sanctions program by the United States would be considerable. It would also have drastic repercussions in majority-ruled Africa.

U.S. Government agencies have carefully studied the U.S. chromite supply situation. These studies, which are under continuing review, indicate that while metallurgical chromite supplies to the U.S. are not abundant, there are adequate supplies available to us for several years. It is not possible to predict beyond that point because of many variables, the chief of which is that contracts for the purchase of foreign chrome generally are not made for more than a year in advance.

The criticism is sometimes made that although the United States cooperates with Britain in applying sanctions against Rhodesian products, Britain does not reciprocate by applying sanctions against Cuba and North Viet-Nam. It must be remembered that sanctions against Rhodesia are not unilaterally imposed by Britain, but are the result of actions taken by the Security Council. The trade embargo against Cuba was imposed by the Organization of American States. As a member of that organization, the United States complies with its embargo against all Cuban goods, including those manufactured or reprocessed elsewhere, such as in Britain. The British have an embargo on the export of strategic materials to both North Viet-Nam and Communist China.

Traditionally we have bought considerable quantities of chromite from Turkey and we are buying over half of their current production. If U.S. firms were willing to make long-term purchase contracts with the Turkish producers, it might be possible to obtain more chromite from that country. We understand, however, that at the present time there is insufficient incentive for Turkish producers to risk their limited capital in expanding their mining facilities. Nevertheless, Turkey provides a strategic resource for the future.

Officials of the American Iron and Steel Institute (AISI) published a paper predicting a shortage in U.S. supplies of chromite. Their prediction did not take account of the General Services Administration sales of surplus stocks of chromite (925,000 tons since 1965) and 525,000 tons of additional imports scheduled for delivery in 1969. AISI consumption figures were also understated because they did not reflect the U.S. metallurgical industry's use of South African and chemical grade chromite. Because data on the movements of chromite stocks are not complete, it is difficult to obtain a precise picture of the supply-demand situation at any given time. Nonetheless, when the above factors are considered, the supply situation is considerably better than would appear from AISI figures.

It is often alleged that rising chrome ore prices plus U.S. adherence to sanctions have rendered the U.S. production of ferrochrome uncompetitive with foreign imports. In fact, American producers of ferrochrome were facing severe problems even before sanctions were imposed on Rhodesia. Before UDI, American ferrochrome producers were lobbying hard for import quotas.

CRAMER SUPPORTS AND SPONSORS LEGISLATION TO FURTHER STRENGTHEN FEDERAL LAWS AGAINST NARCOTIC DRUGS TRANSPORTATION AND TRAFFICKING

HON. WILLIAM C. CRAMER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. CRAMER. Mr. Speaker, I am introducing today legislation which proposes to increase the penalties for the unlawful transportation of narcotic drugs by imposing a maximum sentence of life imprisonment on the nonaddicted person who transports narcotic drugs across State lines. This legislation further proposes to make it unlawful to solicit the assistance of or to use a person under the age of 18 in the unlawful trafficking of such drugs. The bill would make it a Federal offense, punishable by life imprisonment, for any adult person to solicit the assistance of, or to actually use a juvenile in an unlawful drug transaction.

Mr. Speaker, we cannot enact laws that are too stringent when dealing with the hideously unscrupulous dope peddler. There are not words derogatory enough to adequately picture this subhuman creature who coldly and calculatingly corrupt and exploits his victims, the majority of whom are caught in his life-robbing web of destruction when they are still in their youth. Assistance for the victim who becomes the helpless captive of the narcotics junkie, while humane and necessary, can only go as far as helping that one individual. Of even greater need is a direct offense against the root of the narcotic world—the pusher—for as long as he is permitted to flourish and to continue to peddle his deadly wares among the unwary, and in most instances, the young, drug addiction will remain unchecked.

For this reason, the toughest offense proposed in this legislation is aimed at the nonaddicted junkie—the mercenary leech who preys upon the innocent for his personal monetary gain, willfully corrupting and exploiting the victimized addict. The bill would prescribe a minimum of 10 years—at hard labor—and a maximum of life imprisonment in a Federal penitentiary for the nonaddicted junkie who transports hard narcotic drugs across State lines.

The bill provides that the addicted narcotics transporter be committed to a Federal hospital for therapy and cure. Such commitment would be a mandatory sentence for the addict who is convicted

under this section of the bill. A distinction is made between the two types of pushers, the addicted and the nonaddicted, in an effort to deal most harshly with the professional suppliers who, while not hooked themselves, willfully initiate and perpetuate the addiction of others.

The provision to make it a Federal offense, punishable by life imprisonment, for any adult person to solicit the assistance of, or to actually use a juvenile in an unlawful drug transaction, is most desperately needed to help protect our young people against the venemous attack of the dope peddlers. Our youth of today are being constantly exposed to drugs through channels promoted and controlled by the adult pusher, and the most effective means of removing this threat would be to remove the adult found guilty of using or attempting to use juveniles in his narcotics trade.

There is no way to speculate the exact number of drug addicts, nor is there any way to estimate the number of crimes committed by these people. But we know for certain the rate is extremely high, and it is obvious that our present laws are inadequate in meeting or conquering the problem. Our President has recommended a broad program to effectively deal with the narcotic drugs situation with cooperation between the several levels of community, State, and Federal Governments. It is my hope that the legislation I join in sponsoring today will lend assistance to the enactment of laws to further strengthen our efforts to combat the transportation and trafficking of narcotic drugs, and to protect all our decent citizens against this evil.

MORATORIUM DAY AND A YOUNG AMERICAN

HON. WILLIAM B. WIDNALL

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. WIDNALL. Mr. Speaker, people throughout the Nation spent October 15, moratorium day, in many different ways: by writing letters to public officials, by taking part in demonstrations, by making speeches, by taking part in marches, and by participating in many other manifestations of concern over the war in Vietnam. I thought my colleagues in the Congress would be interested in learning how an 11-year-old boy from New Jersey spent that day.

Paul Kiernan, of 62 Spring Street, Harrington Park, N.J., conducted his own private poll on Vietnam. He asked 45 people, six questions, recorded their replies and sent them to me in an effort to keep me informed of my constituents view on this vital subject.

For the benefit and information of my colleagues, I am pleased to include the questions Paul asked, and the replies he received at this point in the RECORD:

OPINION POLL CONDUCTED BY PAUL KIERNAN

1. Do you think Ho Chi Minh's death will have a substantial outcome on the war? 11 people said "yes"; 32 people said "no"; 2 people said not sure."

2. Do you think we should withdraw from Vietnam all at once or on a gradual basis? 33 said "gradual basis"; 7 said "all at once"; 5 said "not sure."

3. Do you think President Nixon is handling the war very well? 25 said "yes"; 15 said "no"; 5 said "not sure."

4. Do you think we should try continuous bombing to bring a speedy end to the war? 18 said "yes"; 25 said "no"; 2 said "not sure."

5. Are you in favor of today's Moratorium? 30 said "yes"; 15 said "no"; 0 said "not sure."

6. Are you in favor of further Moratoriums? 20 said "yes;" 19 said "no"; 6 said "not sure."

OIL IMPORT CONTROLS

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. TEAGUE of Texas. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include an article which appeared on the subject of oil import controls:

OIL IMPORT CONTROLS: WHO NEEDS THEM?—A FRANK DISCUSSION

(NOTE.—In the past decade, federal government studies made under three Presidential administrations have stated that limiting the import into the U.S. of foreign oil is essential to national security. A recent study by the Interior Department again confirms the national security need for controls. Nevertheless, the mandatory oil import control program, established in 1959, is once again under study . . . and under attack.

(The following interview with George V. Myers, executive vice president, presents our views on oil imports and the control program as applied to the Eastern two-thirds of the United States, which comprises Districts I–IV. Oil import controls for District V—the West Coast, Alaska, and Hawaii—are applied on a somewhat different basis.)

Question. Why is an oil import control program necessary?

Answer. For national security, both economic and military. An assured supply of domestic petroleum energy in times of emergency is essential. This has been proven dramatically by two Middle East conflicts in the last 12 years. The need is fully supported also by federal government studies.

As to the broader economic aspects of national security, oil and natural gas supply 75 per cent of our nation's energy needs. Oil alone provides 44 per cent. Petroleum will be the major energy source for years to come.

There is no ready substitute for petroleum. Synthetic liquid fuels from coal or oil shale do not exist in commercial quantities, and will not for years.

The only way to assure firm supplies of vitally needed oil is to provide adequate incentives to producers to find and develop new U.S. reserves continuously. Import controls help achieve this, by insuring a market for U.S. production at reasonable prices.

Question. What proof is there that a strong domestic producing industry is essential to national security?

Answer. Following the 1967 Arab-Israeli war, oil shipments from parts of the Middle East to certain countries of Western Europe and to the U.S. were suspended. Domestic reserve producing capacity was available due in large part to the import control program. Domestic producers were able to meet resulting needs of the U.S. and much of Western Europe. Without a strong U.S. oil industry, we would have faced much graver problems.

Question. What would happen if import restrictions were removed?

Answer. Imports would grow rapidly in volume, because overseas oil costs at least $1.25 a barrel less than domestic crude, delivered on the U.S. East Coast. Domestic production tnerefore would decline, and domestic exploration would eventually cease. It is very doubtful that exploratory programs in remote areas such as the North Slope of Alaska would be undertaken without import controls. An accelerated reduction in the nation's reserves would follow.

Question. How would increasing imports affect domestic natural gas supplies?

Answer. Natural gas associated with oil production accounts for about 25 per cent of the total in this country. Increases in natural gas reserves and natural gas deliverability are not now keeping up with increases in demand. Increasing imports would result in cuts in exploratory efforts and would make this bad situation worse.

Question. Why can't we shut in much of our U.S. production, import cheap foreign oil, and then produce the domestic shut-in production in times of emergency?

Answer. You can't shut off oil production and then suddenly turn it on to meet emergencies. Wells, pumps, treating and measuring facilities, pipelines, and a host of other supporting activities must continue full time to keep oil production going. Shutting in these facilities for any prolonged period would mean permanent loss of many of them. Others would require months of time and very substantial expense to start up after prolonged shutdown. There is also the obvious problem of widespread loss of employment for thousands of highly-skilled personnel in any prolonged shut-down of production, and the nearly impossible task of recalling such men and women if an emergency required it. In short, a dynamic oil industry is essential to national security, and such an industry needs continuing adequate economic incentives.

Question. What general philosophy does Standard favor for allowing foreign oil to come into the United States?

Answer. We should accept limited overseas oil imports because dispersal of petroleum reserves is worldwide, with strategic value for us and friendly nations. However, overseas oil should only supplement, and should not supplant domestic production. Canadian oil offers a high degree of security, and must be given priority.

Question. Import controls have been attacked because the program forces American consumers to pay more for their oil. Can you comment on this?

Answer. The assumed cost savings from heavy foreign imports would be more than offset by the losses. Unrestricted imports would cause a cut of U.S. oil prices, resulting in an estimated overall gross reduction in cost to consumers of about $3 billion a year. But offsetting this would be a loss of federal, state, and local tax and other revenues from the domestic industry of about $2.3 billion a year. It is quite probable that this government revenue loss would be made up through substantial increases in federal, state, and local excise taxes on products such as gasoline.

Furthermore, if domestic production were substantially displaced by overseas production, a severe economic setback could be predicted for U.S. oil-producing regions, because U.S. exploration and production activity would ultimately virtually stop. Further, refining and chemical operations would shift out of the U.S., at the insistence of foreign producing nations. Overall the loss of at least 100,000 jobs could be expected. Heavy dependence on foreign oil would eventually lead foreign producing nations to raise their prices, a move our country would be relatively helpless to resist.

Overall, it is quite probable that in the

long run the removal of crude oil import restrictions would result in a net increase in cost of petroleum products to consumers.

There would also be a substantial flow of money out of the U.S. to foreign oil-producing nations, resulting in damage to the U.S. balance of payments.

The most important loss would be national military and economic security. It is impossible to put a price tag on that.

Question. Do you think the present import control program should be changed?

Answer. Yes. The original Presidential proclamation called for a "fair and equitable" distribution of the low-cost imported oil among domestic refiners. However, this requirement has been ignored since the very outset of the program, in several ways.

One is the historical guarantee. It gives unfairly large import quotas to a select few refiners. These special quotas were based on imports by these refiners prior to the establishment of the import control program and presumably were in recognition of early investments in overseas producing properties. It is most doubtful that this special treatment was ever warranted; assuming that it was, the refiners in the historical group have been more than adequately compensated for their early investments by having received special benefits for over ten years. This feature should be abolished.

Question. What other changes do you recommend?

Answer. The sliding-scale formula should be eliminated. This formula is used to divide imported oil, remaining after the historical and other special allocations have been deducted, among refiners. The sliding-scale feature was designed as government aid to small refining companies, but it creates inequities by penalizing refiners as they increase in size. During the current period, in the part of the country east of the Rocky Mountains, the smallest refiners receive foreign crude allocations equal to 19.5 per cent of their refinery throughput while the largest refiners are limited to allocations of less than 4 per cent.

Also, the sliding scale gives unfair competitive advantages not only to small, independent oil refiners, but to refineries owned by the largest chemical companies. If economic aid to "small" refiners is required, it should be accomplished by some means other than the oil import program.

Question. What about special allocations to certain companies to import products from their refineries in Puerto Rico and the Virgin Islands into the U.S.?

Answer. These are unfair exceptions granted to a few companies. There are four grants of at least 10 years duration that total 80,000 barrels a day. An additional 38,000 barrels a day is provided as a special historical grant that comes in completely free of allocation control. No other refiners receive such special guarantees, and low-cost oil that otherwise would be shared by all is unfairly diverted to these few.

Question. Chemical companies have special privileges, too, don't they?

Answer. Yes. Chemical companies complained that they faced a shortage of low-cost domestic feedstocks for their plants. They claimed this would impair their ability to compete for both foreign and domestic markets, thus reducing their favorable contribution to the nation's balance of trade.

But the facts are that chemical companies already receive the benefit of lower-cost feedstocks, since a portion of their raw materials is made with foreign oil. Further, they already have access to a wide range of domestic feedstocks at prices competitive with, or lower than, foreign raw materials.

Import licenses awarded to chemical companies since 1966 have rarely been used by them to import foreign feedstocks, which was the avowed purpose of granting them in the first place. Instead, they are traded for domestic raw materials such as refinery and natural gas liquids. The chemical companies realize a substantial and unwarranted monetary gain as a result of their exchanges.

Chemical companies now receive almost 90,000 barrels a day of quota, or more than 11 per cent of their input, compared with an average of about 5 per cent for all refiners under the sliding-scale formula, and only 3.8 per cent for our company. Chemical companies continue to press for a 100 per cent port quota. This would mean that their imports would be 770,000 barrels a day—or about 67 per cent of total controlled imports into the Eastern U.S. This would destroy the program.

Question. The Machiasport, Me., foreign trade zone proposal has received much debate. Could you explain it?

Answer. Foreign trade zones were designed to stimulate foreign trade by setting aside certain U.S. locations where foreign materials could be processed in U.S. plants and the resulting products exported from the U.S. They were not meant to be the means of avoiding oil import control. So long as petroleum products from a foreign trade zone are used in the foreign export market, the trade zone concept is acceptable to Standard Oil. We are only opposed to its misuse.

In the Machiasport scheme, a proposed foreign trade zone refinery would be allowed to ship products into the U.S customs territory in volumes far in excess of permissible imports for other refiners. Apart from the inequity of special treatment for one refiner, the greatest danger is that this is bringing a proliferation of similar proposals. This scheme typifies the continual pressure of preferred treatment under the import program.

Question. Are there inequities associated with Canadian crude-oil imports?

Answer. Imports of Canadian oil are being managed today in a most irregular manner.

According to the 1967 control arrangement of the Canadian and U.S. governments, only recently made public, refiners in Chicago are not allowed to import any Canadian crude oil this year, even though Chicago and the upper Midwest are ideally located and have demand for Canadian crude oil.

A North American energy policy, for the benefit of both Canada and the U.S., should be developed under such a policy until the time that U.S. demand exceeds domestic producing capacity, allowing for appropriate reserve producing capacity, imports of Canadian and overseas oil should grow at rates equal to U.S. demand growth. After U.S. demand exceeds producing capacity, less the reserve capacity, overseas oil imports should continue to grow at the demand rate. Canadian oil will supply the difference between U.S. demand, and supply to the U.S. from domestic and overseas production.

Question. How should this rising volume of Canadian oil be allocated?

Answer. We believe Canadian oil should be allocated to refiners who wish to process this oil in direct proportion to their refining input.

Question. What solutions does Standard Oil propose, to make the import control program effective and fair?

Answer. The following points should be the criteria of any revised plan:

1. It must enhance national security.
2. It must be equitable for all.
3. It must be simple to administer.

The current over-all volume of controlled imports into the Eastern two-thirds of the U.S. seems about right—namely, 12.2 per cent of domestic production.

Inequities in the present program should be corrected. Allowable imports should be allocated to refiners of crude oil in direct proportion to refinery input. This would place the benefits of low-cost foreign crude in the hands of those organizations which are the customers and supporters of the domestic producing industry.

Specifically, we urge elimination of the historical allocation, the sliding-scale formula, and special allocations for chemical companies and island refiners. Trade-zone refineries should not be used to circumvent the program.

An equitable program will insure our national security and be fair to all concerned, whether producers, refiners, marketers, or consumers.

NATIONAL BUSINESS WOMEN'S WEEK

HON. MARTHA W. GRIFFITHS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mrs. GRIFFITHS. Mr. Speaker, during this week of October 19 to 25, it gives me great pleasure to salute the achievements of all business and professional women, during this the observance of National Business Women's Week.

This annual observance sponsored by the members of the National Federation of Business and Professional Women's Clubs, Inc., affords us opportunity to take special notice of the tremendous advances of American working women over the last 50 years. During these years, the working women of America have made tremendous strides in almost every field of human endeavor, education, science, communications, human relations, and government. In their effort, they have helped by their example to cast aside ancient prejudices while endeavoring to lay a foundation for even greater achievements in the years ahead. The challenges met and the changes made by working women in the past several decades are just a beginning to the advances that must be made. Certainly, the women of America have a unique responsibility to guide our country through these perilous times. We must direct new found horizons and advances to the cause of peace, justice, and equality in our world.

The individual talents of the many women of the National Federation of Business and Professional Women's Clubs can be used most effectively in their communities to make a better America and a better world. Never before have women been confronted with so great a challenge to which they must respond. Certainly, if we are to fill the needs of a nation dedicated to individual freedom and fulfillment of its people, we must be leaders in our own business and professions as we pursue the causes of peace and justice.

As a Member of Congress, a lawyer, and a member of the Business and Professional Women's Clubs, I have for many years attempted to further the rights of all women. In particular, I have tried to correct some of the inequities now existent in law which discriminate against the working woman and it is my hope that this legislation will obtain necessary support for early passage and a better place in our society for all women.

CAN SST'S COOK THE EARTH?

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. PUCINSKI. Mr. Speaker, Chicago Today recently carried an editorial which deserves the highest consideration and widest dissemination possible.

For many years I have stated that we should not proceed with the development of a supersonic transport system until it could be determined what the effects would be on our citizens and the flora and fauna of the United States. Now the prestigious National Academy of Sciences has estimated that a fleet of 400 SST's flying an average of four flights a day would inundate the stratosphere with 150,000 tons of water vapor daily, which would be trapped and remain for years. Atmospheric scientists say this would wrap the earth in a "semipermanent" cloud cover that would turn it into one big, hot greenhouse.

We will not only have to contend with deafening noise, but also the possibility of being slowly cooked by ultraviolet rays.

At a time when we are stagnating in our own pollution from many sources, it is my hope that this Government will thoroughly investigate the effects of the SST before engaging on a costly program that could produce inestimable damage throughout this country and the world.

I strongly commend the Chicago Today editorial to my colleagues:

[From Chicago Today, Oct. 3, 1969]

CAN SST'S COOK THE EARTH?

In addition to its more obvious dangers—such as the capacity to deafen people below—the supersonic jet air liner may work destruction on nature itself. This grim possibility has been raised by scientists who believe the SST's vapor trails could wrap the earth in a "semi-permanent" cloud cover that would turn it into one big, hot greenhouse.

The scientists, working in atmospheric research centers at Albany, N.Y., and Boulder, Colo., say it could happen the same way a car's interior heats up in the sun with the windows rolled up. Ultra-violet rays from the sun penetrate the roof and are absorbed by the seats, which bounce back the heat as infra-red rays which cannot penetrate the roof to get back out. The same goes for a cloud-shrouded earth—ultra-violet rays would be admitted and heat would bounce off earth as infra-red rays that can't get back out.

The National Academy of Sciences has estimated that 400 SSTs making an average of 4 flights a day would load up the stratosphere with 150,000 tons of water vapor daily. Once trapped where there are no vertical drafts to move it, the vapor will remain for years, just as the volcanic dust from Krakatoa stayed around and colored sunsets for 25 years.

So it's conceivable that the SST could not only make us deaf but medium rare as well. It's appalling to think about, and we wish the SST planners would begin thinking about it too. But the atmospheric scientists say they haven't even been consulted by engineers working on the SST. They aren't getting any government money for their research, either, altho the SST will be amply funded from that source.

The cloud-cover hypothesis has not been proved, the researchers point out. But Alfred Hulstrunk of the Atmospheric Research center in Albany sums it up: "Technology is just going ahead, assuming nothing will happen. But we really can't afford a wait-and-see attitude on this kind of a problem."

We certainly can't. This subject should be explored thoroughly before another move is made in the SST development. The public should set up a loud and insistent clamor on the subject, and should do it soon—before the sonic boom drowns out any sound of sanity.

OMAHA COUPLE CELEBRATES 70TH WEDDING ANNIVERSARY

HON. GLENN CUNNINGHAM

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. CUNNINGHAM. Mr. Speaker, in these days of moratoriums and the like, it is certainly refreshing to read of a couple like Herman and Myrtle Wulff of Omaha.

The Wulffs last week celebrated their 70th wedding anniversary. She is 94 and her husband 95. They have had a wonderful life together.

Mr. Speaker, I would like to share with my colleagues the following story on this couple which appeared in the Omaha World-Herald:

THEY SAID "I DO" AND THEY HAVE FOR 70 YEARS

(By Elizabeth Flynn)

On Oct. 18, 1899, Herman Wulff and Myrtle Blaco were married in the house in Blair, Neb., where they were to live as newlyweds for two years before moving to Omaha in 1901.

On Friday, a day ahead of their 70th anniversary, Mr. and Mrs. Wulff will be feted at a reception from 1:30 p.m. to 3:30 p.m. for family, friends and fellow residents of the Eppley Care Complex, the couple's home since last July.

There'll be a three-tiered cake and coffee and entertainer Jack Evans will be on hand to sing at the party.

Earlier in the week, presents already were arriving, including a package from Mrs. Wulff's circle at Benson Presbyterian Church and two perfect roses from a friend's garden.

Looking almost as fresh and certainly as pretty as the posies was their recipient.

Mrs. Wulff, who'll be 94 in November, was wearing a red wool suit with blush-pink blouse, pearl necklace and earrings—and a bright gleam in her eyes.

She talked with animation of her seven decades of married life.

Mr. Wulff, 95, who is hard of hearing, interjected a comment from time to time prompted by Kenneth Chapman, the couple's son-in-law and devoted admirer.

The late Mrs. Chapman was the Wulffs' daughter, Dorothy.

After her death in 1949, the Wulffs combined households with Mr. Chapman and the little granddaughters and sent them through Benson High School and the University of Omaha.

One is now Mrs. Thomas Morrow of Kalamazoo, Mich. The other is Mrs. Dennis Huffman of Claremont, Calif.

And the Wulffs have five great-grandchildren.

PLOUGHED WITH OXEN

Both Mr. and Mrs. Wulff are natives of Nebraska's Washington County, where Mr. Wulff's parents, German immigrants, homesteaded and ploughed the land with oxen.

Mrs. Wulff's English-born father, Richard Blaco, was a farmer and stock raiser and a member of the first Nebraska Legislature.

Appropriately, the couple met in a grocery store at Kennard, Neb., where young Herman Wulff was working.

He's been in the grocery business ever since, owning a store for many years at Sixty-first Street and Military Avenue and later working as grocery manager for the Farmers' Union.

When the Wulffs moved to Benson, the village consisted of a post office, a barber shop and a hotel where they lived until they could build their own home—the first of four they eventually owned on Linn Avenue (now Sixtieth Avenue).

"There weren't any electric lights or any telephones," Mrs. Wulff reminisces ruefully.

"In our store, we sold everything from kegs of nails to toothpicks. I kept the books. Mornings, we'd go around to pick up grocery orders; in the afternoons we'd deliver 'em. Say, was I glad when we finally got a phone!

"For the farmers, we'd stay open Saturdays till midnight, Sundays we were open till afternoon, when we went to the baseball game."

Both Wulffs are ardent baseball fans. Mr. Wulff never enjoyed dancing; his wife did—and still does.

Mr. Wulff is a Mason and Shriner and belongs to the Scottish Rite and Knights Templar.

Mrs. Wulff proudly wears a 50-year pin from Narcissus Chapter, Order of the Eastern Star.

"YOU JUST DID"

Inevitably, the couple was questioned: "How have you managed to keep your marriage going for 70 years—nearly three-quarters of a century?"

Mrs. Wulff's warm, gentle voice became firm.

"In those days, when you said 'I do,' you just did!"

Mr. Wulff's reply was enigmatic when the question was put to him in a note written by his son-in-law. He read it, leaned back and laughed loudly.

"Seventy years!" he chortled. "That's a long time!"

THE HONORABLE AND RESPECTED JOHN W. McCORMACK, SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES

HON. JOHN J. ROONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 20, 1969

Mr. ROONEY of New York. Mr. Speaker, I would not have the temerity to stand here to defend the honor of our beloved Speaker, the Honorable JOHN W. MCCORMACK, for it unquestionably needs no defending nor can it ever be challenged—even by the artists of insinuation. But I can, indeed must, join with my distinguished colleagues in saluting the distinguished gentleman from Massachusetts. I can honestly say that I have never met a finer man. Integrity, loyalty, devotion to God, family, and country are words that today fall harshly on ears attuned to a different drum, but they are words expressing the ideals upon which this country was built and upon which it shall continue to prosper. And they are words, too, that describe our Speaker. I feel that the country, the House of Representatives, and the Democratic Party have been singularly blessed to have a leader such as JOHN MCCORMACK. He is that rare and oftsought man—a strong leader with conscience,

a man of power with great compassion. He has been an inspiration to us all and I know that I speak for every Member of the House of Representatives when I say that we have complete and utter confidence and faith in his judgments. The House of Representatives and the Nation are grateful to JOHN MCCORMACK, a truly devoted man.

AID-TO-THE-ENEMY DAY

HON. MARTIN B. McKNEALLY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. McKNEALLY. Mr. Speaker, under leave to extend my remarks in the RECORD I am pleased to insert the following editorial which appeared in the New York Daily News of Wednesday, October 15, 1969, in support of President Nixon's efforts to bring the war in Vietnam to an honorable conclusion:

AID-TO-THE-ENEMY DAY

Organizers of the manifold demonstrations set for today against further U.S. participation in the Vietnam war lump them under the title Vietnam Moratorium Day.

We have a better name for it. We call it Aid-to-the-Enemy Day.

Our name for it derives from the fact that the enemy is loudly applauding these demonstrations.

Mrs. Nguyen Thi Binh, head of Red North Vietnam's delegation at the Paris peace talks, says it's all too, too wonderful, and sends her "most friendly salutations" to the demonstrators.

Hanoi Hannah, an English-speaking witch, and we don't mean witch, who broadcasts Red propaganda to U.S. troops in South Vietnam, opines that President Richard M. Nixon "is going to get his first taste of the kind of massive anti-Vietnam war demonstration that drove his predecessor into political oblivion."

We hope the prominent Americans who have expressed sympathy for Moratorium Day are happy about the company they are keeping. Some of these Americans are Mayor Lindsay, Sens. Javits and Goodell, W. Averell Harriman, and more than a few "liberal" columnists and TV-radio commentators.

The treacherous nationwide jamboree got its start in the brain of a Harvard Divinity School dropout.

It has been snapped up, amplified and financed by Kooks, Reds, Dupes and a few idealists, and overpublicized by various news media, so that today may witness a lot of U.S. mob convulsions which will greatly encourage the enemy.

THEY HOPE TO WRECK NIXON

The situation is complicated by the fact that many of President Nixon's political enemies see in the anti-Viet war agitation a hope of ruining him as an effective chief executive now and as a possible candidate for reelection in 1972.

Such opportunists are to be found in both parties.

Up to now, the President has declined to be swayed by this mounting mob hysteria against him and the war. We hope most earnestly that he will stand pat on that, come what may.

If he does not—if this movement succeeds in losing the war for the United States and its South Vietnamese and other allies, the consequences can only be disastrous.

For one, South Vietnam will be overrun by bloodthirsty Communists bent on slaughtering every South Vietnamese who fought for or sympathized with our side.

For another, world communism will have won a smashing victory over Americanism and liberty.

And this victory will have been achieved by mobs, in a contest against the elected government of the U.S.A.

What should patriotic Americans do today, and in the later antiwar demonstrations plotted by these same helpers of our Red enemies?

The Committee for Responsible Patriotism has one suggestion which we think is excellent; namely, run your car with its lights on today if you have a car, and fly the American flag if you can—to register sympathy for the U.S. war effort and contempt for those who would sabotage it.

MESSAGES TO THE PRESIDENT

Or why not send a postcard to Hon. Richard M. Nixon, the White House, Washington, D.C. 20006, and tell him in your own words that you deplore these efforts to bring defeat on the United States and support his persistent work for an honorable peace?

Or you might just send the President an immortal saying by a great American named Stephen Decatur: "Our country! In her intercourse with foreign nations may she always be in the right; but our country, right or wrong."

We feel sure the President will be glad to hear from you—the more of you the better.

CHICAGO DEMONSTRATION

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. DERWINSKI. Mr. Speaker, approximately 10 days ago, elements of the SDS ran amok in Chicago in a performance that was truly shocking.

A very sound and necessarily spirited commentary on the radical left rampage in Chicago was carried in the Thursday, October 16 Suburban Life of La Grange, Ill., which I insert into the RECORD at this point:

A PIG'S A PIG FOR A' THAT

They came, they saw, they disrupted and they blew the whole bit. Instead of furthering their cause, whatever that is, the Weatherman faction of the Students for a Democratic Society wreaked damages in the thousands and gave more thousands of innocent college students a black image by their rampage in Chicago.

This "intelligentsia" was nothing more than a mob of hoodlums who smashed windows in apartment buildings and stores and damaged hundreds of cars. They came looking for trouble, carrying clubs and chains and wearing helmets. Make no mistake about it; this was planned anarchy.

Yes, they came looking for trouble and were prepared to start trouble. "Let's get the pigs," was the cry. "Let's show this world that it's about to be taken over by us. You people can't do the job. We're your salvation."

Those were the rallying cries, in effect, that the leaders of these punks put forth. They had no intention of peaceful protests against the Vietnam war or whatever else they had in mind, real or imagined.

Is the way to salvation of the world's problems to be found in smashing windows, hurling rocks, wrecking parked cars, taunting policemen, all in the so-called name of freedom and brotherhood? Is love of man tattooed on the end of a club?

And then when they get busted by the police they cry "police brutality." How ridiculous can they be? They come to town prepared to do battle, start the trouble themselves and then bawl like little kids when they're stopped from doing what they shouldn't have been doing in the first place. They claim to be adults, but they're nothing but spoiled children. Their infancy is appalling.

While their childishness somehow can be forgiven the cost of the vandalism cannot. Who gives these wet behind the ears punks the right to roam up and down the streets busting up the works?

If they're going to use the word "pig" they had best look to themselves. If they're so familiar with the species they should recognize it in themselves.

If anything good came out of the SDS rampage it is that decent students throughout the nation will recognize the organization for what it is and will avoid it like a plague.

The Weathermen put forth their bellwether; they are a bunch of clowns.

A MIND-SPINNING TRIP CHANGED OUR DESTINY

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. TEAGUE of Texas. Mr. Speaker, as we begin to assess the needs in our national space program in the next decade it is well to examine in retrospect contributions of our national space program to date. Perhaps the most outstanding achievement in the last decade in space has been the Apollo 11 lunar landing. A Washington Post staff writer, Thomas O'Toole, in a Sunday, July 27, article, did much to capture the importance of this great first in history. As his words recapture this great moment of the lunar landing, it is important to look to the future and make decisions as to our will and desire not only to be first in space but first in the application of space to our needs here on earth. I commend the reading of this article to my colleagues and the public.

The article follows:

A MIND-SPINNING TRIP CHANGED OUR DESTINY

HOUSTON.—There it lay, barren, beautiful and untouched for more than 4 billion years, while man worked his way out of the caves—all the time looking up at his neighbor 250,000 miles across empty spaces, wondering what it was and dreaming how he might get there to find out.

When the time came for man to fulfill his dream, his own planet was in a turmoil that came close at times to a living nightmare. But the irony was forgotten when the moment came for man to change his destiny, the moment when two men out of all the world's millions descended in a four-legged machine named Eagle to a bleak plain in the moon's Sea of Tranquillity.

With the whole world holding its breath, Neil Armstrong and Buzz Aldren came down out of the black and airless void, the orange flame of their machine's braking engine bathing the lunar surface in an eerie glow. "Kicking up some dust," said Armstrong. "See some faint shadows . . . Drifting to the right a little . . . Contact light . . . O.K., engine stop."

There was a pause, a brief stoppage of hearts that seemed forever. "We copy you

down, Eagle," said a young North Carolinian named Charlie Duke from Houston's Manned Spacecraft Center.

"Houston, Tranquillity Base here," replied Neil Armstrong at 4:17 p.m. EDT July 20, 1969. "The Eagle has landed."

WHERE WERE YOU?

It immediately reminded people of remarks made in the past when something happened to change our lives: "Well, I made it . . ." "Watson, come here, I want you . . ." "What hath God wrought?"

What had been wrought this time? When men began to ponder it, they found they couldn't. Now that it had happened, it was something that made minds spin. Man on the moon . . . It sounded at once so simple and so absurd that it became a useless exercise to relate the event to anything on earth.

It was a little bit like the day Pearl Harbor was attacked or the day the war ended in Europe or the day darkness came to the Northeastern United States in the middle of rush-hour traffic.

Where were you when the lights went out? Where were you when two men landed on the moon? Almost no answer would ever make sense. "I was brushing my teeth." "Drinking." "Kissing my girl." "Having dinner with friends." "Fighting with my wife."

If the landing put people in shock, what took place almost seven hours later was even more boggling to the mind.

Wearing a cumbersome white pressure suit and a bulky backpack that rose over his shoulders, Neil Armstrong backed out of the Eagle's open hatch and down a 10½-foot ladder. He reached out to pull a lanyard and a television camera came out, aimed squarely at the ladder and at Armstrong coming down.

"Man," said Duke, a quarter of a million miles away. "We're getting a picture on the TV."

Suddenly, there Armstrong was, on television screens the world over, backing down the ladder like some surrealistic image to the moon's surface. The first man on the moon was about to take his first steps on the moon and the whole world was watching him do it.

Clear and stark in sharp blacks and whites, the picture of a craggy moon, a landing machine and a man in the foreground was eerie in its beauty, incredible in what it all meant.

"It looks like a Kline painting," said Norman Mailer, who came to Houston to write about what he felt it meant for Life magazine. It *did* look like a painting by the late abstract expressionist Franz Kline, who worked with broad and bold sweeps of black and white, until you suddenly realized that the man in the picture was moving.

Armstrong reached out his left foot. "I'm going to step off the Lem now," he said—and did it.

"That's one small step for man," Armstrong declared. "One giant step for mankind."

A QUICK ADJUSTMENT

Just how big a step only time will tell, but one thing was certain even as Armstrong moved out of range of the television camera, looking like some apocalyptic vision in his white space suit and fishbowl helmet: man had forever changed his destiny. In some small respects, Armstrong's first steps on the moon were like the first steps man took on his own planet after he'd crawled up out of the sea 2 million years ago.

Just 15 minutes after Armstrong had come down the ladder, Aldrin joined him. Moving rapidly about in the airless, one-sixth gravity, both men quickly adjusted to their surroundings and at times behaved like small boys at a summer picnic.

"Notice how you can pick up the rocks," Armstrong said. "Yeah, they bounce and then . . . Boy, you can really throw things far out here, can't you? And Neil, didn't I say we might see some purple rocks? They're small and sparkly."

Growing more serious, as if they remembered why they were there, Armstrong and Aldrin unveiled the plaque they had carried with them from earth, the plaque that said: "We came in peace for all mankind."

With that, the two men planted an American flag.

While you knew it was happening, you couldn't quite believe it. A woman watching Armstrong's first steps around the landing craft, listening to his first words, said later she had no idea of time or even where she was. "I didn't know whether the children were up," she said, "in bed or racing around in the back yard."

Both men climbed back into their landing craft at about 1 a.m. "Adios amigos," said Aldrin as he climbed the ladder.

History had been made, though not easily.

THE OTHER SIDE OF THE MORATORIUM DAY

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1969

Mr. TEAGUE of Texas. Mr. Speaker, on Sunday, October 19, 1969, there appeared an editorial in the Dallas Times Herald written by my good friend Felix McKnight which should be read by every Member of this body. It is food for thought and perhaps some people in this country should partake of it:

MEMO TO HANOI: DON'T BE MISLED

(By Felix R. McKnight)

Lest Hanoi get the twisted idea that this entire country took its eye off the ball on Wednesday and danced in the streets, 200 million strong, there should be another message sent its way.

It is the inalienable right, the privilege, of free people to go their unfettered way, to voice opinions on "Moratorium Day"—something not even the McCarthys, the McGoverns, the Kennedys or the Yarboroughs could imagine on the streets of Hanoi.

It is also cricket, in American streets and on campus, to disagree with the president of the United States. No heads are chopped for such license.

But it should be signaled to North Vietnam and its sickening foot draggers in Paris that a few other things also were happening in the United States on Wednesday.

Ninety-nine per cent of the citizenry—which also loathes war but prefers to get out of Vietnam the valid, thoughtful way proposed by the President—very normally went about their daily chores and responsibilities.

Babies were born in ten thousand places—hopefully into a better world.

Ten million students did not drop out of classes and go barefoot and unshaven to "peace meetings" marked with upsidedown American flags.

The magical Mets pounced on Baltimore—after 55,000 tyranny-free fans thundered out "The Star Spangled Banner" in their beloved Shea Stadium.

Fifty thousand automobiles—and washing machines, refrigerators, food, medical remedies, clothing—came off assembly lines and started to the people.

People thronged clothing, food and drug stores to buy their necessities—with money they earned in a land with its lowest unemployment level of history.

Men who learned their skills in the open universities of this land transplanted hearts and kidneys.

The sensitive hands of surgeons saved human lives on a thousand operating tables.

Men and women did not glance up from microscopes and lab work as the quest for cures to cancer and other killers went on and on. Not cures for Americans—but for all mankind, including the Viet Cong.

Men and women of government, from village to Washington level, stayed with their jobs to assure equal job opportunities, housing and justice for all citizens.

On corner lots, in city parks and playgrounds, a half-million kids—black and white—played PeeWee football, tackled hard and wound up shaking hands.

In ten thousand places men built airports, hospitals, schools, homes and industries—and stayed on the job.

In cathedral, church and synagogue men and women who seek the true peace gave silent prayer for the safe return of battlefield warriors—and the end of war's evils.

In the Congress men dissented—but all held to the indestructible thread of freedom, of dedication to the purpose of this country. Some drifted into the valleys of partisanship, others to the peaks of statesmanship. But none, Hanoi, would sell out on your terms.

No, Hanoi didn't get confused about the status of the United States of America.

Wednesday wasn't "a day off" in the national life. It might have seemed so to you from reading and hearing the chant of a few self-appointed "saviours" among the New Left politicians and commentators.

A fractional few protested in our streets against a President who worked for peace even as they jeered. No one was shot.

Recall, Hanoi—and the restless sideline coaches of this nation—that on another day, a year ago, an enlightened Communist took his people to the streets in protest. Protest blunted by tanks and guns.

Dubcek of Czechoslovakia today is stripped of his right to do anything. The protest of his people has been muted.

In this free, enlightened land there can be protest. There was on Wednesday.

But it will not derail the orderly, honorable withdrawal—and eventual peace we all seek.

SENATE—*Wednesday, October 22, 1969*

The Senate met at 12 o'clock noon and was called to order by the President pro tempore.

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal Father, Lord of men and nations, on this national day of prayer, teach us how to pray, when to pray, what to pray, and to whom to pray that the life of prayer may be the way of life in this good land. Make us mindful of our godly heritage. Restore in us the faith of our fathers that we may trust not in our own strength but in the wisdom and light which comes from Thee.

O Lord, chasten and correct us wherein we are wrong. Confirm and strengthen us wherein we are right. Save us from violence and discord, from distrust of one another and from disobedience of divine law. Unite us in heart and mind and action that we may be one people whose might is in the right and whose strength is in Thee.

We pray now for the President and his

Cabinet, for the Congress, for all in the executive, legislative, judicial, diplomatic, and military services that they may know and do Thy will. Be especially near the youth of this land in pursuit of knowledge, on missions of mercy and in the military services, guarding them in temptation and strengthening them in times of peril. Be with the prisoner of war in his loneliness and separation, assuring him that nothing can separate him from Thy tender care. Be near the poor and the disadvantaged and help us to bear one another's burdens.

O Lord, guide by the mind of the Prince of Peace the longing peoples of the world that all mankind may be drawn together in a firm spiritual alliance so that Thy kingdom may come and Thy will be done on earth. Amen.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Tuesday, October 21, 1969, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT—APPROVAL OF JOINT RESOLUTION

Messages in writing from the President of the United States were communicated to the Senate by Mr. Leonard, one of his secretaries, and he announced that on October 20, 1969, the President had approved and signed the joint resolution (S.J. Res. 112) to amend section 19(e) of the Securities Exchange Act of 1934.

EXECUTIVE MESSAGES REFERRED

As in executive session, the President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, and withdrawing the nomination of Charles A. Bane, of Illinois, to be U.S. circuit judge for the Seventh Circuit, which nominating messages were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed the bill (S. 632) for the relief of Raymond C. Melvin, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 1706. An act to provide for the conveyance of certain mineral rights in and under lands in Pike County, Ga.;

H.R. 2963. An act for the relief of Mrs. Barbara K. Diamond;

H.R. 5936. An act for the relief of Kong Wan Nor;

H.R. 9591. An act for the relief of Elgie L. Tabor; and

H.R. 14195. An act to revise the law governing contests of elections of Members of the House of Representatives, and for other purposes.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 74. An act to place in trust status certain lands on the Standing Rock Sioux Indian Reservation in North and South Dakota;

S. 775. An act to declare that the United States shall hold certain land in trust for the Three Affiliated Tribes of the Fort Berthold Reservation, N. Dak.;

S. 921. An act to declare that certain federally owned land is held by the United States in trust for the Cheyenne River Sioux Tribe of the Cheyenne River Indian Reservation;

H.R. 2768. An act to amend title 38 of the United States Code in order to eliminate the 6-month limitation on the furnishing of nursing home care in the case of veterans with service-connected disabilities; and

H.R. 3130. An act to amend title 38, United States Code, to provide that the Administrator of Veterans' Affairs may furnish medical services for non-service-connected disability to any war veteran who has total disability from a service-connected disability.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred, as indicated:

H.R. 1706. An act to provide for the conveyance of certain mineral rights in and under lands in Pike County, Ga.; to the Committee on Interior and Insular Affairs.

H.R. 2963. An act for the relief of Mrs. Barbara K. Diamond;

H.R. 5936. An act for the relief of Kong Wan Nor; and

H.R. 9591. An act for the relief of Elgie L. Tabor; to the Committee on the Judiciary.

H.R. 14195. An act to revise the law governing contests of elections of Members of the House of Representatives, and for other purposes; to the Committee on Rules and Administration.

EXPORT EXPANSION AND REGULATION ACT OF 1969

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Bankruptcy be discharged from H.R. 4293, the House companion bill of S. 2696, which is now the unfinished business of the Senate, and that H.R. 4293 be ordered placed on the calendar.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LIMITATION ON STATEMENTS DURING TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that statements in relation to the transaction of routine morning business be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE RECORD OF THE SELECT COMMITTEE ON SMALL BUSINESS

Mr. MANSFIELD. Mr. President, I am in receipt of a communication from the distinguished chairman of the Select Committee on Small Business, the senior Senator from Nevada (Mr. BIBLE), in which he has compiled the record of the Select Committee on Small Business to date. I ask unanimous consent that this very meritorious report and the attachments be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
SELECT COMMITTEE ON
SMALL BUSINESS,
Washington, D.C., October 9, 1969.

Memorandum to: Senator MIKE MANSFIELD.
From: ALAN BIBLE, chairman, Select Committee on Small Business.
Subject: Small Business record.

You may wish to have the following preliminary list of bills introduced and other actions taken by the Senate during the 91st Congress on behalf of the Nation's 5½ million small businessmen. I believe this establishes a record of the concern by the Congress for the more than 90% of American business firms who are small businessmen and who provide employment for 40 million people and contribute approximately 40% of the country's gross national product of some $808 billion annually.

LEGISLATION PASSED

S. 2815.—A clean bill reported by the Banking and Currency Committee, passed the Senate on August 13. It provides for (1) raising the authorization ceiling on local development company loans, (2) authorizing banks to purchase SBIC debentures. and (3) permitting SBIC's to invest in unincorporated businesses.

S. 2610.—Called for maximum feasible participation of minority businesses in areas involved in all federally-assisted urban renewal projects. It became section 404 of S. 2864, a clean bill reported on September 5 (S. Rept. 392) and passed by the Senate on September 23.

LEGISLATION REPORTED

S. 2540.—To explicitly authorize SBA guarantees of private loans to small business investment companies. Reported August 11 by Senate Report 91-369.

OTHER BILLS INTRODUCED

S. 336.—To raise the permissible amount of a Regulation A stock offering from $300,000 to $500,000.

S. Res. 176.—To have SBA study the capital requirements of small meat processors faced with compliance with the Wholesome Meat Act.

S. 1750.—To provide disaster loans to meat packers and other firms faced with Federal deadlines who cannot obtain the requisite credit on reasonable commercial terms.

S. 2638.—Would add a guaranty authorization to the Small Business Act of 1953 parallel to that proposed by S. 2540 for the 1958 Small Business Investment Act.

S. 1212 and 1213.—Would strengthen the SBIC program by the creation of a Capital Bank and other measures. Section 7 of S. 1212 was carried over into S. 2815.

Amendment No. 88 to H.R. 12290.—Exempting small business from repeal of the investment tax credit up to $25,000 of investment, with a cutoff of eligibility at $1 million of income. Amendment No. 92 by Senator McGovern is to the same effect.

Amendment No. 72 to H.R. 12290 by Senator Sparkman.—Would continue the 7% investment tax credit on investment up to $150,000 per year.

S. 2079.—Would establish an Annual Cattle Industry Trade Conference to survey import problems and export possibilities.

S. 2190.—Would require the Department of Agriculture to submit a businesslike annual

report on the net balance of payments effects of all trade in agricultural commodities.

S. 2787.—Would upgrade security for air cargo shipped by small and other businessmen by requiring principal contractors to submit quarterly reports on cargo damaged, lost, or presumed stolen.

OTHER ACTIONS IN BEHALF OF SMALL BUSINESS

I. Members of Small Business Committee submit resolution in favor of continued independence of SBA, March 18, 1969. Ten Senators support this measure with floor statements, March 20, 1969.

II. Small Business Committee Chairman Bible requests restoration of $170.2 million Congressionally approved loan authority for SBA business loan programs frozen by the Executive Branch (a 58.5% cut). Letter and floor statements, June 25, 1969.

III. Subcommittee Chairmen Randolph, Harris, and McIntyre challenge SBA and Department of Commerce cutbacks in programs of transferring technology to small business. Letters, September 22, 1969. No public statement as yet.

SMALL BUSINESS PROGRAMS AT THE CROSSROADS

Mr. BIBLE. Mr. President, as chairman of the Select Committee on Small Business, I feel it incumbent to advise the Senate that I have today transmitted by letter to President Nixon a resolution adopted by our committee expressing serious concern about the future independence of the American small businessman's spokesman on the national level—the Small Business Administration.

I ask unanimous consent that the text of the resolution and the transmittal letter be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BIBLE. There are persistent and recurring reports, published and otherwise, that an Executive reorganization is under consideration that would merge or, shall we say, "submerge" the Small Business Administration into the Department of Commerce. Secretary of Commerce Maurice Stans has been qnoted as saying at the National Press Club, in Washington, D.C., on March 5, that the Small Business Administration "by definition belongs in the Department of Commerce."

Of course, I must disagree completely and unequivocally with Secretary Stans because that statement flies in the face of the language of the Small Business Act of 1953 itself which established the agency. The law reads that the SBA "shall not be affiliated with or be within any other agency or department of the Federal Government."

Mr. President, it is my judgment that this country's almost 5½ million small businessmen view the Small Business Act of 1953 and the Small Business Investment Act of 1958 as two of the oustanding legislative achievements of the Eisenhower-Nixon administration. Certainly, Congress and the administration must have felt at that time that the specific language setting forth that SBA was not to be affiliated within any other agency or department represented a strong mandate. It represented a conviction that the small businessman was entitled to a strong, clear, independent voice in his Government—a voice free from the pressure and influence of big business special interest groups whose competitive purposes would not be dedicated to serving the small business community.

It was important for SBA to speak independently for the small businessman during the Eisenhower-Nixon years of the 1950's. It was equally important for SBA to remain independent during the succeeding Democratic Kennedy-Johnson administration, during which at least one abortive merger effort was shot down before it became airborne. Today, it is even more urgent that SBA remain an independent agency during a difficult economic cycle for small businesses marked by high interest rates, shortage of capital, fiscal uncertainties, and the march of corporate giantism, mergers of small businesses into big business, and the advent of the conglomerate umbrella. These have and do provide real threats to the small businessman as a viable force in protecting himself in the world of competition.

The Nation's 5½ million small businessmen must retain their spokesman—SBA—at the national level if they are to continue to provide employment for 40 million people and contribute approximately 40 percent of the country's gross national product of $808 billion annually.

It is my deep hope that these published and increasingly recurrent reports about a proposed SBA merger or submerger with the Commerce Department continue to be only from the rumor mill.

In my letter to the White House transmitting the Small Business Committee's resolution, I have urged upon the President, as the son of a small businessman himself, to keep the executive agency voice of the small businessman alive and let the Small Business Administration continue to do a commendable, outstanding job.

Certainly, this subject would not be complete without an in-depth examination of the background of congressional attentiveness to the small businessman and the great force he represents in our daily economic life.

Over the past three decades, Congress has taken many initiatives in order to build a series of small business institutions in this country. This movement began with the creation of the Smaller War Plants Administration, and the Small Defense Plants Administration during World War II, and the Korean war. In 1950 the Senate and House Committees on Small Business were established. Then, in 1953, the Small Business Act was enacted by the Congress and signed by President Eisenhower. This established the Small Business Administration as a permanent independent Federal agency, with its Administrator reporting directly to the President. For the first time there existed a national policy in favor of smaller business in this country, as follows:

"It is the declared policy of the Congress that the Government should aid, counsel, assist, and protect, insofar as is possible, the interests of small-business concerns in order to preserve free competitive enterprise . . . and strengthen the overall economy of the Nation."

This was followed by the passage of the Small Business Investment Act of 1958, which also gained the approval of the Eisenhower administration, of which President Nixon was a part. The 1958 act chartered small business investment companies through which Government and private capital were imaginatively united in the task of building a true "venture capital" industry in this country.

Associated with this small business program have been some of the most distinguished names in American political life: Leaders in the Senate have included the distinguished chairman of the Banking and Currency Committee, the Senator from Alabama (Mr. SPARKMAN); the former majority leader, President Johnson; the former assistant majority leader, Vice President Humphrey; the chairman on the Finance Committee, the Senator from Louisiana (Mr. LONG); the chairman of the Joint Economic Committee, the Senator from Wisconsin (Mr. PROXMIRE); the present chairman of the Small Business Subcommittee of the Banking and Currency Committee, the Senator from New Hampshire (Mr. MCINTYRE); the distinguished Senators from New York, Illinois, and Texas (Mr. JAVITS, Mr. PERCY, and Mr. TOWER), and many distinguished former Members of this body, such as Senators Saltonstall, Smathers, Bartlett, and Morse. Senators John F. Kennedy and BARRY GOLDWATER distinguished themselves as members of the Senate Small Business Committee.

Thus, the advocacy and support for small business has transcended parties, regions, and political philosophy. The impulses for this work are deep rooted. They arise and are nourished by the concern for the little man, the independent, and the entrepreneur who dares to risk his money and his career in the founding and building of his own business.

As we come increasingly into the age of giant national and international corporations, expanding Government action on all levels, the recurrence of international crises, and the rapid advance of technology, the problems of small and independent business have proliferated. That is a fancy word, but I believe it expresses the feelings of small businessmen who must contend with seemingly ever-mounting demands of bookkeeping, reports, taxation, and regulation, in addition to more rigorous competition in domestic and foreign markets.

As I have said on a number of occasions, the lawmakers whom I have mentioned were among the first to perceive changes in our economy which required a special focus for attention to the problems and potentials of small business. They then pioneered in writing a response to these changes into the law of the land.

These labors have benefited the entire economy, in which 5½ million small businessmen provide 40 percent of the national product and one-half of all the jobs. But most of all, this work has benefited the less affluent, and more remote areas of the Nation, the places where capital and management expertise are most scarce, the areas visited by natural and economic disasters, and those of individuals in this country who put their beliefs in the free enterprise system to the daily test of establishing and maintaining their own small businesses.

During my years in the Senate, I have been proud to be associated with these efforts. I should point out that during much of this time, small business advocates have been fighting an uphill battle against several of the most formidable enemies in the world—special economic interests, bureaucracy, and indifference. For example, it was only in 1966 that a piece of small business legislation received the formal sponsorship of the executive branch for the first time. Programs of the Small Business Administration have been beset with periods of financial stringency stemming from natural disasters, tight money, and budget cutting of various kinds.

However, the record of accomplishment on the statute books and in the annual reports of the Small Business Administration, in spite of these obstacles, deserves the highest praise which the Nation can bestow on dedicated public servants who made it possible.

Central to this story is the Small Business Administration: a little, and in the past often little-noticed agency, which in 15 years has turned in one of the most remarkable performances of any governmental agency.

Since 1953 it has made over 85,000 business loans totaling nearly $4 billion; it has been on hand to make about 75,000 disaster loans totaling nearly $750 million; small communities have received almost 2,000 local development company loans approaching $500 million; and the small business investment companies have in addition made about 30,000 loans aggregating about $1.4 billion.

Each of those loans represents more than a statistic—it is a vital factor in the life and fulfillment of men and families. The establishment and growth of these firms has made the promise of the free enterprise sys-

tem and the American dream into reality, not only for the 200,000 businesses directly involved, but for the Nation as a whole.

Now would be the time to build upon this record and to extend it in areas of need and opportunity so that the momentum of success can be maintained.

It is unfortunate, instead, that the picture has become clouded in recent days. Reference can be made to reports in newspapers that the Secretary of Commerce feels that the Small Business Administration "by definition" ought to be part of the Commerce Department.[1] Additional credence is lent to these reports by the action of President Nixon on March 5 in signing an Executive order which transfers the coordination of programs on minority busines enterprises from the Small Business Administration where it had previously been, to the Department of Commerce. For the information of all concerned, I ask that articles on this subject published in the Washington Post, the Washington Evening Star, the Wall Street Journal, and the New York Times, together with the Executive order of March 5, 1969, be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. BIBLE. Although it does not appear in the press reports, it appears from the Executive order that the function of coordinating Advisory Councils on minority enterprise are to be transferred from the Small Business Administration to the Department of Commerce. The order also states that the Department of Commerce shall "provide the managerial and organizational framework through which joint or collaborative undertakings with Federal departments or agencies or private organizations can be planned and implemented" and that "the head of each Federal department and agency shall keep the Secretary informed of all proposed budgets, plans, and programs of his department or agency affecting minority business enterprise."

Further, Mr. Stans informed a reporter of the Wall Street Journal that his department could "conceivably" end up absorbing many functions now placed elsewhere.

These statements raise substantial questions about the role of the Small Business Administration. What is clear, however, is that instead of continuing on the highroad of SBA's success, the Nixon-Agnew administration is placing SBA and Small Business programs at a cross roads. No one can be sure at this point whether we are going ahead, going off at right angles, or doubling back the way we came.

Mr. President, the position of the Select Committee on this matter is clear. Our committee resolution strongly supports the existence of an independent Small Business Administration. The language of the Small Business Act of 1953 should be before us. Section 4(a) states:

"In order to carry out the policies of this Act there is hereby created an agency under the name 'Small Business Administration' . . . which Administration shall be under the general direction and supervision of the President and shall not be affiliated with or be within any other agency or department of the Federal Government."

This language was deliberately conceived by the Congress to safeguard an independent voice in Washington for the small businessman. This independence was required because experience had demonstrated that small business matters would not be given appropriate attention within the Department of Commerce, the Department of the Treasury, or the other departments, agencies, or offices of the Federal Government which had long been in positions of influence over the destiny of small business. The historical record is clear on that point. It was the subject of extended debate in the Senate, which was summarized by the distinguished senior Senator from Alabama (Mr. SPARKMAN) as recently as February of 1966.[2] This legislative history, which is certainly no reflection upon the current Secretary of Commerce, establishes that the lack-luster record of the Department of Commerce in the field of small business prior to 1953, was a major reason for the grant of independent status to the SBA.

Accordingly, any reversion to the Department of Commerce of small business functions will almost surely represent a stride backward into a past where the distinctions between small business and giant business become increasingly blurred. It would be a retreat to an era when the Congress and the Nation were asked to believe that the problems of small, local, independent, and family enterprises were no different from those of multibillion-dollar, multi-national, conglomerate corporations. It would be a throwback to a time when Government spokesmen for small business were required to have their policies, statements, and budgets cleared by several layers of officials in the Department of Commerce who might have very little interest in the small businessman.

There has been considerable splendid comment by the new administration about the participation of the private sector in necessary programs. The record of the SBA on private participation is clear and positive. There have been intensive efforts to involve the private banking industry and the trade and other private associations in the loan participation and guaranty programs, especially in the creation of minority entrepreneurship in order to maximize the private role in these areas. There has been considerable achievement in these endeavors. This does not mean that more could not be done. And in doing more, the assistance of the Department of Commerce or any other department or agency could be helpful and would certainly be welcome. But, assistance is not the same as control.

Mr. President, I believe that I can assure all who are concerned with the small businessman that Congress will not stand by and allow this kind of retrogression. To the extent that the administration undermines, in law or in fact, the authority and programs of the Small Business Administration, not only will they incur the opposition of our committee, but also, I believe the great majority of Congress will make its voice be heard loudly and clearly.

EXHIBIT 1

U.S. SENATE, SELECT COMMITTEE ON SMALL BUSINESS,
Washington, D.C., March 18, 1969.

RESOLUTION

Whereas in 1953 the Congress established the Small Business Administration as an independent agency "under the general direction and supervision of the President," and provided specifically that the Small Business Administration "shall not be affiliated with or be within any other agency or department of the Federal Government"; and

Whereas a new Administration has assumed control of the Executive Branch of the Federal Government, and a new Administrator of the Small Business Administration has been appointed; and

Whereas printed and other reports persist that the future of the Small Business Administration as an independent agency may be in doubt; and

Whereas any departure from absolute independence for the Small Business Administration as a government agency would be contrary to the stated intent of Congress, and would patently abrogate the legislation creating the Small Business Administration as an independent agency of the Federal Government, and would lessen considerably the effective voice at the Federal level of the Nation's five and one-half million small businessmen: Now, therefore, be it

Resolved, That the Select Committee on Small Business of the United States Senate strongly favors the continuation of the Small Business Administration as an independent agency and strongly recommends that its function not be transferred to, or assumed by, any other department or agency of the Federal Government.

ALAN BIBLE, Nevada, chairman; JOHN SPARKMAN, Alabama; RUSSELL B. LONG, Louisiana; JENNINGS RANDOLPH, West Virginia; HARRISON A. WILLIAMS, Jr., New Jersey; GAYLORD NELSON, Wisconsin; JOSEPH M. MONTOYA, New Mexico; FRED R. HARRIS, Oklahoma; THOMAS J. MCINTYRE, New Hampshire; MIKE GRAVEL, Alaska; JACOB K. JAVITS, New York; MARK O. HATFIELD, Oregon; ROBERT DOLE, Kansas, MARLOW W. COOK, Kentucky.

U.S. SENATE SELECT COMMITTEE ON SMALL BUSINESS,
Washington, D.C., March 18, 1969.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: May I call your attention to the enclosed resolution adopted this week by the U.S. Senate Select Committee on Small Business strongly favoring continuation of the Small Business Administration as an independent agency and opposing any proposal to merge it with or subordinate it to any other department or agency of the Federal Government.

The Committee's affirmative action stems from persistent and recurring reports, published and otherwise, that such an Executive reorganization proposal is under consideration. Secretary of Commerce Maurice Stans has been quoted as stating at the National Press Club on March 5 that the Small Business Administration "by definition . . . belongs in the Department of Commerce".

It is my judgment that this country's almost 5½ million small businessemen view the Small Business Act of 1953 and the Small Business Investment Act of 1958 as two of the outstanding legislative achievements of the Eisenhower-Nixon Administration. The former specifically provided that SBA "shall not be affiliated with or be within any other agency or department of the Federal Government."

Certainly, Congress and the Administration must have felt at that time that such language clearly represented a strong mandate that the small businessman was entitled to a strong clear, independent voice in his Government—a voice free from the pressure and influences of big business special interest groups not dedicated to serving the small business community.

It was important for SBA to speak independently for the small businessman during the Eisenhower-Nixon years of the 1950's. It was equally important for SBA to remain independent during both succeeding Democratic Administrations during which at least one merger effort was discouraged. Today, it is even more urgent that SBA remain an independent agency during a difficult economic cycle marked by high interest rates, shortage of capital, fiscal uncertainties and the march of corporate giantism, mergers of small businesses into big business and the advent of conglomerates. These have provided real threats to the small businessman as a viable force in protecting himself.

The Nation's nearly 5½ million small businessmen must retain their spokesman—SBA—at the national level if they are to continue to provide employment for 40 million

---

Footnotes at end of article.

people contributing approximately 40 percent of the country's gross national product of $808 billion annually.

As the son of a small businessman yourself, you must be appreciative of the concern of the country's small business community about any proposed merger of the Small Business Administration with the Executive Department charged primarily with assisting and supervising big business—the Department of Commerce.

I sincerely hope you share this Committee's concern, and as Chairman of the Senate Small Business Committee, I respectfully urge your support for the continued independence of the Small Business Administration.

Cordially,

ALAN BIBLE,
Chairman.

MINORITY-BUSINESS OFFICE SET UP—NIXON SIGNS ORDER TO AID ENTERPRISES

(By Carroll Kilpatrick)

President Nixon yesterday signed an executive order establishing an Office of Minority Business Enterprise to promote and expand business ownership by minority groups.

The new office, which will be established in the Commerce Department, will help fulfill Mr. Nixon's promise to promote "black capitalism" and also enterprises by Mexican-Americans and other minority groups.

Secretary of Commerce Maurice H. Stans, who will supervise the operation of the new office, said that "we are trying to abandon the term 'black capitalism' in favor of the minority business enterprise because there are other minorities entitled to the benefits of this program."

[From the Washington (D.C.) Evening Star, Mar. 5, 1969]

NIXON TO CREATE A "MINORITY" BUSINESS POST

(By Philip Shandler and Richard Critchfield)

President Nixon reportedly will centralize in the Commerce Department the administration's effort to help "minority business enterprise."

The President soon will create a new Commerce post of special assistant to the secretary of minority enterprise, with a staff of about 10 borrowed specialists, and will establish a citizen advisory council, sources said.

The steps would be the first major administrative action to implement Nixon's pledge to help Negroes and other minority-group citizens get a bigger "piece of the action" in business.

The action is expected to stir negative reaction from some Negroes and government officials outside Commerce, however.

NO STATEMENT

The President is not expected to accompany his announcement with a statement of what kinds of help and how much of it he intends to give, leaving much of this for Commerce Secretary Maurice H. Stans to recommend. And some officials in other agencies do not see Stans as properly oriented to the need.

The President was to meet today with Stans, other Cabinet members, several Negro leaders and Hilary J. Sandoval, the Mexican-American head of the Small Business Administration.

The White House described today's session as "two-way discussion on minority business enterprise."

The Negro leaders planning to attend are Roy Innis, director of the Congress of Racial Equality, and Roy Wilkins, executive secretary of the National Association for the Advancement of Colored People.

The Cabinet members were to include George W. Romney, John A. Volpe, Clifford M. Hardin, Robert H. Finch, and George P. Shultz, the secretaries, respectfully, for Housing and Urban Development; Transportation; Agriculture, Health, Education and Welfare, and Labor.

MOYNIHAN, FARMER

Also to be present were Nixon's urban affairs adviser, Daniel P. Moynihan, and Assistant HEW Secretary James Farmer, founder of CORE.

Nixon pledged during the presidential campaign to help develop "black capitalism." Last week, however, Stans said the administration's new slogan is "minority enterprise."

The shift from "black" to "minority" reflects a sensitivity to the feelings of Puerto Ricans, Indians and Mexican-Americans, as did the naming of Sandoval to head SBA.

But liberals within the administration are not convinced that the switch from "capitalism" to "enterprise" reflects a commitment to the kind of economic-development help they think is needed.

Nixon has not yet taken a position, for example, on legislation embodying a $1 billion CORE plan for the creation of community-development corporation, in which residents of target areas would be able to buy stock and share in the enterprise.

And the first minority-enterprise effort by the administration, announced last week by Stans, is to implement a program of tax assistance to a Watts corporation—a project launched by the Johnson administration.

These liberals believe Stans is too bound to the traditional "capitalism" approach—that is, help to individual entrepreneurs or partnerships, rather than to community-based enterprise.

They would prefer, therefore, that direction of the program be vested in what they regard as a more socially-conscious agency, such as HEW or the Office of Economic Opportunity.

A prospectus prepared for the President by Commerce, however, calls for that department to have the power to coordinate 116 separate programs conducted by "21 Cabinet departments and executive agencies."

"SPEAK EFFECTIVELY"

The "focal point" would be Stans and the new assistant, "to speak effectively and convincingly to government agencies, the business community, minority business, labor, foundations and other economic and social groups."

"Efforts should be made to get many of the staff on long-term loan from industry, foundations and financial institutions," the paper says.

The National Advisory Council on Minority Business Enterprise would serve as "a communications link with all relevant non-federal groups, a coordinating link in the evolution of strategy, a vehicle for generating new ideas, and an external sounding board for new program proposals."

A key question not expected to be answered immediately is what will happen under the anticipated reorganization to agencies such as SBA.

Stans reportedly wants to absorb SBA into Commerce; several congressmen want to keep it independent, although some, troubled by the Negro oriented activities of former SBA head Howard Samuels, may prefer to put it under what they regard as Stans' suitably conservative wing.

[From the Wall Street Journal, Mar. 6, 1969]

NIXON SETS UP OFFICE TO FURTHER MINORITIES ENTRY INTO BUSINESS—COMMERCE CHIEF HEADS NEW UNIT THAT WILL SEEK TO COORDINATE EFFORTS OF 116 U.S. PROGRAMS

WASHINGTON.—President Nixon established an office of Minority Enterprise, headed by Commerce Secretary Stans, to help disadvantaged groups become part of the mainstream of American business.

The new office, equipped with a staff of 10 professionals, will perform a coordinating function—attempting to sharpen the focus of some 116 programs, operated by 21 different Federal agencies, that currently support the development of new business enterprises either by loans, grants, guarantees or contracts.

In addition, the new office will attempt to draw upon the resources of private industry, voluntary organizations and foundations to help minority-group members become businessmen. The Presidential order also created an Advisory Council for Minority Business Enterprise, to comprise experts from the banking, business, foundation and other fields, that will give advice. And the order established an information center to collect examples of successful minority-business ventures.

"I have often made the point that to foster the economic status and the pride of members of our minority groups we must seek to involve them more fully in our private enterprise system." Mr. Nixon declared in a statement. "Black, Mexican-American, Puerto Ricans, Indians and others must be increasingly encouraged to enter the field of business, both in the areas where they now live and in the larger commercial community, and not only as workers, but also as managers and owners," he said.

Mr. Nixon's Executive Order was significant for several other reasons:

It laid to rest the term "black capitalism" that the President had used so extensively during his election campaign. The Nixon Administration wants to appeal to a broader spectrum of minority groups, not just the black population. So "black capitalism" has become "minority enterprise" and Mr. Nixon addressed his statement to "blacks, Mexican-Americans, Puerto Ricans, Indians, and others."

It costs the inflation-conscious Administration no budgetary expense, except for staff salaries; nor does it call upon Congress for new legislative programs. Mr. Stans, at a news conference, said that if new funds or legislative authority is deemed necessary, that will be decided later on. He added that the use of new tax incentives to stimulate new business and jobs in the slums, as advocated by Mr. Nixon during his campaign, was a matter still "under study." He said it was "premature" to discuss whether such incentives would be proposed to Congress.

It doesn't propose any transfer of Federal programs or agencies. Mr. Stans said that the new office wouldn't operate any programs of its own, but would seek to persuade those agencies that do operate programs affecting minority business to make extra efforts in that direction. The Commerce Secretary won't have formal, direct power over other Federal agencies, but will have the force of Mr. Nixon's policy order behind him.

[From the Wall Street Journal, Mar. 6, 1969]

FOREIGN INVESTMENT RULES TO BE WAIVED FOR "HUNDREDS" OF SMALL FIRMS, STANS SAYS

WASHINGTON.—The Nixon Administration is moving toward exempting "many hundreds" of relatively small companies from controls over foreign direct investment, Commerce Secretary Stans said.

At a National Press Club luncheon, Mr. Stans added that some form of relief also is in the works for large corporations, reiterating an earlier comment that he hopes for action in about 30 to 60 days.

While Mr. Stans dodn't go into detail, the relief for small companies presumably would be in the form of raising the current $300,000 ceiling on dollars that may be dispatched in 1969 to foreign subsidiaries without regard to the mandatory regulations on investment abroad.

This cutoff point was originally set at $100,000 when the controls were imposed by President Johnson on Jan. 1 1968, and was raised to $200,000 last August. Under consideration now, it's understood, is an increase in this "minimum investment quota" to a level that might well exceed $500,000.

To help larger corporations, the department is believed to be weighing an increase in the "incremental earnings" quota. Instead of the standard formulas limiting the investment outflow according to past activity in a base period, a company this year can instead have investment quotas equal to 20% of the 1968 earnings of its foreign affiliates in each of the three specified geographic areas. The simplest form of liberalization, analysts say, would be for the department to raise the percentage to, for instance, 25% or 30%.

President Nixon appears willing, Mr. Stans said, to take the "calculated risk" that the projected easing of controls—which currently apply to about 3,200 companies—will to a "slight degree" worsen this year's expected overall balance-of-payments deficit. Such a deficit, which occurs when foreigners acquire more dollars than they return in all dealings, could be "very substantial" this year anyway, he warned.

Thus, Mr. Stans emphasized, the controls that Mr. Nixon criticized sharply in his campaign can't be removed altogether without risking "a crisis for the dollar" internationally. But Mr. Stans said he agrees with businessmen who are pressing him "to get rid of those damn controls" on the ground that they would be "self-defeating" if retained indefinitely. He said the controls are "destructive" of opportunities for U.S. companies to build plants in foreign markets that would result in gains in exports and earnings.

The major weak spot in the payments situation, Mr. Stans said, is the shriveling in 1968 of the U.S. surplus on exports over imports to the lowest level since the late 1930s. In this context, Mr. Stans expressed sympathy for U.S. textile companies faced with an "unbelievable" increase in imports of synthetic fibers and textile products. If this continues, he said, it could do "great harm" to the industry.

While emphasizing that "at heart, we are free traders," Mr. Stans expressed hope that the Administration will be able to persuade foreign synthetic fiber companies to accept "voluntary" limits on their sales to the U.S., akin to the steel-import limits which, he said were "pretty well resolved" on a voluntary basis late in the Johnson Administration.

Whether textile quotas will be discussed on his trip to Europe in April hasn't yet been decided, Mr. Stans said. He suggested that a separate negotiating team might tackle this later so as not to "interfere with free and open discussion" on broader trade matters. Also undecided is whether Agriculture Secretary Hardin may accompany him or go later, Mr. Stans said as he expressed hope that textiles wouldn't get tangled with a Common Market move toward a special tax that could severely hurt U.S. soybean exports. The U.S. hopes for textile pacts with Japan, Hong Kong, Korea, Taiwan, and other non-European nations as well, Mr. Stans added.

PROTECTIONIST MOVES

Discounting suggestions that his trip could trigger greater professional moves by Europeans, Mr. Stans said nontariff barriers are already spreading in Europe to an extent that "all of the supposed benefits of the Kennedy Round" of tariff-cutting could be lost before the rate reductions are fully implemented. He complained that the proliferation of "taxes on value added" in Europe pose a "very serious" danger to the U.S., which is "defenseless" because international rules permit such levies to be applied against imports and rebated on exports.

The question of whether the U.S. should institute such a tax—which basically applies to the difference between what a company pays for materials and the price it gets for its finished products—is one that will shortly be studied, Mr. Stans said. But he cautioned that it will be "several years" before a position could be taken. Asked about Japan's limits on operations by U.S. auto makers, Mr. Stans said it would be "better to ask Japan to impose barriers" on its own exports of autos to the U.S. But, he quickly withdrew the remark as "facetious."

Disavowing any intent to be an "empire builder," Mr. Stans said that Federal reorganization efforts conceivably could end up with a transfer from the White House to his department of the functions of special ambassador for trade negotiations and special assistants for consumer protection and telecommunications. Certain oceanographic functions might also be logically added to his department, he said, adding that "by definition" the Small Business Administration ought to be part of the Commerce Department.

Stressing that he hasn't taken any position on such possible transfers, Mr. Stans said he is aware that there has been "some decline in the prestige" of the Commerce Department since the time Herbert Hoover was secretary. The department shouldn't try to be the "voice of business" in Washington nor should it have the role of communicating the Administration's wishes to the business community, Mr. Stans said. Its goal, he said, should be sponsoring "growth and strength" in the economy, a role that would be implied if its name were the "Department of Economic Development."

[From the New York Times, Mar. 6, 1969]

STANS TO PROMOTE A MINORITY BUSINESS ENTERPRISE—COMMERCE CHIEF TO SET UP NEW DEPARTMENT TO DIRECT PROGRAMS FOR THE POOR

(By Walter Rugaber)

WASHINGTON, March 5.—Secretary of Commerce Maurice H. Stans was named today as the Nixon Administration's main promoter of capitalism for the nation's Negroes and other minority group members.

President Nixon assigned the job to Mr. Stans and the Commerce Department when he signed an Executive order at a White House ceremony attended by 37 Negro, Mexican-American, Puerto Rican, and Indian leaders.

The Secretary, who said he would establish an office of minority business enterprise within the department, indicated later at a news conference that the new operation would work largely on coordinating Government and private efforts.

Mr. Stans declared that his office would not conduct programs of its own, would not take funds from other agencies, and would not direct other Federal offices on how to spend their money.

Mr. Stans said the new office would have a "limited group of perhaps 10 experts in various fields," such as banking, business, philanthropy and agriculture.

CONCERN IN LIBERAL CIRCLES

There was some concern in liberal anti-poverty circles that Mr. Stans, who has a reputation as a conservative, might interfere with minority business development efforts to other agencies.

The Secretary's move to portray his new unit as an administrative and coordinating group appeared to mollify several of these sources only partly.

"It still means that if O.E.O. [the Office of Economic Opportunity] wants to make grants to black business in Watts or Bedford-Stuyvesant it's got to check with Stans," one observer said. "It's just another layer of clearance."

"They will still run their own programs," Mr. Stans insisted at his news conference. "The money in O.E.O. will stay there and the money in the S.B.A. [Small Business Administration] will stay in the S.B.A."

There are 116 Federal programs that might help minority group members go into business for themselves, Mr. Stans said, administered by 20 different departments and agencies.

"Some have done a poor job and one or two may have done a pretty good job," Mr. Stans said. "The point is, we want to focus their attention and stimulate their activity in the field of minority enterprise to a degree that has not been possible before."

None of the appointees to the new office were named. Mr. Stans disclosed that the director would not be a minority group member but that some Negroes and Mexican-Americans would work on the staff.

Roy Wilkins, executive director of the National Association for the Advancement of Colored People, and the Rev. Ralph David Abernathy, president of the Southern Christian Leadership Conference, were invited to the White House but did not appear.

Mr. Wilkins and other civil rights leaders have criticized the "black capitalism" concept that President Nixon put forth during the campaign on grounds that building "Negro" business would tend to perpetuate ghettos.

The White House identified the persons attending today's meeting as follows:

T. M. Alexander, Courts & Co.

Richard Allen, Economic Resources Corporation.

Mrs. Margaret L. Belcher, National Association of Negro Business and Professional Women's Clubs.

John Belindo, executive director, National Congress on Indian Opportunities.

Senator Edward W. Brooke, Republican of Massachusetts.

Berkeley Burrell, president, National Business League.

Sammie Chess Jr., president, Friendly-Leader Manufacturing Company.

John Clay, Business Development Corporation.

Clifford Coles, director of urban affairs, American Management Association.

Wardell Croft, president, National Insurance Association and Wright Mutual Insurance Company.

John Davis, Commerce, Labor, Industry Corporation of Kings.

The Reverend Walter Fauntroy, Micco, Inc.

Charles B. Fisher.

Joe Gomez, United Steel Workers of America.

William Hamilton, president, National Association of Real Estate Brokers.

Mrs. Dorothy Height, president, National Council of Negro Women.

Judge Alfred J. Hernandez.

Norman Hodges, president, Green Power Foundation.

Roy Innis, national director, Congress of Racial Equality.

Dr. Edward Irons, executive director, National Bankers Association.

John H. Johnson, president, Johnson Publications.

Napoleon Johnson, National Urban League.

Joe Kirven, president, Abco Building Maintenance Company.

Representative Manuel Lujan, Republican of New Mexico.

Luis Nunez, executive director, Aspira, Inc.

Mrs. Myrtle Ollison, National Association of Colored Women's Club.

Robson B. Reynolds, the Philadelphian Apartments.

Eliu Rumero, Taos, N.M.

George E. Sandoval, Tucson, Ariz.

Dr. John Torres, Bronx Terminal Market.

Clarence Townes Sr., Richmond, Va.

Mayor Walter E. Washington of Washington, D.C.

Johns Wheeler, president, Mechanic and Farmers Bank.

Charles William, National Business League.
John Wooten, executive director, Black Economic Industrial Union.
Dr. Harding Young, dean, School of Business Administration.

[From the office of the White House Press Secretary, Mar. 5, 1969]

THE WHITE HOUSE EXECUTIVE ORDER PRESCRIBING ARRANGEMENTS FOR DEVELOPING AND COORDINATING A NATIONAL PROGRAM FOR MINORITY BUSINESS ENTERPRISE

By virtue of the authority vested in me as President of the United States, it is ordered as follows:

Section 1. *Functions of the Secretary of Commerce.* (a) The Secretary of Commerce (hereinafter referred to as "the Secretary") shall—

(1) Coordinate as consistent with law the plans, programs, and operations of the Federal Government which affect or may contribute to the establishment, preservation and strengthening of minority business enterprise.

(2) Promote the mobilization of activities and resources of State and local governments, businesses and trade associations, universities, foundations, professional organizations and volunteer and other groups towards the growth of minority business enterprises and facilitate the coordination of the efforts of these groups with those of Federal departments and agencies.

(3) Establish a center for the development, collection, summarization and dissemination of information that will be helpful to persons and organizations throughout the nation in undertaking or promoting the establishment and successful operation of minority business enterprises.

(b) The Secretary, as he deems necessary or appropriate to enable him to better fulfill the responsibilities vested in him by subsection (a), may—

(1) Develop, with the participation of other Federal departments and agencies as appropriate, comprehensive plans of Federal action and propose such changes in Federal programs as may be required.

(2) Require the submission of information from such departments and agencies necessary for him to carry out the purposes of this order.

(3) Convene for purposes of coordination meetings of the heads of such departments and agencies, or their designees, whose programs and activities may affect or contribute to the purposes of this order.

(4) Convene business leaders, educators, and other representatives of the private sector engaged in assisting the development of minority business enterprise or who could contribute to its development to propose, evaluate, and coordinate governmental and private activities in furtherance of the objectives of this order.

(5) Confer with and advise officials of State and local governments.

(6) Provide the managerial and organizational framework through which joint or collaborative undertakings with Federal departments or agencies or private organizations can be planned and implemented.

(7) Recommend appropriate legislative or executive actions.

Sec. 2. *Establishment of the Advisory Council for Minority Enterprise.* (a) There is hereby established the Advisory Council for Minority Enterprise (hereinafter referred to as "the Council").

(b) The Council shall be composed of members appointed by the President from among persons, including members of minority groups and representatives from minority business enterprises, knowledgeable and dedicated to the purposes of this order. The members shall serve for a term of two years and may be reappointed.

(c) The President shall designate one of the members of the Council as the Chairman of the Council.

(d) The Council shall meet at the call of the Secretary.

(e) The Council shall be advisory to the Secretary in which capacity it shall—

(1) Serve as a source of knowledge and information on developments in different fields and segments of our economic and social life which affect minority business enterprise.

(2) Keep abreast of plans, programs and activities in the public and private sectors which relate to minority business enterprise, and advise the Secretary on any measures to better achieve the objectives of this order.

(3) Consider, and advise the Secretary and such officials as he may designate on, problems and matters referred to the Council.

(f) For the purposes of Executive Order No. 11007 of February 26, 1962, the Council shall be deemed to have been formed by the Secretary.

(g) Members of the Council shall be entitled to receive travel and expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 5701–5708) for persons in the Government service employed intermittently.

(h) The Secretary shall arrange for administrative support of the Council to the extent necessary including use of any gifts or bequests accepted by the Department of Commerce pursuant to law.

Sec. 3. *Responsibilities of other Federal departments and agencies.* (a) The head of each Federal department and agency, or a representative designated by him, when so requested by the Secretary, shall, to the extent permitted by law and funds available, furnish information and assistance, and participate in all ways appropriate to carry out the objectives of this order.

(b) The head of each Federal department or agency shall, when so requested by the Secretary, designate a senior official to have primary and continuing responsibility for the participation and cooperation of that department or agency in matters concerning minority business enterprise and activities as required by this order.

(c) The head of each Federal department or agency, or his designated representative, shall keep the Secretary informed of all proposed budgets, plans, and programs of his department or agency affecting minority business enterprise.

Sec. 4. *Construction.* Nothing in this order shall be construed as subjecting any function vested by law in, or assigned pursuant to law to, any Federal department or agency or head thereof to the authority of any other agency or officer, or as abrogating or restricting any such function in any manner.

RICHARD NIXON.

THE WHITE HOUSE, *March 5, 1969.*

INDEPENDENCE OF SBA

Mr. KENNEDY. Mr. President, recent articles in the press have raised some doubts about the continued independence of the Small Business Administration.

The concern which these reports have caused, in the Senate, is reflected by Senator BIBLE dispatching to the White House today a resolution in behalf of the Senate Select Committee on Small Business which strongly restates the position that the agency should remain independent.

I support the committee's position. I hope the status of the Small Business Administration does not become a partisan matter or a controversy.

A Democratic Congress and a Republican administration united in 1953 to make the SBA a permanent and independent Federal agency, as a voice for the 5½ million small business owners throughout the country. Its importance to New England has been demonstrated by the strongly bipartisan support received from the former Senator from Massachusetts and longtime ranking minority member of the Senate Select Committee on Small Business, Mr. Saltonstall, the present chairman of the Legislative Small Business Subcommittee (Mr. MCINTYRE) and another consistent and vigorous advocate of small business, the Senator from Vermont (Mr. PROUTY). The Smaller Business Association of New England, probably the leading regional association of small firms in the Nation, has strongly and consistently defended SBA independence.

Mr. President, the large national and multinational corporations, backed by blue-ribbon law firms, public relations firms, and often representation in national and State capitals, have little difficulty in obtaining a hearing within the Government. To balance the scale somewhat has required that all of the friends of small business work and stand together. It has been this spirit of cooperation which has made possible the accomplishments in the past 15 years in the small business field.

What differences in judgment existed about the independent status of SBA were fully debated in 1953. At that time, President Kennedy, then the junior Senator from Massachusetts and later a member of the Senate Select Committee on Small Business, said:

"If such an agency is to be of real help to small business in providing technical assistance, long-term capital, and procurement opportunities, all of which are of primary importance in expanding the economies of New England and the United States, the following defects must be corrected:

"First, such an agency must be truly independent and not subject to the veto power of the Commerce and Treasury Departments. Experience has shown that such independence is necessary to give small business an effective voice in the Government."

It was, thus, after mature deliberation and positive action by the Congress that SBA independence was established. The factors that were weighed in that decision have been summarized on several occasions, and the Senator from Alabama (Mr. SPARKMAN) did so on February 4, 1966, in the CONGRESSIONAL RECORD, volume 112, part 2, page 2124. Senator SPARKMAN'S presentation has convinced me that nothing has changed to alter the validity of the congressional judgment of 1953 that the Small Business Administration must be truly independent to be an effective voice and helping hand for the small business community.

I feel it would thus be unnecessary and regrettable to reopen the question at this time.

EXPERIENCE FAVORS RETENTION OF INDEPENDENT SMALL BUSINESS ADMINISTRATION

Mr. NELSON. Mr. President, there has been increasing concern in recent days about the independence of the Small Business Administration. From what I have read in the newspapers recently, I share this concern with my colleagues in the Senate and the business community in my State.

For instance, an article on page 3 of the Wall Street Journal of March 6 quoted the Secretary of Commerce, Mr. Stans, as saying:

"Federal reorganization efforts conceivably could end up with a transfer . . . to his Department of the functions of the special ambassador for trade negotiations, and special assistants for consumer protection and telecommunications . . . adding that by definition 'the Small Business Administration ought to be part of the Department'."

An article on the following page informed us further that the Office of Business Minority Entrepreneurship had been set up to "coordinate" minority business programs and that it was to have a staff of about 10 experts. Then on March 9, the Washington Post carried a statement:

"The new office in the Commerce Department will begin operations with a small staff, probably not more than twenty or thirty people."

This reported growth of 100 to 200 percent in 4 days must surely be one of the fastest growth rates ever seen in this country and raises serious doubts about what the Department of Commerce and the Administration intend to do in this field. If these activities continue to expand with the same speed, it can safely be predicted that the Department of Commerce could absorb SBA completely, leaving few traces other than a dispossessed and demoralized community of 5½ million small firms in this country.

Before this happens, I think it would be well for the Senate to closely analyze the logical basis which has been stated for the proposition that important functions such as protection of the consumer and the small businessman be made the responsibility of the Department of Commerce.

It is gratifying to me that the Senate Committee on Government Operations will shortly begin hearings on my bill for the creation of a Department of Consumer Affairs. It has been my experience as developed over several years in both Madison, Wis., and Washington, D.C., in holding hearings on many subjects such as drug prices, automobile tires, and other practices of car manufacturers, that there is a significant divergence of interest between the consumer and the businessman and that no man or department can adequately serve both of these masters. In the field of small business, I have been privileged to serve as the Chairman of the Monopoly Subcommittee of the Senate Select Committee on Small Business. On March 15, 1967, we heard the following testimony about business trends from Dr. Willard F. Mueller, then Chief of the Bureau of Economics of the Federal Trade Commission:

"Another disquieting development is the growing aggregate *concentration* and *conglomeration* of American industry. The current merger movement has created vast industrial complexes which operate across numerous industries. . . . By 1963, the 100 largest manufacturing corporations accounted for as large a share of business activity as did the top 200 in 1947. . . . Growing conglomeration raises some rather fundamental questions . . . concerning the future character of the competitive process in our market economy. Because a conglomerate enterprise operates across many different markets, it is not subject to the competitive discipline of any one market. This may pose serious competitive problems for the business enterprise, especially the small company, whose fortunes depend entirely on its success in a particular market." [3]

Mr. Mueller also pointed out:

"The high degree of concentration of financial resources in American manufacturing . . . (where) the 10 largest companies held 18 percent of all manufacturing assets (and) the approximately 400,000 smallest companies with assets below $5 million accounted for only 15 percent of the total." [4]

It was because of these and other such trends in the economy that the Congress determined in 1953 that the Small Business Administration should be an independent agency as a spokesman for the Nation's smaller business firms. Beyond the facts and figures, however, Congress also considered the intangibles such as the sympathy, sensitivity, and depth of commitment which an independent agency dedicated to the small businessmen would have in carrying out the declared congressional policy that—

"The Government should aid, counsel, assist, and protect insofar as it is possible, the interests of small business concerns in order to preserve free competitive enterprise . . . and to maintain and strengthen the overall economy of the Nation." [5]

It is my judgment that another intangible which has a direct influence on keeping our economy dynamic and competitive is the incentive to invent and innovate and to create a business which will bring these new products and services to the public. It has been pointed out to the Senate on several occasions that small business makes a disproportionately high contribution in this area. For instance:

"An intensive study by the U.S. Department of Commerce published in 1967 indicated that, despite the approximately $100 billion spent on research and development in this country in the past two decades, much of it by big business with advanced facilities and organized teams of professions, more than half of the technical and business innovations in our country are still coming from individual inventors and very small companies." [6]

It seems to me that both the tangible information and the intangible factors which are part of my experience confirm the points which have been ably made by Senator Bible and Senator Sparkman. If anything, they add additional weight to the judgments of 1953 based upon the developments which we have seen in our economy since then.

Accordingly, I would like to express my strong support for the Small Business Committee Resolution recommending continued independence of the SBA. I intend to do all that I can to have this position sustained by the Congress and the executive branch and to advance the cause of the small businessman throughout the country.

ASSURING A FUTURE FOR THE SMALL BUSINESS ADMINISTRATION AND THE SMALL BUSINESSMAN OF THIS COUNTRY

Mr. HARRIS. Mr. President, recent statements and actions give rise to the disturbing possibility that the Nixon administration intends to downgrade or perhaps even dismantle the traditional program and independence of SBA.

I feel that those of us in the Senate who are familiar with small business matters should make our views known for the information and whatever guidance the executive branch may wish to derive from them.

Mr. President, small business is not some kind of ornament on the corporate society, like a piece of fancy operational equipment on one of the big-three model automobiles. The small business community accounts for 40 percent of our gross national product and one-half of the 80 million jobs that support our population. Small business is thus central to U.S. economy.

There is a further myth that most small businesses are a kind of historical anachronism, like the buggy-whip. The truth is that the corner grocery store and the neighborhood restaurant have been transformed somewhat and have now emerged as the "7–11 store," the carryout, the franchised hamburger, roast beef, chicken or hotdog drive-in. These businesses which provide a varying but considerable measure of small business ownership and control are among the fastest growing enterprises in the country.

The classic neighborhood small businesses have also been receiving increased attention because of their value to the inner city in improving the availability of goods and services, reducing prices, providing jobs and offering realistic opportunities for ownership by minority businessmen.

Beyond these fields, we have seen breakthroughs in the technology of space and the ocean, transportation and communications, electronics and data processing. These have come in the wake of the $100 million in research and development funds spent in the United States since World War II, much of it coming directly from the taxpayer. These areas offer spectacular opportunities for small business, especially when it is recalled that even though over 90 percent of the research and development has been done by big business, 50 percent of the inventions and innovations continue to come from small business and individual inventors. Examples cited last year, by the Senator from Oregon, Mr. Morse, includes jet engines, the automatic transmission, the helicopter, the catalytic cracking of petroleum, penicillin, polio vaccine, air conditioning, the polaroid camera, FM radio, and the Xerox process.[7] Not only are these discoveries of great value to society as a whole, but they are significant to small business. This is because the large amount of brainpower and relatively low amounts of capital needed to make a start in many of these fields make them ideally suited for the small and new business enterprise.

I know that my colleagues on the Senate Small Business Committee, particularly the chairman (Mr. BIBLE) and subcommittee chairmen, Senator RANDOLPH and Senator NELSON, are as interested as I am in seeing that as many of these technical and management benefits as possible become and remain available to small business.

So if our economy is properly understood there is a great potential profit for small business as well as for the economy if the Federal Government is careful to see that the avenues to enterprise remain open.

However, even more important than the material benefits that can result, are the social, psychological, and political benefits of expanding the small business area to all elements of society, especially those who have been disadvantaged in the past.

A recent nationwide study by the Bank of America indicates that one of every 10 families in this country is involved in a small business. The survey revealed that more than one-half of the small business owners rated job satisfaction as the prime factor in their vocation, with money being mentioned first by 27 percent. The small business community has always been the vehicle for self-reliant, venturesome, and independent Americans. The few examples which I have cited above of their accomplishments, as well as the general affluence of this country, are eloquent evidence that it is worthwhile to labor to keep the advantages of the free enterprise system open to all of our citizens.

We have recently become aware of the extent of the "ownership gap" that occurs because minorities which constitute 12 percent of our population own only 3 percent of our business.[8]

In the course of trying to close the ownership gap, we have uncovered other shortcomings in institutions which are in a position to furnish financial assistance to minority business. Of the Nation's 14,000 banks, perhaps as few as 50 to 150 have any kind of program for lending to business in the intercity ghetto.[9]

The efforts to resolve the complex of problems surrounding the ownership gap is one of the highest priority items of our society.

President Nixon is to be commended for his early attention to the matter, but he should not overlook the great reservoir of experience and expertise of the specialization which the SBA has developed in the area of fostering all new and growing business including minority enterprise.

One of the pressing problems in the minority entrepreneurship field is that of management assistance. It came something of a surprise to me, to learn of the scope of SBA's efforts in this area, as summarized by the following table: [10]

Small businessmen assisted by SBA management assistance programs

[From beginning of program until 1966]

Attendance at workshops	7,500
Individual counseling	178,000
Counseling under SCORE programs	12,000
Attendance at courses and conferences	235,000
Contacts through intra-industry management programs	350,000
Publications sold or distributed in response to requests	33,000,000

Footnotes at end of article.

Since these figures are now 3 years old, the totals have undoubtedly risen since then.

In addition to these SBA strong points, some of the others have been touched upon in remarks of my colleagues, including the record of the agency in the loan programs, procurement assistance and technical assistance.

A review of these accomplishments, together with the historical record, leave little doubt in my mind that whatever the Department of Commerce may have done for small business during the last 50 years, the achievements of the SBA during the last 15 have been brilliantly effective, by comparison and otherwise.

I agree with my colleagues that a large part of the reason for this is SBA's independent status. The Agency has been dedicated solely to the well being of the small business community. It has been in daily contact with its problems and in periodic consultation with those in the executive branch and in the Congress who are concerned with small business matters.

The combination of the interaction and the focus for small business leadership has made progress possible in the past and is needed to make further progress possible in the future.

To downgrade SBA would be to downgrade the position of small business and the free enterprise system in the country. And, to diminish the horizons of small business restricts the outlet for the vision, hopes, and energies of our people. It limits their choice of a career and the other choices which follow from this decision to the extent we allow the trend toward giant corporations to remain unchecked and pass up opportunities to encourage the expansion of small business. We are allowing the balance to swing in the direction of the jobs in a big bureaucracy for all. These factors are especially important to the minorities in our country, who need the self-respect and the independence of ownership more than anyone else.

Mr. President, I hope we can convince all who are concerned with this matter that the public interest as well as the small business interest lies with an independent SBA with the full backing of the President, the Urban Affairs Council and all of the departments of the Government including the Department of Commerce. If we are unsuccessful in this attempt, we will have to consider what our future course will be in this matter.

"TO AID, COUNSEL, ASSIST, AND PROTECT THE INTERESTS OF SMALL BUSINESS CONCERNS"

Mr. PELL. Mr. President, it seems that one of the periodic seasons on the American political calendar is the "small business chill."

Because the Nation's smaller firms do not possess the economic power and influence of the giant corporations, there is a constant temptation to allow their needs to be neglected by the Federal Government. At such times, SBA loans dry up, Government procurement opportunities drift to the larger firms on an increasingly less competitive basis, clouds of doubt gather over the Small Business Administration, and a layer of frost envelops the institutions of the Federal establishments which are in a position to be helpful to beleaguered small businessmen.

I have detected the onset of the small business chill season again. When we were threatened with a similar situation 3 years ago, some of us were quite active in attempts to bring relief to the Nation's small business community. I, for one, took the Senate floor on January 27, February 18, March 2, and March 9, 1966, to speak on the future and programs of the Small Business Administration. The Small Business Administration retained its independence and its programs were strengthened by amendments to the Small Business Act in 1966 and preliminary amendments to the Small Business Investment Act in 1967 which were sponsored by the executive branch, as well as the Congress, and brought great economic and social benefits to our small business community of 5½ million firms in this country.

Unfortunately, Capitol Hill is once again feeling some icy and ill winds blowing down Pennsylvania Avenue which can have the effect of putting small business into a deep freeze.

I refer to remarks made on more than one occasion by the new Secretary of Commerce, Mr. Stans, that the Small Business Administration logically belongs somewhere inside of his department. These statements were quoted in the Wall Street Journal of March 6 and also, I understand, formed part of Mr. Stans' appearance before the National Press Club on March 5. I am among those in the Senate that respectfully disagree with the position of the Secretary of Commerce. It would be helpful, I believe, for me to restate some of my reasons in the hope that the Secretary of Commerce may change his views, or at least that if the Administration desires to proceed with this matter, it will do so with the full knowledge of the consequences.

Mr. President, Rhode Island is a small State with a business community that is predominantly small business. We have, in fact, about 26,000 firms in the State, and 94.8 percent are considered small business by the Small Business Administration.

From the time that the Small Business Administration was established as a permanent independent agency in 1953, Rhode Island small business has received over 1,000 loans totaling more than $33 million. In an area of the country which was in the process of experiencing and exodus by one of its major industries, textiles, this loan assistance was invaluable and formed a significant factor in the economy of our State. This is equally true of the procurement and management assistance which the SBA has extended to Rhode Island firms at times of need and opportunity over the last decade and a half.

Although I did not serve in Washington in the years prior to 1953, I will accept the judgment of the leaders of the Senate as summarized by the Senator from Alabama (Mr. SPARKMAN) that raises substantial doubt about whether Rhode Island business would have received such sympathetic assistance if the Small Business Administration were a small part of a large Department with many other responsibilities.

In the years since 1953 the competitive life of the marketplace has become even tougher for the small businesman. He faces heightened competition not only from established giant corporations in this country and abroad, but new conglomerate corporations which have become a disquieting factor in this country in recent years. I was most interested in the analysis made of conglomerate competition against small business by the distinguished Senator from Wisconsin (Mr. NELSON), who is chairman of the Monopoly Subcommittee of the Small Business Committee. I agree with Senator NELSON that large conglomerates, which can draw profits from several kinds of markets, can subsidize the operations of one of their affiliates against a small businessman who must operate in a much more limited way.

I would like to make it clear, however, that I am not making a blanket condemnation of all mergers. There are, indeed, some large multimarket corporations that are soundly financed, and well managed that do not indulge in forced takeovers of small businesses, nor resort to unfair competitive practices against small businesses. Nevertheless, the incidence of such unfair practices and takeovers is far too great.

There are two points that I wish to add to the Senate's consideration of this matter. The extent to which this merger trend has gone is indicated by the fact that between 1948 and 1965 the 200 largest manufacturing corporations made at least 2,692 acquisitions of companies with combined assets of $21.5 billion. This volume of resources was greater than the total of all assets held by the 150 companies ranking 51 through 200 in 1948. To put it another way, the 200 largest companies acquired assets through merger equal to 25 percent of all manufacturing assets in 1948.

It is apparent to me and should be apparent to any Administration that the merger trend that we are in, and the concentration that it is bringing, constitutes one of the greatest threats to the treasured values of individualism and business ownership in American life. These trends also have profound effects on our social structure as youth, preparing for its careers, realizes that its choices may be more and more confined to a large bureaucracy, and whether this big, highly structured organization is in the field of manufacturing, finance, education or government, it has roughly similar effects on a person's freedom of action and personality. Accordingly, it seems to me that a priority matter in the quality of American life is to strengthen small business opportunity in every way.

Another priority item in making the small business climate more congenial is improving the small businessman's access to the lifeblood of capital. Two factors are now converging to put a capital squeeze on a small business community. The first is tight money in the commercial money markets. As the chairman of the Joint Economic Committee (Senator PROXMIRE) has aptly described, interest rates across the whole spectrum of Government and business loans and investments have risen to the highest levels in 100 years. The prospects are that these interest rate levels will not subside in the near future and might possibly even rise higher.

The Washington Post recently reported Chairman William McChesney Martin, Jr., as saying that the Federal Reserve System will "keep interest rates high and credit tight for as long as necessary to wring the inflationary psychology out of the American economy." This has already begun to affect the day-to-day operations of many small companies, although some commentators are citing the moderating effect of the tax deductibility of interest charges. I would suggest that such a deduction is both minimized and delayed for small firms and should not be a justification for preserving record high interest rates which commonsense and experience confirm damage consumers and small business far more than they do large corporations which have multiple sources of credit.

The second reason for the money squeeze on small firms is that the Small Business Administration, which was created as a lender of last resort for the small businessman in such tight money situations, has been operating on what may be described as an extremely limited basis.

Mr. President, the primary purpose of the SBA is to make direct, participation or guarantee loans to small firms in times of stringency. It is well known that SBA's loan programs have not been expansive in the recent past and the details of this posture are becoming increasingly known.

Rather than making an issue of this at this time, I only make this point to demonstrate that a strong and independent Small Business Administration is needed to secure the funds necessary to sustain the establishment and growth of small business and new business firms in this country. In the governmental battles that are waged for budget funds, it is vital to our 5½ million small businessmen that the SBA have a strong voice and absolute freedom of action rather than deferring its claims, its statements, and its policies to a Department which is obliged to consider its other responsibilities.

If the small business deep freeze is not immediately dispelled, it will be the task of Congress, pursuant to its mandate in the Small Business Act of 1953 to "aid, counsel, assist, and protect, insofar as it is possible, the interests of small business concerns" to consider what steps are called for.

I would like to assure everyone in my State that I will do everything I can to be of help to the small business community in this matter.

THE SMALL BUSINESS ADMINISTRATION AND ITS PROGRAMS ARE VITAL TO THE STATE OF WEST VIRGINIA

Mr. RANDOLPH. Mr. President, it is a privilege to join in active support of the resolution for Small Business Administration independence which the Small Business Committee has transmitted to President Nixon, and which the distinguished Senator from Nevada (Mr. BIBLE) has presented to the Senate today.

The basis for the Committee's action initially was a series of articles in the American press reflecting the attitude of Secretary of Commerce Stans that the Small Business Administration logically belongs within the Department of Commerce. Then, on March 5, the President issued an executive order transfering coordination of minority business programs, including advisory councils for minority business, to the Department of Commerce.

Further information was contained in the internationally known London Economist, which the Senator from Alaska (Mr. GRAVEL) made available to the Senate. Another relevant document is the statement which President Nixon made at the signing of the Executive order. I ask unanimous consent that this statement on minority business enterprise be reprinted in the RECORD at the conclusion of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. RANDOLPH. Mr. President, it should be noted that the following comment, which went unreported in the press, is a part of President Nixon's statement:

"Recently, the Small Business Administration launched a program for the stimulation of minority group enterprise. This program has been well received, and deserves continuing support. With better coordination, a broader range of government resources and assistance can be made available."

I commend President Nixon for including this recognition of the Small Business Administration's minority enterprise program in his remarks. By all reports, SBA's "Project Own" has been successful in tripling the volume of minority loans. It has enlisted broad support from private trade associations, banks, and other elements of the private sector in providing real momentum to minority business ownership in this country. President Nixon's reference to this is important and should be part of the record.

Nevertheless, Mr. President, there are serious questions which remain unanswered.

However, many minority business enterprise programs there may be in the Government, there is little question that the Small Business Administration has been the vigorous leader in this movement. The least which President Nixon's action has done is to transfer the initiative, the coordination, and the Advisory Council function from the Small Business Administration to another agency, the Department of Commerce. The statement indicates that this was implemented "as recommended by the Urban Affairs Council."

The President is certainly entitled to seek and to adopt recommendations from any quarter. It may be that the Urban Affairs Council referred to is the same as the "Council on Urban Affairs" announced on January 23, to be composed of the Vice President, several Cabinet members and White House staff members. This announcement also described the formation of several subcommittees of the Council, including one on Minority Business Enterprise, to be chaired by Secretary of Commerce Stans. If this is in fact the Council which made the recommendation, there does not appear to be any evidence that the Small Business Administration was represented at any stage of the deliberations.

Mr. President, it is clear that the Congress is obliged to exercise its judgment in these matters, and the Congress begins with knowledge of a substantial record of accomplishment by the Small Business Administration in this as well as many other areas.

At this time, several possibilities emerge with regard to the status of SBA. Either the transfers of function under Executive Order No. 11458 are intended to be limited; or they may be the first of several transfers; or, if Mr. Stans' position is adopted, they may signal the intention of the administration to do away with the Small Business Administration entirely and relocate its functions within the Department of Commerce. Considerable confusion has been engendered over what course the new administration desires to follow in this field.

Because of this, I believe it is quite understandable that we in the Senate would react strongly. The historical record as reviewed by the Senator from Nevada (Mr. BIBLE) and the Senator from Alabama (Mr. SPARKMAN) demonstrates beyond any reasonable doubt that the small businessman is benefited more with an independent Small Business Administration, than with a program under the Department of Commerce. It would seem to me unfortunate if the administration's policy is to be a lack of support for the Small Business Administration.

In our State of West Virginia, I know that the small businessman has been well served by having an agency that he may call his own. The loan programs, particularly the community development loans, are vital for our towns and cities. The financial assistance, procurement contracting and subcontracting programs, and the possibilities of transferring some of the new technology to small businesses are vital to the future of my State.

As a member of the Procurement Subcommittee and chairman of the Subcommittee on Science and Technology of the Senate Small Business Committee, I can give specific examples of the advantages of having small business in an independent rather than a subordinate position. During the 1966 proceedings on this matter, the Senator from Rhode Island (Mr. PELL) quoted an editorial from the Washington Evening Star on March 1966, as follows:

"Sponsors of the SBA's independence fear that tucking it in some cranny of Commerce, where big business enjoys major influence, will in effect kill the agency. There is some historical justification for this view. During World War II a couple of small precursors of the SBA did an ineffective job. The Division of Contract Distribution created in 1941, and a subsequent small business unit within Commerce, were both largely paper organizations."

The figures for the SBA procurement assistance program demonstrate that this has been an effective tool in encouraging awards to smaller business firms. In fiscal year 1967, the Small Business set-aside program was responsible for $1.9 billion worth of defense contracts and $310 million worth of civilian contracts being awarded to small firms. This represented approximately 4½ percent of all procurement dollars during that year.[11] The value of this program was further demonstrated during recent years when the role of small business specialists was restricted by the Defense Department in 1966 and 1967. The ratio of set-aside to total defense procurement declined substantially, and the situation was not corrected until the joint set-aside program was revived and small business specialists were reassigned to their previous duties.

Another procurement program which has aided smaller firms in obtaining new Government contracts is the "certificate of competency" which allows a small businessman, whose low bid is rejected by the Government because of supposed shortcoming in capital or credit, to appeal to SBA for such a certificate. Since 1953 SBA has processed over 5,000 applications for COC's, and has issued more than 2,000 with a value to the small firms of approximately $429 million and savings to taxpayers of about $33½ million.[12]

Additionally, the benefits of transferring new science and technology to small businesses hold significant promise and the assistance of SBA in the initial stages of how this may be accomplished has been invaluable.

Mr. President, I am among those who doubt that all of this would take place without the special assistance, special focus, and special concern of an agency dedicated to the small businessman of this country. It is my hope that President Nixon will resolve the existing uncertainty by stating his strong and active support for an independent SBA. However, if he does not, the Members of Congress who feel keenly of responsibilities toward the small businessman, will continue to advance small business interests, with or without this support.

EXHIBIT 1

[From Weekly Compilation of Presidential Documents, Mar. 10, 1969]

MINORITY BUSINESS ENTERPRISE

(Statement by the President upon signing an Executive order providing for a national program, Mar. 5, 1969)

I have often made the point that to foster the economic status and the pride of members of our minority groups we must seek to involve them more fully in our private enterprise system. Blacks, Mexican-Americans, Puerto Ricans, Indians, and others must increasingly be encouraged to enter the field of business, both in the areas where they now live and in the larger commercial community—and not only as workers, but also as managers and owners.

Providing better job training and making more jobs available is only part of the answer.

We must also provide an expanded opportunity to participate in the free enterprise system at all levels—not only to share the economic benefits of the free enterprise system more broadly, but also to encourage pride, dignity, and a sense of independence. In order to do this, we need to remove commercial obstacles which have too often stood in the way of minority-group members—obstacles such as the unavailability of credit, insurance, and technical assistance. Involvement in business has always been a major route toward participation in the mainstream of American life. Our aim is to open that route to potentially successful persons who have not had access to it before.

Encouraging increased minority-group business activity is one of the priority aims of this administration.

The Federal Government has long been involved in various programs to support the development of new business enterprises, and to help struggling new ones become more stable. By one count, there are now 116 such programs, operated by no less than 21 different departments and agencies. These are largely uncoordinated.

Recently, the Small Business Administration launched a program for the stimulation of minority group enterprise. This program

---

Footnotes at end of article.

has been well received, and deserves continuing support. With better coordination, a broader range of Government resources and assistance can be made available.

Many private, voluntary organizations, and many major corporations, have done outstanding work in assisting the development of new business enterprises among minority groups. Often, however, their efforts have not had the Government support that they deserve.

As recommended by the *Urban Affairs Council*, I intend to establish within the Department of Commerce an Office of Minority Business Enterprise. Under the leadership of Secretary of Commerce Stans, this new office will be the focal point of the administration's efforts to assist the establishment of new minority enterprises and expansion of existing ones. It will seek to concentrate Government resources, and also to involve the business community and others in order to enlist the full range of the Nation's resources.

This new office will be headed by an Assistant to the Secretary of Commerce, and it will have the direct, personal attention of the Secretary. On its own, it will seek to develop new business opportunities. It will coordinate the efforts of other government agencies in encouraging minority enterprise. It will mobilize financial and other resources, both public and private. It will provide the centralized leadership which in the past has not been sufficiently evident. It will seek to provide a better focus of government programs at the local level, in order to give them the impact intended. It will constantly review both existing and possible new programs for the encouragement of minority business enterprise, and will make recommendations for further executive and legislative action as appropriate.

I have today issued an Executive order directing the Secretary of Commerce to coordinate Federal programs related to the strengthening of minority business enterprise, and authorizing him to take the necessary steps to do so effectively. The order also provides for the creation of an Advisory Council for Minority Business Enterprise, and for the establishment by the Secretary of Commerce of an information center for the compiling and dissemination of information on successful minority business enterprise programs.

This is not a substitute for the many other efforts that continue to be needed if we are to make headway against the ravages of poverty. It is a supplement, dealing with a special but vital part of the broader effort to bring the members of our minority groups into full participation in the American society and economy. Its success will be measured by tangible results, not by the volume of studies.

What we are doing is recognizing that in addition to the basic problems of poverty itself, there is an additional need to stimulate those enterprises that can give members of minority groups confidence that avenues of opportunity are neither closed nor limited; enterprises that will demonstrate that blacks, Mexican-Americans, and others can participate in a growing economy on the basis of equal opportunity at the top of the ladder as well as on its lower rungs.

KEEP SBA INDEPENDENT

Mr. McINTYRE. Mr. President, on February 26, 1969, I had the privilege, as chairman of the Senate Small Business Subcommittee of the Banking and Currency Committee, to question Mr. Hilary J. Sandoval, Jr., the then nominee to be Administrator of Small Business Administration, at some length. Traditionally, the subcommittee has always been quite interested in the commitment and resolve of any future SBA Administrator to "fight the good fight" for the Agency and for the American small businessman. Most of us are aware of the periodic attempts to dilute or water down SBA by placing it within the Department of Commerce or some other agency of the Federal Government.

So it was quite natural for me to discuss SBA's independence in some detail with Mr. Sandoval. On three separate occasions I raised this matter with the nominee, and each time I was unable to tell by his answers the extent of either his commitment or his resolve to protect the independence of SBA. I made my position quite clear and concluded Mr. Sandoval, being very new to Washington, was perhaps suffering from a mild case of stage fright.

You can imagine my surprise when, on March 6, just 8 days later, I read where Secretary of Commerce Stans had stated that "SBA, by definition, ought to be part of the Commerce Department." [23]

It then began to appear as though a move was underway again within the executive branch to strip SBA of its status as an independent Federal agency and place it within the Department of Commerce. Printed and other reports continue to bear this out.

Mr. President, this body well knows how I feel about an SBA-Department of Commerce merger. Along with Senator SPARKMAN, Senator SMATHERS, and Senator BIBLE, I assisted in our successful effort in 1965 to prevent such a merger. It was not wise to weaken SBA then. It is even less wise now.

SBA is a small agency, as Federal agencies go. But I consider this smallness as one of its best assets. This is the key to SBA's effectiveness. If some larger, cumbersome agency were to swallow up SBA, as is now being discussed, SBA's effectiveness and capabilities would be muted, if not strangled and destroyed. It could no longer remain a viable agency, responsive to the needs of the American small businessman.

Mr. President, SBA today serves as the spokesman for over 5 million small businesses which employ over 40 million people. Small business contributes 33⅓ percent to our annual gross national product of over $808 billion.

Small business, then, is small only in terms of store size and number of employees. But it is not small in the impact it has on our economy and on our free enterprise system.

Small business requires and deserves the same services and the same recognition on an equal basis with other important interest groups operating within our economy. SBA, at the executive level of Government, is the only strong and effective advocate for small business.

In 1953, Congress created SBA as an independent agency of the Federal Government. SBA was designed to serve the small businessman as a one-stop shop center, an agency where he could receive assistance of a personal, responsive nature, free from big business influence. Over the years, SBA has proved to be a very effective spokesman for small business. SBA's record is quite good.

During the first decade and a half since the creation of SBA, that agency made over 85,000 regular business loans to small concerns. The total dollar volume of these loans was over $4 billion.

During this same period, over $19 billion in Federal procurement awards were set aside for small businesses.

Since 1953, SBA has distributed over 41 million management publications and conducted over 10,000 management assistance courses.

This fine record exemplifies one word: "service."

Mr. President, I submit that any departure from complete independence for SBA will damage irreparably this service and may cause distress and difficulty in the overall economy.

Certainly, SBA needs to remain independent now more than ever before—during this period of corporate giantism, conglomerate mergers, high interest rates, and fiscal stress—all resulting in a shift of credit availability from small business to big business.

I told Mr. Sandoval on February 23, and I quote:

"If somebody starts pushing you around . . . , you have a lot of friends up here on the hill . . . , you get on the telephone or come running up here."

That states my position quite clearly. I think Mr. Sandoval got the message, which is that this is no time to down-grade SBA by making it subordinate to any other agency or department. This is no partisan matter. I sincerely believe that the vast majority of the Members of both Houses of Congress support the full independence of the Small Business Administration.

SBA'S INDEPENDENCE AGAIN THREATENED

Mr. SPARKMAN. Mr. President, I rise in behalf of the Small Business Administration and the American small businessman. That agency's independence once again is being threatened. Printed and other recent reports indicate a movement is apparently underway within the executive branch which would strip SBA of its statutory independence as the Nation's spokesman for the small businessman at the Federal level. SBA, for at least the third time since 1965, is facing absorption within another agency of the Federal Government, most likely the Department of Commerce. For instance, on March 6, 1969, the Secretary of Commerce said SBA "by definition" ought to be part of the Commerce Department.[24]

SBA was created as an independent agency in 1953 during the Eisenhower-Nixon administration. The Small Business Investment Act of 1958 was passed during the second Eisenhower-Nixon administration. Both of these legislative landmarks recognized the real, urgent need of the American small businessman to enjoy direct, responsive, and realistic representation in Washington. Under the Small Business Act of 1953, the Administrator of SBA reports directly to the President of the United States. Mr. President, I submit there is no better representation than that.

I further submit that, if SBA's independence is watered down, the result will be diminished activity in the small business sector which will be felt throughout the land.

Mr. President, the small business community is 5½ million small firms. These businesses contribute nearly 40 percent of our gross national product of $800 billion annually. They provide employment for 40 million people and support for the families of these small business-owners. Should we deny this bulwark of our free enterprise system independent representation at the Federal level?

If we do, then we apparently believe that the problems and needs of the small, independent businessman are just the same as the problems and needs of General Motors or any other American corporate giant.

Mr. President, commonsense tells us that this line of reasoning just is not so. President Nixon's father was a small businessman. He owned and operated a small service station and grocery store in Whittier, Calif. I seriously doubt if he regarded himself "in the same boat" with any of our better known corporate giants. And neither does any other small shopowner or storekeeper.

During the decade and a half since SBA was created as an independent agency, SBA has served the small entrepreneur well. Some 85,000 small firms have borrowed over $4 billion; small communities have received nearly one-half billion dollars in local development company loans, which, in turn, have created, or saved, 94,850 jobs; and small business in-

Footnotes at end of article.

vestment companies have made approximately 30,000 loans totaling about $1.4 billion.

These figures clearly show the extent to which SBA has served the small business community, the free enterprise system, and the Nation.

Mr. President, while I am quite proud of the fine job done by SBA over the years, it can do an even better job for the country's small businessman in the years immediately ahead. SBA has perhaps the best economic development tools of any agency of the Federal Government. These are proven "working tools," not "pie-in-the-sky" theories. These tools have been honed to a keen edge of effectiveness.

To put it in the vernacular of many of today's young people, SBA has been "doing its own thing," and I might add, it continues to do it very well.

Now is not the time for us to tamper with a proven program. High interest rates, shortage of funds and other fiscal uncertainties are the benchmarks of today's business world. It is therefore urgent and very necessary that SBA remain an independent spokesman for the small businessman during these difficult times.

Recently, Senator ALAN BIBLE, the very able and alert chairman of the Senate Small Business Committee, circulated a committee resolution expressing strong support for the continued independence of SBA. As ranking Democrat on the Small Business Committee, I was pleased to place my signature just below Senator BIBLE'S. This marks the second time in 3 years I have signed such a resolution and at least the third time in 3 years that I have taken the Senate floor to discuss this matter.

Mr. President, at this point I ask unanimous consent that my remarks of February 4, 1966, be reprinted in the RECORD at the conclusion of this statement. My remarks were appropriate then, and they are even more so now.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SPARKMAN. I do not feel that it is necessary for me to belabor this point. The record is quite clear. There exists a great deal of opposition in both Houses of Congress to any plan or proposal which jeopardizes the independent status of SBA. I hope my colleagues on both sides of the aisle will study this issue carefully and will not be easily led into a course of action that is clearly detrimental to the future success of the American small businessman.

EXHIBIT 1

[From the CONGRESSIONAL RECORD, Senate, Feb. 4, 1966]

THE RUMORED PROPOSAL THAT THE SMALL BUSINESS ADMINISTRATION BE PLACED WITHIN THE DEPARTMENT OF COMMERCE

Mr. SPARKMAN. Mr. President, there was an article in this morning's Washington Post by Jerry Kluttz saying that the administration has under active consideration a recommendation that the Small Business Administration be stripped of its independent status and placed within the Department of Commerce. Rumors that such a move might be in the making have persisted for several weeks.

Mr. President, I have been concerned about these rumors, and now that they are being reported publicly in the news media, my concern has deepened to the extent that I feel it necessary, as chairman of the Senate Small Business Committee, as a member of the Small Business Subcommittee of the Banking and Currency Committee, and as one who has, down through the years, taken an active interest in matters affecting the 4½ million small businesses of America, that I speak out on this subject.

Mr. President, I would be amazed if serious consideration is given to allowing the Department of Commerce to absorb the Small Business Administration. When this agency was first created there was considerable debate in the Congress on this very question. The matter arose in the form of a conference report submitted to the Senate. The legislation provided for the creation of the Small Business Administration, to be governed by a board comprised of the Secretary of the Treasury, as Chairman, and the Secretary of Commerce and the Administrator of the Small Business Administration as members. During the debate on this conference report, those in the Senate who were sensitive to the needs of the Nation's small businesses and who were sympathetic to meeting those needs, spoke out on this subject.

Among those who stood up for a Small Business Administration independent of the policies and influence of other departments of the executive branch of the Government was the then senior Senator from Texas, now President of the United States, Lyndon B. Johnson. President Johnson had long been a champion of the small business firms of this country and, during that debate, the President said:

"This bill would place the Small Business activities of the Government under two major Departments—Treasury and Commerce, and yet, practically all of us subscribe to the principle that a small business agency cannot be effective unless it is independent."

Another distinguished Member of this body, who later served as a member of the Senate Small Business Committee, was the late President John F. Kennedy, then junior Senator from the State of Massachusetts. President Kennedy said:

"The Small Business Administration which is proposed by the pending legislation is deficient in several respects. If such an agency is to be of real help to small business in providing technical assistance, long-term capital, and procurement opportunities, all of which are of primary importance in expanding the economies of New England and the United States, the following defects must be corrected:

"First, such agency must be truly independent and not subject to the veto power of the Commerce and Treasury Departments. Experience has shown that such independence is necessary to give small business an effective voice in the Government."

Another recognized champion of small business, who served as a member of the Senate Small Business Committee from June 1, 1950, until December 29, 1964, and who was serving as chairman of its Retailing, Distribution, and Marketing Practices Subcommittee at the time of his election to the high office of Vice President of the United States, and who now serves in that office, was Vice President Hubert H. Humphrey. Senator Humphrey said:

"I say we are not going to have the friendship of small business if we allow the Secretary of Commerce and the Secretary of the Treasury to have too much to say about the definite standards to be set with respect to small business, because I do not believe either one of them is particularly noteworthy as a champion of small business enterprise. That is not their record. They have competence in other fields, but not in this one.

"I am delighted the committee has come forward with a bill that gives the Administrator of the Small Business Administration powers unto himself, that makes him the chairman of the loan policy board, and that restricts the activities of the Secretary of the Treasury and the Secretary of Commerce to being advisers. Let the record be clear. An adviser does not mean a proprietor. The Administrator can take advice, or he can reject it. The advisory board is exactly what its name implies. It is to advise.

"I suggest that Congress keep a very careful, watchful eye upon how the advisers act. I think we shall have an opportunity to see whether the activities of the Small Business Administration will be in the spirit of truly helping small, competitive business enterprise."

The senior Senator from Massachusetts, Senator Saltonstall, who serves now as the ranking minority member of the Senate Small Business Committee, also spoke out on this subject. Senator Saltonstall said:

"The Small Business Administration provided for by S. 1523 would be a completed independent agency. This, in the opinion of the many Massachusetts businessmen who have written to me on the subject, is a very important feature. A small business agency should have as its primary responsibility the assistance of small business. The experience of the last 10 years has made that inescapably clear. I am glad, therefore, that the Senate Committee on Banking and Currency has corrected the feature of the Hill bill which was recently before us and which would have made the head of the Small Business Administration subject to the direction and control of the Secretary of the Treasury and the Secretary of Commerce. The present bill wisely confines their advisory functions to the field of loan policy."

Mr. President, I had the privilege of participating in that debate and I said this at that time:

"The second difference between the Senate bill and the House-approved bill relates to the advisory board. It will be recalled that when the conference report on the defense production bill was before the Senate, many Senators objected to the provision relating to the advisory board, on the ground that it became not simply an advisory board, but actually a governing board. Instead of the governing authority being in the Administrator, the authority was vested in a board, of which the Administrator was not even the chairman; the Secretary of the Treasury was the chairman.

"In the pending bill, as has been so well explained today by the chairman of the Committee on Banking and Currency, the board is advisory, the Administrator is chairman, and it is not intended in any way that the board shall administer the business of the agency or shall govern the agency itself. I believe those two changes are significant and material, and make the Senate bill a decided improvement over the House bill."

Mr. President, I feel just as strongly today as I felt then that the Small Business Administration can operate effectively in the interest of the Nation's small business firms only as an independent agency of Government.

Those who have been charged with the responsibility of serving as Administrator of the Small Business Administration have likewise recognized the need of independent status for the agency. Of course, John Horne, who served as Administrator from 1961 until 1963 was serving as my administrative assistant at the time the SBA was created as an independent agency. He actively assisted me in the debate which led to the creation of the agency and the establishment of its independent status. The fact is that John Horne's position on the question of independence for the SBA was so well-known that I have been unable to recall, that, during his tenure as Administrator he was ever questioned on the subject. Had he been, however, I know what he would have said because I know that he believed in the independence of the agency as strongly as any person in Government. When John Horne was moved to the Home Loan Bank Board in 1963, President Kennedy nominated Mr. Eugene P. Foley to replace him as Administrator.

At the time of his nomination, Mr. Foley was serving as deputy to the Secretary of Commerce, and since the question of the independence of the agency versus placing it under Commerce had been of such concern to the Congress originally, it was only natural

that the Congress would inquire into his views of this matter. It was my privilege to make that inquiry during the course of the confirmation hearings before the Banking and Currency Committee on July 30, 1963. I said to Mr. Foley at that time:

"There was discussion originally and there were proposals that the Small Business Administration * * * be a part of the Department of Commerce. One of the fights we had in setting up the Small Business Administration was whether or not it should be an independent agency * * * This was a plan that was worked out by this committee and a plan which I think has functioned quite well."

I then asked Mr. Foley, "You subscribe to this idea, don't you, of an independent agency?" His reply was, "I do wholeheartedly, Senator. I assure you that as far as it is within my power there will be no change. I don't expect a change."

Mr. President, in view of the history of this controversy, the highlights of which I have tried to recite above, I just cannot believe that the report which appeared in the Washington Post this morning is accurate in saying that a proposal to place the Small Business Administration within the Department of Commerce is being seriously considered by the administration. I certainly hope that it is not accurate, because I do not believe that this controversy should again be a subject of lengthy debate before the Congress.

THE SMALL BUSINESS ADMINISTRATION SHOULD REMAIN INDEPENDENT

Mr. GRAVEL. Mr. President, as chairman of the Joint Economic Committee, I would like to add my comments on the resolution submitted today by the distinguished chairman of the Senate Small Business Committee, Senator BIBLE.

This resolution, in my opinion, was justified by the reports which have circulated not only in our national press, to which the Senator has referred, but in some international journals as well. For example, the London Economist of March 1, 1969, reports on certain statements by the Secretary of Commerce and others in the Nixon administration which, in the opinion of the reporter, "would impinge directly on SBA's Project Own." For the information of those concerned, I ask unanimous consent that the brief article be printed following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GRAVEL. Mr. President, there are some opinions in this article which I would not share. The record is clear, for instance, that the Select Committee on Small Business of the Senate, under a distinguished series of chairmen—Senators SPARKMAN, SMATHERS, and BIBLE—has been in the forefront of every small business matter, and that this body has done so out of an abundance of concern for advancing the interests of all of the Nation's small businessmen. It would be accurate, I believe, to say that the combined efforts of the Senate and House were successful in preventing SBA programs from "disappearing into the maw of another Government agency" in recent years.

Mr. President, the State of Alaska has for many years, been represented on the Small Business Committee. I am proud to follow in the footsteps of Senator E. L. "Bob" Bartlett in this regard. During my career it has been brought home to me forcibly that the desire among Americans to own their own businesses is very deep and very widespread. The surveys available in 1964 indicated that fully half of all American wage earners either attempt to go into business for themselves or intend to do some time during their lives.[15]

Senator BIBLE has described how the SBA has turned this dream into a reality for 200,000 small businessmen. The Economist article points out how the SBA has been extending this effort to minority groups with the so-called Project Own. The article states that SBA loans and guarantees to aspiring minority businessmen for the last quarter of 1968 rose to more than $31 million, more than triple the amount granted in the same months of 1967. According to official Government estimates, the loan approvals under this program are to rise from $32 million in 1968 to $306 million in fiscal year 1970, an increase of 856 percent.[16]

Said the Economist:

"Significantly some three-fifths of all these (1958) loans were made by private lending institutions with guarantees up to 90 percent from the SBA (allowing) the SBA to increase its activity among Negroes and other racial minorities without running up against the budgetary ceilings on its lending and spending powers."

Thus, it seems to me that SBA has been a notable success, not only in its recent attempts to foster minority business ownership, but in its historic venture of assisting all small businessmen in our cities and countryside to survive and expand, and consequently to provide a growth factor in the economy.

My information is that small business accounts for 40 percent of the gross national product and about 50 percent of all the jobs in the United States. It is thus a major factor throughout the country, and especially in my State. The record of the Small Business Administration in Alaska has been exemplary. Within hours of the Good Friday, 1964, disaster, SBA had a team of personnel en route to Alaska, and within 6 months 490 business disaster loans and 455 home disaster loans had been granted. As Senator Bartlett said last year.

"Thanks in no small measure to this help, Alaska now has a healthy and expanding economy."[17]

As the Senator from Wisconsin (Mr. NELSON) has pointed out, small business has also been a surprisingly potent force in innovation and competition in the United States during recent years, even in the teeth of the growth that we have seen in giant corporate business. This competition and innovative play a direct role in furnishing alternative and substitute products and services, and thus tending to keep price levels down and exercising a restraint on inflation—a function which the traditional free market can perform with great benefits to all.

Mr. President, I hardly need to point out that inflation remains one of our most urgent concerns. During the last 6 months the prime interest rate has risen from 6¼ to 7½ percent and the Federal Reserve discount rate from 5¼ to 5½ percent. Other market rates have escalated proportionately, bringing interest rates to their highest levels in 100 years.

These credit pressures, of course, tend to fall most heavily upon small businessmen.[18]

It therefore seems to me that what we need is to have more support, more assistance, and more funds for the Small Business Administration. The independence of this agency has demonstrated its worth over the last 16 years and its programs, including Project Own, have proven their worth. A transfer of functions, and a consequent undermining or destruction of the Small Business Administration, in my opinion would constitute a definite step backward. I am therefore glad to join in expressing my support of the resolution presented by the Senator from Nevada (Mr. BIBLE) and restating my support for SBA programs of assistance to American small businessmen.

Footnotes at end of article.

EXHIBIT 1

WHOSE BLACK CAPITALISM?

WASHINGTON, D.C.—After a patronage struggle between Senators Dirksen and Tower, President Nixon has at last decided in favour of the latter's candidate to head the Small Business Administration. He is Mr. Hilary J. Sandoval, a businessman of Mexican descent, a political figure in his home country of west Texas but little known in Washington. "We do not yet know," confessed an SBA spokesman, "how to pronounce his name."

Mr. Sandoval is walking into the centre of a debate inside the Nixon Administration over how to implement the President's campaign to promote "black capitalism." In his half-year at the SBA, the outgoing Democratic administrator, Mr. Howard Samuels, bade fair to transform it into an agency for such capitalism, with an effort which he called Project Own. SBA loans or guarantees of $31 million given to aspiring black businessmen between September and December last year were more than triple the amount granted in the same months of 1967. Significantly some three-fifths of all these loans were made by private lending institutions with guarantees of up to 90 per cent from the SBA; this allowed the SBA to increase its activity among Negroes and other racial minorities without running up against the budgetary ceilings on its lending and spending powers.

By October Mr. Samuels was in trouble. Following hearings that month the conservative Select Committee on Small Business of the House of Representatives warned him that "discrimination (in favour of minority groups) in the business loan programme cannot be permitted." Had Mr. Samuels retained his job, says one member of the committee, "we would have caught up with him by March." The SBA, according to congressional critics, was created under President Eisenhower not as a welfare agency but to foster a tenet of white America: that the little local businessman should prosper. In December the incoming Secretary of Commerce, Mr. Maurice Stans, laid claim all but openly to Project Own's activities when he said that "one of the first decisions" for him would be whether to absorb some of the SBA's activities into the Department of Commerce. Early in February the President told the department's employees that they would be given new responsibilities to provide "all people" with a chance "to become owners and managers in this great private enterprise system of ours."

Debate in the Administration has not stopped there. When the President wrote to Congress last week about the future of the Office of Economic Opportunity one sentence in the message read:

"It is also my intent that the vital Community Action Programmes (CAPs) will be pressed forward, and that in the area of economic development OEO will have an important role to play, in co-operation with other agencies, in fostering community-based business development."

The idea now, according to one member of the Administration, is "to convert CAPs to capitalism."

This would impinge directly on the SBA's Project Own. So also would the idea of a national Community Development Bank being put forward vigorously by Mr. James Farmer, the Negro leader from New York, who is shortly to join as an Assistant Secretary yet another, more muscular arm of the administration, the Department of Health, Education and Welfare. Such a bank would lend or guarantee loans to local development banks and businesses, just as SBA has been doing. Meanwhile the House Small Business Committee is preparing to fight (as it did most successfully under President Johnson)

to prevent any SBA programme disappearing into the maw of another government agency; in this case the programme in question is disliked by the committee which, for this very reason, wants to keep it under its thumb.

A decision on how to deal with black capitalism is promised by the White House in "weeks rather than months." The President's Counsellor, Mr. Arthur Burns, who is presiding over the whole uncomfortable debate, believes in devolving the project as much as possible on to private business through tax and other incentives. But he has to make peace among the departmental warriors who are determined to corral Mr. Nixon's social solutions into their own empires.

SOME SUGGESTIONS REGARDING THE SMALL BUSINESS ADMINISTRATION

Mr. LONG. Mr. President, it has come to my attention that the administration of President Nixon is in the process of making up its mind about the status of the Small Business Administration.

As an indication of the concern that any action affecting SBA's independence would bring in the Senate is the resolution presented today by the chairman of the Small Business Committee (Mr. BIBLE).

This, however, is only a preliminary indication of what would surely be a wider and deeper concern that would follow an attempt to put the SBA in a subordinate position inside the Department of Commerce or any other Department.

When the Select Committee on Small Business was established in the Senate in 1950, I was appointed as one of its original members, along with the Senator from Alabama (Mr. SPARKMAN) and the Senator from Minnesota, Vice President Humphrey. I have thus participated in the deliberations of the last 18 years, including those surrounding the enactment of the Small Business Act of 1953 and the Small Business Investment Act of 1958. I have witnessed the steady growth of small business institutions in this country, which Senator BIBLE has described. As a member and then chairman of the Committee on Finance, I have had further opportunities to consider many tax bills affecting small business and free enterprise and to make some contribution to the advancement of both through the Small Business Tax Amendments Act of 1958, the Revenue Reduction Act of 1964, and other small business tax legislation. During the 89th Congress, as assistant majority leader, I was involved when the Johnson administration carefully considered and then rejected the possibility of changing the stauts of the SBA.

It may be, therefore, that my observations would add something to the present discussion of this matter.

As I recall, the formality of Federal assistance to small business began in 1941 when a "Small Business Unit" was established in the Bureau of Foreign and Domestic Commerce of the U.S. Commerce Department and directed to study problems encountered by smaller firms because of their size and to plan a program of assistance. During the ensuing years of World War II, several of the ideas developed by the Commerce Department Unit were absorbed into the Smaller War Plants Corporation, which was created as a part of the War Production Board on June 11, 1942, to broaden small business participation in military procurement. The scope of these efforts was, of course, restricted to manufacturing and to defense work, until the SWPC was abolished by Executive order as of January 1946.[18a] In the early years of the Korean war, the small business functions were first made a part of the National Production Authority[19] and then, by unanimous congressional action, conferred upon the Defense Plants Administration in 1951.[20]

Footnotes at end of article.

Then in 1953 the Small Business Administration was established as the first inaepenaent agency of the Government specifically charged with the responsibility of fostering the interests of all of the small business community. So, it was not until the Small Business Act of 1953 and the Small Business Investment and Tax Acts of 1958 that small business institutions in this country reached the takeoff point.

I do not believe that anyone would seriously contend that small businesses do not have unique problems because of their size. President Eisenhower, who had a good record on small business, recognized this fact on several occasions with active efforts to identify these problems and attempts to resolve them. For instance, in setting up a Cabinet Committee on Small Business in May of 1956 the President stated, as part of his mandate:

"(T)he conditions of our modern economy are such that many small concerns confront substantial hindrances to their growth. It is my wish that the Federal Government keep fully abreast of developments that affect small business . . . To that end I am establishing (the said committee)."

In the first progress report of August 7, 1956, the Cabinet Committee made 14 recommendations for the betterment of small business conditions, many of which have since been enacted, including No. 8 which called for the continuation of the Small Business Administration as a permanent and independent agency of the Government.

Another example is that Small Business Administrator Wendell Barnes, writing in the winter of 1959, about the Small Business Investment Act of 1958, stated:

"This legislation is designed to fill a gap in small business financing. Equity capital and long-term loans for growth and development purposes have never been readily available to small business. Commercial banks furnish short and intermediate-term loans, but not venture capital and long-term credit. Existing institutions which could provide venture capital are not able to assist smaller firms, since the cost for public sale of securities is disproportionately high to small business issuers.

"The Small Business Administration, under its regular lending program, can assist small business concerns with intermediate-term loans, but cannot provide the long-term funds needed for growth and development. As a result, there has been no institutional source to which small business could turn to meet its capital needs. It is this so-called institutional gap which the Small Business Investment Act of 1958 is designed to fill."[21]

It seems to me that every administration over the years has recognized that small business has these special problems, and that it is especially vulnerable to economic reverses during periods of recession and tight money, and that small companies take longer to recover from the reverses than large national corporations.

One of the notable features of this history is the seeming absence of any outstanding accomplishments, or even decisive initiatives in behalf of small business by the Department of Commerce. After 1941, when the President or the Congress wished to move ahead in this field, they turned to special agencies, the White House Committee and, ultimately, as the SBA gained in stature, to that agency. The measure of stature which this little agency has attained was well summarized on the occasion of its 15th anniversary last year by several Members of this body.[22]

It is my feeling that SBA's greatest achievement has been to bring the Federal Government closer to many of the people of this country. I know that this has been the case in my own State of Louisiana. An outstanding example followed hurricane Betsy, when the SBA mobilized its resources and concentrated them throughout the State to deal with the widespread needs for loans to rebuild the damaged businesses and homes. I have been at numerous conferences on procurement contracting and subcontracting opportunities, or lease guarantees, on management assistance, and other programs developed by the Small Business Administration. These, as well as the funds from the loan programs, have brought countless small businesses of my State into the economic mainstream of this country. The assistance of SBA has been the difference, in many business situations, between success and failure, between ownership and going to work for another man.

These individual and aggregate accomplishments of SBA are not just a matter of the quantity of activity; they are matters of its quality—the willingness of the local and national representatives of SBA to extend their resources, their time, and their best thoughts for the benefit of the little businessman. These commitments do not arise out of organizational charts or logical syllogisms. They are intangibles, like self-respect or job satisfaction or independence. These intangible values are deep in the bones of the people of Louisiana and of this country.

The livelihood of one family out of 10 depends upon the welfare of a small business. As the Senator from Alaska (Mr. GRAVEL) has pointed out, about half of our working people would like to be in business for themselves if they could find a way to do so.

Over the years we have found a way for more than 200,000 of these people to make that American dream into a reality. They have come to the SBA as an agency which they feel can help them realize these goals. The business community of this country has come to think of the SBA as their agency. They feel that its independence strengthens their independence, and they are right.

To diminish the SBA in stature by making it a small part of any large department would, in my judgment, not only be a symbolic but an actual downgrading of small business values within the Government and throughout the country. An independent Small Business Administrator can talk with the President of the United States about small business needs. He can, and often does, testify before the Congress. He can devote his full time and energy and that of his staff and organization on what is best for the small businessman.

If SBA is made a part of the Department of Commerce, the Small Business Administrator can do only what the Secretary of Commerce tells him he can do, after waiting around to hear from the Secretary about whether he can do it or not.

I do not say this as any reflection upon the present Secretary of Commerce, Mr. Stans, or upon any previous Secretary. It is just naturally a part of the character of bureaucracy.

Mr. President, I have been disturbed by the statements of some people within the administration who do not seem to be familiar with our experience in these matters.

I have become concerned over actions transferring the coordination of certain programs, and the advisory councils on these minority business enterprise problems, from the SBA to the Department of Commerce. I cannot help but note that the council, and the subcommittee set up to deal with urban problems and minority business enterprise problems, does not include the Office of the Small Business Administrator. I believe that it would be in the public interest, as well as in the interest of the 5½ million small businessmen in this country, for those who are in control of the executive branch to do some further thinking about these problems.

In addition, I might suggest that there

be some visible encouragement to the Small Business Administration to carry forward its excellent record of achievement, to provide it with adequate funds for its programs, and to give it its rightful place in the councils of government. By taking steps in this direction, the new administration can assure that SBA can continue in the work that it has pioneered, and has done so well.

Mr. President, I hope that these recommendations may be of some value, and that this matter can be worked out rather than fought out. As in the past, the junior Senator from Louisiana is ready to follow either course where the interests of the small business community of my State and Nation are involved.

SMALL BUSINESS CAUGHT IN TRIPLE CREDIT SQUEEZE—ADMINISTRATION SHOULD RELEASE $170 MILLION IN SBA LOAN AUTHORITY NOW

Mr. BIBLE. Mr. President, I invite the attention of the Senate to the credit problems of small business firms, which are becoming increasingly acute.

Earlier this month, the Select Committee on Small Business, on which I serve as chairman, concluded preliminary hearings on the legislative oversight of the Small Business Administration.

Evidence developed in the course of this inquiry indicates that the executive branch has reduced the business loan program of the Small Business Administration by 58.48 percent for fiscal year 1969. In other words, for the 12 months ending on June 30 of this year, the White House has allowed SBA to loan only about two-fifths of the sums budgeted and approved by both Houses of Congress for this period. The amounts withheld are in three categories as follows:

SBA BUSINESS LOANS

[In millions of dollars]

Fiscal year 1969	Direct loan program	Immediate participation loans (SBA share)	Small business investment company program
Loan authorization approved by Congress	77	184.0	30.0
Loan authorization committed	18	94.1	8.7
Loan authority remaining on June 20, 1969	59	89.9	21.3
Total			170.2

The officials of the SBA testifying at our hearings agreed that if this remaining $170 million of loan authority is not released by the end of the fiscal year, it will lapse and therefore become permanently unavailable for any assistance to the 5½ million small business firms of this country.

In an effort to restore this loan money, I have, on behalf of the Small Business Committee, forwarded to the White House a letter urging the President and the Bureau of the Budget to take all steps necessary to assure that this loan authority is carried forward on the books for a period adequate to actually make it available to small business borrowers through the approval and disbursement of the loans attributable to this authority.

The urgent need for such action can be demonstrated by a brief review of what is happening in the private money markets.

STRINGENCY IN PRIVATE CREDIT MARKETS

As the Members of this body are aware, the prime bank interest rate has risen five times in the past 7 months, in the following sequence:

Increase in prime interest rate, December 1968 to date

	Percent
On Dec. 2, 1968, from 6.25 percent (6.0 percent for some banks), to	6.5
On Dec. 18, 1968, to	6.75
On Jan. 7, 1969, to	7.0
On Mar. 17, 1969, to	7.5
On June 10, 1969, to	8.5

The March increase to a then record high, in the words of one reporter: "received the silent approbation of Government officials who had warned Americans not to expect any relief soon from the highest interest rates in history in light of today's overheated economy." [1]

There followed, 2½ months later, the most recent and unprecedented jump to 8½ percent. To realize how unusual this full point increase was, it must be remembered that of the 33 changes in the prime rate since World War II, all of the shifts from 1945 to 1955 were of one-fourth point. After 1956 there were nine changes of one-half point. The June 10, 1969, rise has been the only change as large as 1 percent ever made in the prime rate, either up or down.[2]

Of course, other money market instruments have followed suit—and continue to escalate along with bank rates of interest.[3]

In the real world of finance, it is recognized that this prime rate states the basic cost of money to national corporations with the finest credit ratings. It thus tells only part of the story.

A factor not reflected is the "compensating balance." These are funds which borrowers are informally required to maintain on deposit in noninterest paying accounts at the lender's bank. The level of compensating balances is now about 20 percent, meaning that "the best corporate customers are paying an effective rate—of interest—of 10.6 percent." [4]

Another consideration is that relatively few loan applications are granted the "prime rate." Every month the Federal Reserve System publishes a tabulation of the interest rates on various sizes of loans. The most recent table, covering February 1969 when the prime rate was 7 percent, demonstrates that it is the big borrowers who get the premium rates, while small businesses must accept interest rates scaled up to 1½ points above the prime:

BANK RATES ON SHORT-TERM BUSINESS LOANS, FEBRUARY 1969

[Percentage distribution of dollar amounts]

Interest rate (percent per annum)	Size of loan				
	$1,000 to $9,000	$10,000 to $99,000	$100,000 to $499,000	$500,000 to $1,000,000	$1,000,000 and over
7 or less	16.3	18.9	28.4	38.1	59.2
7.01 to 7.49	13.6	13.1	24.8	33.2	24.6
7.5 to 7.99	30.8	36.1	25.1	15.8	10.7
8 to 8.49	26.8	19.6	13.6	8.8	3.9
8.5 and over	12.3	12.3	8.3	4.0	1.6
Total	[1] 100.0	100.0	[1] 100.0	[1] 100.0	100.0

Source: Federal Reserve Bulletin, May 1969, table A31.

Not only are the large corporations favored with lower interest rates, but they can and, as the Wall Street Journal points out, have taken other self-protective measures.

"But for large segments of the economy, especially big corporations and financial institutions other than commercial banks, the credit squeeze is less painful than in 1966 . . . major national companies have thus far managed to insulate themselves in large degree against credit restraint. They are bidding aggressively for funds in the commercial paper market, in which they offer unsecured corporate promissory notes for short-term funds at high interest rates. In addition, following the 1966 crunch, the companies rushed to establish firm loan commitments with their banks, refunded short-term debt into long and accumulated assets that could quickly be turned into cash. These preparations have paid off in recent months." [5]

The Journal believed these factors explain "the easily overlooked fact that broad Government policies of stringent credit restraint hit various kinds of borrowers unevenly" and specifically weigh most heavily upon small businesses, governmental borrowers, and the housing industry—which is also predominantly composed of small firms.

With this background in the private sector, a massive cutback of 58½ percent in the public credit program of the SBA—which is intended to be the lender of last resort—puts the small business community between the jaws of a vise, crushing it from two directions.

The full impact of these forces, we fear, is immediately ahead.

Financial statistics show that the ratio of loans to bank deposits, a commonly accepted measure of credit pressures, stood at 71 percent in May 1969, significantly higher than during the tightest period of the 1966 credit shortage. Because of a new method in calculating required reserves at the end of the month, commercial banks have postponed the effect of tax borrowings and other recent credit demands until the end of this month so that "their problem is still ahead." [6]

Reports emanating from the International Monetary Conference of the American Bankers Association were that we may see still another increase in interest rates in the near future.[7]

INVESTMENT TAX CREDIT IN JEOPARDY

However, there is a third element on the horizon, the administration's proposal to repeal the investment tax credit. The Secretary of the Treasury and other administration witnesses have refused to consider a continuation of the credit for small business firms.

On May 20, a statement was presented to the Ways and Means Committee of the House of Representatives on behalf of myself, as chairman, and the Senator from New York (Mr. JAVITS), as ranking minority member of the Small Business Committee. We urged the committee to retain the investment tax credit for small business firms and farmers up to $25,000 in investment, with a cutoff at $1 million in income, so that large firms would not gain a windfall from a measure intended as relief for small business.

We pointed out the particular advantages of the tax credit to small and dynamic companies, which have the greatest needs for growth capital, and the entire free enterprise system which would flow from continuing the credit for small firms only. We also emphasized that there would be a "substantial revenue gain" from the adoption of our proposal, probably over $3 billion. This is so because truly small firms account for a very minor share of existing investment tax credits and not as high as is being claimed by some Treasury Department spokesmen.

On June 12, the Senator from Alabama (Mr. SPARKMAN) expressed his judgment that the investment tax credit should be retained at the $150,000 level of investment for balance of payments, among other compelling reasons. I was impressed by the Senator's historical research on the subject. It reminds us that the Treasury Department, in 1961, after considering a wide variety of tax devices for bringing us abreast of foreign governments in the tax field, chose the investment tax credit, "primarily because it increases the profitability of investment far more per dollar of revenue cost than any of the other alternatives." [8]

I hope that the House, the Committee on Finance, and the Senate, will consider these contentions as the current surtax legislation moves through the Congress.

THESE THREE FORCES ARE CONVERGING ON SMALL FIRMS

In the meantime, the prospects are that a combination of the three forces I have described: that is, record interest rates and intensifying stringency in the private money markets: the cutback of 58½ percent in the public SBA lending programs; and the proposed elimination of the investment tax credit for small business, will create intolerable financial pressures on smaller and independent businesses.

Under these circumstances, small firms which would ordinarily survive will go out of business. Others that would have been successful will be less so, or will experience reverses that may take years to overcome. Others which may escape setbacks will be denied their fair share of economic expansion. The system of free enterprise itself—ease of entry, competition, and growth of firms supplying new products and services—will be impaired. Opportunities for men of imagination and enterprise will be limited.

Mr. President, as one commentator has said, "money markets are reeling under the cumulative pressure of a tight-money policy that keeps squeezing, squeezing, squeezing." [9]

In my judgment, it is primarily small business that is getting caught in this triple squeeze. It seems apparent that the small and independent firms are absorbing more of their share of the restraints on the economy. I feel that they should not in the future continue to bear a disproportionate part of the sacrifices necessary to achieve the country's domestic and international goals.

I wonder if there are any other domestic programs which have been reduced by three-fifths in a single year. I am concerned that small business, because it is not strong enough to protect itself, has been singled out for the worst treatment.

The members of our committee share this concern. Many of us have discussed these matters in detail, and several, including the Senator from Alaska (Mr. GRAVEL), have made timely and important contributions to the committee's work in this area.

WHAT CAN BE DONE

Fortunately, there are steps which can be taken that will provide some measure of relief to hard-pressed small firms. One of these is to free the SBA loan authority already provided by the Congress. Accordingly, I have urged the White House, in the letter to President Nixon to which I referred, to take immediate action in order to release the $170.2 million in SBA loan authorizations, and to take all other action which may be necessary to assure that the funds are carried over on the books of the SBA until the actual loans can be approved and disbursed. Of course, if any further congressional action is needed to reach this result, we urge the President to inform us of this, with his recommendations. The important thing is to get the job done.

Mr. President, it seems unfortunately clear that small business is headed for a credit crisis. I hope the administration will do what it can to avoid it. The action we have suggested can be taken now to mitigate some of the most undesirable consequences.

I, therefore, call upon the administration to begin its relief to the small business community by releasing the full amount of the lending authority for the section 7(a) business loan programs and small business investment company lending, together with other steps which are necessary to implement this action which are administrative and, therefore, conveniently within the control of the executive department.

We on the Small Business Committee stand ready to cooperate in these matters and will continue to do all we can in the Senate to meet this gathering emergency with affirmative and effective action.

For the information of all who are concerned, I ask unanimous consent that our letter to the President requesting release of SBA loan authority for fiscal year 1969 be printed in the RECORD.

Following is the letter previously referred to.

U.S. SENATE,
SELECT COMMITTEE
ON SMALL BUSINESS,
Washington, D.C., June 25, 1969.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: May I respectfully call your attention to several fact situations which I believe are placing the 5½ million small businessmen of this country in an economic straitjacket as a result of skyrocketing bank interest rates and the absence of direct loan money from the Small Business Administration.

The Senate Select Committee on Small Business, of which I have the honor to be Chairman, has just concluded the preliminary phase of hearings on the legislative oversight of the Small Business Administration. Many of our members have expressed deep concern at the drastic reductions in both the budget requests for the SBA loan programs and Executive action reducing loan commitments substantially below amounts approved by the Congress.

According to our Committee's calculations, there remain, within SBA Section a financial assistance and investment company programs, loan authorizations totaling more than $170 million which will expire if not released before the end of this fiscal year. The amounts are in three categories, as follows: for the direct business loan program

$59 million; for SBA's share of immediate participation loans $89.9 million; and for the SBIC lending program $21.3 million, for a total of $170.2 million.

It is my understanding that the release of such authority is for lending rather than spending, so that the budgetary "expenditure" features of these loans would be subject to an immediate offsetting repayment of principal and interest. Moreover, the amounts to be loaned are already in the SBA revolving fund so that no new "appropriations" would be required. Accordingly, expenditure controls would appear to be only a secondary consideration in this matter.

You will recall that last April the Department of Agriculture obtained release of $41 million for the Farmers Home Administration under similar conditions. I feel that small business is entitled to at least comparable treatment in government loan money availability in the face of credit needs of small business which, in the tightening money market, are becoming increasingly acute.

The prime bank rate has reached 8½% and other market instruments have followed suit, raising interest rates to their highest peaks in 100 years. Small, independent, and family businesses, which are less creditworthy than large national firms, customarily pay interest rates scaled upward from the prime.

With this background in the private sector, a cut in the public lending program of last resort in the order of 58.5% is creating a massive squeeze on our 5½ million small businessmen.

Therefore, immediate action is required if small business is not to bear a disproportionate part of the sacrifices necessary to curtail inflation. This may be done administratively, beginning with the release of the full $170.2 million in Congressionally approved loan authority for fiscal year 1969 SBA and SBIC loan programs. This should extend to all necessary technical and implementing measures, which will allow this authority to be carried over on the books until these small business loans can be approved and disbursed. I urge that you instruct the Budget Bureau before June 30 to take the administrative action which is conveniently within your control, and to recommend to Congress whatever additional action may be needed to preserve the budget authority I have described so that it will not become permanently unavailable to the SBA and the small business community.

Very respectfully,

ALAN BIBLE, *Chairman.*

SBA LOAN FUNDS SHOULD BE RELEASED BEFORE JUNE 30

Mr. GRAVEL. Mr. President, the legislative oversight hearings of the Select Committee on Small Business now in progress clearly indicate that the executive branch has been gradually tightening the noose around the loan programs of the Small Business Administration.

As a junior member of this distinguished committee, I strongly support its most recent efforts to obtain economic justice for smaller firms. I commend the chairman, the Senator from Nevada (Mr. BIBLE), for his decision to reconvene the hearings in mid-July so that we may continue our scrutiny over the kind of assistance available to smaller firms from the Small Business Administration, the Department of Commerce, and the Nixon administration as a whole.

At this time, as Senator BIBLE has pointed out, there are few reasons for optimism.

From the testimony at the committee's public hearings June 10–12, it appears that SBA's lending funds have been drastically reduced several times within the past year and a half, and that the direct business loan program of the agency is, in fact, at a complete standstill.

These cutbacks have been of two types; first, reduced requests for funds in the President's budget, and, second, action by the Budget Bureau to roll back lending authority below congressionally approved budget levels. The results have been the same in both cases—the permanent unavailability of loan funds which small businessmen need and Congress is willing to provide through SBA programs. In fact, the results of these executive actions have been cumulative.

Chairman BIBLE has asked for the details of each of these reductions—how they were made and how deeply they have cut into SBA's capacity to do its job. The complete statistics will become available next month, but we are now in a position to review the preliminary figures already on the public record.

It was startling for me to learn that, for this year and next year, the SBA business loan program will actually show a minus figure for net lending, as shown in the following table:

MAJOR CREDIT PROGRAMS—COMMERCE AND TRANSPORTATION

[In millions of dollars]

Agency and programs	Fiscal years			
	1967 actual	1968 actual	1969 estimate	1970 estimate
Small Business Administration	101	176	−16	−46

Source: The Budget of the U.S. Government, for fiscal years 1969 (p. 115) and 1970 (p. 111).

This means Mr. President, that more money is being taken out of the SBA loan program than is repaid in the principal and interest. For the 1970 fiscal year just ahead, the backup will amount to nearly $50 million, which I believe should be immediately available for relending.

The amounts committed in loans by the executive branch are far below the levels which Congress has been willing to appropriate and has actually appropriated during this period. For instance, for fiscal year 1968, Congress approved a loan authority budget level of $88.3 million for the direct loan program. Of this, the executive branch would only commit $54 million. For fiscal year 1969 the SBA should have been provided with at least the previous year's $88 million, plus the restoration of the $34.3 million withheld in 1968 together with some extra funds to grow on. In fact, however, they were only allowed to request budget authority for a far lower direct loan level for current year ending June 30, 1969. Congress approved $77 million for this fiscal year. But the agency was not even allowed to commit this much. The figure was cut all the way back to $18 million. That $18 million was the amount that finally became available for direct loans after all of the cutbacks.

SBA LENDING HAS BEEN VIRTUALLY HALTED

As a consequence SBA ran out of direct loan authority midway through the year. The agency was forced to issue a directive virtually closing down the direct and participation business loan program in the following language:

"As far as FA (financial assistance) programs are concerned the 7(a) direct and immediate participation program levels have been most affected. Our FY 1909 Congressional appropriations submission reflected $77 million for 7(a) direct loans and $184 million for the SBA share of the IP (immediate participation) loans. While the original estimate of the effect of the Congressional action for these loans was a FY 1969 level of $155 million, $41 million direct and $114 million IP (SBA share), further analysis of income and expenditures has resulted in reductions to $18 million for 7(a) direct and $94.1 million for IP.

"In view of our first half year allocations, rates of approval and expenditures, and existing backlog, it became necessary to cut off immediately further acceptance of 7(a) direct loan applications. At the same time it was deemed essential that we preserve for the balance of the fiscal year as much of our 7(a) IP program as possible.

"However, with $52.4 million already allocated for 7(a) IP loans, only $41.7 million (SBA share) will be available for the last six months of the fiscal year; less than $7 million per month nationally."

The cutbacks in the direct loan authority by the executive branch left an unused $59 million in congressionally authorized budget loan level for fiscal year 1969. This authority can be turned over to the Small Business Administration provided action is taken before June 30. As long as the authority is released by that date it will not lapse and will be available for present or future use in the direct loan and participation programs. If this loan authority is not released, it will revert to the U.S. Treasury and will no longer be available for use in any SBA lending program.

Mr. President, anyone who has been reading the newspapers these days is aware of the compelling reasons of taking such action.

SMALL BUSINESS IS NOT KEEPING PACE

Although the economy has been expanding at a rapid rate, small firms have been precluded from gaining their fair share of these advances by the shortage and expense of capital. Defense procurement has flown up and away because of Vietnam but the small business share of military purchases has declined from 21.8 percent in 1966 to 16 percent in the last half of 1968. Corporate profits have likewise soared 32.8 percent, or almost one-third between 1964 and the beginning of 1969, but 50 giant companies at the summit of our economy account for 39.8 percent of all industry profits, according to the annual Fortune 500 survey.

A comparison among some of the advances in national income, with particular attention to professional firms, farm businesses, and other proprietorships which are predominantly small business, is contained in the following table:

Advances from 1964 to the beginning of 1969

[In billions of dollars]

	Percent
Proprietors' income:	
Business and professional	+18.9
Farm	+24.3
Corporate profits (after taxes)	+32.8
Gross national product	+36.1
Wages and salaries	+38.1

Source: "Federal Reserve Bulletin," May 1969, Tables A66 and A67.

It thus appears to me that the income of smaller and independent businessmen and farmers in this country are lagging behind most of the other indicators. One of the leading disabilities of the small businessman in this regard has been the steep climb, since 1965, of the prime interest rate to 8½ percent. Other forms of commercial financing have risen accordingly. As dizzy as the present peaks are, there have been newspaper reports that interest rates may even go higher before they turn down. In addition to this, the Federal Reserve Board, as a prudent anti-inflationary measure, is "reducing liquidity" in our financial system, which boils down to the fact that banks will end up with less money to loan at higher prices.

As the chairman of our committee has said:

"It has been acknowledged that new and small firms are normally under capitalized. The small local, or family firm, or any company with a new product is simply not in a position to compete for credit with a huge national corporation."

This is the background in the private money market against which the massive cutbacks in the public loan program of the Small Business Administration should be viewed. I can think of no reason why small and independent businesses should be paying a disproportionate price for the Nation's involvement in Vietnam while the giant corporations net record profits, which are not even subject to an excess profits tax such as existed during all of the major armed conflicts of this century.

As I have said, the Small Business Committee will reexamine the Small Business Administration and the Department of Commerce with respect to these matters during July. We will be collecting further information upon which to base the committee's ultimate findings and recommendations.

ACTION SHOULD BE TAKEN

In the meantime, there is action which can be taken by the executive branch which can provide substantial relief. That is the release of the $170.2 million in loan authority which the executive branch has impounded for fiscal year 1969, and which will lapse if it is not released by the end of this month. There is a precedent for such a decision in the release of $41 million for Farmers Home Administration loans in April of this year. It seems to me that the small businessmen of this country are entitled to comparable treatment.

I therefore join in the call upon the Bureau of the Budget and President Nixon to release this $170.2 million SBA loan authority before June 30, including the $59 million for direct loans; the $89.9 million representing the SBA share of IP—immediate participation—loans and $21.3 million representing loan assistance to small business investment companies. In other words, I am asking for the release of the full $170.2 million for all SBA programs which the Congress approved for these programs before the end of fiscal year 1969. I understand that Chairman BIBLE has officially made this request in a recent letter to the White House, and I wish to give that recommendation my unqualified endorsement.

As the committee investigation proceeds, I shall continue to do all that I can to support a rebuilding of the SBA direct loan program as well as other SBA and Federal programs which can benefit the small business firms of Alaska and the rest of the Nation in the months and years ahead.

SEPTEMBER 22, 1969.

Hon. HILARY J. SANDOVAL, Jr.,
Administrator, Small Business Administration, Washington, D.C.

DEAR MR. SANDOVAL: As you know, our Senate Committees have been concerned over the years with making the results of taxpayer-financed research and development available to small and independent firms by way of technology transfer.

Through the Subcommittee on Science and Technology of the Select Committee on Small Business; the Subcommittee on Government Research of the Committee on Government Operations; and the Small Business Subcommittee of the Senate Banking and Currency Committee, considerable initiative has been taken in developing programs of technology transfer, which are now in their infancy.

Two general reports have been published: "Policy Planning for Technology Transfer" in 1967 and "The Prospects for Technology Transfer" in 1968. The latter study is presently being used as a model for consideration of these matters in the Executive Branch by the Committee on Scientific and Technical Information.

As you are aware, the public investment made by the Federal Government on research and development has risen to nearly $150 billion. The recent Apollo and Mariner voyages will add further to the reservoir of scientific and technical information in the public domain which we hope will be made increasingly accessible to all U.S. firms, and particularly small business.

At this point, we believe it would be appropriate to have a report of the procedures, status, and results of the technology transfer program within the Small Business Administration and your future plans for pursuing the goal of technology transfer which is of such importance to the small business community. In particular, it would be helpful to know the staff and budget devoted to these purposes in fiscal years 1969 and 1970, the accomplishments of existing programs, the problems encountered, and how it is proposed to resolve such difficulties.

This information will be helpful to us in assessing the possibilities for future activity in this area.

With thanks for your cooperation in this as in other matters, and with kindest regards,

Sincerely,

JENNINGS RANDOLPH,
Chairman, Subcommittee on Science and Technology, Small Business Committee.

FRED R. HARRIS,
Chairman, Subcommittee on Government Research, Committee on Government Operations.

THOMAS J. MCINTYRE,
Chairman, Subcommittee on Small Business, Banking and Currency Committee.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The PRESIDENT pro tempore. Without objection, it is so ordered.

WITHDRAWAL FROM VIETNAM

Mr. MANSFIELD. Mr. President, I have come across a column by Joseph C. Harsch entitled "How Fast?" having to do with the situation in Vietnam and the practical and realistic difficulties in which the President of the United States finds himself. The article reads, in part:

There can be no clear or sure answer.

That is, to the question of withdrawal.

It has to be a variable. It must depend on the capacity of the South Vietnam armed forces to provide the necessary security for the withdrawal. And that certainly does mean more time than either the President or the "moratorium" marchers would like to leave.

Mr. President, I ask unanimous consent that this column and a very worthwhile editorial by Hedley Donovan, entitled "Winding Down the War on Our Own," which explains realistically the situation in which the President and we find ourselves in Vietnam, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Oct. 21, 1969]

HOW FAST?

(By Joseph C. Harsch)

WASHINGTON.—In one sense the issue between President Nixon and the peace demonstrators is now narrow. Everybody (almost) wants peace. Everybody (almost) agrees that American combat forces should be withdrawn. What remains as an issue is only the speed of the withdrawal.

If Mr. Nixon would even fix a specific date, much of the opposition to him would disappear. If he fixed an early date, most of it would disappear.

At this point there are some very real and serious military factors.

ABSTRACT THEORY

In abstract theory it would be physically possible to pull the entire half-million men out in a month.

By commandeering cruise liners from the sea and passenger air-liners from the sky a mass lift in 30 days could be done.

Obviously, no sensible person would dream of doing the withdrawal that way. The equipment could not be taken out at any such pace. To leave the equipment behind in a crash withdrawal program would probably amount, in effect, to giving most of it, perhaps all, to the Viet Cong and North Vietnam forces.

The essential military point is that a sudden withdrawal could all too easily degenerate into a fighting withdrawal.

The present Nixon plan calls for the gradual withdrawal of United States combat forces, leaving air support, communications, and supply until the last.

But leaving perhaps a quarter of a million Americans of those types in Vietnam without American infantry protection could be extremely dangerous. It would be possible only if the South Vietnam Army could be relied upon to provide the necessary security for the noncombat people.

POLITICAL CHAOS

And time is an essential element in the capacity of the South Vietnam Army to provide that protection. A sudden withdrawal would almost certainly mean political chaos in Saigon followed by the breakup of the South Vietnam armed forces. The retreat from the Yalu during the Korean war is an example of what could all too easily happen under such circumstances. Zenophon's fighting retreat from Asia Minor is another. Mr. Nixon, understandably, dare not order the kind of withdrawal program which could lead to a Dunkirk.

So how fast can the withdrawal be managed without running the serious risk of a Dunkirk?

There can be no clear or sure answer. It has to be a variable. It must depend on the capacity of the South Vietnam armed forces to provide the necessary security for the withdrawal. And that certainly does mean more time than either the President or the "moratorium" marchers would like to leave.

THEORETICAL MERIT

The moratorium deadline is the end of 1970. Mr. Nixon would be delighted to get every last American out of Vietnam by November of 1970. Such a deadline would be manna from heaven for every Republican running for reelection that month.

But a November, 1970, deadline would probably not be safe.

What then could Mr. Nixon do with safety to American troops beyond what he has already done?

One useful idea is provided by Human Events, the right-wing information sheet. It says he should send home all conscripts and use only volunteers in Vietnam. The idea has great theoretical merit, and would be welcome in many quarters at the Pentagon, if enough time is provided. It would probably take most of a year to do it safely. You can't risk the breakup of mixed volunteer-conscript units at the front.

Another measure would be to announce a deadline for final withdrawal at a safe time in the future. December, 1970, is probably not safe. November of 1972 ought to be safe.

WINDING DOWN THE WAR ON OUR OWN

(By Hedley Donovan)

Richard Nixon has said he does not propose to be the first American President to lose a war. He might, however, if he and we are lucky, become the third President to set-

tie for a tie. The others were James Madison (War of 1812) and Dwight Eisenhower (Korea), perfectly respectable company for any President to keep.

The President was strangely tense and rigid in his advance comments on the Vietnam Moratorium (he would "under no circumstances . . . be affected whatever"). Many of the Oct. 15 people, to be sure, would not be appeased by anything Mr. Nixon could do, short of immediate and total withdrawal. Yet Mr. Nixon's Vietnam policy is a great deal more realistic and humane than he is getting credit for, in part because he and his administration explain it so badly, in part because criticism of the war has reached so high an emotional pitch.

The President has in fact begun a unilateral withdrawal of the bulk of American forces from Vietnam.

The President has in fact reined in his commanders so closely that in some areas of Vietnam a kind of unilateral cease-fire prevails.

What else should he do? Nixon's acts of de-escalation go further than many Vietnam dissenters were demanding only a year ago. But the point is, of course, that now *is* a year later. LIFE believes there is more the President could be doing to further the prospects for a tolerable outcome in Vietnam: in his dealings with his own men in Washington, with the Saigon government, with Hanoi, and in his dealings with U.S. opinion, which is his most critical negotiation of all.

To start with, we propose that the policymakers of the Nixon administration begin treating with U.S. opinion *in its own right*, not as though its chief importance lay in the interpretation Hanoi places upon it. Mr. Nixon, much to his credit, has never since his inauguration put public blame on the Johnson administration for his Vietnam burden. But he has allowed his administration sometimes to sound like the dug-in L.B.J., equating the Vietnam dissent with aid and comfort to the enemy.

It is a profound question how—and whether—a democracy should conduct a war with only, say 60% of public opinion in support. Our Constitution specifies no fewer than nine matters, none as serious as a war, which require a two-thirds vote for congressional approval. When we are in a war which has never had explicit congressional sanction, and never even been legally "declared," being fought in good part by draftees (chosen by a fantastically capricious system), a war which many (LIFE included) have thought important to win but almost nobody has ever claimed was imperative, and when this war has dragged on inconclusively for years, the wonder is not that there is protest but that there is so much willingness to serve and sacrifice. Mr. Nixon, and Mr. Agnew, too, would do better to marvel at the stability and patience of the nation they are privileged to lead, rather than purse lips and wonder how Hanoi is reading our students today.

Once we start thinking of American attitudes about Vietnam as important for their own sake, not as mirror messages being flashed from here to Hanoi and back, several things fall into place.

We should stop expecting anything out of the Paris peace talks. In recent months the North Vietnamese have not budged one centimeter. (How could a Harvard demonstration make them *more* intransigent?) We should proceed on the assumption there will be no formal settlement with the North. We should of course keep our delegation in Paris, talking and listening. There are some things the U.S. government should be saying to America itself, to South Vietnam and to Southeast Asia that might conceivably interest Hanoi. If so, fine; but if not, our policies must proceed for our own good reasons.

We should be withdrawing our troops, in Hubert Humphrey's good word, "systematically." This means a fairly firm presidential timetable, which no doubt exists. The President is right to resist any public promise to be totally out of Vietnam by some early, exact date, despite the 57% Gallup Poll in favor of Senator Goodell's resolution committing us to be gone by the end of 1970. But Mr. Nixon should conquer the press-conference reflex that leads him to try to outbid the Goodells and Clark Cliffords, suggesting that such critics interfere with his hopes of getting out *sooner*. We have little enough bargaining power vis-à-vis Hanoi since it is so clear that we are disengaging, and since it is unthinkable that we could re-escalate, short of some monstrous provocation.

The American public, we would guess, is willing to support 12 to 18, maybe at most 24, more months of military effort in Vietnam if withdrawals are in progress and if casualties and costs are declining steadily.

The President has already ordered withdrawals of 60,000 men from our peak strength of 540,000, and there are hints that he may announce another cut before the end of the year. Civilians need not be too diffident about entering the numbers game, for it is essentially an appraisal of American sentiment rather than a technical military judgment. For our part, we hope that the President is aiming at a force no bigger than 150,000 by mid-1971. (We still keep 50,000 men in Korea, 16 years after the truce.) Whether there should be such a rear guard at all (chiefly in logistics and air support) could indeed be a subject of negotiation, and is not a point to be given away for nothing.

The hope is that as we withdraw the South Veitnamese army will be improving fast enough to take over more and more of the fighting and the South Vietnamese government will be broadening its support. It may just work. We should press Thieu and Ky on bureaucratic corruption, land reform and political imprisonments.

We should continue shifting the U.S. military effort away from the "maximum pressure" concept toward population protection and training of the ARVN. The new policy has contributed to a marked reduction of American casualties, now at their lowest level in nearly three years. Secretary Rogers thinks the enemy, however unyielding at Paris, has carried out a "very significant" de-escalation in the field, cutting down troop infiltration from the North by as much as two thirds Military brass in Washington and Saigon continue the somewhat ritualistic warning that this may just be the lull before a new offensive. Mr. Nixon should decide whether he agrees with his Secretary of State, and if so, perhaps hasten his next troop withdrawal announcement.

The President has promised a major Vietnam speech for November 3. It is none too soon. We hope he will redefine what is still at stake for us in Vietnam. We hope he will offer a generous vision of a long-term peacetime American interest in the development of Southeast Asia and friendship for all its peoples. (What an irony that we should be on fairly good terms with Communist Russia, talking cautiously about a possible thaw in relations with Communist China, and still so bitterly embroiled with one of the smallest Communist states.)

It will take even more steadiness than the American people have already shown if they are to persist through this winding-down phase of the war and bear further casualties and costs for modest objectives. In this difficult undertaking, the President deserves our sympathy and support, and the country deserves visible, candid and convincing leadership.

PROTECTIVE REACTION IN VIETNAM

Mr. MANSFIELD. Mr. President, there seems to be some difficulty interpreting what Secretaries Laird and Rogers have said about the new military strategy of "protective reaction" ordered last July and put into effect last August. In my opinion, this is a decided shift away from the old "search and destroy" and "maximum pressure" tactics which were employed in the last administration and in the first months of the present administration. To me, the change means we have moved a long distance in the direction of a "cease-fire and stand fast" policy. It is my understanding of the new strategy of "protective reaction" that U.S. forces will fire only when a threat that they will be fired on is developing and that they remain prepared at all times to take whatever action may be necessary to repel any attack which should be in the offing.

It has been charged that this approach would expose U.S. forces to increased casualties and would hand an initiative to enemy forces. It would be my belief that the opposite is the result; that casualties would be decreased as, in fact, they have been reduced since the new strategy has been in effect. As far as the initiative is concerned, U.S. forces remain on guard at all times and take whatever actions are necessary to forestall any attack which might be in the offing but fire only when there is a threat that they will be fired on.

This interpretation of "protective reaction" would appear to be consistent with what a military spokesman in Washington has said:

> Our defense activities include allied reconnaissance in force, sweeps and extensive small patrol operations designed to keep the enemy off-balance and to prevent enemy attacks.

Or, even more specifically, what another military officer at the Pentagon is quoted as saying:

> We're not terribly far from such a condition today (a "de facto cease-fire"). The enemy has pulled back to sanctuaries throughout Vietnam. Infiltration is way down. We're sending out lots of small patrols but we're no longer crashing through the bush with large units spoiling for a fight. Our concentration is on pacification and on helping the Vietnamese take over more of the war. Our casualties keep falling, week by week.

This is certainly a far cry from the tactics of "maximum pressure" and "search and destroy" and to me is an indication that the President is moving toward a cease-fire and standfast policy.

I commend the Secretary of Defense for announcing the policy; the Secretary of State for emphasizing it; and the President for initiating this new and highly significant tactic.

Mr. President, in the Washington Star of October 11, just a week or so ago, appeared an article by Mr. Orr Kelly. The article has to do with a press conference held by Brig. Gen. John W. Barnes, former commander of the 173d Airborne

Brigade in South Vietnam's Binh Dinh Province. I believe this was the general referred to on Thursday, 2 weeks ago tomorrow, at Secretary Laird's press conference, when he announced the new "protective reaction" policy.

General Barnes, until recently, was in command of one of the most heavily Communist-infested areas in the country. He told newsmen he gave his 7,000 troopers strict orders on their pacification experiment begun on April 15. General Barnes' 7,000 troopers were ordered to fire only at uniformed enemy soldiers, or men who were clearly not friendly forces and persons engaged in hostile acts such as throwing a hand grenade.

Mr. President, I ask unanimous consent to have printed in the RECORD an editorial entitled "Toward a Cease-Fire," which was published in the Baltimore Sun of October 21, 1969.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

TOWARD A CEASE-FIRE

Reports from Washington that President Nixon is considering a proposal for a cease-fire in Vietnam are encouraging, as an indication of a continuing search for ways to scale down the scope and intensity of the war. The American efforts in this direction—steps which include the cessation of the bombing in North Vietnam and revision of the "search and destroy" tactics—have undoubtedly been major factors in the general reduction in the so-called level of violence and, more important, in the decrease in battle casualties. A cease-fire proposal could properly be made in line with these steps and in line with the measures being taken to withdraw substantial numbers of American soldiers from South Vietnam.

A proposal of this nature, first of all, would underscore the United States policy, and hope, of bringing the war to an end as soon as possible. A standstill cease-fire, in which all troops would remain in place with combat operations suspended, could possibly open the door to the negotiations for a political settlement which the United States has been seeking, with little or no response, so far as the record shows, from North Vietnam.

But even if serious peace negotiations did not develop, an American initiative toward a cease-fire could point to another way in which the war may be ended; that is, by a steady dwindling of fighting until an undeclared and unnegotiated peace is established. For several years now, some authorities have thought that the war may well be brought to an end in this manner, rather than through an openly negotiated settlement.

Mr. Nixon has strong support in this country now, we believe, for the measures he is taking to control and decrease the level of the war. It seems clear that the American people not only endorse these measures but are urging the President to push on with additional steps. The simple fact is that it becomes more and more difficult to justify continued battle deaths, even when the number of casualties has been greatly reduced, after the major decision has been taken to begin withdrawing American troops. This, we suggest, was uppermost in the minds of many of the Americans who took part last week in the moratorium demonstrations.

Mr. McGOVERN subsequently said. Mr. President, I wish to associate myself with the remarks of the distinguished majority leader with reference to his statement that we are, in fact, moving into a cease-fire. The Senator from Montana (Mr. MANSFIELD) has been advocating that position for several years, both under the previous administration and under this administration. I hope that is the direction in which we are moving.

STATESMANSHIP BY SENATOR MANSFIELD

Mr. SCOTT. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial entitled "Statesmanship by Senator MANSFIELD," which was published in the Philadelphia Inquirer this morning. The editorial is very praiseworthy of the positions taken by the distinguished majority leader and the Senator from Arkansas (Mr. FULBRIGHT). While I have not cleared this matter with the majority leader, I would like to have it printed in the RECORD at this point.

The PRESIDENT pro tempore. In light of the Senator's statement, the Chair is quite certain the majority leader would impose no objection. Without objection, it is so ordered.

The editorial, ordered to be printed in the RECORD, is as follows:

STATESMANSHIP BY SENATOR MANSFIELD

As Democratic Majority Leader in the Senate, and a long-time advocate of peace in Vietnam, Mike Mansfield took the Senate floor to deliver a statesmanlike address that ought to be a keynote for Americans, whatever their party, who genuinely seek an end to the war.

Noting that the Nixon Administration is pursuing a new policy in Vietnam, dedicated to de-escalating the fighting and reducing casualties and bringing U.S. troops home, the senator from Montana declared: "I would like to see the people of this nation get behind President Nixon. . . . I want to say as a Democrat that it will be my intention to support the President." He went on to express his belief that strong public support for Mr. Nixon at this critical juncture in peace efforts would expedite a "responsible settlement" in Vietnam.

There is great wisdom as well as high statesmanship in Senator Mansfield's remarks. At this time, of all times, with the President of the United States initiating bold steps toward a reduction of the fighting while engaging in delicate diplomatic maneuvers to hasten a settlement, the American people should stand united, rather than divided, and should demonstrate support, instead of protest, for the U.S. peace offensive that is already under way and is being accelerated.

Chairman J. W. Fulbright of the Senate Foreign Relations Committee, one of the most outspoken war critics, has acted sensibly in following Senator Mansfield's lead by postponing committee hearings on Vietnam that had been scheduled to begin next week. They will be delayed at least until after President Nixon's address to the nation on November 3, when he is to discuss the Vietnam situation.

There are, of course, some people in this country who claim to be for peace but really seek a Communist victory. It can be expected that they will continue to fan the flames of dissension wherever they can. Other Americans, those who want to act responsibly in the cause of peace, ought to rally to the call of Senator Mansfield.

SPEECH BY VICE PRESIDENT AGNEW IN NEW ORLEANS

Mr. McGOVERN. Mr. President, Sunday's Republican fundraising speech in New Orleans by Vice President SPIRO AGNEW is apparently designed to widen both the generation gap and the credibility gap.

The Vice President has referred to last week's peace efforts as "national masochism"—"an emotional purgative"—as "the work of impudent snobs." He has said that those who call for an end to the war are undercutting "the foreign policy of the President"—that we "prefer to side with an enemy aggressor rather than stand by this free nation."

In a sweeping indictment of this generation of college students, Mr. AGNEW said:

> Education is being redefined at the demand of the uneducated to suit the ideas of the uneducated. The student now goes to college to proclaim rather than to learn.

We are left to wonder what the Vice President is doing if not proclaiming. It has occurred to no one to charge him with excessive learning.

I do charge him with making a deliberate and cynical effort to arouse contempt for the college students of America. He seeks to discredit the patriotism of those of us—young and old alike—who have opposed the war in Vietnam. Is there any doubt that he does this with the approval of the President?

Frankly, I am puzzled by the Vice President. We urge our young people to keep their dissent peaceful and nonviolent; yet, when they do so their patriotism is impugned by the second highest official in the land. That is the kind of official attitude which breeds frustration, anger, and violence.

Mr. Agnew's attitude toward the peace effort and especially the moratorium demonstrates ignorance, both of the struggle in Vietnam and the political process in America.

The moratorium of last week was carefully planned by some of the most patriotic and thoughtful citizens in our land. It was directed by young people and older citizens of every walk of life who love this country enough to call for an end to our involvement in a foolish war—a war that may serve the interest of the Communists, but not of America.

After 5 years of soul-searching debate, we are now told by Mr. Agnew that we should listen in respectful silence while he pontificates.

Before the moratorium even took place, he referred to it as "absurd." What is "absurd" is the thought of SPIRO AGNEW enunciating policy for the most powerful nation in the modern world.

The PRESIDENT pro tempore. The time of the Senator has expired.

Mr. McGOVERN. Mr. President, I ask unanimous consent that I may proceed for an additional 5 minutes.

Mr. FULBRIGHT. Mr. President, reserving the right to object——

The PRESIDENT pro tempore. The Senator from Arkansas reserves the right to object.

Mr. FULBRIGHT. I merely wish to inquire of the Senator. I have two matters to present. I wonder if the Senator would mind. I do not disagree with what he is saying. These are two executive matters. If I could have 3 or 4 minutes I could dispose of them.

Mr. McGOVERN. I will be finished in that length of time. I would be glad to yield to the Senator, but I am going to a luncheon.

Mr. FULBRIGHT. I do not object.

The PRESIDENT pro tempore. There being no objection, the Senator from South Dakota is recognized for an additional 5 minutes.

Mr. McGOVERN. Mr. President, if Mr. AGNEW's speech is a measure of this administration's mental and moral sensitivity, God help America.

He talks of "the spirit of national masochism" in the peace effort; but masochism finds its crudest expression in the sacrifice of our youth to the high priests of war.

He talks of "the dangerous oversimplification" of the war; but the most "dangerous oversimplification" is the confusion of General Thieu's corrupt military dictatorship with the defense of freedom and American honor.

He scorns the present generation of American youth for not quietly swallowing the policies of our rulers.

But, thank God, the youth of America—with all their faults—are not about to swallow the old schemes of forced killing in foreign crusades that destroy both us and others in the name of national honor.

The Vice President talks of our refusal to disassociate the peace effort from Hanoi's expressions. But we call for an end to American involvement in Vietnam, not because of what Hanoi thinks, or Saigon or Paris—but because we want America to assert her own national interest. It is the administration, not the peace advocates, that has said our policy in Vietnam will be determined by Hanoi, Saigon, and Paris rather than by the concerns of the American people.

I participated without question as a combat pilot in World War II because I believed then and I believe now that this was the patriotic and proper role for me to play. I oppose our involvement in the struggle of the Vietnamese people with equal patriotism and propriety. If the Vice President cannot by now see the vast difference between these two challenges, he is not capable of making judgments for himself—let alone trying to instruct the youth of the Nation.

It is ironical that on the front page of Monday's Washington Post, where we read of Mr. AGNEW's attack on the youth of America, we also learn in another news story of secret American military operations in Laos and elsewhere in Asia.

The Senator from Missouri (Mr. SYMINGTON), who is conducting an invaluable investigation of these matters, is quoted as saying of Laos:

> In past years, high government officials have wrapped activities there in a cloak of secrecy, keeping details not only of policy but also of implementation of that policy hidden even from those of us in the legislative branch who have responsibilities in the foreign policy and military fields.

Presumably, Mr. AGNEW would like us to accept these secret preparations and commitments to new battlefronts without question. Then, as old wars continue and new wars begin, he would call on the youth of America to follow the lines of Tennyson:

> Theirs not to reason why; theirs but to do and die.

Presumably, he prefers acquiescence to the policies emanating from on high, including those policies formed without consultation or debate involving the elected representation of the American people.

But that is not the course of American democracy, and I for one will have no more of it. I do not believe in referring to American foreign policy as though it were the private domain of the President without reference to the thoughtful concern of other citizens of the Nation.

I believe that increasing numbers of Americans—young and old—of every political persuasion in every walk of life—are determined to have a voice in those issues that affect their lives. That is what freedom is all about. So let us not fight so blindly to preserve General Thieu in Saigon that we sacrifice freedom and dignity in our own great but deeply troubled land.

Mr. President, I ask unanimous consent that two excellent editorials, one from the Washington Post of October 21, 1969, and one from the Daily Republic of my hometown, Mitchell, S. Dak., be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington (D.C.) Post, Oct. 21, 1969]

MR. AGNEW: NO LONGER A LAUGHING MATTER

By writ and by tradition the vice-presidency is an office in which there is practically nothing to do. The trick of course lies in doing it well—in standing back and learning, in readying oneself for any emergency, in supporting the President backstairs when one can and in doing nothing that goes against his interest. Clearly, then, in the case of Vice President Agnew we are faced with one of two possibilities. One is that Mr. Agnew with his ten-month roadshow of gaffes, goofs, and raw demagoguery hasn't caught on to his job. The other is that he has—that Mr. Nixon is authorizing and/or approving the Vice President's public dicta as part of some elaborate (and foredoomed) political game. Neither is particularly reassuring, but if the latter is the case, we should be told.

In New Orleans on Sunday the Vice President made this necessary with his comments on the war and on the motivations of those involved in last week's Vietnam moratorium.

"If the moratorium had any use whatever, it served as an emotional purgative for those who feel the need to cleanse themselves of their lack of ability to offer a constructive solution to the problem."

And again:

"A spirit of national masochism prevails, encouraged by an effete corps of impudent snobs who characterize themselves as intellectuals. It is in this setting of dangerous oversimplification that the war in Vietnam achieves its greatest distortion."

And again:

"Great patriots of past generations would find it difficult to believe that Americans would ever doubt the validity of America's resolve to protect free men from totalitarian attack. Yet today we see those among us who prefer to side with an enemy aggressor rather than stand by this free nation."

Mr. Agnew also let it be known that those who participated in the moratorium were guilty of the crime of supporting "a massive public outpouring of sentiment against the foreign policy of the President of the United States" and of not caring to "disassociate themselves from the objective enunicated by the enemy in Hanoi."

Now what is interesting in all this is certainly not the Vice President's line of thought or his ham-handed effort to discredit the motivation and question the loyalty of a large and respectable part of the political community: we have seen and heard all that before. It is not even to the main point to observe that Mr. Agnew has outdone himself in assuring the hostility of a part of the electorate Mr. Nixon has some interest in calming down. Nor does the subject upon which Mr. Agnew chose to discourse with such vehemence permit his remarks to be received with the national giggle they so frequently inspire. This time around the only question worth asking is what the President thought of what Mr. Agnew said.

Mr. Nixon is engaged in a highly chancy and complicated maneuver to end the war in Vietnam in a way which will not do utter violence to this country's interests abroad and which will not result in a terrible rending of the social fabric at home—in a right-to-middle uprising based on charges of betrayal and sell-out. At least that is what you can hear any day of the week from those behind the scenes in his administration who argue the case for his method of disengagement and who beg understanding of it. Simultaneously we witness Vice President Agnew out formenting precisely the kinds of emotions others in the White House profess to fear and claim their strategy is designed in large measure to avoid. It really will not do for Mr. Ziegler, the White House spokesman, merely to indicate that vice presidential speeches for party gatherings are not cleared in advance by the White House. If Mr. Nixon wishes to be in any way convincing in this matter or to preserve the notion that he is acting in good faith, then he must repudiate the excesses of his Vice President or silence him or—ideally—do both.

[From the Mitchell (S. Dak.) Daily Republic, Oct. 18, 1969]

THE MORATORIUM

Despite his advance advisory that he would not be affected by last Wednesday's nationwide Vietnam Moratorium, President Richard M. Nixon will be foolish to ignore the success of the anti-war demonstration.

As has been pointed out repeatedly since the moratorium, this was a most surprising display of widespread sentiment for disengagement from the Vietnam debacle. Surprising because of the broad spectrum of national life represented in the protest. Surprising because of the extremely low incidence of illegal actions by demonstrators. Surprising because of its lack of partisan political overtones.

The Vietnam Moratorium was initiated by a small group of concerned young people, but participation included people of all ages, of all walks of life, of all religions, of all races, of all political persuasions. Hundreds of thousands of them turned out—even in bad weather in some areas—to demonstrate their desire for the United States to come to terms with the realities of the Vietnam situation: there can be no peaceful settlement in Vietnam so long as this country insists on supporting a South Vietnam regime that cannot and will not serve our interests, nor the interests of the population they govern.

Those who are crying that U.S. citizens' anti-war activities are giving aid and comfort to Hanoi and interfering with peace ne-

gotiations in Paris are begging the question. From the beginning, it has been crystal clear that no peace treaty can be achieved on the basis of American dictates and the Thieu-Ky refusal to recognize the National Liberation Front. Unless the U.S. withdraws from military participation in this Vietnam civil war, a solution will never be reached.

President Nixon has committed his Administration to end the war. If he intends to carry out this commitment, he cannot but be affected by public sentiment expressed by the Vietnam Moratorium. By setting up a public timetable for a phased withdrawal from Vietnam, and adhering to it closely as possible, he will be able to achieve his objective. He will open the way for meaningful talks in Paris.

Some American troops will have to remain in South Vietnam for some time. As Michael Novak wrote in *Commonweal* a week ago, "both the U.S. and the North Vietnamese have some stake in overseeing in some minimal way the protection of the people their presence has compromised."

The promise has been made by the Vietnam Moratorium Committee that another such demonstration is scheduled for Nov. 15, and succeeding ones will be initiated until such time as their voices are heard in Washington. Mr. Nixon can serve the best interests of his people by moving in judicious haste to disengage us from the Vietnam morass and set our course on elevating the quality of life at home and abroad.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider two treaties on the Executive Calendar.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate proceeded to consider executive business.

CONVENTION ON CONDUCT OF FISHING OPERATIONS IN THE NORTH ATLANTIC

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Chair lay before the Senate, Executive D, 91st Congress, first session.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider Executive D, 91st Congress, first session, the convention on the conduct of fishing operations in the North Atlantic, which was read the second time, as follows:

CONVENTION ON CONDUCT OF FISHING OPERATIONS IN THE NORTH ATLANTIC

The Governments of Belgium, Canada, Denmark, the French Republic, the Federal Republic of Germany, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, the Polish People's Republic, Portugal, Spain, Sweden, the Union of Soviet Socialist Republics, the United Kingdom of Great Britain and Northern Ireland, and the United States of America,

Desiring to ensure good order and conduct on the fishing grounds in the North Atlantic area;

Have agreed as follows:

ARTICLE 1

(1) The present Convention applies to the waters of the Atlantic and Arctic Oceans and their dependent seas which are more specifically defined in Annex I to this Convention.

(2) In this Convention

"fishing vessel" means any vessel engaged in the business of catching fish;

"vessel" means any fishing vessel and any vessel engaged in the business of processing fish or providing supplies or services to fishing vessels.

ARTICLE 2

Nothing in this Convention shall be deemed to affect the rights, claims or views of any Contracting Party in regard to the limits of territorial waters or national fishery limits, or of the jurisdiction of a coastal State over fisheries.

ARTICLE 3

(1) The fishing vessels of each Contracting Party shall be registered and marked in accordance with the regulations of that Party in order to ensure their identification at sea.

(2) The competent authority of each Contracting Party shall specify one or more letters and a series of numbers for each port or district.

(3) Each Contracting Party shall draw up a list showing these letters.

(4) This list, and all modifications which may subsequently be made in it, shall be notified to the other Contracting Parties.

(5) The provisions of Annex II to this Convention shall apply to fishing vessels r their small boats and fishing implements.

ARTICLE 4

(1) In addition to complying with the rules relating to signals as prescribed in the International Regulations for Preventing Collisions at Sea, the fishing vessels of each Contracting Party shall comply with the provisions of Annex III to this Convention.

(2) No other additional light and sound signals than those provided in the Annex shall be used.

ARTICLE 5

Nets, lines and other gear anchored in the sea and nets or lines which drift in the sea shall be marked in order to indicate their position and extent. The marketing shall be in accordance with the provisions of Annex IV to this Convention.

ARTICLE 5

(1) Subject to compliance with the International Regulations for Preventing Collisions at Sea all vessels shall conduct their operations so as not to interfere with the operations of fishing vessels or fishing gear and shall conform to the provisions of Annex V to this Convention.

(2) For the better implementation of these provisions the competent authorities of Contracting Parties may at their discretion notify the competent authorities of other Contracting Parties likely to be concerned of concentrations or probable concentrations known to them of fishing vessels or fishing gear, and Contracting Parties receiving such notification shall take such steps as are practicable to inform their vessels thereof. The authorised officers appointed in accordance with Article 9 of this Convention may also draw the attention of vessels to fishing gear placed in the sea.

ARTICLE 7

(1) In any disute that rises between the nationals of different Contracting Parties concerning damaged gear or damage to vessels resulting from entanglement of gear, the following procedure will apply in the absence of agreement among the Contracting Parties concerning the resolution of such disputes:

At the request of the Contracting Party of a complainant each Contracting Party concerned will appoint a review board or other appropriate authority for handling the claim. These boards or other authorities will examine the facts and endeavour to bring about a settlement.

(2) These arrangements are without prejudice to the rights of complainants to prosecute their claims by way of ordinary legal procedure.

ARTICLE 8

(1) Each Contracting Party undertakes to take such measures as may be appropriate to implement and enforce the provisions of this Convention with respect to its vessels and gear.

(2) Within the area where a coastal State has jurisdiction over fisheries, the implementation and enforcement of the provisions of this Convention shall be the responsibility of the coastal State.

(3) Within that area the coastal State may make special rules and exemptions from any of the Rules in Annexes II to V to this Convention for vessels or gear which by reason of their size or type operate or are set only in coastal waters, provided that there shall be no discrimination in form or in fact against vessels of other Contracting Parties entitled to fish in those waters. Before making special rules and exemptions under this paragraph in respect of areas in which foreign fishing vessels operate a Contracting Party shall inform the Contracting Parties concerned of their intentions and consult them if they so wish.

ARTICLE 9

(1) To facilitate the implementation of the provisions of the Convention the arrangements set out in this Article and in Annex VI to this Convention shall apply outside national fishery limits.

(2) Authorised officers means officers who may be appointed by the Contracting Parties for the purpose of these arrangements.

(3) Any Contracting Party shall, upon the request of another Contracting Party, notify the latter of the names of the authorised officers who have been appointed or of the ships in which such officers are carried.

(4) Authorised officers shall observe whether the provisions of the Convention are being carried out, enquire and report on infringements of the provisions of the Convention, seek information in cases of damage, where desirable draw the attention of vessels of Contracting Parties to the provisions of the Convention, and shall co-operate for these purposes with the authorised officers of other Contracting Parties.

(5) If an authorised officer has reason to believe that a vessel of any Contracting Party is not complying with the provisions of the Convention, he may identify the vessel, seek to obtain the necessary information from the vessel and report. If the matter is sufficiently serious, he may order the vessel to stop and, if it is necessary in order to verify the facts of the case, he may board the vessel for enquiry and report.

(6) If an authorised officer has reason to believe that a vessel or its gear has caused damage to a vessel or fishing gear and that this may be due to a breach of the Convention, he may, under the same conditions as in the preceding paragraph, order any vessel concerned to stop and board it for enquiry and report.

(7) An authorised officer shall not order a fishing vessel to stop while it is actually fishing or engaged in shooting or hauling gear except in an emergency to avoid damage to vessels or gear.

(8) An authorised officer shall not pursue his enquiries further than is necessary to satisfy him either that there has been no breach of the Convention, or, where it appears to him that a breach has occurred, to secure information about the relevant facts, always acting in such a manner that vessels suffer the minimum interference and inconvenience.

(9) An authorised officer may, in case of damage to a vessel or fishing gear, offer to conciliate at sea, and if the parties concerned agree to this, assist them in reaching a settlement. At the request of the parties concerned the authorised officer shall draw up a protocol recording the settlement reached.

(10) Resistance by a vessel to the directions of an authorised officer shall be deemed as resistance to the authority of the flag State of that vessel.

(11) The Contracting Parties shall consider and act on reports of foreign authorised officers under these arrangements on the same basis as reports of national officers. The provisions of this paragraph shall not impose any obligation on a Contracting Party to give the report of a foreign authorised officer a higher evidential value than it would possess in the authorised officer's own country. Contracting Parties shall collaborate in order to facilitate judicial or other proceedings arising from a report of an authorised officer under this Convention.

(12) An authorised officer shall not exercise his powers to board a vessel of another Contracting Party if an authorised officer of that Contracting Party is available and in a position to do so himself.

ARTICLE 10

(1) Any Contracting Party may propose amendments to the Articles of this Convention. The text of any proposed amendment shall be sent to the depositary Government, which shall transmit copies thereof to all Contracting Parties and signatory Governments. Any amendment shall take effect on the thirtieth day after its acceptance by all Contracting Parties.

(2) When requested by one-fourth of the Contracting Parties, the depositary Government shall convene a meeting of Contracting Parties to consider the need for amending the Articles of this Convention. Amendments shall be adopted unanimously at such a meeting and shall be notified by the depositary Government to all Contracting Parties and shall take effect on the thirtieth day after they have been accepted by all Contracting Parties.

(3) Notifications of acceptance of amendments shall be sent to the depositary Government.

ARTICLE 11

(1) Any Contracting Party may propose amendments to the Annexes to this Convention. The text of any proposed amendment shall be sent to the depositary Government, which shall transmit copies thereof to all Contracting Parties and signatory Governments. The depositary Government shall inform all Contracting Parties of the date on which notices of acceptance of an amendment by two-thirds of the Contracting Parties have been received. The amendment shall take effect with respect to all Contracting Parties on the one hundred and fiftieth day after that date, unless within a period of one hundred and twenty days from the same date any Contracting Party notifies the depositary Government of its objection to the amendment, in which case the amendment will have no effect.

(2) When requested by three Contracting Parties the depositary Government shall convene a meeting of Contracting Parties to consider the need for amending the Annexes to this Convention. An amendment adopted at such a meeting by a two-thirds majority of the Contracting Parties represented shall be notified by the depositary Government to all Contracting Parties and shall take effect with respect to all Contracting Parties on the two hundred and tenth day after the date of notification, unless within one hundred and eighty days from the date of notification any Contracting Party notifies the depositary Government of its objection to the amendment, in which case the amendment will have no effect.

ARTICLE 12

The Contracting Parties shall notify the depositary Government of the competent authorities they have designated for the purposes of each of the relevant provisions of this Convention. The depositary Government shall inform the Contracting Parties of any such notification.

ARTICLE 13

(1) Any dispute between two or more Contracting Parties concerning the interpretation or application of this Convention which cannot be settled through negotiation shall, at the request of one of them, be submitted to arbitration.

(2) The request for arbitration shall include a description of the claim to be submitted and a summary statement of the grounds on which the claim is based.

(3) Unless the parties agree otherwise, the arbitration commission shall be composed of one member appointed by each party to the dispute and an additional member, who shall be the chairman, chosen in common agreement between the parties. The arbitration commission shall decide on the matters placed before it by simple majority and its decisions shall be binding on the parties. Other details of procedure shall be determined by special agreement between the parties.

(4) Notwithstanding the provisions of paragraph (3), the parties may agree to submit the dispute to arbitration in accordance with another arrangement operating between the parties.

(5) If within six months from the date of the request for arbitration the parties are unable to agree on the organisation of the arbitration, any one of those parties may refer the dispute (as referred to in paragraph (1)) to the International Court of Justice by request in conformity with the Statute of the Court.

(6) Notwithstanding the provision of paragraph (1), the parties may agree to submit the dispute to the International Court of Justice.

ARTICLE 14

(1) Except as provided in paragraphs (2) and (3) below and paragraph (3) of Article 17, no reservations may be made to the present Convention without the agreement of the Contracting Parties and signatory Governments. When one year has elapsed after the entry into force of the Convention, the agreement of the Contracting Parties only shall be required.

(2) At the time of signature, ratification, approval or accession any State may make a reservation to Article 13 of the present Convention.

(3) Any State may, at the time of signature, ratification, approval or accession, make a reservation to paragraphs (5) and (6) of Article 9 with respect to one or more of the other Contracting Parties or signatory Governments.

(4) Any State which has made a reservation in accordance with the preceding paragraphs or paragraph (3) of Article 17 may at any time withdraw the reservation by a communication to that effect addressed to the depositary Government.

ARTICLE 15

The present Convention shall be open for signature at London from 1st June to 30th November, 1967. It is subject to ratification or approval. The instruments of ratification or approval shall be deposited as soon as possible with the Government of the United Kingdom of Great Britain and Northern Ireland.

ARTICLE 16

(1) The present Convention shall enter into force on the ninetieth day following the date of deposit of the tenth instrument of ratification or approval.

(2) Thereafter the Convention shall enter into force for each State on the ninetieth day after deposit of its instrument of ratification or approval.

ARTICLE 17

(1) Any State which has not signed the Convention may accede thereto at any time after the Convention has entered into force, provided that three-fourths of the Contracting Parties and signatory Governments agree to the proposed accession. When one year has elapsed after the entry into force of the Convention, the agreement of three-fourths of the Contracting Parties only shall be required.

(2) Accession shall be effected by the deposit of an instrument of accession with the Government of the United Kingdom of Great Britain and Northern Ireland. The Convention shall enter into force for each acceding State on the ninetieth day after the deposit of its instrument of accession.

(3) At any time up to the entry into force of the Convention for a State which accedes under this Article, a Contracting Party may make a reservation to paragraphs (5) and (6) of Article 9 with respect to that State.

ARTICLE 18

(1) Any Contracting Party may, when depositing its instrument of ratification, approval or accession, or at any later date, by declaration addressed to the depositary Government, extend this Convention to any territory or territories for whose international relations it is responsible. The provisions of this Convention shall enter into force for such territory or territories on the ninetieth day after receipt of such declaration, or on the date on which the Convention enters into force in accordance with paragraph (1) of Article 16, whichever is the later.

(2) Any declaration made in pursuance of the preceding paragraph may, in respect of any territory mentioned in such declaration, be withdrawn according to the procedure laid down in Article 19.

ARTICLE 19

At any time after four years from the date on which this Convention has entered into force in accordance with paragraph (1) of Article 16, any Contracting Party may denounce the Convention by means of a notice in writing addressed to the depositary Government. Any such notice shall take effect twelve months after the date of its receipt. The Convention shall remain in force as between the other Parties.

ARTICLE 20

When the present Convention has entered into force, it shall be registered by the depositary Government with the Secretariat of the United Nations in accordance with Article 102 of its Charter.

IN WITNESS WHEREOF the undersigned, being duly authorised thereto, have signed the present Convention.

DONE at London this first day of June, 1967, in the English and French languages, each text being equally authentic, in a single original which shall be deposited in the archives of the Government of United Kingdom of Great Britain and Northern Ireland, which shall transmit a certified true copy thereof to each signatory and acceding Government.

For the Government of Belgium: J.V.D. Bosch.

For the Government of Canada: C.S.A. Ritchie.

For the Government of Denmark: Erling Kristiansen.

For the Government of the French Republic: G. de Courcel.

For the Government of the Federal Republic of Germany: Blankenhorn.

For the Government of Iceland: Gudm. I. Gudmundsson.

For the Government of Ireland: J. G. Molloy.

For the Government of Italy: Gastone Guidotti.

For the Government of Luxembourg:

For the Government of the Netherlands: for the Kingdom in Europe, D. W. van Lynden.

For the Government of Norway: Arne Skaug.

For the Government of the Polish People's Republic: the Government of the Polish People's Republic does not consider itself

bound by the provisions of Article 13, which state that any dispute between two or more Contracting Governments in respect of the interpretation or application of the Convention may, at the request of any of the parties to the dispute, be submitted to arbitration or placed before the International Court of Justice for settlement. The Government of the Polish People's Republic states that submitting the dispute to arbitration as well as placing it before the International Court of Justice requires the consent of all parties concerned in the dispute in each individual case.

The Government of the Polish People's Republic does not consider itself bound by the provisions of Article 9, paragraphs 5 and 6 of the Convention relating to those signatory and Contracting Governments with whom the Polish People's Republic has no diplomatic relations. M. Fila.

For the Government of Portugal: Manuel Rocheta.

For the Government of Spain: With reservations in respect of paragraph 5 of Article 13 and paragraphs 5 and 6 of Article 9, applicable to all Contracting Parties and signatory Governments, as also to those Governments which shall in future accede to the Convention in accordance with Article 17 thereof. Santa Cruz.

For the Government of Sweden: Sous réserve de ratification avec l'assentiment du Riksdag. Gunnar Fagrell.

For the Government of the Union of Soviet Socialist Republics: (Translation) Reservation to Article 13: The Government of the Union of Soviet Socialist Republics consider that any dispute between two or more Contracting Parties regarding the interpretation or implementation of the Convention may be submitted to the International Court only with the consent of all the Contracting Parties participating in the dispute. A. Nshkov.

For the Government of the United Kingdom of Great Britain and Northern Ireland: George Brown.

For the Government of the United States of America: Raymund T. Yingling.

ANNEX I: AREA OF APPLICATION OF CONVENTION

The waters of the Atlantic and Arctic Oceans and dependent seas to which this Convention applies are the waters seaward of the baselines of the territorial sea within the area bounded:

(*a*) in the south by a line drawn due west along 36° north latitude to 42° west longitude, thence due south to 35° north latitude, thence due west along 35° north latitude;

(*b*) in the west by a line drawn southward from a point on the coast of Greenland at 78° 10′ north latitude to a point in 75° north latitude and 73° 30′ west longitude, thence along a rhumb line to a point in 69° north latitude and 59° west longitude, thence due south to 61° north latitude, thence due west to 64° 30′ west longitude, thence due south to the coast of Labrador, and thence south along the coast of North America;

(*c*) in the east by 51° east longitude, but excluding—

(i) the Baltic Sea and Belts lying to the south and east of lines drawn from Hasenore Head to Gniben Point and from Gilbierg Head to the Kullen; and

(ii) the Mediterranean Sea and its dependent seas as far as the meridian of 5° 36′ west longitude.

ANNEX II: IDENTIFICATION AND MARKING OF FISHING VESSELS AND GEAR

Rule 1

(1) The letter or letters of the port or district in which each fishing vessel is registered and the number under which it is registered shall be painted on the bow of the fishing vessel at both sides, and may also be painted on the upper part of the fishing vessel so as to be clearly visible from the air.

(2) The name of the fishing vessel, if any, and the name of the port or district in which it is registered shall be painted on the fishing vessel so as to be clearly visible.

(3) The names, letters and numbers placed on a fishing vessel shall be large enough to be easily recognized and shall not be effaced, altered, made illegible, covered or concealed.

(4) Small boats and, where practicable, all fishing implements shall be marked with the letter or letters and number of the fishing vessel to which they belong. The ownership of nets or other fishing implements may be distinguished by private marks.

Rule 2

(1) Each fishing vessel shall carry on board an official document, issued by the competent authority of its country, showing the name, if any, and description of the vessel, its nationality, its registration letter or letters and number, and the name of the owner or of the firm or association to which it belongs.

(2) Each fishing vessel shall carry a national flag in good condition to be shown at the request of the competent authorities.

(3) The nationality of a fishing vessel shall not be concealed in any manner whatsoever.

ANNEX III: ADDITIONAL SIGNALS TO BE USED BY FISHING VESSELS

Rule 1

General

(1) Subject to compliance with the International Regulations for Preventing Collisions at Sea, the Rules herein are intended to prevent damage to fishing gear or accidents in the course of fishing operations.

(2) The Rules herein concerning lights shall apply in all weathers from sunset to sunrise when fishing vessels are engaged in fishing as a fleet and during such times no other lights shall be exhibited, except the lights prescribed in the International Regulations for Preventing Collisions at Sea and such lights as cannot be mistaken for the prescribed lights or do not impair their visibility or distinctive character, or interfere with the keeping of a proper look-out. These lights may also be exhibited from sunrise to sunset in restricted visibility and in all other circumstances when it is deemed necessary.

(3) For the purpose of these Rules the words employed shall have the meaning set down in the International Regulations for Preventing Collisions at Sea except that the term "fishing vessel" shall have the meaning assigned to it in Article 1 (2) of this Convention.

(4) The lights mentioned herein shall be placed where they can best be seen. They should be at least 3 feet (0.92 m.) apart but at a lower level than the lights prescribed in Rule 9(*c*) (i) and (*d*) of the International Regulations for Preventing Collisions at Sea 1960. They shall be visible at a distance of at least 1 mile, all round the horizon as nearly as possible and their visibility shall be less than the visibility of lights exhibited in accordance with Rule 9(*b*) of the above Regulations.

Rule 2

Signals for Trawling and Drift Netting

(1) Fishing vessels, when engaged in trawling, whether using demersal or pelagic gear shall exhibit:

(i) when shooting their nets:
two white lights in a vertical light one over the other;

(ii) when hauling their nets:
one white light over one red light in a vertical line one over the other;

(iii) when the net has come fast upon an obstruction:
two red lights in a vertical line one over the other.

(2) Fishing vessels engaged in drift netting may exhibit the lights prescribed in (1) above.

(3) Each fishing vessel engaged in pair trawling shall exhibit:

(i) by day: the "T" flag—"Keep clear of me. I am engaged in pair trawling", hoisted at the foremast;

(ii) by night: a searchlight shone forward and in the direction of the other fishing vessel of the pair;

(iii) when shooting or hauling the net or when the net has come fast upon an obstruction: the lights prescribed in (1) above.

(4) This rule need not be applied to fishing vessels of less than 65 feet (19.80 m.) in length. Any such exception and the areas in which fishing vessels so excepted are likely to be numerous shall be notified to the competent authorities of the other Contracting Parties likely to be concerned.

Rule 3

Light signals for purse seining

(1) Fishing vessels engaged in fishing with purse seines shall show two amber coloured lights, in a vertical line one over the other. These lights shall be flashing intermittently about once a second in such a way that when the lower is out the upper is on and vice versa. These lights shall only be shown while the fishing vessel's free movement is hampered by its fishing gear, warning other vessels to keep clear of it.

(2) This rule need not be applied to fishing vessels of less than 85 feet (25.90m.) in length. Any such exception and areas in which fishing vessels so excepted are likely to be numerous shall be notified to the competent authorities of the other Contracting Parties likely to be concerned.

Rule 4

Sound signals

No sound signals shall be used other than those prescribed by the International Regulations for Preventing Collisions at Sea and the International Code of Signals.

ANNEX IV: MARKING OF NETS, LINES AND OTHER GEAR

Rule 1

Anchored gear

(1) The ends of nets, lines and other gear anchored in the sea shall be fitted with flag or radar reflector buoys by day and light buoys by night sufficient to indicate their position and extent. Such lights should be visible at a distance of at least 2 miles in good visibility.

(2) By day the westernmost (meaning the half compass circle from south through west to and including north) end buoy of such gear extending horizontally in the sea shall be fitted with two flags one above the other or one flag and a radar reflector, and the easternmost (meaning the half compass circle from north through east to and including south) end buoy shall be fitted with one flag or a radar reflector. By night the westernmost end buoy shall be fitted with two white lights and the easternmost end buoy with one white light. In addition a buoy fitted with one flag or a radar reflector by day and one white light by night may be set 70–100 metres from each end buoy to indicate the direction of the gear.

(3) On such gear extending more than 1 mile additional buoys shall be placed at distances of not more than 1 mile so that no part of the gear extending 1 mile or more shall be left unmarked. By day every buoy shall be fitted with a flag or a radar reflector and by night as many buoys as possible with one white light. In no case shall the distance between two lights on the same gear exceed 2 miles.

(4) On such gear which is attached to a fishing vessel a buoy shall not be required at the end attached to the fishing vessel.

(5) The flagpole of each buoy shall have a height of at least 2 metres above the buoy.

Rule 2

Drift gear

(1) Nets or lines which drift in the sea shall be marked at each end and at distances of not more than 2 miles by a buoy with a pole not less than 2 metres above the buoy. The pole shall carry a flag or a radar reflector by day and a white light by night visible at a distance of at least 2 miles in good visibility.

(2) On gear which is attached to a fishing vessel a buoy shall not be required at the end attached to the fishing vessel.

ANNEX V: RULES GOVERNING THE OPERATIONS OF VESSELS

Rule 1

Subject to compliance with the International Regulations for Preventing Collisions at Sea all vessels shall conduct their operations so as not to interfere with the operations of fishing vessels, or fishing gear.

Rule 2

Vessels arriving on fishing grounds where fishing vessels are already fishing or have set their gear for that purpose shall inform themselves of the position and extent of gear already placed in the sea and shall not place themselves or their fishing gear so as to interfere with or obstruct fishing operations already in progress.

Rule 3

No vessel shall anchor or remain on a fishing ground where fishing is in progress if it would interfere with such fishing unless required for the purpose of its own fishing operations or in consequence of accident or other circumstances beyond its control.

Rule 4

Except in cases of *force majeure* no vessel shall dump in the sea any article or substance which may interfere with fishing or obstruct or cause damage to fish, fishing gear or fishing vessels.

Rule 5

No vessel shall use or have on board explosives intended for the catching of fish.

Rule 6

In order to prevent damage, fishing vessels engaged in trawling and other fishing vessels with gear in motion shall take all practicable steps to avoid nets and lines or other gear which is not being towed.

Rule 7

(1) When nets belonging to different fishing vessels get foul of each other, they shall not be severed without the consent of the parties concerned unless it is impossible to disengage them by other means.

(2) When fishing vessels fishing with lines entangle their lines, the fishing vessel which hauls up the lines shall not sever them unless they cannot be disengaged in any other way, in which case any lines which may be severed shall where possible be immediately joined together again.

(3) Except in cases of salvage and the cases to which the two preceding paragraphs relate, nets, lines or other gear shall not under any pretext whatever, be cut, hooked, held on to or lifted up except by the fishing vessel to which they belong.

(4) When a vessel fouls or otherwise interferes with gear not belonging to it, it shall take all necessary measures for reducing to a minimum the injury which may result to such gear. The fishing vessel to which the gear belongs shall, at the same time, avoid any action tending to aggravate such damage.

ANNEX VI: RULES APPLYING TO AUTHORISED OFFICERS

(1) An authorised officer shall carry a document of identity written in English, French and the language of the authorised officer (if different) in a form agreed by the Contracting Parties on the request of the depositary Government.

(2) Any orders to stop given by an authorised officer shall be given by the appropriate signal in the International Code of Signals.

(3) On boarding a vessel an authorised officer shall exhibit his document of identity.

(4) On boarding a vessel an authorised officer may require the master of the vessel to exhibit the document specified in Annex II Rule 2(1) and the fact of such document having been exhibited shall immediately be endorsed upon it by the authorised officer or on some other official document of the vessel

(5) On each occasion on which an authorised officer boards a vessel, he shall draw up a report in the form set out in the Appendix indicating the circumstances of the boarding and the information he secures.

(6) This report shall be drawn up in the language of the authorised officer and shown to the master of the vessel boarded, who shall be given an opportunity of adding in his own language any remarks he or any member of his crew may wish to make. The authorised officer shall sign the report in the presence of the master and give him a copy. A copy of the report shall be sent to the competent authority of the country of the vessel boarded. In cases of damage copies of the report shall also be sent to the competent authorities in the countries to which the other parties concerned belong.

(7) Whenever an authorised officer observes a vessel infringing the provisions of the Convention, he may report the occurrence to the competent authority of the country of the vessel, having first made every effort to communicate to the vessel in question by signal or otherwise his intention to report the infringement. If he orders the vessel to stop but does not board it, he shall report the circumstances to the competent authority of the country of the vessel.

(8) Ships carrying authorised officers, which may be vessels as defined in Article 1(2), shall fly a special flag or pennant. The special flag or pennant shall be in a form agreed by the Contracting Parties on the request of the depositary Government. Authorised officers shall exercise their powers under paragraphs (5) or (6) of Article 9, and communicate with vessels, only from surface craft.

APPENDIX: REPORT IN ACCORDANCE WITH PARAGRAPH (5) OF ANNEX VI TO THE CONVENTION

Authorised officer

1. Name and nationality.
2. Name of ship carrying him.

Position, date and time of occurrence

3.

Provisions of the convention in question

4.

Information on each vessel involved

General

5. Nationality.
6. Vessel's name and registration.
7. Skipper's name.
8. Owner's name and address.
9. Position, date and time of boarding.

At the time of occurrence

10. Fishing gear in use.
11. Stopped, anchored or estimated course and speed.
12. Signals or lights displayed and sound signals made.
13. Warnings given to other vessel(s).
14. Direction in which gear was shot or lying.
15. The horizontal distance gear extended from the vessel.

Conditions at the time of occurrence

16. Visibility.
17. Wind force and direction.
18. State of sea and tide and direction and strength of currents.
19. Other relevant conditions.
20. Describe, with the help of diagrams if necessary, the relative positions of vessels and gear.
21. Marking of any anchored or drifting gear involved.

Additional information

22. Full particulars of loss or damage, giving conditions of any gear involved.
23. Narrative description of occurrence.
24. Comments by Authorised Officer.
25. Statements by Witnesses.
26. Statements by Skippers of vessels involved.
27. Statements of photographs taken, with description of subjects (photographs to be attached to copy of report submitted to flag State).

Signature of Authorised Officer_____

The above report was prepared and signed by the Authorised Officer in our presence.

[SEAL] V. A. TODD,

For Librarian and Keeper of the Papers for the Secretary of State for Foreign Affairs.

DECEMBER 1, 1967.

Mr. FULBRIGHT. Mr. President, I wish to make a brief statement.

Mr. President, the Convention on the Conduct of Fishing Operations in the North Atlantic was unanimously reported by the Committee on Foreign Relations, and, so far as I am aware, there is no opposition to it. This multilateral convention, signed by the United States and 16 other nations, provides a modern, up-to-date code of conduct for those engaged in fishing operations in the zone approximately encompassed north of a line drawn between Cape Hatteras and Gibraltar.

To allay some fears, I might point out that this convention does not enter the bramblebush of controversy surrounding either the breadth of the territorial sea or the extent of exclusive fishery zones; rather, the convention proscribes specific rules and regulations aimed at promoting harmony and cooperation among all nations engaged in exploiting the living resources of the North Atlantic.

I ask unanimous consent that a portion of the committee's report describing in some detail the background and the intent of this convention be inserted at this point in the RECORD, together with the statement by Donald L. McKernan, Special Assistant to the Secretary of State for Fisheries and Wildlife who presented before the committee the administration's favorable recommendation on this treaty.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MAIN PURPOSE

This convention seeks to overcome the disorders and disturbances arising from increasing congestion on the fishing grounds of the North Atlantic. Accordingly, it establishes a uniform set of rules and regulations to govern the conduct of fishing operations in the North Atlantic fisheries zone, which the convention defines as approximately encompassing the area north of a line drawn between Gibraltar and Cape Hatteras (35°N).

BACKGROUND

By a resolution adopted at the conclusion of the January, 1964 European Fisheries Conference, the attending nations requested the United Kingdom to invite all countries par-

ticipating in the Northeast Atlantic fisheries, plus Canada and the United States, to a technical conference for the purpose of drafting a convention which would update the rules and regulations of the 1882 Convention for Regulating the Police of the North Seas Fisheries. While few nations had ratified this convention, "its code of conduct was generally followed by the European fisherman, and it served its basic purpose until the mid-Twentieth century." During the period from April, 1965 to March, 1967, the Government of the United Kingdom hosted four conference sessions, with the text of the Convention on the Conduct of Fishing Operations in the North Atlantic being adopted on March 17, 1967.

SUMMARY OF MAJOR PROVISIONS

With a view to providing standard rules and regulations for the conduct of fishing operations in the North Atlantic, Articles three through six set forth requirements relating to (1) identification of vessels involved in fishing operations; (2) use of signals in addition to the International Regulations for Prevention of Collisions; (3) marking of nets, lines and other gear, anchored or drifting, in order to establish location and extent; and (4) rules of conduct so as not to interfere with the fishing operations of others. Annexes two through five complement these articles by stipulating specific rules and/or technical procedures. In order to expedite the settlement of damage claims, there is a provision (Art. VII) for the establishment of special review boards, without infringing upon the right to normal legal procedures if desired.

While each of the contracting parties agree to implement and enforce the conventions' rules and regulations (Art. VIII), added meaning is given to the implementation and enforcement procedures by Article IX which establishes a mutual inspection system permitting authorized officers from the Contracting Parties to enforce compliance, including the boarding of vessels if necessary. Rules governing the conduct of authorized officers are spelled out in Annex six. A detailed explanation of the inspection provisions is contained in the statement of Donald L. McKernan, Special Assistant to the Secretary of State for Fisheries and Wildlife, which is contained in the appendix. It should be made clear, however, that neither the inspection system nor the convention's other rules and regulations impinge upon the coastal state's jurisdiction over the conduct of fishing operations in its exclusive fishery zone.

Articles X and XI provide for amendments to the Convention's substantive provisions and to the annexes, respectively; amendments to the former require the advice and consent of the Senate, while amendments to the latter do not. According to the Department of State, this formulation provides a needed degree of flexibility for altering, if necessary, the technical rules and procedures contained in the annexes.

Reservations to the convention are permitted only to those provisions providing for compulsory arbitration (Art. XIII) and the boarding of vessels by authorized officers (Art. IX, paragraphs 5 and 6). Spain and Poland signed with reservations to both provisions. The Soviet Union signed with a reservation to Article XIII, and Portugal ratified the convention with a reservation to paragraphs 5 and 6 of Article IX.

The U.S. Government played an active role in the formulation of this convention; it has expressed the belief that the major agreement achieved on Articles IX and XIII is particularly significant, and it has stated the hope that this convention will set a pattern for other agreements where overcrowding on high seas fisheries is causing similar problems. To date, the United States and sixteen other nations have signed the convention, with Iceland, Norway and Portugal having already deposited their instruments of ratification. The convention will enter into force ninety days after ratification by ten countries.

COMMITTEE ACTION AND RECOMMENDATION

The Convention on the Conduct of Fishing Operations in the North Altantic was submitted to the Senate on April 18, 1969 and was referred to the Committee on Foreign Relations.

On October 7, 1969, pursuant to notice, the Committee held a public hearing at which Donald L. McKernan, Special Assistant to the Secretary of State for Fisheries and Wildlife, presented the Administration's favorable recommendation. During this hearing, the Committee inquired whether or not the convention's rules and regulations could be extended on behalf of the United States by Executive Agreement to areas outside the Atlantic. Mr. McKernan stated that, without Senate approval, the convention's coverage could not be extended beyond the Atlantic region, but that it could be extended by Executive agreement to the entire Atlantic, that is beyond the North Atlantic. The Committee accepted the need for such flexibility in this instance but expressed the view that its approval in this case should not be looked upon as a precedent for incorporating similar flexibility in other kinds of treaties. The record of this hearing is printed in the appendix for the information of the Senate. The Commitee knows of no opposition to this treaty.

Immediately following its hearing of October 7, 1969, the Committee met in executive session and ordered that this treaty be favorably reported.

The United States Government has actively sought effective rules and regulations for the policing of high seas fisheries where fishing operations are intense among several nations. The Convention on the Conduct of Fishing Operations in the North Atlantic is designed to meet this objective and represents a significant step forward in helping to bring about more orderly exploitation and development of the high seas fishery zone of the North Atlantic.

The Committee on Foreign Relations recommends that the Senate give its advice and consent to this treaty at an early date.

STATEMENT BEFORE THE SENATE FOREIGN RELATIONS COMMITTEE, OCTOBER 7, 1969

THE CONVENTION ON THE CONDUCT OF FISHING OPERATIONS IN THE NORTH ATLANTIC

(By Donald L. McKernan)

Mr. Chairman, the rapid increase in the exploitation of North Atlantic fisheries has resulted in congestion on the fishing grounds by mounting numbers of fishing vessels of various countries. The proposed Convention on the Conduct of Fishing Operations in the North Atlantic, signed at London June 1, 1967, is designed to provide a modern code for the conduct of fishing operations and related activities and thus to relieve the problems and dangers associated with such congestion. The Convention establishes a system of identification, marking, and light signals for fishing vessels, which will be useful not only for the purposes of the Convention but for other purposes as well, such as search and rescue. It sets forth a principle of non-interference with other fishing vessels and gear and operations in areas frequented by vessels of several nations and provides for a simplified method of settling claims among fishermen of various nations for damage to fishing gear or vessels.

Many European fishing vessels in the North Atlantic have followed a code of conduct laid down in the 1882 Convention for Regulating the Police of the North Seas Fisheries, even though many European governments were not parties to the Convention. The proposed Convention is designed to replace the rules under that treaty with a more modern code.

Until a few years ago, foreign fishermen rarely operated close to our Atlantic coast and such a code was of little direct concern to our fishermen. Increased foreign fishing along our shores has caused complaints of harassment or impaired operating freedom due to congestion on the fishing grounds, although these complaints tend to diminish as fishermen become used to the various signals and fishing practices utilized by the different fleets. Our fishermen would welcome an effective body of rules on standardized signals and practices to assist them.

The proposed Convention derives from a British invitation, requested by other European nations, to all countries participating in the fisheries of the Northeast Atlantic, together with the United States and Canada, to join in the preparation of a draft convention embodying a modern code for the conduct of fishing operations and related activities.

The United States and Canada accepted the invitation and joined in the task of preparing a draft. The needs and problems of American fishermen were known to our negotiators and a number of conferences were held with fisheries representatives during the course of the negotiations. A series of sessions from 1965 to 1967 culminated in the document before you.

We believe that the requirements of the American fishermen in dealing with problems caused by the heavy concentration of vessels on fishing grounds in the Convention area are substantially met by the terms of the Convention. The Convention might be extended to other portions of the Atlantic if future developments in the fishery pattern indicates this is desirable.

Two provisions of the Convention are perhaps worthy of special note:

First, Article 6 provides that all vessels shall conduct their operations so as not to interfere with the operations of fishing vessels or gear, and rules to achieve this end are set forth in Annex V. Rule 4 of the Annex provides that except in cases of force majeure no vessel shall dump in the sea any article or substance which may interfere with fishing or obstruct or cause damage to fish, fishing gear or fishing vessels. This provision should significantly reduce pollution of the sea on the fishing grounds as well as promote conservation and the safety of vessels. Some waste substances may injure or kill fish, to the detriment of all fishermen. There have been numerous cases of old discarded nets continuing to fish, that is capture fish which subsequently die without being harvested. Old nets have also become entangled in the propellers of vessels, rendering them inoperative and in danger of collision or foundering. This provision should substantially reduce or eliminate these dangers.

Second, Article 9 and the rules laid down pursuant to it in Annex VI provide for a mutual enforcement system to supplement national enforcement activities. Because fishing vessels from any one nation are often dispersed over wide areas of the ocean, it is often difficult for national enforcement officers to ensure compliance with fishing rules and regulations. Under these provisions, authorized enforcement officers from any nation party to the Convention would be empowered, in certain circumstances, to undertake enforcement activities with regard to vessels of other parties when national enforcement officers of the flag state of the vessel were not present. This pooling of enforcement efforts should ensure a more universal and comprehensive application of the safety and conduct provisions of the Convention, to the benefit of all nations and all fishermen in the area.

Thus, when our own Coast Guard is not present on the fishing grounds, enforcement officers of other nations would be able to

observe the compliance of American vessels with the rules laid down in the Convention on safety and conduct of fishing. If the circumstances warranted, they would be able to stop or board an American fishing vessel to ensure compliance with the rules. Conversely, our Coast Guard would be able to ensure that the vessels of the extensive foreign fishing fleets operating off our coasts comply with the rules on safety and conduct. When necessary, they would be able to stop and board such foreign vessels.

While no seaman likes the idea of additional policing which might interfere with his operations at sea, especially by foreign powers, our fishermen recognize that such provisions are necessary if we are to insure good order and conduct on the fishing grounds, and if vessels which are operating far from home in areas where it may be difficult for the flag state to send an enforcement officer are to receive the same supervision that they do in their home waters. We have had extensive consultation with our fishing industry on this matter, both with regard to the present Convention and with regard to actions which are being taken in other forums with regard to international enforcement of conservation programs, and we have found widespread recognition that the possible hindrance to our own vessels which might result from such mutual inspection programs are more than compensated for by the assurances they will give that other fishing vessels are living up to the strict standards we impose on our own fishermen.

Recognizing that such provisions could be utilized for harassment of foreign fishing activities, the conference carefully laid out rules to prevent untoward interference with fishing operations by international inspectors.

We believe that these provisions will materially assist American fishermen in carrying out their legitimate operations on the high seas amongst foreign fishing fleets.

The PRESIDENT pro tempore. If there be no objection, Executive D, 91st Congress, first session, will be considered as having passed through its various parliamentary stages up to and including the presentation of the resolution of ratification, which will be read for the information of the Senate.

The bill clerk read as follows:

Resolved, (two-thirds of the Senators present and concurring therein), that the Senate advise and consent to the ratification of the Convention on the Conduct of Fishing Operations in the North Atlantic, done at London, June 1, 1967 (Ex. D, 91st Cong., 1st sess).

VIENNA CONVENTION ON CONSULAR RELATIONS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Chair lay before the Senate Executive E, 91st Congress, first session, the Vienna Convention on Consular Relations.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider Executive E, 91st Congress, first session, the Vienna convention on consular relations, which was read for the second time, as follows:

UNITED NATIONS CONFERENCE ON CONSULAR RELATIONS

VIENNA CONVENTION ON CONSULAR RELATIONS

The States Parties to the present Convention,

Recalling that consular relations have been established between peoples since ancient times,

Having in mind the Purposes and Principles of the Charter of the United Nations concerning the sovereign equality of States, the maintenance of international peace and security, and the promotion of friendly relations among nations,

Considering that the United Nations Conference on Diplomatic Intercourse and Immunities adopted the Vienna Convention on Diplomatic Relations which was opened for signature on 18 April 1961,

Believing that an international covention on consular relations, privileges and immunities would also contribute to the development of friendly relations among nations, irrespective of their differing constitutional and social systems,

Realizing that the purpose of such privileges and immunities is not to benefit individuals but to ensure the efficient performance of functions by consular posts on behalf of their respective States,

Affirming that the rules of customary international law continue to govern matters not expressly regulated by the provisions of the present Convention,

Have agreed as follows:

Article 1

Definitions

1. For the purposes of the present Convention, the following expressions shall have the meanings hereunder assigned to them:

(*a*) "consular post" means any consulate-general, consulate, vice-consulate or consular agency;

(*b*) "consular district" means the area assigned to a consular post for the exercise of consular functions;

(*c*) "head of consular post" means the person charged with the duty of acting in that capacity;

(*d*) "consular officer" means any person, including the head of a consular post, entrusted in that capacity with the exercise of consular functions;

(*e*) "consular employee" means any person employed in the administrative or technical service of a consular post;

(*f*) "member of the service staff" means any person employed in the domestic service of a consular post;

(*g*) "members of the consular post" means consular officers, consular employees and members of the service staff;

(*h*) "members of the consular staff" means consular officers, other than the head of a consular post, consular employees and members of the service staff;

(*i*) "member of the private staff" means a person who is employed exclusively in the private service of a member of the consular post;

(*j*) "consular premises" means the buildings or parts of buildings and the land ancillary thereto, irrespective of ownership used exclusively for the purposes of the consular post;

(*k*) "consular archives" includes all the papers, documents, correspondence, books, films, tapes and registers of the consular post, together with the ciphers and codes, the card-indexes and any article of furniture intended for their protection or safekeeping.

2. Consular officers are of two categories, namely career consular officers and honorary consular officers. The provisions of Chapter II of the present Convention apply to consular posts headed by career consular officers; the provisions of Chapter III govern consular posts headed by honorary consular officers.

3. The particular status of members of the consular posts who are nationals or permanent residents of the receiving State is governed by Article 71 of the present Convention.

CHAPTER I. CONSULAR RELATIONS IN GENERAL

SECTION I. ESTABLISHMENT AND CONDUCT OF CONSULAR RELATIONS

Article 2

Establishment of consular relations

1. The establishment of consular relations between States takes place by mutual consent.

2. The consent given to the establishment of diplomatic relations between two States implies, unless otherwise stated, consent to the establishment of consular relations.

3. The severance of diplomatic relations shall not *ipso facto* involve the severance of consular relations.

Article 3

Exercise of consular functions

Consular functions are exercised by consular posts. They are also exercised by diplomatic missions in accordance with the provisions of the present Convention.

Article 4

Establishment of a consular post

1. A consular post may be established in the territory of the receiving State only with that State's consent.

2. The seat of the consular post, its classification and the consular district shall be established by the sending State and shall be subject to the approval of the receiving State.

3. Subsequent changes in the seat of the consular post, its classification or the consular district may be made by the sending State only with the consent of the receiving State.

4. The consent of the receiving State shall also be required if a consulate-general or a consulate desires to open a vice-consulate or a consular agency in a locality other than that in which it is itself established.

5. The prior express consent of the receiving State shall also be required for the opening of an office forming part of an existing consular post elsewhere than at the seat thereof.

Article 5

Consular functions

Consular functions consist in:

(*a*) protecting in the receiving State the interests of the sending State and of its nationals, both individuals and bodies corporate, within the limits permitted by international law:

(*b*) furthering the development of commercial, economic, cultural and scientific relations between the sending State and the receiving State and otherwise promoting friendly relations between them in accordance with the provisions of the present Convention;

(*c*) ascertaining by all lawful means conditions and developments in the commercial, economic, cultural and scientific life of the receiving State, reporting thereon to the Government of the sending State and giving information to persons interested;

(*d*) issuing passports and travel documents to nationals of the sending State, and visas or appropriate documents to persons wishing to travel to the sending State;

(*e*) helping and assisting nationals, both individuals and bodies corporate, of the sending State;

(*f*) acting as notary and civil registrar and in capacities of a similar kind, and performing certain functions of an administrative nature, provided that there is nothing contrary thereto in the laws and regulations of the receiving State;

(*g*) safeguarding the interests of nationals, both individuals and bodies corporate, of the sending State in cases of succession *mortis causa* in the territory of the receiving State, in accordance with the laws and regulations of the receiving State;

(*h*) safeguarding, within the limits imposed by the laws and regulations of the re-

ceiving State, the interests of minors and other persons lacking full capacity who are nationals of the sending State, particularly where any guardianship or trusteeship is required with respect to such persons;

(*i*) subject to the practices and procedures obtaining in the receiving State, representing or arranging appropriate representation for nationals of the sending State before the tribunals and other authorities of the receiving State, for the purpose of obtaining, in accordance with the laws and regulations of the receiving State, provisional measures for the preservation of the rights and interests of these nationals, where, because of absence or any other reason, such nationals are unable at the proper time to assume the defense of their rights and interests;

(*j*) transmitting judicial and extra-judicial documents or executing letters rogatory or commissions to take evidence for the courts of the sending State in accordance with international agreements in force or, in the absence of such international agreements, in any other manner compatible with the laws and regulations of the receiving State;

(*k*) exercising rights of supervision and inspection provided for in the laws and regulations of the sending State in respect of vessels having the nationality of the sending State, and of aircraft registered in that State, and in respect of their crews;

(*l*) extending assistance to vessels and aircraft mentioned in sub-paragraph (*k*) of this Article and to their crews, taking statements regarding the voyage of a vessel, examining and stamping the ship's papers, and, without prejudice to the powers of the authorities of the receiving State, conducting investigations into any incidents which occurred during the voyage, and settling disputes of any kind between the master, the officers and the seamen in so far as this may be authorized by the laws and regulations of the sending State;

(*m*) performing any other functions entrusted to a consular post by the sending State which are not prohibited by the laws and regulations of the receiving State or to which no objection is taken by the receiving State or which are referred to in the international agreements in force between the sending State and the receiving State.

Article 6

Exercise of consular functions outside the consular district

A consular officer may, in special circumstances, with the consent of the receiving State, exercise his functions outside his consular district.

Article 7

Exercise of consular functions in a third State

The sending State may, after notifying the States concerned, entrust a consular post established in a particular State with the exercise of consular functions in another State, unless there is express objection by one of the States concerned.

Article 8

Exercise of consular functions on behalf of a third State

Upon appropriate notification to the receiving State, a consular post of the sending State may, unless the receiving State objects, exercise consular functions in the receiving State on behalf of a third State.

Article 9

Classes of heads of consular posts

1. Heads of consular posts are divided into four classes, namely:

(*a*) consuls-general;

(*b*) consuls;

(*c*) vice-consuls;

(*d*) consular agents.

2. Paragraph 1 of this Article in no way restricts the right of any of the Contracting Parties to fix the designation of consular officers other than the heads of consular posts.

Article 10

Appointment and admission of heads of consular posts

1. Heads of consular posts are appointed by the sending State and are admitted to the exercise of their functions by the receiving State.

2. Subject to the provisions of the present Convention, the formalities for the appointment and for the admission of the head of a consular post are determined by the laws, regulations and usages of the sending State and of the receiving State respectively.

Article 11

The consular commission or notification of appointment

1. The head of a consular post shall be provided by the sending State with a document, in the form of a commission or similar instrument, made out for each appointment, certifying his capacity and showing, as a general rule, his full name, his category and class, the consular district and the seat of the consular post.

2. The sending State shall transmit the commission or similar instrument through the diplomatic or other appropriate channel to the Government of the State in whose territory the head of a consular post is to exercise his functions.

3. If the receiving State agrees, the sending State may, instead of a commission or similar instrument, send to the receiving State a notification containing the particulars required by paragraph 1 of this article.

Article 12

The exequatur

1. The head of a consular post is admitted to the exercise of his functions by an authorization from the receiving State termed an *exequatur*, whatever the form of this authorization.

2. A State which refuses to grant an *exequatur* is not obliged to give to the sending State reasons for such refusal.

3. Subject to the provisions of Articles 13 and 15, the head of a consular post shall not enter upon his duties until he has received an *exequatur*.

Article 13

Provisional admission of heads of consular posts

Pending delivery of the *exequatur*, the head of a consular post may be admitted on a provisional basis to the exercise of his functions. In that case, the provisions of the present Convention shall apply.

Article 14

Notification to the authorities of the consular district

As soon as the head of a consular post is admitted even provisionally to the exercise of this functions, the receiving State shall immediately notify the competent authorities of the consular district. It shall also ensure that the necessary measures are taken to enable the head of a consular post to carry out the duties of his office and to have the benefit of the provisions of the present Convention.

Article 15

Temporary exercise of the functions of the head of a consular post

1. If the head of a consular post is unable to carry out his functions or the position of head of consular post is vacant, an acting head of post may act provisionally as head of the consular post.

2. The full name of the acting head of post shall be notified either by the diplomatic mission of the sending State or, if that State has no such mission in the receiving State, by the head of the consular post, or, if he is unable to do so, by any competent authority of the sending State, to the Ministry for Foreign Affairs of the receiving State or to the authority designated by that Ministry. As a general rule, this notification shall be given in advance. The receiving State may make the admission as acting head of post of a person who is neither a diplomatic agent nor a consular officer of the sending State in the receiving State conditional on its consent.

3. The competent authorities of the receiving State shall afford assistance and protection to the acting head of post. While he is in charge of the post, the provisions of the present Convention shall apply to him on the same basis as to the head of the consular post concerned. The receiving State shall not, however, be obliged to grant to an acting head of post any facility, privilege or immunity which the head of the consular post enjoys only subject to conditions not fulfilled by the acting head of post.

4. When, in the circumstances referred to in paragraph 1 of this Article, a member of the diplomatic staff of the diplomatic mission of the sending State in the receiving State is designated by the sending State as an acting head of post, he shall, if the receiving State does not object thereto, continue to enjoy diplomatic privileges and immunities.

Article 16

Precedence as between heads of consular posts

1. Heads of consular posts shall rank in each class according to the date of the grant of the *exequatur*.

2. If, however, the head of a consular post before obtaining the *exequatur* is admitted to the exercise of his functions provisionally, his precedence shall be determined according to the date of the provisional admission; this precedence shall be maintained after the granting of the *exequatur*.

3. The order of precedence as between two or more heads of consular posts who obtained the *exequatur* or provisional admission on the same date shall be determined according to the dates on which their commissions or similar instruments or the notifications referred to in paragraph 3 of Article 11 were presented to the receiving State.

4. Acting heads of posts shall rank after all heads of consular posts and, as between themselves, they shall rank according to the dates on which they assumed their functions as acting heads of posts as indicated in the notifications given under paragraph 2 of Article 15.

5. Honorary consular officers who are heads of consular posts shall rank in each class after career heads of consular posts, in the order and according to the rules laid down in the foregoing paragraphs.

6. Heads of consular posts shall have precedence over consular officers not having that status.

Article 17

Performance of diplomatic acts by consular officers

1. In a State where the sending State has no diplomatic mission and is not represented by a diplomatic mission of a third State, a consular officer may, with the consent of the receiving State, and without affecting his consular status, be authorized to perform diplomatic acts. The performance of such acts by a consular officer shall not confer upon him any right to claim diplomatic privileges and immunities.

2. A consular officer may, after notification addressed to the receiving State, act as representative of the sending State to any inter-governmental organization. When so acting, he shall be entitled to enjoy any privileges and immunities accorded to such a representative by customary international law or by international agreement; however, in respect of the performance by him of any consular function, he shall not be entitled to any greater immunity from jurisdiction than that to which a consular officer is entitled under the present Convention.

Article 18

Appointment of the same person by two or more States as a consular officer

Two or more States may, with the consent of the receiving State, appoint the same person as a consular officer in that State.

Article 19

Appointment of members of consular staff

1. Subject to the provisions of Articles 20, 22 and 23, the sending State may freely appoint the members of the consular staff.

2. The full name, category and class of all consular officers, other than the head of a consular post, shall be notified by the sending State to the receiving State in sufficient time for the receiving State, if it so wishes, to exercise its rights under paragraph 3 of Article 23.

3. The sending State may, if required by its laws and regulations, request the receiving State to grant an *exequatur* to a consular officer other than the head of a consular post.

4. The receiving State may, if required by its laws and regulations, grant an *exequatur* to a consular officer other than the head of a consular post.

Article 20

Size of the consular staff

In the absence of an express agreement as to the size of the consular staff, the receiving State may require that the size of the staff be kept within limits considered by it to be reasonable and normal, having regard to circumstances and conditions in the consular district and to the needs of the particular consular post.

Article 21

Precedence as betwen consular officers of a consular post

The order of precedence as between the consular officers of a consular post and any change thereof shall be notified by the diplomatic mission of the sending State or, if that State has no such mission in the receiving State, by the head of the consular post, to the Ministry for Foreign Affairs of the receiving State or to the authority designated by that Ministry.

Article 22

Nationality of consular officers

1. Consular officers should, in principle, have the nationality of the sending State.

2. Consular officers may not be appointed from among persons having the nationality of the receiving State except with the express consent of that State which may be withdrawn at any time.

3. The receiving State may reserve the same right with regard to nationals of a third State who are not also nationals of the sending State.

Article 23

Persons declared non grata

1. The receiving State may at any time notify the sending State that a consular officer is *persona non grata* or that any other member of the consular staff is not acceptable. In that event, the sending States shall, as the case may be, either recall the person concerned or terminate his functions with the consular post.

2. If the sending State refuses or fails within a reasonable time to carry out its obligations under paragraph 1 of this Article, the receiving State may, as the case may be, either withdraw the *exequatur* from the person concerned or cease to consider him as a member of the consular staff.

3. A person appointed as a member of a consular post may be declared unacceptable before arriving in the territory of the receiving State, or, if already in the receiving State, before entering on his duties with the consular post. In any such case, the sending State shall withdraw his appointment.

4. In the cases mentioned in paragraphs 1 and 3 of this Article, the receiving State is not obliged to give to the sending State reasons for its decision.

Article 24

Notification to the receiving State of appointments, arrivals and departures

1. The Ministry for Foreign Affairs of the receiving State or the authority designated by that Ministry shall be notified of:

(*a*) the appointment of members of a consular post, their arrival after appointment to the consular post, their final departure or the termination of their functions and any other changes affecting their status that may occur in the course of their service with the consular post;

(*b*) the arrival and final departure of a person belonging to the family of a member of a consular post forming part of his household and, where appropriate, the fact that a person becomes or ceases to be such a member of the family;

(*c*) the arrival and final departure of members of the private staff and, where appropriate, the termination of their service as such;

(*d*) the engagement and discharge of persons resident in the receiving State as members of a consular post or as members of the private staff entitled to privileges and immunities.

2. When possible, prior notification of arrival and final departure shall also be given.

SECTION II END OF CONSULAR FUNCTIONS

Article 25

Termination of the functions of a member of a consular post

The functions of a member of a consular post shall come to an end *inter alia:*

(*a*) on notification by the sending State to the receiving State that his functions have come to an end;

(*b*) on withdrawal of the *exequatur;*

(*c*) on notification by the receiving State to the sending State that the receiving State has ceased to consider him as a member of the consular staff.

Article 26

Departure from the territory of the receiving State

The receiving State shall, even in case of armed conflict, grant to members of the consular post and members of the private staff, other than nationals of the receiving State, and to members of their families forming part of their households irrespective of nationality, the necessary time and facilities to enable them to prepare their departure and to leave at the earliest possible moment after the termination of the functions of the members concerned. In particular, it shall, in case of need, place at their disposal the necessary means of transport for themselves and their property other than property acquired in the receiving State the export of which is prohibited at the time of departure.

Article 27

Protection of consular premises and archives and of the interests of the sending State in exceptional circumstances

1. In the event of the severance of consular relations between two States:

(*a*) the receiving State shall, even in case of armed conflict, respect and protect the consular premises, together with the property of the consular post and the consular archives;

(*b*) the sending State may entrust the custody of the consular president, together with the property contained therein and the consular archives, to a third State acceptable to the receiving State;

(*c*) the sending State may entrust the protection of its interests and those of its nationals to a third State acceptable to the receiving State.

2. In the event of the temporary or permanent closure of a consular post, the provisions of sub-paragraph (*a*) of paragraph 1 of this Article shall apply. In addition,

(*a*) if the sending State, although not represented in the receiving State by a diplomatic mission, has another consular post in the territory of that State, that consular post may be entrusted with the custody of the premises of the consular post which has been closed, together with the property contained therein and the consular archives, and, with the consent of the receiving State, with the exercise of consular functions in the district of that consular post; or

(*b*) if the sending State has no diplomatic mission and no other consular post in the receiving State, the provisions of sub-paragraphs (*b*) and (*c*) of paragraph 1 of this Article shall apply.

CHAPTER II. FACILITIES, PRIVILEGES AND IMMUNITIES RELATING TO CONSULAR POSTS, CAREER CONSULAR OFFICERS AND OTHER MEMBERS OF A CONSULAR POST

SECTION I. FACILITIES, PRIVILEGES AND IMMUNITIES RELATING TO A CONSULAR POST

Article 28

Facilities for the work of the consular post

The receiving State shall accord full facilities for the performance of the functions of the consular post.

Article 29

Use of national flag and coat-of-arms

1. The sending State shall have the right to the use of its national flag and coat-of-arms in the receiving State in accordance with the provisions of this Article.

2. The national flag of the sending State may be flown and its coat-of-arms displayed on the building occupied by the consular post and at the entrance door thereof, on the residence of the head of the consular post and on his means of transport when used on official business.

3. In the exercise of the right accorded by this Article regard shall be had to the laws, regulations and usages of the receiving State.

Article 30

Accommodation

1. The receiving State shall either facilitate the acquisition on its territory, in accordance with its laws and regulations, by the sending State of premises necessary for its consular post or assist the latter in obtaining accommodation in some other way.

2. It shall also, where necessary, assist the consular post in obtaining suitable accommodation for its members.

Article 31

Inviolability of the consular premises

1. Consular premises shall be inviolable to the extent provided in this Article.

2. The authorities of the receiving State shall not enter that part of the consular premises which is used exclusively for the purpose of the work of the consular post except with the consent of the head of the consular post or of his designee or of the head of the diplomatic mission of the sending State. The consent of the head of the consular post may, however, be assumed in case of fire or other disaster requiring prompt protective action.

3. Subject to the provisions of paragraph 2 of this Article, the receiving State is under a special duty to take all appropriate steps to protect the consular premises against any intrusion or damage and to prevent any disturbance of the peace of the consular post or impairment of its dignity.

4. The consular premises, their furnishings, the property of the consular post and its means of transport shall be immune from any form of requisition for purposes of national defence or public utility. If expropriation is necessary for such purposes, all possible steps shall be taken to avoid impeding the performance of consular functions, and prompt, adequate and effective compensation shall be paid to the sending State.

Article 32

Exemption from taxation of consular premises

1. Consular premises and the residence of the career head of consular post of which the sending State or any person acting on its behalf is the owner or lessee shall be exempt from all national, regional or municipal dues and taxes whatsoever, other than such as represent payment for specific services rendered.

2. The exemption from taxation referred to in paragraph 1 of this Article shall not apply to such dues and taxes if, under the law of the receiving State, they are payable by the person who contracted with the sending State or with the person acting on its behalf.

Article 33

Inviolability of the Consular archives and documents

The consular archives and documents shall be inviolable at all times and wherever they may be.

Article 34

Freedom of movement

Subject to its laws and regulations concerning zones entry into which is prohibited or regulated for reasons of national security, the receiving State shall ensure freedom of movement and travel in its territory to all members of the consular post.

Article 35

Freedom of communication

1. The receiving State shall permit and protect freedom of communication on the part of the consular post for all official purposes. In communicating with the Government, the diplomatic missions and other consular posts, wherever situated, of the sending State, the consular post may employ all appropriate means, including diplomatic or consular couriers, diplomatic or consular bags and messages in code or cipher. However, the consular post may install and use a wireless transmitter only with the consent of the receiving State.

2. The official correspondence of the consular post shall be inviolable. Official correspondence means all correspondence relating to the consular post and its functions.

3. The consular bag shall be neither opened nor detained. Nevertheless, if the competent authorities of the receiving State have serious reason to believe that the bag contains something other than the correspondence, documents or articles referred to in paragraph 4 of this Article, they may request that the bag be opened in their presence by an authorized representative of the sending State. If this request is refused by the authorities of the sending State, the bag shall be returned to its place of origin.

4. The packages constituting the consular bag shall bear visible external marks of their character and may contain only official correspondence and documents or articles intended exclusively for official use.

5. The consular courier shall be provided with an official document indicating his status and the number of packages constituting the consular bag. Except with the consent of the receiving State he shall be neither a national of the receiving State, nor, unless he is a national of the sending State, a permanent resident of the receiving State. In the performance of his functions he shall be protected by the receiving State. He shall enjoy personal inviolability and shall not be liable to any form of arrest or detention.

6. The sending State, its diplomatic missions and its consular posts may designate consular couriers *ad hoc*. In such cases the provisions of paragraph 5 of this Article shall also apply except that the immunities therein mentioned shall cease to apply when such a courier has delivered to the consignee the consular bag in his charge.

7. A consular bag may be entrusted to the captain of a ship or of a commercial aircraft scheduled to land at an authorized port of entry. He shall be provided with an official document indicating the number of packages constituting the bag, but he shall not be considered to be a consular courier. By arrangement with the appropriate local authorities, the consular post may send one of its members to take possession the bag directly and freely from the captain of the ship or of the aircraft.

Article 36

Communication and contact with nationals of the sending State

1. With a view to facilitating the exercise of consular functions relating to nationals of the sending State:

(*a*) consular officers shall be free to communicate with nationals of the sending State and to have access to them. Nationals of the sending State shall have the same freedom with respect to communication with and access to consular officers of the sending State;

(*b*) if he so requests, the competent authorities of the receiving State shall, without delay, inform the consular post of the sending State if, within its consular district, a national of that State is arrested or committed to prison or to custody pending trial or is detained in any other manner. Any communication addressed to the consular post by the person arrested, in prison, custody or detention shall also be forwarded by the said authorities without delay. The said authorities shall inform the person concerned without delay of his rights under this subparagraph;

(*c*) consular officers shall have the right to visit a national of the sending State who is in prison, custody or detention, to converse and correspond with him and to arrange for his legal representation. They shall also have the right to visit any national of the sending State who is in prison, custody or detention in their district in pursuance of a judgment. Nevertheless, consular officers shall refrain from taking action on behalf of a national who is in prison, custody or detention if he expressly opposes such action.

2. The rights referred to in paragraph 1 of this Article shall be exercised in conformity with the laws and regulations of the receiving State, subject to the proviso, however, that the said laws and regulations must enable full effect to be given to the purposes for which the rights accorded under this Article are intended.

Article 37

Information in cases of deaths, guardianship or trusteeship wrecks and air accidents

If the relevant information is available to the competent authorities of the receiving State, such authorities shall have the duty:

(*a*) in the case of the death of a national of the sending State, to inform without delay the consular post in whose district the death occurred;

(*b*) to inform the competent consular post without delay of any case where the appointment of a guardian or trustee appears to be in the interests of a minor or other person lacking full capacity who is a national of the sending State. The giving of this information shall, however, be without prejudice to the operation of the laws and regulations of the receiving State concerning such appointments;

(*c*) if a vessel, having the nationality of the sending State, is wrecked or runs aground in the territorial sea or internal waters of the receiving State, or if an aircraft registered in the sending State suffers an accident on the territory of the receiving State, to inform without delay the consular post nearest to the scene of the occurrence.

Article 38

Communication with the authorities of the receiving State

In the exercise of their functions, consular officers may address:

(*a*) the competent local authorities of their consular district;

(*b*) the competent central authorities of the receiving State if and to the extent that this is allowed by the laws, regulations and usages of the receiving State or by the relevant international agreements.

Article 39

Consular fees and charges

1. The consular post may levy in the territory of the receiving State the fees and charges provided by the laws and regulations of the sending State for consular acts.

2. The sums collected in the form of the fees and charges referred to in paragraph 1 of this Article, and the receipts for such fees and charges, shall be exempt from all dues and taxes in the receiving State.

SECTION II. FACILITIES, PRIVILEGES AND IMMUNITIES RELATING TO CAREER CONSULAR OFFICERS AND OTHER MEMBERS OF A CONSULAR POST

Article 40

Protection of consular officers

The receiving State shall treat consular officers with due respect and shall take all appropriate steps to prevent any attack on their person, freedom or dignity.

Article 41

Personal inviolability of consular officers

1. Consular officers shall not be liable to arrest or detention pending trial, except in the case of a grave crime and pursuant to a decision by the competent judicial authority.

2. Except in the case specified in paragraph 1 of this Article, consular officers shall not be committed to prison or liable to any other form of restriction on their personal freedom save in execution of a judicial decision of final effect.

3. If criminal proceedings are instituted against a consular officer, he must appear before the competent authorities. Nevertheless, the proceedings shall be conducted with the respect due to him by reason of his official position and, except in the case specified in paragraph 1 of this Article, in a manner which will hamper the exercise of consular functions as little as possible. When, in the circumstances mentioned in paragraph 1 of this Article, it has become necessary to detain a consular officer, the proceedings against him shall be instituted with the minimum of delay.

Article 42

Notification of arrest, detention or prosecution

In the event of the arrest or detention, pending trial, of a member of the consular staff, or of criminal proceedings being instituted against him, the receiving State shall promptly notify the head of the consular post. Should the latter be himself the object of any such measure, the receiving State shall notify the sending State through the diplomatic channel.

Article 43

Immunity from jurisdiction

1. Consular officers and consular employees shall not be amenable to the jurisdiction of the judicial or administrative authorities of the receiving State in respect of acts performed in the exercise of consular functions.

2. The provisions of paragraph 1 of this Article shall not, however, apply in respect of a civil action either:

(*a*) arising out of a contract concluded by a consular officer or a consular employee in

which he did not contract expressly or impliedly as an agent of the sending State; or

(b) by a third party for damage arising from an accident in the receiving State caused by a vehicle, vessel or aircraft.

Article 44

Liability to give evidence

1. Members of a consular post may be called upon to attend as witnesses in the course of judicial or administrative proceedings. A consular employee or a member of the service staff shall not, except in the cases mentioned in paragraph 3 of this Article, decline to give evidence. If a consular officer should decline to do so, no coercive measure or penalty may be applied to him.

2. The authority requiring the evidence of a consular officer shall avoid interference with the performance of his functions. It may, when possible, take such evidence at his residence or at the consular post or accept a statement from him in writing.

3. Members of a consular post are under no obligation to give evidence concerning matters connected with the exercise of their functions or to produce official correspondence and documents relating thereto. They are also entitled to decline to give evidence as expert witnesses with regard to the law of the sending State.

Article 45

Waiver of privileges and immunities

1. The sending State may waive, with regard to a member of the consular post, any of the privileges and immunities provided for in Articles 41, 43 and 44.

2. The waiver shall in all cases be express, except as provided in paragraph 3 of this Article, and shall be communicated to the receiving State in writing.

3. The initiation of proceedings by a consular officer or a consular employee in a matter where he might enjoy immunity from jurisdiction under Article 43 shall preclude him from invoking immunity from jurisdiction in respect of any counter-claim directly connected with the principal claim.

4. The waiver of immunity from jurisdiction for the purposes of civil or administrative proceedings shall not be deemed to imply the waiver of immunity from the measures of execution resulting from the judicial decision; in respect of such measures, a separate waiver shall be necessary.

Article 46

Exemption from registration of aliens and residence permits

1. Consular officers and consular employees and members of their families forming part of their households shall be exempt from all obligations under the laws and regulations of the receiving State in regard to the registration of aliens and residence permits.

2. The provisions of paragraph 1 of this Article shall not, however, apply to any consular employee who is not a permanent employee of the sending State or who carries on any private gainful occupation in the receiving State or to any member of the family of any such employee.

Article 47

Exemption from work permits

1. Members of the consular post shall, with respect to services rendered for the sending State, be exempt from any obligations in regard to work permits imposed by the laws and regulations of the receiving State concerning the employment of foreign labour.

2. Members of the private staff of consular officers and of consular employees shall, if they do not carry on any other gainful occupation in the receiving State, be exempt from the obligations referred to in paragraph 1 of this Article.

Article 48

Social security exemption

1. Subject to the provisions of paragraph 3 of this Article, members of the consular post with respect to services rendered by them for the sending State, and members of their families forming part of their households, shall be exempt from social security provisions which may be in force in the receiving State.

2. The exemption provided for in paragraph 1 of this Article shall apply also to members of the private staff who are in the sole employ of members of the consular post, on condition:

(a) that they are not nationals of or permanently resident in the receiving State; and

(b) that they are covered by the social security provisions which are in force in the sending State or a third State.

3. Members of the consular post who employ persons to whom the exemption provided for in paragraph 2 of this Article does not apply shall observe the obligations which the social security provisions of the receiving State impose upon employers.

4. The exemption provided for in paragraphs 1 and 2 of this Article shall not preclude voluntary participation in the social security system of the receiving State, provided that such participation is permitted by that State.

Article 49

Exemption from taxation

1. Consular officers and consular employees and members of their families forming part of their households shall be exempt from all dues and taxes, personal or real, national, regional or municipal, except:

(a) indirect taxes of a kind which are normally incorporated in the price of goods or services;

(b) dues or taxes on private immovable property situated in the territory of the receiving State, subject to the provisions of Article 32;

(c) estate, succession or inheritance duties, and duties on transfers, levied by the receiving State, subject to the provisions of paragraph (b) of Article 51;

(d) dues and taxes on private income, including capital gains, having its source in the receiving State and capital taxes relating to investments made in commercial or financial undertakings in the receiving State;

(e) charges levied for specific services rendered;

(f) registration, court or record fees, mortgage dues and stamp duties, subject to the provisions of Article 32.

2. Members of the service staff shall be exempt from dues and taxes on the wages which they receive for their services.

3. Members of the consular post who employ persons whose wages or salaries are not exempt from income tax in the receiving State shall observe the obligations which the laws and regulations of that State impose upon employers concerning the levying of income tax.

Article 50

Exemption from customs duties and inspection

1. The receiving State shall, in accordance with such laws and regulations as it may adopt, permit entry of and grant exemption from all customs duties, taxes, and related charges other than charges for storage, cartage and similar services, on:

(a) articles for the official use of the consular post;

(b) articles for the personal use of a consular officer or members of his family forming part of his household, including articles intended for his establishment. The articles intended for consumption shall not exceed the quantities necessary for direct utilization by the persons concerned.

2. Consular employees shall enjoy the privileges and exemptions specified in paragraph 1 of this Article in respect of articles imported at the time of first installation.

3. Personal baggage accompanying consular officers and members of their families forming part of their households shall be exempt from inspection. It may be inspected only if there is serious reason to believe that it contains articles other than those referred to in subparagraph (b) of paragraph 1 of this Article, or articles the import or export of which is prohibited by the laws and regulations of the receiving State or which are subject to its quarantine laws and regulations. Such inspection shall be carried out in the presence of the consular officer or member of his family concerned.

Article 51

Estate of a member of the consular post or of a member of his family

In the event of the death of a member of the consular post or of a member of his family forming part of his household, the receiving State:

(a) shall permit the export of the movable property of the deceased, with the exception of any such property acquired in the receiving State the export of which was prohibited at the time of his death;

(b) shall not levy national, regional or municipal estate, succession or inheritance duties, and duties on transfers, on movable property the presence of which in the receiving State was due solely to the presence in that State of the deceased as a member of the consular post or as a member of the family of a member of the consular post.

Article 52

Exemption from personal services and contributions

The receiving State shall exempt members of the consular post and members of their families forming part of their households from all personal services, from all public service of any kind whatsoever, and from military obligations such as those connected with requisitioning, military contributions and billeting.

Article 53

Beginning and end of consular privileges and immunities

1. Every member of the consular post shall enjoy the privileges and immunities provided in the present Convention from the moment he enters the territory of the receiving State on proceeding to take up his post or, if already in its territory, from the moment when he enters on his duties with the consular post.

2. Members of the family of a member of the consular post forming part of his household and members of his private staff shall receive the privileges and immunities provided in the present Convention from the date from which he enjoys privileges and immunities in accordance with paragraph 1 of this Article or from the date of their entry into the territory of the receiving State or from the date of their becoming a member of such family or private staff, whichever is the latest.

3. When the functions of a member of the consular post have come to an end, his privileges and immunities and those of a member of his family forming part of his household or a member of his private staff shall normally cease at the moment when the person concerned leaves the receiving State or on the expiry of a reasonable period in which to do so, whichever is the sooner, but shall subsist until that time, even in case of armed conflict. In the case of the persons referred to in paragraph 2 of this Article, their privileges and immunities shall come to an end when they cease to belong to the household or to be in the service of a member of the consular post provided, however, that if such persons intend leaving the receiving State within a reasonable period thereafter, their privileges and immunities shall subsist until the time of their departure.

4. However, with respect to acts performed by a consular officer or a consular employee

in the exercise of his functions, immunity from jurisdiction shall continue to subsist without limitation of time.

5. In the event of the death of a member of the consular post, the members of his family forming part of his household shall continue to enjoy the privileges and immunities accorded to them until they leave the receving State or until the expiry of a reasonable period enabling them to do so, whichever is the sooner.

Article 54

Obligations of third States

1. If a consular officer passes through or is in the territory of a third State, which has granted him a visa if a visa was necessary, while proceeding to take up or return to his post or when returning to the sending State the third State shall accord to him all immunities provided for by the other Articles of the present Convention as may be required to ensure his transit or return. The same shall apply in the case of any member of his family forming part of his household enjoying such privileges and immunities who are accompanying the consular officer or traveling separately to join him or to return to the sending State.

2. In circumstances similar to those specified in paragraph 1 of this Article, third States shall not hinder the transit through their territory of other members of the consular post or of members of their families forming part of their households.

3. Third States shall accord to official correspondence and to other official communications in transit, including messages in code or cipher, the same freedom and protection as the receiving State is bound to accord under the present Convention. They shall accord to consular couriers who have been granted a visa, if a visa was necessary, and to consular bags in transit, the same inviolability and protection as the receiving State is bound to accord under the present Convention.

4. The obligations of third States under paragraphs 1, 2 and 3 of this Article shall also apply to the persons mentioned respectively in those paragraphs, and to official communications and to consular bags, whose presence in the territory of the third State is due to *force majeure*.

Article 55

Respect for the laws and regulations of the receiving State

1. Without prejudice to their privileges and immunities, it is the duty of all persons enjoying such privileges and immunities to respect the laws and regulations of the receiving State. They also have a duty not to interfere in the internal affairs of that State.

2. The consular premises shall not be used in any manner incompatible with the exercise of consular functions.

3. The provisions of paragraph 2 of this Article shall not exclude the possibility of offices of other institutions or agencies being installed in part of the building in which the consular premises are situated, provided that the premises assigned to them are separate from those used by the consular post. In that event, the said offices shall not, for the purposes of the present Convention, be considered to form part of the consular premises.

Article 56

Insurance against third party risks

Members of the consular post shall comply with any requirement imposed by the laws and regulations of the receiving State in respect of insurance against third party risks arising from the use of any vehicle, vessel or aircraft.

Article 57

Special provisions concerning private gainful occupation

1. Career consular officers shall not carry on for personal profit any professional or commercial activity in the receiving State.

2. Privileges and immunities provided in this Chapter shall not be accorded:

(*a*) to consular employees or to members of the service staff who carry on any private gainful occupation in the receiving State;

(*b*) to members of the family of a person referred to in subparagraph (*a*) of this paragraph or to members of his private staff;

(*c*) to members of the family of a member of a consular post who themselves carry on any private gainful occupation in the receiving State.

CHAPTER III. REGIME RELATING TO HONORARY CONSULAR OFFICERS AND CONSULAR POSTS HEADED BY SUCH OFFICERS

Article 58

General provisions relating to facilities, privileges and immunities

1. Articles 28, 29, 30, 34, 35, 36, 37, 38 and 39, paragraph 3 of Article 54 and paragraphs 2 and 3 of Article 55 shall apply to consular posts headed by an honorary consular officer. In addition, the facilities, privileges and immunities of such consular posts shall be governed by Articles 59, 60, 61 and 62.

2. Articles 42 and 43, paragraph 3 of Article 44, Articles 45 and 53 and paragraph 1 of Article 55 shall apply to honorary consular officers. In addition, the facilities, privileges and immunities of such consular officers shall be governed by Articles 63, 64, 65, 66 and 67.

3. Privileges and immunities provided in the present Convention shall not be accorded to members of the family of an honorary consular officer or of a consular employee employed at a consular post headed by an honorary consular officer.

4. The exchange of consular bags between two consular posts headed by honorary consular officers in different States shall not be allowed without the consent of the two receiving States concerned.

Article 59

Protection of the consular premises

The receiving State shall take such steps as may be necessary to protect the consular premises of a consular post headed by an honorary consular officer against any intrusion or damage and to prevent any disturbance of the peace of the consular post or impairment of its dignity.

Article 60

Exemption from taxation of consular premises

1. Consular premises of a consular post headed by an honorary consular officer of which the sending State is the owner or lessee shall be exempt from all national, regional or municipal dues and taxes whatsoever, other than such as represent payment for specific services rendered.

2. The exemption from taxation referred to in paragraph 1 of this Article shall not apply to such dues and taxes if, under the laws and regulations of the receiving State, they are payable by the person who contracted with the sending State.

Article 61

Inviolability of consular archives and documents

The consular archives and documents of a consular post headed by an honorary consular officer shall be inviolable at all times and wherever they may be, provided that they are kept separate from other papers and documents and, in particular, from the private correspondence of the head of a consular post and of any person working with him, and from the materials, books or documents relating to their profession or trade.

Article 62

Exemptions from customs duties

The receiving State shall, in accordance with such laws and regulations as it may adopt, permit entry of, and grant exemption from all customs duties, taxes, and related charges other than charges for storage cartage and similar services on the following articles, provided that they are for the official use of a consular post headed by an honorary consular officer: coats-of-arms, flags, signboards, seals and stamps, books, official printed matter, office furniture, office equipment and similar articles supplied by or at the instance of the sending State to the consular post.

Article 63

Criminal proceedings

If criminal proceedings are instituted against an honorary consular officer, he must appear before the competent authorities. Nevertheless, the proceedings shall be conducted with the respect due to him by reason of his official position and, except when he is under arrest or detention, in a manner which will hamper the exercise of consular functions as little as possible. When it has become necessary to detain an honorary consular officer, the proceedings against him shall be instituted with the minimum of delay.

Article 64

Protection of honorary consular officers

The receiving State is under a duty to accord to an honorary consular officer such protection as may be required by reason of his official position.

Article 65

Exemption from registration of aliens and residence permits

Honorary consular officers with the exception of those who carry on for personal profit any professional or commercial activity in the receiving State, shall be exempt from all obligations under the laws and regulations of the receiving State in regard to the registration of aliens and residence permits.

Article 66

Exemption from taxation

An honorary consular officer shall be exempt from all dues and taxes on the remuneration and emoluments which he receives from the sending States in respect of the exercise of consular functions.

Article 67

Exemption from personal services and contributions

The receiving State shall exempt honorary consular officers from all personal services and from all public services of any kind whatsoever and from military obligations such as those connected with requisitioning, military contributions and billeting.

Article 68

Optional character of the institution of honorary consular officers

Each State is free to decide whether it will appoint or receive honorary consular officers.

CHAPTER IV. GENERAL PROVISIONS

Article 69

Consular agents who are not heads of consular posts

1. Each State is free to decide whether it will establish or admit consular agencies conducted by consular agents not designated as heads of consular post by the sending State.

2. The conditions under which the consular agencies referred to in paragraph 1 of this Article may carry on their activities and the privileges and immunities which may be enjoyed by the consular agents in charge of them shall be determined by agreement between the sending State and the receiving State.

Article 70

Exercise of consular functions by diplomatic missions

1. The provisions of the present Convention apply also, so far as the context permits, to the exercise of consular functions by a diplomatic mission.

2. The names of members of a diplomatic mission assigned to the consular section or otherwise charged with the exercise of the consular functions of the mission shall be notified to the Ministry for Foreign Affairs of the receiving State or to the authority designated by that Ministry.

3. In the exercise of consular functions a diplomatic mission may address:

(*a*) the local authorities of the consular district;

(*b*) the central authorities of the receiving State if this is allowed by the laws, regulations and usages of the receiving State or by relevant international agreements.

4. The privileges and immunities of the members of a diplomatic mission referred to in paragraph 2 of this Article shall continue to be governed by the rules of international law concerning diplomatic relations.

Article 71

Nationals or permanent residents of the receiving State

1. Except in so far as additional facilities, privileges and immunities may be granted by the receiving State, consular officers who are nationals of or permanently resident in the receiving State shall enjoy only immunity from jurisdiction and personal inviolability in respect of official acts performed in the exercise of their functions, and the privilege provided in paragraph 3 of Article 44. So far as these consular officers are concerned, the receiving State shall likewise be bound by the obligation laid down in Article 42. If criminal proceedings are instituted against such a consular officer, the proceedings shall, except when he is under arrest or detention, be conducted in a manner which will hamper the exercise of consular functions as little as possible.

2. Other members of the consular post who are nationals of or permanently resident in the receiving State and members of their families, as well as members of the families of consular officers referred to in paragraph 1 of this Article, shall enjoy facilities, privileges and immunities only in so far as these are granted to them by the receiving State. Those members of the families of members of the consular post and those members of the private staff who are themselves nationals of or permanently resident in the receiving State shall likewise enjoy facilities, privileges and immunities only in so far as these are granted to them by the receiving State. The receiving State shall, however, exercise its jurisdiction over those persons in such a way as not to hinder unduly the performance of the functions of the consular post.

Article 72

Non-discrimination

1. In the application of the provisions of the present Convention the receiving State shall not discriminate as between States.

2. However, discrimination shall not be regarded as taking place:

(*a*) where the receiving State applies any of the provisions of the present Convention restrictively because of a restrictive application of that provision to its consular posts in the sending State;

(*b*) where by custom or agreement States extend to each other more favourable treatment than is required by the provisions of the present Convention.

Article 73

Relationship between the present Convention and other international agreements

1. The provisions of the present Convention shall not affect other international agreements in force as between States parties to them.

2. Nothing in the present Convention shall preclude States from concluding international agreements confirming or supplementing or extending or amplifying the provisions thereof.

CHAPTER V. FINAL PROVISIONS

Article 74

Signature

The present Convention shall be open for signature by all States Members of the United Nations or of any of the specialized agencies or Parties to the Statute of the International Court of Justice, and by any other State invited by the General Assembly of the United Nations to become a Party to the Convention, as follows until 31 October 1963 at the Federal Ministry for Foreign Affairs of the Republic of Austria and subsequently, until 31 March 1964, at the United Nations Headquarters in New York.

Article 75

Ratification

The present Convention is subject to ratification. The instruments of ratification shall be deposited with the Secretary-General of the United Nations.

Article 76

Accession

The present Convention shall remain open for accession by any State belonging to any of the four categories mentioned in Article 74. The instruments of accession shall be deposited with the Secretary-General of the United Nations.

Article 77

Entry into force

1. The present Convention shall enter into force on the thirtieth day following the date of the twenty-second instrument of ratification or accession with the Secretary-General of the United Nations.

2. For each State ratifying or acceding to the Convention after the deposit of the twenty-second instrument of ratification or accession, the Convention shall enter into force on the thirtieth day after deposit by such State of its instrument of ratification or accession.

Article 78

Notfications by the Secretary-General

The Secretary-General of the United Nations shall inform all States belonging to any of the four categories mentioned in Article 74:

(*a*) of signatures to the present Convention and of the deposit on instruments of ratification or accession, in accordance with Articles 74, 75, and 76;

(*b*) of the date on which the present Convention will enter into force, in accordance with Article 77.

Article 79

Authentic texts

The original of the present Convention, of which the Chinese, English, French, Russian, and Spanish texts are equally authentic, shall be deposited with the Secretary-General of the United Nations, who shall send certified copies thereof to all States belonging to any of the four categories mentioned in Article 74.

IN WITNESS WHEREOF the undersigned Plenipotentiaries, being dutly authorized thereto by their respective Governments, have signed the present Convention.

Done at Vienna, this twenty-fourth day of April, one thousand nine hundred and sixty-three.

[1] "Contrary to the principle of sovereign equality of States and to the right of all States to participate in general multilateral treaties Articles 74 and 76 of the Vienna Convention on Consular Relations deprive certain States of their undeniable right to become parties to a treaty of a general character, concerning matters of legitimate interest of any State, which according to its preamble should contribute to the development of friendly relations among nations irrespective of their differing constitutional and social systems."

(*Translation by the Secretariat of the United Nations:*) Manuel Cabrera Macia, Ambassador of Mexico accredited to the Government of the Federal Republic of Austria, signs the Vienna Convention on Consular Relations of 24 April 1963 as Plenipotentiary, subject to ratification by his Government and with the reservation that Mexico does not accept that part of article 31, paragraph 4, of the Convention which refers to expropriation of consular premises. The main reason for this reservation is that that paragraph, by contemplating the possibility of expropriation of consular premises by the receiving State, presupposes that the sending State is the owner of the premises. That situation is precluded in the Mexican Republic by article 27 of the Political Constitution of the United Mexican States, according to which foreign States cannot acquire private title to immovable property unless it is situated at the permanent set of Federal Power and necessary for the direct use of their embassies or legations. OPTIONAL PROTOCOL CONCERNING THE COMPULSORY SETTLEMENT OF DISPUTES

The States Parties to the present Protocol and to the Vienna Convention on Consular Relations, hereinafter referred to as "the Convention", adopted by the United Nations Conference held at Vienna from 4 March to 22 April 1963,

Expressing their wish to resort in all matters concerning them in respect of any dispute arising out of the interpretation or application of the Convention to the compulsory jurisdiction of the International Court of Justice, unless some other form of settlement has been agreed upon by the parties within a reasonable period.

Have agreed as follows:

Article I

Disputes arising out of the interpretation or application of the Convention shall lie within the compulsory jurisdiction of the International Court of Justice and may accordingly be brought before the Court by an application made by any party to the dispute being a Party to the present Protocol.

Article II

The parties may agree, within a period of two months after one party has notified its opinion to the other that a dispute exists, to resort not to the International Court of Justice but to an arbitral tribunal. After the expiry of the said period, either party may bring the dispute before the Court by an application.

Article III

1. Within the same period of two months, the parties may agree to adopt a conciliation procedure before resorting to the International Court of Justice.

2. The conciliation commission shall make its recommendations within five months after its appointment. If its recommendations are not accepted by the parties to the dispute within two months after they have been delivered, either party may bring the dispute before the Court by an application.

Article IV

States Parties to the Convention, to the Optional Protocol concerning Acquisition of Nationality, and to the present Protocol may at any time declare that they will extend the provisions of the present Protocol to disputes arising out of the interpretation or application of the Optional Protocol concerning Acquisition of Nationality. Such declarations shall be notified to the Secretary-General of the United Nations.

Article V

The present Protocol shall be open for signature by all States which may become Parties to the Convention as follows: until 31 October 1963 at the Federal Ministry for Foreign Affairs of the Republic of Austria and, subsequently, until 31 March 1964, at the United Nations Headquarters in New York.

Article VI

The present Protocol is subject to ratification. The instruments of ratification shall be deposited with the Secretary-General of the United Nations.

Article VII

The present Protocol shall remain open for accession by all States which may become Parties to the Convention. The instruments of accession shall be deposited with the Secretary-General of the United Nations.

Article VIII

1. The present Protocol shall enter into force on the same day as the Convention or on the thirtieth day following the date of deposit of the second instrument of ratification or accession to the Protocol with the Secretary-General of the United Nations, whichever date is the later.

2. For each State ratifying or acceding to the present Protocol after its entry into force in accordance with paragraph 1 of this Article, the Protocol shall enter into force on the thirtieth day after deposit by such State of its instrument of ratification or accession.

Article IX

The Secretary-General of the United Nations shall inform all States which may become Parties to the Convention:

(*a*) of signatures to the present Protocol and of the deposit of instruments of ratification or accession, in accordance with Articles V, VI and VII;

(*b*) of declarations made in accordance with Article IV of the present Protocol;

(*c*) of the date on which the present Protocol will enter into force, in accordance with Article VIII.

Article X

The original of the present Protocol, of which the Chinese, English, French, Russian and Spanish texts are equally authentic, shall be deposited with the Secretary-General of the United Nations, who shall send certified copies thereof to all States referred to in Article V.

IN WITNESS WHEREOF the undersigned plenipotentiaries, being duly authorised thereto by their respective Governments, have signed the present Protocol.

DONE AT VIENNA, this twenty-fourth day of April, one thousand nine hundred and sixty-three.

I hereby certify that the foregoing text is a true copy of the Optional Protocol concerning the Complusory Settlement of Disputes adopted by the United Nations Conference on Consular Relations, held at the Neue Hofburg in Vienna, Austria, from 4 March to 22 April 1963, the original of which is deposited with the Secretary-General of the United Nations.

For the Secretary-General: The Legal Counsel, C. A. Stavropoulos.

United Nations, New York, 15 April 1964.

Mr. FULBRIGHT. Mr. President, on behalf of the Committee on Foreign Relations I recommend that the Senate give its advice and consent to the ratification of the Vienna Convention on Consular Relations.

The only remarkable thing about considering the treaty at this time is that it has taken the executive branch 6 years to recommend its ratification.

The committee was told that the delay was largely due to a disagreement within the executive branch between those who advocated continuing the traditional U.S. bilateral approach to consular conventions or following the multilateral one represented by the Vienna Convention. After 6 years of arguing the merits of both approaches, the executive branch has now concluded essentially to pursue both—the multilateral one where it serves U.S. purposes and the bilateral one where it serves these purposes even better.

The multilateral versus bilateral argument points up a basic characteristic of the Vienna Convention. It embodies those standards upon which the 92 nations represented at the conference could agree. In many ways, these are minimum standards—not as high as those embodied in our bilateral treaties.

Having said this, I do not want to denigrate the achievement represented by the Vienna Convention. This is the first international convention of its kind and constitutes a considerable contribution to the development and codification of international law. The setting forth of agreed-upon standards will reduce conflicts and frictions between nations over the rights and responsibilities of consular officers and thereby also help to promote friendly relations between them.

The committee's report and the testimony appended to it, as well as the report of the U.S. delegation to the conference which appears on pages 46–73 of Executive E, describes the convention in detail. In view of the Senate's familiarity with consular conventions. I think it is sufficient to state that it covers the same subjects in largely the same manner. To illustrate the lesser standards often embodied in the Vienna Convention I might refer to the Soviet Consular Convention which was one of the most recent bilateral treaties approved by the United States. The Senate will recall that the provision giving consular officers complete criminal immunity was the occasion for considerable debate in the Senate. In contrast the Vienna Convention provides no such immunity. While it does provide that consular officers may not be detained or arrested for possible criminal violations pending trial, even there an exception is made in the case of "grave crimes."

An important fact to bear in mind in considering the Vienna Convention is that, while it spells out the privileges and immunities of consular posts and their officers in the United States, it also guarantees them to our vast consular establishment overseas. This will be of particular importance in many of the newly independent nations which have not had the opportunity to develop a bilateral network of such treaties.

There is one last point I wish to stress again about the Vienna Convention. By its own terms it will not affect any existing bilateral treaties. Moreover, the United States—and other signatories of course—may continue to negotiate bilateral treaties with nonsignatories of the convention and even with signatories if these treaties clarify, amplify, or supplement the Vienna treaty obligations. So the United States can continue to seek higher standards of protection where it so desires.

Mr. President, the committee is unaware of any opposition to the Vienna Convention on Consular Relations and recommends favorable action by the Senate.

The PRESIDENT pro tempore. If there be no objection, Executive E, 91st Congress, first session, will be considered as having passed through its various parliamentary stages up to and including the presentation of the resolution of ratification, which the clerk will read for the information of the Senate.

The bill clerk read as follows:

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Vienna Convention on Consular Relations and a Certified Copy of the Optional Protocol Concerning the Compulsory Settlement of Disputes, signed at Vienna under date of April 24, 1963. (Executive E, 91st Congress, 1st session.)

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that, beginning at 1:45 p.m. today, these two conventions be voted upon separately but immediately following one another. This request has been cleared with the minority. These have to be voted on and it was thought much more convenient to do it at that time.

The PRESIDENT pro tempore. Is there objection to the request of the Sen-

ator from Arkansas? The Chair hears none, and it is so ordered; the vote on the ratification of these two conventions will be postponed until 1:45 p.m. today.

LEGISLATIVE SESSION

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

NOMINATION OF JUDGE CLEMENT F. HAYNSWORTH, JR., TO SUPREME COURT

Mr. HRUSKA. Mr. President, one of the biggest political fights of this session of Congress will be fought on the Senate floor over the nomination of Judge Clement F. Haynsworth, Jr., to the Supreme Court. I regret that very much. It is not our job in advising and consenting to a nomination to wage political battles. Our duty is to insure that the nominee is one of those few individuals truly qualified to sit on the Supreme Court.

A Senator's vote should not be cast because the nominee is "for" or "against" any individual or group. His vote should be cast because the nominee is not "for" or "against" any individual or group. But that is not the way this battle is shaping up.

Frankly, I was surprised by the ferocity of the attack on Judge Haynsworth. Perhaps that is because I attended most of the hearings and reviewed all the evidence. I have heard the attacks made against him and I consider them all answered by competent testimony. Still the opposition has been adamant. There have been demands that the President withdraw Judge Haynsworth's name.

The President of the United States called a press conference on Tuesday to make absolutely clear his position on this nomination. He will not withdraw the name. His support of the nominee is firm and his confidence in the nominee is complete. I commend the President for his forthright stand and his rejection of the attacks by innuendo and rumor made on the nominee.

In his press conference, President Nixon said:

> You may recall that when I nominated Judge Haynsworth, I said that he was the man, of all the circuit judges in the country, and a chief judge with 12 years experience, that he was the man I considered to be, by age, experience, background, philosophy the best qualified to serve on the Supreme Court at this time.
>
> * * * * *
>
> I reiterated that position, and today, after having had an opportunity to evaluate all the charges that have been made in the past three weeks I reaffirm my support of Judge Haynsworth and in reaffirming it, I reaffirm it with even greater conviction.

The President's discussion of this nomination is valuable and illuminating. Mr. President, I ask unanimous consent that the transcript of the press conference, as it appears in the October 21, 1969, Washington Post be printed in the RECORD.

There being no objection, the press conference was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 21, 1969]

NIXON ON HAYNSWORTH: "I AM GOING TO STAND BY HIM"

Following is the transcript of President Nixon's news conference yesterday:

The President: Ron Ziegler has suggested that it might be useful to members of the press if from time to time on a specific subject I brief the press myself and then take questions so you can follow through on that subject.

You may recall that I did this on the occasion of the Chief Justice Burger subject and it seems to me that this type of procedure is one that we can follow.

I want also to say that as far as those who are here for television and radio, you, of course, can only comment on this because we do not have sound and do not have film. But we will have ready, I understand, on December 15th, the new press room in the West Wing. When that is available we shall have this kind of briefing session of a subject-by-subject basis in that room so that those who want to get sound or film can get it. We won't do it always this way. Sometimes we will do it this way, but I think that will be a very useful way to do it.

It will be a very nice room. I was there this morning and it is coming along very well.

This morning this will be on the record and a transcript will be made available to you when we finish.

This morning I have selected as a subject one you have been asking Ron about over the past several weeks, the Haynsworth matter.

In discussing that matter, I want to give you my own thinking with regard to the nomination of Judge Haynsworth, where it stands at the present time, and what my evaluation of the charges that have been made against him is.

REAFFIRMS SUPPORT

You may recall that when I nominated Judge Haynsworth, I said that he was the man, of all the circuit judges in the country, and a chief judge, with 12 years experience, that he was the man I considered to be, by age, experience, background, philosophy the best qualified to serve on the Supreme Court at this time.

Three weeks ago at a press conference I not only had one question on this matter, as I recall, two. I reiterated that position, and today, after having had an opportunity to evaluate all the charges that have been made in the past three weeks I reaffirm my support of Judge Haynsworth and in reaffirming it I reaffirm it with even greater conviction.

I say it with greater conviction because when a man has been through the fire, when he has had his entire life and its entire record exposed to the glare of investigation, which, of course, any man who is submitted for confirmation to the Senate should expect to have, and in addition to that, when he has had to go through what I believe to be a vicious character assassination, if after all that he stands up and comes through as a man of integrity, a man of honesty, and a man of qualifications, then that even more indicates that he deserves the support of the President of the United States who nominated him in the first place, and also the votes of the senators who will be voting on his nomination.

I would like to touch upon perhaps three or four of the major points that have been raised: They are technical points, as many of you who have been studying the case will know.

I should say I have some experience in investigations myself, and I have studied this case completely in every respect.

I have read the income tax returns, the financial statements, all the charges that have been made by various senators, and the answers that have been made on the Senate floor by Judge Marlow Cook, by Senator Allott, and also the evaluation, of course, of the Department of Justice.

Based on that examination, I personally now have made and concluded now that all the evidence is in, there are four or five points, perhaps, that are worth discussing, but more if you want to bring them up in your questions.

REBUFFS CHARGES

The charge is made that Judge Haynsworth should have disqualified himself in six cases involving litigants who were customers of a company in which he owned stock. I have examined those cases and that charge. I agree completely with the American Bar Association, with Judge Sobeloff who conducted an investigation of this matter in 1963 and 1964, and also with John Frank, the leading authority on conflict of interest, when he said that not only did Judge Haynsworth have no requirement to disqualify himself; he had a responsibility to sit in these cases because in not one of these instances or cases named did Judge Haynsworth use his influence in any way in behalf of the company in which he owned stock, and in no instance was there any indication that he was influenced whatever in decisions by that stock ownership.

If you want to spread this out just a bit, if we were to apply that kind of a standard to all federal court judges across this country, I would say that perhaps half of them would have to be impeached, and some in the Supreme Court, because carrying it to the ridiculous end result, if a judge owned stock in U.S. Steel, U.S. Steel has customers, a great number of them, and most of those customers or a great number of them get to the Supreme Court or the circuit court of appeals.

So the judge should not disqualify himself because customers of a company he happens to own stock in are in the court. This charge has no substance.

The second major charge is that Judge Haynsworth had a substantial interest in litigation which he decided as a member of the Circuit Court of Appeals.

Let me be quite precise. The law refers not to a substantial interest in the company or the litigant, but a substantial interest in the case. Of course, that is the proper standard to apply.

In this case, I find that the senator from Indiana who made the charges cited six cases, and these six cases represent perhaps one of the most glaring examples of sloppy staff work that I have seen in the years of seeing what can happen in such cases. Two of the cases were mistakes, of course, and on the others the question of a substantial interest has been again, reduced to an absurdity.

In the Brunswick case, it is now found, as Judge Marlow Cook pointed out—and he was a judge before he became a senator, as you know—Judge Haynsworth would have profited by $5.00, at the most, probably $4.92, the exact figure, if the litigant had recovered all the amount that was involved in the case.

In the Grace case, which involved, incidentally, a parent-subsidiary relationship, Judge Haynsworth's stock would have been reduced in value by 48 cents as a result of the decision that he made.

As an indication of the staff work in this case, one of the other reasons was the Greenville Hotel case.

It is true that Judge Haynsworth did have an interest in the Greenville Hotel. It appeared that years ago as an attorney he was a director for the hotel. Being a director of the hotel he was issued a share of stock in the hotel corporation.

Then after he became a judge, he received a stock dividend of 15 cents, a check which was mailed to him. The judge, of course, returned the check, thinking it was a joke. The Company returned it to him. So Judge Haynsworth recorded 15 cents on his income tax return.

Then there is another group of cases that have been raised. That is that Judge Haynsworth should have disqualified himself in those cases involving former clients of his law firm. I should say his former law firm. The law is quite clear here. A judge does not have responsibility and should not disqualify himself in cases involving clients of his former law firm unless that relationship has been very close to the client and has continued close, and also, in point of time, unless the relationship has continued. In other words, the passage of time and the closeness of the relationship is a factor to be considered.

"BEYOND SUSPICION"

In all of the cases, the 12 which were raised in hearings involving the former clients, it appeared that Judge Haynsworth was beyond suspicion, and, as a matter of fact not only should not have disqualified himself but had a duty to sit, in my opinion.

Now the Bobby Baker matter. This is guilt by association and character assassination of the very worst type. Judge Haynsworth knew Bobby Baker. He saw him last ten years ago. Many of the gentlemen of the press know I used to see him quite often when he was a clerk to the Majority. He had three contacts with him. He had no influence on Bobby Baker, and Bobby Baker had no influence on him.

The so-called business deals in which they were partners have been completely laid before the Senate committee, and any suggestion of improper influence has been discounted by Senator Williams, who is kind of a bull on these matters.

I should say, incidentally, while we are talking, I knew Bobby Baker very well myself, too, as the presiding officer of the Senate. He was clerk to the Majority.

One of the members of my staff, Rose Mary Woods, pointed up something I had forgotten. As a matter of fact, Bobby Baker's wife served as a stenographer on my staff for several months when I was a senator from California.

The fact that I knew him does not make me guilty by association. The fact that Judge Haynsworth along with others knew him, Senator Hollings and others, does not make him guilty by association.

On this particular point, I stand very firmly against the use of that tactic.

Now I will go to something a little more fundamental because this involves the decision as to what senators should consider as they determine whether they confirm a judge for the Supreme Court, or, for that matter, any court.

The question is raised, and one senator, Senator Magnuson, I thought quite candidly and honestly faced up to this question. He said he did not raise any question with regard to Judge Haynsworth's impropriety charges, but that he simply disagreed with his philosophy on certain matters, civil rights and labor law.

That is a ground which a senator can give for rejecting, perhaps, Judge Haynsworth. I do not believe it is a proper ground. I would agree with those senators, many of whom are now opposing Judge Haynsworth, who, in the Marshall confirmation, categorically said that a judge's philosophy was not a proper basis for rejecting him from the Supreme Court.

Looking back over the history of the cases, as I said when you were here before on the Burger matter, among my heroes of the court is Louis Brandeis. If philosophy were a test for him he would have been ruled out because he was too liberal.

Another was Charles Evans Hughes. If philosophy had been a test for him he would have been ruled out because he was too conservative in representing the business interests.

If you want to go back and read what really can happen in cases of this sort, I would suggest you read the debate over Louis Brandeis and also the confirmation of Charles Evans Hughes, in which they poured on him all the filth they could possibly amass because of his connection with insurance companies. Also like Judge Haynsworth, he had represented various other interests.

"CONSERVATIVE" NEEDED

As far as philosophy is concerned, I would be inclined to agree with the writer for the St. Louis Post Dispatch who said he thought Judge Haynsworth was a man with a razor sharp mind and a middle of the road record on the major issues.

But if Judge Haynsworth's philosophy leans to the conservative side, in my view that recommends him to me. I think the court needs balance, and I think that the court needs a man who is conservative—and I use the term not in terms of economics, but conservative, as I said of Judge Burger, conservative in respect of his attitude towards the Constitution.

It is the judge's responsibility, and the Supreme Court's responsibility, to interpret the Constitution and interpret the law, and not to go beyond that in putting his own socio-economic philosophy into decisions in a way that goes beyond the law, beyond the Constitution.

Now the final point, and this one is one that troubles, I think, many people who are not prejudiced against Judge Haynsworth because he is a Southerner or because of his civil rights record, or because of his labor record.

It is this: At this time in our history, it is very important to have a man that is beyond reproach.

An editorial in The Washington Post, I thought quite a thoughtful editorial, was quite candid in saying that the charges against him on the ethical side were not warranted, or at least were not with the foundation they should be, but because a doubt had been raised, that the name should be withdrawn.

I just want to say categorically here I shall never accept that philosophy with regard to Judge Haynsworth.

The appearance of impropriety, some say, is enough to disqualify a man who served as judge or in some other capacity. That would mean that anybody who wants to make a charge can thereby create the appearance of impropriety, raise a doubt, and that then his name should be withdrawn.

That isn't our system. Under our system, a man is innocent until he is proven guilty.

Judge Haynsworth, when the charges were made, instead of withdrawing his name, as he could—and, incidentally, if he now asks for his name to be withdrawn I would not do so—Judge Haynsworth, when the charges were made, openly came before the committee, answered all the questions, and submitted his case to the committee, and now to the full Senate.

I have examined the charges. I find that Judge Haynsworth is an honest man. I find that he has been, in my opinion as a lawyer, a lawyer's lawyer and a judge's judge. I think he will be a great credit to the Supreme Court, and I am going to stand by him until he is confirmed. I trust he will be.

Question: Mr. President, how much of this attack on Judge Haynsworth do you think is an attack, an end run attempt to get at you?

Answer: I have read some of the spec stories on that but I am not going to be involved in that.

The Brandeis case was not a very good moment in the history of the United States Senate. There was anti-Semitism in it and there was also a very strong partisan attitude towards Woodrow Wilson.

The Hughes debate was not a proud moment. There were a lot of partisan considerations that entered into it. This was a great man and a great chief justice, as was Judge Brandeis.

I don't think the Parker nomination was a very happy moment either.

"IT IS NOT PROPER"

I don't hold any brief for any one of these men in terms of philosophy. I don't agree with them, but no lawyer agrees with every other lawyer on everything. But in Judge Parker's case it was not proper to turn down a man because he was a Southerner.

It is not proper to turn down a man because he is a Southerner, because he is a Jew, because he is a Negro or because of his philosophy.

The question is what kind of a lawyer is he? What is his attitude toward the Constitution?

Is he a man of integrity? Is he a man that will call the great cases that come before him as he sees them, and in this case will provide the balance that this great court needs? I think Judge Haynsworth does that.

Question: Mr. President, it has been suggested, and I wonder what you think of the idea, that every member of the federal judiciary holding a lifetime appointment, to avoid this kind of trouble, place their investments perhaps in some kind of a blind trust or perhaps in some kind of fund?

Answer: Bill, as you noticed, Judge Haynsworth said he would put his stocks into trust. I suppose the American Bar Association or, for that matter, the Senate, or Congress, could lay down some sort of a rule about that to really meet the problem.

I don't happen to think that blind trusts, particularly in the public mind, are going to remove these questions. That is one of the reasons, as a matter of fact, before I came to office, I disposed of every stock I owned. I own nothing but real estate.

Question: What would you say, Mr. President, when people say you selected Haynsworth in large part because of political obligations?

Answer: I selected Judge Haynsworth for the reasons that I mentioned. I was looking for a man, first, who, like Judge Burger, had broad experience as an Appeals judge, a court of appeals judge—who was the right age, and who also had a philosophy for the Constitution similar to my own because that is what a President is expected to do.

As far as a political obligation is concerned, I had no political obligation to select Judge Haynsworth or Judge Burger.

In fact, my acquaintance with Judge Haynsworth can only be casual. If he would walk into this room, I am afraid I wouldn't recognize him.

Question: Can you tell me on what you base your confidence in the confirmation, Mr. President?

Answer: The Senate is a body in which time and discussion work on the side of fairness and justice. That sounds like a cliche, I suppose.

"ABOVE REPROACH"

As a former member of the Senate it is perhaps a self-serving statement. But I am convinced that when senators read the record, as I did, not just the editorials but the record, the evidence, and as they study every one of these cases—and believe me, I have studied every one of them—if I had found one case where there was a serious doubt I would have had him removed because I want that court to be above reproach.

If the senators do that, I believe a majority of the senators will vote for Judge Haynsworth's confirmation.

Let me say this too: It is not a partisan matter.

To answer your earlier question, sure, there is some partisanship, I suppose. That is perhaps part of the game, and perhaps with some Republicans. I am not questioning their motives.

All I ask is that every senator should look very carefully into this record because he has to make the decision that I had to make.

Let me be quite candid. There were those, good friends of mine, who came to me a few weeks ago suggesting I withdraw Judge Haynswworth's nomination due to the fact that a doubt had been raised and that politically it was going to be very difficult to wield.

I had to consider then whether because charges had been made without proof, and whether there was a doubt, whether I would then take upon my hands the destruction of a man's whole life, to destroy his reputation, to drive him from the bench and public service.

"QUALIFIED TO SERVE"

I did not do so, and I think that as senators consider what they will be doing as they will be doing as they vote on this matter, as they consider the evidence, they will realize that they are dealing here with an honest man, a man who has laid all the facts before them, a man who is qualified to serve on the Supreme Court, and I think they will conclude as I did that there is no dishonor in connection with him.

Question: Senator Griffin is one of the men you referred to and he has studied this record, case by case.

How do you account for Senator Griffin's point of view?

Answer: I hope he will study further. I trust that after he studies it more, he will change his mind.

Question: One of the things that has happened in the Haynsworth case is that there has been a piecemeal revelation of details.

Is there a problem in our government, a problem of confidence with Congress and with judges, that we do not have a more comprehensive * * * kind of fund?

Answer: The matter of piecemeal disclosure is because the critics have chosen to make the charges this way.

Some senators were worried about when the other shoe would drop. I saw the other shoe and it wasn't even a slipper. We wondered why Senator Bayh wouldn't debate Senator Hollings. Senator Bayh is a very articulate man, but after reading the record I know why. He was well advised not to debate.

The Press: Thank you, Mr. President.

PRESIDENT NIXON'S POLICIES ON VIETNAM

Mr. DOLE. Mr. President, at a time when the leaders of the Democratic Party are supporting President Nixon's efforts to negotiate a settlement in Vietnam; when the Senator from Arkansas, (Mr. FULBRIGHT) has postponed hearings of the Senate Foreign Relations Committee to await the President's speech on November 3; when the distinguished majority leader, Senator MANSFIELD, has indicated the President is moving in the right direction; when the past presidential nominee of the Democratic Party, Hubert Humphrey, has expressed confidence in President Nixon's policies—Mr. President, in the light of these conditions, I seriously question the logic of the speech delivered earlier by the Senator from South Dakota.

Mr. President, I find myself wondering if the Senator from South Dakota is not guilty of the same "dangerous oversimplification" of which he complains. He speaks of "old schemes of forced killing in foreign crusades." He said we are fighting "so blindly to preserve General Thieu in Saigon." Are these not oversimplifications in the most elemental sense?

Mr. President, participation in the October 15 moratorium was a matter of conscience for many in this country. Although it is unclear whether those who participated in the moratorium opposed continuation of the war on any basis or merely desired the end of American involvement in the war, it was apparent there are many in this country who are deeply concerned with the war. This sentiment did not originate with the October 15 moratorium. President Nixon realized this months ago and established peace as his administration's first priority.

Mr. President, while the President wants peace, he also realizes that we cannot abandon our commitments without a full realization of the effect of our actions. In Guam, President Nixon outlined a new policy for Asia—this policy, however, cannot be implemented overnight. Review of our commitments in other parts of the world will continue by both the Congress and the President. This is healthy and necessary to a vibrant foreign policy.

Mr. President, the Senator from South Dakota has failed to mention the real reason the United States has not been able to negotiate a settlement in Vietnam. That reason is the intransigence of the North Vietnamese and the National Liberation Front. I introduced a resolution, which now has 35 cosponsors, calling on the North Vietnamese to seriously negotiate. I hope the Senator from South Dakota would agree that the North Vietnamese and the National Liberation Front have shown no interest in ending this war other than on their own terms.

Rather than placing all the blame on South Vietnam and our Government, we Dakota will agree that the North Vietnamese and the National Liberation Front by holding hearings on Senate Resolution 271.

I urge the Senator from South Dakota to join in cosponsoring Senate Resolution 271.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT OF INDIAN CLAIMS COMMISSION

A letter from the Chairman, Indian Claims Commission, transmitting, pursuant to law, the annual report of the Commission for the fiscal year 1969 (with an accompanying report); to the Committee on Interior and Insular Affairs.

REPORT OF THE EAST GREENACRES UNIT, RATHDRUM PRAIRIE PROJECT, IDAHO

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a report of the Secretary of the East Greenacres Unit, Rathdrum Prairie Project, Idaho (with an accompanying paper and report); to the Committee on Interior and Insular Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JORDAN of North Carolina, from the Committee on Agriculture and Forestry, without amendment:

H.R. 9857. An act to amend the provisions of the Perishable Agricultural Commodities Act, 1930, to authorize an increase in license fee, and for other purposes (Rept. No. 91–490).

By Mr. JACKSON, from the Committee on Interior and Insular Affairs, without amendment:

S. 1968. A bill to authorize the Secretary of the Interior to permit the removal of the Francis Asbury statue, and for other purposes (Rept. No. 91–493);

H.R. 5968. An act to amend the Act entitled "An Act to provide for the establishment of the Frederick Douglass home as a part of the park system in the National Capital, and for other purposes", approved September 5, 1962 (Rept. No. 91–496); and

H.R. 11609. An act to amend the Act of September 9, 1963, authorizing the construction of an entrance road at Great Smoky Mountains National Park in the State of North Carolina, and for other purposes (Rept. No. 91–494).

By Mr. HOLLAND, from the Committee on Agriculture and Forestry, with amendments:

S. 1455. A bill to amend section 8(c) (2) (A) of the Agricultural Marketing Agreement Act of 1937, as amended, so as to include Colorado, Utah, New Mexico, Illinois, and Ohio among the specified States which are eligible to participate in marketing agreement and order programs with respect to apples (Rept. No. 91–491).

By Mr. BURDICK, from the Committee on Interior and Insular Affairs, with amendments:

S. 232. A bill to promote the economic development of the Trust Territory of the Pacific Islands (Rept. No. 91–495).

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session, the following favorable reports of nominations were submitted:

By Mr. MAGNUSON, from the Committee on Commerce:

James V. Day, of Maine, to be a Federal Maritime Commissioner.

Albert Bushong Brooke, Jr., of Maryland, to be a member of the Federal Power Commission;

Harold C. Passer, of New York, to be an Assistant Secretary of Commerce; and

Jack E. Guth, Robert E. Williams, Robert C. Munson, Gerard E. Haraden, and Robert D. Hickson, Jr., for permanent appointment in the Environmental Science Services Administration.

BILLS INTRODUCED

Bills were introduced, read the first time and, by unanimous consent, the second time, and referred as follows:

By Mr. FULBRIGHT:

S. 3055. A bill to authorize the use of excess Government-owned foreign currencies to finance the establishment abroad of binational foundations for educational and scientific purposes; to the Committee on Foreign Relations.

(The remarks of Mr. FULBRIGHT when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. RIBICOFF:

S. 3056. A bill for the relief of Mr. Giuseppe Giarratana, Mrs. Vincenza Giarratana, Mr.

Giovanni Giarratana, and Miss Maria Giarratana; to the Committee on the Judiciary.

By Mr. DODD:

S. 3057. A bill for the relief of Tommaso Marcellino; to the Committee on the Judiciary.

By Mr. DOMINICK (by request):

S. 3058. A bill to amend the Public Health Service Act so as to extend for an additional period the authority to make formula grants to schools of public health; to the Committee on Labor and Public Welfare.

(The remarks of Mr. DOMINICK when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. BAYH:

S. 3059. A bill for the relief of Theresa Scissura; to the Committee on the Judiciary.

By Mr. BAYH (for himself, Mr. COOK, Mr. COOPER, and Mr. HARTKE):

S. 3060. A bill granting the consent of Congress to the Falls of the Ohio Interstate Park Compact; to the Committee on the Judiciary.

(The remarks of Mr. BAYH when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. MAGNUSON (for himself, Mr. COTTON, and Mr. PROUTY) (by request):

S. 3061. A bill to authorize the Secretary of Transportation to prescribe rules, regulations and performance and other standards as he finds necessary for all areas of railroad safety and to conduct railroad safety research; to the Committee on Commerce.

(The remarks of Mr. MAGNUSON when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. BURDICK:

S. 3062. A bill for the relief of Jane Jast Delorme; to the Committee on the Judiciary.

By Mr. YARBOROUGH:

S. 3063. A bill to amend the Public Health Service Act to support research and training in diseases of the digestive tract, including the liver and pancreas, and diseases of nutrition, and aid the States in the development of community programs for the control of these diseases, and for other purposes; to the Committee on Labor and Public Welfare.

(The remarks of Mr. YARBOROUGH when he introduced the bill appear later in the RECORD under the appropriate heading.)

S. 3055—INTRODUCTION OF A BILL TO BE KNOWN AS THE BINATIONAL EDUCATION FOUNDATIONS ACT OF 1970

Mr. FULBRIGHT. Mr. President, over 4 years ago I introduced a bill aimed at dealing with one of the most difficult and controversial problems we confront in the whole field of our relations with countries abroad: namely, the still mounting supplies of foreign currencies owned by the United States which under prevailing conditions are not being put to good use. Today, I intend to reintroduce the same bill, S. 1057 of the 89th Congress, which was designed to authorize the use of excess Government-owned foreign currencies to finance the establishment abroad of binational foundations for educational and scientific purposes.

The record of inaction and frustration which followed upon my introduction of the bill at the beginning of 1965 has been an all too common pattern these days. In the present instance, it has been in large measure a case of executive branch agencies and congressional committees all maintaining their separate interests with respect to foreign currencies without any strong hand being noticeable at the top of the governmental pyramid. It is certainly not a criticism of the present administration to say that this is one of the many problems that can only be resolved if action is taken at the White House level. Unfortunately, it takes time for any incoming administration to realize that there is a whole range of problems which can only be resolved or even attacked at the highest level. By the time many of these issues are seen in their proper light, the administration has changed and the lesson has to be learned all over again.

The question of how to use excess foreign currencies has been a burdensome one for at least a decade—and certainly since the issuance of the so-called Mason report in 1960. The years have gone by and nothing really very concrete or useful has been done to confront the problem. My effort in 1965 was frustrated by bickering and rigidity downtown, and by my own willingness to be patient while a less promising alternative was promoted to no avail. I have learned through sour experience that one has to campaign unrelentingly to make even a dent on the normal inertia of the bureaucratic apparatus in this city. This time, however, I have no intention of waiting many months for the departmental reports to be submitted and for all the diplomatic bases to be touched.

Frankly, I think there are only two ways of breaking the impasse on the use of excess foreign currencies. The best way would be for the President himself to take an interest and to adopt a clear policy on the subject. The other alternative is for us in the Congress to drive ahead with our own ideas and hope to evoke some answering enthusiasm within and outside Government circles. I hope very much that by reintroducing my bilateral education foundations bill I will make a start on a process of creating agreement in this sphere.

Mr. President, I will not rehearse all the arguments that have been advanced over the years, nor will I point out all the intricacies and complications which abound whenever the subject of foreign currencies is discussed. In order to refresh our memories about the nature of the problem and about the tentative solution which I advanced in 1965, I ask unanimous consent that the text of the statement which I made on February 9 of that year be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR J. W. FULBRIGHT, FEBRUARY 9, 1965

Mr. President, I introduce, for appropriate reference, a bill which, if enacted by the Congress and approved by the President, could go a considerable distance toward helping resolve two of this country's most difficult and urgent problems in the field of foreign relations. These are: First, the complicated question of putting to use the large amounts of nonconvertible foreign currencies owned by the United States; and, second, the virtually unlimited requirement for education as a precursor of economic and social advances among the underdeveloped countries.

The bill which I introduce today provides that a portion of American-owned foreign currencies, which now exceed $3 billion in value, may be used to establish private binational educational foundations in those countries where such currencies are excess to the current and foreseeable needs of the United States.

If this bill is enacted, it would be possible, at small cost to the American taxpayer, to create in many countries private foundations devoted to the public interest. Americans well know the magnificent contributions to our Nation's life, education, and culture that have resulted from the work of such private institutions as the Carnegie Foundation, the Rockefeller Foundation, the Ford Foundation, and others. The bill will permit the United States, in cooperation with countries which now or in the future may have excess U.S.-owned foreign currencies, to establish foundations which can make comparable contributions to the internal intellectual and cultural growth of these countries. It will enable the United States to convert foreign currencies to purposes which would enhance the dignity and capacities of individuals in those countries.

There is nothing in this bill which forces anyone to do anything. It states quite simply that out of the roughly $3 billion of such nonconvertible foreign currencies as we now own, not to exceed $1 billion worth may be used to create binational education foundations. For example, if country X in which the United States owns $200 million worth of such currencies wishes, in cooperation with the United States, to use these funds to create a foundation in its country, it may do so. There is to be no pressure pushing any nation into such an agreement, however. If it wishes, these currencies may continue to lie fallow in the nation's vaults.

But should a nation where these excess currencies exist desire to create a binational foundation and thus put these funds to a constructive use this bill sets the simple guidelines for creation of such an institution.

Operating in the general pattern established by American private foundations, these binational foundations would be able to use the income from the capital provided them for scholarships and travel within their respective countries, for internal educational and cultural projects, for the construction of educational and scientific facilities, for the translation and publication of books and magazines, and for similar type activities not involving expenditures abroad.

This bill makes it clear that these foundations are to be privately controlled with governmental participation. There is to be a binational board of directors, half to be American citizens and half to be citizens of the country where the foundation operates. There may be not to exceed two government employees from each country, but representatives of governments, as such, will be in the minority.

For the initial 5-year period of operations, this bill requires that such staff as may be chosen by the binational board is to be headed by a chief executive officer who is knowledgeable concerning the operations of American private foundations. The sole purpose of this requirement is to help nations desiring to create binational foundations to develop patterns of operations similar to those which have been so effective in the United States.

Now a few words are necessary for the purpose of trying to clarify the complicated foreign currency situation which forms the setting for this proposal. Long after that situation changed profoundly, we in the Congress still tended to talk of "counterpart" and "funny money" without much, if any, differentiation between currencies. From time to time we continue to receive pro-

posals from colleagues for spending such currencies—but unfortunately in countries where they do not exist in surplus, so that dollars are needed to fulfill such intentions.

The fact is that we have gone from one extreme to another during the space of about a decade. At the beginning of the 1950's, when most foreign currencies were nonconvertible, the proposals for employing them were so numerous that the appropriations process was invoked to establish a greater—if not excessive—control over their use. Once created, this method of control was constantly enlarged until, at the start of the 1960's, we had reached a position where there were very few means of utilizing local currencies without first securing appropriated dollars with which to purchase them.

But this process largely took place without much attention being paid to the changing foreign currency picture. Now we are in a situation where the restraints operate not only in the great majority of countries where we do not possess local currencies excess to normal U.S. needs, but also in those seven or eight countries where we currently hold surpluses ranging from relatively modest to enormous in size. For the most part, we just cannot employ those surpluses under present circumstances.

Most of these nonconvertible currencies which we have in such excess have been deposited to the account of the United States as a result of the sales of our food surpluses for local currencies, and of such currency repayment of past dollar loans for development. When these foreign currencies come into U.S. accounts they usually cannot be spent except in the country of origin. While the United States has been able to use some of these funds for the operating expenses of embassies and other local charges, in a few countries there are local currencies in amounts far beyond our foreseeable requirements. These sums are a potential asset if they can be used in the countries where they were generated without their having an inflationary impact in those areas. However, except on a hit or miss basis, we have not used these currencies which are accumulating at a rate of over $100 million per year. These American assets are not only wasting as they suffer from the erosion of inflation, but they are becoming a source of political embarrassment in a few nations. Already charges have been heard in some countries that the United States "owns" a substantial proportion of their national currency.

What this bill would do would be to put these funds to mutually beneficial use in the countries where they originated. In the process it would enable such countries as desire the establishment of these foundations to learn how privately controlled institutions can operate for the total good of the country. While there naturally are obstacles to this course of action, to a substantial degree they are of a bookkeeping character which a little ingenuity and leadership should easily overcome.

I have suggested that creation of binational education foundations would not cost the American taxpayer any money. This must be qualified by noting that the appropriation of not to exceed $1 million is authorized for administrative expenses that might arise in connection with negotiation of agreements for the creation of such foundations.

In conclusion, Mr. President, let me say that I can think of no more useful foreign policy action which we might take at the present time than to make possible the establishment of such foundations abroad. Promoting education, and development in the free world certainly is, or ought to be, one of our primary tasks in the highly volatile international scene which we now confront—and are likely to be facing for some years into the future.

Mr. FULBRIGHT. There is one point which might cause confusion in the statement which I have just had placed in the RECORD. Reference is made in several places to the sum of roughly $3 billion of nonconvertible foreign currencies owned by the United States. That figure was correct in 1965, and I know that it has not decreased in the intervening 4 years. What is important, however, is to differentiate between that total—roughly half of which is designated for relending in the countries of origin—and the total amount which represents that portion of U.S.-owned foreign currencies declared excess to normal U.S. uses. That latter sum has changed very little over the years and currently stands at well over $1.5 billion in equivalent U.S. currency. To be precise, according to preliminary figures as at the end of fiscal year 1969 there were 11 countries where we held excess U.S.-owned foreign currencies amounting to a dollar equivalent of $1,573,900,000. I ask unanimous consent that a table be printed in the RECORD at this point giving the names of the countries and the dollar equivalent holdings of their currencies by the United States in excess of our needs.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

COUNTRIES WHERE UNITED STATES HOLDS FOREIGN CURRENCIES IN EXCESS OF U.S. USES

[Preliminary estimates as of June 30, 1969, in millions of dollars]

India	678.8
Burma	11.1
Ceylon	3.6
Guinea	6.3
Israel	8.9
Morocco	11.8
Pakistan	140.4
Poland	438.7
Tunisia	15.8
United Arab Republic	200.3
Yugoslavia	58.3
Total	1,573.9

Mr. FULBRIGHT. Mr. President, I have said that I would not try at this time to clarify the almost Byzantine intricacies of the foreign currencies question. Neither will I try to place in the RECORD voluminous material bearing on the issue. I will, however, recommend to my colleagues that they read House Document No. 91–67 of this Congress, which is a special report on the use of U.S.-owned excess foreign currencies made by Prof. Byron W. Brown of Michigan State University in accordance with section 107 of the Mutual Educational and Cultural Exchange Act of 1961, and transmitted to the Congress by the U.S. Advisory Commission on International and Educational and Cultural Affairs.

Professor Brown has tried to simplify a great mass of materials and I think he has done well. I would, nevertheless, add that I cannot but feel that his conclusions and recommendations are somewhat on the conservative side. Moreover, I would state more clearly than he that Congress at no point has thought of these currencies as anything but an asset which belongs to the American taxpayers and which should be employed in accordance with the national interest. This latter point does not, of course, mean that the interests of other countries in the international community as a whole should not be taken into account; that is precisely why the binational commission idea is perpetuated and strengthened in my bill. But the central fact remains that we are accountable to the people we represent for the wise use—and not the sterilization—of these foreign assets.

One particular point made by Professor Brown is of special relevance and assistance in the context of my proposal to use many of these currencies for Binational Educational Foundations—a use which is entirely supported by Professor Brown's studies. He stresses the fact that the usual arguments presented by economists in opposition to the use of such currencies have no relevance to the course which I am recommending. Let me quote on this point the following excerpt from his report:

> Expenditures for educational and cultural exchange activities would have little effect on the price of necessities or the price of industrial products in the excess currency countries. Moreover, because exchange activities are services, not goods, their use involves no removal of physical resources from foreign soil. Neither the "inflation" argument nor the "buying-up-of-economy" argument—even where they might otherwise be applicable—are valid objections to the increased expenditure of excess foreign currencies for educational and cultural affairs abroad. No foreign government can interpose any economically valid arguments against such expenditures.

Mr. President, I hereby introduce the bill, identical to S. 1047, 89th Congress, first session, which will authorize the use of excess Government-owned foreign currencies to finance the establishment abroad of binational foundations for educational and scientific purposes. I hope that the Committee on Foreign Relations will be able to elicit administration views at an early date and hold hearings soon thereafter, and I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3055) to authorize the use of excess Government-owned foreign currencies to finance the establishment abroad of binational foundations for educational and scientific purposes, introduced by Mr. FULBRIGHT, was received, read twice by its title, referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

S. 3055

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Binational Education Foundations Act of 1970".

STATEMENT OF PURPOSE

SEC. 2. The purpose of this Act is to provide for the beneficial utilization of excess foreign currencies owned by the United States by authorizing the use of such currencies to finance the establishment in friendly countries in which such currencies are available of private nonprofit binational foundations for educational and scientific purposes.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "Secretary" means the Secretary of State.

(2) The term "excess foreign currencies" means foreign currencies or credits owned by the United States which are or may become, under applicable agreements with the foreign country concerned, available for the use of the United States Government and are determined by the Secretary of the Treasury to be excess to the normal requirements of departments and agencies of the United States for such currencies or credits.

(3) The term "eligible foreign country" means any country (except a country ineligible under section 620(f) of the Foreign Assistance Act of 1961 for assistance under that Act) in which excess foreign currencies are, or may become, available in amounts sufficient for the purposes of this Act.

(4) The term "foundation" means a binational foundation established pursuant to an agreement entered into under section 4.

AGREEMENTS WITH ELIGIBLE FOREIGN COUNTRIES

SEC. 4. The President is authorized to negotiate and enter into an agreement with each eligible foreign country for the establishment of a private nonprofit foundation dedicated to the development of education and science in such country. Each such agreement shall contain such provisions as the President deems necessary to insure that the foundation established pursuant thereto will be organized and operated in accordance with such agreement and with the requirements of this Act.

ORGANIZATION OF FOUNDATIONS

SEC. 5. A foundation established pursuant to an agreement entered into under section 4 shall be organized under, and shall in all respects be subject to, the laws of the country in which it is established, and its principal office shall be within such country.

PERSONNEL OF FOUNDATION

SEC. 6. (a) Each foundation shall be under the control of a board of directors or similar governing body. The number, terms of office, and method of selection of the members of such board, or other body, shall be specified in the agreement entered into under section 4, except that (1) one-half of such members shall be United States citizens and one-half shall be citizens of the country in which the foundation is established, and (2) not more than two of the members from each country shall be officers or employees of the government of such country or of any agency or instrumentality thereof.

(b) A foundation shall have a president, or other chief executive officer, and such other officers as the board of directors or other governing body deems necessary, who shall be elected by such board or body. In order that foundations will be assisted in developing patterns of operations similar to those of foundations which have been effective in the United States, the president or other chief executive officer of each foundation established hereunder shall, during the initial period of five years following its organization, be a person having knowledge of such operations. The board of directors, or similar governing body, of a foundation may appoint, or may delegate to the president or other chief executive officer the authority to appoint, such employees as it may deem necessary.

(c) No person who is a United States citizen shall serve as a member of the board of directors, or similar governing body, or as an officer or employee, of a foundation if the Secretary notifies such board or body that he considers such service of such person to be contrary to the national interest of the United States.

FINANCING OF FOUNDATIONS

SEC. 7. (a) Notwithstanding, the provisions of section 1415 of the Act of July 15, 1952 (66 Stat. 662), or any other provision of law, the Secretary of the Treasury, upon direction of the President, shall transfer to each foundation established pursuant to an agreement entered into under section 4 such amount or amounts of excess foreign currencies as may be specified in such agreement. Any foreign currencies so transferred to a foundation may be invested by the foundation in interest-bearing bonds or other income-producing securities, public or private, in the country in which the foundation is organized. The amount of foreign currencies transferred to all foundations under this subsection shall not exceed the equivalent of $1,000,000,000.

(b) Income received from investments of foreign currencies transferred under subsection (a) shall be available to the foundation for the purpose of carrying out its program. In addition to such income, a foundation may be authorized to expend such foreign currencies for the purpose of any project determined by a two-thirds vote of the board or similar governing body to be of special importance, but not more than 10 per centum of the amount of foreign currencies transferred to any foundation shall be authorized to be so expended in any year.

(c) A foundation shall be authorized to accept gifts from private or other sources and to use the proceeds of such gifts for the purpose of carrying out its programs.

(d) There shall be included in each agreement entered into under section 4 provisions satisfactory to the President for the recovery by the United States, in the event of the liquidation of the foundation established pursuant to the agreement, of any unused foreign currencies (including assets acquired with such foreign currencies) transferred by the United States to such foundation under subsection (a).

PROGRAMS OF FOUNDATIONS

SEC. 8. (a) The board of directors or other governing body of a foundation established hereunder shall make or cause to be made continuing studies of the educational and scientific needs of the country in which the foundation is established, and shall formulate and carry out programs designed to meet such needs.

(b) Programs of a foundation shall be carried out primarily through the making of grants to individuals or institutions, public or private, to finance the organization of new, or to support existing, operating projects, programs, and activities consistent with the purposes of this Act. Such programs may include, but shall not be limited to—

(1) development of centers of academic excellence;

(2) scholarships for higher education and advanced study;

(3) establishment and support of teacher training schools;

(4) support for individual and institutional research;

(5) pilot and other projects in literacy and adult education, particularly technical education;

(6) English language and other linguistic training;

(7) translation of books and periodicals;

(8) library programs; and

(9) improvement of mass communications, including journalism and educational radio and television.

REPORTS

SEC. 9. The United States Advisory Commission on International Educational and Cultural Affairs, established by section 106(b) of the Mutual Educational and Cultural Exchange Act of 1961, shall include in its annual reports to the Congress a list of the foundations established under this Act, together with a description of the activities of such foundations. Each such foundation shall provide the Commission with such information as may be necessary to enable it to carry out the provisions of this section.

APPROPRIATIONS

SEC. 10. There is hereby authorized to be appropriated annually to the Secretary such sum, not to exceed $1,000,000, as may be necessary to pay administrative expenses incurred in connection with the negotiation and implementation of agreements under this Act.

S. 3058—INTRODUCTION OF A BILL RELATING TO SCHOOLS OF PUBLIC HEALTH

Mr. DOMINICK. Mr. President, I introduce, by request, the administration bill extending the authority under the Public Health Service Act to make formula grants to schools of public health.

These schools prepare the majority of the graduate public health specialists. They also serve in a research and consultation capacity the various state and local health agencies.

In the last 10 years, the number of these schools has increased from 11 to 16. In the last 5 years alone, their enrollments have jumped 50 percent.

Perhaps the most unique characteristic of such schools is their focus on interdisciplinary training. The immense complexity of community health problems requires multifaceted approaches. Schools of public health bring together students from a variety of professions to mold a graduate education program in a host of disciplines.

The administration bill would extend the authority to make formula grants to these schools through June 30, 1971. The rationale of a 1-year extension, as explained by Secretary Finch, is to make the expiration date of this program coincide with that for the balance of section 309, project grants for training in public health, and section 306, traineeships for professional public health personnel.

For the RECORD, I must take note of one portion of the administration bill. The authorization pursued by the Bureau of the Budget for fiscal year 1971 would be for "such sums as may be necessary." In short, this is an open-ended authorization. My position against authorizations which do not include a money ceiling is and has been well known in both the House and the Senate.

Without in any manner reflecting on the merits of the balance of the administration bill, I merely want to put Senators and the Bureau of the Budget on notice that I intend to continue to insist that any bill reported by the Senate Health Subcommittee, or any other committee for that matter, specify a ceiling on authorized costs.

I discussed this with Dr. Egeberg when he testified on another bill yesterday, and am confident we will receive some costs estimates which can be included in the legislation before any action is taken in executive sessions.

I ask unanimous consent that a letter from Secretary Finch—directed to Speaker MCCORMACK—describing the bill be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 3058) to amend the Public Health Service Act so as to extend for an additional period the authority to make formula grants to schools of public

health, introduced by Mr. DOMINICK, by request, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

The letter, presented by Mr. DOMINICK, is as follows:

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE,

Hon. JOHN W. MCCORMACK,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I am enclosing for your consideration a draft of a bill to extend for an additional period the authority to make formula grants to schools of public health. This authority is due to expire June 30, 1970.

The proposed bill would extend for one year, through June 30, 1971, the authority of section 309(c) of the Public Health Service Act. Under this authority the Secretary of Health, Education, and Welfare makes grants to schools of public health to assist them in providing comprehensive professional training, specialized consultative service, and technical assistance in the fields of public health and in the administration of State or local public health programs.

The one-year extension will make this authority coterminous with the authority of section 306 of the Public Health Service Act for traineeships for professional public health personnel, and the authority of section 309(a) and (b) of that Act for special project grants for graduate or specialized training programs in public health, authorities which were extended through June 30, 1971, by Title III of the Health Manpower Act of 1968 (Public Law 90-490).

To have these three public health authorities of the Public Health Service Act expire on June 30, 1971, together with other health manpower authorities which terminate at the same time, will provide the Department with an opportunity for an across-the-board assessment and evaluation of the relationships among these manpower programs and their impact on the health needs of the nation. We shall be making our review in line with the President's directive for grant consolidation, in order to facilitate the provision of Federal aid in these health manpower areas. A single termination date for all these provisions will contribute to the accomplishment of this objective.

We would appreciate your referral of the enclosed draft bill to the appropriate committee for consideration.

The Bureau of the Budget advises that there is no objection, from the standpoint of the Administration's program, to the submission of the draft legislation to the Congress.

Sincerely,

ROBERT H. FINCH,
Secretary.

S. 3060—INTRODUCTION OF A BILL GRANTING THE CONSENT OF CONGRESS TO THE FALLS OF THE OHIO INTERSTATE PARK COMPACT

Mr. BAYH. Mr. President, I introduce, for appropriate reference, a bill granting the consent of Congress to the proposed Falls of the Ohio Interstate Park compact. I am pleased that the distinguished senior Senator from Indiana (Mr. HARTKE), and the distinguished Senators from Kentucky (Mr. COOPER and Mr. COOK) join me in introducing this measure, which has also been introduced in the House of Representatives by the appropriate Members from the two States.

The proposed interstate compact has been approved by the Legislatures of both Indiana and Kentucky in a form identical with the terms of this bill. The two States have agreed to create, develop, and operate the Falls of the Ohio Interstate Park along the Ohio River near Louisville and Jeffersonville. This is an area rich in natural resources which should be preserved for scientific, educational, and recreational purposes.

Before the water level was affected by the construction of dams in the river, the falls of the Ohio constituted a series of rapids about 3 miles in length. A large number and variety of fossils have been discovered in the limestone formations which are exposed from time to time in the shallow river and shore areas. One of the outstanding features is a great fossil coral reef, sometimes referred to as Goose Island, which has been determined to be eligible for the Natural Registry of Natural Landmarks. It is likely that additional sections of the adjacent shoreline in the two States would be included within the park, for which a total of nearly 1,400 acres has been suggested.

The compact would establish a Falls of the Ohio Interstate Park Commission comprised of six members, half of whom would be appointed for 4-year terms by the Governor of each State. As the governing authority of the proposed park, the commission would possess all powers needed to carry out the purposes of the compact. Specifically, it could expend funds, receive gifts, acquire and dispose of property, establish and maintain offices for transaction of business, select its own officers, appoint and discharge needed employees, issue revenue bonds, and charge fees for admission to the park. Each State would agree to use its power of eminent domain to acquire property which the commission found necessary for the park, and the commission would be entitled to use the services of other offices and agencies of the respective States. Accurate financial records, which would be accessible to representatives of the two States at all times, would have to be kept and annual reports would have to be made by the commission, but the commission could not pledge the credit of either State without specific authorization by its legislature.

In August 1968, the National Park Service of the Department of the Interior completed a study of the falls of the Ohio to evaluate the feasibility of preserving this invaluable area and to investigate the methods by which this might be accomplished. The report concluded that the natural resources in the falls of the Ohio should be protected and recommended that an interstate park be created by the States of Indiana and Kentucky for this purpose.

In order that all Senators will have the opportunity to become better informed about this proposal, I ask unanimous consent that certain excerpts from the National Park Service report which explain the purposes, background, resources, and potential values of the proposed interstate park be printed at the conclusion of my remarks. I also ask unanimous consent that the text of the interstate compact be printed in full in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and excerpts will be printed in the RECORD.

The bill (S. 3060) granting the consent of Congress to the Falls of the Ohio Interstate Park compact, introduced by Mr. BAYH (for himself and other Senators), was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

S. 3060

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given to the Falls of the Ohio Interstate Park Compact in substantially the following form:

"SECTION 1. The State of Indiana and the Commonwealth of Kentucky agree to create, develop and operate an interstate park to be known as Falls of the Ohio Interstate Park, which shall be located along the Ohio River at the Falls of the Ohio and on adjacent areas in Clark and Floyd Counties, Indiana, and Jefferson County, Kentucky. Said park shall be of such area and of such character as may be determined by the commission created by this compact.

"SEC. 2. There is hereby created the Falls of the Ohio Interstate Park Commission, which shall be a body corporate with the powers and duties set forth herein and such additional powers as may be conferred upon it by subsequent action of the appropriate authorities of Indiana and Kentucky. The commission shall consist of three (3) commissioners from each of the two (2) states, each of whom shall be a citizen of the state he shall represent. Members of the commission shall be appointed by the governor. Vacancies shall be filled by the governor for the unexpired term. The term of one of the first commissioners appointed shall be for two (2) years, the term of another for three (3) years, and the term of the third for four (4) years. Their successors shall be appointed for terms of four (4) years each. Each commissioner shall hold office until his successor is appointed and qualified. An officer or employee of the state, a political subdivision or the United States government may be appointed a commissioner under this act.

"SEC. 3. The commission created herein shall be a joint corporate instrumentality of both the State of Indiana and the Commonwealth of Kentucky for the purpose of effecting the objects of this compact, and shall be deemed to be performing governmental functions of the two states in the performance of its duties hereunder. The commission shall have power a common seal and to make and adopt suitable bylaws, rules to sue and be sued, to contract and be contracted with, to use and regulations. The commission shall have the authority to acquire by gift, purchase or otherwise real estate and other property, and to dispose of such real estate and other property. Each state agrees that it will exercise the right of eminent domain to acquire property located within each state required by the commission to effectuate the purposes of this compact.

"SEC. 4. The commission shall select from among its members a chairman and a vice-chairman, and may elect from among its members a secretary and treasurer or may designate other persons to fill these positions. It may appoint, and at its pleasure remove or discharge, such officers and legal, clerical, expert and other assistants and employees as may be required to carry the provisions of this compact into effect, and shall fix and determine their duties, qualifications and compensation. It may establish and

maintain one or more offices for the transaction of its business, and may meet at any time or place. A majority of the commissioners present shall constitute a quorum for the transaction of business. The commissioners shall serve without compensation, but shall be paid their expenses incurred in and incident to the performance of their duties. They shall take the oath of office required of officers of their respective states.

"SEC. 5. Each state agrees that the officers and departments of each will be authorized to do all things falling within their respective jurisdictions necessary or incidental to the carrying out of the compact in every particular. The commission shall be entitled to the services of any state officer or agency in the same manner as any other department or agency of this state. The commission shall keep accurate records, showing in full its receipts and disbursements, and said records shall be open at any reasonable time to the inspection of such representative of the two (2) States as may be duly constituted for that purpose. The commission shall submit annually and at other times as required such reports as may be required by the laws of each state or by the governor thereof.

"SEC. 6. The cost of acquiring land and other property required in the development and operation of the Falls of the Ohio Interstate Park and constructing, maintaining, and operating improvements and facilities therein and equipping same may be defrayed by funds received from appropriations, gifts, the use of money received as fees or charges for the use of said park and facilities, or by the issuance of revenue bonds, or by a combination of such sources of funds. The commission may charge for admission to said park, or make other charges deemed appropriate by it and shall have the use of funds so received for park purposes. The commission is authorized to issue revenue bonds, which shall not be obligations of either state, pursuant to procedures which shall be in substantial compliance with the provisions of laws of either or both states governing the issuance of revenue bonds by governmental agencies.

"SEC. 7. All money, securities and other property, real and personal, received by way of gift or otherwise or revenue received from its operations may be retained by the commission and used for the development, maintenance, and operation of the park or for other park purposes.

"The commission shall not pledge the credit of either State except by and with the authority of the general assembly thereof.

"SEC. 8. This compact may be amended from time to time by the concurrent action of the two (2) States parties hereto.

"The compact approved herein shall become effective upon ratification and approval of the compact by the General Assembly of the State of Indiana and upon approval of this compact by the Congress of the United States."

SEC. 2. The right to alter, amend, or repeal this Act is expressly reserved.

The excerpts, presented by Mr. BAYH, are as follows:

EXCERPTS FROM A STUDY OF THE FALLS OF THE OHIO: KENTUCKY AND INDIANA

(By the National Park Service, U.S. Department of the Interior, August 1969)

PURPOSE

The purpose of this study is to examine the significant resources of the Falls of the Ohio along with their surrounding environment to determine the feasibility of their preservation and use and the means by which this can best be accomplished.

BACKGROUND

The Indiana chapter of the Nature Conservancy in October 1965 requested that the Falls of the Ohio be studied for possible qualification for the National Registry of Natural Landmarks.

A National Park Service study completed in August 1966 recommended the area be declared eligible for Natural Landmark registry, and such action was subsequently approved by the Secretary's Advisory Board on National Parks, Historic Sites, Buildings and Monuments. Since land ownership of the area has not been determined, a registry plaque has not been applied for or presented.

Attitudes are generally favorable for action to protect the Falls of the Ohio. A local citizens group known as the Falls of the Ohio Preservation Committee is promoting the preservation and protection of the varied scenic, scientific and historical resources of the Falls of the Ohio.

Another organization actively concerned in action to preserve the resources of the site is the Falls of the Ohio Metropolitan Council of Governments. Its membership includes representatives from Jeffersonville, New Albany, Clarksville and Charleston, Indiana; Louisville, Kentucky; Clark and Floyd Counties Indiana; Jefferson County, Kentucky; and the Jefferson County Municipal League.

In 1967, the Indiana Legislature passed Senate Enrolled Concurrent Resolution No. 11. This resolution required the Governor of Indiana to appoint a three member Falls of the Ohio Interstate Park Commission to meet with a like body representing Kentucky to negotiate the execution of a Falls of the Ohio Interstate Park compact. The resolution embodied a suggested compact conferring broad powers on the proposed Park Commission to acquire and operate a proposed interstate park. It further provided that if the compact was ratified by Kentucky, the commissioners would present it to Congress requesting approval for the two states to enter into the compact, and, following Congressional approval, to present the compact to the 96th General Assembly of the State of Indiana to be enacted into law. The proposed compact has been ratified by the legislature of Kentucky.

LOCATION

The Falls of the Ohio study area lies in and along the Ohio River between Louisville, Kentucky and Jeffersonville, Clarksville and New Albany, Indiana. The study area includes parts of the riverbed, the islands therein, and a portion of the Indiana shore between the George Rogers Clark Memorial Bridge and the Kentucky-Indiana Terminal Bridge a distance of about 3½ miles. The latter portion is located between the river and the levee and flood wall system.

SUMMARY AND RECOMMENDATIONS

The Falls of the Ohio, located on the Ohio River at Louisville, Kentucky, is composed of a horizontal exposure of Devonian Period limestone. Prior to construction of the dams in the area, the rock formation was exposed as a series of rapids dropping about 26 feet in three miles. These rapids were the only barrier to early boatmen on the Ohio River, and they were called "The Falls of the Ohio."

These limestone formations are of particular scientific significance because of the great numbers and varieties of fossils that are concentrated here. Approximately 600 fossil species have been collected from the Falls area. These include corals, crinoids, snails, clams, trilobites, etc., forming the great fossil coral reef which is among the best known representative of its kind in the world. This reef, shown on early maps as Goose Island, has been declared eligible for the National Registry of Natural Landmarks.

The varied resources of the Falls of the Ohio, including the historical and archaeological aspects, should be preserved for their scientific and educational values. The preserve should include the remaining intermittently exposed coral reef, Sand Island and the Indiana shore within the levee from the Penn Central RR Bridge to the K&I RR Bridge.

Such a preserve would provide: an opportunity for good access to the area with specialized access to the coral reef, space and siting for interpretation of the paleontology, history, and prehistory; and areas for environmental study, passive relaxation and necessary buffer to insure possible enhancement of the resource setting.

As a park or preserve the Falls of the Ohio will become an integral part of the total community complex which includes four local political subdivisions and two states. Satisfactory preservation, protection, development, and use of the area will be attainable only with enthusiastic participation and cooperation by these communities. The planning processes must consider the adjacent environment as well as the area per se.

It is recommended that the area be administered by an Interstate Park Commission as authorized by the two states involved. As an Interstate Park, the unit would continue to enjoy the interest and enthusiasm of local organizations, citizens and education institutions with full recognition as a national landmark.

With preservation as the primary objective, adequate protection for all the scientific, archaeological and historical resources could result.

SUGGESTED PLAN OF DEVELOPMENT

The suggested plan includes approximately 1,000 acres of land area at normal pool elevation of 383 feet. The total land and water area is broken down by political subdivision as follows:

Jefferson County, Ky.:	*Acres*
Coral reef	205
Sand Island	82
Floyd County, Ind	130
Clark County, Ind	583
Total, land area	1,000
Ohio River	376
Total	1,376

Although the fossil coral reef constitutes the primary feature of the area it is believed that inclusion of a section of the adjacent shoreline and Sand Island would be necessary and desirable for full protection, development and use of the resources. It is suggested that automobile access to the shoreline section would come off the expressway interchange on Indiana Route 62 and U.S. 460 one-half mile north of Silver Creek.

This would be a ten minute drive from downtown Louisville and slightly less time from the three adjacent Indiana cities.

The development nucleus could be located on the high ground inside the bend of Mill Creek and the levee, the highest point of land within the study area. A visitor center with interpretive and educational facilities, parking space and the initial terminal point for a cable car access system would be located here. A restaurant operation near the visitor center would be advantageous.

A cable car system is suggested which would be a continuous circulating monocable with an ultimate capacity of 200 persons per hour in one direction. The reef terminal would be centrally located on the south side of the island near the lateral dam. Access to this terminal point may also be possible via a small ferry launch from the new Louisville riverfront development, contingent on approval by the Corps of Engineers.

SUGGESTED INTERPRETIVE METHODS

Many people who come to visit the Falls of the Ohio do not have a basic knowledge of its significance. To bring to these visitors a richer appreciation of its features, the in-

terpretive program would begin in a visitor center where relationships of the time and life of the earth's history represented at the site could emerge through exhibits, audio-visual programs and classrooms. Thus the center would provide a broad introduction to the significance of the specific elements that can be intimately observed in place during favorable water levels as well as a conceptual understanding of the features during high water levels.

In the proposed visitor center a series of exhibits may include the following themes:

1. The plant and animal life of the Silurian and Devonian Periods.
2. Fossil specimens found in the area.
3. The geological sequence of events responsible for the local rock formations.
4. Glacial period influences and river-cutting sequences in exposing the formations.
5. Modern environmental influences.
6. Archaeology and History.

Methods for on-site interpretation will require ingenuity in presentation as well as means of coping with the forces involved during periods of high water. This is especially true if self-guided trails are used.

Conducted interpretive trips may be scheduled in lieu of self-guiding trails and thus avoid the problems involved with markers, or, conducted trips and markers could supplement each other. Trailside exhibits could be used to good advantage, but, again, the high water periods must be considered.

Provisions should be allowed for educational visits and institutional classes and for research. An active research program would continue to provide information vital to the interpretive story.

Quarries in the vicinity should be utilized for exhibit, educational purposes, research and collecting areas in cooperation with the owners. The vertical cuts show outstanding displays of several limestone and shale formations from the Silurian and Devonian Periods. Cooperative uses may be worked out with quarry operators allowing visitors to examine rock formations in an unused section of the quarry and to observe working operations in the active sections. If available, an abandoned quarry could serve like purposes.

S. 3061—INTRODUCTION OF THE RAILROAD SAFETY AND RESEARCH ACT OF 1969

Mr. MAGNUSON. Mr. President, I introduce, by request of the Department of Transportation, on behalf of myself, the Senator from New Hampshire (Mr. COTTON), and the Senator from Vermont (Mr. PROUTY), for appropriate reference a bill to authorize the Secretary of Transportation to prescribe rules, regulations, and performance and other standards as he finds necessary for all areas of railroad safety and to conduct railroad safety research.

I ask unanimous consent that the bill, together with the Secretary of Transportation's letter of transmittal, the section-by-section analysis, and the Secretary's railroad safety task force report be printed in the RECORD at this point.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill, letter, analysis, and report will be printed in the RECORD.

The bill (S. 3061) to authorize the Secretary of Transportation to prescribe rules, regulations and performance and other standards as he finds necessary for all areas of railroad safety and to conduct railroad safety research introduced by Mr. MAGNUSON (for himself, Mr. COTTON, and Mr. PROUTY), by request, was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 3061

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Railroad Safety and Research Act of 1969".

AUTHORITY TO PRESCRIBE RAIL SAFETY REGULATIONS

SEC. 2. (a) For the purpose of promoting safety of persons and property the Secretary of Transportation is authorized (1) to prescribe such reasonable and practicable rules, regulations, and performance and other standards as he shall find to be necessary for all areas of safety in railroad operations: *Provided,* That nothing herein shall apply to the occupational health and safety of employees not engaged in railroad operations as defined by the Secretary of Transportation, and (2) to conduct railroad safety research. In prescribing rules, regulations, and standards the Secretary of Transportation shall give consideration to relevant safety standards in existence at the time.

(b) No rule, regulation, or standard, or amendment, or repeal thereof shall be prescribed until notice and opportunity for hearing thereon shall have been afforded all interested parties. Hearings shall be conducted in accordance with the provisions of section 553 of title 5 of the United States Code. Rules, regulations, and standards may be amended or repealed under the Secretary's own motion or on the petition of an interested party and shall be so amended or repealed when in the public interest and consistent with railroad safety.

(c) The Secretary may grant such exemptions from the requirements of any of the rules, regulations, or standards prescribed under this Act or incorporated herein by subsection (a) of section 7 as he finds to be in the public interest and consistent with railroad safety.

(d) Any final agency action taken under this section is subject to judicial review as provided in chapter 7 of title 5 of the United States Code.

HAZARDOUS MATERIALS

SEC. 3. (a) The Secretary shall:

(1) Establish such facilities and technical staff as are necessary to maintain within the Federal Government the capability to evaluate the hazards connected with and surrounding the various hazardous materials being shipped.

(2) Maintain a central reporting system for hazardous materials accidents to provide technical and other information and advice to the law enforcement and fire fighting personnel of communities and to carriers and shippers for meeting emergencies connected with the transportation of hazardous materials.

(3) Conduct an accelerated review of all aspects of hazardous materials transportation to determine and recommend appropriate steps which can be taken immediately to provide greater control over the safe movement of such materials.

(b) The authority granted the Secretary by this Act shall be in addition to the authority granted by sections 831 to 835, inclusive, of title 18 of the United States Code.

RAILROAD SAFETY ADVISORY COMMITTEE

SEC. 4. (a) The Secretary shall establish a Railroad Safety Advisory Committee to advise, consult with, and make recommendations to the Department concerning railroad safety. The Committee shall consist of the Federal Railroad Administrator, who shall be chairman, and eight members appointed by the Secretary as follows: two public members and two members each from railroad management, railroad labor organizations, and the national organization of the State commissions referred to in sections 202(b) and 205(f) of the Interstate Commerce Act, as amended. Members shall be appointed by the Secretary for a term not to exceed three years. Members of the Committee, other than those regularly employed by the Federal Government, may be compensated in accordance with the provisions of section 9 of the Department of Transportation Act (80 Stat. 931, 944). Service under this section shall not render such appointed members of the Committee employees or officials of the United States for any purpose.

(b) The Secretary shall prior to publication submit to the Committee all proposed rules, regulations, and standards, and amendments or repeals thereof and afford such Committee a reasonable opportunity, not to exceed sixty days unless extended by the Secretary, to submit a report on the necessity, technical feasibility, reasonableness, and practicability of such proposal. Each report by the Committee shall be included in the record of any proceeding that may be held on such proposal.

STATE REGULATION

SEC. 5. State or local laws, rules, regulations, or standards relating to railroad safety in effect on the date of enactment of this Act, shall remain in effect unless the Secretary shall have prescribed rules, regulations, or standards covering the subject matter of the State or local laws, rules, regulations, or standards.

STATE PARTICIPATION

SEC. 6. (a) It is the policy of the Congress that in order to promote the safety of common carriers by railroad in the most practicable and economic manner, the Secretary shall encourage maximum cooperation between the Federal Government and the various State governments in carrying out this Act.

(b) State participation shall be by agreement entered into with the State by the Secretary. The Secretary may, upon the request of the State, authorize it to provide all or any part of the inspection services and related programs necessary or desirable to obtain compliance with rules, regulations, and standards prescribed by the Secretary under the Act where he finds that such State participation will assist in achieving the purpose of the Act and that the State has the capacity to carry out the agreement under the guidance of the Secretary. The Secretary shall require annual reports from participating States containing such information as he may require to determine if such agreements will be continued.

(c) In the event of State participation, the Secretary may provide for reimbursement of all or a part of the funds to be expended by the State on a fair and equitable basis under rules and regulations promulgated by the Secretary under this Act.

EXISTING STATUTES

SEC. 7. (a) The Act of March 2, 1893, as amended (27 Stat. 531, 532; 45 U.S.C. 1–7 inclusive), the Act of March 2, 1903, as amended (32 Stat. 943; 45 U.S.C. 8–10 inclusive), the Act of April 14, 1910, as amended (36 Stat. 298, 299; 45 U.S.C. 11–16 inclusive), the Act of May 30, 1908, as amended (35 Stat. 476; 45 U.S.C. 17–21 inclusive), the Act of February 17, 1911, as amended (36 Stat. 913–916 inclusive; 45 U.S.C. 22–29 inclusive and 31–34 inclusive), the Act of March 4, 1915, as amended (38 Stat. 1192; 45 U.S.C. 30), the Reorganization Plan Numbered 3 of 1965 (79 Stat. 1320), the joint resolution of June 30, 1906, as amended (34 Stat. 838; 45 U.S.C. 35), the Act of May 27, 1908, as amended (35 Stat. 325; 45 U.S.C. 36), the Act of March 4, 1909, as amended (35 Stat. 965; 45 U.S.C. 37), the Act of May 6, 1910, as amended (36 Stat. 350; 45 U.S.C. 38–

43 inclusive), the Act of March 4, 1907, as amended (34 Stat. 1415–1417 inclusive; 45 U.S.C. 61–64 inclusive), and section 441 of the Act of February 28, 1920 (41 Stat. 498; 49 U.S.C. 26, as amended), are repealed. The substantive requirements of the Acts repealed herein, and all orders, rules, regulations, standards, requirements, and permits prescribed or issued pursuant thereto and in effect on the date of enactment of this Act, are continued in effect as regulations of the Secretary under this Act until amended, repealed, or modified by the Secretary in accordance with the provisions of section 2(b) of this Act.

(b) No suit, action, or other proceeding and no cause of action under the statutes repealed in subject (a) of this section shall abate by reason of enactment of this Act.

GENERAL POWERS, RESEARCH AND EMPLOYEE TRAINING

SEC. 8 (a) In carrying out his functions under this Act, the Secretary is authorized to perform such acts including conducting investigations, making reports, issuing subpenas, requiring production of documents, taking depositions, prescribing recordkeeping and reporting requirements, carrying out and contracting for research, development, testing, evaluation, and training (particularly those aspects of railroad safety which he finds to be in need of prompt attention), and delegating to any public bodies or qualified persons, functions respecting examination, inspecting, and testing of facilities or equipment, or persons, as he deems necessary to carry out the provisions of this Act.

(b) The National Transportation Safety Board shall have the authority to determine the cause or probable cause and report the facts, conditions, and circumstances relating to accidents investigated under subsection (a) above, but may delegate such authority to any office or official of the Board or to any office or official of the Department, with the approval of the Secretary, as it may determine appropriate.

(c) No part of any report required of a rail carrier under this Act, or any report made to the Secretary by an employee of the Department, or any report of the Secretary or the Board, relating to any accident or the investigation thereof, shall be admitted as evidence or be used in any suit or action for damages growing out of any matter mentioned in such report or reports.

(d) To carry out the Secretary's and the Board's responsibilities under this Act, officers, employees, or agents of the Secretary or the Board, as the case may be, upon display of proper credentials, are authorized to enter upon, inspect, and examine rail facilities and equipment and pertinent records at reasonable times and in a reasonable manner.

GRADE CROSSING STUDY

SEC. 9. The Secretary shall submit to the President for submission to the Congress, within one year from the date of enactment of this Act, a comprehensive study of the problem of eliminating and protecting railroad grade crossings with his recommendations for appropriate action including, if relevant, a recommendation for equitable allocation of the economic costs of any program.

PENALTIES

SEC. 10. (a) It shall be unlawful for any common carrier by railroad subject to part I of the Interstate Commerce Act in carrying out its functions as a common carrier by railroad to disobey, disregard, or fail to adhere to any rule, regulation, or standard prescribed by the Secretary under this Act or established or continued in effect pursuant to section 7(a) of the Act.

(b) The Secretary shall include in, or make applicable to, any railroad safety rule, regulation, or standard a civil penalty for violation thereof in such amount not less than $250 nor more than $750 as he deems reasonable.

(c) Any common carrier violating any rule, regulation, or standard prescribed by the Secretary under this Act shall upon conviction thereof be fined the civil penalty applicable to the standard violated. Each day of such violation shall constitute a separate offense. Such civil penalty is to be recovered in a suit or suits to be brought by the Attorney General on behalf of the United States in the District Court of the United States having jurisdicion in the locality where such violation occurred. Civil penalties may, however, be compromised for any amount by the Secretary prior to referral to the Attorney General. The amount of any such penalty, when finally determined, or the amount agreed upon in compromise, may be deducted from any sums owing by the United States to the person charged.

(d) In any action brought under this Act, subpenas for witnesses who are required to attend a United States District Court may run into any other district.

INJUNCTIVE RELIEF

SEC. 11. (a) The United States District Courts shall, at the request of the Secretary of Transportation and upon petition by the Attorney General on behalf of the United States, have jurisdiction, subject to the provisions of rule 65 (a) and (b) of the Federal Rules of Civil Procedure, to restrain violations of this Act or to enforce standards, rules, or regulations established hereunder.

(b) In any proceeding for criminal contempt for violation of an injunction or restraining order issued under this section, which violation also constitutes a violation of this Act, trial shall be by the court, or, upon demand of the accused, by a jury, conducted in accordance with the provisions of rule 42(b) of the Federal Rules of Criminal Procedure.

APPROPRIATION AUTHORIZATION

SEC. 12. There is hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

SEPARABILITY

SEC. 13. If any provision of this Act or the application thereof to any person or circumstance is held invalid, the remainder of this Act, and the application of such provision to other persons or circumstances shall not be affected thereby.

The letter, analysis, and report, presented by Mr. MAGNUSON, are as follows:

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., October 15, 1969.

Hon. SPIRO T. AGNEW,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is transmitted herewith a proposed bill "To authorize the Secretary of Transportation to prescribe rules, regulations and performance and other standards as he finds necessary for all areas of railroad safety and to conduct railroad safety research" together with a section-by-section analysis.

This proposed legislation would replace the existing Federal statutes regulating particular aspects of rail safety with a comprehensive statute authorizing the Secretary to prescribe safety requirements for all areas of railroad safety. It would also authorize a program of railroad safety research.

Because of the rising public concern with railroad safety, shortly after being appointed I established a Railroad Safety Task Force to look into all aspects of railroad safety and to recommend solutions. The Task Force had as its Chairman the Federal Railroad Administrator and included representatives of railroad management, railroad labor and the state regulatory commissions. It made its report to me on June 30, 1969. The Report recommended that the Secretary of Transportation be given authority to prescribe safety requirements for all areas of railroad safety. It also recommended a program of railroad safety research. A copy of the Report is enclosed with the bill and analysis.

During the Task Force deliberations the Subcommittee on Surface Transportation of the Senate Commerce Committee held hearings on S. 1933, introduced by Senator Hartke, Chairman of the Subcommittee. S. 1933 would authorize the Secretary of Transportation to prescribe safety requirements for certain specific areas of railroad safety. In testifying on the bill, the Federal Railroad Administrator, Reginald N. Whitman, stated to the Subcommittee that any safety legislation which this Administration may submit should come after completion of the Task Force effort and consideration of its report. The enclosed bill has been developed on the basis of the Task Force Report and recommendations and after consultation with Task Force representatives.

Railroad safety has become a matter of public urgency at this time because of a combination of factors. Over the past seven years there has been a steady rising trend in railroad accidents, particularly derailments. Many of these derailments have involved shipments of hazardous materials. An ever increasing volume of hazardous materials is needed in our growing complex economy and requires transportation. There has been considerable destruction of property when these materials explode and burn. In several instances there has been loss of life. The problem of railroad accidents becomes much more serious as a result of hazardous materials involvement.

Existing rail safety statutes are inadequate to enable the Government to respond to the problem. Most of these statutes, responsibility for which was transferred from the Interstate Commerce Commission to this Department, were enacted from 50 to 75 years ago. They were addressed to particular hazards, primarily those involving employees. They do not, however, reach the prime causes of rail accidents, i.e., defects in track and roadbed, most defects in equipment particularly wheels, and employee failures. Seventy-five per cent of all rail accidents are caused by one or more of these cited factors.

The bill which the Department proposes would give the Secretary of Transportation the authority to prescribe safety requirements for all major areas of railroad safety. These would include safety standards with respect to the construction and performance of track, roadbed, rolling stock and signal systems, as well as qualifications of employees. They would not, however, include standards for occupational health and safety of employees not engaged in railroad operations. Performance standards would be used to the maximum extent practicable. These safety requirements would be capable of being modified and revised to respond to changing and evolving situations.

Existing rail safety statutes would be repealed. Their substantive safety requirements, however, as well as outstanding orders, rules, regulations, standards, requirements and permits issued pursuant to them would be continued in effect as regulations of the Secretary under the proposed bill until changed by the Secretary. The provisions of sections 831 to 835 of the United States Code would remain unchanged. These sections authorize the regulation of explosives and other dangerous articles in surface transportation, including railroads. They are intermodal in scope, flexible in approach, and are aimed at the packaging, handling in transit, and routing of these commodities in surface transportation generally.

The draft bill, however, would specifically authorize the Secretary to develop adequate facilities and technical staff capability to evaluate the problems connected with haz-

ardous materials transportation, to maintain a central reporting system for hazardous materials accidents for the purpose of providing information and assistance in emergencies, and to make an accelerated review of all aspects of hazardous materials transportation.

Implementation and enforcement of a bill of this scope will require the full cooperation not only of management and labor, but of the State regulatory commissions and the public. The development of the Task Force Report and the framework of the proposed bill has included consideration of the valuable recommendations of management, labor, and the states.

The bill envisages the continuation of this approach. It proposes a Railroad Safety Advisory Committee to be composed of representatives of management, labor, the state regulatory commissions and the public to advise and make recommendations to the Department in the development of safety standards and concerning railroad safety generally.

In addition, the bill encourages maximum cooperation between the Federal Government and the various state governments to promote railroad safety in a practicable and economic manner. The Secretary of Transportation would have the authority to secure the assistance of the states to carry out the Act. Such assistance would include all or part of necessary inspection services and related programs. The bill would also authorize Federal funds to assist the states in performing such functions. Existing state and local safety requirements would remain in effect until preempted by action of the Secretary.

Civil penalties are provided for violations of any rules, regulations, or standards prescribed by the Secretary. Enforcement would be in the United States District Court where the violation occurred. The Secretary could, however, compromise such penalties. The bill also provides for injunctive relief.

One of the most difficult safety problems confronting the Department is grade crossing safety. The numbers of such crossings, public and private, the enormous costs of protecting or separating them, and the very high fatality rate associated with grade crossing accidents, must be given attention. Accordingly, the bill proposes a one-year study of the problem.

Safety research in the railroad field can no longer be left exclusively with the carriers. The railroad industry, faced with continuing financial difficulties, rising costs and increasing competition has been unable to allocate adequate resources to research. In addition, interchange of equipment militates against innovations which cannot be responded to by all. The proposed bill authorizes a program of research, development, testing and training, particularly those aspects of railroad safety as are determined to be in need of prompt attention.

The Bureau of the Budget has advised that enactment of this proposed legislation is in accord with the President's program.

Sincerely,

JOHN A. VOLPE.

SECTION-BY-SECTION ANALYSIS OF RAILROADS SAFETY AND RESEARCH ACT OF 1969

(A bill to authorize the Secretary of Transportation to prescribe rules, regulations and performance and other standards as he finds necessary for all areas of railroad safety and to conduct railroad safety research)

Section 1: This section provides that the Act may be cited as the "Railroad Safety and Research Act of 1969."

Section 2: Subsection (a) of section 2 provides the basic authority in the Secretary of Transportation to prescribe rules, regulations and performance and other standards with respect to all areas of safety in railroad operations except the occupational health and safety of employees not engaged in railroad operations as defined by the Secretary. In developing rules, regulations and standards, the Secretary would be required to give consideration to relevant safety standards in existence at the time. The subsection also authorizes the Secretary to conduct railroad safety research.

Subsection (b) provides for notice and opportunity for hearing on all proposed rules, regulations and standards prior to their adoption. Hearings would be conducted in accordance with the provisions of section 553 of Title 5 of the United States Code.

Subsection (c) authorizes the Secretary to grant such exemptions from the requirements of any of the rules, regulations or standards as he finds to be in the public interest and consistent with railroad safety.

Subsection (d) provides for judicial review of any final agency action taken under the section.

Section 3: Subsection (a) of section 3 directs the Secretary to establish in the Department adequate facilities and technical staff necessary to maintain the capability to evaluate the hazards connected with and surrounding the transportation of various hazardous materials. The subsection also provides for the maintenance of a central reporting system for hazardous materials accidents to provide technical and other information to law enforcement and fire fighting personnel and to carriers and shippers to meet emergencies connected with the transportation of hazardous materials. In addition, it provides for accelerated review of all aspects of transportation of hazardous materials to determine and recommend appropriate steps which can be taken immediately to provide greater control over the safe movement of such materials.

Subsection (b) of section 3 provides that the authority contained in this Act would be in addition to any authority contained in sections 831–835 of Title 18 of the United States Code.

Section 4: Subsection (a) of the section provides for the establishment of a Railroad Safety Advisory Committee to advise, consult with and make recommendations to the Department concerning railroad safety. The Committee would consist of the Federal Railroad Administrator who would be Chairman and eight members appointed by the Secretary as follows: two public members and two members each from railroad management, railroad labor organizations and the national organization of the state commissions referred to in sections 202(b) and 205(f) of the Interstate Commerce Act, as amended. Members would be appointed by the Secretary for a term not to exceed three years.

Subsection (b) of section 4 requires the Secretary to submit to the Committee, prior to publication, all proposed rules, regulations and standards, and amendments or repeals thereto and afford the Committee a reasonable opportunity, not to exceed 60 days unless extended by the Secretary, to submit a report on the necessity, technical feasibility, reasonableness and practicability of such proposal. Each report by the Committee would be included in the record of any proceeding that would be held on the proposal.

Section 5: This section provides that state and local safety requirements in effect on the date of enactment of this Act would remain in effect unless the Secretary prescribed Federal safety standards covering the subject matter of the particular state or local safety requirements. After enactment of this Act, however, no further state or local rule, regulation or standard would be permitted in the rail safety field.

Section 6: Subsection (a) of this section declares that it is the policy of Congress that there shall be maximum cooperation between the Federal Government and the various state governments.

Subsection (b) of section 6 provides that the Secretary shall encourage state participation by agreement entered into with the state. The Secretary would be empowered, upon the request of a state, to authorize it to conduct all or any part of the inspection services and related programs necessary or desirable to obtain compliance with rules, regulations and standards prescribed by the Secretary under the Act. The Secretary would be required to find that the state had the capacity to carry out the program under the guidance of the Secretary. The Secretary would also be required to obtain annual reports from participating states which would contain such information as he deemed necessary to enable him to determine if such agreements would be continued.

Subsection (c) of section 6 authorizes the Secretary to provide assistance to those states participating in the railroad safety program to help them to carry out their responsibilities under the Act.

Section 7: Subsection (a) of this section repeals the existing rail safety statutes transferred to the Secretary by section 6(e) of the Department of Transportation Act. However, the substantive requirements of the Acts repealed and all rules, regulations, standards, requirements and permits prescribed or issued pursuant thereto would become regulations of the Secretary under this Act until amended, repealed or modified by the Secretary. Subsection (b) of section 7 preserves current court cases, investigations, claims and rule-making proceedings arising under the existing statutes.

Section 8: Subsection (a) of this section grants general powers to the Secretary to perform such acts including conducting investigations, making reports, issuing subpoenas, requiring production of documents, taking depositions, prescribing recordkeeping, and reporting requirements, carrying out and contracting for research, development, testing, evaluation and training (particularly those aspects of railroad safety which are found to be in need of prompt attention), and delegating to qualified persons and public bodies functions respecting examination, inspection and testing of facilities or equipment, or persons, as he deems necessary to carry out the Act.

Subsection (b) of section 8 preserves the role of the National Transportation Safety Board with respect to determining causes and probable causes of accidents and reporting the facts, conditions, and circumstances relating thereto.

Subsection (c) provides that no report required of a carrier, and no report by the Secretary or the Board, or by employees of the Department or the Board, may be admitted as evidence or used in any suit for damages growing out of any matter mentioned in such reports.

Subsection (d) assures access on the part of qualified investigatory personnel to rail facilities, equipment and records.

Section 9: This section provides for a study of the grade crossing problem including recommendations with respect to funding.

Section 10: Subsection (a) of section 10 makes it unlawful for any common carrier by railroad subject to Part I of the Interstate Commerce Act to violate any rule, regulation or standard prescribed by the Secretary under the Act or incorporated therein by section 7(a).

Subsection (b) of section 10 provides for civil penalties ranging from $250 to $750.

Subsection (c) of section 10 provides for enforcement of the section by the Attorney General of the United States in the jurisdiction where the violation occurred. It also permits compromise of penalties by the Secretary prior to their submission to the Attorney General.

Subsection (d) provides that subpoenas for witnesses required to attend a United States District Court may run into any other district.

Section 11: Subsection (a) of section 11 provides for injunctive relief to be sought in the United States District Courts by the Attorney General at the request of the Secretary of Transportation.

Subsection (b) of section 11 grants trial by jury in any proceeding for criminal contempt for violation of any injunction issued pursuant to the section.

Section 12: This section provides authorization for appropriations to carry out the Act.

Section 13: This section is the standard separability provision.

REPORT OF THE TASK FORCE ON RAILROAD SAFETY

(Submitted to the Secretary of Transportation, June 30, 1969)

At the request of the Secretary of Transportation, we, the representatives of the railroad industry, railroad labor organizations and State regulatory commissions, met as a task force to examine railroad safety and to advise the Secretary. The Task Force began meeting May 1, 1969, and concludes with this report. There has been a free exchange of information and open discussion. Data supplied by the Federal Railroad Administration and its Bureau of Railroad Safety were used for purposes of analysis of problem areas. The agreed upon time limit did not permit additional outside research.

REVIEW OF THE PROBLEM

Railroad operations involve inherent dangers. Movement of large, heavy equipment at high speeds characterizes the industry. Daily, some two billion ton-miles of freight of all types move on the Nation's railroads. Hundreds of railroad yards receive, classify and dispatch the 1.8 million freight car fleet on an around-the-clock, seven-day-a-week schedule. About 600,000 passengers daily commute to work and 200,000 travel intercity by rail; 630,000 railroad workers average 3.5 million man-hours of work per day.

It is logical to assume that operations of such magnitude will generate accidents. Thus, standards, procedures and rules are necessary to provide for safety. The bulk of existing railroad safety practices were developed over the years by the industry itself. For many years they met the safety requirements and produced the present safety record.

Grade crossing accidents rank as the major cause of fatalities in railroad operations. They account for 65% of the fatalities resulting from all types of railroad accidents, and rank second only to aviation mishaps in severity. Annually, about 4,000 accidents produce approximately 1,600 deaths which is also a matter of major public concern.

The yearly totals of crossing accidents, and accident casualties, in the 1920–1967 period, can be related very closely to the combined amount of rail and highway miles travelled and to the effects of major crossing safety improvement programs. The trend in both accidents and casualties up to 1958 was generally downward. The situation has been reversed since 1958, however, with a disturbing general trend upward in both categories. Only 20% of the total 225,000 grade crossings are protected with automatic devices.

Grade crossing safety receives attention from highway authorities as well as railroad organizations. Under existing law, Federal-aid highway funds may be used on grade crossings on the Federal-aid highway system. This includes interstate, primary and secondary roads which together account for slightly more than 20% of the total number of crossings. However, Federal funds may not be used to reduce hazards at railroad crossings of city streets and on many state supplementary highways and local roads which are not on the Federal-aid system and which represent the remaining 80% of the total. A certain number of safety improvements are being made currently by the carriers and state and local agencies on crossings not on the Federal-aid system. There is an imperative need for an expanded public program to cover these crossings in order to reduce immediately this extremely high fatality rate.

The most obvious trend in any recent examination of railroad safety is the large and steady increase in the number of train accidents. The 8,028 train accidents recorded in 1968, represents a significant increase, by any yardstick, over the 4,148 recorded in 1961. Derailments account for two-thirds of the total.

General causes of train accidents are almost evenly divided among human error, defects in or failure of equipment and defects in or improper maintenance of track and roadbed. Derailments are largely attributable to track and equipment problems while collisions are mostly caused by human error.

Employee safety in railroad operations is of continuing concern. In 1968, there were 146 employees killed and 17,993 injured. Employees involved in rail operations and track and roadbed maintenance are more exposed to the inherent hazards of the industry and, therefore, represent a major portion of the employee casualty figure. Contributing factors to the employee casualty rate include inadequate training programs, human errors, equipment defects, poor housekeeping, and non-compliance with safety and operating rules.

The need for transporting ever increasing quantities and varieties of hazardous materials—chemicals, gases, explosives and fuel—creates the possibility of serious accidents that have become a matter of major public concern. Thus, casual factors affecting train accidents—track, equipment, human factors and train-motor vehicle collisions—take on added significance when dangerous commodities are transported.

RAILROAD SAFETY REGULATIONS

Government involvement in railroad safety regulation came early. In 1893, Congress passed the first Safety Appliance Act. Then and in later years various Federal statutes granted varying degrees of Federal authority over locomotives, signalling systems, hours of service limitations on certain employees, air brakes, couplers, hand brakes, grab irons, running boards, sill steps, and draft gears on rolling stock, and accident reporting. The Federal authority to regulate shipment of hazardous materials is applied largely to the packaging of these commodities, although some rules governing handling in transit have been adopted.

Federal statutes do not cover the trucks, wheels and axles of railroad cars nor their design, construction or maintenance. Bridges and tunnels are not subject to Federal regulations and no Federal authority governs track and roadbed. There is no general authority to promulgate standards for employee qualifications, physical requirements and training, nor to prescribe uniform railroad operating rules.

Almost all States have entered the field of rail safety regulation. However, there is no uniform pattern of involvement. Some are quite active in general rail safety matters, but most consideration is on grade crossing safety regulation. Certain States feel they are adequately equipped by statute or existing regulations to deal with any rail safety problem that may arise.

Rules and regulations issued under present Federal and State authority cover only the specific areas reached by the legislative acts. The limitation imposed on the regulatory process by specific, rather than general scope legislative authority, results in only minimal public agency involvement in some problem areas of safety.

PRIORITIES

Railroad safety is wide in scope and requires a more comprehensive national approach. Of first priority is treatment of total rail safety by relating all its various facets to definite goals. This demands a coordinated approach by industry, labor, State and Federal government.

To continue as the major transportation mode, railroads will require more innovation, advanced equipment and higher speed capabilities. Achievement of these advanced capabilities calls for parallel advancement in safe, dependable, operation. Therefore, major safety research is essential to guarantee that tomorrow's railroads will not only be more efficient but more safe.

Railroad operating personnel will continue to be the group most involved with rail safety, or the lack of it. New equipment and higher speeds will place great demands on employee skills and railroad operating practices. It is recognized that employee training is inadequate today, and could become more critical as new technology reshapes the industry. It seems imperative that formal, intensive training programs be given high priority along with human factors research. At the same time, railroad rules and practices must be kept responsive to change so that a high level of safety may be maintained.

The modern industrial economy is dependent upon hazardous materials that are shipped throughout the country. Consequently, the entire transportation network, particularly the railroads upon which a large share of chemicals, explosives, fuels, and the like travel, must have the capacity to transport them safely. A top priority should be the complete evaluation of all factors related to the transportation of these commodities. Particularly, container standards for hazardous materials must take into account impact and stress requirements commensurate with today's longer, heavier and faster trains.

The motoring public is part of the safety problem at the grade crossing. Drivers must be educated to accept the meaning of warning devices and be required to heed them. Compliance must be enforced. Because this is a matter of public safety, public programs must be immediately initiated and properly funded to provide the motorist with positive, uniform and adequate information about the hazard at the crossing. More emphatically, firm and prompt consideration must be given to better use of existing funds and the making available of additional public funds to meet the increasing costs of crossing protection and grade separation, and to increase the number of grade crossings with automatic protection. There should be a long range, public commitment to eliminate this unnecessary and tragic loss of life.

Other improvements in railroad safety must necessarily involve substantial commitment of public and private resources. For Government, a major commitment should be toward research; for industry, upgrading and maintenance of plant should be foremost. Management and labor should cooperate to reduce human error. The economic restraints on the railroad industry make it essential that public policy be directed toward the development of financial incentives to support rail safety.

SUMMARY CONCLUSIONS

Recognizing that there have been longstanding differences among the three groups represented on the Task Force, the parties sought to emphasize areas of agreement rather than disagreement plus their mutuality of interest in railroad safety. The consensus view of the Task Force is as follows:

Railroad safety is a problem, national in scope, of concern to Federal and State Governments, as well as labor and management and which has been accented in recent years by the increase in the number of train accidents, particularly derailments.

Fatalities resulting from railroad accidents occur mostly at grade crossings. Trespassers

rank second in the number of fatalities, and employees third.

Transportation of hazardous materials—chemicals, gases, explosives and fuels—is an economic necessity. Involvement of these materials in train accidents creates a new dimension of public concern over railroad safety.

Reported causes of train accidents are almost evenly divided among defects in or failure of track and roadbed, defects in or failure of equipment, and human error.

Existing Federal and State rail safety regulations do not, in most instances, provide standards for track, roadbed, equipment, employee training and qualifications or rules governing safe railroad operations.

Accident reporting and investigation practices are inadequate. Available statistics do not relate sufficiently to determination of primary and contributory causes.

Research into factors affecting railroad safety is inadequate because it has been sporadic and not coordinated.

Present Federal, State and industry programs to reduce hazards at railway-highway grade crossings are extremely narrow and inadequately funded.

RECOMMENDATIONS

Regardless of the difference in the views of the parties, it is recognized that the safety experience of the American railroads during the past few years is at a point where some effective steps must be taken to bring the problem under control. It is also recognized that the public and Congress will demand definite assurance that safety will be improved. Solutions short of broad Federal regulation may not adequately meet the situation. Therefore, even though further regulation creates some problems for each of the parties, the Task Force agrees that legislation authorizing broad Federal regulatory powers should be enacted with certain safeguards. It is further recommended that a permanent advisory committee be established, by law, representing management, labor, and State regulatory commissions, to guide and assist in the development of safety standards and other related matters. The specific recommendations of this Task Force are:

1. That the Secretary of Transportation, through the Federal Railroad Administration, have authority to promulgate reasonable and necessary rules and regulations establishing safety standards in all areas of railroad safety, through such notice, hearing and review procedures as will protect the rights of all interested parties.

2. In order to strengthen the administration of Federal rail safety regulations, there should be established a National Railroad Safety Advisory Committee to advise, consult with, and make recommendations to the Secretary on matters relating to the activities and functions of the Department in the field of railroad safety. The Committee would be chaired by the Federal Railroad Administrator with the remaining members appointed by the Secretary to represent equally the State regulatory commissions, railroad management and labor. The Secretary would submit to the Committee proposed safety standards and amendments and afford it a reasonable opportunity to prepare a report on the technical feasibility, reasonableness, and practicability of each such proposal prior to adoption. The Committee may propose safety standards to the Secretary for his consideration.

3. Existing State rail safety statutes and regulations remain in force until and unless preempted by Federal regulation. Administration of the program should be through a Federal-State partnership, including state certification similar to the certification principles set forth in the Federal Natural Gas Pipeline Safety Act of 1968.

4. The Advisory Committee be directed to study the present delegation of authority to the Association of American Railroads' Bureau of Explosives in certain areas of the Transportation of Explosives and Other Dangerous Articles Act.

5. A research program be initiated by Government and industry into railroad safety technology, which should be funded immediately for an initial three year period, over and above existing research programs.

6. Formal employee training programs be expanded by railroad management, with the cooperation of labor and government, for the purpose of insuring compliance with safe operating practices and reducing the impact of human error in the accident experience.

7. An expanded, concerted program of grade crossing safety be undertaken utilizing established Federal and State agencies and advisory groups to set uniform procedures and standards. Early attention must be given to the development of improved crossing protection at lower cost plus greater emphasis placed on driver education and traffic enforcement. In addition to more extensive use of existing Federal funds now allocable to present highway safety programs, there must be new sources of funding to finance an expanded grade crossing program.

8. The Federal Railroad Administration should revise, in consultation with railroad management, labor, and state regulatory commissions, its rules for reporting of accidents. The aim should be to make the data more current, more uniform and to identify causes more accurately.

9. The Secretary of Transportation in consultation with and assistance of the Task Force and appropriate Congressional committees should draft proposed legislation to implement these recommendations.

R. N. Whitman, Chairman, Federal Railroad Administrator; Charles J. Fain, Subchairman, Commissioner, Missouri Public Service Commission; Willis F. Ward, Chairman, Michigan Public Service Commission; John P. Vukasin, Jr., Commissioner, California Public Utilities Commission.

George E. Leighty, Subchairman, Chairman, Railway Labor Executives' Association; Thomas M. Goodfellow, Subchairman, President, Association of American Railroads; Al H. Chesser, Vice President, National Legislative Representative, United Transportation Union; Donald S. Beattie, Executive Secretary, Railway Labor Executives' Association; William E. Skutt, Assistant Grand Chief Engineer, Brotherhood of Locomotive Engineers; William D. Lamprecht, Vice President, Systems Operations, Southern Pacific Company; James R. Thorne, Vice President, Operating Dept., Seaboard Coast Line Railroad; C. V. Cowan, Vice President, Operating Group, Baltimore & Ohio/Chesapeake & Ohio Railroad Company.

Mr. PROUTY. Mr. President, I am pleased to be a sponsor of the administration's Railroad Safety and Research Act of 1969.

I think all of us are deeply concerned about the plight of railroad safety. An article published in the Wall Street Journal of June 26 succinctly points out the scope of the problem now facing this Nation:

There now are around 30,000 railroad accidents a year—approaching 100 a day. The number of accidents where damage to railroad property totaled $750 or more was 8,028 in 1968, up 83% from 4,378 in 1962, despite a decline in miles traveled.

There now are about 15 derailment a day, compared with nine in 1964.

Last year 2,359 persons were killed in railroad accidents and 24,608 were injured. In contrast, 351 persons died in airline accidents.

And in 1967, the latest year for which figures are available, accidents cost the nation's railroads $266.3 million in out-of-pocket expenses—a figure equal to more than a half of the net income of all U.S. railroads that year.

Mr. President, the entire problem is compounded by the fact that in our society, which is so technologically sophisticated, we depend more and more on the transportation of hazardous substances. Public outcry earlier this year concerning the shipment of poisonous gas from the Rocky Mountain Arsenal to the east coast really only scratched the surface concerning the nature of chemicals shipped by our Nation's common carriers. Railroads, because of the fact that management can control the use of rails and rights-of-way, are inherently the safest method for transportation of potentially dangerous chemicals and explosives. Nevertheless, all of us realize that increased accidents, greater speeds, and more hazardous shipments provide a very lethal combination.

Mr. President, I think all of us agree that the antiquated laws the Federal Government now has on its books cannot adequately insure that transportation of hazardous materials will be as safe as humanly possible. Therefore, I am particularly pleased that the administration has submitted a bill which is realistic, comprehensive, and farsighted. I, personally, believe the excellence of the bill is to a large measure attributed to the unique cooperation that went into its formation.

As you may know, Secretary Volpe on May 1 announced the formation of a task force to study the problems connected with railroad safety. This task force was made up of representatives of railroad management, representatives of railroad labor, and State representatives. Reginald N. Whitman, the Federal Railroad Administrator, was chairman of the task force. I recall, Mr. President, when the Commerce Committee first held hearings on railroad safety in the latter part of May, Mr. Whitman testified before our committee. Concerning the work of the task force, Mr. Whitman stated at that time:

We have set a target date of June 30, for our report to the Secretary. I may sound too optimistic but until I know otherwise, I expect labor, management and the States to take full advantage of the unique opportunity and challenge of participating in the development of Federal policy.

Primarily because of Mr. Whitman's dedication, persistence, and skill, the task force made its report exactly on time. Mr. Whitman spelled out the recommendations of the task force to the Surface Transportation Subcommittee at hearings held in Indianapolis, Ind., in the middle of July. Unfortunately, I was unable to attend those hearings, but the distinguished Senator from Indiana (Mr. HARTKE), who presided at the hearings, summed up my feelings concerning the task force when he told Mr. Whitman:

I want to offer my congratulations for the fine work that you have done and I hope you will convey to the task force my sincere appreciation for the fact that they have moved as rapidly as they have in this field.

In addition, the task force, under the direction of Reginald Whitman, issued a report which not only was put together and finalized within 60 days, submitted when promised, and was comprehensive, but it was also unanimously supported by the broad spectrum of interests repre-

sented on the task force. The specific recommendations of the task force were:

First. That the Secretary of Transportation, through the Federal Railroad Administration, have authority to promulgate reasonable and necessary rules and regulations establishing safety standards in all areas of railroad safety, through such notice, hearing and review procedures as will protect the rights of all interested parties.

Second. In order to strengthen the administration of Federal rail safety regulations, there should be established a National Railroad Safety Advisory Committee to advise, consult with, and make recommendations to the Secretary on matters relating to the activities and functions of the Department in the field of railroad safety. The Committee would be chaired by the Federal Railroad Administrator with the remaining members appointed by the Secretary to represent equally the State regulatory commissions, railroad management, and labor. The Secretary would submit to the Committee proposed safety standards and amendments and afford it a reasonable opportunity to prepare a report on the technical feasibility, reasonableness, and practicability of each such proposal prior to adoption. The Committee may propose safety standards to the Secretary for his consideration.

Third. Existing State rail safety statutes and regulations remain in force until and unless preempted by Federal regulation. Administration of the program should be through a Federal-State partnership, including State certification similar to the certification principles set forth in the Federal Natural Gas Pipeline Safety Act of 1968.

Fourth. The Advisory Committee be directed to study the present delegation of authority to the Association of American Railroads' Bureau of Explosives in certain areas of the Transportation of Explosives and Other Dangerous Articles Act.

Fifth. A research program be initiated by Government and industry into railroad safety technology, which should be funded immediately for an initial 3-year period, over and above existing research programs.

Sixth. Formal employee training programs be expanded by railroad management, with the cooperation of labor and government, for the purpose of insuring compliance with safe operating practices and reducing the impact of human error in the accident experience.

Seventh. An expanded, concerted program of grade crossing safety be undertaken utilizing established Federal and State agencies and advisory groups to set uniform procedures and standards. Early attention must be given to the development of improved crossing protection at lower cost plus greater emphasis placed on driver education and traffic enforcement. In addition to more extensive use of existing Federal funds now allocable to present highway safety programs, there must be new sources of funding to finance an expanded grade crossing program.

Eighth. The Federal Railroad Administration should revise, in consultation with railroad management, labor, and State regulatory commissions, its rules for reporting of accidents. The aim should be to make the data more current, more uniform, and to identify causes more accurately.

I think Mr. Whitman best summed up the significance of this excellent task force report when he made the following comment during the Indiana hearings:

> Of great significance is the fact that the recommendations represent the unanimous views of management, labor and the States. We have here a landmark development of labor-management cooperation. The report sets the stage for a new era of cooperation in building a safer railroad system. We hope to build from this base of mutual interest and commitment to rail safety, a meaningful program that will get the job done.

Last week, Secretary of Transportation Volpe submitted to the Senate the comprehensive bill that we are introducing today. I am proud to be a sponsor of the bill, which I hope will be promptly enacted. Over the years we have heard numerous comments concerning the need for a balanced transportation system. Unfortuantely, seldom have such comments been associated with concrete action designed to strengthen and improve all modes of transportation. This year as we move toward the establishment of an airports-airways trust fund, as urban mass transportation program, and some future relief for the Nation's railroads, I, for one, strongly sense the feeling that we have moved from a period of speculation and comment to a period of construction action. Certainly, the bill is indicative of such action and can serve as a vehicle to form the basis for an up-to-date and an effective Government involvement in railroad safety.

In this connection, I am mindful that some parties having an interest in the provisions of this proposed legislation have some reservations with regard to portions of it. For example, it is my understanding that some of the States are concerned about the Federal preemption provision with respect to safety standards in those instances where such preemption may prove to impinge upon the efforts of a State to establish standards higher than those required by the Federal Government.

I, personally, feel confident that such concerns will be accorded every consideration by the Committee on Commerce in order to result in a meaningful measure which will be acceptable to most interested parties. In other words, while I fully recognize the reported concerns of some interested parties, I personally do not feel that such concerns are insurmountable or detract in any way from the merits of the principal thrust of this administration's proposed legislation concerning railroad safety.

Mr. President, in order to afford all of the Senators an opportunity to consider the bill fully, I ask unanimous consent that a comparative analysis that I have prepared between this bill and a bill introduced earlier this year by the distinguished Senator from Indiana (Mr. HARTKE) be printed in the RECORD immediately following my remarks.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

COMPARATIVE ANALYSIS OF RAILROAD SAFETY LEGISLATION PENDING BEFORE THE SENATE

(S. 1933 introduced by Senator Hartke and S. 3061, the administration bill)

ADMINISTRATION BILL	HARTKE BILL
Title: "Railroad Safety and Research Act of 1969"	Title S. 1933 "Federal Railroad Safety Act of 1969"
Section Two—Gives the Secretary of Transporation rule making authority in all areas affecting railroad safety, including qualifications of employees except with respect to those employees not engaged in railroad operations as defined by the Secretary.	*Section Two*—Gives the Secretary rule making authority of facilities and equipment, but specifically excludes authority relating to the qualifications of employees.
Consideration would be given to existing rules and regulations prior to an enactment of this bill, but existing rail safety statutes are, in fact, repealed (see Section 7 under this analysis).	This bill would *supplement* provisions of law and regulations in effect on the date of enactment. Unlike the Administration Bill, it does not repeal existing law.
Authorizes the Secretary to conduct railroad safety research.	No comparable provision.
Provides for notice and hearings in connection with any rule making.	No comparable provision.
Authorizes the Secretary to grant such exemptions from regulations which he finds to be in the public interest and consistent with railroad safety.	Section 7(b). The Secretary may grant exemptions after a reasonable notice and opportunity for a hearing.
Provides for judicial review of any final agency action taken by the Department of Transportation under this act.	No comparable provision.
Section Three—Supplements 18 USC 831–835 by directing the Secretary to establish adequate facilities and technical staff necessary to maintain the capability to evaluate the hazards connected with the transportation of hazardous materials. Sets up the central reporting system for hazardous materials accidents and provides a mandate for the Secretary to study this entire area and recommend appropriate steps which can be taken immediately to provide greater control with the safe movement of hazardous materials.	No comparable provision.

See footnote at end of table.

COMPARATIVE ANALYSIS OF RAILROAD SAFETY LEGISLATION PENDING BEFORE THE SENATE—Continued

(S. 1933 introduced by Senator Hartke and S. 3061, the administration bill)

ADMINISTRATION BILL	HARTKE BILL
Section 4—Establishes a Railroad Safety Advisory Committee, RSAC, chaired by the Federal Railroad Administrator and having eight members appointed by the Secretary (two public members, two members from railroad labor, two members from railroad management, and two members from the National Association of State Public Utility Commission).	No comparable provision.
Requires the Secretary to submit all proposed rule making to the Railroad Safety Advisory Committee, which will have sixty days to comment on the necessity, feasibility, reasonability and practicability of each proposal.	No comparable provision.
Section 5—Prospectively excludes state or local regulation in the rail safety field.	Section three continues state laws for regulations and limits application of Federal law to those instances where the Federal law imposes a standard of safety *equal to or higher than* the standard imposed by the particular provision of state law or regulation.
Continues the effect of state and local safety requirements in effect on the date of enactment unless the Secretary prescribes Federal safety standards covering the subject matter of the particular state or local safety requirement.	
Section 6—a Declaration of Congress urging maximum co-operation between the Federal Government and the states.	There is no comparable provision directly on point. However, Section three which specifically preserves the authority of the states with respect to railroad safety regulation tends to run counter to Section six in the Administration Bill.
Authorizes the Secretary to delegate to the individual states (upon the request of a state) inspection services and related programs necessary for compliance with the Act. The state would have to certify that it was able and willing to receive the delegated authority and would be required to report annually to the Secretary of Transportation.	
The Secretary is also authorized to provide assistance to those states who participate in the carrying out of the railroad safety program.	
Section 7—Repeals the existing rail safety statutes (the more recent substantive one being enacted in 1920). However, this section also specifies that substantive requirements under the acts repealed will continue in effect until amended, repealed or modified by the Secretary.	No comparable provision. However, Section two of the Hartke Bill which gives the Secretary the general rule making authority over the safety of facilities and equipment specifically notes that such regulations issued by the Secretary would *supplement* provisions of law and regulations in effect on the date of enactment of this Act.
The section also specifically preserves any pending act or proceeding under any of the acts repealed.	
(See footnote #1 for a list of the specific acts repealed by this section)	
Section 8—Gives the Secretary authority to conduct investigations, issue subpoenas, depositions, etc.	Section seven (a) contains a similar provision.
Preserves the role of the National Transportation Safety Board, NTSB, with respect to determining the cause and probable cause of accidents and reporting the facts, conditions, and circumstances relating thereto.	No comparable provision.
Excludes carrier records or reports by the Secretary for the National Transportation Safety Board from use as evidence in tort cases growing out of any matter mentioned in such reports.	No comparable provision.
Section 9—This section provides for a study of the grade crossing problem and includes authority for the Secretary to consider ways and means of funding any remedies the study might recommend.	No comparable provision.
Section 10—Makes it unlawful for any common carrier by railroad to violate any rule, regulation, or standard prescribed by the Secretary under this Act.	The comparable provision is contained in Section Two.
Provides for civil penalties ranging from $250 to $750.	Section four contains civil penalties from $500 to $1,000 for each violation.
Each day of the violation constitutes a separate offense.	Each day of the violation constitutes a separate offense.
Gives Attorney General enforcement authority in the jurisdiction where the violation occurred and permits a compromise of penalties by the Secretary prior to their submission to the Attorney General.	Section five (a) gives the Attorney General enforcement authority in any District Court. Section 4(b) permits compromise of penalty by the Secretary.
Subpoenas for witnesses who are required to attend the United States District Court may run into any other district.	No comparable provision.
Section 11—Gives the Attorney General the power to seek injunctive releases at the request of the Secretary.	Section five (a) gives the Attorney General power to seek an injunction. In addition, Sections six (a) and (b) and (c) give the Secretary cease and desist powers.
(Note that the Administration Bill does not give the Secretary cease and desist powers)	
Grants trial by jury in any proceeding for criminal contempt.	Section five (b) includes trial by jury also.
Section 12—An open-ended authorization for funds to carry out the Act.	An open-ended authorization for funds to carry out the Act.
Section 13—Standard Separability Provision.	Section ten contains the same standard provision.
No comparable provision.	Section six giving the Secretary cease and desist powers (referred to in the comparison under Section 10 of the Administration Bill)
No comparable provision.	Section eight provides that "Nothing in this Act shall in any way be construed or applied so as to abridge, modify, limit, supersede, or repeal any provision of the Railway Labor Act (45 U.S.C. 151–188) or any agreements made pursuant thereto."

[1] The following acts are among those repealed by Section Seven in the Administration Bill:

The Safety Appliance Acts (45 U.S.C. 1 through 16)—1 through 7 of title 45 was enacted March 2, 1893; Section 8 through 10 of title 45 were enacted March 2, 1903; Section 11 through 16 of title 45 were enacted April 14, 1910.

The so-called Ash Pan Act (45 U.S.C. 17 through 21) was enacted May 30, 1908.

The so-called Locomotive Inspection Act (45 U.S.C. 22 through 29) was originally enacted February 17, 1911, amended March 4, 1915 and amended June 7, 1924. There were other minor amendments relating to the pay for Inspectors and methods of inspection.

A joint resolution directing the ICC to conduct a study with respect to block-signal systems and devices for automatic control of trains (45 U.S.C. 35) was enacted in 1906 and presumably the ICC made its report.

The ICC was given authority to investigate and test safety devices used in railroad operations (45 U.S.C. 36) in May 1908.

Mail Car Inspection (45 U.S.C. 37) was given to the ICC May 27, 1908.

Accident Investigation and Reporting was given jointly to railroads and the ICC (45 U.S.C. 38–43) May 6, 1910.

The Hours of Service Act (45 U.S.C. 61–64) was passed in 1907.

S. 3063—INTRODUCTION OF A BILL TO CREATE A NATIONAL INSTITUTE OF DIGESTIVE DISEASES AND NUTRITION

Mr. YARBOROUGH. Mr. President, I introduce, for appropriate reference, a bill to create a National Institute of Digestive Diseases and Nutrition in the National Institutes of Health.

The investigations and findings of the Special Committee on Nutrition and Human Needs have brought to public attention in a dramatic way the dependency of the human body upon food and proper nutrition. The committee has brought to light the connection between nutrients and mental and physical growth.

But nutrition is more than the intake of food. It involves an understanding of the way the human body utilizes food throughout the digestive system. This in turn requires a thorough knowledge of digestive diseases.

Digestive diseases include disorders of the stomach, intestines, biliary passages, liver, and pancreas. Within this general description, digestive disorders show the following incidence:

First. Half the population of the United States has digestive complaints. One-sixth of all illnesses are in this category.

Second. One-third of all cancer deaths are due to cancer of the digestive tract.

Third. Digestive illnesses are the leading cause of hospitalization and for inability to work due to illness. An average of 190,000 persons are absent from work each day because of digestive disorders.

Fourth. Digestive diseases are the third leading cause of death.

Fifth. Digestive diseases are the leading cause of industrial absenteeism among male employees.

Sixth. Approximately 1 percent of our gross national product is lost each year due to digestive disease, costing $8 billion.

Seventh. Estimated annual costs of digestive diseases to the Veterans' Administration is nearly $175 million—$83.7 million of it for medical care and $91 million more for disability payments.

Eighth. The economic loss in this country due to peptic ulcer alone is nearly $1 million a year.

Ninth. For digestive disease, 23 percent, of all nonobstetrical surgery is performed.

Tenth. Cirrhosis of the liver ranks as the fourth most common cause of death in adults at the present time.

The education and training of medical doctors to cope with this facet of medical practice has seriously lagged. The National Institutes of Health show that 141 trainees in digestive disease have been helped in their training, compared to 1,146 cardiovascular trainees. NIH support for research and training totals less than $30 million a year. The average medical school has only three teachers in digestive diseases as compared to four in hematology, or disorders of the blood, and six in cardiovascular diseases.

Fewer than 1,500 physicians in the country treat digestive diseases as such, and these disorders receive less than 5 percent of the extramural research support funds of the National Institutes of Health.

These figures amply support, I believe, the formation of a National Institute of Digestive Diseases and Nutrition. The bill I am introducing now will establish such an Institute in the National Institutes of Health. It will be authorized to conduct, coordinate, and foster research relating to the cause, prevention, and methods of diagnosis and treatment of digestive diseases and nutrition. It will be able to make grants in aid to universities, hospitals, laboratories and other public and private agencies and to individuals for research projects in these fields. It will create an information center and promote the circulation of information about findings. It will be authorized to maintain research fellows, and to provide training and instruction in the diagnosis, prevention, and treatment of digestive disorders.

The funds needed to carry out these activities are not itemized in the bill, but will be determined after hearings have developed the extent of need and the appropriate level of expenditure. Administration of these duties will be aided by a National Advisory Digestive Diseases and Nutrition Council.

I ask unanimous consent that the bill be printed at this point in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3063) to amend the Public Health Service Act to support research and training in diseases of the digestive tract, including the liver and pancreas, and diseases of nutrition, and aid the States in the development of community programs for the control of these diseases, and for other purposes, introduced by Mr. YARBOROUGH, was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

S. 3063

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Digestive Diseases and Nutrition Act".

PURPOSE

SEC. 2. The purpose of this Act is to improve the health of the people of the United States through the conduct of researches, investigations, experiments, and demonstrations relating to the cause, prevention and methods of diagnosis and treatment of diseases of the digestive tract, including the liver and pancreas, and diseases of nutrition; assist and foster such researches and other activities by public and private agencies, and promote the coordination of all such researches and activities and the useful application of their results; provide training in matters relating to digestive diseases and nutrition including refresher courses for physicians; and develop and assist States and other agencies in the use of the most effective methods in the promotion and maintenance of health and of prevention, diagnosis, and treatment of digestive diseases and nutrition.

RESEARCH AND TRAINING

SEC. 3. Title IV of the Public Health Service Act is amended by adding at the end thereof the following:

"PART F—NATIONAL INSTITUTE OF DIGESTIVE DISEASES AND NUTRITION

"ESTABLISHMENT OF INSTITUTE

"SEC. 451. There is hereby established in the Public Health Service the National Institute of Digestive Diseases and Nutrition (hereafter in this part referred to as the 'Institute').

"DIGESTIVE AND NUTRITIONAL DISEASE RESEARCH AND TRAINING

"SEC. 452. In carrying out the purposes of section 301 with respect to digestive diseases and nutrition, the Secretary, through the Institute and in cooperation with the National Advisory Digestive Diseases and Nutrition Council (hereafter in this part referred to as the 'Council') shall—

"(a) conduct, assist, and foster researchers, investigations, experiments, and demonstrations relating to the cause, prevention, and methods of diagnosis and treatment of digestive diseases and nutrition;

"(b) promote the coordination of research and control programs conducted by the Institute, and similar programs conducted by other agencies, organizations and individuals;

"(c) make available research facilities of the Service to appropriate public authorities, and to health officials and scientists engaged in special studies related to the purposes of this part;

"(d) make grants-in-aid to universities, hospitals, laboratories, and other public and private agencies and institutions, and to individuals for such research projects relating to digestive diseases and nutrition as are recommended by the Council, including grants to such agencies and institutions for the construction, acquisition, leasing, equipment, and maintenance of such hospital, clinic, laboratory, and related facilities, and for the care of such patients therein, as are necessary for such research;

"(e) establish an information center on research, prevention, diagnosis, and treatment of digestive diseases and nutrition, and collect and make available, through publications and other appropriate means, information as to, and the particular application of, research and other activities carried on pursuant to this part;

"(f) secure from time to time, and for such periods as he deems advisable, the assistance and advice of persons from the United States or abroad who are experts in the field of digestive diseases and nutrition; and

"(g) in accordance with regulations and from funds appropriated or donated for the purpose (1) establish and maintain research fellowships in the Institute and elsewhere with such stipends and allowances (including travel and subsistence expenses) as he may deem necessary to train research workers and procure the assistance of the most brilliant and promising research fellows from the United States and abroad, and, in addition, provide for such fellowships through grants, upon recommendation of the Council to public and other nonprofit institutions; and (2) provide training and instruction and establish and maintain trusteeships, in the Institute and elsewhere in matters relating to the diagnosis, prevention, and treatment of digestive diseases with such stipends and allowances (including travel and subsistence expenses) for trainees as he may deem necessary, the number of persons receiving such training and instruction, and the number of persons holding such traineeships, to be fixed by the Council, and, in addition, provide for such training, instruction, and traineeships through grants, upon recommendation of the Council, to public and other nonprofit institutions.

"ADMINISTRATION

"SEC. 453. (a) In carrying out the provisions of section 452 all appropriate provisions of section 301 shall be applicable to

the authority of the Secretary, and grants-in-aid for digestive diseases and nutritional research and training projects shall be made only after review and recommendation of the Council made pursuant to section 454.

"(b) The Secretary is authorized to accept conditional gifts, pursuant to section 501, for study, investigation, or research into the cause, prevention, or methods of diagnosis or treatment of digestive diseases and nutrition, or for the acquisition of grounds or for the erection, equipment, or maintenance of premises, buildings, or equipment of the Institute. Donations of $50,000 or over for carrying out the purposes of this part may be acknowledged by the establishment within the Institution of suitable memorials to the donors.

"FUNCTIONS OF THE COUNCIL

"SEC. 454. The Council is authorized to—

"(a) review research projects or programs submitted to or initiated by it relating to the study of the cause, prevention, or methods of diagnosis or treatment of digestive diseases, and certify approval to the Secretary, for prosecution under section 452, any such projects which it believes show promise of making valuable contributions to human knowledge with respect to the cause, prevention, or methods of diagnosis or treatment of digestive diseases and nutrition;

"(b) review applications from any university, hospital, laboratory, or other institution or agency, whether public or private, or from individuals, for grants-in-aid for research projects relating to digestive diseases and nutrition, and certify to the Secretary its approval of grants-in-aid in the cases of such projects which show promise of making valuable contributions to human knowledge with respect to the cause, prevention, or methods of diagnosis or treatment of digestive diseases and nutrition;

"(c) review applications from any public or other nonprofit institution for grants-in-aid for training, instruction, and traineeship in matters relating to the diagnosis, prevention, and treatment of digestive diseases and nutrition, and certify to the Secretary its approval of such applications for grants-in-aid as it determines will best carry out the purposes of this Act;

"(d) collect information as to studies which are being carried on in the United States or any other country as to the cause, prevention, or methods of diagnosis or treatment of digestive diseases and nutrition, by correspondence or by personal investigation of such studies, and with the approval of the Secretary make available such information through appropriate publications for the benefit of health and welfare agencies and organizations (public or private), physicians, or any other scientists, and for the information of the general public;

"(e) recommend to the Secretary for acceptance conditional gifts pursuant to section 501 for carrying out the purposes of this part; and

"(f) advise, consult with, and make recommendations to the Secretary with respect to carrying out the provisions of this part.

"OTHER AUTHORITY WITH RESPECT TO DIGESTIVE DISEASES AND NUTRITION

"SEC. 455. This part shall not be construed as superseding or limiting—

"(a) the functions or authority of the Secretary or the Service, or of any other officer or agency of the United States, relating to the study of the causes, prevention, or methods of diagnosis or treatment of digestive diseases and nutrition; or

"(b) the expenditure of money therefor."

NATIONAL ADVISORY DIGESTIVE DISEASES AND NUTRITION COUNCIL

SEC. 4. (a) Section 217 of the Public Health Service Act is amended by adding at the end thereof the following new subsection:

"(d) The National Advisory Digestive Diseases and Nutrition Council shall consist of the Secretary or his representative, the chief medical officer of the Veterans' Administration or his representative, the Surgeon General of the Army or his representative, the Surgeon General of the Navy or his representative, who shall be ex officio members, and twelve members appointed without regard to the civil service laws by the Secretary. The twelve appointed members shall be leaders in the fields of fundamental sciences, medical sciences, education, or public affairs, and six of such twelve shall be selected from leading medical or scientific authorities who are outstanding in the study, diagnosis, or treatment of digestive diseases and nutrition. Each appointed member of the Council shall hold office for a term of four years, except that any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term, and except that, of the members first appointed, three shall hold office for a term of three years, three shall hold office for a term of two years, and three shall hold office for a term of one year, as designated by the Secretary at the time of appointment. None of such twelve members shall be eligible for reappointment until a year has elapsed since the end of his preceding term. Every two years the Council shall elect one member to act as Chairman for the succeeding two-year period."

(b) The second sentence of section 217(b) of such Act is amended by inserting "digestive diseases and nutrition," immediately after "blindness,".

(c) Paragraph (d) of section 301 of such Act is amended by inserting "or, with respect to digestive diseases and nutrition, as recommended by the National Advisory Digestive Diseases and Nutrition Council," immediately after "National Advisory Heart Council,".

(d) Section 301(1) of such Act is amended by inserting "or, with respect to digestive diseases and nutrition, upon recommendation of the National Advisory Digestive Diseases and Nutrition Council," immediately after "National Advisory Dental Research Council,".

CONTROL GRANTS

SEC. 5. Title III of such Act is amended by inserting after section 315 the following new section:

"GRANTS FOR COMMUNITY PROGRAMS OF DIGESTIVE DISEASES AND NUTRITION CONTROL

"SEC. 316. (a) To enable the Secretary to carry out the purposes of part F of title IV and to assist, through grants, States, counties, health districts, and other political subdivisions of the State, and public and nonprofit agencies, institutions, and other organizations, in establishing and maintaining organized community programs of digestive diseases and nutrition control, including grants for demonstrations and the training of personnel, there are hereby authorized to be appropriated for each fiscal year such sums as may be necessary for such purposes. For each fiscal year, the Secretary shall determine the total sum from the appropriation under this subsection which shall be available for allotment among the several States, and shall, in accordance with regulations, from time to time make allotments from such sum to the several States on the basis of (1) the population, and (2) the financial need of the respective States. Upon making such allotments, the Secretary shall notify the Secretary of the Treasury of the amounts thereof.

"(b) The Secretary shall from time to time determine the amounts to be paid to each State under this section from the allotments to such State, and shall certify to the Secretary of the Treasury, the amounts so determined, reduced or increased, as the case may be, by the amounts by which he finds that estimates of required expenditures with respect to any prior period were greater or less than the actual expenditures for such period: *Provided*, That the Secretary may determine and certify to the Secretary of the Treasury amounts to be paid to a county, health district, other political subdivision of the State or to any public or nonprofit agency, institution, or other organization in the State, if he finds that payment to such subdivision or other organization has been recommended by the State health authority of the State and (1) that the State health authority has not, prior to August 1 of the fiscal year for which the allotment is made, presented and had approved a plan in accordance with subsection (c), or (2) that the State health authority is not authorized by law to make payments to such other organization.

"(c) The moneys so paid to any State or to any political subdivision or other organization, shall be expended solely in carrying out the purposes specified in subsection (a) and in accordance with plans, approved by the Secretary, which have been presented by the health authority of such State, or, under the circumstances specified in subsection (b)(1), by the political subdivision, or the agency, institution or other organization to whom the payment is made, and, to the extent that any such plan contains provisions relating to mental health, by the mental health authority of such State.

"(d) Money so paid from allotments under subsection (a) shall be paid upon the condition that there shall be spent in such State for the same general purpose from funds of such State and its political subdivisions (or in the case of payments to a political subdivision or to an agency, institution or other organization under circumstances specified in subsection (b)(1), from funds of such political subdivision or organization), an amount determined in accordance with regulations.

"(e) Whenever the Secretary, after reasonable notice and opportunity for hearing to the health authority of the States (or, in the case of payments to any political subdivision or any agency, institution, or other organization under the circumstances specified in subsection (b)(1), such subdivision or organization) finds that, with respect to money paid to the State, subdivision, or organization out of appropriations under subsection (a), there is a failure to comply substantially with either—

"(1) the provisions of this section;

"(2) the plan submitted under subsection (c); or

"(3) the regulations;

the Secretary shall notify such State health authority, political subdivision, or organization that further payments will not be made to the State, subdivision, or organization from appropriations under subsection (a) (or in his discretion that further payments will not be made to the State, subdivision, or organizations from such appropriations for activities in which there is such a failure), until he is satisfied that there will no longer be any such failure. Until he is so satisfied the Secretary shall make no further certification for payment to such State, subdivision, or organization from appropriations under subsection (a), or shall limit payment to activities in which there is no such failure.

"(f) All regulations and amendments thereto with respect to grants to States under this section shall be made after consultation with a conference of the State health authorities. Insofar as practicable, the Secretary shall obtain the agreement, prior to the issuance of any such regulations or amendments, of the State health authority."

GENERAL PROVISIONS

SEC. 6. Section 2 of the Public Health Service Act, as amended, is amended by striking out the word "and" at the end of paragraph (o), by striking out the period at the end of

paragraph (p) and inserting in lieu thereof "; and", and by inserting after paragraph (p) the following new paragraph:

"(q) The term 'digestive diseases' means diseases of the digestive tract, including liver and pancreas."

ADDITIONAL COSPONSORS OF BILLS

S. 338

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that, at the next printing, the name of the Senator from New Mexico (Mr. MONTOYA) be added as a cosponsor of S. 338, to amend section 1677 of title 38, United States Code, relating to flight training and to amend section 1682 of such title to increase the rates of educational assistance allowance paid to veterans under such sections.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2306

Mr. HRUSKA. Mr. President, I ask unanimous consent that at its next printing the name of the Senator from Idaho (Mr. JORDAN) be added as a cosponsor of S. 2306, to provide for the establishment of an international quarantine station and to permit the entry therein of animals from any country and the subsequent movement of such animals into other parts of the United States for purposes of improving livestock breeds, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE RESOLUTION 277—RESOLUTION REPORTED RELATING TO REFERRAL OF SENATE BILL 202 TO THE CHIEF COMMISSIONER OF THE COURT OF CLAIMS (S. REPT. NO. 91-492)

Mr. ANDERSON, from the Committee on Interior and Insular Affairs, reported an original resolution (S. Res. 277), and submitted a report thereon, which report was ordered to be printed, and the resolution was placed on the calendar, as follows:

S. RES. 277

A resolution to refer the bill (S.202) entitled "A bill to provide that the United States disclaims any interest in a certain tract of land," to the Chief Commissioner of the Court of Claims for a report thereon

Whereas there is pending in the Senate of the United States a bill designated as S. 202, to provide that the United States disclaims any interest in a certain tract of land, as to which the Senate desires the investigation, findings and conclusion hereinafter referred to: It is hereby

Resolved, That the said bill, as amended by the Senate Committee on Interior and Insular Affairs, which amendments are shown in the Committee Print on S. 202, dated October 22, 1969, be referred to the Chief Commissioner of the United States Court of Claims as authorized by section 1492 of title 28 of the United States Code for a report in conformity with section 2509 of title 28 of the United States Code with findings of fact and conclusions sufficient to inform Congress whether the waiver and relinquishment of any claim of title by the United States is appropriate in light of any legal or equitable claim to the real property described therein, or any part thereof, by the private claimants thereto, including findings as to whether the United States by prior legislative and administrative actions has not in fact and in law vested title to the said real property in the claimants or their predecessors in title, and whether, if the private claimants were asserting their claim against any party or entity other than a sovereign, their title would not be deemed good and indefeasible with respect to said party or entity; such report shall not take account of, or be in any way affected by, an conclusions of law or fact hitherto asserted by any administrative agency of the United States with respect to the instant controversy between the claimants and the United States.

ADDITIONAL COSPONSORS OF A CONCURRENT RESOLUTION

SENATE CONCURRENT RESOLUTION 39

Mr. McGOVERN. Mr. President, I ask unanimous consent that, at the next printing, the names of the Senator from Wisconsin (Mr. NELSON) and the Senator from Utah (Mr. Moss) be added as cosponsors of Senate Concurrent Resolution 39, relating to withdrawal of United States forces from Vietnam.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, October 22, 1969, he presented to the President of the United States the following enrolled bills:

S. 74. An act to place in trust status certain lands on the Standing Rock Sioux Indian Reservation in North and South Dakota;

S. 775. An act to declare that the United States shall hold certain land in trust for the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota; and

S. 921. An act to declare that certain federally owned land is held by the United States in trust for the Cheyenne River Sioux Tribe of the Cheyenne River Indian Reservation.

ORDER OF BUSINESS

Mr. ALLEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TAX REFORM NOS. 5 AND 6—DEMOCRATIC STUDY GROUP TAX REFORM FACT BOOK

Mr. METCALF. Mr. President, today I shall make available two additional sections of the Tax Reform Fact Book prepared by the Democratic Study Group in the House of Representatives. The sections that I shall discuss today deal with the area of estate and gift taxation and the tax treatment of private foundations and other exempt organizations.

On September 25 former Assistant Secretary of the Treasury Stanley S. Surrey testified before the Committee on Finance and made this comment about the need for reform in the area of estate and gift taxation:

We should recognize that the most serious aspect of our present capital gains policy is the permanent escape from tax of appreciation in assets transferred at death. Correction of this defect remains a matter of top priority. The House Committee report states that reform measures relating to revision of the estate and gift tax laws and the related problem of the tax treatment of property passing at death will be studied as soon as possible, with a bill to be reported in this Congress. The accomplishment of this objective will move us considerably further along the road of meaningful tax reform.

The administration has continued to refrain from making any recommendations in this area. I would hope that the public will have the benefit of the administration's proposals for meaningful reform in advance of the hearings that the House Ways and Means Committee has pledged to hold in order to revise the estate and gift tax laws during this Congress. I make this request now because, unfortunately, the administration did not make public the specifics of its latest pronouncements in other areas of tax reform until September 30, just 3 days before the Committee on Finance closed its hearing record. For this reason, I now have the uneasy feeling that the administration has chosen to assume the role of defense counsel rather than prosecute the case against the inequities in our present tax laws.

Mr. President, I ask unanimous consent that the section of the Tax Reform Fact Book which discusses the area of estate and gift taxation be printed at this point in the RECORD. This book was first published by the Democratic Study Group in the House of Representatives last July and has since been updated at my request to reflect final House action in many important areas of consideration.

There being no objection, the section of the book was ordered to be printed in the RECORD, as follows:

DEMOCRATIC STUDY GROUP TAX REFORM FACT BOOK SECTION FOUR—GIFT AND ESTATE TAXES

INCREASE GIFT TAX RATE TO LEVEL OF ESTATE TAXES

The problem

Estate and gift taxes, imposed as separate taxes and at different rates, have not been thoroughly examined or revised by Congress since 1942. They raise about $3.1 billion a year.

This dual rate structure permits sizeable differences in tax liability of estates of equal size. Those who can afford lifetime gifts enjoy a double benefit: the transfer qualifies for the lower gift tax rates (including liberal exemptions) and the estate remaining at death is subject to a different and lower beginning set of progressive rates.

Treasury studies show the advantages of lifetime giving over bequests at death are more valuable the greater the amount involved. By splitting $1 million in property between lifetime gifts and bequests at death, the heirs will receive about 15% more than if the property were passed entirely in the estate at death. But splitting property worth $5 million between lifetime gifts and bequests at death will increase the amount available to the heirs as much as 37%.

Present law

Present law provides separate progressive rate schedules (gifts taxed at graduated rates roughly 75% of estate tax rates) with $30,000 in exemptions for each.

Pending proposals

Several bills dealing with gift and estate tax rate changes were introduced in the House. H.R. 5250 (Reuss and others) would increase the gift tax rates to those of estate

taxes. Identical or similar measures are H.R. 229, 1039, 1119, 3655, 5196, 6206, 6233, 6761, 6769, 6770, 6791, 7040, 7045, 7346, 7585, 7880, 8144, 9195, 9759, 9852, 10041, and 10253.

Revenue impact

Treasury estimates raising the gift tax rate to the level of estate taxes with a $60,000 exemption and a single graduated rate schedule applying to transfers both during life and on death would yield $150 million a year.

Proponents and opponents

Most of the testimony on gift and estate taxes dealt with generation skipping, multiple trusts and similar areas. The American Bankers Association is on record in opposition to any changes in the relationship between gift and estate taxes. The National Association of Manufacturers urged repeal of both taxes.

Administration action

The Treasury on December 11, 1968, recommended to the Committee that it unify estate and gift taxes into a single-transfer tax with these provisions: (1) that lifetime gifts and transfers at death be added together to determine the total wealth subject to transfer taxation; (2) that a single exemption and a single and somewhat lower rate schedule be made applicable to the total; (3) that the base of the gift tax be grossed up to include the amount of tax, parallel to the treatment of estate taxes, and (4) that appropriate rules be provided to accomplish an orderly and equitable transition to the new system.

The Treasury proposal also called for an unlimited marital deduction which would have the effect of raising to 100% the current 50% limit on the amount of tax-free property that could pass between spouses at death or by gift.

The Nixon Administration, in making its recommendations in April, did not include this plan in its reform proposals. Its only suggestion in this general area was a plan to tighten taxation of income accumulated trusts.

House action

None.

ELIMINATE PAYMENT OF ESTATE TAXES BY REDEMPTION OF GOVERNMENT BONDS AT PAR

The problem

Certain designated Treasury bonds, called "flower bonds" by securities dealers and estate planners, are giving wealthy taxpayers a substantial break in payment of estate taxes. These long-term government issues normally sell at a sharp discount ($700 or so on a $1,000 face value bond), carry interest rates as low as 3%, and can be bought on short notice. They come in denominations of $500 to $1 million. Buying them at the right time has the effect of substantially increasing the value of an estate.

If a $1,000 bond carrying the redemption privilege has a coupon rate of 3% and sells at around $720 to yield about 4.2%, for example, the Treasury must redeem it at face value if it is offered in payment of estate taxes. The effect is the same as selling the security for $1,000 and realizing a 28-point tax-free profit.

Present law

If an estate owns securities which carry tax payment privileges, and if such securities were held by an individual at the time of his death (or, in the case of certain securities, for at least six months prior to his death), the securities may be redeemed in payment of federal estate taxes, even though they have not yet matured. Treasury must redeem them at par.

Pending proposals

Bills to eliminate the redemption privilege have been introduced in the House by several Members. H.R. 5250 (Reuss and others) would amend the Liberty Bond Act to make that change. Identical or similar measures are H.R. 229, 1039, 1119, 1379, 2142, 3655, 5196, 6206, 6233, 6721, 6769, 6770, 6791, 7040, 7045, 7346, 7585, 7980, 8144, 9195, 9759, 9852, 10042, and 10253.

Revenue impact

It is estimated that repealing this provision would increase federal revenue about $50 million a year.

Proponents and opponents

Most of the testimony on estate taxes dealt with other areas of possible change.

Administration action

The Treasury, in its December recommendations, called for repeal of the bond redemption privilege. The Nixon Administration, in recommending tax changes to Congress in April, did not include this provision.

House action

None.

Mr. METCALF. Mr. President, the next section of the book which I shall discuss covers the tax treatment of private foundations and other tax-exempt organizations. The Committee on Finance has set aside October 27 and 28 for executive sessions in this area. In the meantime, the committee has reopened its hearings for 1 day, and today happens to be that day, to hear the testimony of Peter G. Peterson, chairman of the board of Bell & Howell Corp., on the subject of private foundations. Mr. Peterson will serve as the representative of a group of private citizens who have conducted their own study into the subject of private foundations.

On October 13 the Committee on Finance agreed that in the case of gifts of capital gain property to private foundations, the House rule for taking the appreciation into account would be modified. As modified by the Finance Committee, the donor would be allowed a charitable deduction equal to his cost or other basis for the property, plus one-half of the appreciation. The House provision required either deducting only the cost of the property or retroactively deducting the value of the property by including the appreciation in income. According to the committee, its modification would achieve substantially the same net effect as if the donor had included the appreciation in income and claimed a charitable deduction for the fair market value of the property.

In 1968 there were 22,000 private foundations, according to the Foundation Center Annual Report. Collectively, their total assets were in excess of $20 billion—part 1, Hearings before the Senate Finance Committee on the Tax Reform Act of 1969, page 709.

The permissible activities of private foundations desiring to preserve the benefits of tax exemption, as well as the tax benefits to their contributors, are substantially tightened under the House version of the bill to prevent self-dealing between the foundations and their substantial contributors, to require the distribution of income for charitable purposes, to limit their holdings of private businesses, to give assurance that their activities are restricted as provided by the exemption provisions of the tax laws, and to be sure that investments of these organizations are not jeopardized by financial speculation. In addition, the House bill would impose a 7½-percent tax on the investment income of private foundations.

Generally, the House bill would limit the activities of exempt organizations so that they cannot participate in debt-financed leaseback operations, wherein they, in effect, share their exemption with private businesses. The bill also would provide for the extension of the unrelated business income tax to virtually all tax-exempt organizations not previously covered by this tax, including churches. The bill would also extend the regular corporate tax to the investment income of tax exempt organizations set up primarily for the benefit of their members, such as social clubs, fraternal beneficiary societies, and employees' beneficiary associations.

Mr. President, I ask unanimous consent that the section of the Tax Reform Fact Book which discusses in detail many of the provisions I have just listed be printed in the RECORD.

There being no objection, section 5 was ordered to be printed in the RECORD, as follows:

DEMOCRATIC STUDY GROUP TAX REFORM FACT BOOK SECTION FIVE—TAX EXEMPT ORGANIZATIONS

EXTEND UNRELATED BUSINESS INCOME TAX TO ALL EXEMPT ORGANIZATIONS

The problem

Prior to 1950, a growing number of non-profit organizations operated businesses unrelated to their tax-exempt purposes. Profits were tax free, giving these organizations a substantial competitive advantage over tax-paying businesses. Congress responded by imposing an income tax on profits of all unrelated business activities of most non-profit organizations.

All unrelated business activity was not curbed, however, because a sizable list of non-profit organizations were exempted. Business spokesmen have continued to protest this tax-free competition. Treasury recently responded with a rule dealing with one complaint area. This controversial change extended the tax to advertising in magazines and other publications of all non-profit organizations.

Present law

The unrelated business income tax is imposed at corporate tax rates on all non-profit organizations (charitable, labor, educational, scientific, etc.) with these exceptions: churches; social welfare organizations; social clubs; fraternal beneficiary societies; voluntary employee beneficiary associations; teachers' retirement funds; certain benevolent life insurance companies; mutual or non-profit cemetery companies; credit unions; certain small mutual insurance companies; and certain crop financing corporations.

Pending proposals

Only two bills dealing directly with unrelated income of non-profit organizations have been introduced in the House this session, H.R. 2057 (Battin) would ease Treasury's ruling on taxation of advertising profits. H.R. 8802 (Morton and others) deals with taxation of public entertainment proceeds at state fairs.

Revenue impact

Treasury reports that the revenue impact of proposed changes in the unrelated business income tax can not be accurately estimated.

Proponents and opponents

The Conference of Non-Profit Organizations heads a long list of opponents. The National Tax Equity Association and the U.S. Chamber of Commerce are among business-oriented groups supporting extension of the unrelated business income tax to all tax-exempt organizations.

AMA, National Geographic Society, American Chemical Society, and several other substantial organizations took strong positions at the Committee hearings against Treasury's ruling on taxation of advertising profits. Backing the ruling were McGraw-Hill Publications, American Business Press, and a number of other publishers.

Administration action

The Nixon Administration asked that the unrelated business income tax be extended to churches and other tax-exempt organizations not currently covered. The investment income of social clubs and certain similar organizations, now untaxed, also would be taxed.

Also recommended was a law requiring that all tax-exempt organizations be taxed on the income of any investment assets which were acquired with borrowed funds and unrelated to their tax-exempt functions.

House action

The House bill would (1) extend the unrelated business income tax to churches, social welfare clubs, civic leagues, social clubs, and fraternal beneficial association; (2) continue to exempt from the tax the income from business related to an organization's exempt function such as an insurance business run by a fraternal beneficial association for its members; (3) impose a tax on investment income of social clubs and fraternal beneficial associations, and (4) delay extension of the tax to unrelated income of churches to give them time to dispose of unrelated businesses or spin them off in separate taxable corporations.

Ways and Means Hearings, Volumes 2, 3 and 4; Treasury Studies, Part 3.

REQUIRE FOUNDATIONS TO SPEND THEIR INCOMES WITHIN ONE YEAR OF RECEIPT

The problem

A recent Treasury study shows that some private non-operating foundations (those set up to contribute to charity) accumulate assets rather than dispensing funds. Contributions and earnings are invested and little or none goes to charity. These organizations are required to meet only limited and poorly-defined requirements for asset and income distribution.

An analysis of records of 596 of the nation's largest foundations showed they had 1966 gross income of about $1.1 billion. Yet they ended that same year with $1.9 billion in unspent income. Total assets of this same group grew from $10.2 billion in 1960 to $15.1 billion in 1966. These reports led critics to question the charitable deduction for foundation donors and the tax-exempt status of foundations.

Present law

Non-operating foundations are prohibited from (1) accumulating income "unreasonably", (2) accumulating income to a substantial degree for purposes other than those on which their tax-exempt status is based, and (3) investing accumulated income in ways that would undermine their tax-exempt purpose. The restrictions are considered vague and difficult to administer.

Pending proposals

The main bill to correct abuses in private foundations is H.R. 7053 (Patman), which would require net income of every privately-controlled, tax-exempt foundation to be disbursed annually for purposes for which the foundation was organized. Similar or identical measures are H.R. 19030, 11087, 11221, 17710, 10237, 11017, 7053, 8367, 9162, and 10302.

Revenue impact

Neither loss nor gain of revenue is expected in placing a limitation on distribution of income.

Proponents and opponents

The AFL–CIO headed a list of organizations calling for this change. Foundation spokesmen urged care in drafting more restrictive rules. It was pointed out, for example, that foundations should not be forced to distribute large amounts of unexpected income on short notice.

Administration action

The Nixon Administration has proposed requiring non-operating foundations to distribute to charity an amount equal to 5% of the value of their investment assets or all of their net income (exclusive of long-term capital gains), whichever is greater, within a year after the year in which the income is earned.

Less restrictive rules would apply to foundations accumulating income for a specific charitable purpose and those that in past years had spent more than 5% of their investment assets or more than their annual income. A penalty of up to 25% of the legally-required distribution would be imposed for failure to comply.

House action

The House-passed bill is substantially the same as the Administration proposal.

Resource references

Ways and Means Hearings, Volumes 2, 3 and 4; Treasury Studies, Part 3.

PROHIBIT FOUNDATION "SELF DEALING"

The problem

Private individuals who are donors, founders, officers, directors, or trustees of foundations are in a position to receive special financial benefits through transactions with the foundation.

Present law

Present law permits such transactions provided they do not jeopardize the foundation's tax-exempt function. Revocation of tax-exempt status is the only penalty provided for violations.

Pending proposals

The major tax reform bills introduced this session do not deal with this problem.

Revenue impact

No apparent impact.

Proponents and opponents

The AFL–CIO is one of several groups that have recommemded a prohibition on "self dealing."

Administration action

The Nixon Administration proposal would prohibit a private foundation from entering into a business transaction with donors and certain other related persons, regardless of the arms-length nature of the transaction. Certain exceptions would be permitted for "essential" transactions such as reasonable compensation for personal services.

House action

The House bill would prohibit loans, sales and similar self dealing transactions between donors or principals and foundations. Penalties would be strengthened to authorize fines for violations.

Resource references

See Ways and Means hearings, Volumes 1, 2 and 3; Treasury Studies, Part 3.

PROHIBIT FOUNDATIONS FROM OWNING 20% OR MORE OF ANY UNRELATED BUSINESS

The problem

At present foundations may own controlling interests in corporations. This gives donors an opportunity to gain a tax advantage by contributing a substantial block of stock to a foundation and receiving a tax deduction while retaining control of the corporation. This puts foundations in the business of managing corporations, gives them an opportunity to assist businesses they control in ways not available to taxpaying competitors, and permits them to influence legislation by acting through these businesses.

Present law

Present law contains certain restrictions on direct operation by a foundation of a trade or business unrelated to its charitable function. For example, a foundation may generally not be organized for the specific purpose of conducting an unrelated trade or business, and income related to the regular conduct of a foundation-run business is not taxable under the unrelated business income tax. However, there are no restrictions on conducting an unrelated trade or business through ownership of a controlling interest in a separate corporate entity.

Revenue impact

No apparent impact.

Proponents and opponents

There was no direct testimony opposing limitation of a foundation's interest in unrelated businesses. The National Tax Equality Association and the U.S. Chamber of Commerce and many other business-oriented groups have consistently supported limitations on unrelated business activities of tax-exempt organizations.

Administration action

The Treasury studies recommended prohibiting foundations from owning 20% or more of the total combined voting power or 20% or more of the total equity in an unrelated business.

The Administration proposal would permit foundations to receive and hold controlling interest in an unrelated business for five years, then reduce its holdings to under 35% of the total combined voting power of the corporation. A stock interest between 20% and 35% of the combined voting power would have to be divested only if the foundation actually exercised control. Foundations would also be required to relinquish within five years any interest in a business controlled by the donor or certain related persons.

House action

The House bill would limit to 20% (with certain exceptions) the combined ownership of voting stock of a corporation held by a foundation and any substantial donor and persons related to him.

ARMOUR OPENING NOTED

Mr. SCOTT. Mr. President, tomorrow, Armour & Co. officially opens in my Commonwealth of Pennsylvania one of the world's largest food processing complexes. This new food processing and distribution facility, located at Chartiers Valley Industrial Park in the Greater Pittsburgh area, is modern to the minute in processing and quality control methods and equipment. Encompassing 4 acres under roof, the complex houses 9 miles of piping, 125 miles of electrical wiring, generates enough heat to warm 670 homes and enough refrigeration to cool all the homes in a town of 5,000 people. From it, over 400 food items will move to supermarkets, hotels, and restaurants in Pennsylvania, New York, Ohio, and West Virginia.

I am pleased to make note of this opening and the special contribution made by Armour & Co. to the Commonwealth's economy. Today, Armour employs 4,000 Pennsylvanians in 19 Pennsylvania communities. The company's position of leadership is indeed enhanced by the opening of this new facility.

On the occasion of this dedication, I extend my sincerest congratulations to Armour's president, Mr. Charles R. Orem, and to all of those in Pennsylvania who have helped make this vision a reality.

SENATOR RANDOLPH SUPPORTS DIRECT ELECTION OF PRESIDENT

Mr. RANDOLPH. Mr. President, the United States is populated by an active, resourceful people on the move. Our country had a humble beginning, but it possessed two important resources to insure progression—our people and our land. From these was fashioned a unique system of government—"of the people, by the people, and for the people." Today we are a world power. Decisions made in Washington do not touch alone the lives of U.S. citizens but also have a direct bearing on other nations of the world. Our President is the head of the Government of the United States of America and, too, he is a world leader.

The proposal to amend our Constitution to achieve electoral reform is one of the most critical issues before the 91st Congress. Our Nation has been depending on an antiquated, imperfect system which would cause extreme controversy if no candidate for President received a majority in the electoral college, or if a candidate received a majority in the electoral college, but not a plurality of the popular vote. These possibilities came close to reality in last year's general election. Our procedure for selecting the President must be refined to insure that the will of the citizens of the whole of the United States is no way abridged. The Presidency of the United States must not be left to the uncertainties inherent in the electoral college system.

Mr. President, it is gratifying to see the progress being made toward reform of our system of electing the highest official in our land. The House of Representatives has endorsed and sent to the Senate a proposed constitutional amendment to abolish the electoral college and provide for the direct election of the President and Vice President. I am privileged to cosponsor a similar amendment in the Senate.

It is my belief that the best method of selecting the President is by direct popular election. It is all the people of the United States whom our Chief Executive represents—not geographical areas of the country.

In the election of the President of the United States, one individual vote should not have any more weight than another. Our political system should not favor any class or classes of voters—rural or urban, rich or poor, black or white, liberal or conservative, or those from North or South, East or West. The direct popular election of the President would insure equality of every vote with every other vote.

Electoral reform is not a new proposal developed in response to the questions raised in last year's election. Nor is it the first congressional activity to change our present system of electing the President and Vice President. Hearings were held by the Senate Committee on the Judiciary in the 1950's and were begun anew in 1961, and the proposal currently before our Committee on the Judiciary is the culmination of efforts begun in 1965. The proposed amendment approved by the House would require approval by two-thirds, 67, of the Senate and subsequently by three-fourths, 38, of the States to be effective.

Mr. President, I am hopeful that the Senate will approve the proposal for direct election of the President at an early date. This endeavor has my earnest and active support.

MEDICAL LIBRARY AND HEALTH COMMUNICATIONS ASSISTANCE AMENDMENTS OF 1969

Mr. MURPHY. Mr. President, as a supporter of the Medical Library and Health Communications Assistance Amendments of 1969, I want to say a few words about the measure.

As a member of the Committee on Labor and Public Welfare's Subcommittee on Health, I had the pleasure of working on and supporting the Medical Library Assistance Act of 1965, which this measure would extend and expand.

In the words of the committee's report:

> H.R. 11702 would extend for 3 years the current program to provide financial assistance for the construction of health library facilities; to support training to health librarians and other information specialists; to expand and improve health library services through the provision of grants for library resources; to support projects of research and development in the field of health communications, and related special scientific projects; to support the development of a national system of regional medical libraries; and to support selected biomedical scientific publications projects. This bill would increase the total authorization for funding for these programs from the current $21 million per year to $25 million in fiscal year 1971, $30 million in fiscal year 1972, and $35 million in fiscal year 1973. In addition, certain technical and clarifying amendments are proposed.

Since its enactment, the Medical Library Assistance Act has enabled the National Library of Medicine to initiate coordinated programs for health libraries and health information service and activities. One of the concerns that motivated the Congress to enact the 1965 act was the shortage of health information facilities and manpower. The Congress felt this was a weak link in the nationwide effort to provide improved health care. Thus, the 1965 act's ultimate purpose was to bring about improved health care by strengthening the information facilities that serve the men and women of the health profession.

The Medical Library Assistance Act, has contributed greatly to the health resources of California. As administered by the National Library of Medicine, the act has provided grants totaling more than $3,551,592 to California institutions—including grants for research, training, special scientific projects, publications, establishment of a regional medical library, and resource grants to 33 health libraries. Examples include a research project contract to UC at San Diego for the development of a neurosciences study program; a large resource grant to UC, San Francisco Medical Center, for acquiring medical library materials; and a regional medical library grant to UCLA.

This last example has important implications for all of the biomedical libraries within California, as well as California's 110,000 doctors, dentists, pharmacists, and nurses. This award made UCLA the Pacific Southwest Regional Medical Library for California, Arizona, Nevada, and Hawaii. It thus provides a central library resource within this four-State area, allowing all of the region's resources and services to be shared efficiently. And although UCLA is able to handle the vast majority of requests for interlibrary loans and reference services, its closer linkage with the center of the network, the National Library of Medicine, will certainly increase its effectiveness.

I have been particularly impressed with the way in which UCLA's computer facilities are being used to provide specific lists of references to health professionals who request them. Over 1,400 such bibliographies were sent out to physicians, researchers, and medical students last year—giving them specific guidance to published literature in their area of research.

It is clear that active biomedical information programs such as the ones cited above must receive continued legislative and financial support if we are to continue to exert leadership in the field of health care. During this session of the 91st Congress, I have helped to draft and enthusiastically support the Medical Library Extension Act of 1969, which will enable the National Library of Medicine to continue its medical library programs, which benefit not only the people of California but the people of the country, as well.

DECLINE OF THE NATION'S TEXTILE INDUSTRY

Mr. TALMADGE. Mr. President, evidence continues to mount to attest to serious damage being inflicted upon the Nation's textile industry because of the influx of imported goods.

This represents more than just the decline of this important segment of the U.S. economy. We have taking place the deterioration of an industry that is the largest employer in many States, my own State of Georgia included. The fact is that one in nine industrial workers is employed in the textile and apparel industry.

What excessive imports mean to American textiles is a decline in profits, and this in turn results in loss of jobs and incomes to many people.

This is a situation that our Government cannot long tolerate. We need meaningful import controls. We would

hope that they can be voluntary. But it is my strong feeling that unless effective controls are agreed to soon, then there will be no other alternative in my judgment but for the Congress to act.

Mr. President, I ask unanimous consent to have printed in the RECORD two newspaper articles, one from the Georgia Business News of October 13, and an Associated Press article published in the Waycross, Ga., Journal-Herald, that cites facts and figures about this growing problem.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Georgia Business News, Oct. 13, 1969]

CHEAP LABOR IMPORTS CUT INTO DOMESTIC TEXTILE SALES, PROFITS

(By Curtis Collins)

The plight of the textile industry—Georgia's number one employer—due to foreign imports was underscored last week by two of the state's biggest mills as they reported lower earning and income.

Macon-based Bibb Manufacturing Co. reported an unaudited net loss of $2.2 million for its fiscal year ending Aug. 31, compared to $1.5 million net income for the previous fiscal year.

Bibb President Robert Train said the high level of textile imports had contributed to depressed conditions in several segments of the company's business. Also noted were the drain on profits by some of the newer operations and year-end inventory write-downs exceeded earlier estimates.

Bibb said net sales for the past fiscal year were $121.8 million, compared to $129.6 million for fiscal year 1968.

"The results for the year were a severe disappointment to all of us," Train said. "We are determined that the coming year will show substantial improvement."

West Point Pepperell reported a $2.7 million drop in net income despite a $25.2 million increase in sales for the 12 months ending Aug. 30.

J. L. Lanier, chairman and chief executive officer, said sales totaled $372.2 million for the 12 months, but included sales of $28.2 million from Alamac Knitting Mills and American Rug and Carpet Co., both purchased during the fiscal year.

Net income for the year was $12 million, or $2.55 per share, a decline of 18 per cent from 1968.

"The profit result for the year was disappointing," Lanier said. "Sales volume was good considering the state of our markets but sales prices were under pressure and, in many of our product lines, lower than last year.

"Because of the generally weak market situation, added to by the continued increase in the quality of textiles from low-wage countries, we have been unable to pass on cost increases attendant to the inflationary conditions in the country."

West Point Pepperell directors on Sept. 23 declared a dividend of 35 cents a share (payable Nov. 15), a 35-cent reduction from the former level of 50 cents a share. The new dividend is payable to stockholders of record Oct. 24.

Meanwhile, a spokesman for the industry told the Alabama Textile Manufacturers Association the industry has been criticized unfairly for seeking relief from increasing foreign imports.

The textile industry wants nothing more than "limitations which will give foreign countries a reasonable share in our market and, very importantly, a share in the growth of our market, but which will also keep imports from taking all of our market or all of the growth in our market," said Robert W. Armstrong, director of public relations for the American Textile Manufacturers Institute, Charlotte.

[From the Waycross (Ga.) Journal-Herald, Oct. 13, 1969]

NATION'S TEXTILE INDUSTRY CAUGHT IN FINANCIAL TIGHT

(By Jack Stillman)

ATLANTA, GA.—While most businesses bask in a warm glow of prosperity, the nation's textile industry is caught in a profit squeeze that is looking more and more like a stranglehold.

Although economic forecasts vary, all reflect gains in the marketplace.

But the textile industry is seeing its domestic market become inundated by foreign imports, manufactured for less and sold at higher profits abroad.

Textile men and congressmen from textile states say the only salvation is voluntary controls controls in agreements between foreign and domestic industry—or Congress is going to have to act.

The climate is becoming more favorable for federal controls over textile imports.

The seriousness of the economy within the industry is reflected in financial statements.

West Point-Pepperel, Inc., ended its fiscal year with profits down 18 per cent from last year.

Bibb Manufacturing Co. ended its fiscal year with a loss of $2.2 million.

Burlington Industries, the giant of the industry with 130 plants and 83,000 employees, reports net earnings per share at $2.32 through nine months of this fiscal year, compared with $2.34 for the same period last year.

But Burlington's profits held primarily because of diversification. The corporation makes thousands of different products. It also has acquired two furniture companies.

Textile men have called for controls of imports for years, and many of them feel that the next session of Congress is going to provide them.

Secretary of Commerce Maurice Stans toured Europe and Japan recently to discuss the possibility of agreements on controls of imports. But he made little, if any, progress.

There is a strong sentiment in both houses of Congress to enact legislation to provide some kind of restraint on imports.

Rep. Wilbur Mills, D-Ark., chairman of the House Ways and Means Committee, declared on the House floor that if the industry doesn't arrive at voluntary agreements, Congress will have to act.

"The pressures for unilateral action for textile import relief are stronger than ever in the Congess and throughout the country," he declared.

Sen. Herman Talmadge, D-Ga., has argued strenuously for some kind of controls over imports.

"The United States has long been recognized as the greatest manufacturing nation in the world," he declared. "But this position of industrial leadership is being eroded by outmoded trade policies which are turning us into a nation which exports raw materials in exchange for imported cheap labor.

"Recent U.S.-Japan trade figures from the Department of Commerce dramatize this resources-for-labor swap. In 1968, we imported from Japan some $4.1 billion (b) worth of various products. At the same time, we sold $2.9 billion (b) worth of goods in Japan. This is a serious deficit."

In the present economy, the Japanese can import cotton from the United States, manufacture it and sell it back to this country cheaper than American companies can market similar products.

Some of the industry's problems are traced to Public Law 480, which provides that the United States can sell certain agricultural products to foreign countries, such as cotton, but that the money for these products cannot be brought back into this country. It has to be spent in that country.

This money usually is spent through the military or embassy services. Textile men argue that this does nothing to improve this country's balance of payments.

There are nearly one million persons employed in textile manufacturing in this country, approximately half of them in the South.

The Japanese can undersell the American producers by about 1.5 cents or 2 cents a pound and the American industry figures at the present rate, Japan will have about 25 percent of the textile market in this country within ten years.

About 10 years ago, the General Agreement on Tariff and Trade (GATT) was set up in Geneva. This covers only cotton textiles.

Under this agreement, the United States can execute bilateral agreements with signatory nations, and at present about 30 such nations are involved.

Fate of this agreement is being decided in negotiations now. The present agreement expires in October 1970, unless a new pact is reached a year in advance.

The private agreements through GATT provide limitations on the amount of cotton textiles that can be brought in by category. It also provides for a gradual increase each year in the amount that each nation can send into this country.

Now, the textile industry as well as President Nixon has approved the idea of a similar agreement covering synthetic fiber textiles and wool.

The industry argues that with few exceptions, foreign textiles sell in this country only because they are produced at extremely low wages abroad.

Many industry spokesmen hope that foreign industry will negotiate with American industry, rather than run the risk of controls being imposed by Congress.

They feel that foreign businesses, especially Japanese, would rather talk turkey with U.S. businessmen than run the risk of killing the goose that is laying the golden egg.

REPRESENTATIVE FINDLEY'S PROPOSALS ON NATO

Mr. PERCY. Mr. President, I have just returned today from meetings of the NATO North Atlantic Assembly in Brussels. The Assembly is the parliamentary arm of NATO and annually brings together legislators from the countries of the NATO alliance.

On the trip were also two colleagues from Illinois, the House minority whip, Representative LESLIE ARENDS, and Representative PAUL FINDLEY, as well as other Representatives and Senators. Representative ARENDS contributed greatly to the discussions at the Assembly as did Representative FINDLEY.

Representative FINDLEY made a proposal at the meetings which generated a great deal of interest. He pointed out that NATO seems threatened with various countries considering reductions in their troop commitments to NATO. He considers it far better to have a more modest integrated force whose continuity is assured rather than a larger force whose component parts could be pulled out at any time. He therefore proposed a formal new agreement within NATO to assure continuity and permanence in the alliance.

He urged that at least a 5-year agreement be made, preferably 10 years, which would include the following specific items: First, definite force units would be assigned and committed by each nation, including, where appropriate, nuclear forces. These forces could only be reduced by consent of the North Atlantic Council.

Second, definite agreed-upon financial arrangements for fulfilling these commitments including agreement on a formula through which all costs of common defense will be shared.

Third, agreement on the circumstances in which forces—including nuclear weapons—will be utilized, setting forth plans for all contingencies.

Although this plan would not alter the basic NATO Treaty it would spell out the terms of membership in the integrated command and restate convincingly the American nuclear commitment to the treaty. Congressman FINDLEY feels it would help to restore confidence, stability and strength to the alliance which it sorely needs at the moment.

Mr. President, so that the rest of the Members of Congress can see Representative FINDLEY's proposals in detail, I ask unanimous consent to have printed in the RECORD his speech of October 20, 1969, before the Assembly.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

Mr. FINDLEY (*United States*): At each of the last three plenary sessions I have had the privilege of speaking to the group and I have done so by sounding alarm and a note of urgency. Today is no exception. There are some promising signs in NATO, but at the same time in very important respects NATO is in serious trouble.

The immediate danger I see is not so much from external assault as from internal bleeding. The question which must be faced is how to stop the hemorrhage before it becomes fatal. Even though we have given our attention to many excellent ideas in the course of committee hearings and debate here, I question whether we have really squarely confronted the problem of how to stop this hemorrhage before it becomes fatal.

In the past three years France, the United States and the United Kingdom have each made substantial withdrawals from the integrated command. As has been well noted, Canada has just made substantial reduction. On the September tour of NATO military bases, I heard disturbing forecasts from private but very reliable sources that further cutbacks may be made by Belgium, Holland and Germany. Needless to say, the United States commitment is no longer what it once was. Empty barracks reserved for dual-based ground forces creates concern rather than confidence.

The report of Senator Cooper of the United States reflects accurately the strength of public demand in our country for further troop reduction. Senator Mansfield's statement reported this morning is a reflection of his early comments on the growing tide of opinion in our country. While President Nixon has plainly expressed his determination that U.S. forces in Europe will not be reduced for the time being he cannot deliver indefinitely more than public opinion will sustain.

If other nations follow Canada and those others I have mentioned, including the United States, in cutting back, these actions will inevitably trigger louder and more numerous American cries for fewer troops in Europe. Once started the flow of force reduction builds its own deadly momentum and one haemorrhage begets another. The question is, will it be halted before NATO's integrated structure bleeds to death? The peril lies not so much in a lack of quality and quantity of force commitments—important as these are—but rather in the uncertainty as to what will exist tomorrow and the day after that.

A modest integrated force whose continuity is assured is far better than a larger one whose elements may unexpectedly be pulled out next week or next year. It is better from the standpoint of alliance cohesion and mutual confidence. It is also better in terms of deterrent effect. The present atmosphere in which member nations no longer give primacy and permanence to their obligations to NATO but feel free to make sudden unilateral changes is bound to encourage the Soviets in the ancient game of divide and conquer. The Soviets would be far more impressed by, say, 10 or 15 divisions firmly committed to integrated command for ten years or even 5 years than by twice that number of divisions brought together only on a year to year basis.

Related to this debilitating trend is the question of nuclear defence for Western Europe. European concern is accurately reflected in the proposals just made by Dr. Erik Blumenfeld of Germany. Many Europeans realise that nuclear weapons are crucial to their security. They also recognise the weakness of relying for this most essential form of defence upon a decision by the head of a non-European Government. They naturally must do all possible to reduce to the absolute minimum any uncertainty as to whether nuclear weapons will be used to defend European homes. Without certainty as to the use of nuclear weapons in a crisis conventional arms have little importance in the modern world.

European concern about nuclear defence is in my view thoroughly understandable and justified. Here are some of the factors which contribute to this concern. First, the obvious rise in nuclear power of the Soviet Union which enables Moscow to retaliate against the United States with devastating force should the U.S. employ nuclear weapons to defend Europe. Secondly, the implementation in Czechoslavakia of the Brezhnev doctrine. This stripped away the facade of a mellowing Moscow that would no longer use naked force across national borders to extend its authority. Third, the introduction of flexible response as a NATO doctrine. This left somewhat vague the circumstances in which nuclear defensive action might occur.

Fourth and most important of all, developments in Vietnam. The United States has ruled out a military solution in Vietnam. The withdrawal of troops from Vietnam has begun. These decisions I applaud as essential, but American public pressure for an early and complete withdrawal of ground combat forces is quite plainly gathering strength throughout our country. If, as I predict, this disengagement proceeds it will develop with it a powerful demand for pull back elsewhere, including Europe. The American people will likely seek scapegoats to blame for the traumatic experience they will have as a result of this withdrawal. Inevitably many of them will demand that our troops come home from Europe as well as Vietnam, using the superficial, but nonetheless appealing, argument that our NATO allies provided no troops to help us in our time of trial in South East Asia.

I therefore conclude with the thoughts of Mr. Blumenfeld in proposing a European defence unit based on European nuclear weapons which speaks in a practical and constructive way to a vital and urgent problem. I present a suggestion which I feel will help us to tide over the very difficult period which lies immediately ahead. I urge that the NATO Council should make for a minimum period of 10 years—at the very least five years—a formal new agreement in which is specified the following items:

1. Forces to be assigned and committed by each nation, including where appropriate, nuclear forces. These forces under my proposal could be reduced only by the consent of the Council, for example, in the event that a force reduction in fact acceptable to the Council is negotiated with the Warsaw Pact.

2. Financial arrangements for fulfilling these commitments including agreement on a formula through which all costs of common defence will be shared. This could be similar to the present cost-sharing formula on infrastructure.

3. The circumstances in which forces—including nuclear forces—will be utilized, setting forth plans for all contingencies.

Would this ten years commitment regarding the integrated command structure require a change in the basic treaty which now permits any member to withdraw on one year's notice? My answer is that it would not. Any member State signing the five-year or ten-year commitment would still retain the option to withdraw completely from the Alliance thus terminating its ten-year commitment regarding the integrated command structure along with all advantages derived from being a signatory to the Alliance Treaty. But is such an act of withdrawal likely? In my view it is most unlikely that during the next 10 years any member state will sever itself completely from the all-for-one and one-for-all defence benefits of the Alliance. Although it would not alter the basic treaty it would spell out the terms of membership in the integrated command and restate convincingly the American nuclear commitment to the Treaty.

Because it would spell out clearly and specify a continuing obligation of each member, it would, I believe, be the type of agreement which we could sell to the American Congress and which I feel the other delegations could sell to their own Parliaments. It would go far to restoring confidence, stability and strength to the Alliance. It would prevent intermittent disputes over cost sharing and overcome the present tendency of Member States to make unilateral reduction of forces.

NATIONAL BUSINESS WOMEN'S WEEK

Mr. BYRD of Virginia. Mr. President, this week, October 19 through October 25, the 3,800 Business and Professional Women's Clubs of the country are observing National Business Women's Week.

Early this month, I had the pleasure of addressing the Business and Professional Women's Club of Arlington, Va. The occasion reminded me how alert to public issues our business women are, and what an enormous contribution they make to the life of their communities.

The progress of working women during the past half century has been remarkable. Career women—many of whom carry out the duties of wives and mothers while pursuing their careers—are a tremendous "plus" in the American economy.

I take this occasion to salute American business and professional women, and the fine work of their organizations throughout the country.

PRESERVATION OF THE TULE ELK

Mr. CRANSTON. Mr. President, last week I introduced S. 3028, which would authorize a feasibility study of the de-

sirability of establishing a national wildlife refuge in California and/or adjacent Western States for the preservation of the Tule elk.

At that time I said that range is the Tule elk's crucial problem. This morning's New York Times contains an article entitled "Killing of Rare Tule Elk in California Arouses a Dispute," written by Gladwin Hill.

The Times article clearly demonstrates the problems associated with our current Tule elk range policy with an excellent description of the controversy caused by the State authorized Tule elk hunt in the Owens Valley.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

KILLING OF RARE TULE ELK IN CALIFORNIA AROUSES A DISPUTE

(By Gladwin Hill)

OWENS VALLEY, CALIF.—"There's some elk!" The three hunters, armed with powerful rifles with telescopic sights had been plodding for 40 minutes over the treeless, lava-strewn foothills of the Sierra Nevada when a state fish and game inspector peered across a shallow draw to a slope 200 yards away where the animals grazed, camouflaged by sagebrush, in the dawn light.

The inspector quietly indicated which animal each hunter was to take.

In turn, Kenn Fawn, a young chemical engineer, Ross Miller, a 57-year-old contractor, and his son Donald, a high school teacher, crouched and fired.

Two cow elk and a buck lurched a few paces and toppled over, dead almost instantly.

PLEASED AT BAG

Five minutes later, the three men, all veteran deer hunters, were slitting open their kills to clean them, variously interested in the hide and meat, but generally just pleased to have gotten their first elk.

Superficially, the event—the first since 1964—was as routine as a deer hunt. But in fact it was a process that has evoked intense controversy among conservationists across the country.

The dead animals were three of approximately 400 of the only remaining specimens of the rare tule-elk species, a miniature variety standing about five feet and known only in California.

A century ago, big herds of them ranged the San Joaquin Valley on the other side of the Sierras, grazing on the bulrushes, or tule lands. They were almost exterminated by the Gold Rush pioneers and the farmers who followed.

The few survivors were transplanted over the last serves in Kern and Colusa Counties, most of them released over 600 square miles in the thinly populated Owens Valley on the east side of the Sierras, 250 miles north of Los Angeles.

There, no longer depleted by vanishing predators like mountain lions, and protected by felony laws from hunters, these elk have slowly multiplied.

Valley farmers complain about their depredations against alfalfa fields and their competition with grazing cattle in the sparsely vegetated foothills. Some experts contend that the capacity of the land is so limited that uncontrolled reproduction could lead to famine, disease and possible extinction of the herd.

After years of debate, the State Department of Fish and Game adopted in 1961 the policy that whenever its annual census showed more than 300 elk in the valley, they would be thinned to 250 by a closely supervised hunt.

Since 1961, there have been two thinning operations, eliminating 59 elk in 1962 and 50 in 1964. Eight thousand hunters entered a lottery for 80 killing permits this year. Winners pay $50 for a permit. The permits specify buck or cow.

PRESERVING THE ELK

The system is vehemently opposed by the Committee for the Preservation of the Tule Elk, a national organization with headquarters in Los Angeles claiming several thousand members in nearly every state.

Members call the thinning process barbaric, and oppose any herd reduction at all. They cite the international criterion that any species with less than 2,000 specimens is a vanishing one, subject to extinction from an epidemic or other unpredictables.

Cited in support of the thinning policy is a study sponsored by Resources for the Future, another national conservation organization. The study made by Dale McCullogh, a zoologist at the University of California, Berkeley, says that, under the system, the chance of the species becoming extinct is only 1 in 178,000.

Holders of the last nine permits of the season deployed at dawn last Saturday from the old airstrip at Manzanar, the site of a World War II Japanese-American internment camp.

STIFF EXAMINATIONS

Their papers were checked by the regional fish and game inspector; their rifles and ammunition examined to see that they met the requirement of 1,000 foot-pounds of force at 100 yards; every two or three were assigned a state game supervisor as a guide, and some were instructed to bring back their kills for official examination.

Mrs. Beula Edmiston of Los Angeles, the secretary of the Committee for the Preservation of the Tule Elk, watched the process and remained at the checkpoint all day until the hunters returned.

She and other members of the organization make it a habit to be on hand, although they have never been permitted to accompany the hunters. They converse politely with Ned Dollahite, the inspector, an earnest man who explains the state's policies with equal conviction.

"The culling process is followed by many Government agencies across the country with many species," he said. "Some think that any killing should just be done by official personnel.

"We believe in giving hunters, whose license fees are department's bread and butter, an unusual opportunity. But that isn't really the argument. The people on this committee just don't believe that any elk should be killed at all."

"Why take even one chance in 178,000 of eliminating a species?" Mrs. Edmiston asked. "For every hunter who wants to see one of these animals dead, there are a thousand taxpayers who'd rather see them alive. Opinion is growing in this direction. I have hopes that this may be the last of these hunts that we will see."

THE CONSTITUTION AND THE RATIFICATION OF HUMAN RIGHTS TREATIES—II

Mr. PROXMIRE. Mr. President, yesterday I stated that there is no basis for the argument that the ratification of the three human rights conventions concerning genocide, the political rights of women, and forced labor would violate certain constitutional provisions. The second principal constitutional argument advanced by those who oppose ratification is that the treatymaking power does not extend to that which is forbidden to the Federal Government. Thus, it has been argued that matters exclusively within the domain of the several States cannot properly be the subject of treaties.

A special report prepared by the Special Committee of Lawyers of the President's Commission for the Observance of Human Rights Year 1968 stated the following regarding this argument:

> But the argument begs the question. Matters within the scope of the treatymaking power cannot lie within the exclusive domain of the states. This doctrine has been clear from the very founding of the Republic.

The special committee supports this argument by quoting the decision of Justice Chase in the case of Ware against Hylton:

> If doubts would exist before the adoption of the present national government, they must be entirely removed by the 6th article of the Constitution . . . There can be no limitation on the power of the people of the United States. By their authority the State Constitutions were made, and by their authority the constitution of the United States was established; and they had the power to change or abolish the state constitutions or make them yield to the generai government and to treaties made by their authority.

In Chirac against Lessee of Chirac, Chief Justice Marshall similarly ruled that the validity of a treaty could not be questioned on the grounds that the subject matter of the treaty was a matter within the competence of the State.

Thus, objections to ratification of the human rights conventions and the covenants on human rights cannot be based upon the proposition that the treatymaking power is limited by the power reserved to the States under the 10th Amendment. It is time we stopped making excuses for 20 years of delay: there can be no valid constitutional argument against ratification. The Senate must see this and take action now.

TAX REFORM ACT OF 1969—ACTION OF COMMITTEE ON FINANCE

Mr. LONG. Mr. President, yesterday, October 21, the Committee on Finance completed its consideration of the portion of the House tax reform bill which relates to capital gains and losses. Additionally, the committee approved a suggestion made by Secretary George Romney, of the Department of Housing and Urban Development, with respect to investments in low and moderate housing.

So that Senators might follow the progress of these executive sessions, I ask unanimous consent that the press release be printed in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

[A press release from the Committee on Finance, U.S. Senate, Oct. 21, 1969]

TAX REFORM ACT OF 1969

CAPITAL GAINS COMMITTEE DECISIONS

The Honorable Russell B. Long, (D., La.), announced today that the Committee on Finance had concluded its work on that portion of the House tax reform bill dealing with the treatment of capital gains and losses. He reported that the Committee had

substantially approved the restrictions contained in the House bill. However, he recalled that on October 10, the Committee had agreed to retain the 6-month holding period required before gain on the sale of the property could qualify for favorable capital gains treatment. (The House bill would have extended the holding period to one year.)

Senator Long also reported that Secretary George Romney of the Department of Housing and Urban Development had prevailed upon the Committee to consider further a suggestion he had made to encourage investments in low and moderate housing. The suggestion had been explored, but not approved, at Monday's meeting of the Committee. Following the Secretary's presentation, the Committee approved his suggestion.

A complete description of the actions taken at today's meeting follows:

Low and moderate income housing

Tax-Free Reinvestment.—As noted above, the Committee approved an amendment to the provisions of the House bill relating to the real estate industry. This amendment, recommended by the Department of Housing and Urban Development would permit a taxpayer who invests in low- or medium-income housing to sell the property and pay no current tax on the gain involved, provided (1) he sells the property to the occupants or to a tax-exempt organization which manages the property, and (2) the full proceeds from the sale are reinvested in other government-assisted housing. In such a case the taxpayer's basis for the old property, to the extent the proceeds are reinvested in similar property, will be carried forward and become a part of his basis for the new property.

Capital gains

25 Percent Maximum Rate.—The Committee generally agreed with the objective of the House bill in repealing the present 25 percent maximum rate on capital gains. However, it felt that taxpayers with relatively small amounts of capital gain should continue to be eligible for the 25 percent maximum rate. Accordingly, it provided that married couples could continue to apply this rate in the case of gains up to $140,000 ($85,000 for single persons), provided they did not have "preference" income of more than $10,000. (The Committee has not yet taken up that part of the House bill concerned with the limit on tax preference, and for this reason, no announcement as to the items constituting "preference" income is being made at this time).

The Committee further agreed to move the effective date for the higher capital gains rate to December 31, 1969 (it was July 25, 1969 under the House bill), and to phase it in over a three-year period. While the exact amount of the increase will not be finally determined until the Committee has reviewed the rate reduction provisions, based upon the rate structure contained in the House bill the phase-in would be as follows:

	Percent
1969 (including the surtax)	27.5
1970	29.5
1971	31
1972	32.5

Alternative Tax for Corporations.—The Committee agreed to adopt the provision of the House-passed tax bill which would increase the alternative tax rate for a corporation's net long-term capital gains from 25 percent to 30 percent. The effective date of this change will also be December 31, 1969 and, as in the case of the alternative 25 percent tax rate for individuals, this higher tax will also be phased-in. However, the phase-in in the case of corporations will involve only 2 years. The rates applicable during this period are:

	Percent
1969	27.5
1970	29
1971	30

Transitional Rules.—In addition to the date change and the phase-in, described above, the Committee agreed to adopt several transitional rules which will apply both to the alternative tax for individuals and the alternative tax for corporations. The Committee agreed to a transitional provision which provides that capital gains arising from sales or other dispositions under binding contracts that were in effect on or before October 9, 1969, would be taxed under present law. This binding contract rule would not apply, however, in certain cases of gain from timber, coal, or domestic iron ore which is taxed as a capital gain under section 631 of the Internal Revenue Code. Further, the Committee adopted a provision which would except a capital, or liquidating distribution from a corporation which was made under a plan adopted prior to October 9, 1969.

The Committee further adopted a provision which clarifies the status of installment payments received after 1969 but which relate to sales made on or before October 9, 1969. This new provision provides that such installment payments would be taxed at the maximum alternative rate of 25 percent until the sale price is paid off.

Capital Losses of Individuals.—The Committee adopted the provisions of the House-passed tax bill relating to capital losses of individuals. This provision provides that only 50 percent of an individual's long-term capital losses may be offset against his ordinary income. In addition, the deduction of capital losses against ordinary income for married persons filing separate returns would be limited to $500 for each spouse. The Committee did, however, change the effective date of this provision. Under the Senate version, this provision would be effective for taxable years beginning after December 31, 1969 (the House bill would have applied to taxable years beginning after July 25, 1969).

Sales of Life Estates.—The Committee also adopted the provision of the House-passed tax bill which relates to the sales of life estates. In general, this provision provides that the entire amount received on the sale or other disposition of a life (or term of years) interest in property, or income interest in trust (whether acquired by gift, bequest, inheritance, or by a transfer in trust), is to be taxable without any reduction for the taxpayer's basis. Presently, only the excess of the amount received over the seller's basis is taxed. The Committee, however, did change the effective date for the provision. Under the Senate version, this provision would become effective as to sales or other dispositions after October 9, 1969 (the House bill would have applied with respect to sales or other distributions after July 25, 1969).

Casualty Losses Under Section 1231.—The Committee further adopted the provisions of the House-passed tax bill which change the tax treatment of certain casualty losses. The Committee did provide that the provision would include casualty gains and losses on personal capital assets. Personal capital gains and losses were not included within the House bill. Further, the Committee changed the effective date of this provision to years beginning after December 31, 1969 (the House bill would have applied with respect to taxable years beginning after July 25, 1969).

Transfer of Franchises.—The Committee adopted the provisions of the House-passed tax bill relating to transfers of franchises. However, the Committee added additional rules to the provisions to help distinguish between those cases when the transfer of the franchise is to be treated as a sale as contrasted with when the transfer is to be treated as a license. In addition, the Committee adopted rules for the tax treatment of the franchises which would be consistent with that treatment given to the franchisor. Further, the Committee provided that the section would apply to trademarks and tradenames as well as franchises. Under the Committee version this section would apply to transfers made after December 31, 1969. However, present franchisees who are otherwise eligible for the more liberal rules included in this provision could elect to come under this new provision, rather than continuing to be taxed in accordance with present law. Finally, the Committee agreed to exclude professional sports from the application of these new rules.

Collections of Letters, Memorandums, etc.—This matter was dealt with by the Committee on October 13, 1969. See press announcement of October 14, 1969.

Holding Period of Capital Assets.—This matter was dealt with by the Committee on October 10, 1969. See press announcement of that date.

Total Distributions from Qualified Pension and other Plans.—This matter was dealt with by the Committee on October 14, 1969. See press announcement of that date.

AN AMERICAN SATELLITE COMMUNICATIONS SYSTEM—ADDRESS BY SENATOR GRAVEL

Mr. ELLENDER. Mr. President, I invite the attention of Senators to the speech delivered by the junior Senator from Alaska (Mr. GRAVEL), on Monday, October 13, at the meeting of the Inter-university Communications Council held at Notre Dame University in South Bend, Ind.

Our distinguished colleague discussed a most vital issue which affects all of us; namely, the availability of communications to distribute educational and cultural programing that cannot be a profitable commercial enterprise for network broadcasters. Alaska, which is nearly void of modern communications, seeks a solution by use of satellites for much of its land mass.

Many of our States invest large sums of taxpayers' moneys to establish cultural and educational transmission facilities. My own State of Louisiana is, like Alaska, pioneering in one segment of communications applications by establishing a cultural French-speaking network to preserve the rich, unique heritage that is firmly rooted in Louisiana.

Mr. President, I believe we should all reflect a moment on the profound issues that are discussed by Senator GRAVEL, because these issues touch on the quantity and quality of one of man's most powerful instruments—television—which penetrate into the homes and influences the most precious part of our society's fabric.

I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

AN AMERICAN SATELLITE COMMUNICATIONS SYSTEM

(By Senator MIKE GRAVEL)

Mr. Chairman, Delegates to the Inter-University Communications Council Meeting, invited guests, ladies and gentlemen:

Victor Hugo said there is nothing more powerful than an idea whose time has come. That is precisely what your organization is engaged in doing . . . advancing applications for a powerful idea.

It is fundamental to our academic environment that scholars have the right to probe banks of knowledge and that academic institutions maintain close links with one another. And that, of course, is your primary goal.

Your pioneering continues to be important. Your reports and your conferences over the past few years highlight the opportunities facing society today. They have focused interest on public issues related to the new communications technology.

My involvement in your field has come about through the demands of my own constituency.

Let me describe one of the principal problems facing Alaska today, and you will see why I have such an interest in what you are doing.

My state is the most remote state in the Union, extending deep into the Arctic. It is larger than the combined areas of England, France, West Germany, East Germany, Poland, Czechoslavakia, Switzerland.

It is larger than all of the Eastern seaboard states combined, from Maine to Florida. However, Alaska's population is no larger than metropolitan South Bend . . . approximately 270,000 people.

Our state's major problems in education and acculturation stem from our very low population density. It is difficult to attract competent teachers for isolated communities and to keep them there out of touch with their teaching colleagues, out of contact with sources of assistance and research.

The knowledge gaps that have been bridged in rural America by the media as described by Marshall McLuhan, have yet to be successfully challenged in the North Country. In most of Alaska there are virtually no modern communications.

As you know, telecommunications in the United States has been predicated on commercial exploitation. Under these conditions of profit only a few Alaskan communities have the economic base to support adequate communications.

Compared to other areas of this nation, my state is in the communications stone age. But, as a result of the technological gains in satellite communications, Alaska's characteristics—former liabilities—are now ideally suited to make my state the showcase for space applications.

We in Alaska are not hide-bound to the equity interests which are threatened elsewhere by this new satellite technology.

Our long-term goals are these: Every single community including the smallest village must enjoy television—educational television, cultural television and commercial television.

Alaskans everywhere must have access to new bio-medical diagnostic assistance.

Audio-visual programs must be a part of each school's curriculum.

Telephonic services generally taken for granted here in the south 48 must now become available to all Alaskans regardless of how remote their community.

Alaska must also have direct outside links through international satellites; and must have a complete internal communications system, using a sensible mix of terrestrial and space facilities.

You know as well as I that the state-of-the-art easily permits Alaska to have what I just described.

Not many months ago I proposed bringing the Apollo 11 telecast directly to my state. This idea initially was scoffed at by authorities who should have known better. However, by insisting that the Department of Defense conduct tests, we proved that it could be done.

We employed a double satellite hop, using first a civilian satellite and then a military one to transmit TV for the first time to Anchorage—live TV. Alaskans along with their fellow Americans saw Neil Armstrong impress man's footprint on the moon.

Now we are working on another step toward permanent adequate communications—a pilot program to bring educational and cultural TV to four Alaskan communities using NASA's ATS–1 satellite. We are very close to realizing success in this effort.

And what we learn from this relatively modest experiment, we can apply to our permanent system. In fact the experiment itself will be a strong argument for a total satellite program.

Imagine the system I have just outlined for Alaska superimposed on the total United States.

Direct educational TV could be beamed into each of America's 50,000 school districts. NASA has estimated the cost of small receiver stations for this type of application at less than $500.

A domestic American satellite would provide TV and high speed data channels plus associated voice circuits. The cost of the bird in space and the related ground facilities should be borne by both government-dedicated funds and lease income from commercial sources.

After this quick look at the future let us turn to the present.

Private interests, constrained by the dictates of commercial economics, have long been whipping boys for those of us dissatisfied with both the quantity and quality of our national communications.

Why waste any more time condemning commercial interests. The final responsibility for utilizing the full spectrum of communications lies not with private enterprise but with government.

Educational TV will never make a profit and should not be expected to.

Cultural TV will never make a profit and should not be expected to.

And likewise, commercial TV should not be the pack horse of educational and cultural TV.

Our government should turn away from past confusion and develop the full spectrum of communications utilizing today's satellite technology.

In analyzing what government should do to further this end, let's concentrate on one issue that affects all of you and is basic to everything we say on this subject.

Who's responsible for getting the job done? And why hasn't the job been done? What are the facts?

The management of our satellite technology is vested in the Communications Satellite Corporation, COMSAT. An entity chartered by Congress through the Communications Satellite Act of 1962.

When we look back on the debate which led to this legislation, we can understand the difficulty Congress had at that time in establishing a law controlling a technology about which it knew so little. However, today we have considerable experience and we can now look at that law and know that it has enormous shortcomings.

It was Congress that assigned COMSAT the duty of developing and managing international satellite communications system. But it was also Congress that neglected to clearly assign a similar responsibility to meet our domestic needs.

The result has been that in this decade, the utilization of communications technology in the U.S. has lagged far behind its potential. In fact we have been exporting the benefits of our own technology without sharing those benefits with ourselves.

Not only have we denied ourselves with respect to these benefits but we have taken our management skills and directed them to the operation of an international consortium—INTELSAT. COMSAT, an American chartered and financed corporation, is the agent operating INTELSAT.

Whatever interest COMSAT might have in developing an acceptable domestic system is blunted in yet another way.

By law, representatives of the communications industry sit on COMSAT's Board of Directors. At the moment, there are four.

These men are paid by the very industries that benefit from the absence of domestic satellite communications. Their companies systematically litigate against COMSAT before the Federal Communications Commission.

Three members of COMSAT's Board are Presidential appointees. The remaining eight board members are "public" members. As in most corporations today, management dictates the composition of its own governing board. And no one can really deny that this is in fact the case with COMSAT.

Unfortunately for the American public, the ultimate interest of many of those who sit on COMSAT's Board are best served by COMSAT's inactivity.

COMSAT has gone through the motions of filing for a domestic satellite system. It did so after others attempted to fill the vacuum. However, the application is still pending. Combine this with the additional fact that the same interests holding seats on COMSAT's Board of Directors have brought strong opposition to the FCC. The net result is that we have no domestic satellite system.

The conflict of interest is obvious. Profit-motivated corporations are forced to protect their equity interests. Our free enterprise system will not and can not be expected to solve this dilemma or operate in any other way.

Meanwhile, what is going on in other parts of the world?

Canada is now building the equipment for a domestic satellite system that will be operative in 1972. Their crown corporation has been established and contracts awarded. Their system will provide them with transcontinental telephone as well as data and television systems. These same services will be extended to the far reaches of the Arctic.

A very real possibility exists that Canada's system could satisfy Alaska's needs. This economic and political determination has yet to be made.

There are other examples: German and French governments are constructing a communications satellite called "Symphony." Under present plans, it will provide educational TV and cultural TV to portions of Europe and Africa in 1973.

India is developing a particularly noteworthy system. India's problem is the crushing birthrate which has thus far eluded all prior attempts at control. Their satellite will offer the only feasible method of reaching untold millions with a convincing enough argument to solve their problem. By 1972 India will then be able to extend the full spectrum of communications to millions who are now without any form of mass communications.

The United States will launch the satellites for all three . . . the Franco-German "Symphony," the Canadian "Telesat," and the Indian "ATS–F."

I feel a sense of pride that the United States is enriching so many lives around the world. I feel an equal sense of frustration over our inability at the same time to further enrich American lives.

It is obvious that COMSAT, which is the only American agent created to pursue the benefits of satellite communications, devotes its efforts to international projects. What we have created is a foreign agent devoted to international programs and no organization devoted solely to serving the domestic needs of this country.

Any COMSAT plan related to a satellite system for the United States will of necessity be structured around INTELSAT programs and economics which have been machinated in London, Paris, Rome and Beirut.

The present national administration, like

the last one, has focused its attention on these problems. The results of its study are expected soon. Hopefully, the President will make recommendations and use the full force of his office to influence and prepare legislation that will provide the United States with a complete domestic communications system.

I am convinced that the American people, developing a greater recognition of this dilemma will not settle for anything less.

The Nixon Administration must address itself to the following problem areas if it is to have an effective plan:

1. A clear designation of responsibility for a domestic satellite system must be given to some entity. This entity could be COMSAT, it could be a newly formed corporation, it could be an existing corporate giant in the field of communications, or it could be a new organization owned entirely by the Federal Government.

2. We must guarantee the full utilization of the total communications spectrum. This means that free educational and cultural TV must be available to every citizen. Biomedical and diagnostic assistance must be available to all doctors everywhere and academic banks of knowledge must permanently be linked in all our universities.

3. And finally any plan must assure an orderly transition. Existing equity interests must be recognized and dealt with fairly.

My involvement with satellite communications prompted me to introduce Senate Bill 2928. The bill's main objective is to permit states, their political subdivisions and chartered institutions such as universities and hospitals to own satellite terminal facilities. They could own ground stations outright or co-own the stations with an authorized communications common-carrier or co-own them with COMSAT.

The bill further provides that a domestic satellite be available for domestic use.

Our advances in aeronautics and space engineering have been passed on to benefit American citizens. The same has been true in medical research and nearly all other scientific fields.

But in communications we have placed ourselves in a straight-jacket. We have permitted the policies and economics of the situation to thwart rather than advance the full utilization of the new technology.

Reflect for a moment on the implications involved in this bill. You will see that virtually all the issues that interest you are affected by its provisions.

The powerful idea I spoke of at the beginning is at hand. We must all begin to focus on and push for an immediate communications plan. Adding your individual voices to a chorus that will be heard by this Administration and this Congress will, I am sure, produce the desired results.

Man's greatest problem is communicating with his fellow man.

We here address ourselves to an opportunity for solving the population problems of India, providing a vehicle for the acculturation of Eskimos in the far reaches of the Arctic, providing our ghetto population with the necessary training and education and bringing to all Americans cultural enrichment far beyond existing horizons.

We now have the opportunity to bring about a greater degree of communications to satisfy all appetites and needs.

The technology exists. What a crime not to use it.

FEDERAL PRICE FIXING PRODUCES GAS SHORTAGE

Mr. TOWER. Mr. President, I invite attention to an extremely important and timely article published in Baron's national business and financial weekly for October 13.

The article concerns a billion-dollar bet that the United States cannot solve its own natural gas problems which have been under Federal control now for only the last 15 years—since 1954.

Early this month, a staff report to the Federal Power Commission's boss revealed that by the end of 1973 our national reserves-to-production ratio will be reduced to 10.2. On October 3, the FPC decided to treat as new supplies—hence, worth more money—all gas henceforth discovered on acreage already committed to the interstate market. A week ago last Tuesday in what the agency described as a "turning point" in regulation, it decided to liberalize the pricing of gas reserves which the pipeline companies themselves own. The industry spokesmen say: "Too little, too late."

The open market should be the mechanism for determining price because governmental fiat is not only unnecessary but unworkable as presently attempted. Federal price fixing is finally producing this looming gas shortage.

The billion-dollar bet is El Paso Natural Gas Co.'s planned arrangement with the Algerian Government to import natual gas in a liquified and refrigerated form to the United States east coast for sale to the consumer. This will be a very expensive item to the household user and industrial user. And one can bet it will be a costly headache for the U.S. concerns which will have to continue to do business with the already hostile Algerian Government. Three years ago, Algeria began pressuring the American oil concerns to submit to discriminatory treatment regarding royalties and taxes. Since then Algiers has "sequestered," or confiscated, the bulk of U.S. investment within its borders.

To quote Dr. Milton Friedman:

Economists may not know much. But we do know one thing very well: how to produce shortages and surpluses. If you want to produce a shortage of any product, simply have a government fix and enforce a legal maximum price on the product which is less than the price that otherwise would prevail.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FEDERAL PRICE FIXING IS FINALLY PRODUCING A SHORTAGE

El Paso Natural Gas Co., which (according to an article in Barron's barely six months ago) was supposed to be "Making Fewer Headlines, More Money," last week made quite a splash on the financial page. The company announced that it has signed with Sonatrach, Algeria's state-owned petroleum monopoly, "definitive agreements for the largest liquefied natural gas (LNG) project in history," one which involves capital outlays of nearly $1 billion and is designed, starting in the fall of 1973 and extending nearly to the end of the century, to deliver one billion cubic feet of fuel per day to East Coast ports. Besides pipelines and the like, the project calls for the construction of liquefaction and regasification plants, as well as nearly a dozen specially designed vessels, biggest of the kind ever built, to carry the frozen gas. "This will mark the first time that energy supplies of this type have been imported into the U.S. on a permanent basis," the company proudly observed, adding that it was "particularly pleased to be associated with the pioneering venture. . . ."

Apart from its unprecedented size and scope, the project is noteworthy on a number of counts. For one thing, if carried out faithfully by both parties, the contract will mark a welcome change in the commercial practices of the Algerian Government, which up to now have smacked less of the Harvard Business School than of the Barbary Pirates. Since gaining independence a decade ago, Algeria has seized without compensation a vast amount of foreign property, including banks, insurance companies and the personal possessions of thousands of former French residents. Sonatrach—Societe Nationale pour la Recherche, le Transport, la Transformation et la Commercialization des Hydrocarbures—launched its career three years ago by borrowing $15 million from a couple of gullible U.S. banks. No sooner had the ink dried on the loan agreement than Algeria began pressuring the American oil concerns on the scene to submit to discriminatory treatment regarding royalties and taxes. Since then Algiers (which broke off diplomatic relations with Washington during the last Israeli-Arab War) has "sequestered," or confiscated, the bulk of U.S. investment within its borders, including concessions held by El Paso Natural Gas. "Never do business with a man you can't trust," advised J. P. Morgan, but the old man has been dead a long time. Perhaps the company will come out all right.

That's the stockholders' worry. Profitable or otherwise, the huge transaction, which last week's announcement said was "designed to ease U.S. gas supply problems," has disturbing significance for the whole country. For it plainly indicates that domestic reserves of the useful and versatile fuel, once deemed inexhaustible, are not keeping pace with future needs, an alarming state of affairs which the Federal Power Commission belately has come to recognize. Just a fortnight ago, the FPC, which regulates interstate distribution of natural gas from wellhead to burner tip, released a staff report on supply and demand, warning that within the next five years—sooner in some areas—a critical nationwide shortage will flare. What the agency failed to point out is that its own regulatory policies, by deliberately (if not with malice aforethought) imposing an artificial lid on prices, have been largely to blame. Price control will always have its blind worshipers (hi there, professor Galbraith). Only the free market, however, can keep the home fires burning.

For the past 15 years, to be sure, the regulatory bodies have been singing a different tune. In 1954, the U.S. Supreme Court, in a singularly ill-advised decision, thrust on the Federal Power Commission authority to regulate not only transmission and distribution companies but also producers of natural gas. Since then, despite protracted litigation, the FPC has gradually extended its sway. The agency has decreed, beyond further legal appeal, area prices of approximately 15.5 cents per thousand cubic feet of gas for the Permian Basin. (Ceiling prices for all other major areas are still in dispute.) The ceiling for Southern Louisiana was finally set by the FPC at nearly five cents per mcf., or 20%, below the provisional guideline posted eight years earlier. As in the Permian Basin rate case, moreover, the FPC employed in its calculations 1960 cost figures, which it so far has refused to up-date. Thus, according to Stanley Learned, director and former president of Phillips Petroleum, the government has "established a concept for producer prices under which the industry cannot recover its costs."

Such policies have naturally warmed the hearts of users. However, producers, discouraged by lack of incentive, have sharply curtailed their efforts. Completions of U.S. exploratory gas and condensate wells declined from 909 in 1959 to 429 in 1968. In the latter year, for the first time in history, net pro-

duction exceeded additions to reserves. The reserves-to-production (or R/P) ratio today stands at only 14.6, or considerably less than a 15-year supply, barely two-thirds of what it was when the FPC acquired jurisdiction. Some pipelines are unable to contract for future needs; hence, expansion programs are in jeopardy. Now El Paso Natural Gas Co. has decided to go four thousand miles overseas for fuel which will cost more than 50 cents per mcf., perhaps half again as much as gas moved by pipeline from the Gulf Coast.

Even the federal regulators, as noted, have finally grown concerned over what they have wrought. Early this month the FPC issued a staff report that didn't make pleasant reading for the boss. In brief, it concluded that the national reserves-to-production ratio would decline to 10.2 by the end of 1973. "Even a substantial improvement in reserve additions above that experienced during the past five years will not prevent the R/P ratio from dropping to about 11." Regional gas supply deficiencies are likely. "The uncommitted portion of the total proven reserve inventory will have been exhausted by 1974, at which time the natural gas industry's capacity for growth will be limited." None of the foregoing, said a miffed Commissioner, provides "the basis for a round of price increases." Nonetheless, the full Commission has swiftly moved to make a start. On October 3 the FPC decided to treat as new supplies (hence, worth more money) all gas henceforth discovered on acreage already committed to the interstate market. Last Tuesday in what the agency described as a "turning point" in regulation, it decided to liberalize the pricing of gas reserves which pipelines themselves own.

Too little, say industry spokesmen, and too late. To meet the looming emergency, in the view of Phillips' Learned, the Commission must take more far-reaching steps, including reconsideration of its Southern Louisiana decision; approval of an increase of at least five cents per thousand cubic feet in both wellhead and flowing gas; and recognition in price-fixing of "changes in taxes and the results of inflation." For the long haul, Mr. Learned approvingly quotes the views of Dr. Clark A. Hawkins, associate professor of finance and economics at the University of Arizona, an authority on the subject. In a new book, the latter writes: "The market should be the mechanism for determining price because natural gas price fixing by governmental fiat is not only unnecessary but unworkable as presently attempted. Also, it is only the market that will give the lowest price consistent with maximum output in the long run. The standard of market price could be feasible under existing law if the Commission would espouse it and proceed to the courts." Failing that, of course, a Congress truly responsive to the needs of consumer and producer alike would undo the longstanding judicial mischief.

Like El Paso Natural Gas Co., we would be inclined to bet on the sorry status quo. The East Coast doubtless will come to rely for fuel on a source of supply that is unfriendly at best and, at the slightest provocation, downright hostile. As the U.S. proceeds to import natural gas—at higher prices, be it noted, not lower—the poor old balance of payments will suffer a fresh, and wholly gratuitous, setback. "Economists," so Dr. Milton Friedman has said, "may not know much. But we do know one thing very well: how to produce shortages and surpluses. Do you want to produce a shortage of any product? Simply have government fix and enforce a legal maximum price on the product which is less than the price that otherwise would prevail. . . ." He should be teaching at Harvard.

PROUD AMERICANS

Mr. DODD. Mr. President, in the words of a well-known columnist, our Nation is undergoing an "agony of protest."

The society known as America has splintered into the rich and poor, young and old, black and white.

The policy known as the United States is fragmented into the "silent majority" and the "dissident minority." From radical to reactionary, our discontent is becoming cataclysmic.

Because of the division and dissent with which we are faced, "Americanism" is no longer a term easily defined. The points on which we all agree are growing fewer and fewer.

Surely this is cause for concern. At the same time, however, I see it as a great cause for optimism. For Americans are, as at no other time, deeply involved and highly informed with respect to the state of our Nation.

To me this implies that a significant factor unites us all; namely, love of our country and commitment to making it great.

Because I believe this so strongly, I am pleased and encouraged by the recent formation, by a group of Connecticut citizens, of the Proud American Club.

This group was initiated under the leadership of the New Haven County Sheriffs' Association. Its purpose is to reaffirm faith and pride in this free Nation.

The Proud American Club is a nonpartisan group. It stands against racism, crime, and any form of injustice. More importantly, however, it stands for freedom, equality, opportunity, and pride in our National heritage.

In the words of New Haven County Sheriff J. Edward Slavin:

> We are going to make an effort to organize Proud Americans in this Country. A Proud American can be black, white, yellow or brown . . . but he or she must believe in this Country and be proud and help to keep what our forefathers struggled so hard for us to enjoy.

Mr. President, as a proud American, I commend Sheriff Slavin and the other leaders and members of this fine effort.

I know that Senators share my hope that, whatever our differences and our troubles, every American will be a proud American.

PROPAGANDA PAWNS

Mr. FANNIN. Mr. President, many wonderful women in my State of Arizona, as well as across this Nation, are waiting. They are waiting for word from Hanoi. They are waiting to find out if they are wives or widows.

Mr. President, this kind of inhumane, indecent, uncivilized treatment of Americans who have gone down behind enemy lines is not only inexcusable, it is a loathsome international action. The treatment our American POW's have received at the hands of Communist governments is despicable and deserves the abhorrence of all legitimate world officials.

If we are to have demonstrations in the streets, let us have some demonstration against this kind of violation of international relations and the Geneva conventions. Let us have an outpouring of protest against these international gangsters who use wives and children as propaganda pawns of war.

An excellent article detailing this situation—written by Mr. Louis R. Stockstill—was published in Air Force magazine for October.

Hanoi has consistently refused to permit inspections of its prisons; to release the sick and wounded; to allow exchange of letters and packages; or to protect U.S. prisoners from public abuse.

All these things are violations of the Geneva conventions of 1957, which were signed by the Hanoi Government.

The prisoners, in fact, have been used and exploited for propaganda ends, this with the full knowledge and cooperation of members of the so-called new left.

I am incensed about this, and I think the American people are, too.

I ask unanimous consent that the article and an accompanying editorial from the same magazine be printed in the RECORD.

There being no objection, the article and editorial was ordered to be printed in the RECORD, as follows:

PRISONERS OF WAR: THE FORGOTTEN AMERICANS OF THE VIETNAM WAR

(By Louis R. Stockstill)

(NOTE.—On the following pages you will find one of the most important articles ever published in this magazine. Telling you this may seem redundant. If an article is unimportant, we should not be publishing it at all. At the same time, we have always acknowledged to ourselves that not all readers are interested in everything we print. Our job is to supply a balanced buffet table—not intravenous feeding.

(But the matter of our American servicemen who have sacrificed their freedom, their health, and the peace of mind of themselves and their families in behalf of freedom for others—this is a matter that concerns us all. By the hundreds, these men languish in North Vietnam prisons and in Viet Cong jungle camps—unprotected by the Geneva Conventions which are supposed to guard the rights and persons of all prisoners of war. That the bulk of these American prisoners are airmen brings their plight a little closer to us, perhaps. That others have lost life and limb in the same cause is even more saddening. But death and wounds are irretrievable, and all we can do is to make suitable provision for the wounded and the survivors of the dead. The prisoners, on the other hand, are alive and are retrievable. We can do something about them. We must.

(The author, who has done such a thorough and painstaking job, served for many years on the staff of The Journal of the Armed Forces, ultimately as its Editor. Lou Stockstill has devoted his professional life to the examination and explanation of the problems of the armed forces of the United States. He is now a freelance writer in Washington. This article represents, in our judgment, the finest effort of his distinguished career. It explains the POW problem better, and in more detail, than anything published to date. It includes some concrete suggestions as to what you can do to help.

(Read it, and let your conscience be your guide.—The Editors)

Once a month, from her living room high up in an Arlington, Va., apartment building, removed from most brutalities of life except her own thoughts, Gloria Netherland walks

a long hallway to the mail chute and deposits a letter.

She watches it drop from sight on the first leg of a journey into an unknown void halfway around the world. The letter begins "Dear Dutch." But whether Dutch will read it, or someone else will read it, or whether it will go unopened is impossible to say.

Gloria and Dutch have been married eighteen years, but she doesn't know—hasn't known for a long time now—if he is alive or dead. And if alive, she doesn't know where he is or how he is.

For more than two years she has written the monthly letters—limited to six lines each, according to current Communist rules. None are answered, none are returned.

But, in the pattern of "dreadful uncertainty" that characterizes her daily life, she never fails to write.

"I realize," she says, "that there is just a fifty-fifty chance he is alive, but I feel that I cannot afford to let anything go undone."

Capt. Roger M. Netherland, USN, who was shot down over North Vietnam in May 1967, is one of the senior US pilots missing in the Vietnam War. Flyers reconnoitering the site where his burning plane plunged to the ground believe they heard his voice. But no word has come through since.

"When you are married to a flyer," Gloria Netherland says, "you learn to live with potential disaster. But you expect it to be black and white, not like this. I can't think of him as being gone, but it is very difficult for me to think of him as a prisoner."

She says, "The worst day for me was not the day they came to tell me he had been shot down. The worst day was the day his clothes and books and personal things came back. To have to unpack a man's life is not an easy experience.

"And if he is gone, I will have to do it all again. There will be another complete healing period to go through."

Gloria Netherland is but one of hundreds of wives and parents who live on an emotional roller coaster of grief, hope, faith, anxiety, and raw courage. For some, the waiting has lasted more than five years.

Their husbands and sons are the forgotten men of the Vietnam War—approximately 1,400 men captured by the enemy or missing and possibly in enemy hands. Most of the known captives are imprisoned in North Vietnam, others by the Viet Cong in the jungles of the South. A few are interned in Laos and Red China. Files of 981 men have been stamped with the heart-wrenching legend "MIA"—missing in action.

Some 3,000 "next of kin"—wives, children, and parents—in every state now endure what one calls "this limbo of anguish."

The other side has revealed tragically little about these "casualties" of the war. North Vietnam and the Viet Cong, defying international agreements and basic codes of humanitarianism and decency, have consistently refused to discuss the whereabouts of the missing men. Similarly, they have dribbled out only limited and distorted information about selected prisoners in infrequent propaganda movies tailored to their own purposes, often peddling doctored film to foreign outlets. Many wives quite rightly believe that "our husbands are being sold for so much propaganda."

On the shoddy pretext that U.S. captives are not prisoners of war but "criminals," North Vietnam will not allow neutral inspections of its prisons. Yet such inspections are required under the Geneva Convention, signed by North Vietnam in 1957 and by 119 other governments.

Using the "criminal" charge to mask its defiance, Hanoi not only has rejected inspection of its camps, but has refused to:

Identify the prisoners it holds;

Release the sick and wounded;

Allow proper flow of letters and packages; or

Protect US prisoners from public abuse.

The Viet Cong and Communist forces in Laos have followed Hanoi's lead by imposing an even more rigid blackout.

The curtain of secrecy the enemy has thrown around the prisoners and missing men has, until recently been duplicated to some extent by the US government. But this is now changing. A brighter spotlight has been turned on the problem. The change has been wrought by the Nixon Administration. The United States government has now opened up some of its previously closed files of information on the imprisoned and missing men. New initiatives and a tougher approach are the order of the day. Further steps may be in prospect.

NEW HOPE FOR POW'S

For the first time, Administration officials are waging an open fight for the prisoners. The diplomatic maneuverings which shielded many aspects of the problem from public view during the Johnson Administration—although perhaps rightly so for that time—have now been partially cast aside. The United States is speaking out.

Two of President Nixon's top Cabinet officers have embarked on a strong public offensive in which they stress concern for, as well as facts and figures about, the treatment of the US prisoners and missing men.

"I don't understand how the North Vietnamese can be so lacking in humanity that they won't even give us the names of the prisoners they have," declares Secretary of State William P. Rogers. "All they have done is to be more intransigent, more unreasonable, and more inhumane."

Secretary of Defense Melvin R. Laird says there is "clear evidence that US prisoners are not being treated humanely," and that conditions in the prison camps are "shocking."

Yet, in order for the tough and forthright new policies to produce desired results, citizens must join the attack. Their assistance could be crucial. Many citizens may never have asked themselves how, or if, they can help. Many still may not be aware of the full story of our forgotten men.

Here then are the sobering facts about the prisoners and the missing, the details of the obscure existence they live, the way they are used and abused by Hanoi. And here, too, is an account of what the US is doing to aid the men and their families, and suggestions as to how you might lend a hand:

Of the known prisoners—the 401 the armed forces have been able to positively identify as captured—192 are Air Force, 140 are Navy, forty-six are Army men, and twenty-three are Marine Corps personnel.

Nearly 1,000 others are missing in action and thought to be captives. The largest number missing from any single service is 516 from the Air Force. More than 260 are missing in the Army, more than 100 in the Navy, and ninety-four in the Marine Corps.

The prisoners and missing men range in rank from private to colonel, or Navy captain. They include such men as Col. Robinson Risner, of Oklahoma City, one of the top AF pilots, and Navy Lt. Cmdr. J. S. McCain, III, son of the US Commander in Chief, Pacific, Adm. J. S. McCain, Jr.

Several of the known prisoners have now been behind bars more than five years. More than 200 have been imprisoned or missing for more than three and one-half years, more than 500 for over two years.

Some military intelligence the United States has gleaned about these men must be kept secret or couched in guarded language to protect the prisoners.

Nevertheless, accounts of torture and inhumane treatment have emerged. The widely publicized story of the capture, escape, evasion, and rescue of Navy Lt. (j.g.) Dieter Dengler in 1966 presented stark examples. Captured by the Pathet Lao but eventually turned over to North Vietnamese soldiers, Dengler was spread-eagled by his captors and at night left to the mercy of jungle insects, tied to a tree for harassment target practice, repeatedly beaten with fists and sticks (once into unconsciousness) for refusing to sign a statement condemning the US, and tied behind a water buffalo and dragged through the bush. The once 180-pound flyer weighed ninety-eight pounds following his escape and rescue.

STORIES OF MALTREATMENT

Other escaped prisoners have told of similar maltreatment in Pathet Lao and Viet Cong jungle camps.

Most recent evidence about those imprisoned in North Vietnam discloses that many have been tortured by being deprived of sleep, refused food, hung from ceilings, tied with ropes until they developed infected scars, and burned with cigarettes. At least one had his fingernails ripped from his hands. The broken bones of another, set by Communist doctors and still in a cast, were rebroken by guards.

It is difficult to know how typical these examples may be. But, regardless of the continuing secrecy in certain areas, substantial information is available on some prisons and the basic treatment of some prisoners. Portions of the record are cloaked in "it is believed" language, some is official hard fact, and some has come from those foreign news sources Hanoi has permitted to peek into selected prison keyholes.

Prisoner treatment, of course, varies, and often the enemy attempts to camouflage the worst conditions. With that in mind, consider these details about three types of prisons—a jungle camp operated by the Communist Pathet Lao; a Viet Cong jungle camp; and a North Vietnamese institution known euphemistically as the "Hanoi Hilton."

The Pathet Lao camp is a bamboo stockade of primitive thatched huts. Prisoners are fed twice a day, mostly rice but with occasional supplemental foodstuffs. Many suffer from malnutrition. Some are afflicted with intestinal parasites. Except when allowed outside to empty toilet pails, prisoners are confined inside the huts, often locked in crude wooden foot blocks or handcuffs. Barbaric treatment, including beatings, is not unique. Prisoners are forced to listen to Radio Hanoi.

The Viet Cong prison or junge camp houses fewer than a dozen men. The prisoners are fed three times a day, again mostly rice, supplemented by some meat, fish, or vegetables. They are supplied with soap and toothpaste, fifth-rate medical treatment, pills thought to be antimalarial, and even occasional vitamin injections for those in most obvious need. Between meals, prisoners are allowed to smoke, exercise, or just sit. About once a month, they are furnished news of the outside world. They have been told, for example, of the assassinations of Dr. Martin Luther King and Sen. Robert F. Kennedy, of the release of the *Pueblo* crew and the election of President Nixon. They are allowed to write occasional letters, but have no way of knowing the effort is futile. No letters have ever arrived in the U.S. from prisoners held by the VC. To maintain the pretense of a mail-exchange, however, at least one prisoner in this camp was permitted to receive two letters over a ten-month period.

DAILY ROUTINE IN HANOI

In the North Vietnam prison camp (in central Hanoi), daily routine is more formalized. Prisoners are awakened between 5:00 and 6:00 in the morning by a gong, followed by a thirty-minute Radio Hanoi (English language) broadcast piped into their cells. At mid-morning they are taken out to empty toilet buckets. About 11:00 a.m., seventeen

to nineteen hours after they last ate, they are fed the first of two daily meals. Food consists mainly of pumpkin or squash, pork fat, a vegetable resembling wild onion tops, and bread or rice.

One former prisoner said, "The main diet is based around bread, and during the summer we got a squash soup and pig fat." Prisoners receive three daily cigarettes and sometimes, possibly for propaganda purposes, have been given sweets. (Propaganda films staged by Hanoi have shown tables laden with food, including mounds of fresh pineapple and bananas. But no one was eating.) After the morning meal—picked up on a wooden tray and eaten in their individual cells—prisoners are allowed to "nap" on their bare-board bunks until 2:00 in the afternoon, when their cells are flooded with another half-hour Radio Hanoi broadcast. Between 4:00 and 6:00 p.m., they are fed the second and final meal of the day. The day ends around 9:00 p.m.

Each prisoner is provided with two sets of pajama-like clothing, two blankets, and toilet articles. Each is allowed to shave twice a week and wash his clothing once a week.

CONSTANT INDOCTRINATION

Brainwashing efforts do not follow the hard-line techniques employed during the Korean conflict, but prisoners are subjected to constant lower-key indoctrination. Not only does Radio Hanoi bombard their cells with slanted news and propaganda a full hour out of each day, but prisoners also are furnished with Communist propaganda periodicals and are lectured on the "history" of Vietnam and the provisions of the 1954 Geneva Accords as conveniently interpreted by their captors. Sometimes men reportedly are taken from the prison to visit state institutions where they can "learn" more about North Vietnam's "culture."

Attempts also are made to induce them to write or record statements expressing sympathy with the North Vietnamese cause and condemning U.S. involvement in the war.

Within the confines of the prison, the captives generally are isolated from contact or communication with more than one or two other prisoners who may share the same cell. Many men are kept in solitary confinement. As they are moved around in the prison to pick up food, empty toilet buckets, wash, etc., they are carefully shepherded so that one prisoner or group of prisoners seldom encounters another.

At infrequent intervals, certain prisoners have been allowed to write to their families, although few letters ever reach home.

That the prisoners are allowed to write at all, and that they are accorded other elemental amenities, may likely be because the so-called "Hanoi Hilton" is anything but typical.

PROPAGANDA SHOWPLACE

U.S. officials, with reasonable suspicion, regard the "Hanoi Hilton" as a propaganda showplace. While foreign newsmen have "seen" prisoners, who have been transported to a central location for that express purpose from at least eight other camps, the "Hilton" is the lone place outsiders have been allowed to enter. And it is the only prison from which U.S. prisoners have ever been released. Obviously, the open-door policy at only one prison creates real doubt that the North Vietnamese can afford to let the world, and in particular the neutral nations, see the conditions that prevail elsewhere.

No prisoner has ever escaped from the prisons of North Vietnam. Those who have managed to struggle back to freedom from the VC jungle camps add up to fewer than two dozen (the specific number is classified). And the Communists have been extremely callous when it comes to returning American prisoners. To date only a handful has been set free. Sixteen have been released by the Viet Cong, nine by Hanoi.

Procedures followed by Hanoi in releasing prisoners are particularly meaningful since North Vietnam has been the bellwether in establishing what might be regarded as overall policy guidance in the treatment of prisoners elsewhere. And it is in North Vietnam that the greatest number of men are believed to be imprisoned. Of the more than 1,400 captured and missing, nearly 800 (mostly pilots) were downed over North Vietnam. The Defense Department believes "a substantial percentage of the missing" may be prisoners.

POW RELEASES FOLLOW PATTERN

All the prisoner releases by Hanoi—two last year and one this August—have followed a similarly disturbing pattern. First, they have been but token gestures, letting just three men out at a time. Second, they have been accompanied by blatant propaganda announcements in the guise of either "humanitarianism" or "good will," or coupled with some "special" day. Third, the names of the men to be freed are withheld for periods of more than a month, thus creating untold agony for thousands of hopeful next of kin. Fourth, releases are carried out through dissident U.S. intermediaries instead of the International Committee of the Red Cross, the traditional go-between in matters affecting war prisoners.

As a condition of each of the three prisoner releases, Hanoi has insisted that U.S. pacifist groups be sent to North Vietnam to take custody of the prisoners and accompany them out of the country.

After a protracted wait, the identities of the prisoners are presented to the world in a staged ceremony. Finally, they are allowed to depart for home with their pacifist countrymen, who are merely used by Hanoi in a grossly overt effort to foment further unrest among American citizens and abet military critics abroad.

The first two prisoner releases took place last year. Three men were released in February, three more in July. All six were "short termers"—that is, men who had been held prisoner for relatively brief periods of time.

The February 1968 group consisted of two Air Force officers, Lt. Col. Norris M. Overly and Capt. John D. Black, and twenty-three-year-old Navy Lt. (j.g.) David P. Matheny. None had been in captivity as much as six months. Lieutenant Matheny had been captured only four months earlier.

The three prisoners released in July 1968 were all Air Force officers: Maj. James F. Low and Capt. Joseph V. Carpenter, imprisoned for seven and six months, respectively, and Maj. Fred N. Thompson, captured less than four months before.

The man designated by Hanoi as the principal go-between for the releases is a fifty-four-year-old pacifist named David Dellinger, Chairman of an organization known as the National Mobilization Committee to End the War in Vietnam, he has traveled frequently to Communist bloc nations and to North Vietnam. Currently, he is under indictment on charges of conspiring to incite a riot in Chicago during last year's Democratic Convention.

As the main contact in the prisoner releases, Dellinger, in turn, has named other US pacifists to act as "escorts" in bringing the prisoners out of Hanoi.

THREE RELEASED IN AUGUST

The most recent release—three men, again—came in August of this year and illustrates how completely Hanoi milks the prisoner situation for its own purposes. However, it marked a minor breakthrough of sorts. For the first time, North Vietnam released prisoners who had been held captive for fifteen to twenty-eight months.

The new policies of the Nixon Administration may have had something to do with the release of the longer-term prisoners. Publicity about two of the men had been widely aired by DoD several months earlier.

Like the two preceding releases, the third also was carried out under the banner of David Dellinger. On this occasion, he designated a somewhat ragtag escort group. The group was substantially larger than any previously dispatched. There were four escorts. They took along three cameramen.

Leader and spokesman was Rennard C. Davis, twenty-nine, National Coordinator of Dellinger's National Mobilization Committee. A member of Students for a Democratic Society, Davis is also under indictment on charges growing out of the Chicago riots. He had to obtain a court ruling in order to leave the country.

With Davis in the escort group were Linda Sue Evans, twenty-two, an SDS regional organizer; Grace Paley, forty-six, a member of antiwar and antidraft organizations; and James Johnson, twenty-three, Negro, former GI who served a stockade term for refusing to fight in Vietnam. The three cameramen, from an underground movie-making outfit, were identified as Robert Kramer, thirty-six, an SDS member during a stint at Columbia University; Norman Fruchter, thirty-two; and John B. Douglas, thirty-one.

TEAM FLEW TO HANOI

The seven-member team flew to Hanoi in mid-July, about two weeks after North Vietnam announced plans to release the prisoners. For the next couple of weeks they received Hanoi's "grand tour," were escorted on a 500-mile trip into the DMZ, met with the Prime Minister, and were ultimately entertained at a farewell party well-oiled with rice liquor and propaganda.

At the farewell ceremony, according to details churned out by the North Vietnam News Agency (VNA), the prisoners were "handed over . . . to the American antiwar delegation" with a Madame Bui Thi Cam denouncing the "monstrous crimes" perpetrated by the "U.S. imperialists" who had destroyed towns and crops and "massacred . . . women, children, and old folk."

She said US pilots "caught in the act of committing grave crimes" are not entitled to the protection of the Geneva Convention, but are, nevertheless, treated "in accordance with the humanitarian policy of the government."

James Johnson, accepting the prisoners "on behalf of the American antiwar delegation," said, "We know, as these pilots must know, that all over the world the United States has been branded an outlaw nation." His statement, running some 500 words, might almost have been written by Hanoi.

The North Vietnam News Agency said, "The three released American military men then took turns in expresing, each in his own [way], their deep gratitude to the Vietnamese People, the DRVN government, and the Vietnamese People's Army, for this humanitarian act as well as for the humane treatment all of them had received throughout the period of their detention."

The names of the prisoners were revealed. Two were Navy men: Lt. Robert F. Frishman, captured twenty-one months earlier, and Seaman Douglas B. Hegdahl, imprisoned for two years and four months. The third was Air Force Capt. Wesley L. Rumble, held for fifteen months.

The prisoners and their escorts left Hanoi on August 5. Arriving in Vientiane, Laos, that night, they were seen for the first time by U.S. newsmen. They were described as "pale and gaunt," clad in "dungarees and sandals."

The press accounts noted that Frishman, acting as spokesman for the prisoners, selected his words "carefully." He said only that he was happy "to be returning home, to be back with my country and my wife."

There then followed a question-and-answer session. Here are revealing excerpts from Frishman's interrogation by the newsmen:

Q. How was the treatment you received . . .?

A. I received adequate food, clothing, and housing.

Q. Would you describe it as humane treatment?

A. Sir, I believe I have answered that question.

Q. Did they make any attempt to indoctrinate you or brainwash you in any way?

A. I have no comment.

Q. Was their treatment better at all when they decided you were going to be released?

A. As I say, my treatment has been adequate.

Q. Are you concerned that other prisoners might be harmed by something you might say here?

A. Yes. I in no way want to jeopardize any of the other people who have been . . .

The sentence trailed off.

When the prisoners arrived in Bangkok the following day, Frishman was quoted as saying, "It's great to be back." Nothing more. At some point during the return journey, Frishman had indicated the desire of all three men to be furnished with military clothing. "We left in uniform," he said. "We intend to return in uniform." The clothing was rushed to Frankfurt, last stop before New York.

ARRIVAL IN NEW YORK

When the three men arrived at Kennedy International Airport in New York, I was there to see them for myself. To television audiences, the returning prisoners may have looked reasonably well cared for. But their appearance on the hot, noisy flight line was deeply saddening.

When the general passengers and the pacifist escorts had disembarked, the families of the prisoners were allowed to board the plane for a brief reunion away from the eyes of the curious. Twenty minutes later, the men and their families began emerging.

There was no brass band, no flags, no clamoring throng to welcome them. Only a cluster of newsmen, cameras, government representatives, police, and a small crowd of onlookers.

Lieutenant Frishman, followed closely by Seaman Hegdahl, was first off the plane. Both wore their new uniforms, the Navy blue contrasting starkly with their drawn, pallid faces. Captain Rumble, ill, stooped, pale, was assisted down the steps, helped into a police car, and rushed to a waiting medical-evacuation plane.

The two Navy men and their families were led to a small platform, barren but for a gaggle of intertwined microphones. Uncertainly at first, and then with alert precision they returned the salute of Air Force Col. Milt Kegley standing nearby.

They were ashen in color. Their eyes were deep, hollow circles of darker gray, much like the exaggerated eyes of starving children. They smiled, but somehow their smiles seemed macabre; not forced, but not exactly real; joyful surely, but with an underlying tautness; perhaps nearer to tears than laughter.

Lieutenant Frishman once again spoke for all three men, repeating what by now had become his stock statement. They were happy to be home, they had received "adequate food, clothing, and housing" from their captors.

He, himself, had been "seriously wounded." The North Vietnamese doctors had removed his elbow and tied the muscles together. "I am glad to still have my arm," he said.

THE ARM WAS WASTED

It hung at his side, the loose sleeve of his jacket emphasizing that the arm was wasted, thin, far shorter than the other. When the suggestion had been made to him earlier that, "They'll fix it better at home," he replied, "Oh, no. They won't. It's impossible now."

Now, as he extolled the "adequate" treatment he and the others had received, and praised the North Vietnamese for saving his arm, Frishman voiced the "hope that there will be some more releases."

At his side, Douglas Hegdahl, once a robust heavyweight, continued to smile, his face almost skeletal. A reporter asked how much weight he had lost. He had "no comment."

But then Frishman addressed the microphones. "I lost forty-five pounds; Seaman Hegdahl lost sixty pounds," he said. It was the first detailed confirmation of their deprivations.

A newsman asked Frishman why the North Vietnamese had selected him for release in preference to some other prisoner.

"I am sure they released me for some reason . . . this reason I do not know," he said.

What about the welfare of other prisoners still held by Hanoi?

"No comment," Lieutenant Frishman said.

PRESS SESSION QUICKLY ENDED

The session with the press was over quickly, the final questions muffled in the roar of a nearby jet. The men were tired; they had been traveling for thirty-six hours.

"I want to be with my wife now," Lieutenant Frishman said. He placed his good arm around her. The prisoners and their families moved off the platform.

As Frishman turned, I saw him for the first time from the side. His shoulders were incredibly thin. The collar of his shirt hung loosely about his neck. The lines of his nose, his cheeks, and his chin were sharply drawn, haggard. So were Hegdahl's.

If the two men had been well-treated, there was nothing in their appearance to verify it. The almost corpse-like pallor of their skin, tightly stretched, almost translucent, mutely testified to long seclusion from the sunlight.

The men and their families moved to waiting transportation for the short trip to the medical-evacuation plane and the final leg of their journey to military hospitals. I turned with the other newsmen to walk back into the International Arrivals building for the meeting with the pacifist escorts.

We waited for an hour in a small, stuffy room intensely illuminated by bright klieg lights.

Finally, the pacifists straggled in, having been delayed in customs. The four escorts and the three cameramen gathered on a platform at one end of the room. By any standards, they were unprepossessing in appearance.

The leader and spokesman, Rennie Davis, was the most presentable, dressed in neat trousers and shirt, hair slightly long but combed and parted.

Peering from time to time at notes clutched in his right hand, Davis began a recitation of what the seven-member team had seen and done in North Vietnam. His monologue had little to do with the prisoners. It mainly emphasized the "devastation" that US bombing forays had inflicted on a "determined" and "unbeatable" people now instilled with a "mood of victory." The North Vietnamese believe, he said, that they have President Nixon "trapped."

He introduced Grace Paley, a short frumpy woman in a cotton dress. She said North Vietnam considers US prisoners criminals, but releases them to "show good faith" and as a demonstration of their "humanitarian" treatment.

PRAISE OF HANOI'S TREATMENT

Next up was Linda Sue Evans, young, blonde, wearing tightly fitting, flared blue jeans. "We believe," she said, "that North Vietnam should win." She praised Hanoi's "humane" treatment of the prisoners.

The young Negro, Johnson, principal pacifist speaker at the Hanoi ceremony, was next. He said with obvious pleasure that the North Vietnamese "feel they have defeated the United States."

Davis opened the press conference to questions.

"Are our prisoners being mistreated?" he was asked.

He had seen no such evidence. The group had met a "total of twenty-five to thirty all told," and had been informed by the prisoners that they had been protected within the very villages they had bombed, been given immediate medical attention, and "better" food than is provided for their guards.

He said continuing concern is voiced about the treatment of US prisoners, but he is more concerned about the treatment of prisoners from the other side held in camps in South Vietnam.

Davis was asked to comment on a statement by Secretary of Defense Laird that Hanoi's treatment of prisoners is in "flagrant violation" of the Geneva Conventions.

Davis said he thinks North Vietnam "legally regards the United States as an outlaw nation." (An interesting comment. James Johnson had used the same "outlaw" phrase in his Hanoi remarks, but attributed it to the pacifists themselves.)

"You say our prisoners are being treated humanely," I asked Davis. "How many prison camps did you visit?"

Repeatedly, he sought to evade a direct answer, but I kept hammering "how many prisons" at him. Finally he admitted he had "no information at all" about any of the prison camps.

The press conference produced nothing of any kind about the status of US prisoners held by North Vietnam. The pacifists had returned believing what they wanted to believe. They brought back no list of prisoners held by Hanoi, no hint that North Vietnam might consider changing its policy on prisoners.

Except for some 50 letters Hanoi had permitted them to carry home, they had returned only with an array of sugar-coated propaganda. They had swallowed whole as much as possible and stuffed the rest into their luggage.

The press conference could only raise serious doubts about the value of continuing to allow Hanoi the luxury of using such groups to bring back tiny numbers of prisoners. Some Administration officials, even some wives and families of prisoners and missing men, also are beginning to question the validity of this practice.

At the current exchange rate, it would take well over 400 years to get all of the men home. And the current release procedures, in the words of the Washington, D.C., *Evening Star*, are "a little like Oriental water torture—and just as humanitarian."

Twenty-five days after Frishman, Hegdahl, and Rumble reached New York, I went to Bethesda Naval Hospital in Maryland to hear the two Navy men tell about their prison life. Sunshine had improved their color; they had regained some weight. They were ready to open up.

Frishman recounted how he had been blindfolded after his capture and, despite serious injuries, driven in a truck to other locations where he was removed from the truck and stoned by the populace. When he reached the prison, he was refused medical treatment and told he "was going to die in four hours" unless he talked. He "finally passed out" and was taken to a hospital. "Then, even with my bad arm, they tied me up with ropes."

Doctors operated on his arm but failed to remove missile fragments. It was six months before the incision healed over. "I would wake up and find my arm stuck to the blankets . . . the scab would come off . . . the wound would drain again." One of his legs was left with "a seeping sore," still draining when he reached the U.S. almost two years later.

During much of his ordeal, Frishman was isolated in a tin-roofed cell, vented by "a

few holes." In forty-five-degree winter weather, he froze. In summer, it was "like an oven." Sometimes, he was forced to sit on a stool in the stifling room—"just sit . . . and sit"—until he passed out.

Early this year when interviewed by *L'Europeo*, his captors wrote out what he was to say and then "practiced" it with him.

Did they try to "fatten" him in his final weeks of imprisonment, I asked?

"Yes, they did." On July 4 they took him before the camp commander who "had a real nice table with some fruit on it. . . . I knew then that I was going home."

SOLITARY CONFINEMENT

Hegdahl, too, had been subjected to solitary confinement—in all, for more than a year. The longest stretch lasted "seven months and ten days."

He was permitted occasional mail, but the letters were rifled of enclosures (including money) sent by his parents. The lone package he was allowed also was plundered before it was handed to him.

For propaganda purposes, he was photographed "reading" a U.S. magazine which he was allowed to hold "just long enough for them to take the picture."

Frishman said he was threatened before his release. If he embarrassed North Vietnam, they would "have ways of getting even with me," he was told. He was cautioned "not to forget that they still have hundreds of my buddies."

But those still imprisoned want the facts out in the open, he said. One told him "not to worry about telling the truth," that if it means more torture, "at least he'll know why he's getting it and he will feel that it will be worth the sacrifice."

While North Vietnam's claims of "humane" treatment of the prisoners have failed to stand up to public scrutiny, it is equally apparent that Hanoi's policies and those of the Viet Cong have been cruelly lacking in compassion for the families of the prisoners and missing men.

Take Andrea Rander, whose hubsand, Army SSgt. Donald Rander, is held by the Viet Cong. He was first reported missing during the January Tet offensive last year. Four weeks later she was officially notified that he had been wounded and imprisoned. She has been waiting almost two years for a letter that has never come. She has great difficulty, she told me, in making decisions. "I keep putting everything off. I keep telling myself I will wait until Donald comes home. It's my way, I guess, of convincing myself that he will be back."

SPORADIC LETTERS

Billie Hiteshew, wife of AF Maj. James Hiteshew, who was captured by North Vietnam in March of 1967, has lived with the problem longer, but at least she has heard from her husband. She receives sporadic letters, including two this year. And she has seen photographs of her husband. Shortly after his capture, CBS purchased a film of Hiteshew—confined in a hospital with a broken leg and arm—being interviewed by Felix Greene, a British antiwar journalist. She watched her husband say he agreed with Senators who feels "we need to take another look at our foreign policy," a view she had never heard him express or even hint at before.

Evelyn Grubb's only knowledge of her husband came from a similar Hanoi propaganda gesture. An unarmed reconnaissance aircraft, piloted by AF Maj. Wilmer "Newk" Grubb, was shot down in January 1966 while a Christmas bombing halt was in effect. Hanoi gloatingly publicized his capture, conveniently obscuring the true nature of his mission. The day Mrs. Grubb heard of his capture, it was snowing, two of her three sons were ill, and she was three months pregnant. Each time she writes she tells him about their sons (there are now four; one he has never seen), and sends photographs of all of them stapled to the letter so he will know if they have been removed. She doesn't know whether he has received a single photograph or letter. In four years, she has had no further official word of her husband.

Elizabeth Hill is another wife I talked with. Only twenty-three, she was married to AF Capt. Howard J. Hill (both are AF "brats") in August 1967. Two weeks later he returned to Southeast Asia, and just before Christmas was shot down. Nine months passed before she learned that his capture had been confirmed. As she told me this, she smiled. "I can't help smiling," she apologized. "After Howard was missing for so long, I just have to smile when I say he is a prisoner." She has written faithfully for almost two years, but there has never been an answer.

Although regular exchange of mail between prisoners and their families is guaranteed under the Geneva Conventions (even when two countries are not formally at war), the Communists have permitted only a trickle of letters to flow out of North Vietnam.

Efforts of the American Red Cross and the International Red Cross to improve the situation have been essentially futile in the face of Hanoi's obstinance.

NO INSPECTIONS PERMITTED

Not only has North Vietnam rejected Red Cross efforts to establish improved flow of mail and packages to and from US prisoners, and to permit inspections of their prison camps, but they persistently have refused to even acknowledge the existence of, or accept mail from, their own men held as prisoners in South Vietnam. The latter camps are regularly inspected by the neutral International Committee of the Red Cross, and names of all captured North Vietnamese and Viet Cong solders are prepared for Hanoi and the VC, but are spurned.

Although the Red Cross has tackled the problem again and again through all potential channels (even seeking help from the USSR)—and keeps on trying "all the time," according to ARC Vice President Robert Lewis—most of the effort has fallen on deaf ears.

Mr. Lewis says the Red Cross also has made it clear that it is prepared to send representatives to Hanoi at any time to accept released prisoners, but the North Vietnamese prefer to stick to their practice of using dissident go-betweens.

MAIL FOR PRISONERS

Mail for all prisoners and missing men is sent through a variety of channels and addresses. Some is handled by the Red Cross, some is mailed direct to foreign post offices, but little is known to have reached the men to whom it is addressed.

Letters written by the prisoners themselves have fared somewhat better because of their propaganda value. But none ever has arrived in the States from prisoners held by the Viet Cong. And fewer than 100 men held by North Vietnam have been allowed to write over the past five years. The average for this small group has been less than two letters a year.

Currently the letters from prisoners are written on a prescribed form, about five by seven inches, which makes its own envelope when folded. Six lines are provided for the message. Instructions tell the prisoners to write "legibly and only on the lines" and "only about health and family." The form states that "Letters from families should also conform to this pro forma."

Not all wives and parents abide by the advice, but many, like Gloria Netherland, do. Forms are provided by the armed forces. All carry a mailing address in the Vietnamese language reading: "Camp of detention for US pilots captured in the Democratic Republic of Vietnam."

But for most families, whether they use the six-line form letter or a longer page, the return on their investment is slim at best.

For families of men listed as "missing," even the lack of mail might be bearable if Hanoi and the VC would release the names of all prisoners. But they have consistently refused. Some US Senators say Hanoi "could devise no subtler cruelty."

While no solution to either the mail problem or the list of missing is in sight, the US armed forces, meanwhile, do what they can to ease the plight of the next of kin.

It is not a simple job, nor has it always received top marks in every area, but as the list of prisoners and missing has grown and as the services have learned from past mistakes and found out more about what the families want and need, they have moved increasingly into programs that now garner well-deserved praise.

All of the wives I talked with feel that their husband's service, as one put it "is doing everything humanly possible."

NOTIFYING NEXT OF KIN

In the early days when a man was captured or turned up missing, next of kin sometimes were advised by telegram. This impersonal approach proved highly unsatisfactory and has long since been abandoned.

Today when catastrophe strikes, a service representative is sent to the home to call on the family, break the news in person, give whatever details are immediately available, and offer such solace and assistance as he can provide.

Either this representative or another is thereafter permanently assigned as an "assistance officer" for all future contacts. He makes sure the families are informed of breaking developments, if any; answers their questions, or refers the queries to someone who can; and ensures that they receive such legal, financial, or other aid as they may require.

The main Air Force effort is performed from the personnel center at Randolph AFB, Tex. Service is available twenty-four hours a day, seven days a week, and next of kin may make collect telephone calls any time, day or night.

Families are told everything the services can tell them about the circumstances surrounding the capture or disappearance of the man. Any subsequent news is passed along as quickly as it is received.

On a broader front, all services have put together special informational programs for the next-of-kin to keep them informed about over-all prisoner developments. These most often take the form of newsletters. But the Army's Adjutant General, Maj. Gen. Kenneth G. Wickham, writes a personal, individually prepared letter to each Army family once a month.

The letters and newsletters are supplemented by personal meetings with individual family members or with groups. This practice was instituted early by the Navy, but has now been made uniform for all services, under expanded policies of the Nixon Administration.

Beginning this past spring, group meetings were instituted under the aegis of a joint Defense/State/military team, with families from several services attending at a central location for each given area. At the meetings, the next of kin receive a full briefing on the prisoner problem.

Much of what they can be told is not new, but it has demonstrated to the satisfaction of many, if not all, of those attending that the government is giving the prisoner problem priority consideration, and sincerely wants, and is trying, to help in every way possible.

MEETINGS WITH NEXT OF KIN

The meetings have been spread all across the country. Scheduled mostly at Air Force bases, they are generally held in Service or Officers Clubs, in an informal atmosphere, with local volunteer-wives serving coffee or

punch to the families—normally about 100 wives and parents.

One meeting held at Bolling Air Force Base near Washington, D.C., was attended by Ambassador Henry Cabot Lodge (home to report to the President). He told the group what was happening at the Paris peace table. Another briefing session was conducted at the Pentagon itself. Defense Secretary Laird met and talked with the families.

One member of the briefing team, Deputy Assistant Secretary of Defense Richard G. Capen, Jr., said, "We are always frank about telling the families there have been no great breakthroughs. I review the over-all situation; Frank Sieverts [State Department representative] discusses the Paris talks and other State Department efforts conducted through diplomatic channels. Then we spend the remainder of the time, about an hour or an hour and a half, responding to questions."

Mr. Capen says reaction to the briefings has been excellent. Sometimes "wild suggestions" are offered or family members give vent to angry frustration. ("Some cannot understand why we learn so little about the men.") But the meetings, Capen feels, have been extremely useful and have helped to partially satisfy the yearning of many families for some closer contact with their government in Washington.

He has been through many heartrending conversations, but what remains most vividly in his mind is the meeting at which one wife stood up and declared, "I want my husband back, but I don't want to give my country away to do it."

Most of the families, he says, "have real understanding and appreciation of the problems. We want to assure them that when the men do come back, we will be in a position to say we did all we could." He thinks most of the families now feel, if they didn't before, that this is the case.

In addition to the programs designed for the next of kin, the armed forces also carry out certain procedures for the prisoners and missing men themselves.

All, for example, are considered for promotion at the time they normally would have been considered if not in captured or missing status. Their full pay and allowances are continued indefinitely, and they receive whatever general pay increases are authorized for others on active duty. Allotments the men provided for their families are increased as needs dictate.

New laws also have been enacted, and others are being sought, to protect rights of the men that might otherwise be jeopardized.

The military "savings deposit" program, for example, encouraged overseas servicemen to bank a portion of their pay in high-interest accounts as a means of cutting down on the US gold-drain. But the law contained no provision for men who were captured or reported missing. This inequity was corrected only to have a second develop. The maximum that can accumulate in such accounts is $10,000. Anything above that amount draws no interest. With deposits of some men now approaching or exceeding the ceiling, the Defense Department recently asked Congress for authority to invest "excess" amounts in the purchase of US savings bonds and notes.

Yet, despite these and other continuing efforts on behalf of the men and their families, it is all too apparent that the combined activities of the armed forces, the State and Defense Departments, the American and International Red Cross, and the efforts at the Paris talks have reunited few prisoners with their loved ones. Nor has there been any new hope for proper medical care of the sick and injured, neutral inspection of prison camps, full disclosure of the names of all captives, or proper flow of mail.

The new Nixon Administration initiatives are helpful, but only full and continuing exposure of the plight of the prisoners and their families, together with relentless public pressure at home and abroad, are likely to produce desired action.

An occasional newspaper editorial is not enough. Limited news coverage of developing prisoner stories is not enough. An infrequent letter-to-the-editor is not enough. A statement inserted in the back pages of the *Congressional Record* is not enough. A business-as-usual attitude on the part of the American pubic can only make apparent to Hanoi that these men who have given so much to their country have indeed been forgotten by those for whom they made the sacrifice.

Some wives of the prisoners and missing men have reached the same conclusions. Some are taking steps to counter public apathy, and to arouse the Congress.

Mrs. James Bond Stockdale of Coronado, Calif., wife of a senior Naval officer held by North Vietnam, has encouraged other wives to send telegrams to the North Vietnamese delegation in Paris, and helped to organize prisoner families. Mrs. James Lindberg Hughes of Santa Fe, N. M., wife of a captured Air Force lieutenant colonel, and Mrs. Arthur S. Mearns of Los Angeles, wife of a missing Air Force major, also have been urging the Congress and others to act.

Many of the wives are essentially satisfied that the services and the Administration are doing all they can. But some feel, as Evelyn Grubb says, that "there is a bargaining point for everything; we have to find it." The wives are convinced that more public pressure is essential.

Some have been particularly critical of the inaction by Congress. "Usually," Mrs. Stockdale has said, "they put something in the *Congressional Record* and then forget about it."

A check of the *Record* discloses that this practice was, until very recently, more or less standard. But there is hopeful evidence of a growing change—partly as a result of appeals by the wives, partly as a result of the more open discussion policy encouraged by the Administration.

In August, shortly before Congress went into brief summer recess, forty-two Senators banded together in a strong statement condemning North Vietnam for its "cruel" treatment of the prisoners and their families. Instigated by two opponents of our Vietnam policies, Charles Goodell (R-N.Y.) and Alan Cranston (D-Calif.), the declaration says if North Vietnam thinks it can "influence the policy of the United States toward the Vietnam conflict" through its intransigent position on the prisoners, it is "doomed to failure."

"Neither we in Congress, nor the Administration, nor the American people as a whole, nor indeed the families directly affected, will be swayed by this crude attempt."

Those signing the statement included both Democrats and Republicans representing thirty-three of the fifty states. Three names that might have added weight but were absent from the list of signatures were those of war critics J. William Fulbright (D-Ark.), George McGovern (D-S. D.), and Eugene McCarthy (D-Minn.).

The Senate statement ended with a specific plea to "the governments, the statesmen, and the ordinary men and women around the world" who spoke out in 1966 against Hanoi's proposed "war-crimes trials"—a plan that was abandoned by North Vietnam after a wave of world protest.

The Senators said those who protested in 1966 should "make their voices heard once more. Then, as now, the issue was not political but humanitarian—and Hanoi responded to the force of world public opinion. If that force can again be mobilized, this too may contribute to inducing from Hanoi greater respect for human decency and for the rule of law." On August 21, the North Vietnamese delegation in Paris vehemently rejected the protest as "slander" and an attempt "to deceive public opinion."

In the House of Representatives, Congressman William L. Dickinson (R-Ala.) sent a letter to his colleagues asking that they join him, after the August recess, in making floor statements protesting the treatment of our war prisoners.

Whether these moves are one-shot efforts remains to be seen. What members of both houses seem to have overlooked is the potential force of a Joint Congressional Resolution condemning Hanoi's prisoner policies.

Whatever action Congress may take, what will count most significantly is the time and effort the American people are willing to expend in helping solve the problem.

In my numerous interviews with government officials, representatives of the Red Cross, members of the armed forces, and next of kin of the prisoners, I asked each person what he or she thought would be the most effective attack that could be launched.

They agreed that a four-pronged letter campaign could produce dramatic results. The letters should be directed to:

Representatives of foreign nations;

Newspapers and magazines in foreign nations;

Members of the U.S. House and Senate; and

Xuan Thuy, chief North Vietnamese negotiator in Paris.

The letters to the foreign nations and the press in those nations should urge that pressure be brought to bear on Hanoi to live up to the spirit of the Geneva Conventions by putting into practice the Conventions' rules on the treatment of war prisoners.

The letters to Xuan Thuy should demand the same points. And those individuals who are not necessarily in sympathy with the war should make it clear that proper treatment of the prisoners is nevertheless an overriding consideration. All should note that continued intransigence on the part of Hanoi will only stiffen the resolve of the American public, not weaken it.

Letters to members of Congress (addressed to the Representative from your own congressional district and to either or both of your U.S. Senators) should call for a Joint Resolution demanding proper treatment for the prisoners and missing men, and stressing the solidarity of the nation in this aim.

HOW YOU CAN HELP

If you want to help, send a postcard to Air Force/Space Digest at 1750 Pennsylvania Ave., N.W., Washington, D.C. 20006, and you will be mailed a list of Washington, D.C. addresses of ambassadors of foreign nations whose assistance could be crucial, together with a list of selected foreign newspapers and publications.

Letters to Xuan Thuy can be addressed, in simplified form, as follows: Xuan Thuy, North Vietnam Delegation, Paris Peace Talks, Paris, France.

There is a chance—possibly a good chance—that world opinion might force Hanoi to honor basic codes of human decency.

"By any human standards," the position of North Vietnam is "totally inexcusable," Secretary of State William Rogers says. "I don't understand why we have not become more excited about the prisoner question."

The Secretary is telling the people of the United States that their concern is important. The rest is up to you. If you want to help the men many Americans have forgotten, you can. Your letter could be the one that spells the difference.

[From the Air Force/Space Digest, October 1969]

PEACE, LAW, AND OUR MEN IN HANOI

(By John F. Lossbrock)

There is an organization on Capitol Hill called Members of Congress for Peace Through Law. It is described in the *Con-*

gressional Record of September 3 by one of its members, Sen. Mark Hatfield (R-Ore.), who serves as chairman of the group's Military Spending Committee.

"This informal organization," said Senator Hatfield, "is a grouping of about eighty Senators and Representatives who have met together for several years discussing matters of mutual concern." Insofar as the Military Spending Committee is concerned, these "matters of mutual concern" encompass just about all of the major military hardware programs on the congressional docket. As the Senator from Oregon put it:

"These were the items which our committee chose to study: the proposed advanced manned strategic aircraft (AMSA), our continental air defense program, the antiballistic missile system, the Navy's attack aircraft program, the proposed F–14 aircraft, the chemical and biological warfare program, the new main battle tank, the level of our military manpower, the manned orbiting laboratory (MOL), the MIRV program for our strategic missiles, and procurement procedures."

To the great surprise of hardly anyone, the Members of Congress for Peace Through Law are against all of these things and can point to a modest number of victories, all of which to date have come about, however, through executive, rather than legislative action. MOL has been canceled, there have been stringent restrictions placed on chemical and biological warfare research, and Secretary of Defense Laird has announced manpower reductions. On the Hill itself, MCPL is not doing too well although there is still a large number of items that remains to be checked off their laundry list. The President's Safeguard ABM system was approved in the Senate, although by the narrowest of margins, and the additional aircraft for the C–5 program (a target for MCPL under their category of "procurement procedures") passed the Senate by the thumping majority of 64 to 32. But there are many battles yet to come.

We recognize, of course, the right of the members of MCPL to interest themselves in whatever they deem important, and certainly their list of interests represents an imposing array of things to be against. Encouraged by the words "Peace Through Law," however, we would like to suggest an additional "issue of mutual concern" to which these, and all, legislators might address themselves—an issue in which the potential cost-benefit ratio is highly favorable.

No one interested in Peace Through Law could fail to be deeply moved by the plight of the approximately 1,400 American servicemen who are either known to be in the hands of the North Vietnamese or Viet Cong or who are carried as missing and possibly prisoners of war. Their story is told with compassion and in great detail in the article beginning on page 38 of this magazine.

In it, author Lou Stockstill points out that, in defiance of international law as represented by the Geneva Conventions, which North Vietnam and 119 other countries signed in 1957, Hanoi has refused to:

Permit neutral inspection of its prisons;

Release the sick and the wounded;

Allow the exchange of letters and packages; and

Protect U.S. prisoners from public abuse.

From the handful of prisoners who have been released to date—sixteen by the Viet Cong and nine by Hanoi—has come evidence of mistreatment—solitary confinement, bad food, execrable medical care, looting of mail, and torture. Perhaps worst of all has been the exploiting of released prisoners for propagandistic ends, with the full cooperation of some members of the American New Left who have seen to it that Hanoi got its full propaganda dividends.

There is no implication here that all Congressmen and Senators who oppose the Vietnam War or who are critical of military spending policies are distinterested in what is happening to our prisoners of war in Vietnam. Indeed, as author Stockstill points out, two such critics, Senators Charles Goodell (R-N.Y.) and Alan Cranston (D-Calif.), headed a group of forty-two Senators who, last August, signed a strong statement condemning North Vietnam and pointing out that, if its treatment of prisoners were designed to influence U.S. policy in Vietnam, Hanoi would be deeply disappointed.

What we do feel, and this applies not only to Congress but to the American people as a whole, is that very little thought, very little effort, very little activity of any kind is being directed toward the ends of right and justice insofar as these prisoners are concerned. And it is ironic that so many of those who are concerned about paring the military down to size, who are interested in peace, and law, and justice in the abstract, cannot get at least equally indignant about our men in Hanoi.

Mr. Stockstill suggests some action that any one of us can take to help. We hope his words are heeded, by the Members of Congress for Peace Through Law and by all the members of Congress.

THE PESTICIDE PERIL—LXIX

Mr. NELSON. Mr. President, Gov. Marvin Mandel, of Maryland, is to be commended for his progressive leadership in the campaign to improve the control of persistent pesticides. He has constantly stated his deep concern about the serious threat to our environment and to human health from the continued use of DDT, and has initiated significant action in Maryand to eliminate the threat.

According to an article published in the Washington Post of October 12, Governor Mandel has asked Secretary of Health, Education, and Welfare Robert Finch to urge the World Health Organization to conduct a new study of DDT and related persistent pesticides. The Governor also announced the establishment of an eight-member State Advisory Committee on the Effects of Pesticides on Man and His Environment.

In another article published in the same issue of the Post, it was announced that Delegate Mary Marshall, of Arlington County, Va., has introduced proposed legislation to ban DDT in Virginia.

State bans have already been imposed in Michigan and Arizona, and many other States are actively considering similar proposals. The action taken by Governor Mandel and Delegate Marshall may soon add Maryland and Virginia to the list.

I ask unanimous consent that the two articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

GOVERNOR MANDEL ASKS GLOBAL DDT STUDY

(By John Hanrahan)

Citing "new evidence" that widespread use of DDT poses a "potential global health threat," Maryland Gov. Marvin Mandel called yesterday for a new study of the pesticide by the World Health Organization.

In a letter to Robert H. Finch, Secretary of Health, Education and Welfare. Mandel stated he has "become increasingly concerned that continued use of DDT and similar hydrocarbon pesticides is posing a serious threat to human life, wildlife and waterfowl."

Mandel urged Finch to use his "good offices" to prod the World Health Organization into undertaking a new study.

The governor told Finch that his letter was prompted by "recently gathered scientific data" that show "the potential hazards of DDT by tracing its patterns of use and flow from one continent to another by various modes, thus endangering the lives and food supplies of many more people than those in its immediate area of application."

"For example," Mandel wrote Finch, "when a farmer in Europe, where these 'hard' pesticides have been in extensive use, applies the chemical to his crops, some of the molecules are destined to accumulate in the citizens of Maryland and other seaboard states.

"As you know, several European countries recently have become alarmed over the dangers of DDT and suspended its use."

Two months ago, Mandel told the nation's manufacturers of the DDT line of pesticides "to eliminate dangerous elements from their products or face having them outlawed in Maryland."

Although acknowledging that "significant public health progress has been made" through the use of pesticides, Mandel told Finch "perhaps . . . we should pursue to a larger degree scientific research so that safe and inexpensive alternatives could be developed."

In releasing his letter to Finch, Mandel also announced appointment of an eight-member Advisory Committee on the Effects of Pesticides on Man and His Environment.

The committee will study and monitor the residual effects of DDT and other pesticides on Maryland citizens and the state's crops, livestock, fish and wildlife.

Members are: Dr. Cornelius W. Kruse, chairman of Johns Hopkins School of Hygiene and Public Health; Thomas D. McKewen, assistant commissioner of environmental health services, State Health Department; George W. Schucker, assistant commissioner of sanitary services, Baltimore City Health Department; Dr. Barton Childs, medical geneticist at Johns Hopkins Hospital; Dr. Emanuel Kaplan, chief of the division of biochemistry, State Health Department; Dr. Charles P. Ellington, director of the State Board of Agriculture; Dr. Matthew Tayback, assistant secretary of the State Department of Health, Mental Hygiene and Scientific Affairs, and Dr. Eugene J. Gerberg, president of Insect Control and Research, Inc.

STATE DELEGATE TO PROPOSE BAN ON DDT SALES

Del. Mary Marshall (D-Arlington County) said yesterday that she would introduce a bill in the 1970 session of the General Assembly to ban the sale of DDT and its derivatives in Virginia.

She said her plan had the support of the other three Arlington Democratic candidates for delegate seats.

Speaking at a campaign meeting at the home of Del. William M. Lightsey, Mrs. Marshall said, "DDT isn't just a killer of insects, an insecticide; it's really a killer of life, a biocide."

Noting that all Virginians have at least 10 parts per million of DDT in their bodies, she said, "No one is entirely sure what this means. She called on all Virginians "to do their part in pushing DDT, the compound of extinction, into oblivion."

PROPOSAL TO LOWER VOTING AGE TO 19 IN OHIO

Mr. SAXBE. Mr. President, on November 4, the electorate in Ohio will decide whether the minimum voting age should be lowered to age 19. Chester T. Cruze, one of the cosponsors of this resolution, has asked me to place his remarks in the CONGRESSIONAL RECORD. I ask unanimous

consent that they be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

AMERICAS YOUTH—TOO YOUNG TO VOTE?

On November 4, 1969, the voters in Ohio and New Jersey will be given the opportunity to amend their respective state constitutions,[1] in Ohio enfranchising young people at 19, and in New Jersey at 18. It has been a long fight in those particular states, and is a fight that will spread across the country in years to come.[2]

The real issue is: "Are 18, 19 and 20-year olds really incompetent", and should the older generation "show them" that they must "graduate", not only from high school, but "mature" for three years before they can claim citizenship—or shall the efforts of those in Ohio, New Jersey and those other states who have manifested their political maturity be rewarded with that valued prize—the vote.

The history of the American franchise has been one of constant expansion ever since President Andrew Jackson in 1830 advocated the abandonment of property ownership as a voting qualification. The expansion of the franchise continued after the Civil War and proponents of expanding the franchise saw the passage of the 14th and 15th amendment to the U.S. Constitution which finally brought suffrage for the American Negro. The 19th amendment, fought for in the 1920's, brought the franchise to the American women and in the 1960's Americans again acted to enlarge the franchise by eliminating the poll tax as a qualification for voting.

In preparing the legislation, the fight for Women's Suffrage was reviewed and noted; opponents claimed women were too emotional and too stupid to vote. The dire results predicted have not materialized. It is obvious that similar charges against young people are equally fallacious.

There are two basic issues that ought to govern qualifications for voting. The first is that voting is a public decision, not merely a personal right. It is the act by which the people choose men to occupy public offices and to govern the community. From this point of view, the question is whether lowering the voting age will tend to produce an electorate that is superior to the present one and better qualified to choose honest and capable public officials.

The other issue is this: No segment of the community should be excluded from the electorate, if its rights and interests cannot be adequately safeguarded by an electorate of which it does not form a part.

Pro and Con discussions are waged on a number of levels; some appealing to the intellect and others not. "If you're old enough to fight, you're old enough to vote" is perhaps the number one phrase used by proponents of reduced voting age, not because they see it as a super-relevant statement, but because it sells.[3] That is the job to be done, to sell the idea, on a non-partisan basis.

President Nixon in March 1969 stated the more relevant pro reason: "I favor voting at 18 not because, as many say, 'If you're old enough to fight you are old enough to vote,' but because you are smart enough to vote . . ." Today's young people are smart enough to vote, not only because of their formal education, but because of the areas of political involvement that are open to them. The public media of television, radio, the increasing numbers of politically oriented reasoning matter, etc., factors omnipresent in everyone's lives sometime give young people, I am ashamed to say, a better understanding of issues and problems than many of their elders.

The average 18 to 21 year old is a high school graduate.

He has intensive knowledge of the world around him, and the breadth of his knowledge and even of experience is far more than the great majority of our populace had during any previous generation—certainly far more than previous generations. People should acknowledge the product of excellence in education by bringing youth into full participation in public decisions.

A prime pro argument, seldom heard, is that in the immediate post high school years a young man will decide just which way he will go in his life. The U.S. Census Bureau backs this idea up and terms the years from 18–25 as "the ages at which adult roles and responsibilities are assumed." Not only can the habit of voting be matured in those important years, but a young person can discover a way to vent his political feelings, in a sedate and peaceful way—the vote. For example, New York Senator Jacob Javits notes that political activism among 18 to 21 year olds is "all happening outside the existing political framework."

Therefore, he and others of his persuasion, feel that enfranchising 18 year olds would bring that activism within the acceptable democratic framework for instituting social and political change.

In the same vein, Dr. Thomas E. Shaffer, Professor of Pediatrics at Ohio State University, feels that "a lot of irresponsibility (among 18–21 years olds) is the result of not being given responsibility in the first place." Thus, in his estimation, giving the vote to 18 year olds would be a vote of confidence in their ability to assume political responsibility, thus encouraging them to exercise such responsibility wisely.

Also several million young women and more than one million young men 18 to 21 years old have established homes and families but have no vote on the issues at city hall, the courthouse, or the capitol.

A more basic argument is that 18, 19 and 20 year olds pay taxes and in numerous areas of law are considered adults at present. "Taxation without representation is tyranny" applies to the twentieth century as it did to the eighteenth century. Young adults pay heavily in sales, use, gasoline and income taxes. Beyond the idea that the young help support government monetarily, it is easily seen that there is a legal inconsistency—seeing law enforcement as an adult province, while the privilege to vote is withheld as being beyond youth's capabilities. A person is responsible to the law—but not responsible enough to make law in the representative sense.

Most, however, are committed to it, because of the therapeutic nature it will have upon this country. In a society that is adding to its longevity but also to its youth population, the average age 27.7. Yet the average voter's age is 45. How can a nation sustain itself when such a large share of its population has no voice in choosing its government?

Though no organized opposition has yet formed, the "silent vote" is feared by all supporters of a lowered voting age, and it is their task to dispel words such as "ungrateful and immature." These words are currently being leveled at the younger generation, while they should actually be directed at the small percent who have earned such a name.

The Con discussion invariably begins with those persons who are in the political activision of 18 year olds dangerous tendencies that should not be given political expression. For example, they fear that 18 year olds would tend to vote for extreme leftist parties and issues, and presumably their vote could not be balanced by the more conservative voters of their elders. Some even see such philosophies as "anti-adultism" being translated into political policy. There is a hesitancy to unleash a new tool to those people in our society who riot, disturb the peace generally, and appear ungrateful to the past generations who so painstakingly constructed this country to be the finest in the world.

These same people who will vote against the issue see the further consequence of allowing persons as young as 18 or 19 to hold office or be inconsistent suggesting less than true confidence in the work of majority rule. However, the Founding Fathers felt that a person should be 25 years of age to be a U.S. Representative, 30 to be a Senator, and 35 to be a President, which certainly indicates they saw no major problem with an "inconsistency" between being able to vote for an office and actually holding one.

Tied to the issue, is concern from both parties that the new voters would register more in one party than another, a thought which is easily dispelled by several polls.[4] Partisanships on the issue, nevertheless is better kept, out, placing country above party or personal gain.

[1] The authority of the states to determine voting qualifications is embodied in the 10th amendment of the U.S. Constitution providing that any power not specifically granted to the federal government, nor denied to the states, is reserved to the respective states or to the people. The 14th amendment protects against the denial of suffrage to persons twenty-one years of age, but it does not purport to set twenty-one as the legal voting age.

Every state, except West Virginia, has a constitutional provision setting an age qualification upon suffrage. Therefore, any state changes in the age qualification to vote would require a constitutional amendment in the other forty-nine states.

[2] Mexico may beat the U.S. to the punch giving 18-year-olds to vote. The change is now under study. President Diaz Ordaz likes the idea. He says youngsters today are better prepared to vote at 18 than his generation was at 21. More than 58 percent of Mexico's population is under 21, with 3 million between 18 and 21. With youth clamoring for change, the President says, the vote could head off possible future violence.

[3] U.S. News & World Report disclosed that of the 34,000 U.S. Servicemen killed in Vietnam since 1961, about half of them were too young to vote in most states.

[4] A George Gallup poll revealed the following breakdown:

George Gallup Poll

	Percent
1 to 29 years:	
Republicans	22
Democrats	38
Independents	40
29 to 49 years:	
Republicans	25
Democrats	44
Independents	31
50 and older:	
Republicans	30
Democrats	46
Independents	24

An examination of the results by other groups among those 21 to 29 shows the democratic party with an advantage in each case except among persons with a college background, where party allegiance is evenly divided.

Independents among young voters are found more frequently among men than women, white persons than Negroes, and the college-trained than persons with less formal education.

The political affiliation of persons in their early twenties (21 through 24) closely parallels the results for persons in their late twenties (25–29), although the proportion of Independents is slightly lower among the older group.

The political question is really neutralized since both parties support it, but you will still hear that it is generally recorded by political scientists that newly enfranchised voters are, for a period of time, grateful to the party that enfranchised them. The Whigs made a big thing of it during the 19th century in England, as did the Republicans and then the Democrats in the United States in vying for the Negro vote.

The drinking issue too is drawn into the discussion, many persons being hesitant to vote for Vote 18 or 19 if it allows people that young to drink hard liquor. The fact here, is that the drinking age is determined solely by statutory enactment, i.e., acts of the legislature.

The pocketbook certainly cannot remain divorced from any political issue and we find this true with the voting age discussion. Many persons fear that the young voters would vote unnecessary and additional taxes—a thought buried by political scientists in Kentucky and Georgia, both states with 18 year voting.

It remains only to be said, that the reasoning of those who favor the lowered voting age is extremely logical, they look at the increased responsibility; the de facto situation of the young person in this modern, complicated society. They stare in wonder at the changes of society as every newer and closer (to them) generation takes responsibility and they wonder why they are excluded. Is the age of knighthood, *"21"* an extremely arbitrary determination, to remain the institution it is? Will those who ask for a change be successful in persuading a majority of the electorate that it will be a competent and equitable change or will we force them to the streets.

NARCOTICS AND DANGEROUS DRUGS

Mr. MONTOYA. Mr. President, each and every time that we pick up a newspaper, there is, inevitably and unfortunately, an account of a murder, robbery, rape, or aggravated assault, both in our Nation's Capital and throughout the United States. My own State of New Mexico is no exception.

The 1968 version of the FBI report entitled "Crime in the U.S." documents that in 1968 almost 4.5 million serious crimes were recorded, a 17 percent rise over 1967. The reason for our crime increase has been due to an increase in the use of narcotics and dangerous drugs. Addicts and chronic users of dangerous drugs increasingly resort to crime to obtain the necessary money with which to support their drug habit.

Recently the Albuquerque Journal published an article about the war on narcotics along the Mexico-United States border and underscored the serious overall implictations of the problem of crime and the use of narcotics and dangerous drugs in the United States. According to the article, Assistant District Attorney Donald J. Wilson, of Albuquerque, estimated that 75 percent of all burglaries in Albuquerque are committed "either by addicts or people who have been addicts." Clearly, then, our crime problem is not only a problem of better law enforcement but of preventing a situation—such as drug addiction and use—from occurring.

Of course, there are other reasons for the increase in crime, such as crowded, unfit conditions in our major metropolitan areas, inequitable distribution of opportunities for our citizens, and the like. One thing that I believe will contribute to curbing the crime problem, and that relates to the drug abuse problem, is the urgent need for establishing drug-abuse prevention and rehabilitation centers. A bill I introduced on July 10 would provide the authority and funds to States for that specific purpose. It is my hope that the Committee on Labor and Public Welfare, under the able chairmanship of the Senator from Texas (Mr. YARBOROUGH), will act favorably on the measure.

The FBI reports that narcotics and dangerous drugs arrests were up by 64 percent in 1968 over 1967. This increase was primarily due to the greater number of users among people 18 years of age and under.

The crime problem in the United States must be attacked on all fronts, by improving our law enforcement efforts, improving our court administration, improving our penal system, and improving and revising our educational system. I believe that information and education rather than repression and ignorance of the facts of life concerning the inherent dangers of harmful narcotics and dangerous drugs are the most intelligent ways to discourage the indiscriminant use of drugs among our youth. The use of narcotics and dangerous drugs does no good to the individual, threatens the entire social structure, and therefore our society.

So that others may share my thoughts on this subject I ask unanimous consent that an address made recently on narcotics and dangerous drugs be printed in the RECORD together with the October 1969 article published in the Albuquerque Journal.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

REMARKS BY SENATOR JOSEPH M. MONTOYA, NARCOTICS AND DANGEROUS DRUGS PREVENTION SEMINAR—ALBUQUERQUE, N. MEX.

Thank you, Jim, for that introduction. And thank you, ladies and gentlemen, for the fine turnout.

There are many people who were responsible for making this Seminar possible, and I would like to begin this morning by thanking them. I want to thank the Disabled American Veterans, Cutting Chapter #3, and the New Mexico Medical Society for their invaluable advice, assistance and support; and I want to recognize the Federal Bureau of Narcotics and Dangerous Drugs for their technical advice and assistance, and for making it possible for us to have their fine personal representation at the Seminar, and the National Institute of Mental Health for their support and assistance—their contributions are greatly appreciated. I also want to express my sincere thanks and appreciation to those of you who will be making formal presentations and last, but not least, I want to thank my staff for their efforts—especially Mark Greenfield—for his persistance and hard work.

Let us now begin the serious business. Why are we here today, and what can we hope to accomplish?

First, why a Drug Seminar? Others will go into it this morning in more detail, but I would like to answer that question briefly at this time. I believe we are all here today because there is a wealth of alarming evidence that the use of dangerous drugs generally, and particularly among our youth, is rising, and promises to continue to rise unless we—as responsible members of society and the community in which we live—do something to counteract the trend. That's it in a nutshell. No fancy phrases, no complex theories, just the plain fact that there is a drug use problem and it's on the rise. We can avoid the truth, we can return to the sanctuary of our homes and hide from the facts—but it won't do. It won't do each of us any good, nor our neighbors, nor the community at large. According to the figures I've seen, New Mexico ranks 10th in drug use in the nation, while ranking only 37th in population. Certainly this indicates we're involved beyond a small degree.

My concern is that our State, which is relatively undeveloped but has tremendous economic growth potential could be undermined by inaction and indifference to problems of the youth of our State. Population statistics show an ever increasing number of our young people migrate out of the State each year. Jobs are difficult to obtain here. There is so much to do that has been left undone. With all these basic developmental problems our State can ill afford to neglect to educate our children about the inherent dangers surrounding the use of narcotics and dangerous drugs.

The national crime statistics for 1968, made public this month, show an incredible and frightening increase in narcotics offenders among our youth. According to the report "Crime in the U.S." prepared by the F.B.I., in 1968 the number of violations of narcotics drug laws rose by 121% in the under-15 age bracket, and by 104% in the under-18 age bracket. According to the same report—one-half of all serious crimes in the U.S. were committed by persons under 18 years of age. And nearly one-fourth by persons under 15 years of age. The National crime rate has almost doubled in the last eight years, in 1968 there were 4.5 million crimes committed in the U.S., up 17% from 1967. Narcotics arrests in 1968 were up 64%. New Mexico shares in all these statistics.

According to the U.S. Senate's permanent Investigations Subcommittee and I quote, "next to professional gambling, most law enforcement officials agree that the importation and distribution of narcotics, . . . is organized crime's major illegal activity."

But more than illegal drug traffic is involved.

The impact of the ever-growing problem of drug abuse and addiction must be obvious to each one of us—not only does it destroy the lives of individuals who have succumbed to the habit through its physical and emotional effects, but also it threatens the destruction of our socley. An addict's physical dependence becomes the focus of his activities, leaving little room for considerations of job, family and worthwhile participation in the activities of the community. Supporting the habit requires huge sums of money, usually inaccessible unless obtained through illegal means, resulting in a high rate of robbery and assault.

The beneficiary of narcotics and dangerous drugs is organized crime syndicates. Profits from illegal narcotics trafficking is estimated at $350 million yearly. The losers are the American citizenry. Honest law-abiding citizens. I am convinced that we can, if we begin now, make it extremely difficult for organized crime to make a living through illegal narcotics traffic in New Mexico. If we do not act soon though, our State will spend each year more and more money on often futile police investigations while narcotics becomes the mainstay of a free society's worst enemy—organized crime. I am not for the perpetuation of crimes' major outlets of activity, such as professional gambling, loan sharking, infiltration of big business, takeover of legitimate unions—all of these act to subvert the democratic process and undermine our social structure. Illegal trafficking of narcotics and dangerous drugs will do this. We can deny criminals one avenue

of profit and promote a better America by educating our children about the dangers of narcotics and dangerous drugs.

Over the years the front line of attack against misuse of drugs has been the law. The Federal government has been searching for effective deterrents to drug abuse for at least 60 years, but as we can see the problem is intensifying. Stiff penalties accompany Federal drug laws—first convictions for buying, selling or possessing marijuana have penalties of 2 to 10 years and subsequent convictions have increasingly stiffer penalties. Federal laws banning the importation of dangerous drugs have been in effect since 1909. Most States have enacted their own drug laws; nearly all are very stringent. For example, in the State of Washington the penalty for the first offense of possessing narcotics is 5 to 10 years in the penitentiary plus a fine of $10,000. However, punitive measures alone are ineffective. In 1967 there were 95,417 arrests by Federal authorities for violations of narcotic laws. One F.B.I. study of persons who had been convicted on narcotics abuse charges and were released on probation, parole or mandatorily indicates a high rearrest rate; of those on probation, 71% were rearrested; of those paroled, 60%; of those mandatorily, 59% were rearrested.

Laws to control drug traffic are also largely ineffective. The Bureau of Narcotics and Dangerous Drugs reports that they impound only one-tenth of drugs being illegally imported. This does not include drugs from clandestine laboratories within the country. I think we should understand that no matter how comprehensive and extensive drug abuse laws are, they are useless unless enforceable. The scope of the drug problem in the United States today illustrates the laws are obviously unenforceable. The problem is getting more and more serious and it is time that we pursued additional approaches.

The additional tool which we need is education.

An intensive program of drug education at all levels of our society with contributions for our national, State, and local authorities is the only answer in arresting the spread of what is becoming national subculture.

What especially concerns me, as I have indicated before, is that the younger generation is rapidly gaining the title of the "drug generation." The age of drug users has dropped even to the elementary school level! The increasing tempo of drug use among students is starkly illustrated by this fact: while it took about ten years for illegal drug experimentation to spread from the intellectual-artistic groups to graduate students, it took about only 5 years for regular use to spread to the undergraduates, only two or three years to reach the high school level, only two years to reach the elementary grade school children! Illegal drug use is no longer confined to the liberal campuses of the East and West coasts or the large universities, but is as close as the school around the corner from your home.

The National Institute of Mental Health reports that in 1967 about 20% of all the Nation's college students admitted experience with marijuana. Most statistics are gained from local studies. One California study put drug experimentation by college students in 5 universities well above the 50% mark. A recent survey of San Mateo, California high schools was running about 26% with marked increases from 1968 to 1969. Another report estimated use of marijuana in Southern California high schools as over 50%.

I think we all realize that drug experimentation and regular use among young people of high school and college ages has developed into a fashionable and accepted phenomena. However, it is a mistake to think that today the acceptability of drug use and experimentation is confined to the peace-profession flower children—for it has broken the margins of our so-called conventional society. Today's middle and upper class high school students find fascination in drugs. Why? There are a number of conjectures—stories passed among peers of experiences with drugs, popular flouting of parental authority, a feeling of security in being involved in an "in" craze. Probably the most important realization we must come to as adults, educators, enforcement officials, guidance counselors, and parents is that drug use is acceptable to a large portion of the younger generation. Here then is the crux of the problem—our efforts must be centered on extensive education of our youth on the many dangers of drug use.

We can no longer avoid recognizing the problem of increased use of drugs by youth, and assume it will go away like any other "fad." Nor can the adult community crusade *against* use of narcotics and dangerous drugs with such enthusiasm that truth and objectivity are sacrificed to pure negativism. No bright young person will accept an anti-drug stand on the basis that he will be a "criminal" or an addict for life because of his experimentation.

As far back as 1963, the President's Advisory Commission on Narcotic and Drug Abuse included in its report strong recommendation for extensive drug education programs, to dispel distorted attitudes on drugs of the general public and many professional circles. The report also stressed the need for an enlightened educational campaign for the general public, and especially one for professional personnel whose activities touch upon some aspect of the problem such as physicians, lawyers, social workers, educators, and others. The Commission stressed that an educational program focused upon the teenager is the essential aspect of any program to solve the social problem of drugs. The teenager should be made aware that, although the world of drugs may seem exciting and offer an escape from the world around him (or in some cases entrance into his peer-world), in the long run drugs will destroy him and all to which he aspires. The Presidential Commission report completely rejected the notion that if the teenager is educated in the field of drugs it will tempt him to experiment. I think each one of us here is aware that temptation will reach the young person long before educators can. I believe strongly—that we should go on the premise that in our American way of life, the fundamental belief is that information rather than repression is always the better avenue to follow.

The final recommendation of the Commission was that it was the Federal government's role to see that a core of information and educational materials be prepared by the Secretary of the Department of Health, Education, and Welfare to provide the public and all professions involved with accurate knowledge on narcotic and drug abuse to combat misinformation. The information and educational materials would be developed by the National Institute of Mental Health and the Federal Bureau of Narcotics. They should be aimed at the many audiences involved—parent, teenager, college student, and professionals. This report stressed that the Federal government could do little else than supply these materials through the National Institute of Mental Health, and educational lectures and technical assistance from the Federal Bureau of Narcotics. It should be up to the States, municipalities, community groups and private organizations to use the Federal resources. I believe it is time we examined carefully their recommendations and determined what Statewide action should be taken.

Three years later, in 1966 the President's Commission on Law Enforcement and the Administration of Justice reported on the appalling inaction in the area of drug abuse education. The Commission recommended that educational aspects of drug abuse control be concentrated in a single Federal agency for greater efficiency. Last year a House of Representatives bill was introduced with this intent, but the measure was defeated.

I, and others in the Congress realize the inaction of the Federal government in this area has contributed to the continued unchecked rise in drug abuse.

The recommendations of the Presidential Commissions, medical societies, and private organizations has resulted in educational materials being produced—but not nearly enough implementation of Statewide education programs has been realized.

To this end I have introduced a bill in the U.S. Senate, S. 2592, entitled the Drug Abuse Control Act of 1969. If passed the Federal government will provide grant assistance for drug education programs through the Department of Health, Education and Welfare; it will charge HEW with the responsibility of disseminating educational materials to State and local agencies and non-profit private organizations; also, it will authorize HEW to provide advice, counsel, and technical assistance for drug abuse prevention programs; and will require HEW to issue an annual report on drug prevention programs. Both in the House and Senate this year the prospects for passage of a Drug Abuse Education bill are good. But passage of this bill will only provide the money and technical assistance to help implement a program. The impetus, and ultimately the success of a drug abuse prevention education program—will depend upon you. It will depend upon the individual initiative of each and everyone of you working through your respective organizations and groups to see to it that New Mexico responds to the need.

In this connection, and for purposes of discussion, elaboration, and I would like to offer the following suggestions for your consideration.

First, consider this Seminar as a beginning, hopefully, a beginning of similar, and naturally smaller seminars, in the State so that the information obtained here can be passed on to other groups, individuals, and of course to students.

Second, I ask that you consider the feasibility of establishing a Drug Abuse Prevention Studies Committee or perhaps as an alternative, you might consider the possibility of establishing a study Committee within the community, with representation from the schools in the area, the local governmental and enforcement officials, and appropriate civic and social groups. The purpose of the committee would be to determine the extent of the problem, and prepare a plan for an on-going Statewide Drug Prevention education program for the next five years.

Third, I suggest you identify a single State agency, that will be responsible for a Statewide drug prevention program. In the very near future any Federal assistance monies to be obtained will require a detailed proposal with matching State funds, and will require State professional staff assistance who will be responsible for administering the program.

Fourth, I ask you to consider carefully the experiences and proposals offered by today's Seminar participants and determine ways in which their recommendations may be adopted to New Mexico's needs.

Fifth, I recommend that you consider a broad program of teacher education be established, and that new curricula and teaching methods be developed for Statewide use.

I am sure there are many other ideas and approaches to be considered, and I look forward to today's proceedings for them.

SUMMARY

Drug education is not a responsibility of the public schools alone—but of all segments of the community—parents, teachers, law enforcement officials, physicians and nurses, social workers, and the students themselves. As responsible professionals and leaders of the community you can lead the way to community cooperation—you have the closest contact with the drug problem because you alone have daily contact with those involved. It is our responsibility to understand and educate young people. But, it will not suffice for drug education to stop with the student or stop in the schools. Only when our alienated young go home to an atmosphere of frank discussion, understanding, and a well informed older generation, will our preventive approach be of value.

Only by educating ourselves and our youth about the dangers of narcotics and dangerous drugs can we deal effectively with the rise in drug usage in New Mexico. In the final analysis it is this same approach—creative and responsive education—that will combat many of the social ills of our society. For if we continue—as we have in the past—to ignore the problems of our society—and retreat into a shell of punishment-oriented self-righteousness we will have only ourselves to blame.

I now would like to ask our distinguished Attorney General, Jim Maloney, to begin what I am confident will be a very interesting program.

[From the Albuquerque Journal]

WAR ON NARCOTICS COULD HIKE PRICE, BURGLARIES HERE

(By Mike Padget)

A city narcotics agent anticipates a hike in prices of illicit narcotics as well as an increase in the number of burglaries in Albuquerque—if President Nixon's "Operation Intercept" proves effective.

The agent, who requested that his name be withheld, said the recent crackdown along the Mexican border by the Nixon administration also could mean mass weekend exoduses to the Midwest by the area's "pot heads" to pick marijuana from fields where it grows wild.

"I definitely think the addicts are going to burglarize more if the price of narcotics goes up," the agent said.

He said most of the pushers in Albuquerque procure their hard narcotics and marijuana from "Mexican border towns."

Many of the other drugs, such as LSD and a small percentage of the amphetamines, are brought into the area from California, he said.

The marijuana smokers—although they tend to prefer the Mexican grass—probably will make some attempt to establish sources in the Midwestern states, he said.

"I know of some instances involving local people where someone has driven all the way to Kansas to pick marijuana," he said. "There are many places there where it will grow wild in large patches.

"I would say the traffic would increase that way (to the Midwest), but the user will have to have a contact to know where to go to pick the stuff. If enough people find contacts, the traffic will get pretty strong," he said.

On the other hand, some of the marijuana smokers may choose to "try something else," because they say state-side marijuana doesn't provide enough kick, he said.

"It's been my experience in talking to people that they would prefer not to smoke the local grass because it doesn't have the kick that the marijuana grown in Mexico has," he said.

The city agent said the average cost for a "cap" of heroin in Albuquerque is $5. He said to his knowledge the price has not yet changed, illustrating that Operation Intercept has not been effective long enough to diminish the local supply of the drug.

However, he said, if the massive drug search program at the border proves itself, the price probably will jump to about $7.50—the average cost of a cap in states farther north from the Mexican border.

"If this happens, I anticipate a proportionate increase in the number of burglaries," he said.

Many addicts in the advanced stages have a need for as many as 20 caps of heroin daily, he said. (A cap contains enough of the drug for one fix.)

"You can see that this can get to be a very expensive habit," he said. "These people, when they're not mainlining, will be plotting for a way to get money for their next fix."

Most addicts consider committing a burglary the "easiest" method of obtaining money to feed their habit, he said, because the goods can be easily turned over for instant cash to known "fences."

Asst. Dist. Atty. Donald J. Wilson estimated that 75 per cent of all burglaries in Albuquerque are committed "either by addicts or people who have been addicts."

The only problem the addict faces is that he is paid only a small percentage of what the stolen item is worth.

"I know of at least one case where an addict had stolen a $1000 color television set and then sold it for $25. But he's willing to do it, because that much money is enough to pay for his habit long enough for him to steal something else and sell it," he said.

DECISION EXPECTED SOON ON WISCONSIN DDT CASE

Mr. NELSON. Mr. President, the Wisconsin Department of Natural Resources began hearings last December on a citizens petition to ban the use of DDT in Wisconsin.

The petition, filed by the Citizens Natural Resources Association of Wisconsin and the Izaak Walton League, stimulated the first major public confrontation between the pesticide industry and concerned citizens and scientists on this vitally important environmental subject.

At issue in the proceedings is whether the department shall issue a ruling declaring DDT to be a highly toxic, persistent chemical that should be restricted in use so that it cannot enter the biological, geological, chemical, and ecological cycles of the biosphere, and also make a ruling that the use of DDT constitutes pollution.

After having several weeks of hearings on the case, the Department of Natural Resources has just completed assembling 46 volumes of testimony and exhibits and have been distributing the documents to all parties involved. The parties have 30 days in which to file their briefs, and then another 15 days in which to file answers to each other's briefs. So we can expect the long-awaited decision from the department in about 2 months.

News articles published in several Wisconsin papers have reported that the pesticide industry has been attempting to block the decision by the State Department of Natural Resources. The industry contends that the entire case should be handed over to the newly created pesticide review board, recently set up by the legislature to coordinate pesticide regulations among the State agencies.

I feel that it is essential that the Department of Natural Resources retain the final decisionmaking authority on this case. The department's scientific and ecological experts have been deeply involved in this matter for more than a year and should rule on it.

I ask unanimous consent that articles published in the Capital Times and the Stevens Point Daily Journal be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Capital Times, Sept. 23, 1969]

CHEMICAL FIRMS TRY TO BLOCK DDT RULING; ATTEMPT SWITCH OF FORUM

(By Whitney Gould)

Concern is growing within the conservation community over an apparent attempt by the agri-chemical industry to block a decision by the State Department of Natural Resources on a petition ban use of DDT in Wisconsin.

That concern is matched by irritation with the department itself, for its long delay in acting on what many scientists feel is one of the most critical environmental issues of the past quarter century.

The department began hearings last December on a petition by two conservation groups—the Citizens Natural Resources Association (CNRA) of Wisconsin and the Wisconsin division of the Izaak Walton League. The petitioners asked that the department, which administers Wisconsin's water quality laws, declare DDT a pollutant and ban its use wherever it might enter the state's lakes, rivers and streams.

The hearings ended last May, after testimony by scientists from throughout the United States, and from Canada and Sweden, linking DDT with the decline of numerous bird species, reproductive failures in fish, and a host of other ecological disruptions that were never anticipated when the pesticide was introduced in the 1940s.

Witnesses for the chemical industry defended DDT as the cheapest and most effective pesticide available for some vegetable crops, and said it was useful in fighting malaria and other mosquito-borne diseases.

In the meantime, the Wisconsin Legislature, with the cautious endorsement of some conservation groups and the enthusiastic support of the chemical industry, set up a pesticide review board to co-ordinate pesticide regulations among the state agencies. The board, which is to meet for the first time this week, will be made up of the secretaries of the Departments of Natural Resources, Health and Social Services, and Agriculture.

Many of the foes of DDT and other persistent pesticides fear that the new board, which lacks any representative from the environmental science community, will be more vulnerable to the pressures of the agri-chemical industry.

Their fears were not allayed earlier this month, when Madison Atty. Willard Stafford, representing the National Agricultural Chemicals Association's (NACA) "DDT Task Force," filed a brief of intervenor with the Natural Resources Department, asking that the petitioners' complaint be dismissed. Stafford pointed to the newly-created pesticide review board, which, he contended takes the DDT question out of the hands of the department.

Conservationists have reacted angrily to the industry move.

One of the most irate is Victor J. Yannacone of Patchogue, N.Y., attorney for the Environmental Defense Fund, Inc., which handled the case for the petitioners in the Madison hearings. The petitioners have until Oct. 15 to respond to Stafford's brief for dismissal, and they plan to do so, according to Yannacone.

"It is an affront to the people of the state of Wisconsin," Yannacone said in a telephone interview, "and to the people of the United States, for the NACA to make a move at this late stage to prevent the full impact of the first direct confrontation involving DDT with any degree of scientific sophistication and legal due process, from being presented, and a finding of fact and legal determination from being made under Wisconsin law.

"The petitioners, who through the Environmental Defense Fund were representing the environmental science community, and the helpless citizens of this generation, and the voiceless children yet unborn, came to Wisconsin because only the enlightened administrative procedures of this state, developed as they were over 50 years of social evolution, furnished a forum where the full DDT controversy could be aired, free of the emotional, political and economic pressures that have so influenced prior attempt to evalutate the full impact of DDT on the biosphere."

Yannacone called the Stafford brief "another example of the ruthless, callous and unprincipled attempts by a handful of chemical companies to prevent the development and distribution of environmentally safe, ecologically sophisticated pesticides."

Dr. Charles F. Wurster, a biologist at the State University of New York at Stony Brook who led witnesses for the petitioners in their attack on DDT, was equally indignant.

"It's perfectly clear," he said, "that the NACA is doing everything it possibly can to prevent a decision from being made by someone who knows the facts about DDT. They're scared to death of the truth."

He charged that the NACA is "fundamentally a propaganda organization, trying to hush up and bury the weight of scientific evidence (on DDT) by brainwashing the public into thinking it can't live without DDT."

A telegram in behalf of the petitioners, asking the Department of Natural Resources to finish up preparation of a transcript of the hearings without further delay, was sent to Natural Resources Secretary Lester P. Voigt last week by CNRA president, Dr. Frederick Baumgartner, a professor of wildlife at Stevens Point State University.

Voigt, however, insists the department is moving as fast as it can. "We're urging the staff to do everything possible to get the transcript out soon," he said, "and I think they're doing a fine job, despite the natural impatience of the litigants."

Hearing examiner Maurice van Susteren, who conducted the DDT proceedings for the department, said that the transcript—which will run some 4,000 pages, including some 200 scientific exhibits—may be ready "in a week or two, unless somebody comes along with a higher priority item."

The length of the testimony, a shortage of court reporters, and the pile-up of other business have slowed up publication of the transcript, both department spokesmen said.

It is not known at this point just who will make a decision on Stafford's motion for dismissal. "Our legal division will review it," Voigt said, "and we may consult with the attorney general's office on the matter."

A decision on the petitioners' original request for a DDT ban, in turn, depends on the outcome of the dispute over who has ultimate authority in the matter: the DNR, or the new pesticide review board.

Within the department itself, according to Voigt, the procedure would be as follows: van Susteren would prepare a recommendation on the petition and refer it to Voigt, who would then pass it along to the policymaking Natural Resources Board. Whether that board's finding would be final, or merely a prelude to action by the pesticide review board, is the central question now.

Voigt denies that the pesticide review board will be more open to pressure by special interest groups.

"Ordinarily, when you have more people involved," he said, "the more difficult it would be to exert pressure and influence—though I would hesitate to think that pressure would have an effect in either case. We're optimistic about the review board because it seems to offer an orderly way to establish some sort of control over contaminants in the environment."

Four months have elapsed since the Madison DDT hearings ended. And the powerful pesticide, though banned from sale in Michigan and under sharp attack by scientists throughout the world, is still being applied to crops in Wisconsin and other states. It is making its way into waterways, into the bodies of fish and birds and man as well.

Scientists fear that if decisive action against this long-lived chemical is not taken in Wisconsin, which provided the first broad-based forum on its hazards and benefits, the results bode ill for the ability of any policy-making government agency to meet environmental crises.

[From the Capital Times, Sept. 24, 1969]

WILL PROFITS PREVAIL OVER HEALTH IN DDT DISPUTE?

Four months have passed since the Wisconsin Department of Natural Resources concluded its historic hearings on a petition to ban further use of DDT in this state.

World-wide attention focused on Wisconsin during those hearings, which provided the first genuine, public forum for respected scientists from throughout the U.S., and as far away as Canada and Sweden, to tell the DDT story in full.

And it was an environmental horror story of the first magnitude.

The scientists who came to Wisconsin linked DDT to lowered reproduction among many of our birds of prey, which are already threatened with extinction.

They told how the pesticide interferes with the process of photosynthesis in the tiny marine organisms that are at the base of the world food chain, and how DDT builds up at progressively higher levels of that chain.

They also warned how dangerously persistent DDT is, once even small quantities are released into the environment.

And in the end, they made an eloquent plea for ecological sanity at a time when all of the world's natural resources are threatened with corruption by man, the despoiler.

On the other side of the table was the pesticide industry with its economic muscle and well-oiled propaganda machine, defending its obsolete product with the feeble passion of the cigarette industry—all the while ignoring the well—documented facts, maintaining that "not enough is known" to indict DDT, raising the spectre of a malaria epidemic if DDT were banned.

Unable to mount a convincing case for DDT in the DNR's hearing room, the industry is now trying to prevent this Wisconsin agency from rendering a decision on one of the most crucial environmental issues of our time.

The industry instead wants to transfer the matter to the state's newly-created pesticide review board, in hopes that that body, which includes a representative from the Department of Agriculture, will either delay action indefinitely or be unsympathetic to a DDT ban.

Wisconsin citizens who care about the quality of their environment must be shocked at this brazen attempt by persons who put private profit above the public interest.

We urge the Natural Resources Department to act decisively against the industry's move and to exert its clear authority in the administration of Wisconsin's water quality laws, to outlaw use of this chemical killer in our state. The evidence is incontrovertible; further delay is indeed an invitation to disaster.

[From the Stevens Point (Wis.) Daily Journal, Sept. 24, 1969]

BAUMGARTNER HITS DELAY IN DDT DECISION

A wildlife professor at Stevens Point State University reports a private organization he heads will go on record next weekend in opposition to the Department of Natural Resources' delay in issuing a decision on the use of DDT.

Dr. Frederick Baumgartner is president of the Citizens Natural Resources Association which will hold its annual meeting in the Wausau Holiday Inn Saturday and Sunday.

"We consider unpardonable the four-months' delay in completion of the transcript of testimony presented" (in hearings earlier in the year sponsored by the CNRA), Baumgartner said. "If necessary, we are prepared to use pressure available to obtain a decision in accordance with the best interest of the people of Wisconsin."

His statements have been sent in a telegram to Lester P. Voigt, secretary of the Department of Natural Resources.

The CNRA spent about $52,000 at the hearings. Baumgartner said testimony and a rebuttal from agri-chemical people were to have been studied and a decision made by department officials. The results are overdue, he said, "and the agri-chemical representatives have petitioned that the testimony be dropped and the matter be taken up at the annual meeting by a new pesticide review board recently set up by the Legislature."

Discussion also will center on the Navy's plan to build Project Sanguine, a long-range communications facility that would spread a buried cable grid across the northern half of the state.

"Our concern is that no one knows much about it—we're wondering what it would do to the ecology of the area, how it would affect wildlife and ground temperature." he said.

A slate of candidates to be presented to the membership for re-election includes Baumgartner as president.

CAREER EDUCATION

Mr. PROUTY. Mr. President, in an address to a national workshop on Federal programs that the American Association of Junior Colleges gave on October 3, in Washington, Secretary of Health, Education, and Welfare Robert Finch offered a concept which I hope Congress will study with care.

Secretary Finch gave this concept the name "career education." In it, I see the promise of a great national goal—a rallying point on which all of the more than 400 Federal programs fostering both formal education and manpower development might be harmonized and coordinated.

The Secretary also spoke at length on his plans to improve education and to strengthen community colleges. He cited some startling figures on the growth of 2-year colleges. While the junior colleges have nearly doubled in the number of campuses since 1960, they have tripled in total enrollment in the last decade and now serve at least 2 million students.

I am not sure that complete enrollments have yet been compiled for all colleges this fall, but Mr. Finch has indicated that this was the year when, "for the first time, more freshmen entered junior colleges than 4-year institutions."

I know that the junior colleges long ago passed that milestone in the Secretary's own State of California. In my own

State of Vermont, however, we still have much work to do. Although our local schools give more-than-adequate training through the high school level, many of our top graduates leave the area for employment in cities where there are more opportunities for advanced education. This is a problem that is facing most rural parts of America, and I think the community college and career education concepts offer the best solution proposed so far.

Equally significant, he noted that one-fourth of all black college students are now concentrated in public community colleges in three cities—New York, Chicago, and Los Angeles, adding:

> In virtually every large American city, more blacks study at public community colleges than all nearby institutions combined.

To turn these trends in the national interest, and to gain the full promise of the community college movement, he called for a concerted Federal response, based in part on new legislation, but more largely upon a vigorous attempt to orchestrate the many Federal programs that already exist. While reporting that the Commissioner of Education is setting up a new Office of Community College and Career Education Programs, Mr. Finch declared:

> We plan to give this office the greatest visibility and maximum authority to work not only within the Office of Education, but with other elements of government—the Department of Labor, OEO, HUD, the Veterans Administration, and the Departments of Defense and Commerce.

It is a heartening move. Surely the attempt is long overdue. The number of Federal programs dealing with education today is enough to stagger the mind. The Secretary has testified to Congress that the number now exceeds 400. To many schools and colleges trying to utilize Federal resources, this list, I know, is a staggering morass. I am sure the often bewildered institutions find themselves pulled in scattered directions by the various Federal programs. In some instances, I think the programs tend to pit one branch of education against another.

Most clearly, there is a crying need for coordination. I hope that Congress will encourage Secretary Finch in this initiative. At the same time, I hope we will not enact additional major programs without ourselves facing up to the issue of coordination. The national interest will not be served by further proliferation and duplication of services which have the effect of compounding competition and overlap among Federal programs.

We are long past the day when we can afford to set up any large program in a vacuum. As we develop the new manpower legislation, for example, I think we must develop it in close harmony with the proposed new community college and career education programs. Higher education and occupational education must, as Secretary Finch suggests, work in concert. So must manpower development and education. Both will achieve much greater results if they are coordinated and orchestrated. I am pleased that Secretary Finch proposes to take his legislative drafts into regional conferences, to monitor the grassroots response, and to encourage greater local teamwork.

The burgeoning importance of 2-year colleges to nearly every State and the growing national demand for easier access to higher education make Secretary Finch's address well worth the contemplation of the entire Congress. I ask unanimous consent that the text of the address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS OF SECRETARY OF HEALTH, EDUCATION, AND WELFARE ROBERT FINCH

I appreciate very much the opportunity to address your workshop today, and I welcome the change to continue our efforts together.

When I was first designated Secretary of Health, Education, and Welfare, I articulated the importance of the community college mechanism. At a recent Governors' Conference, I advocated the necessity for long range State planning for the initiation and growth of these institutions. But my California experience with community colleges also injected a note of caution: California made mistakes which should not be repeated. And so today, I want to explore—just as in our HEW initiatives we are carefully exploring—some of the problems and prospects of this high potential institution.

We are confronted at the outset with the explosive growth of the community college—a truly unique American educational effort. It is a development as revolutionary for this this era as was the land grant college concept for the nineteenth century.

Community colleges now number a thousand—almost double the 1960 count. The Carnegie Commission on Higher Education has urged the establishment of an additional 500 by 1976.

Enrollment has been growing even more rapidly. Today, 2-year colleges serve about two million students—three times the 1960 count. This year, for the first time, more freshmen entered junior colleges than entered four year institutions.

The mushrooming growth of the community college promises to be the chief means of approaching universal higher education in the United States. It is already of critical importance to poor and otherwise disadvantaged students, notably blacks.

For black Americans, the public community college has the potential for becoming the most promising single avenue of higher education. The reasons are obvious: these are the accessible institutions—geographically, financially, academically. A quarter of all black American collegians are concentrated in public 2-year colleges in New York, Chicago, and Los Angeles. In virtually every large American city, more blacks study at public community colleges than all nearby institutions combined.

The dynamic nature of today's community college involves problems, I hasten to add, with which you are all too familiar. We have a very uneven template. Prestige is often low. The community college suffers, in some quarters, the same unfortunate stigma as the vocational school—wrongly regarded as dead-end education.

At the same time, to the extent that it goes outside the vocational sphere, it is regarded in some circles merely as a watered down version of the senior college. And in some instances, let's be candid to admit, it is.

There are dismal statistics behind these impressions. According to one study, a little over 50 percent of all students in 2-year colleges require remedial or compensatory programs. The drop-out rate is over 50 percent for all enrollees, and is especially high among the disadvantaged—maybe as many as eight out of ten. Faculties are often staffed by instructors trained for purposes other than community college teaching.

Community colleges also are handicapped by confused lines of authority and responsibility in their dealings with State and Federal officials. The natural difficulties of institution-building are complicated still further by uncertainties—uncertainties about the community college role in relation to secondary and higher education . . . uncertainties as to research and experimentation, faculty status and community service activities.

Nonetheless, for all the problems it confronts, the community college represents literally one of the most exciting possibilities for educational opportunity in history. I hope, as we proceed, that the dimensions of this possibility will emerge.

Another set of trends that particularly concerns me lies in the imbalance of the labor market. Ironically, unemployment is not the biggest single factor contributing to poverty in this Nation. The majority of those millions classified as poor live in households in which the father or mother both work—and one of them works full time. We thus face major problems with the discouraged worker who is expected to work full time . . . at low wages . . . with little or no chance of advancement.

On the other hand, in nearly all the professions, there are severe and probably growing manpower shortages in jobs which would lead to challenging and fruitful careers.

As important as job training is—to provide equal opportunity, to reduce unemployment, and to end the vicious cycle of dependence—a job is simply not enough. Least of all, let me add, a job that holds out no hope for advancement.

We must be concerned with career education for the young and continuing education for those presently employed. There is no other way to break the cycle of underemployment. There is no other way to prepare our Nation and ourselves for the rapid pace of social and technological change.

The distinction between a job and a career . . . and the importance of maximizing the life-style options at all stages of life . . . can be seen in the frustration today of the middle America—the "forgotten American"—the group of people characterized by one recent article as "The Burnt-Out and the Bored."

Both ends of the contemporary, rigidly-programmed life-cycle press upon this group. It is they who must support the education of the young and the retirement of the old. They have the heaviest responsibilities—emotionally and financially—and the fewest opportunities to escape. These Americans should have opportunities for a new life style. A new career and a new chance for learning . . . quite as much as their sons and daughters.

The Federal response must address both these developments—a burgeoning community college movement still in search of a role . . . and a growing demand for skilled manpower in rewarding careers.

We turn, as seemingly we always turn, to our educational institutions for this dual response. We are now developing—the name is a real jawbreaker—a "Comprehensive Community College Career Education Act of 1970." It will propose that the community college become the capstone institution for a career policy for all Americans.

To insure the commitment of this Administration to deliver career education, the Commissioner of Education is organizing a new office of Community College and Career Education Programs. We plan to give this office the greatest visibility and maximum authority to work not only within the Office of Education, but with other elements of government—the Department of Labor, OEO, HUD, the Veterans Administration, and the Departments of Defense and Commerce.

In these areas lie sources of funding for the disadvantaged and the underutilized. These sources currently lack the effective delivery vehicles which the community college mechanism can become.

The Commissioner will establish priorities under such existing programs as the Education Professions Development Act, the Vocational Education Act of 1968, the Higher Education Act, and the Elementary and Secondary Education Act. He will also be under mandate to develop new legislation for career education, if it is called for. His search will be for new lines of communication . . . and cross-fertilization . . . among all our educational institutions.

We are out to renew American public education from early childhood through graduate school. We believe that the community college is a key vehicle in such renewal. I include under this general rubric community colleges, junior colleges, technical institutes, university extension centers, and satellite campuses—public and private institutions both, which offer from one to three years of post-secondary education. Federal planning should not constrict the variety of potential institutional models.

Let me hasten now to add some caveats. The mold is not fixed. We do not seek the establishment of a nationally directed and controlled community college system. In pointing to some major tasks that community colleges should undertake, I do not mean to denigrate the healthy pluralism fostered by each community's own definition of how its college should serve it.

For that reason, as our own legislation takes form, we want your opinions in regional conferences we intend to hold, and we would welcome now your letters of advice directed to the Commissioner of Education. We intend to consult closely with Senators Prouty and Williams and with all the other legislators who have greeted the community college concept so warmly.

A second caveat is dictated by severe budgetary limitations—a sheer fact of life within which we are now forced to operate. This must fuel our efforts to obtain support from the private sector—business, churches, unions, and the foundations. And it must fuel our efforts at intergovernmental cooperation—at maximum utilization of the Federal dollar, and maximum coordination of governmental efforts at all levels.

The exact templates are not fixed—nor should they be in so young an idea. Most community colleges are public—but not all. Most are vocationally-oriented—but they also serve the "late bloomer" who seeks remedial training in the basic academic skills. Most of their students are enrolled in terminal curricula, to acquire a specific skill—but many are engaged in the traditional disciplines and may use community colleges as "feeders" into regular four-year institutions of higher learning. Most of their students are young people—yet nearly all community colleges offer adult extension courses, and stress mid-career re-training . . . a chance for a new life-style.

The physical properties of the community college do—and should—vary greatly. Sometimes they are strikingly beautiful traditional campuses . . . sometimes central-city complexes . . . sometimes middle-aged office buildings deep within the ghetto—and this is the variety of innovative community service that should be explored and enhanced.

No, the mold is by no means fixed. The precise contour of the community college movement is still in evolution—and I, for one, hope that this remains the case.

In preparing a comprehensive national initiative we are dealing with fifty different State systems, fifty different concepts of maximum effective service to the total community, and fifty different patterns of financing.

In some States, community colleges are developed and operated by independent government boards . . . in some, as a division of the elementary-secondary school system . . . in some, as a subcommittee of the board of higher education. New State plans are on the drawing boards. And, for a balanced national perspective, we need to know a great deal more about what consensus, if any, the State planners are reaching.

This is why we are searching for an assistance formula that will accommodate itself to this infinite variety and this need for maximum flexibility.

Essential to this planning is an overall educational strategy that evaluates . . . in both geographic and curricular terms . . . how the community college can best relate to the total educational process—not to replace or destroy, but to enhance our outreach over the entire spectrum.

Running all through the community college phenomenon, there are certain recurring themes—the marks of their distinctive lifestyle. They are also, I think, the criteria by which your own evaluations should proceed.

They are career centers for young Americans of every class, and every race . . . and for older citizens as well who seek mid-career retraining. They are, today, a largely untapped resource for the returning veterans . . . most of whom are not yet taking advantage of their educational benefits under the G.I. Bill.

They are oriented to the new technology . . . to the practical sciences . . . and increasingly to the development of paraprofessional disciplines—in health, in computer science, in social services, in teaching itself.

In other words, they are in tune with the vocational skill needs of an evolving technological era . . . whose "useful trades" are all the arts and sciences that must be harnessed to preserving a decent human environment and developing humane social institutions.

The community college must work—as indeed they are working—in close partnerships . . . partnerships of necessity . . . with all the public and private and independent institutions of the social matrix.

As the land-grant institutions were at work on the frontiers of the New American Nation of their day . . . so, too, is the community college a frontier institution—the frontiers, now, of a new technology and a new ecology of human relationships.

I think that you have a right to a grand vision of what your institutions can become—of the educational outreach they can provide. Indeed, I trust you never will aspire to less.

I think back to Aristotle's admonition that "only the educated are free"—and to the measured words of the great architect of democracy, Thomas Jefferson:

"By far the most important bill in our whole code is that for the diffusion of knowledge among the people."

H. G. Wells, with his apocalyptic gift of prophesy, once wrote:

"Human history becomes more and more a race between education and catastrophe."

And that, my friends, literally defines the dimensions of our mutual endeavor . . . and the ultimate test of our success.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

EXPORT EXPANSION AND REGULATION ACT OF 1969

Mr. ALLEN. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the unfinished business.

The PRESIDING OFFICER (Mr. GRAVEL in the chair). The bill will be stated by title.

The ASSISTANT LEGISLATIVE CLERK. A bill (S. 2696) to provide for continuation of authority for the regulation and expansion of exports, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. ALLEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SURRENDER IN VIETNAM

Mr. ALLEN. Mr. President, I was in the Senate Chamber earlier today when the distinguished junior Senator from South Dakota (Mr. MCGOVERN) made what, to me, was an ill-advised attack upon the distinguished Vice President of our country and Presiding Officer of the Senate.

I think it would certainly be an understatement to say that the full Senate was not present on that occasion.

Thus, it falls to the junior Senator from Alabama, a lifelong Democrat of sorts, to make an answer—and answer should be made—and to express my disapproval of the remarks made by my good friend, the junior Senator from South Dakota, concerning the Republican Vice President.

Before doing so, though, I should like to praise the distinguished junior Senator from South Dakota for having fought for his country during World War II. He was truly a hero of that war.

I should also like to praise the millions of other Americans, including the Vice President himself, who did likewise, and to praise those other millions called into service during the Korean war, also including the Vice President.

I should like particularly to praise those other millions of Americans who continue to wear the uniform of their country proudly. Most of all, those Americans who are fighting today to keep their Nation's commitments.

None of us has any corner on patriotism. All of us, I am sure, are motivated by love of country.

But, Mr. President, there are some of us who just cannot equate surrender with love of country.

There are some of us who think our country's honor is as important as any individual's honor.

There are some of us who feel that a pledge made by the United States to South Vietnam is as binding as a handshake between honorable men.

I am sorry that the junior Senator from South Dakota does not feel that way.

And I am even more sorry that he

questions the motives of the Vice President, who merely had the effrontery to question the motives of some of the Senator's friends.

The junior Senator from South Dakota has no monopoly on the desire for peace. The Vice President and the President, however, are not willing to make this country pay the price of surrender. The junior Senator from South Dakota seems not to recognize the difference between the two. Fortunately, however, most other Americans seem to.

Mr. President, I want to pay tribute, too, to the Vice President of the United States who, I believe, is a great patriot. I believe that he has developed, that he has grown in stature, more than any member of the new administration during its 10 months in office.

What he has said from time to time has made a whole lot of sense to the junior Senator from Alabama, and I want to pay tribute to the service he is rendering our country.

I also want to pay tribute to him for the service he is rendering as Presiding Officer of the Senate.

Certainly, I do not feel that he should be subjected to a blistering and scathing attack by any Member of the Senate.

ORDER OF BUSINESS

Mr. ALLEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MILLER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

VIETNAM—THE WHYS AND WHEREFORES

Mr. MILLER. Mr. President, few editorials have been as clear and succinct on the question of Vietnam as one entitled "An Uncertain Cause," which appeared in the Wall Street Journal of October 15. I cannot recommend it too highly—to those who participated in the moratorium that day, to those who have denounced President Nixon's Vietnam policy, to those who advocate an immediate and unilateral withdrawal. I would like to isolate several sections as food for thought for those who fit into those categories:

1. . . . Both the war and American policy are quite different than they were in March 1968. We are off the ladder of escalation with its terrifying overtones. President Nixon is not sending more troops; he is bringing them home. The violence is not headed up and out of control, but down and gradually less unmanageable. The casualties are not climbing, but dropping.

2. . . . the policy of Vietnamization, unlike the strategy of gradual escalation, does provide a goal including an end to at least the American part of the fighting."

3. If Hanoi continues unwilling to compromise and Vietnamization continues to work, the policy could result in an independent and non-Communist South Vietnam. The outcome would represent a clear if not unblemished American success.

4. . . . capitulation, after all, would carry unfathomable costs of its own. It probably would lead to a sickening blood bath of Vietnamese who put their trust in the United States. It would encourage the forces of instability and discourage the forces of stability throughout the world, including places where flare-up could mean even more deaths than in Vietnam. It would risk an increasingly polarized and possibly anti-rational politics here at home.

5. . . . the spokesmen who do call for immediate withdrawal fail to see that there is no easy way out, just as they fail to grasp the important changes American policy has already undergone.

6. The President does recognize the full extent of the tragedy—that just as there was no easy victory there will be no cheap and easy way out. He has cut his policy toward getting out as quickly as he can without courting a catastrophic reaction.

Mr. President, those pertinent remarks contain the whys and wherefores of the present Vietnam policy. I commend the editorial to all the readers of the CONGRESSIONAL RECORD, and asked unanimous consent that it be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

AN UNCERTAIN CAUSE

The catch in the Vietnam moratorium today is that its two levels don't mesh. Tragic symbolism and deep emotions are fitting and proper in expressing grief over a tragic war. But it's quite another thing to sanctify the specific policy of immediate and complete withdrawal.

How seriously to take that demand, indeed, is the major puzzle of the day. The organizers of the moratorium have of course been demanding precipitous withdrawal. Complete and unilateral withdrawal has been backed by some Senators, often the same ones who a year ago were hotly denying they held any such idea. A good many of the men in the street who once said we should win or get out are now quite consistently saying that since we aren't trying to win we should get out.

Still, not even the moratorium's organizers claim that all participants actually back immediate withdrawal. And indeed a bit of a counter-trend against so stark a specific demand has surfaced among some who are deeply sympathetic with the moratorium on other levels. In Congress, the anti-war firebrands found they had to tone down their resolutions to attract signers. Center-left politicians like Hubert Humphrey have been backing the President, and center-left publications like the Washington Post have been dismissing outright withdrawal as unrealistic.

What these observers recognize—and what the whole moratorium fails to recognize—is that both the war and American policy are quite different than they were in March 1968. We are off the ladder of escalation with its terrifying overtones. President Nixon is not sending more troops; he is bringing them home. The violence is not headed up and out of control, but down and gradually less unmanageable. The casualties are not climbing, but dropping.

That all this has come about with no adverse effects on the battlefield has implications about the future of "Vietnamization," a policy that demands not victory but merely continued stalemate. Discount all the optimistic reports: Assume that growing control of the countryside is a computerized myth. That the sharp drop in enemy infiltration does not mean his strength is falling. That the growing size and better equipment of the South Vietnamese army does not mean its strength is rising. Even then, you cannot picture recent trends as adverse.

It's also highly significant that the policy of Vietnamization, unlike the strategy of gradual escalation, does provide a goal including an end to at least the American part of the fighting. There are reports that the Administration is hoping to withdraw all the combat infantry, the forces that take the big casualties, within a year or so. It's not realistic to expect that logistics troops and aircraft crews can be brought home soon, but perhaps such a force can be maintained by professional soldiers and other volunteers. It seems to us difficult to quarrel with leaving behind men willing to put their own lives on the line to redeem their nation's promises.

If Hanoi continues unwilling to compromise and Vietnamization continues to work, the policy could result in an independent and non-Communist South Vietnam. This outcome would represent a clear if not unblemished American success. Incredibly, the possibility of any kind of success disturbs the most militant protesters. Sam Brown, chief spokesman for the organizers, complains that President Nixon's policy "seems to be the same as the Johnson policy, which was a policy of military victory." But pray tell, what's wrong with success—even victory—if at the same time the horrible costs of the war can be phased out?

All the more so since capitulation after all, would carry unfathomable costs of its own. It probably would lead to a sickening blood bath of Vietnamese who put their trust in the United States. It would encourage the forces of instability and discourage the forces of stability throughout the world, including places where flare-up could mean even more deaths than in Vietnam. It would risk an increasingly polarized and possibly anti-rational politics here at home.

Many of the protesters are no doubt aware of much of this, and still quite understandably want to pour out the anguish shared by all of us—not least by the President. But the spokesmen who do call for immediate withdrawal fail to see that there is no easy way out, just as they fail to grasp the important changes American policy has already undergone.

This blindness adds a sour note to protests otherwise quite appropriate to expressing grief, and perhaps appropriate to attacking a policy of escalation, if that were the policy. This lack of understanding taints the talk about an "immoral" war, the hints of a national strike, the arrogant use of the war dead—some of whom just conceivably may have believed in the endeavor for which they fought so gallantly.

The President does recognize the full extent of the tragedy—that just as there was no easy victory there will be no cheap and easy way out. He has cut his policy toward getting out as quickly as he can without courting a catastrophic reaction. Against such a considered policy, a call for mindless capitulation hardly strikes us as the makings of a holy cause.

NATIONAL BUSINESS WOMEN'S WEEK

Mr. MILLER. Mr. President, this week marks the observance of "National Business Women's Week" throughout the Nation. I take this occasion to salute all the business and professional women for their achievements and their contributions to the progress of American working women over the past 50 years.

THE PRESIDENCY OF THE UNITED STATES

Mr. MILLER. Mr. President, Theodore R. McKeldin, former Governor of Mary-

land and former mayor of Baltimore, was the principal speaker at the October 12 dedication of the new Mahaska Community YMCA–YWCA Center in Oskaloosa, Iowa.

His remarks on the Presidency were both timely and perceptive, and I ask unanimous consent that they be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF THEODORE R. MCKELDIN, AT THE DEDICATION OF MAHASKA CENTER, OSKALOOSA, IOWA, OCTOBER 12, 1969

Public officials many times are sharply reminded that to attempt to satisfy everyone, to take a middle-of-the-road course on issues can be suicidal. After all, on a highway it is in the middle of the road where most accidents take place.

President Nixon is beginning to experience some of this reaction. In an attempt to keep domestic peace, to satisfy all sides to a question, he is beginning to be the subject of debate and criticism by both sides. Liberals find fault with one administration posture; conservatives take exception to another. In this philosophical tug of war, liberals and conservatives even sometimes find themselves unhappy together with an administration action. Surely, Richard Nixon is starting to ask himself what others before him in the Presidency have asked: What's a President to do?

The answer is quite simply that a President must do what he thinks is best for the country. No other consideration exists. No other criteria of judgment prevails.

In any Presidential decision, the country as a whole should come first, and since issues are rarely weighted totally to one side, this means that a President governed by his consideration for everyone must be prepared to accept the inevitable result of irritating someone. Indeed, if we could ask for a barometer of Presidential performance we should find the barometer of criticism from the political spectrum an indication that a President is indeed doing his job.

Our greatest Presidents have understood this maxim, because our greatest Presidents have been the objects of the greatest abuse. From Washington to Lincoln to the Roosevelts to Johnson, Presidents pursuing their convictions of the good for the entire country have been themselves pursued by criticism from liberal and conservative alike. Only the Presidents possessing a misguided embracement of one philosophy or no commitment at all to the total country have escaped criticism. And many times, as anyone who has been in government knows, to avoid criticism is to avoid leadership.

This country desperately needs leadership that leads, not the kind that follows. We must have a President guiding the country by his understanding of where this country must be headed, not by his knowledge of the latest opinion poll. We must have a President dedicated to searching for and making the right decisions, not to reading the latest editorials or perusing the thinking of the heads of America's various organized groups.

The result of such independence of thinking and leading is invariably healthy for the country and harmful for a President's popularity. But although President Nixon is beginning to be the target of liberals and conservatives, his popularity with the American public remains high. The country at large senses his conviction to duty, rather than to one philosophy, and the direction he has set for his administration of cooling the domestic pressures of inflation and race and the foreign pressures of war, both hot and cold, are striking remarkable chords in the American public. If we are to look at opinion polls, we find well over 60% of the American public approves of President Nixon's performance.

Presidents are always being confronted with criticism in America. For we are not a one party, one philosophy, one interested people. Our diversity of background and thinking has made us a great country, and it has forged for us, out of the fires of conflicting opinions, great leaders. Great leaders are those who do not shut their minds to other's views and to new ways of thinking. It is unimaginative—and damaging—for a leader to pursue one approach to all problems.

President Nixon, a close student of the American Presidency, has demonstrated in his first year as President that he has learned well the first lesson of leadership: To have an open mind on all issues, even if this opens the gates of debate and criticism. President Nixon can feel assured, however, that such criticism is invariably closed off by the performance of an open mind.

SENATOR EVERETT MCKINLEY DIRKSEN

Mr. MILLER. Mr. President, like so many of us, Dr. G. S. Bruland, pastor of the First United Methodist Church in Hawarden, Iowa, was an admirer of our colleague, the late Senator Everett M. Dirksen.

After Senator Dirksen's death, Dr. Bruland composed a poem for reading during the memorial service for the minority leader at the Hawarden Rotary Club.

I ask unanimous consent that the poem be printed in the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

EVERETT DIRKSEN

(By Godfrey S. Bruland)

We never know how far a boy
May tread up rapid streams
When he is mastered by the joy
Of early fervid dreams.

But is the lad endowed with health,
And viewing towering sights,
And owns the boyhood's priceless wealth
Of will, he'll reach the heights.

There lived a youngster in mid-west,
And Dirksen was his name.
His visions would not give him rest,
But prompted him to'ard fame.

When this bright lad became a man
The world looked up to see
The pattern of the Maker's plan,
Which grew in brilliancy.

As he grew wise his hopes soared high;
His will became the force
Which answered his ambition's cry,
And held it to its course.

He plunged into the streams of life
To join great citizens
And mingled in their heat of strife,
A dedicated man.

He fought his battles and he won;
Then left his native state
To take his place in Washington;
His seat among the great.

I treasured his sincerity,
And praise him for his love
To'ard aged, and posterity,
His reverence, too, for God.

I cherished his philosophy,
His heart which kept its youth;
His genuine sincerity
That made him fight for truth.

Deep in the furrows of his face
Hid springs of mirthful wit,
And when they hurdled into space
His eyes with fun were lit.

In tribute to your life we say:
Move on and never stop,
But honor the eternal Day
By climbing up, and up!

Mr. ALLEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ALLEN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ALLEN. Mr. President, I ask unanimous consent that the Senate go into executive session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONVENTION ON CONDUCT OF FISHING OPERATIONS IN THE NORTH ATLANTIC

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to vote on Executive D, first session, 91st Congress, the Convention on the Conduct of Fishing Operations in the North Atlantic.

Mr. ALLEN. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays on both conventions at the same time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. Mr. President, I ask for the yeas and nays on both conventions.

The yeas and nays were ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is, Will the Senate advise and consent to the resolution of ratification on Executive D, first session, 91st Congress, the Convention on the Conduct of Fishing Operations in the North Atlantic? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Minnesota (Mr. MCCARTHY), and the Senator from Maryland (Mr. TYDINGS) are necessarily absent.

I also announce that the Senator from Nevada (Mr. BIBLE), the Senator from Missouri (Mr. EAGLETON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Rhode Island (Mr. PELL),

and the Senator from Alabama (Mr. SPARKMAN) are absent on official business.

I further announce that, if present and voting, the Senator from Nevada (Mr. BIBLE), the Senator from Nevada (Mr. CANNON), the Senator from Idaho, Mr. CHURCH), the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PELL), the Senator from Alabama (Mr. SPARKMAN), and the Senator from Maryland (Mr. TYDINGS) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Idaho (Mr. JORDAN), the Senator from South Dakota (Mr. MUNDT), the Senator from Illinois (Mr. SMITH), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

I further announce that the Senator from New York (Mr. JAVITS) is absent on official business.

The Senator from Arizona (Mr. GOLDWATER) and the Senator from New York (Mr. GOODELL) are detained on official business.

If present and voting, the Senator from Tennessee (Mr. BAKER), the Senator from Arizona (Mr. GOLDWATER), the Senators from New York (Mr. JAVITS and Mr. GOODELL), the Senator from Idaho (Mr. JORDAN), the Senator from South Dakota (Mr. MUNDT), the Senator from Illinois (Mr. SMITH), and the Senator from Alaska (Mr. STEVENS) would each vote "yea."

The yeas and nays resulted—yeas 80, nays 0, as follows:

[No. 129 Ex.]

The PRESIDING OFFICER. Two-thirds of the Senators present and voting having voted in the affirmative, the resolution of ratification is agreed to.

LEGISLATIVE SESSION

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

EULOGIES FOR THE LATE SENATOR DIRKSEN

Mr. BYRD of West Virginia. Mr. President, at the request of the able majority leader, I ask unanimous consent that eulogies for the late Senator Everett McKinley Dirksen be given on Wednesday, October 29, commencing at 1 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. I make that statement in order that Senators might be put on notice and have ample time in which to prepare their eulogies for that occasion.

EXPORT EXPANSION AND REGULATION ACT OF 1969

The PRESIDING OFFICER. The Chair lays before the Senate the unfinished business, which the clerk will state.

The BILL CLERK. S. 2696, to provide for continuation of authority for the regulation and expansion of exports, and for other purposes.

The Senate resumed the consideration of the bill.

Mr. MONDALE obtained the floor.

Mr. BYRD of West Virginia. Mr. President, will the Senator from Minnesota yield for the purpose of my asking for a brief quorum call, without the Senator's losing his right to the floor?

Mr. MONDALE. I yield.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, I ask that the Senate be in order.

The PRESIDING OFFICER. The Senate will be in order. The Senator from Minnesota may proceed.

Mr. MONDALE. Mr. President, before I begin my discussion on the pending bill, the Senator from North Dakota (Mr. BURDICK) has stated that shortly he will ask me some questions relating to certain restrictions imposed by the Department of Commerce, and I look forward to that colloquy.

Mr. President, over a year and a half ago, the International Finance Subcommittee of the Banking and Currency Committee began a study of the export control laws. The legislation before the Senate today, the Export Expansion and Regulation Act of 1969, is the result of that study. It is a direct result of the exhaustive hearings and the efforts by individual members of that committee personally to view the areas and talk with the leaders concerned about the problems.

Many of the members of the Banking and Currency Committee contributed to the development of this new approach to export control, and I am pleased to have shared in the preparation of the committee-reported legislation. I am pleased to report that the proposal enjoys a strong bipartisan support and is a product, in addition to those of us on the majority side, of creative contributions by the minority members of the committee.

Basically, the legislation retains U.S. control over exports to Eastern European countries; it retains the President's flexibility to administer the controls. At the same time, it updates the controls to respond to important changes in the international trade picture and to the needs of American businessmen.

The bill, reported by the Banking and Currency Committee, does the following:

First, declares a national policy of encouraging trade in peaceful goods and restricting trade in goods with significant military applications.

Past uncertainty about Government East-West trade policy has hampered American business exports, to the detriment of our trade balance. The language of the Export Control Act of 1949 conveys U.S. attitude against trade with Russia and Eastern Europe, regardless of the nature of the goods sought to be exported. The new policy of encouraging trade reflects that the open hostility of 20 years ago has eased. The United States must take advantage of changing circumstances such as the mood expressed by Soviet Foreign Minister Andrei A. Gromyko, speaking this year in Moscow to the Supreme Soviet:

> We are for the development of good relations with the United States and would like these relations to be turned into friendly ones because we are convinced that this would correspond to the interests of both the Soviet and American peoples.

One way is by increased trade which reduces tensions and increases mutual contact and understanding.

Since enactment of the original Export Control Act in 1949, the nations of Eastern Europe have acquired the capacity to manufacture sophisticated items to meet their own needs. What they do not produce themselves, they can acquire from almost any other sophisticated nation of the world. While the categories of nonmilitary goods which might reach Eastern markets, about 1,100 of these goods are fully available to Eastern Europe from other free world sources. These controls have little or no effect on Eastern Europe. They simply mean that American businessmen are at a disadvantage competing for trade in Eastern markets.

The trade statistics reflect this disadvantage: the United States has less than 2 percent of the fastest growing market in the world. At a time when the United States needs to increase its trade balance surplus, it can no longer afford to ignore a vital market unless some overriding national objective is served.

This situation is deteriorating. In the quarterly report for the first quarter of 1969, the Department of Commerce reports that U.S. exports to the U.S.S.R. and the other countries of Eastern Europe during the first quarter of 1969 totaled $39.3 million. This was a decrease from exports of $62.5 million in the previous quarter and $55.2 million in the first quarter 1968. Exports to these countries in the first quarter 1969 represented 5 percent of total U.S. exports for that period.

U.S. imports from the U.S.S.R. and Eastern Europe during the first quarter of 1969 amounted to $41.8 million, a decrease from the $45.8 million imported in the previous quarter and from the $58.5 million imported in the first quarter of 1968. First quarter imports from Eastern Europe represented 0.6 percent of the total U.S. imports for that period.

I shall, later in my remarks, indicate that these percentages are astonishingly beneath the standard percentage of world trade which the United States enjoys elsewhere in the world. I think a good deal of what might be called pathetically weak trade with that area of the world is attributed to the present law, and to the present administration of that law as vested in the Department of Commerce, and by virtue, as well, as regulations under which that act is administered.

The committee view, set out in its report, is "that any restriction of exports is unwarranted if it does not serve some positive function." Although the size of American involvement in East-West trade has not been large, export control legislation has given Department of Commerce administrators control over more than $30 billion worth of exports per year to all countries of the world. Therefore, section 3 of the reported bill declares a national policy of encouraging trade in peaceful goods with all countries with which we have diplomatic or trading relations except where the President shall determine otherwise.

Section 3 also states the policy of the United States to restrict the export of goods and technology which would make a significant contribution to the military potential of any nation which would prove detrimental to the national security of the United States. Present legislation contains no explicit restrictive policy statement.

Section 12 or the new bill requires administration of the export controls in effective coordination with the authority exercised under section 414 of the Mutual Security Act of 1954, the embargo on sales of military items to Communist nations.

Second, eliminates "economic potential" as a measure of whether goods may be exported, thus removing one of the major restrictions of the present Export Control Act.

In 1949, the Soviet war-ravaged economy was beginning a slow-rebuilding process. Now, the Soviets have one of the world's most self-sufficient economies, counting on imports for only 1½ percent of their gross national product. Russia and the other nations of Eastern Europe can obtain anything they need by producing it themselves or purchasing it from our allies.

Trade with Communist nations is not a form of aid. All imports must be paid for, and the money for imports can come only through exports developed by investment in the production of items for export. No nation can gain through imports the economic advancement it is not capable of providing for itself; trade quickens the economic growth of both trading partners. In the world of 1969, U.S. denial of exports to Eastern Europe on the ground that they contribute to the "economic potential" of these nations is an act of self-denial, restricting only the markets and sales open to American business.

Application of the test—whether a U.S. export will make a significant contribution to the economic potential of some nation—has been complicated and frustrating. Inadequate factual evidence, difficult to evaluate, gives rise to differences of opinion and under a rule of unanimity, delays occur.

Therefore, the legislation we consider today removes the "economic potential" test from the operative language of the Export Control Act of 1949 which now provides for "denial of any request or application for authority to export articles from the United States—to any nation or combination of nations threatening the national security of the United States if the President shall determine that such export makes a significant contribution to the military or economic potential of such nation or nations which would prove detrimental to the national security and welfare of the United States.

Third, establishes availability of comparable products from other sources as a consideration in licensing of exports.

I think this is one of the key items which this measure seeks to correct. It is ironic, if not absurd, that today there are over 1,100 items freely available from our allies, not controlled by COCOM, which can be purchased by countries of

Eastern Europe, of a nonmilitary nature, but which U.S. businesses cannot sell because of the unilateral restrictions imposed through the administration of our Export Control Act.

It is manifest—it is obvious—that such restrictions in no way aid the United States and in no way interfere with the countries of Eastern Europe, because they simply buy elsewhere.

The present policy might be called a pro-French policy, or a pro-English or a pro-West German or a pro-Italian or a pro-Japan policy, because the result is simply to assure them markets free from U.S. competition and to deny to us markets that in many cases would obviously be ours, or in which we could compete, if it were not for the unilateral policy of self-denial.

The reported Export Expansion and Regulation Act of 1969 sets out a new test for export licensing. The key operative phrases in section 4(b) provide that express permission and authority must be sought and obtained to export from the United States to any nation or combination of nations if the President determines that the articles, materials, supplies, data, or information sought to be exported would make a significant contribution to the military potential of such nation or nations which would prove detrimental to the national security of the United States and that the articles, materials, supplies, data, or information of comparable quality and technology to that sought to be exported are not readily available from other sources. It is further provided that in the event the President has not made the determination that comparable goods are not available elsewhere, he may still require express permission and authority to export such item if he determines it to be necessary in the interest of national security and includes a detailed statement with respect to that action in the next quarterly report submitted pursuant to the act after the action is taken.

Testimony by American businessmen before the Banking and Currency Committee included numerous examples of lost sales resulting from U.S. export controls.

I intend to give some of those examples later in my remarks.

Items unilaterally controlled by the United States are normally available in comparable kind and quality from a competitor in a nation which does not control such items. While the American businessman to make a sale must seek a license which may be denied his competitor—often from Western Europe or Japan—delivers the goods.

Under the new bill, if goods are available outside the United States, they must be removed from the export control lists unless they are items of military applicability or the President decides otherwise and states his reasons.

I would point out here that the committee very clearly sought, in this measure, not to deny the President any powers that he might need to control or restrict the sale of items, even if available from other countries, if in his judgment those items should be controlled. In no sense did we wish to restrict the President or the scope of his powers.

However, recognizing that this act is not administered personally by him, but by the Department of Commerce and by the Export Control Office, which I think has been unduly conservative in this field in those cases where items are freely available elsewhere and are not of military significance, but which items we nevertheless unilaterally restrict, a special report to Congress giving the reasons justifying the present action would be required by this legislation, so that we might analyze the reasons justifying the action, where we unilaterally deny business to ourselves, without hurting the Communists, by simply transferring business opportunities to our Western allies.

The fourth objective sets as policy the uniform application of export controls for all nations with which the United States maintains diplomatic or trade relations except where specifically designated by the President and the formulation of uniform export controls in cooperation with all nations with which we have defense treaty commitments.

The present comprehensive export schedule lists items requiring a validated license for certain countries. All export destinations are divided into seven country groups: Group S, Southern Rhodesia; Group T, all Western Hemisphere countries except Canada and Cuba; Group W, Poland and Rumania; Group X, Hong Kong and Macao; Group Y, Albania, Bulgaria, Czechoslovakia, East Germany, Estonia, Hungary, Latvia, Lithuania, Outer Mongolia, and the U.S.S.R.; Group Z, Communist China, North Korea, North Vietnam, and Cuba; and Group V, all other countries except Canada.

The listing of countries subject to export controls demonstrates the political nature of the controls. For the past 20 years the United States has attempted to express approval or disapproval of political developments abroad through the granting or restricting of trade concessions. Administrative consideration of license applications reflects political events on a day-to-day basis. Although the goal of uniform treatment and trade concessions may be impossible under present circumstances, the policy expressed in section 3(3) would bring advantages both to the conduct of our foreign affairs and to individual American businessmen.

U.S. export controls would have been completely ineffective without the cooperation of Western European countries and Japan. The NATO countries and Japan cooperate through the Coordinating Committee of the Consultative Group—COCOM—to license the shipment of strategic goods to Communist countries.

I emphasize the point that in addition to these restrictions found in the Commerce Department, the United States, with its NATO allies, has a committee known as the COCOM Committee, which coordinates and collectively agrees on a list of items which none of the nations may agree or permit to be sold to Eastern Europe.

This is another protection which we have, to guarantee that items of important military significance may not be sold by us or by any of our allies. It is, in fact, the only effective means the United States has to deny items to Eastern Europe which we feel would be of military significance, which are generally available from other sources.

If there is, for example, an item produced in West Germany which we feel to be of military significance, but which the West Germans do not wish to restrict and which is not restricted by COCOM, unilateral U.S. policy concerning the same item really has no applicability, because it can easily be purchased by those countries from West Germany. It is only through COCOM that we can effectively impose an international standard restricting to any significant degree sales in Eastern Europe of military goods.

The COCOM controls, considerably fewer and less restrictive than the unilateral U.S. controls, apply to the countries of Eastern Europe with the exception of Yugoslavia and to China, North Korea, and North Vietnam. American attempts to include Cuba in the COCOM controls failed.

The NATO countries and Japan, meeting last month, agreed to relax controls further on the export of many strategic goods to the Soviet Union and Eastern Europe. Without a corresponding reduction of U.S. controls, American businessmen will find their competitive position weaker. Ideally, our export control list should be reduced to the level of the COCOM list since only those items which are under a mutual Western embargo will be effectively prevented from reaching Eastern Europe. Therefore, section 3(4) of the reported legislation declares the policy of the United States to formulate, reformulate, and apply any necessary controls to the maximum extent possible in cooperation with all nations with which the United States has defense treaty commitments.

In other words, that resposibility and that power remain unimpaired, and this measure reaffirms our desire to empower our Government to continue to work through COCOM to keep from the hands of the Communist countries of Eastern Europe those items of military significance which collectively we decide we should keep from their hands.

The fifth objective of the measure is to require regular consultation between the Government and American businessmen in setting export standards and licensing procedures.

Permit me to say here that the committee was impressed by the fact that most businessmen who testified before us confessed that the whole process by which their applications were considered, delayed, and denied was something that was kept entirely from their view. They rarely knew what was happening to their applications. They rarely knew who was delaying them, who was denying them, and on what grounds; and when action was finally taken, many times weeks or months later, the reasons were not provided to the American businessman; he was simply told that his application was denied or granted.

Thus there is an effort, in this measure, not to deny the President the power he needs, but to make certain that the American businessman involved receives a just and fair hearing and an opportunity to have his views heard before final action is taken.

Witnesses before the International Finance Subcommittee demonstrated a wide knowledge of the Eastern European market and the problems they encounter with export controls. The administration of any law is aided by regular consultation with those who must live with its restrictions. Therefore section 5 of the reported bill provides that in addition to seeking information and advice from various executive departments—as is the practice under current export control administration, the President's designated administrator of the act, consistent with considerations of national security, must seek information and advice from private industry. In addition, section 4(a)(2) directs the Secretary of Commerce to keep American businessmen informed of changes in export control policies and procedures.

The sixth objective is to require reports to businessmen by Federal agencies whenever a license application faces delay or denial, with specification of reasons, and provides opportunities for businesses to provide further information that may strengthen their applications during the licensing process.

The businessmen witnesses appearing before the subcommittee described their lack of information during the licensing process. Once an application is filed, the applicant is unable to ascertain its status, which of the agencies consulted is holding it up, how long a decision will take or if the license is denied, the reasons.

Section 8 of the act requires the executive branch, insofar as is consistent with national security, foreign policy, and effective administration, to inform each prospective exporter of the considerations which may cause his export license request to be denied or delayed. He must be informed of circumstances which arise during the Government's consideration of the application which delay the process or are cause for denial and be given the opportunity to supply further information which he believes may resolve the problem. If the license is denied, the exporter must be advised of the reasons.

Seventh, requires streamlining of application and processing procedures which industry representatives estimate now cost American businessmen as much as $100 million per year.

Present export documentation requirements are needlessly expensive for American businessmen. An exporter must file and have authenticated an export document prior to the date of shipping in addition to the export license which he has already received. The purpose of the export document is a check on the licensing, to ascertain that goods are not being shipped in violation of a license or without a license. However, there have been virtually no prosecutions as a result of information obtained by export documentation. An additional purpose of the documents is to obtain trade statistics. Witnesses claimed, and the Department of Commerce agreed, that statistical information could be obtained on a periodic basis rather than with individual filings for each export.

Because the Department of Commerce has plans for reform in this area, section 7(d) only requires that the cost of export documentation be reduced to the extent feasible. The Department of Commerce must periodically review documentation requirements and report actions taken to reduce costs and redtape.

Eighth, mandates the Office of International Trade Promotion in the Department of Commerce to reorganize its efforts in order to promote American trade wherever the proportion or volume lags behind that of our NATO allies.

The East-West trade market has been growing in the late sixties at the rate of about 24 percent a year. If present trends continue, Eastern Europe by 1980 will have a market the same size as the U.S. market today. Total East-West trade in 1967 with the West was over $15 billion. In 1966, the United States had 4 percent of this market; in 1967 the U.S. share of the market decreased to between 2.5 and 3 percent of total East-West trade. Three Western countries in 1967 did five times as much trade with the Soviets and five others did three times as much as the United States in the Eastern European market. The United States trails behind Sweden and Austria, accounts for less than one-half the volume of Italy and of France, less than one-third the volume of Japan and of Britain, and less than one-sixth the volume of West Germany. The trend continued downward in 1968, and the Export Control quarterly report for the first quarter of 1969 showed that in addition to lagging proportionately as the market increases, U.S. exports to Eastern Europe actually decreased:

> U.S. exports to the U.S.S.R. and the other countries of Eastern Europe during the first quarter 1969 totaled $39.3 million. This was a decrease from exports of . . . $55.2 million in the first quarter 1968.

The report goes on to say that during the second quarter 1969 "license applications for commodities valued at $70 million were denied for export to Eastern Europe."

I must add that American corporations are trading a great deal more with Eastern Europe than official figures show. This trade, which may run as high as $300 or $400 million a year, is carried on through American subsidiaries in Western Europe.

The language of the present Export Control Act conveys the attitude that trade with Eastern European countries is against the best interests of the United States, regardless of the nature of the goods involved. The realities of our improving relationships with the Soviet Union and Eastern Europe and of our poor showing in a promising trade market signal the need for a change in legislative emphasis. Section 4(a) of the new bill directs the Department of Commerce to promote East-West trade in peaceful goods as an indication that such trade is not against the best interests of the United States and as a tool in securing additional markets for American products. The section also directs the Secretary of Commerce to review the present commodity control lists and make the changes which would further trade in peaceful goods.

Ninth, establishes an Export Expansion Commission to study ways of expanding peace trade and report back to Congress within a year.

There are a number of factors in addition to U.S. export control legislation which limit U.S. participation in East-West trade. Although Eastern Europeans complain that U.S. export control legislation is an important inhibiting factor in our trade, it is probably more the uncertainty and delay in receiving licenses than the actual restrictions which make this a significant factor in trade relations.

Since 1964 the Export-Import Bank has been prohibited from lending its own funds for the financing of American exports to any Communist country, and since February 1968, the Bank has been prohibited from guaranteeing or insuring loans extended by private lenders to finance American exports to Communist countries. Before the Eximbank credits to Communist countries were cut off, Russia and Eastern European countries had to prove their credit worthiness to a greater extent than was required of other nations although there has never been a default on a Western transaction with any Eastern European nation.

With the exceptions of Yugoslavia and Poland, Eastern European nations pay the prohibitively high Smoot-Hawley rates for their products. The lack of most-favored-nation treatment, a routine concession to most nations of the world, is a serious barrier to U.S. participation in East-West trade. The most-favored-nation clause has been gradually extended to most of the Eastern countries by a very large number of Western countries. Refusal to apply it may be regarded as an exception except in the case of the United States.

If Eastern European countries are to participate in greater trade with the United States, they will have to pay for their imports with increased exports since credit is difficult to obtain. To export, the products must be competitive with highly sophisticated Western products and sold with techniques which will meet Western consumer demands. A dialog to help the Eastern Europeans find markets is engaged in everywhere except the United States.

Section 10 of the new bill is an attempt to meet some of the basic difficulties in East-West trade. It proposes a Commission composed of 15 members appointed by the President to study ways in which exports can be increased, particularly to Eastern Europe, without jeopardizing the national security. The Commission is to coordinate its activities with the National Export Expansion Council and report to Congress within 1 year.

Tenth, retains short supply controls and the antiboycott provisions of present legislation.

Section 4 contains two provisions carried over from the present Export Control Act. One allows export controls to be exercised to protect the domestic economy from the excessive drain of scarce materials. The other implements the language in section 3(6) in opposing restrictive trade practices or boycotts

fostered or imposed by foreign countries against other countries friendly to the United States; that is, the Arab boycott against Israel.

Eleventh, retains the violations provisions of present legislation with the addition that a violation of the act be a knowing one.

Section 6 provides court-imposed fines of imprisonment for willful or knowing violations of the act. In addition, the Government agency involved may impose a civil penalty. The amount of punishment authorized is the same as in present legislation. I believe that both the history of export control and the testimony of businessmen before the Subcommittee on International Finance justify the proposed legislative changes.

The Export Control Act was first adopted in 1949 when the dangers of the cold war were most immediate. Europe, still weak from World War II, appeared a ready target for a Communist takeover led by Joseph Stalin. America's economic strength, unscarred by the war, was our best weapon for strengthening Europe. At that time, to deny Russia—also ravaged by World War II—the benefits of American trade and technology was a logical cold war tactic. Today, 20 years later, both the economic and foreign policy justifications for the old act are gone.

Western Europe, Eastern Europe and Russia have recovered their economic health.

I am convinced that the days of Joseph Stalin have ended. I am not endorsing everything I see in Eastern Europe, but I do see many developments there that are quite encouraging. I see trade as an indispensable part of the process in developing stable countries in charge of their own affairs, and in the movement toward economic independence in Eastern Europe.

And I see trade as an indispensable opportunity for broadening understanding between our people and theirs. Through trade we can increase Eastern contacts with American businessmen. Through trade we can increase Eastern participation in international institutions and responsibilities. Through trade we can increase the stakes of both East and West in peaceful relations.

But what about the war in Vietnam? Is this a wise time to talk about increasing trade with Communist countries?

The type of trade we would allow has no material relationship to what is going on in Vietnam. This legislation continues the prohibition on U.S. trade with North Vietnam. Most of the Eastern European countries trade only to a very limited, pro forma extent with North Vietnam; our exports to them are primarily agricultural commodities. And neither our present level of trade with the Soviet Union nor any foreseeable growth could have an effect on military goods supplied to Vietnam. The Soviet Union is self-sufficient in arms production and is a major supplier of weapons outside its borders to such places as the Middle East and Nigeria.

Recognizing that times have changed and that the United States cannot influence its allies to suspend trade with the Chinese, let alone the Soviet Union, a more realistic approach to war and the trade question is to use trade as an "offensive weapon," designed to influence the attitudes of those in Communist countries.

At a time when we worry whether our "national interests" should allow us to trade with Russia, the Russians continue to supply us with platinum for our basic military and space industries and chrome ore which we must have to meet our needs in Vietnam. One of our traditional sources of chrome ore, Rhodesia, is subject to trade sanctions, so we are relying more heavily than ever on the Russians for chrome ore.

Ideally, trade should be neutral, regulated only by the marketplace, and until World War II, the U.S. Government restricted exports only in time of war or special emergency. When the war ended, trade restrictions continued—but the enemy changed: it became any nation under the control of a Communist government. The Export Control Act of 1949 declares:

> It is the policy of the United States to use its economic resources and advantages in trade with Communist-dominated nations to further the national security and foreign policy objectives of the United States.

The policy has been implemented by complicated administrative export controls giving Department of Commerce officials control over more than $30 billion worth of exports per year to all countries of the world. No specific Government authority is necessary for American businesses to participate in international trade, but each shipment out of the United States is subject to some sort of control.

The first step for an exporter is to determine whether his product may be shipped under a general license or whether it requires an individually validated license. A validated license application, accompanied by a "firm order" from the importer for the item, takes on the average 4 weeks to be processed through the Office of Export Control. The processing may include review by an interdepartmental committee consisting of representatives from the Departments of Commerce, State, Defense, Treasury, and sometimes from the Departments of Agriculture, Interior, the Atomic Energy Commission, the National Aeronautics and Space Agency, and the Federal Aviation Agency.

The exporter's problems increase if it is his American subsidiary in Western Europe that wishes to obtain a license. The subsidiary, and even Western European importers with no connection with the United States, must sign a form promising no transshipment of the goods without U.S. approval. If a manufacturer in a Western European country wishes to purchase a component part for a larger item, he is better off purchasing the component from a non-American source so he can avoid the necessity of obtaining U.S. permission to ship the larger item out of his own country.

American businessmen complain that licensing delays, the requirement that a "firm order" accompany each license application, the refusal to give advisory opinions on the probability of license approval, and redtape all lose sales in Eastern Europe and probably, more often than not, prevent American businesses from trying to develop the market. Of more importance than the licenses denied are the applications not received—deterred by the maze of paperwork and bureaucracy.

Most businessmen engaged in East-West trade will complain in private about the complicated applications, the long delays, and the barriers associated with export licenses. A number of important American businesses described the problems they have encountered before the Subcommittee on International Finance.

For example, Bendix International received a $400,000 order for precision measuring and gaging equipment for production-line gaging of auto parts for truck engine production at the Lihachev Moscow Auto Works. After more than 4 months delay, the Office of Export Control denied the license. The Soviets promptly purchased the same equipment from a Bendix affiliate in England. The American Bendix Corp. estimates that the business they lost had a total potential of several million dollars over the next 2 or 3 years.

The same company estimates that it is losing an annual potential sales volume of $1 million for mass spectrometers, semiconductors, and process gas chromatographs to be sold in the Soviet Union and Eastern European countries. The business currently goes to competitors in Germany, England, Italy, and the Netherlands.

A letter from David Packard, then president of Hewlett-Packard, one of the largest electronics firms in the country, described the impact of the high level of unilateral U.S. controls on the Hewlett-Packard product line:

> These controls, which are not duplicated by the other COCOM countries, affect 6% of our sales to friendly Western countries and a huge 53% when we deal with the USSR and other Eastern European countries excluding Poland and Romania. In fact, in this latter category, we are able to sell only $3 out of every $100—mainly medical equipment such as electrocardiographs—without restriction under General License. In contrast, West European and Japanese competitors with similar product mixes can sell $56 out of every $100 to Eastern Europe without restriction. In every instance we have investigated we have found similar items to be available from non-U.S. sources.

Hewlett-Packard presented more statistics before the subcommittee. Between January 1, 1968, and March 31, 1969, the company received decisions on 104 license applications, and the median time required to process the applications was 4 weeks. Adding an estimated 2½ weeks preparation time to this figure gives a median total delay of about 7 weeks. Only 2 percent of the applications were rejected.

Their specific problems with licensing include the loss of an order from a Russian purchasing organization for 10 9100A calculators, valued at $55,000, to West European suppliers because the American calculators required licensing and thus could not be sold "off the floor" during a recent exhibition. The second case involves the loss of a considerable number of orders for digital voltmeters

throughout Eastern Europe. U.S. export license applications for these products have been consistently denied, although comparable digital voltmeters are made by a number of West European suppliers who are only too happy to supply them to the East European market.

The Electronic Industries Association provided further examples of licensing difficulties resulting in lost business for American companies. In October 1968 a large American manufacturer received an inquiry from a licensee in Italy who had a prospective customer in Rumania for three 200,000 kilowatt turbine generators costing more than $2 million each. In early December the manufacturer filed a license application with the Office of Export Control. On January 30, 1969, with no information or decision yet from the Office of Export Control, the manufacturer received a letter from the licensee advising that the prospective customer had decided to order the equipment from another source.

Beginning in 1967, a manufacturer of electronic components received orders from Poland for tantalum capacitors. Export applications were denied, and subsequently the manufacturer learned that the same parts were obtained from a number of sources in France and Italy. The estimated business lost was between $50,000 and $100,000 per year. Another manufacturer estimates that orders totaling $3,600,000 for semiconductors from customers in Czechoslovakia, Romania, and Bulgaria were lost during 1968 because of export controls.

In 1965 crucial decisions were made about the type of color TV system which would be used in Europe. Americans hoped that a single system of color TV, the tested American NTSC, would be adopted, both for the business which would come to American suppliers and in the interests of international standardization of communications systems. However for Europe to adopt the American system, the United States had to give assurances that the components would be available throughout Europe, including Eastern Europe and the Soviet Union. After extended negotiations, the Department of Commerce indicated that approval would be given for the necessary export licenses, but the grant was qualified to such an extent that the decision was neither timely nor helpful. Europe eventually adopted not NTSC, but two other color systems, and the loss to American business has been conservatively estimated at tens of millions of dollars.

The Foxboro Co. pays a penalty for late shipment from a European plant because the total order includes a few parts, instruments for measuring acidity, alkalinity, or turbidity, subject to U.S. export controls. Licensing delays normally run from 4 to 8 weeks, thus delaying the entire shipment. The company reports two or three situations of this type a year which result in losses of goodwill and cash.

General Radio Co. received an order in November 1967, through their Zurich office from a customer in Czechoslovakia for a digital frequency meter. In February, 3½ months later, their export application was rejected. In October 1968, after a number of efforts to obtain a review of the decision the Department of Commerce suggested that General Radio resubmit the application, but by then the customer had purchased a similar product elsewhere.

In 1963, National Research Corp. applied for an export license to ship a small vacuum pump and baffle to a customer in Hungary. The license was denied, the firm appealed and 7 months later, the license was granted. The customer refused to accept the product 7 months late.

The Minnesota Mining & Manufacturing Co., the developer of magnetic tape, now finds itself competing with qualified manufacturers of video and computer tape: two firms from the United Kingdom, two from France, one in Belgium, a German firm, and four Japanese companies. Foreign buyers are switching from wire to magnetic tape for almost all communications purposes, but American sellers are not sharing this market as fully as they should because magnetic tape is on the U.S. export control list and subject to licensing delays.

For example, Minnesota Mining received the following letter from a Swiss firm to which they had made a bid for the sale of video tape:

> We have come to the conclusion it would be too long to supply you with all the information you require in order to get approval of the Department of Commerce in Washington and much to our regret we will for the time being have to use other products.

Another letter to Minnesota Mining reads:

> Your statement regarding the long delivery time due to the procurement of the export license surprises us greatly. For comparison we might quote we recently purchased these magnetic tapes via the suppliers of the computers, for example, the British ICT, and we have gotten the merchandise always promptly, in many cases even within one week.

A third letter to Minnesota Mining:

> Due to your letter dated April 26, 1968, we have contacted V/O Sojuzchimexport, Moscow, concerning the information requested by the Department of Commerce . . . Now, we have been informed by V/O Sojuzchimexport that by the delayed handling of this matter they have covered meanwhile their requirements through other channels.

Control Data Corp. submitted a proposal to Industrialimport, an agency of the Rumanian Government, for the licensing of one of their computer systems. Control Data began negotiations with the Office of Export Control in August 1968, to obtain the necessary licenses; the situation became academic in December when the Rumanian Government signed a licensing agreement with Plan Calcul in France, a company known as CII. In addition to the delay, Control Data was hampered by the fact that the Rumanian Government obtained three contracts from West European computer manufacturers for third generation computers which contain IC circuitry; Control Data was able to propose only a second generation computer because of U.S. export controls. The loss of the contract was a loss of several million dollars for U.S. trade statistics.

Yugoslavia is treated under the Commodity Export Act as a Western European nation in most instances. A validated export license had been granted Control Data to ship a computer to a Yugoslav electronics firm. The dedication of the system, involving a number of local dignitaries, was scheduled for October 1968, during the annual trade fair. At the last moment, spare parts were needed to replace some parts damaged in shipping the computer to Yugoslavia. Control Data had the spare parts in its Frankfurt, Germany, supply depot. But Yugoslavia, treated as a Western nation for purposes of export, is not with regard to spare parts. Therefore, Control Data had to ship the spare parts from the United States under separate export license; they did not arrive in time for the dedication.

While Control Data has waited up to a year and a half for the Office of Export Control to act on a license, the British competing firm, International Computers Limited has opened an Office in Moscow. Two British computers have been delivered to China, and two more are on order from a firm that is 10 percent owned by the British Government.

International Telephone & Telegraph lost more than $10 million in an order for a switching system and radio equipment for the Post Telephone and Telegraph Administration in Hungary. The switching system could be exported without a license, but the radio equipment connected with it was subject to export control. ITT negotiators, unable to obtain advice from the Department of Commerce, lost the order to a competitor who did not have to comply with export restrictions.

In 1967, ITT delivered a navigational system under U.S. license to an Eastern European Country. In 1968, an order for spare parts was received involving $124 worth of U.S. components. The export license application, submitted on December 4, 1968, was approved on April 24, 1969.

Another ITT customer had purchased a number of maritime radios which could be shipped without obtaining a validated license. However when the customer decided to manufacture the radio himself under a licensing agreement with ITT, the Office of Export Control refused except on a case-by-case basis to authorize ITT to ship the supporting U.S. components so the customer could manufacture the marine equipment.

SATRA Corporation, a trade organization, applied for an export license to ship spectroscopes to the Soviet Union. After 4 or 5 months an approval was granted, but in the meantime the Soviets had purchased the items from Holland. In 1962, a SATRA license to ship $20 million worth of stainless steel tubes to the Soviet Union was denied; the order was promptly filled by companies in Great Britain, West Germany, and Australia.

In 1968 and the beginning of 1969 at least 10 license applications were denied U.S. companies for shipments to Russia. The applications covered potential sales of $30 million, and all of those sales have gone to Western European or Japanese companies. The products involved: precision pulse generators, logging perforating units, strobocons, hydrocracking plants and catalyst production technol-

ogy, a vacuum electric furnace for thermal treating of balls for ballpoint pens, photoplates and developers, film plants, and complete equipment for the production of magnetic disk memory tape.

Another trade consultant described the potential sale of a plant and the technical know-how to produce certain chemicals for insecticides in Russia. Several months elapsed before the export license was approved. When it was, a Japanese company had already sold a readily available similar facility to the Russians at a competitive price.

Often the Office of Export Control suggests that the quantities indicated on a license application be reduced even though there is no objection to the item itself. The larger amounts might give rise to criticism from opponents of East-West trade simply due to the size of the transaction. A series of smaller amounts with successive applications for licensing does not appeal to the buyer who will order elsewhere rather than waiting for the full amount.

More hurtful than the actual delays and denials are implied denials. One witness estimated that millions of dollars in sales are lost each year to the Soviet Union alone because an exporter "feels" that his license application will be denied, and, wanting to keep a good record with the Department of Commerce, fails to make such an application. That witness cited his company's decision not to apply for licensing for a substantial order of wigs for the Soviet Union on the determination that the license would be denied.

All of the evidence the subcommittee received indicates that the present Export Control Act hurts no one but ourselves. The Communist countries of Eastern Europe are not hurt; they can obtain what they need from other free world countries. Western Europe and Japan are not hurt; indeed their businessmen have received a windfall by virtue of U.S. default. Only the American businessman and the U.S. balance of payments are substantially hurt. Basically we deny ourselves the right to compete.

One witness compared U.S. export control legislation to the ancient Chinese method of avenging oneself against one's enemy—by committing suicide on his doorstep.

The Export Expansion and Regulation Act of 1969 is intended to change the direction of export control by reducing the complexities, delays and uncertainties in the administration of export controls without sacrificing the objective of controlling the export of strategic goods.

The Banking and Currency Committee believes that this bill will be conducive to an appropriate expansion of U.S. trade and an improvement in relationships between the United States and other nations, while at the same time restricting the sale to Communist nations of goods of military significance.

Mr. BURDICK. Mr. President, will the Senator yield?

Mr. MONDALE. I am delighted to yield to the Senator from North Dakota.

Mr. BURDICK. I have been listening to the able Senator's presentation with a great deal of interest, and have wondered whether he intends to discuss the exportation of agricultural products, for example, North Dakota wheat. We will have, in my opinion, after this crop comes in, about a billion bushels of surplus or carryover wheat. The logical solution for handling this problem is to have markets—and markets outside the United States, because the United States can eat only so much wheat.

My question is, How does the measure the Senator is discussing here today fit into the problem of disposing of our surplus wheat?

Suppose that Russia or an Eastern European country would say, "We want 1 million tons of wheat. We have hard dollars with which to pay for it." In that event, how would the pending legislation enable us to make such a sale?

Mr. MONDALE. The committee, in the report but not in the statute, attempted to deal with this matter. We had originally considered a provision in the pending legislation to prohibit the use of the Export Control Act to impose a cargo preference on commercial sales of grains to Eastern Europe.

Mr. BURDICK. I am talking about commercial sales.

Mr. MONDALE. The Senator is correct. I am glad the Senator points that out. There has been some confusion about this matter. Many of us who supported the Food for Peace measure have consistently supported a Federal subsidy for the maritime industry to haul such items. So, in effect, the present 50-percent restriction on the commercial sale of grains and wheat to Eastern Europe has taken us out of the market. Wherever that restriction applies, it raises the cost of wheat by 10, 11, or 12 cents a bushel on the world markets.

Last year we had hoped to prohibit that situation by legislation. However, as the committee began its deliberations, it became clear that it was felt for other reasons that it would not be wise to try to include this issue as part of the broader export control provision.

We therefore included strong language in the report, directed at the executive branch, pointing out first of all that this was not a statutory restriction, but an Executive order issued several years ago, and that since it was an executive action, there ought to be an executive department correction of this matter.

We urged the President to immediately review and remove this restriction and to report to us at the earliest possible time on this matter.

We do not know if the President will act. We hope that he will.

Mr. BURDICK. Mr. President, how does the cargo preference law impede the sale of wheat?

Mr. MONDALE. The Cargo Preference Act itself does not do so. An Executive order prohibits an export license on the sale of wheat to Eastern Europe for commercial purposes.

It is sometimes confused with the Cargo Preference Act. However, it is an Executive order on the Export Control Act that we are getting at here. It provides that half of the wheat sold to Russia must be carried in U.S. bottoms even though the sale is strictly commercial. As a result of that we are out of the market and have been for several years.

Mr. BURDICK. Is that restriction made against free world countries?

Mr. MONDALE. Other products can be sold and hauled in foreign bottoms. However, if we want to sell one or two shiploads of wheat, half of it has to be hauled in a U.S. ship. That drives up the cost of the wheat to the point where we are not competitive in the world market.

We point out in our report that some who argue for this restriction say that there has been no demand in Eastern Europe for U.S. wheat. However, during the fiscal years 1965 to 1968, the United States shipped 2.5 million bushels of wheat to these Eastern European countries.

Mr. BURDICK. Was that wheat paid for in hard dollars?

Mr. MONDALE. The problem gets very detailed. Some of the countries in Eastern Europe are able to ship in foreign bottoms if they make a stop in Eastern European ports, but not the Soviet Union. It is a very complicated formula. However, as a result, we shipped 2.5 million bushels of wheat during the fiscal years 1965 to 1968. During that same period of time, Canada shipped 551 million bushels, Australia shipped 53 million bushels, Argentina shipped 86 million bushels, and France shipped 102 million bushels to these same countries.

Wheat shipments to Poland and Yugoslavia are not affected by the shipping restriction. And what happened where we could freely compete? During the fiscal years 1965 through 1968, the United States shipped a total of 138 million bushels of wheat to Poland and Yugoslavia, compared with less than 2.5 million bushels shipped to all the other countries because of the restriction.

I think that dramatically shows how we are able to compete where we do not have a restriction.

Mr. BURDICK. Were those sales paid for in hard dollars?

Mr. MONDALE. The Senator is correct. I think that occasionally there is some limited credit arrangement. However, for all practical purposes, the Senator is correct.

Mr. BURDICK. Is it the contention of the Senator that as long as the Cargo Preference Act applies, we will not be able to compete for sales in Eastern Europe and Russia?

Mr. MONDALE. I not only state that is correct, but I also point out that the record is abundantly clear on the matter.

The production of wheat in Russia has been erratic. Sometimes they have good crops, and at other times they have poor crops. When they have good crops, there is not much of a market. When they have poor crops, we find that we cannot compete at all because of the restriction while Canada, Argentina, and other countries make fantastic sales of wheat to these communities.

Mr. BURDICK. I understand that the report attached to the bill calls on the Executive to lift the restriction.

Mr. MONDALE. The Senator is correct. And we certainly hope that he will do so.

Mr. BURDICK. Mr. President, I com-

pliment the Senator from Minnesota for his presentation today. I hope that legislation of this kind will help to bring about a sale of some of our surplus wheat. And I am talking about a sale for American hard dollars.

Mr. MONDALE. Mr. President, I thank the Senator and I appreciate his support in our effort.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. MONDALE. I yield the floor.

Mr. MUSKIE. Mr. President, as chairman of the Subcommittee on International Finance which reported the bill and which originally considered the pending legislation, I am happy to support S. 2696, of which I am a cosponsor, which has been explained in detail by the distinguished Senator from Minnesota (Mr. MONDALE).

At this time, I pay tribute to the distinguished Senator for his outstanding initiative and leadership in the development of the pending legislation.

Well over 2 years ago the distinguished Senator from Minnesota arranged, with the permission of the subcommittee and the chairman of the full committee, the Senator from Alabama (Mr. SPARKMAN), an extensive tour through Europe during the senatorial recess to explore the question of trade with the Eastern European countries.

In the process of that tour and as a result of his studies since that time and the hearings which he has conducted on the pending legislation in the subcommittee, the Senator has developed considerable background, and from my point of view he has become an expert in this field.

I am grateful to the Senator from Minnesota for his help and cooperation and for his willingness to take the leadership in this field.

Mr. MONDALE. Mr. President, I thank the Senator for his very kind comments. However, were it not for the interest and the concern shown by the chairman of the International Finance Subcommittee, the Senator from Maine (Mr. MUSKIE), the pending legislation would not be before us in its present form.

The Senator from Maine presided over and participated in most of the hearings. At all times the Senator has shown a special interest in trying to modernize and create an act to protect the national security interests of this country, but, where our national security interests were not involved, the Senator made certain that the American businessmen could freely and fully compete in nonstrategic items in Eastern Europe. I am proud of this measure, and I think a good deal of credit must be given to the distinguished chairman of the subcommittee.

Mr. MUSKIE. I thank the able Senator. I have already said that he has explained the bill in detail. I would like to put it in the broad context in which I understand it, the broad perspective in which I think it has significance, for the benefit of my colleagues and for the purpose of establishing the reasons for my support.

Well over a year ago, at my request, Senator MONDALE conducted extensive hearings on East-West trade. The hearings brought out the deep interest many American businessmen have in expanding peaceful trading opportunities with Eastern Europe and the Soviet Union. The hearings highlighted the difficulties and redtape they encountered in dealing with present export control procedures. The information developed in Senator MONDALE's hearings convinced him and other members of the subcommittee, including Senators BROOKE, WILLIAMS, PERCY, and myself, and Senator PACKWOOD of the full committee of the importance of revising and updating the Export Control Act of 1949.

Mr. President, in considering the legislation before us today it is necessary for us to recall the international climate which prevailed in 1949, when the Export Control Act was enacted. The United States was engaged in a deepening cold war with the Soviet Union. The economies of Western and Eastern European nations, including Russia, were still staggering under the effects of a devastating world war. Among all the major trading nations of the world, the United States alone had an economy strong enough and sophisticated enough effectively to deny items of trade which could have proved advantageous to the military or economic potential of those nations with which we were at odds.

The Export Control Act was passed to implement a policy of denying strategic items to the Soviet Union. As other nations of Eastern Europe entered the Soviet bloc, the restrictive trade policies were applied to them. At the same time, the United States was undertaking a massive program of economic assistance to Western Europe under the Marshall plan.

The success of our efforts in helping Britain, France, Germany, Italy, and other Western European nations to recover from the ravages of World War II needs no documentation here. What does need emphasis is the fact that the Soviet Union and its Eastern bloc allies also demonstrated a remarkable economic recovery from the war. During the last 25 years the industrial capabilities of the Soviet Union have far surpassed their pre-World War II level. The Soviet Union now has a gross national product which is roughly one-half that of the United States, and its military capabilities rival our own. Furthermore, its economy is less dependent on imports than any other major nation in the world.

The world situation in 1969 has changed substantially since the early days of the cold war. Confronted by the hard realities of a nuclear age, both the United States and the Soviet Union have taken a number of steps to avoid military confrontaiton. The nations of Eastern Europe, once apparently bound to the Soviet Union by monolithic ties, have demonstrated increasing signs of new independence and a desire to seek new avenues of communication with the West. The economies of our allies in Western Europe and Japan have expanded to the point where they are now engaged in significant trade with Russia and Eastern Europe. Concurrently, the U.S. balance-of-payments situation has undergone a drastic, unfavorable change.

Existing export control policies do not reflect these changes. The hearings before the Subcommittee on International Finance last year and this year provided ample, often startling, evidence of instances where American businesses have lost millions of dollars of sales because of excessive delays in export licensing procedures. Businessmen gave evidence that in many cases these lost sales opportunities have gone to our allies in Western Europe and Japan, which do not have the same cumbersome red tape or lengthy licensing regulations as the United States. In addition the United States unilaterally controls some 1,300 export items, 1,100 of which are freely available elsewhere to the Soviet Union and Eastern Europe.

Mr. President, such an export control policy is close to self-defeating. It has not prevented Russia and her allies from developing strong, sophisticated economies, and it has not helped the U.S. position in world trade. A recent New York Times survey estimates that the total U.S. share of world trade actually decreased by 5 percent between 1962 and 1967. In fact, as the economies of our allies in Western Europe and Japan have recovered and expanded during the past two decades, they have become increasingly strong and aggressive competitors for international markets, which once were thought to be the exclusive property of U.S. business.

Mr. President, I think the time has come for the Congress to reexamine our national policy with respect to East-West trade and to bring it into line with the present-day realities of world politics and international trade. The President has stated that he is seeking new opportunities to improve our relations with the nations of Eastern Europe. Leaders of the Democratic Party have expressed similar views. It seems to me that the chance for expanded trade in nonmilitary, noncontroversial areas is a vital first step toward implementing this goal.

This is what the proposed export expansion and regulation act seeks to do. It would declare a new national policy "to encourage the expansion of trade with all countries with which we have diplomatic or trade relations, except those countries with which such trade has been determined by the President to be against the national interest." At the present time, this would specifically exclude trade with Mainland China, Cuba, North Korea, North Vietnam, Southern Rhodesia, or any other nation specifically named by the President.

The bill would also "restrict the export of goods and technology which would make a significant contribution to the military potential of any other nation or nations which would prove detrimental to the national security of the United States."

These two provisions, Mr. President, give the President ample flexibility to control exports for reasons of national security. At the same time they reflect our desire to expand trade in peaceful goods and technology.

Two other provisions of S. 2696 which merit special attention are the elimination of the "economic potential" test as a measure of whether goods may be exported and the establishment of an "availability elsewhere" test in consider-

ing export control license applications. Practically any item which is not designed for personal consumption contributes to the "economic potential" of an Eastern bloc nation or the Soviet Union. Furthermore, our ability to influence economic growth in the Soviet bloc is limited to the degree that export items are not readily available from other nations. The provisions in the bill before us reflect those facts, answer specific and well-justified criticisms of present export control policy, and attempt to make this policy more rational and consistent with present-day situations.

Opponents of this bill argue against it for several reasons:

First, that the policy of the bill is uncertain;

Second, that few export control licenses have been denied over the years;

Third, that the trade potential of East-West trade is small, anyway;

Fourth, that factors which made the Export Control Act necessary in 1949 have not changed substantially since then; and

Fifth, that the present act is a better approach to export control policy.

Mr. President, I contend that world conditions have changed since 1949 and that the export control policy contained in that act is an outmoded approach in 1969. I contend that the record of hearings on East-West trade has amply demonstrated that an overwhelming segment of American business opposes present-day export control policies, not because they want to materially aid the enemy, but because the Export Control Act has stalled and frustrated their legitimate attempts to engage in peaceful, nonmilitary trade.

These same businessmen overwhelmingly support the approach taken in the Export Expansion and Regulation Act of 1969. In addition, several former Government officials have expressed strong support for S. 2696, including such distinguished Americans as Averell Harriman, a former Secretary of Commerce and Ambassador to the Soviet Union, Nicholas deB. Katzenbach, former Attorney General and Undersecretary of State, John T. Connor, former Secretary of Commerce, and Theodore C. Sorensen, former counsel to Presidents Kennedy and Johnson. It was the considered judgment of these gentlemen, who have had first-hand experience with the administration of the Export Control Act, that the time has come for a change in that policy.

None of us who support S. 2696 argue that its enactment will automatically increase East-West trade or that the potential markets in Eastern Europe and the Soviet Union will ever amount to a large proportion of the total U.S. export market.

What we do argue, most emphatically, is that the time has come for us to take a positive approach to East-West trade. We believe that the thrust of our present policies is negative and that the administration of them will not change substantially without a new mandate from the Congress. It is not our intention to open the doors for trade which will in any way harm the national security of the United States. We believe, however, that the proposed Export Expansion and Regulation Act will be a positive declaration of this Nation's willingness to engage in peaceful, nonmilitary trade at the same time that it will continue to give the President all the authority he presently has to control exports which could prove harmful to the national security. Our declaration of policy is clear; the authority it confers is precise.

Mr. President, President Nixon has suggested that we move from an era of confrontation to one of negotiation. In the legislation before us we are arguing that expanded trade contacts can encourage negotiations in a relatively noncontroversial area, and that as we succeed in this area, we can improve the prospect for negotiations in more controversial areas.

The Export Expansion and Regulation Act of 1969 is one chance of doing this.

I urge my colleagues to support this bill.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MUSKIE. I am happy to yield.

Mr. FULBRIGHT. My understanding is that this bill was not reported unanimously. There is dissent about the bill. Is that correct?

Mr. MUSKIE. There is dissent.

Mr. FULBRIGHT. What was the vote in the committee on this bill?

Mr. MUSKIE. There was not a rollcall vote. To the best of my recollection, two members actively opposed the bill. Perhaps the Senator from Utah can correct me on that. I think that is accurate.

I understand that Senators BROOKE, PERCY, PACKWOOD, and GOODELL supported this bill in the committee, and, I understand, will do so on the floor.

Mr. FULBRIGHT. Is it clear what the basis for this objection is? Do they wish no bill at all?

Mr. MUSKIE. The Senator from Utah, of course, will express his views himself.

The administration told us, in effect, that its objective would be to facilitate trade between the United States and Eastern bloc countries, that it would attempt to facilitate the operation of the procedures which make that trade open to American businessmen, but that it was not prepared to endorse this bill.

So the objective of the administration and the sponsors of this bill appears to be similar, but we got bogged down, apparently, on details.

Mr. FULBRIGHT. Is there anything in this bill that affects the most-favored-nation treatment of the countries of Eastern Europe?

Mr. MUSKIE. Mr. President, this bill would do nothing with respect to favored-nations treatment. That is a responsibility of the Committee on Commerce. This bill simply deals with the control of export items. Right after World War II there was concern that we not export to the Soviet Union or its allies strategic items, which at that time included not only military items but, I gather, items that might be useful to the economic development of the Soviet Union.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. BENNETT. This bill calls for equal treatment for all countries, as a matter of definite policy. To that extent it affects the most-favored-nation proposition.

Mr. MUSKIE. It is not my impression that this bill legislatively has the effect of modifying our most-favored-nation policies which are governed by other and broader trade policies and legislation. These are export controls and do not affect imports. The bill states the policy cannot be fully implemented by this legislation, but it is the effort of the committee to implement, so far as we could reach an agreement in committee, with respect to export items.

Mr. FULBRIGHT. It is only in exports that we would be given equal treatment and not in imports. Is that right?

Mr. MUSKIE. The Senator is correct.

Mr. FULBRIGHT. Does this bill have anything to do with the requirement of shipping exports in U.S. bottoms?

Mr. MUSKIE. This bill does not. That policy was established under Executive order, the Senator will recall, in connection with wheat sales to the Soviet Union.

Mr. FULBRIGHT. The Senator is correct. Is that still in effect?

Mr. MUSKIE. It is in effect. An effort was made in this bill to modify that policy. After full consideration and another day of hearings the committee decided that, rather than try to amend the bill, it would include in the committee report an expression to the executive urging reconsideration of that policy and a modification of it. But we were not able to agree on an amendment in this bill to cover that policy.

Mr. FULBRIGHT. Does that not effectively prevent any sales to Eastern European countries, or Russia, or China?

Mr. MUSKIE. It deals only with wheat.

Mr. FULBRIGHT. Only wheat.

Mr. MUSKIE. I agree with the Senator completely. I think the effect of this is to take us out of the international market on wheat.

The distinguished Senator from Minnesota (Mr. MONDALE) I think, has a special interest on this point.

Mr. FULBRIGHT. I saw in the newspapers the other day that the Canadians have negotiated sales of wheat in the amount of $150 million, I think, with China.

Mr. MUSKIE. The Canadians have been doing that regularly.

Mr. MONDALE. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. MONDALE. The committee report sets forth the self-defeating nature of the 50-percent bottom requirement on commercial sales of grain to Russia. The figures show that during fiscal years 1965 through 1968, when the restriction existed, the United States shipped just under 2.5 million bushels of wheat to Russia and East European countries. In the meantime, Canada shipped 551 million bushels, Australia shipped 53 million bushels, Argentina shipped 86 million bushels, and France shipped 102 million bushels.

However, wheat shipments to Poland and Yugoslavia are not affected by the

shipping restriction. During fiscal years 1965 through 1968 the United States shipped a total of 138 million bushels of wheat to Poland and Yugoslavia, compared with less than 2.5 million bushels shipped to the countries affected by the restriction.

Mr. FULBRIGHT. I wonder if the committee did not feel it is time for us to open up our trade a little more in view of the imbalance in our international payments.

Mr. MUSKIE. This is one of the considerations that bore heavily on our decision to report this bill.

Mr. FULBRIGHT. Is the Senator informed of the estimates for this year's deficit in our international payments? Is it not quite large?

Mr. MUSKIE. I think there was an improvement in the last quarter for which we had figures. I shall put the figures in the RECORD as soon as I can get them.

Mr. FULBRIGHT. I think it would be interesting to see how that is affected.

My impression is that there were few items in this bill that are not provided in the market by England, France, Italy, and others. We are not really depriving the Russians of anything.

Mr. MUSKIE. This is a very sore point with our businessmen. There are 1,300 items on our control list. Of those, 1,100 items are freely available from our Western European allies or the Japanese to Eastern bloc countries.

Mr. FULBRIGHT. Even with respect to the 200 items not on the list, those 200 items are restricted only to Russia and these countries but they are not restricted for us to sell those items to purchasers in Germany, France, or England, are they?

Mr. MUSKIE. No.

Mr. FULBRIGHT. Therefore, all they need to do is buy them through a third country. Is that right?

Mr. MUSKIE. The Senator is correct.

Mr. FULBRIGHT. Unless there is a high degree of cooperation in the third country. In the early stages of the cold war these countries did cooperate in enforcement of the regulation.

Mr. MUSKIE. They still do on items that are strategic.

Mr. FULBRIGHT. The Senator is talking about commerce now?

Mr. MUSKIE. The original concept appears to have been that we were concerned about exports to Eastern European countries, those which affect the economic potential of those countries, as well. With this policy we have not been able to control the economic growth of the Soviet Union and the Eastern European countries, so it has been a self-defeating policy and it did not work.

Western European countries have been much more realistic about this matter, and so they opened up trade with Eastern bloc countries, realizing it holds benefits for them and it does not hurt them.

Mr. FULBRIGHT. Does the Senator have the testimony on how much trade West Germany has with Russia?

Mr. MUSKIE. Yes.

Mr. FULBRIGHT. Is it substantial?

Mr. MUSKIE. Yes.

Mr. FULBRIGHT. It seems to me it would be interesting to highlight what the West Germans and Japanese do. Do the Japanese trade with Russia?

Mr. MUSKIE. Yes, and they trade with the mainland Chinese and Cuba, as well. I shall get the figures for the RECORD.

Mr. FULBRIGHT. I think it is interesting to show the contrast between West Germany and the Japanese, those countries being great industrial nations, and have trade with Russians.

Mr. MUSKIE. While we are looking for the other figures, I will give the latest figures on U.S. trade with Eastern European countries in 1963. Our exports to Eastern Europe were $166.8 million.

Mr. FULBRIGHT. Does that include Yugoslavia?

Mr. MUSKIE. Yes. The next year was the year for the wheat sales. It climbed to $339 million. In 1965 it fell back to $140 million. In 1966 it climbed up to $197 million. In 1967, the last year for which we have figures, it was $195 million.

The interesting thing is that in the first quarter of this year, 1969, our exports to the Soviet Union and other countries of Eastern Europe, were $39 million. This was a decrease of $62 million from the previous quarter and $55 million in the first quarter of 1968.

So notwithstanding an announced policy of the administration to facilitate the export of goods to Eastern European countries, we have dropped in our export sales to those countries.

I wish to ask the Senator from Minnesota if he has the figures on trade between West Germany and other Western European countries.

Mr. MONDALE. I do not have the figure here. I think West Germany is the big trading partner in Eastern Europe today. Those figures are in the RECORD. I will check them now.

Mr. FULBRIGHT. I do not want to delay the Senator's speech, but I thought it would be interesting to show the difference. When we look at our condition today as to interest rates, our balance of payments, and the severe economic strain we are going through, it does seem shortsighted that we turn this kind of trade in large amounts over to countries like Germany and Japan, or to any of the other friends of ours and say, "You take this trade, we just default." It seems to me to be unjust to our own businessmen. We have an Export-Import Bank trying to foster exports to other countries, and we pay a subsidy to give them a low interest; but not to Eastern European countries. Unless there is some overriding security matter, it seems to me to be a foolish policy for us to follow. If it is a security matter, I should like to know what it is. Has there been any testimony on it before the committee?

Mr. MUSKIE. To the best of my knowledge, and I have listened to the testimony, and have read the testimony, the argument against this bill and its objectives is not any specific security risk. It is not argued that it would open the door to the sale of items that have a clear military value. It is argued that to open up trade with Eastern European countries would add to their economic strength, and therefore we should not do that. That seems to me to be the basis of the argument.

Mr. FULBRIGHT. It seems like a case of the "Mad Hatter" all over again. Even in the military, we were told by spokesmen for the administration not too long ago, or more specifically, the Pentagon, that the Russians have a weapon such as the SS–9. I do not believe it, but at least they said it is one which threatens to be much more effective than the one we have. If it is as good as we were told it is, during the debate on the ABM, I do not know why we are so careful about shipping them anything we have, because if we believe what the spokesmen in the Pentagon have said, that weapon is extremely efficient and sophisticated. That is why they ask for so much money from us.

Mr. MUSKIE. It is clearly the intention of the Russians to develop self-sufficiency.

Mr. FULBRIGHT. I do not think what they say is true. I thought it was hogwash, but anyway, that is what they said. How they reconcile that with the arguments they made against the bill is strange to me.

Mr. MUSKIE. It is clear from the picture of the Russian economy I have that Russia does not depend upon imports to build its economic strength. It depends upon imports to a lesser extent than any other major trading nation in the world today. It has built its economy by internal development, not by trade.

Mr. FULBRIGHT. They have been forced to do that by just such acts as this. Being as large as it is, with its total resources, it is true what has developed, but I am not at all sure it has been to our interests. I am inclined to think that it has been against our interests. Russia just wants to become as self-sufficient as possible. If we had traded with her, I believe there would have been less disposition to enter into pacts with other countries and to continue the cold war.

Mr. MONDALE. Mr. President, if the Senator will yield, we have found the figures—we shall have some later ones which we are now trying to uncover—which show commercial trade between West Germany and eastern Europe in the years 1964, 1965, and 1966.

In 1964, $839 million for eastern Europe.

In 1965, $889 million.

In 1966, $1,102 million.

I think they are substantially higher than that now.

In 1966, we had $197 million.

The standard American share of world trade is about 16 percent.

In Eastern Europe, we are less than 2 percent.

Based on the first quarter, we are one-half of 1 percent, largely because of the self-defeating restrictions on commerce in our strategic trade which does not deny Eastern Europe anything but gives preference to France, Germany, Italy, Great Britain, and Japan.

Mr. FULBRIGHT. It would be interesting to have the Japanese figures, too. We do everything we can to help them. We have armed forces in there to protect them. I do not know how many billions of dollars we spend in protecting Japan, and Germany as well, with our military

men. We have thousands of military men in Japan and yet we pass a bill like this, and Japan is one of our largest traders.

Mr. MONDALE. In that same period, 1966, that we had $197 million with all of Eastern Europe, Japan had $273 million.

Mr. MURPHY. Mr. President, will the Senator from Maine yield?

Mr. MUSKIE. I yield.

Mr. MURPHY. Is there any question of price differential? Is this broken down so that we can tell whether this is because of inability to compete, because of prices?

Mr. MONDALE. These are strictly dollar volume figures. They do not reflect in the tables themselves the question of a price differential. All the testimony the subcommittee took with different problems, it all boiled down to seeking or gaining trade, which of course goes into a great deal of detail, but these figures by themselves do not reflect that.

Mr. MURPHY. We see instances of great problems now because of their ability in the labor market to produce quality based on what they have learned from us, at sometimes as low as half the price.

Mr. MUSKIE. What is involved here is not that question at all.

Mr. MURPHY. Yes.

Mr. MUSKIE. These four volumes of hearings cover 2 years in the field with stories and complaints of American businessmen, all of whom could sell more goods in these countries but for our policies and restrictions. They can compete. They want to compete. They are denied the markets, however. That is the problem.

Thus, these figures do not indicate any inhibitions. On the contrary, if we were able to relax our policies in accordance with the judgment of American businessmen, who tell us they can increase sales, it will not be an astronomical program, but they would be able to compete in the items they discussed with us.

Mr. MURPHY. I thank the Senator. That answers my question.

Mr. MUSKIE. Mr. President, I am going to close my formal remarks with perhaps 3 or 4 more minutes of observations so that we may proceed with debate.

The committee was motivated by the conviction—that is a majority of the committee—that in light of the changes which have taken place on both sides of the Iron Curtain since the original Export Control Act was enacted in 1949, the time has come for Congress to reexamine national policy with respect to East-West trade and bring it into line with present-day realities, world politics, and international trade.

The President has said that he is seeking new opportunities to improve our relations with the nations of Eastern Europe and to enter into an age of negotiations.

Leaders of the Democratic Party have expressed similar views. It seems to me that the chance for expanded trade in nonmilitary, noncontroversial areas is a vital first step toward implementing this goal. This is the modest nature of what the bill before the Senate undertakes to do.

It does not open wide any doors that should be closed. It merely undertakes, in a very modest way, which still leaves full control to the President in a way that I shall describe, the opportunities for peaceful trade with Eastern bloc countries. This trade is urgently desired by American businessmen, as they have testified in testimony covered in the four volumes which we have here in the Chamber at the present moment.

Now let me indicate to the Senate the control that the bill before us would give to the President. It would declare a new national policy "to encourage the expansion of trade with all countries with which we have diplomatic or trade relations, except those countries with which such trade has been determined by the President to be against the national interest."

At the present time this would specifically exclude trade with mainland China, Cuba, North Korea, North Vietnam, Southern Rhodesia or any other nation specifically named by the President.

In addition, the bill would "restrict the export of goods and technology which would make a significant contribution to the military potential of any other nation or nations which would prove detrimental to the national security of the United States."

These two provisions, Mr. President, give the President ample flexibility to control exports for reasons of national security, and at the same time they would reflect our desire to expand trade in peaceful goods and technology.

Mr. President, if what we like to describe as the world's most powerful nation could not operate, within the limits of this modest kind of policy, to protect its own security while it expanded trade, then there is something wrong with the patriotism, ingenuity, and commonsense of the American businessman who would be implementing this policy.

I think we are playing a game of blind man's buff in the business of world trade or our own trade with Eastern Europe. All our allies, all our friends, all our Western trading partners are doing business with these European countries, and all that our own American businessmen are asking is an opportunity to do business with the same people on the same basis.

Are we so fearful of our ability to do so and protect our security that we must deprive ourselves—this great commercial country—of an opportunity which is so freely seized by countries less powerful, more closely located to the Eastern European countries?

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question?

Mr. MUSKIE. I yield.

Mr. FULBRIGHT. Does this act affect a subsidiary of an American company that is operating in Germany, for example? Opel belongs to General Motors, as I understand it. Does this act affect Opel in Germany in selling anywhere? Does the Senator know whether it would?

Mr. MUSKIE. I understand the Treasury Department has some control over this kind of relation, by controlling part of the assets of the American corporation.

Mr. FULBRIGHT. If it did, it would run afoul of the German Government.

Mr. MUSKIE. It is a difficulty, and we do run into difficulties.

Mr. FULBRIGHT. I would think it would create a bad feeling between countries that think they are independent if we, through subsidiaries, tried to control sales, because they were sales of a subsidiary of a U.S. company. This is a German company. The greatest benefit occurs to the Germans, because they employ German workingmen and they pay German taxes. If the United States thinks it can, in this fashion, control the trade of a country like Germany or Japan, I think it is going to run into serious troubles.

Mr. MUSKIE. There is no trouble with them as a result of our policies with respect to trade with Eastern Europe. These countries laugh at us.

Mr. FULBRIGHT. That is with respect to our own companies. They like the idea of a German company trading with Eastern Europe because it brings in substantial funds to them. What they laugh at and what they like is for us not to trade directly with those countries.

Mr. MONDALE. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. MONDALE. We estimated that there are about 1,100 major items freely available to them from Western countries, not controlled by COCOM, which we unilaterally prevent our own businessmen from selling to them. I have seen pages of specific items which came out in testimony by businessman after businessman. They had been bargaining for contracts of nonstrategic, nonmilitary items, and the export license office would not give them a license. The deal fell through, and the British, or the Germans, or the French got it. The balance of payments went to them. We lost the contract. We did not gain a thing. It is a self-defeating, Joe Stalin hangover.

Mr. FULBRIGHT. It strikes me that way.

Mr. MUSKIE. May I quote the testimony of Secretary Ball on the very point the Senator has raised. I think the Senator might be interested in his testimony, which relates to the problem of extraterritoriality. He said:

> A more significant problem is that of extraterritoriality, which I hope will be addressed by the Congress. This is a problem that most often arises under the Trading With the Enemy Act, where the United States attempts to impose on the subsidiary of any American company doing business in a foreign country a policy which is not accepted by the government of the country in which the subsidiary is doing business.
>
> Now we had a number of examples of this and they have been extremely abrasive. One or more have concerned our relations with Canada, where our government's actions have been deeply resented by the Canadians. I recall a case of some wheat loading machinery that was in possession of a company or two in Canada—I think all of the companies that happened to have this particular kind of wheat loading machinery were subsidiaries of American companies. And we said, "You can't use this machinery to load

the wheat to go to China." It was a machine put on the ship and I think it went along and unloaded it at the other end.

The Canadians were quite naturally upset. They said:

"You are telling a Canadian company doing business in Canada it can't use a particular piece of equipment for handling the wheat in connection with a sale which the Canadian Government has made."

Now, this is only an illustration of the point. We have had some other situations in France. Sometimes the subsidiary company is not even wholly owned by the American parent, but there is a substantial minority interest and this aggravates it, because the minority interest, living in the foreign country, says, "What does the U.S. Government have to do with us? Why can't we run our business, as long as we comply with the laws of the country where we are situated? Why can't we run our business as we wish to?"

The Senator is quite right. Secretary Ball went on to discuss other instances.

Mr. FULBRIGHT. The Canadians rejected the protest, did they not? They did not abide by it?

Mr. MUSKIE. They found a way around it.

Mr. FULBRIGHT. For the self-respect of the country, I would think they would.

What does this bill do about it? Does the bill remove the 1,100 items from the requirement of having to have an export license?

Mr. MUSKIE. No.

Mr. FULBRIGHT. Why does it not?

Mr. MUSKIE. Because we have the best bill we could get through the committee. It is a very modest bill. The Senator from Minnesota, who authored the bill, and who has pushed it this far, will correct me if I am wrong. My impression is that the bill in the present form does nothing more than indicate that it is the desire of Congress that the President, by the exercise of his discretion and by the use of the executive machinery—to which we have made additions—will undertake to break down these barriers and to eliminate the red tape and loosen up the licensing procedures so American businessmen will be encouraged to come in and ask permission to sell.

Mr. FULBRIGHT. In what way does the bill improve the existing law? Is it not just an extension of the law?

Mr. MONDALE. Mr. President, if the Senator will permit me, one principle we had to accept—and I would have preferred not to have it—was that it was strongly felt by a minority in the committee that we could not do anything to deny the President the power to restrict an item if he decided to have it restricted. I would have preferred, as in my original draft, that the President would not have been able to deny the export of an item if it were available elsewhere. It is patent that it does not achieve anything except to provide a foreign competitor the ability to get our business.

In any event, we felt we had to accept that principle, and we were willing to go along.

In the first place, the present law says that wherever there is an economic or military significance in an item to be exported to Eastern Europe, it must be prohibited. Any conservative administrator could conclude that almost any item was of economic significance, or the country would not have desired to purchase it. We knocked the word "economic" out and applied only "military," which liberalizes the standard.

Second—and I think this is very important—we have a complicated, although not decisive, rule that, when the item is available elsewhere, is not exclusively available from us today, and is not a military item, no license should be required unless the President affirmatively states that he wants it licensed nevertheless, and sends us a report giving us the reasons why.

Furthermore, and this is very important: One of the big problems with the Export Control Act is that the businessmen who deal with it are left completely in the dark, once they apply; they do not know whether they are being turned down, or why their applications are delayed, and we have several safeguards, not to restrict the President's power but to permit the American businessman to have his side of the case heard, and to insure that the applicant be told the reason for whatever action is taken.

In other words, we have tried to create an adversary proceeding, so that the whole story may be told. This is not a perfect answer, but we think it goes a long way toward creating a balanced approach to the problem.

Today the Export Control Office, in my opinion, acts very much like the security officers in Joe McCarthy's day. In other words, the easiest thing for them to do is turn everything down, because then they will never be personally criticized by anyone. It tends to make them extremely conservative in their judgments. This bill tries, as best it can, to leave the President with all the power he needs to do anything he wants, but at the same time to eliminate the inherent excessive conservatism and fear of the administrator.

Mr. FULBRIGHT. Who will actually administer this act? Who is likely to make the decision, what officer?

Mr. MONDALE. It will continue to be the Export Control Office in the Department of Commerce.

Mr. FULBRIGHT. Who is the head of that office now?

Mr. MONDALE. It is under Assistant Secretary Davis. The actual Administrator is Rauer Meyer.

Mr. FULBRIGHT. I thank the Senator.

Mr. MUSKIE. Mr. President, the colloquy between the distinguished Senator from Arkansas and the distinguished Senator from Minnesota emphasizes, I think, the essential modesty and conservatism of this bill as a change in our export control policy. I do not think that, by anything further I might say, I can add to the picture, and I am happy to yield the floor so that the other side may present its case.

Mr. BENNETT. Mr. President, I send to the desk an amendment in the nature of a substitute, cosponsored by the Senator from Texas (Mr. TOWER) and the Senator from Colorado (Mr. DOMINICK), and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be started.

The assistant legislative clerk proceeded to read the amendment.

Mr. BENNETT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENNETT's amendment is as follows:

SECTION 1. Section 12 of the Export Control Act of 1949 (50 U.S.C. App. 2032) is amended to read as follows:

"TERMINATION DATE

"SEC. 12. The authority granted in this Act terminates on June 30, 1971, or on any prior date which the Congress by concurrent resolution or the President may designate."

SEC. 2. Section 1(b) of the Export Control Act of 1949 (50 U.S.C. App. 2021(b)) is amended to read as follows:

"(b) The unrestricted export of certain materials, information, and technology may adversely affect the national security of the United States."

SEC. 3. The third sentence of section 3(a) of the Export Control Act of 1949 (50 U.S.C. App. 2023(a)) is amended by changing "shall determine that such export makes a significant contribution to the military or economic potential of such nation or nations which" to read "determines, taking into consideration its availability from other nations with which the United States has defense treaty commitments, that such export".

SEC. 4. Section 6 of the Export Control Act of 1949 (50 U.S.C. App. 2026) is amended by adding at the end thereof the following new subsection:

"(d) In the administration of this Act, reporting requirements shall be so designed as to reduce the cost of reporting, recordkeeping, and export documentation required under this Act to the extent feasible consistent with effective enforcement and compilation of useful trade statistics. Reporting, recordkeeping, and export documentation requirements shall be periodically reviewed and revised in the light of developments in the field of information technology. A detailed statement with respect to any action taken in compliance with this subsection shall be included in the first quarterly report made pursuant to section 8 after such action is taken."

Mr. BENNETT. Mr. President, the amendment I have sent to the desk is the text of the House bill, which passed last Thursday in the other body by a vote of 272 to 7, and which we shall face in conference if the bill as now supported and discussed by my friends on the other side of the aisle should pass.

The House bill is, in effect, an extension of the present Export Control Act, with three amendments.

The House bill, as this bill does, strikes out the requirement for consideration of the economic potential, leaving only consideration of the military potential.

Second, it says that the President must take into account the question of general availability, but it does not automatically reverse the process, and force him to remove everything from the list that is available elsewhere unless he makes a personal decision and notifies Congress.

The House of Representatives bill has other requirements which would reduce the paperwork involved in the obtaining of an export control permit.

We, of course, act entirely independently of the other body, but it is gratifying to know that on this important issue, they supported the President's position that the flexibility which he needs to carry out a responsible export program be retained.

As originally introduced, the bill almost stripped the President of his authority to deal with trade with Communist countries; but it has been greatly modified as a result of the hearings and discussions by the committee.

As reported by the committee, it contained much of the authority provided in the present Export Control Act, but, as a new feature, it combines the concept of trade expansion to Eastern European countries with control authority over exports. Other legislation before other committees, covering tariffs, export credit, and trade promotion is, I think, much more appropriate for dealing with trade expansion. In attempting to have this bill provide for control while also urging trade expansion, what has resulted is a misleading bill from its title throughout most of the new provisions covering export control policies and procedures, and would result in a divided responsibility.

The bill interposes a number of requirements in the administrative area which I believe to be unnecessary, burdensome, and costly for the Government; and apparently the President shares that view. These requirements include organizational and procedural changes by the Secretary of Commerce and extensive review of the complete export control list by the Department of Commerce, frequent notification and detailed explanation to the Congress of routine exceptions authorized by the bill, a continuing review of reporting and documentation requirements together with detailed statements to the Congress of action taken, and a burdensome requirement that extensive information be provided to exporters throughout the Department's consideration of licensing applications. In addition, the bill establishes a new Presidential Commission on Export Expansion which would, to a considerable extent, duplicate work already being carried on by established organizations and would thereby confuse rather than assist the export expansion program.

The bill requires the President to include a detailed statement of his action, if he restricts exports without making the determination, that comparable goods are not available elsewhere or that the exports would make a significant contribution to the military potential, which would prove detrimental to the national security of the United States. Even though as an exception, the President is granted the authority to restrict in the interest of national security, any commodity or technology as long as he reports such action to the Congress, the effectiveness of those administering the act is bound to be inhibited by these changes. Exporters and representatives of other governments will read a significant change into the language of the bill and bring additional pressure to bear for reduction in controls on critical items and for approval of questionable export applications.

At best, the bill will be confusing to exporters, cause significant difficulties in administration, and stimulate troublesome court challenges. Further, it will give an unwarranted signal to the Soviet Union that we intend to make our advanced industrial goods more readily available now, even though they have demonstrated no real desire for improved relations between East and West. In fact, last year's Czechoslovakian invasion stands as strong evidence against any such interest.

The bill could result in undue weakening of export controls with attendant risk to our national security.

The proposal which would replace the present Export Control Act is based on the assertion that factors which brought about the enactment of the Export Control Act no longer exist.

It is suggested that we are now living in an era in which the Soviet Union presents a reduced threat to the security of the United States. The fact is that the Soviet Union is a much greater threat to the security of the United States than it was when the Export Control Act of 1949 was passed. The Soviet economy then was undergoing a real struggle to provide the barest necessities for their own people because of the ravages of war when the Export Control Act was enacted in 1949. The Soviet Union has now become one of the world's greatest industrial powers. To conclude that such an economy provides less of a potential threat to this Nation than one which had a real struggle to provide the barest of necessities is absurd. Relative military capabilities of the United States and the Soviet Union in 1949 as compared with the present inevitably lead to the same conclusion.

Many of the provisions of the bill contradict each other. The present Export Control Act establishes a forthright policy of restricting exports on the basis of possible contributions to economic potential or military potential. Its language allows restrictions of exports whenever it is determined by the President that they make a significant contribution to the military or economic potential of a nation or nations, which would prove detrimental to the national security and welfare of the United States. The committee bill has eliminated the criteria of "economic potential" and retained only the "military potential" criteria.

In a modern industrial nation, economic potential and military potential are virtually synonymous.

Mr. President, it is ironic that the proposed bill in section 2(4) says that the Congress finds that "the uncertainty of Government policy toward certain categories of exports has curtailed the efforts of American business, yet this bill is sure to increase uncertainty. The whole announced purpose of the bill is to encourage the expansion of trade with all countries with which we have diplomatic or trading relations. This is stated in sections 3(1)(A), section 3(3), and section 4(a)(1). It is interesting to note, however, that in every case where this "change of policy" is stated, it is always followed by an exception which allows the President to make export determinations on the basis of national security, foreign policy of the United States, or the need to protect the domestic economy. Those are the criteria which are used in the present Export Control Act. Thus the bill appears to encourage the expansion of trade on the one hand, while on the other hand it provides for essentially the same restrictions which presently exist.

Moreover, on the one hand the bill holds out the policy of equal treatment for all countries. Yet section 3(5) of the bill states that it is the policy of the United States to use its economic resources of trade potential to further its foreign policy objectives. This latter policy is the one under which the United States has been operating for many years and obviously nullifies the "equal treatment change." The form without substance becomes even more apparent when it is known that the President of the United States, the one who holds the authority, opposes a change in policy at this time. Administration spokesmen have made it very clear that the President feels he should be free to seek a more appropriate time for liberalizing trade with the Communist countries. Yet the Congress, if it should pass this bill, would give an overt indication of the change of policy or attitude of this country. I believe that the President should have this constitutional latitude to relate liberalization in the trade area to broader foreign policy considerations. This bill, in my view, is an attempt to preempt the President's judgment on timing and force him into a policy of liberalization, while still holding him responsible to determine specific export policy.

It has been represented—and a great deal has been made of this today—that the nations of Eastern Europe and the Soviet Union are currently trading with our Western allies to a much greater degree than they are with the United States "because of the unilateral restrictive policies of the United States." This is far too simplistic to be accurate. The items under export control represent only a tiny fraction of the goods generally exchanged in international trade. Western Europe does much more business with Eastern Europe than we do for many reasons, primarily because of geographical proximity and the ready availability of these products and the opportunity to get them shipped at a lower cost. And whether we would like to forget it or not, the two countries, West Germany and Japan, which have been offered here today as examples of countries that are taking advantage of an opportunity on which we have shut our doors, have costs very much lower than ours. And while it is pleasant to say that our businessmen can compete, we have only to realize, for instance, that most of our radios and many of the televisions we can buy today under American labels are made either completely in Japan or are assembled here with component parts that are manufactured in Japan.

They can undersell us in our own market. So it is obvious that they can undersell us in the Eastern European market. The great bulk of this trade between Eastern and Western Europe is in products which our companies are also free to export, if they can obtain orders and get the price.

The Department of Commerce testified that less than 2 percent of the export

license applications received for Eastern Europe are denied. Supporters of this bill claim that is true because American exporters just do not try to export to Eastern Europe or the Soviet Union in items on the control list in any degree because they know that they will be turned down. I do not know how exporters know they will be turned down if they do not apply, particularly if 98 percent of the applications are not turned down.

Exporters do not know they will be turned down because all but a small percentage of requests are granted. In the last quarterly report dealing with export control, I find that approvals were given for exports to East European countries and the Soviet Union for such items as harvesting machines, tractors, electronic digital computers, metal-working machinery, metal treating and metal powder molding machines, rubber processing and rubber products manufacturing machines and parts, nuclear radiation detecting and measuring instruments, synthetic rubber, metal-cutting milling machines, gear-cutting machines, well-drilling machinery, metal-processing and heat-treating furnaces, telecommunications apparatus, and many other similar exports.

I could continue with a much longer list. We have already become very liberal in our concept of the materials that can be exported on the theory that they do not increase their military potential. With approvals on such a broad group of industrial products, not to mention the many agricultural and less sophisticated product approvals, how would an exporter come to the conclusion that his application would automatically be turned down?

I am particularly disturbed by repeated statements by the bill's proponents that its intent is to increase trade in "peaceful goods." Yet most of the industry witnesses represented companies with highly advanced technological products such as electronic control equipment, computers, and machine tools. Enactment of this bill following our hearings could well lead to a conclusion that the intent of Congress is to consider the bulk of our advanced technological products as "peaceful goods" to be freed for unrestricted sale to Eastern Europe. The result could be serious misunderstandings among business, foreign governments, and those in charge of administering export controls. It is not simple to separate "peaceful" from "nonpeaceful" goods and referring to "wigs" or "needles" or "buttons" as is done by proponents of this legislation in their attempt to bring about relaxed control is just begging the issue.

Our vast experience in East-West trade should remind us that our friends in the Eastern bloc are not interested in setting up a continuing supply of American goods of this type. They want to get one as a prototype which they can copy. And this is the problem that I think the President should be free to face.

I have yet to hear a definition of "peaceful" goods that would apply in a workable manner to decisions on the export of computers, silicon transistors, hydraulic presses, high-precision antifriction bearings, special alloys or numerical control machines without considering each transaction. Not one witness before our committee suggested that their products now being required to have an export license should be removed from the controlled list. Not one of them testified that their products could only be used for "peaceful" purposes.

Why? Because all of them knew that their products do have military potential and that they do not have the information necessary to make a determination as to whether their use could be detrimental to the security of the United States.

The Export Control Act has not had a major detrimental effect on our trade balance and relaxing its provisions would not significantly improve our trade surplus despite contrary allegations. The dwindling of our trade surplus from over $7 billion 5 years ago to an approximate balance is the result of basic economic factors, largely price factors, brought about by the unwise economic decisions of the past two administrations.

Most knowledgeable estimates indicate that trade with Eastern Europe, even under most favorable conditions, can grow only very modestly, and is unlikely in the foreseeable future to reach as much as 1 percent of our total exports.

Eastern European countries have, in general, carefully controlled bilateral trade with free world countries. They do not have free world currencies with which to pay for their purchases. And this fact probably controls much of their purchasing decisions.

For political as well as economic reasons, these countries try to maintain balanced trade with Western nations. For the years 1966, 1967, and 1968, U.S. exports to and U.S. imports from Eastern Europe were virtually in balance.

Shortage of foreign convertible exchange is a continuing fact of life for the Eastern European countries with the possible exception of the U.S.S.R., which has gold reserves. Even in the case of the U.S.S.R., however, there appears to have been a great reluctance to convert its gold reserves for foreign trade purposes. An exception occurred in 1963–64 when there was a grain disaster in the U.S.S.R. Late in the fall of 1963, the U.S.S.R. negotiated with the United States and purchased $140 million worth of wheat—which was delivered in 1964. During this period the Soviet Union also purchased considerable amounts of grain from Canada, Australia, and Argentina. From time to time there are reports that the U.S.S.R. is selling gold in the English or Swiss financial markets.

The problem of payments for export by Eastern European countries is further complicated because of the lack of multilateral convertibility resulting from trade between the free world and the Soviet bloc countries. Export surpluses that may result from intrabloc trade cannot be used in trade with free world countries because of the lack of convertibility.

I believe a relaxation of U.S. export controls would at best provide a very marginal improvement in our balance-of-payments position with Eastern European countries. The level of the trade between the United States and Eastern Europe in the last 3 years has averaged approximately $200 million each way with a very slight export surplus in our favor.

East-West trade must be a two-way street. Because Eastern Europe has limited convertivle currency, it must sell us about as much as it buys. However, Eastern Europe has few products which we need, and thus there is a limited basis for significant continuing two-way trade. The Soviet Union and Eastern Europe today are greatly interested in our advanced products and technology, many of which have both civilian and military significance, to expand their industrial capacity. Many of these transactions become one-shot deals with little or no follow-on sales prospects.

Mr. President, I find a further contradiction in the committee's action on the proposed bill. Section 7(c) provides that—

> No department, agency, or official exercising any functions under this act shall publish or disclose information obtained hereunder which is deemed confidential or with reference to which a request for confidential treatment is made by the person furnishing such information, unless the head of such department or agency determines that the withholding thereof is contrary to the national interest.

Section 9 of the bill requires the agencies, departments, and officials responsible for implementing the rules and regulations authorized under this act to inform exporters of considerations which may cause a denial of license request so long as the information does not jeopardize the national security and effective administration of this act. The Department of Commerce, in its attempt to clarify the bill, recommended that a provision be included in this new section providing for confidentiality of business information. That request was turned down. We now have one section, section 7, requiring confidentiality, while the other section does not provide for confidential treatment of business information. I find this inconsistency in the bill unexplainable.

The penalties for violating the act have been changed from those presently contained in the Export Control Act. Despite the fact that the present penalties have been used primarily as a deterrent, the committee decided to do away with a possible 1-year jail sentence for a violation unless it could be proved that the violator did so knowingly. During our hearings and discussions of the committee, there was no indication that the present penalty provisions had been misused or abused. It is interesting that the change is justified on the basis of "concern over the constitutional question of a severe jail sentence and fine for unknowing violations." The present provisions authorizing up to 1-year imprisonment for a violation has been part of the act for 20 years, and nobody has been disturbed about it.

It seems to me that the proponents of the bill should either decide whether they want to have equal treatment between Communist and non-Communist countries except for specific Presidential determinations or whether they want some

differentiation retained as in the present Export Control Act. Section 3(3) of the bill states:

> It is the policy of the United States that any export controls found necessary should be applied uniformly to all nations with which the United States engages in trade * * *.

If, indeed, it is the intent of the bill to have equal treatment between Communist and non-Communist nations, why are unequal penalty provisions retained? Much harsher penalties are authorized in the event of exports contrary to the act with knowledge that such export will be used for the benefit of any Communist-dominated nation. The committee report properly states that this subsection is identical to one now contained in the Export Control Act. What it does not say is that the Export Control Act—the present one—differentiates between Communist and non-Communist nations, whereas this bill makes no such differentiation and in no other place in the bill is the term "Communist-dominated nation" used.

During our hearings, representatives of the Department of Commerce explained their desire to assist American business with its exports. That is one of the major purposes of the Department of Commerce. The Department of Commerce has major programs underway for the expansion of U.S. exports to meet the challenges posed by the unfavorable changes in this country's balance-of-payments position and the substantial drop recently in our normally favorable balance of trade.

Included among such programs are overseas trade fairs and exhibits, permanent trade center operations in a number of key cities in various areas of the world, governmental trade missions, governmentally sponsored industry trade missions, various market development efforts, the organization and partial financing of joint export associations, and a wide variety of commercial publications and information services.

Some of these are expansions of long-standing Commerce activities in this field, while others are recent additions. In addition, Commerce strongly represents the export trade promotional element within the executive branch on both policies and programs, including such matters as adequate export financing, export incentives and general reductions in tariff and non-tariff restrictions. Commerce is also actively engaged in reducing export documentation requirements and has recently taken several major steps to reduce the requirements for shipper's export declarations which should result in considerable savings to the trading community and increased efficiency in their export operations. All of these efforts are currently addressed primarily toward improvement of this country's trade balance and balance-of-payments position. They are pointed, more specifically, to achievement of a $50 billion export goal by 1973.

In further explicit support of both this goal and general export expansion, Commerce supplements its normal complement of contact with the international trading community through its National Export Expansion Council and the numerous Regional Export Councils which draw upon representative businessmen to advise the Department on export policies and programs and to assist in carrying them out. In addition, there is the Cabinet Committee on Export Expansion, chaired by the Secretary of Commerce, and its several subgroups whose main purpose is to achieve high-level policy coordination in interagency efforts to attain the $50 billion export goal and continuing export growth. In recent years, Commerce has shown itself increasingly to be imaginative, constructive, and forceful in the promotion of our international trade and in the development of meaningful techniques to accomplish this end. Even greater efforts are now being addressed to this end.

The preceding comments relate primarily to export trade with free world countries. The majority report on S. 2696 indicated that the emphasis of the proposed Export Expansion Commission would be on trade with Eastern European countries. In this regard, the record of the Department of Commerce, as well as that of other executive branch agencies directly involved in the field of international trade, has been consistent with both executive branch policies toward this area and the realities of the trading situations and potential between the United States and Eastern European countries. Trade in peaceful goods and technical data has generally been favored and facilitated as executive branch policy permitted. From time to time there have been exchanges of trade missions in various technically oriented groups. There has been participation in some trade fairs in Eastern Europe and reasonable relaxation in U.S. export control has occurred. Most experts in East-West trade that have appeared before our committee and other congressional bodies on this matter seem to agree that the problem of increasing U.S. trade with Eastern Europe rests primarily on matters such as availability of export financing and of most-favored-nation treatment, the ability of Eastern European countries to export on a competitive basis to the United States goods that meet our market requirements and the general limitation on the ability of Eastern European countries to pay for increased exports from the United States. The problem is thus not primarily one of lack of U.S. export promotion activity regarding U.S. trade with these countries. However, there appears to be no justification for further unilateral initiatives by the United States in the field of East-West trade.

I would like to discuss further the Commerce Department's activities reducing required paperwork for exporters. On May 28, 1969, Kenneth N. Davis, Jr., Assistant Secretary for Domestic and International Business of the Department of Commerce, testified before our committee as follows:

> The Department is aware that recent developments in documentation, computerization, containerization of merchandise, and continuous movement of goods require revision and up-dating of our techniques for obtaining compliance with export control regulations and for collecting export statistics. We have already made some progress in this field of modernization. For example, we have introduced and are expanding the utilization of procedures for clearance of the export cargo at inland ports of origin—17 new ports were announced within the last 30 days. We also found it possible to remove the requirement for the vast majority of export declarations valued at under $100.
>
> "Beyond this, we are going forward with experiments to test the feasibility of consolidated monthly reports by shippers and carriers, in summary form, or on computer tape or punch cards in lieu of declarations covering individual shipments. If this is successful, we should be able in time to effect a radical reduction in the use of export declarations. We expect shortly to begin an experiment designed to test the feasibility of having some of the declarations submitted by shippers directly to carriers, with some of the necessary checking being done by carriers and the remainder by the Census Bureau and the Office of Export Control after the shipment has left the country.

The Department has made good on this statement, despite suggestions by members of the committee that legislation would be necessary to bring about progress in the reduction of paperwork.

Perhaps members were basing their statements on policies followed during the previous administration.

I do not feel any responsibility to defend those whom they criticized. I do feel, however, that this administration in a relatively short period has taken action to reduce paperwork and save American exporters millions of dollars without jeopardizing the security of the United States.

On September 17, 1969, Secretary of Commerce Stans announced the changes:

> Effective October 1, exporters will not be required to file shipper's export declarations for general-license shipments to Free World countries when the shipments are valued at $100 through $250. At present, export declarations are not required for such shipments to Free World countries when the shipments are valued at less than $100. This change alone could eliminate 1½ million documents a year, or almost 20 percent of the total now required. At the same time, it would affect statistically only about 1 percent of the dollar value of U.S. exports.
>
> General license shipments are those not requiring a validated export license from the Department's Office of Export Control.
>
> Effective November 1 high volume exporters meeting requirements established by the Office of Export Control and Bureau of the Census have the option of filing monthly export declarations instead of a declaration for each export shipment to Free World countries of goods under Department of Commerce jurisdiction. Reports may be filed in specified written summary form or provided appropriately on computer tape or punched cards that are compatible with systems used by the Bureau of the Census.
>
> This change will reduce paper work on export shipments as the number of qualified exporters availing themselves of this option increases.
>
> Under a proposed rule change, exporters no longer will be required to submit export declarations to the Bureau of Customs for authentication before loading merchandise moving under Department of Commerce general licenses to Free World countries by air or sea. Instead, they may submit the documents directly to carriers that agree to review the declarations for acceptability before loading and to forward them subsequently to Customs.
>
> This proposed change could affect between 85 and 90 percent of all declarations cover-

ing shipments to foreign countries other than Canada, which already is exempt from the pre-authentication rule. The effect could be to reduce the expense of documentation processing and runner time, reduce storage and demurrage costs caused by delays in paper work, and speed export shipments.

These changes are the result of the Commerce Department's continuing effort, in cooperation with industry and other Government agencies to streamline export procedures that in some instances have their origins back in the 19th century. While further improvement in documentation required by the Government is needed, most of the documents for export transactions stem from commercial practices that only industry can change.

I do not know, nor is it possible to accurately estimate, the full dollar savings the new procedures will achieve for U.S. exporters. However, recent testimony by an industry spokesman before our committee estimated the annual costs to American exporters to be $100 million for filling out, filing, and processing the shipper's export declaration. Based upon this and other estimates, the new procedures should lead to very substantial savings for U.S. exporters.

There is still much to be done, and the Department of Commerce, under its present capable leadership, intends to do it.

We have been assured that for years it has been the Department's policy—limited only by budgetary restrictions—to maintain continual review of items requiring export licenses—adding to or deleting from the list whenever conditions warranted. I have confidence that the present administration intends to implement that policy and think they should be given an opportunity to prove themselves, just as they have proved themselves by reducing paperwork.

The committee hearings and in particular the information provided by the administration have demonstrated that no sharp reduction in regulatory authority is needed or warranted. The existing Export Control Act has been shown to have ample flexibility to accomplish everything that could be accomplished through this new proposal.

The Export Expansion and Regulation Act of 1969 as proposed in S. 1940 has been modified to substantially restore the authority it at first had sought to weaken. We now have a bill which retains parts of the original proposal, parts of the present Export Control Act, and some provisions which are inconsistent with both. Proponents of the bill apparently feel that significant changes have been made from the present Export Control Act, but the actual substance of these is far less than would appear. It must be recognized that the bill will be interpreted as a liberalization signal if nothing else. There is no evidence of the Soviet Union's readiness to move toward closer relations with the West which would warrant overriding the President's judgment that this is not the time to signal a change in relations with a new export control policy.

The President and the Department of Commerce strongly oppose the added features of the bill for the reasons I have given.

I, therefore, urge an extension of the Export Control Act of 1949 with the moderate amendments approved by the other body last Thursday. For that purpose I have offered the pending amendment which simply would provide for extension of the present law plus the heretofore referred to amendments. My amendment would strike out all after the enacting clause and substitute language passed last Thursday in the other body by a vote of 272 to 7.

Mr. TOWER. Mr. President, will the Senator from Utah yield to me without losing his right to the floor?

Mr. BENNETT. I yield to the Senator from Texas without losing my right to the floor.

The PRESIDING OFFICER (Mr. MURPHY in the chair). The Senator from Texas is recognized.

Mr. TOWER. Mr. President, I should like to associate myself with the remarks made earlier by the distinguished Senator from Utah (Mr. BENNETT). Those of us who serve on the Committee on Banking and Currency are well aware of the great knowledge and effective advocacy of the ranking minority member on the committee. Consequently it comes as no surprise to note that he has done an excellent job of presenting the factual practical reasons for our amendment. I would like to submit my reasons for supporting the amendment also, but I shall not take the time of this body to go over the same ground so adequately covered by the Senator from Utah.

Instead I should like to dwell on some of the philosophical reasons for supporting a straight extension of the Export Control Act of 1969. In the process of so doing, I shall try to place the Export Control Act in the context of the conflict between Soviet-Eastern bloc ideology and Western concepts of democracy.

There is a disturbing tendency on the part of those who seek broader markets for American products to forget the reason for which the Export Control Act was developed. It was primarily developed because this Nation found that it was making a direct contribution to Communist military and industrial strength. We discovered that the superior products developed by advanced American technology were being used by Soviet bloc countries to increase their capability to make partial or total war against the free world.

This reason is as relevant today as it was when the Export Control Act was first passed by Congress and signed into law. Unless we are willing to accept some very strange logic, we must concede that the Soviet Union and her satellite appendages are supplying the Communists who are fighting Americans in Vietnam with the wherewithal to continue doing so. Russian and Eastern European cargo vessels unloading in Haiphong harbor offer irrefutable proof of this, and it would take an ostrich-like approach to viewing reality to contend that the Communist nations would not make use of American-made machines and American-developed technology to streamline their war supply efforts if they were available to them. In short, there is very good reason for continuing this Nation's effort to restrict the flow of strategic goods to the Soviet Union and her Eastern European allies.

I do not argue, however, that this should be a fixed, permanent, and unyielding American policy. The Export Control Act vests the President with discretionary power to vary the degree to which we limit the flow of American goods to Communist nations. This is only proper. We all look forward to the day when the Communists will show some indication that they are no longer interested in forcefully expanding their philosophy throughout the world.

The President is and should be free to encourage such a change of posture on the part of the Communists. He may well decide at some future time that a relaxation of the restrictions on the flow of strategic goods to the Communists would encourage them to adopt a more responsive attitude at the Paris peace table or a less expansionist approach to the Middle East. On the other hand, he may decide that the world situation dictates that Soviet Union and/or the East European nations be denied the fruits and benefits of American enterprise. If this is necessary, and I hope it will not be, the President should be able to act in an appropriate manner.

Just as the United States should not have an unyielding irreversible policy of "no trade" with Soviet bloc nations, it should not have a similarly overly rigid policy of unrestricted trade. There is every bit as much unreasonable rigidity in a policy of allowing our enemies unrestricted access to our technology and productivity as there is in denying them any access whatsoever to the products of our free enterprise economy.

I think then that we must be careful when we seek to broaden trade with Communist nations. We must realistically examine the uses to which American products and know-how are put by them. If they use them to provide consumer goods for their people, or if they demonstrate that they use them to "build bridges" to the West, then I say, "fine," let them have access to our goods. But, if they use them to make war on Americans or to impose communism on free men, then I say, "no"; this Nation will not contribute its technology, its machinery and its enterprise to such endeavors.

We must also examine just what we expect to gain from trading with Communist nations. Trade implies a two-way operation. They obviously want what we produce. What do they produce that this Nation wants or needs? I fear that the answer is "very little." I fear that this is so because the Communist countries are more concerned with applying their industrial might and technological know-how to devising methods for conquering individuals instead of satisfying their needs.

In conclusion, Mr. President, I should like to deal with one additional point. Opponents of a straight extension of the Export Control Act have argued that the present act places an intolerable burden on American firms seeking to expand their markets. Along with my colleagues on the committee, I have listened to the testimony of representatives of many large firms testify-

ing as to the difficulties they have encountered in securing export licenses.

I sympathize with those businesses. They have a legitimate reason to desire more efficient administration of the act. But I think it important that they heed the pledge of the representatives of the Commerce Department to streamline the administrative procedures involved in obtaining an export license. Furthermore, I think that they should note the announced intention of the President of the United States to follow a policy of trade expansion whenever it is consistent with the national well-being of the United States. I am satisfied by the pledges of the administration officials and of the President speaking through them. I certainly do not think that the Senate should force the President's hand in this matter.

Let me say, however, that there will be some hardship to businesses desiring to do business with Eastern bloc nations as a result of a simple extension of this act. I feel that the vast majority of businesses in this country are willing to make this sacrifice if it is in the interest of national security. This country has a tradition of businesses rising above short term self-interest in order to secure the best long-term interests of this Nation. Because I believe that the price is small in relation to the benefit gained, I feel that our Government can fairly ask that it be paid.

Mr. President, I urge that the Senate agree to the amendment offered by the Senator from Utah.

Mr. BENNETT. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. BYRD of Virginia. Mr. President, will the Senator from Utah yield?

Mr. BENNETT. I am happy to yield.

Mr. BYRD of Virginia. Mr. President, I favor an extension of the existing Export Control Act.

I feel the existing act provides the necessary machinery and flexibility to adjust the controls on our exports to meet a changing world situation and enable our export policy to continue to further the foreign policy of the United States.

My colleagues who support substantial changes in the Export Control legislation, seem to feel that the world situation has changed substantially in the 20 years since the original Export Control Act was enacted.

They would use a liberalization of the Export Control Act to expand trade with the Eastern European countries. They seem to feel that the situation between our country and the Communist bloc countries has improved to the point where the Congress should relax export controls.

Both the President and the Department of Commerce have evidenced a desire to adapt the current export control regulations to aid American business wherever they feel it is justified. There is flexibility in the present law.

But, I do not feel that our relationship with the Soviet Union today warrants passage of a bill that would announce a sense of the Congress that trade should be used to build diplomatic bridges with the Communist countries.

I, for one, do not trust the Soviet Union. I have only to look to Cuba in 1962 and, more recently, the invasion of Czechoslovakia as evidence of the true nature of Russian policy.

But we have an even more urgent reason not to relax our trade policy with the Soviet Union—that is Vietnam.

It is inconceivable to me that we can relax our export policy with the Russians while they provide the bulk of the war materials to the North Vietnamese war efforts.

Contrary to what many people are starting to think, I do not see an early end to the Vietnam conflict.

We continue to suffer casualties and we continue to find Russian-built tanks and helicopters on the battlefield.

So long as we have any troops committed in South Vietnam, we do them a disservice by increasing the Communist war-making potential.

In short, I do not feel that there is any evidence that the Soviet threat to the United States has become so minimal that this body should announce its intent that our export policy be relaxed. In fact, the Soviets have become a stronger nation.

I do not feel that the Export Control Act should be weakened at this time. The act must continue to be administered in such a way as to insure that equipment and technology going to the Soviet Union and other Communist countries are not capable of being utilized to the detriment of the United States.

Mr. President, I shall support the amendment of the distinguished senior Senator from Utah.

Mr. PERCY. Mr. President, will the Senator from Minnesota yield?

Mr. MONDALE. I yield to the Senator from Illinois.

Mr. PERCY. Mr. President, I would not want to leave the impression that the minority side of the aisle does not have an opposing view to that expressed by the distinguished ranking member of the Committee on Banking and Currency. I support the bill and oppose the present amendment. I have done so after very long thought and deep consideration of this very important matter.

It is for both sound commercial and political reasons that I rise in support of the bill. As business witnesses testified before the Committee on Banking and Currency a market exists in eastern Europe for nonstrategic peaceful goods which the United States has now cut-off, for all practical purposes. Germany, Italy, France, Britain, Japan, and other developed countries on the other hand are busy making export sales to Eastern Europe and, thus, are strengthening their trade balance and their balance of payments.

Mr. President, within recent months I have visited every one of those Western European countries and have talked with government officials, as well as businessmen. They feel it is incredible that we are letting them get all this business, but they are happy to have it.

The United States is desperately in need of improving its balance of payments, in fact more desperately in need than any single Western European country I have mentioned. They are doing a land office business with Eastern Europe.

For the first half of this year, our balance of payments shows a $10.7 billion deficit on an annual basis for 1969. The third-quarter figure from preliminary indications shows no reason for encouragement. The U.S. trade balance which has traditionally been a heavy surplus enabling us to support further overseas commitments has been wiped out in 1969. In many cases Eastern European countries have turned first to the United States for various peaceful goods and when denied them by us, they have then turned to the Western European countries which are more than happy to get the export orders.

Mr. President, let me report as vividly as I can on the relationships which exists between our balance-of-payments deficit, the security of the United States, and particularly the security of Europe.

I have just today returned to the Senate from NATO. We know that the troop forces we have in the NATO countries are threatened by the ability of the United States to be able to support them as we have, as we have a $1.5 billion deficit in our balance of payments to support our NATO troops.

We have with the NATO countries alone a $15 billion budgetary item for our costs in NATO. I think it is in the interests of this country to maintain our present NATO commitment and I believe that the administration firmly supports maintaining our present troop level in Europe but that level will be gravely endangered if we cannot find the dollars to support our troops over there.

The bill does not seek to allow the export of items which would be of military potential to Eastern European countries. It merely seeks to smooth the path for the export of peaceful nonstrategic items which are currently not allowed to be exported, or which require a great deal of paperwork in order to be exported. The problem with these denials, as mentioned before, is that the Eastern European country can buy these items from other Western countries. Moreover, the real safety valve as written into the bill is that the President is empowered to forbid the export of any item to any country if he deems that export to be against the national interest.

We have taken fully into account in the bill the fact that the President can, at any time he wants, forbid the export of any item he feels is contrary to the national interest by adding to the military potential of Eastern Europe or any Communist nation.

The commercial problems of the current Export Control Act were well summed up last year by Mr. David Packard, who was then the chairman of Hewlett-Packard and is now Under Secretary of Defense.

Let me emphasize that he gave this letter to the Senate and the Committee on Banking and Currency at the time he was in civilian life, that he was speaking then as a citizen and as a businessman.

He was speaking with great knowledge in this field.

Here is what he had to say at that time:

> The high level of unilateral U.S. controls makes our marketing task much more difficult. We must contend with the time and added expense required to make formal license application, the long delays encountered in obtaining decisions, and the fact that our East European customers and our East European sales force are never quite sure whether a substantial portion of our product line can be sold or not. Since most of the material over which the United States exercises unilateral export controls is readily available elsewhere, it seems to us that the high level of these controls merely serves to deny business to U.S. firms. The controls, in effect, serve to push East European purchasers into the hands of our West European and Japanese competitors who are only too willing to sell their products.

Mr. President, beyond strictly commercial interests, I think a political point can be raised. To alleviate tensions among the various countries, one of the most important policies that can be followed is to have continuing contacts. Trade relations are one such contact. The normal flow of trade and business can only help provide those contacts. If we cut ourselves off from the normal everyday flow of trade, how can we expect to normalize political and diplomatic relations when we will not trade?

How many times must we try the litmus test of a nation's real intentions? This is a phrase that Khrushchev himself used when I met with him in 1959, at the request of President Eisenhower, along with 30 other businessmen and political leaders, including Henry Cabot Lodge. He merely said, "You do not intend to trade; therefore, it is incredible to us that you intend to try to have any kind of peaceful relationship."

Mr. President, I am not naive enough to believe that Eastern European countries would not try to take every conceivable advantage of us that they could. Of course, they want to buy strategic materials. Of course, they want to know all our computer technology. Of course, they want to have full knowledge of our chemical plants. But if it is strategic we will not sell it to them. But on peaceful non-strategic goods, if they cannot get them from us, they will get identical goods from Western Europe, and as long as they can get identical goods from Japan, they will do so.

It is not so much the trading balance we need, but international liquidity that trade brings, the very thing that they are able to provide and do provide.

The assumption is made that, somehow or other, American businessmen are naive, that when they go into these relationships, they get skinned, and that, somehow, the other side ends up with the best of the bargain.

Mr. President, if there is any one field in this world where we are preeminent, where we are looked up to and highly regarded by every nation on earth, it is in our ability to produce high-quality goods at low cost.

I would say that when we trade with these countries we take back certain things we need. Certainly we need gold, as we all know, right now, even if they have a total need for our particular product. If we sell to them, they have to pay for the products they buy and we need foreign exchange.

Mr. President, we should try to perforate the Iron Curtain. They put it up. We have been trying to perforate it and to drag it down every place we can.

In every eastern country I have visited, Rumania, Czechoslovakia, Yugoslavia, they frankly said, "Please, keep up these contacts with us. We need a yardstick by which to measure productivity, because we do not even know what our costs are."

A great deal of the dissatisfaction which has occurred in Eastern European countries has come about as a result of comparing themselves adversely with the standards established in the Western European countries. They know about these standards through trade.

We should encourage, not just facilitate, trade. This is the great debate that we had in the Committee on Banking and Currency, as to whether we should change one word—as to whether it is the purpose or intent of the United States and its government to "facilitate" trade, which is in the current law, or to "encourage" trade. That one word says to the American business community, "You are not disloyal when you deal in peaceful, nonstrategic goods. We encourage you to go ahead and trade, as long as Western European countries are going to get the business anyway."

In the last few days, NATO itself has adopted an East-West trading relationship resolution. NATO has set up an East-West Relations Committee, and U.S. delegates participated actively. They feel it is in the defense interests of all of us to see whether or not, in those areas where we are preeminent, we should maintain contact. It is for those reasons that I feel very strongly that this modest, small start toward getting into business, and doing business with Eastern Europe and perforating and continuing to take down the iron curtain of the Eastern European countries is in the national interest. It strengthens us, not weakens us. We strengthen ourselves by trading. We weaken ourselves when we give up and let the Germans, the Japanese, and everybody else do business that we simply turn down. We should be accepting the business and doing it so long as it is in the national interest, so long as it is in peaceful nonstrategic goods, and so long as we have the language written into the bill that is on the floor today, that the President has the authority "to restrict the export of goods and technology which would make a significant contribution to the military potential of any other nation or nations which would prove detrimental to the national security of the United States."

That would seem to me to be adequate protection for the interests of the United States.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. PERCY. I yield.

Mr. MAGNUSON. Mr. President, I want to associate myself wholeheartedly with what the Senator from Illinois has said. As he knows, I have long been an advocate of a move in this direction. Over and beyond, he stressed the economic value of this bill; but if I know of one thing that is a tool for world understanding and peace, it is trade in nonstrategic items. It is a great bridge for relieving tensions in the world.

Will the Senator agree with me?

Mr. PERCY. I agree with the Senator. There is no question that this is the kind of step we can take, with adequate security, toward peace and improving our balance of payments. We seem incredible to the countries of Western Europe. I go there to argue that our balance of payments is in trouble and that we need offsetting payments for troop costs, and yet at the same time I see us turn down millions and millions of dollars worth of business that the Western European countries do with Eastern European countries. Western Europeans think we are really naive.

Mr. MONDALE. Mr. President, we are ready for a vote.

Mr. DOMINICK. Mr. President, I just wanted to take the floor to say that I certainly do not agree with the Senator from Illinois in the position he has taken. I have been opposed to this line of discussion and talk for a number of years. I made a statement on it before the Foreign Relations Committee, and I have made three or four speeches on it. I am not going to take a long time now, because I know we are all anxious to get to a vote.

I am in support of the amendment of the Senator from Utah (Mr. BENNETT) and am opposed to expanding trade with Communist-controlled countries. One of my major reasons for doing so—and I just want to get it in the record while the Senator from Illinois is present—is the fact that we do not trade with individuals in those countries. All we trade with is a government-controlled corporation representing the government. It does not go to individuals or privately owned companies. It does not aid in the relationship of individuals. We simply sell to a Communist-controlled agency. It goes to the agent for each one of the Communist countries of Eastern Europe, and the Soviet Union besides.

I cannot conceive of why we should put ourselves in the position of strengthening the economies of Communist-controlled corporations at the very time when we have to expand our budget for military purposes in order to protect us from dangers posed by those very countries. It seems to me idiotic.

Mr. President, after reading the committee report on this bill, I must take exception to the conclusion which the majority report reaches, as stated in the last paragraph on page four of the report. This paragraph reads as follows:

> The committee believes that virtually every major factor giving rise to the enactment of the Export Control Act has undergone a material change in the past 20 years. Under this circumstance, the committee believes, that it would be unwise to extend, without amendment, the existing law.

Where have these major changes occurred? Was it to show their dedication to peace that prompted the Soviet military action against Czechoslovakia? Does the continuing Soviet resupply of arms to the Arab commandos show that

the Soviet Union and her satellites want to help relieve the tensions in the Middle East? And what is there to indicate that the Soviet bloc has changed its position on the war in Vietnam? The evidence is much to the contrary. Eighty-five percent, or more, of the military and economic materials that go to the North Vietnamese are being supplied by the same countries to whom we are now being urged to grant more extensive trade privileges.

Most of the factors which prompted the enactment of the Export Control Act in 1949 and the amendments thereto in 1962 are still with us. We must not lose sight of the fact that the dominant reason for this act is to help protect the national security of the United States.

Why is the Soviet bloc interested in expanding trade? They produce very little that the West wants or needs, but they are very interested in having access to our technological advancements. The Russians, in particular, are interested in obtaining complete production units, designed and built by us and delivered to them ready to begin operation. This frees Soviet engineers and scientists to devote their energies to missiles and the building of larger and larger rocket motors and more sophisticated weapons. This is a major reason why we should be very cautious about giving the Soviet bloc greater access to strategic materials and equipment.

The present Export Control Act has not been a complete barrier to trade with the Soviet bloc. The present law is very flexible. At times I have felt it to be too flexible. It allows the President to vary the nature and extent of export controls from time to time, country to country, and commodity to commodity, depending on the international problem that in his judgment calls for the application of such controls. Thus, the President has under the present law the authority, in times of improved international conditions, to relax the administration of the law, and to tighten it in times of international tension.

In recent years, export licenses have been granted to ship substantial quantities of equipment and material to Soviet bloc countries, much of it having both civilian and military applications, for example: Since 1966, we have exported the following items to the following Soviet bloc countries:

Bulgaria: Polymerization plastic materials, electronic navigation aids.

Czechoslovakia: Synthetic rubber; molybdenum ores and concentrates; electronic computers; parts for electronic data processing machines; metalworking rolling mills; metalworking machinery; industrial trucks and similar handling equipment; nuclear radiation detecting and measuring instruments; power cranes and shovels, wheel or truck mounted.

East Germany: Synthetic rubber; copper and copper allows; electronic computers; parts for electronic data processing machines; tire and rubber processing machinery; X-ray and radiological apparatus; nuclear radiation detecting and measuring instruments.

Hungary: Synthetic rubber; electronic computers; parts for electronic data processing machines; metalworking milling machines; telecommunications apparatus; scientific, measuring, and controlling instruments.

Poland: Synthetic rubber; elasticizers; glycerine; iron and steel hoop or strip; cobalt and cobalt alloys; gear cutting machines; metalworking lathes; rolling mills and parts; rubber extruding, tire, and rubber processing machinery.

Rumania: Synthetic rubber; natural phosphates; benzene; rubber compounding chemicals; polymerization plastic materials; iron or steel plates or sheets; oil pipe of iron or steel; iron or steel pipes and tubes other than oil pipe; iron and steel structures and finished parts; electronic computers; internal combustion engines; metalworking presses; high frequency transceivers; electronic navigational aids; electronic search and detection apparatus, including radar; scientific, measuring, and controlling instruments.

U.S.S.R.: Coal tar and other cyclic intermediates; rubber compounding chemicals; alcohols and polyhydric alcohols; organic acids and chemicals; oxides and hydroxides of strontium, barium, or magnesium; aluminum oxide; polymerization plastic materials; reagents for concentration of ores, metals, or minerals; iron or steel plates and sheets; oil pipe of iron or steel; iron and steel structures and finished parts; internal combustion engines—not for aircraft; electronic computers; gear cutting machines; metalworking grinding and polishing machines; metalworking presses; converters, molds, and casting machines; metal processing furnaces and ovens; rubber extruding, tire, and rubber processing machinery; electronic navigational aids; telecommunications apparatus; parts and accessories for tractors and motor vehicles.

These are just a few in the long list of exports to the Soviet bloc. I feel that the Senate bill will not bring about an improvement, but would actually weaken our control over exports of strategic materials. For that reason I urge that we adopt this amendment and vote to extend the existing Export Control Act.

Mr. BROOKE. Mr. President, the bill which we are considering today is of very special significance. For the first time in over 20 years, Congress is focusing on export expansion as distinct from simple export control. The title of the legislation itself carries the message very clearly: in place of the old Export Control Act, we have proposed the Export Expansion and Control Act of 1969.

This is more than a change in emphasis; the new regulations and reviews required by the committee bill will have a significant impact on our overall balance of payments, the health of our domestic industry, employment and our gross national product.

As the committee report makes clear, the original Export Control Act was passed in 1949, at a time of heightening international tension and steady dependence upon the United States as a source of supply for a wide variety of industrial products. But that was 20 years ago. Since then, the nations of Europe have recovered and indeed surpassed their previous industrial strength. Japan has become the third largest trading nation in the world. The vast majority of industrial and chemical products of which the United States was the sole source in 1949, are now readily available from a variety of sources both in the Western and the Eastern worlds.

In 1949, it made sense for the Congress to require a strict supervision over exports from the standpoint of national security, foreign policy interests, and protection of the domestic economy from excessive drain of scarce materials. In 1949, there were easily 1,300 products of military or industrial significance which could be obtained in sufficient quantity nowhere but in this country. It was in our national interest to prevent these chemicals and industrial products and alloys from becoming available to the Communist states of Eastern Europe, for at that time we did not know what their plans for military expansion and conquest might be. As the sole source for many of these goods, it was essential that we first protect our own markets and make these scarce resources available to our own manufacturers.

All of these considerations are still valid. There are probably many hundreds of products which we make in better quality than the other nations of the world; there is no doubt but that we are still the sole source of some of them. And there are some goods which are of military or strategic value and which we would not want to sell to Communist states under any circumstances. But I submit that disinfectants, cement, vaccines, yellow corn, textile finishing agents and fabrics, and herbicides and insecticides—to name but a few products for which export licenses are now required—are not likely to be among them. These products are available from a multitude of sources including the Soviet Union and Eastern Europe as well as a number of the developing nations of the world. To continue to require licenses for their export to Eastern Europe, with its inherent implication that such sales are somehow questionable if not downright unpatriotic, is of dubious economic or strategic value.

From the point of view of foreign policy, also, an exclusive emphasis on export control does not seem to be in our national interest. In 1949, the Soviet Union had just devoured the states of Eastern Europe. Any product which was sold to them would be of direct benefit to our former ally turned enemy. A strengthened Communist monolith in Europe could only threaten the security and well-being of the nations of Western Europe which were still trying to dig out from the ravages of a dreadful war. This is not the situation today. Our Western Allies are stronger than ever, and are trading in increasing amounts with their neighbors to the East. The Eastern states themselves have shown an unexpected degree of independence from the Soviet Union, refusing to be fully integrated into the economic grid, seeking trading partners and tourists from the West, and emphasizing national development rather than Communist ideology. It is now in our national interest to encourage such

trends. By selling our goods to the Eastern European states, we can help to insure that they will develop national industries and thereby decrease their dependence upon the bloc as a whole.

Finally, from the point of view of protecting scarce resources, I seriously doubt that control is as essential as it once was. To be sure, there are some products which are still in short supply and which the United States must preserve for domestic use. But world trade has expanded considerably since 1949. New sources of supply have been found on literally every continent. Vast supplies of copper and nickel, of oil and industrial diamonds, have been found in hitherto unsuspected regions of Africa. The Soviet Union has explored its own hinterland and discovered domestic sources of virtually every chemical and metal known to man. Products which once were in short supply are now available, and are obtained, from regions no one had even heard of 20 years ago. Thus the "short supply" justification for stringent export controls is also due for a thorough investigation.

Export expansion is in our national interest. We now have an unfavorable balance of payments. Higher wages and production costs necessarily drive up the cost of our products, and make them less competitive on the world market. Yet, because of the quality of certain goods we are able to sell our products, and should be able to sell more of them, to our trading partners. Increased sales abroad mean increased job opportunities, and more wages with which to purchase other products. An expansion of our exports thus benefits all sectors of the American economy, as well as restoring a favorable balance of payments and a greater confidence in the American dollar abroad.

The committee found that while the United States accounts for 16 percent of total free world exports, it has only 2 percent of total free world exports to Russia and Eastern Europe. A review of our export control policy and an expansion of our exports to these few nations may not provide the whole answer to our economic problems, but by creating a healthier atmosphere within which to work, and a healthier world trade pattern, it will alleviate one barrier to economic progress which is not only unnecessary but actually harmful to American business and industry.

The Committee on Banking and Currency held extensive hearings on our export policies. Its findings are worthy of reiteration for the balanced perspective and constructive suggestions which they embody. Very briefly, the committee found that the quantity and composition of U.S. exports has a very definite bearing upon the welfare of our domestic economy and upon the fulfillment of our foreign policy objectives. It found that totally unrestricted export of materials without regard to their military potential may adversely affect our national security and that of our allies. But the committee also found that unwarranted restriction of U.S. exports has a serious adverse effect upon the stability of our currency, and therefore upon our domestic economy. And we found that the uncertainty and ambiguity embodied in present Government policy has had the effect of curtailing American exports to the detriment of our balance of trade.

For this reason, we have chosen to emphasize that it is the policy of our Government to encourage the expansion of trade with all countries with which we have diplomatic or trading relations, imposing only certain carefully defined national security limits. Only those goods which, in the decade of the 1970's, would make a significant contribution to the military potential of an unfriendly state, or which must be conserved in order to protect domestic industry, would be placed on the restricted list.

In order to carry out this policy, the Secretary of Commerce is instructed by the committee to conduct a thorough review of the present commodity control lists with a view to making whatever changes are necessary in the list in order to further the policy and provisions of the act. And the Secretary is specifically instructed to take all steps necessary to encourage the development and promotion of trade with the Soviet Union and the nations of Eastern Europe.

On one point in particular I believe the RECORD should be clear. The bill does not in any way diminish the President's authority to protect the national security of the United States. Indeed, I would assert that it provides him additional avenues through which to do so. We should have learned by now that positive inducements to economic and other cooperation may well be the sturdiest barriers against hostile acts. The bill affords the President greater flexibility than in the past to seek out opportunities for erecting some positive structures of peace.

In doing so, however, the legislation leaves to the President ample discretion to determine whether, in particular circumstances, the national security is better served by restrictive or expansionist policies on trade with other nations. To be sure the bill creates a new philosophical context in which the President will be exercising his authority. It indicates a clear congressional preference for efforts to expand trade, where it is safe, profitable, and prudent to do so. But the language of the bill clearly reserves to the President the determination in specific cases. It may be that the Chief Executive will find that little or no immediate change in U.S. export controls over trade with Soviet bloc countries should be attempted.

The central point is that, if the opportunity does arise for the President to establish more fruitful trading relationships with one or more members of the Soviet bloc, the bill will enable the United States to do so. That is an authority which, I believe, a President as sensitive and concerned about international problems as Mr. Nixon is will find exceedingly valuable.

I was pleased and honored to work with the Senator from Maine (Mr. MUSKIE), the Senator from Minnesota (Mr. MONDALE), the Senator from Illinois (Mr. PERCY), and my other colleagues on the committee in forging this bipartisan proposal. I consider this new emphasis in U.S. policy a wise and well-designed initiative. I believe it will enjoy the support of the majority of Americans. I judge it to be the most sensible approach to the altered circumstances of international relations in the 1970's.

Mr. President, I urge the Senate to pass the bill in full realization that it will provide the United States with an enlightened and promising new direction for the fateful decade ahead.

Mr. MONDALE. Mr. President, the committee opposes the amendment.

Mr. BENNETT. Mr. President, I ask for a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah, in the nature of a substitute. On this question the yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), and the Senator from Minnesota (Mr. MCCARTHY) are necessarily absent.

I also announce that the Senator from Nevada (Mr. BIBLE), the Senator from Missouri (Mr. EAGLETON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Rhode Island (Mr. PELL), and the Senator from Alabama (Mr. SPARKMAN) are absent on official business.

I also announce that, if present and voting, the Senator from Massachusetts (Mr. KENNEDY) would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from New York (Mr. GOODELL), the Senator from Oregon (Mr. HATFIELD), the Senator from Idaho (Mr. JORDAN), the Senator from South Dakota (Mr. MUNDT), the Senator from Ohio (Mr. SAXBE), the Senator from Illinois (Mr. SMITH) and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

The Senator from New York (Mr. JAVITS) is absent on official business.

The Senator from Arizona (Mr. GOLDWATER) is detained on official business.

If present and voting the Senators from New York (Mr. JAVITS and Mr. GOODELL), and the Senator from Oregon (Mr. HATFIELD) would each vote "nay."

The result was announced—yeas 34, nays 44, as follows:

[No. 131 Leg.]

YEAS—34

Allen	Dominick	Pearson
Allott	Fannin	Prouty
Bellmon	Fong	Russell
Bennett	Griffin	Smith, Maine
Boggs	Gurney	Spong
Byrd, Va.	Hansen	Stennis
Cook	Holland	Talmadge
Cooper	Hruska	Thurmond
Cotton	Jordan, N.C.	Tower
Curtis	McClellan	Williams, Del.
Dodd	Miller	
Dole	Murphy	

NAYS—44

Aiken	Cranston	Hughes
Anderson	Ellender	Inouye
Bayh	Fulbright	Jackson
Brooke	Gravel	Long
Burdick	Harris	Magnuson
Byrd, W. Va.	Hart	Mansfield
Case	Hollings	Mathias

McGee	Nelson	Scott
McGovern	Packwood	Symington
McIntyre	Pastore	Tydings
Metcalf	Percy	Williams, N.J.
Mondale	Proxmire	Yarborough
Montoya	Randolph	Young, N. Dak.
Moss	Ribicoff	Young, Ohio
Muskie	Schweiker	

NOT VOTING—22

Baker	Goodell	Mundt
Bible	Gore	Pell
Cannon	Hartke	Saxbe
Church	Hatfield	Smith, Ill.
Eagleton	Javits	Sparkman
Eastland	Jordan, Idaho	Stevens
Ervin	Kennedy	
Goldwater	McCarthy	

So Mr. BENNETT'S amendment in the nature of a substitute was rejected.

Mr. MONDALE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. MUSKIE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 2696) was ordered to be engrossed for a third reading and was read the third time.

Mr. MONDALE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 4293, the companion bill.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 4293) to provide for continuation of authority for regulation of exports.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Minnesota.

Mr. COTTON. Mr. President, reserving the right to object, if the House bill is substituted, there will be no opportunity for a record vote on the passage of the Senate bill. I therefore object to the substitution.

Mr. President, I ask for the yeas and nays on the passage of the Senate bill.

Mr. MONDALE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MONDALE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. MILLER. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard. The clerk will continue to call the roll.

The bill clerk resumed the call of the roll.

Mr. MONDALE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, is is so ordered.

Mr. MONDALE. Mr. President, I understand that we have had third reading of the Senate bill and that amendments are therefore not in order.

The PRESIDING OFFICER. I am advised by the Parliamentarian that third reading has been had on the Senate bill and that amendments are not in order on the Senate bill. When the House bill becomes the order of business, amendments can be offered at that time.

Is there objection to the present consideration of the House bill?

Mr. COTTON. Mr. President, reserving the right to object, I want to make perfectly sure that we understand what is being done. If the unanimous-consent request is agreed to, the House bill will be before the Senate.

The PRESIDING OFFICER. The Senator is correct.

Mr. COTTON. Then I must object. I do not desire an opportunity to have a record vote against the House bill, but I do desire an opportunity for a record vote, so that I can vote "nay" on the Senate bill, which I consider to be a monstrosity.

Mr. MONDALE. Mr. President, will the Senator yield?

Mr. COTTON. I yield.

Mr. MONDALE. The modified measure is the Senate version against which the Senator from New Hampshire may vote, if he desires.

The PRESIDING OFFICER. If the Chair correctly understands, the Senator from New Hampshire does not want to vote objection to the House bill even as amended. Is that correct?

Mr. COTTON. It is not clear to the Senator from New Hampshire. Is this unanimous-consent request a request that the House bill be substituted for the Senate bill?

The PRESIDING OFFICER. Not yet, no.

Mr. COTTON. If it is granted, it will be.

The PRESIDING OFFICER. It is desired to get the House bill before the Senate; and before the Senate language can be added to the House bill, it will have to be offered as an amendment. In other words, the House bill will be before the Senate, and the language of the Senate bill will be offered as an amendment to the House bill.

Mr. COTTON. So that a rollcall vote on the amendment, which adds or substitutes the Senate language to the House bill, will be the same as a rollcall vote on the final passage of the Senate bill had it been left intact.

The PRESIDING OFFICER. The Senator is correct.

Mr. COTTON. Then, I withdraw my objection.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the House bill.

The bill is open to amendment.

SEVERAL SENATORS. Third reading.

Mr. MONDALE. Mr. President, I move that the language of S. 2696 be substituted for the text of the House bill.

Mr. COTTON. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. MILLER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MILLER. Is it in order now for me to offer an amendment to the pending substitute?

The PRESIDING OFFICER. It is in order.

Mr. MILLER. I send to the desk an amendment to the present substitute and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

On page 3, line 4, after the word "extent", strike out "absolutely".

Mr. MILLER. Mr. President, the purpose of the amendment is to make this part of the bill read exactly the same as the succeeding two sentences, where they refer only to the extent necessary, rather than to the extent absolutely necessary. My amendment would strike out the word "absolutely." I have discussed this with the manager of the bill. I understand that he is amenable to accepting it.

Mr. MONDALE. The committee has no objection and will be glad to take the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute for the House bill, as amended. The yeas and nays have been ordered.

Mr. BYRD of West Virginia. Mr. President, may we have order, and would the Chair please restate what we are about to vote upon?

The PRESIDING OFFICER. The question is on agreeing to the language of S. 2696, as amended, as a substitute for the House bill.

Mr. BYRD of West Virginia. I thank the Presiding Officer.

The PRESIDING OFFICER. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia (after having voted in the affirmative). Mr. President, I have already recorded my vote as "yea" on this question. I have a live pair with the able majority leader, the Senator from Montana (Mr. MANSFIELD). If he were present, he would vote "yea." If I were permitted to vote I would vote "nay." Therefore, I withdraw my vote.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Georgia (Mr. RUSSELL), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I also announce that the Senator from Nevada (Mr. BIBLE), the Senator from Missouri (Mr. EAGLETON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Montana (Mr. MANSFIELD), the Senator from Rhode Island (Mr. PELL), and the Senator from Alabama (Mr. SPARKMAN) are absent on official business.

I further announce that, if present and voting, the Senator from Georgia (Mr. RUSSELL) would vote "nay."

I also announce that, if present and voting, the Senator from Massachusetts (Mr. KENNEDY) would vote "yea."

Mr. GRIFFIN. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oregon (Mr. HATFIELD), the Senator from Idaho (Mr. JORDAN), the Senator from South Dakota (Mr. MUNDT), the Senator from Ohio (Mr. SAXBE), the Senator from Illinois (Mr. SMITH), the Senator from Texas (Mr. TOWER), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

The Senator from New York (Mr. JAVITS) is absent on official business.

The Senator from Arizona (Mr. GOLDWATER) is detained on official business.

If present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

On this vote, the Senator from New York (Mr. JAVITS) is paired with the Senator from Texas (Mr. TOWER). If present and voting, the Senator from New York would vote "yea" and the Senator from Texas would vote "nay."

The result was announced—yeas 46, nays 27, as follows:

[No. 132 Leg.]

YEAS—46

Aiken	Inouye	Pastore
Anderson	Jackson	Percy
Bayh	Jordan, N.C.	Prouty
Brooke	Long	Proxmire
Burdick	Magnuson	Randolph
Case	Mathias	Ribicoff
Cranston	McGee	Schweiker
Ellender	McGovern	Smith, Maine
Fong	McIntyre	Symington
Fulbright	Metcalf	Tydings
Goodell	Mondale	Williams, N.J.
Gravel	Montoya	Yarborough
Harris	Moss	Young, N. Dak.
Hart	Muskie	Young, Ohio
Hollings	Nelson	
Hughes	Packwood	

NAYS—27

Allen	Curtis	Hruska
Allott	Dodd	Miller
Bellmon	Dole	Murphy
Bennett	Dominick	Pearson
Boggs	Fannin	Scott
Byrd, Va.	Griffin	Spong
Cook	Gurney	Stennis
Cooper	Hansen	Thurmond
Cotton	Holland	Williams, Del.

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Byrd of West Virginia, against.

NOT VOTING—26

Baker	Hartke	Pell
Bible	Hatfield	Russell
Cannon	Javits	Saxbe
Church	Jordan, Idaho	Smith, Ill.
Eagleton	Kennedy	Sparkman
Eastland	Mansfield	Stevens
Ervin	McCarthy	Talmadge
Goldwater	McClellan	Tower
Gore	Mundt	

So Mr. MONDALE's amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER (Mr. HUGHES in the chair). The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. COTTON. Mr. President, it is very rare that the Senator from New Hampshire ever takes any action in the Senate that is in any way an inconvenience or that works a hardship on Members of the Senate. But this bill in its present form, is, in my opinion, not only a menace to our national security but an unwarranted affront to the President of the United States.

Therefore, I ask for the yeas and nays on final passage.

The yeas and nays were ordered.

LEGISLATIVE PROGRAM

Mr. GRIFFIN. Mr. President, while a number of Senators are in the Chamber, I wish to ask the acting majority leader to indicate what he expects will transpire for the remainder of the day and the remainder of the week, if possible.

Mr. BYRD of West Virginia. Mr. President, after the disposition of the measure before us, it is the intention of the leadership to lay before the Senate for consideration tomorrow H.R. 11959, the bill dealing with veterans' education and training assistance. It is the intention of the leadership to have the Senate adjourn until 12 noon tomorrow, without any further votes today, following disposition of the pending measure; and if we are able to complete action on the veterans bill tomorrow, it is the intention of the leadership to go over until Monday next.

Mr. GRIFFIN. I thank the distinguished Senator.

HEARING ON INDEPENDENCE NATIONAL HISTORIC PARK

Mr. ALLOTT. Mr. President, as a result of my conversation with the Senator from Nevada (Mr. BIBLE), chairman of the Subcommittee on Parks and Recreation of the Committee on the Interior, hearings will be scheduled on S. 2940 as soon after Senator BIBLE returns to Washington as is practicable.

I wish to thank Senator BIBLE for his cooperation and for agreeing to setting hearings on this matter, because the situation is somewhat urgent. The Independence National Park contains some inholdings, which are planned to be acquired by the Park Service, upon which an option for purchase expired October 21, 1969. I understand, however, that the owners of this property are willing to extend the option providing the Senate committee will agree to hold hearings. Therefore, this action is significant.

It should be made clear that the agreement to schedule hearings by the subcommittee chairman in no way commits him on the merits of the measure, and I would not want any of my comments construed to indicate otherwise. Further, I wish to make it clear that this Senator reserves all of his rights, and is not committed either way on the merits of the bill.

Mr. SCOTT. Mr. President, will the Senator from Colorado yield?

Mr. ALLOTT. I yield.

Mr. SCOTT. I want to thank the Senator very much, on behalf of both Senators from Pennsylvania, for arranging the hearings on this urgent matter where the people involved would have to take certain action, adverse, in our opinion, to the park, unless it could be stayed by at least the opportunity to have the hearings.

I appreciate very much what the Senator has done.

Mr. ALLOTT. I thank the Senator from Pennsylvania.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Hackney, one of its reading clerks, announced that the House insisted upon its amendments to the bill (S. 1857) to authorize appropriations for activities of the National Science Foundation pursuant to Public Law 81–507, as amended, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MILLER of California, Mr. DADDARIO, Mr. DAVIS of Georgia, Mr. BROWN of California, Mr. FULTON of Pennsylvania, Mr. BELL, and Mr. MOSHER were appointed managers on the part of the House at the conference.

The message also announced that the House disagreed to the amendment of the Senate to the bill (H.R. 474) to establish a Commission on Government Procurement; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. HOLIFIELD, Mr. ST GERMAIN, and Mr. HORTON were appointed managers on the part of the House at the conference.

EXPORT EXPANSION AND REGULATION ACT OF 1969

The Senate resumed the consideration of the bill H.R. 4293 to provide for continuation of authority for regulation of exports.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

On this question the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia (after having voted in the affirmative.) On this vote I have a pair with the distinguished majority leader, the Senator from Montana (Mr. MANSFIELD). If he were present and voting, he would vote "yea;" if I were at liberty to vote, I would vote "nay." I withdraw my vote.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Georgia (Mr. RUSSELL), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I also announce that the Senator from Nevada (Mr. BIBLE), the Senator from Missouri (Mr. EAGLETON), the Senator from Massachusetts (Mr. KENNEDY), the

Senator from Montana (Mr. MANSFIELD), the Senator from Rhode Island (Mr. PELL) and the Senator from Alabama (Mr. SPARKMAN) are absent on official business.

I further announce that, if present and voting, the Senator from Georgia (Mr. RUSSELL), would vote "nay."

I also announce that, if present and voting, the Senator from Massachusetts (Mr. KENNEDY) would vote "yea."

Mr. GRIFFIN. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oregon (Mr. HATFIELD), the Senator from Idaho (Mr. JORDAN), the Senator from South Dakota (Mr. MUNDT), the Senator from Ohio (Mr. SAXBE), the Senator from Illinois (Mr. SMITH), the Senator from Texas (Mr. TOWER) and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

The Senator from New York (Mr. JAVITS) is absent on official business.

The Senator from Arizona (Mr. GOLDWATER) is detained on official business. If present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

On this vote, the Senator from New York (Mr. JAVITS) is paired with the Senator from Texas (Mr. TOWER). If present and voting, the Senator from New York would vote "yea" and the Senator from Texas would vote "nay."

The result was announced—yeas 49, nays 24, as follows:

[No. 133 Leg.]

YEAS—49

Aiken	Hughes	Pastore
Anderson	Inouye	Percy
Bayh	Jackson	Prouty
Boggs	Long	Proxmire

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Mr. Byrd of West Virginia, against.

NOT VOTING—26

Baker	Hartke	Pell
Bible	Hatfield	Russell
Cannon	Javits	Saxbe
Church	Jordan, Idaho	Smith, Ill.
Eagleton	Kennedy	Sparkman
Eastland	Mansfield	Stevens
Ervin	McCarthy	Talmadge
Goldwater	McClellan	Tower
Gore	Mundt	

So the bill H.R. 4293 was passed.

Mr. MONDALE. Mr. President, I move that Senate bill 2696 be indefinitely postponed.

The motion was agreed to.

Mr. MUSKIE. Mr. President, I move that the vote by which the bill was passed be reconsidered.

Mr. BYRD of West Virginia. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. What is the will of the Senate?

ORDER FOR ADJOURNMENT

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in adjournment until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

VETERANS EDUCATION AND TRAINING ASSISTANCE AMENDMENTS ACT OF 1969

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 484.

The PRESIDING OFFICER. The bill will be stated by title.

The ASSISTANT LEGISLATIVE CLERK. A bill—H.R. 11959—to amend chapters 31, 34, and 35 of title 38, United States Code, in order to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons under such chapters.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Veterans Education and Training Assistance Amendments Act of 1969".

TITLE I—INCREASE IN ALLOWANCES FOR EDUCATION AND TRAINING PROGRAMS; AMENDMENTS TO FLIGHT TRAINING AND FARM COOPERATIVE PROGRAMS

SEC. 101. Section 1504(b) of title 38, United States Code, is amended to read as follows:

"(b) The subsistence allowance of a veteran-trainee is to be determined in accordance with the following table, and shall be the monthly amount shown in column II, III, or IV (whichever is applicable as determined by the veteran's dependency status) opposite the appropriate type of training as specified in column I:

"Column I	Column II	Column III	Column IV
Type of training	No dependents	One dependent	Two or more dependents
Institutional:			
Full-time	$160	$219	$255
Three-quarter-time	116	160	189
Half-time	80	109	124
Institutional on-farm, apprentice, or other on-job training: Full-time	138	182	219

Where any full-time trainee has more than two dependents and is not eligible to receive additional compensation as provided by section 315 or section 335 (whichever is applicable) of this title, the subsistence allowance prescribed in column IV of the foregoing table shall be increased by an additional $7.30 per month for each dependent in excess of two."

SEC. 102. (a) Subsection (a) of section 1677 of title 38, United States Code, is amended by striking out the material preceding clause (1), and inserting in lieu thereof the following:

"(a) The Administrator may approve the pursuit by an eligible veteran of flight training where such training is generally accepted as necessary for the attainment of a recognized vocational objective in the field of aviation or where generally recognized as ancillary to the pursuit of a vocational endeavor other than aviation, subject to the following conditions:".

(b) The last sentence of subsection (b) of section 1677 of such title is amended by striking out "$130" and inserting in lieu thereof "$190".

(c) Section 1677 of such title is further amended by adding at the end thereof a new subsection as follows:

"(c)(1) In any case in which a veteran wishes to pursue a course in flight training under this section but does not possess a valid private pilot's license and has not satisfactorily completed the number of hours of flight instruction required for a private pilot's license, the Administrator is authorized to make a direct loan to such veteran to pursue the flight training required for a private pilot's license.

"(2) Loans made under this subsection may be made in any amount not exceeding $1,000 or 90 per centum of the established charges for tuition and fees which similarly circumstanced nonveterans enrolled in the same flight-training course are required to pay, whichever amount is less; and such loans shall bear interest at a rate determined by the Administrator, but not to exceed 6 per centum per annum.

"(3) Loans made under this section shall be repayable in equal monthly installments over a period of time not to exceed three years commencing (A) upon the failure of the eligible veteran to enter upon a course of training under subsection (a) of this section within one year after obtaining a private pilot's license, or (B) upon failure to satisfactorily complete such a course of training within one year after enrollment in a course of training under subsection (a) of this section.

"(4) Loans made under this section shall be made upon such other terms and conditions as may be prescribed by the Administrator."

SEC. 103. (a) The table (prescribing educational assistance allowance rates for eligible veterans pursuing educational programs on half-time or more basis) contained in paragraph (1) of section 1682(a) of title 38, United States Code, is amended to read as follows:

"Column I	Column II	Column III	Column IV	Column V
Type of program	No dependents	One dependent	Two dependents	More than two dependents
				The amount in column IV, plus the following for each dependent in excess of two:
Institutional:				
Full-time	$190	$218	$240	$15
Three-quarter-time	140	162	184	10
Half-time	90	107	119	7
Cooperative	155	177	199	10".

(b) Section 1682(b) of such title is amended by striking out "$130" and inserting in lieu thereof "$190".

(c) Section 1682(c)(2) of such title is amended by striking out "$130" and inserting in lieu thereof "$190".

(d) Section 1682(d) of such title is amended to read as follows:

"(d)(1) An eligible veteran who is enrolled in a 'farm cooperative' training program which provides for institutional and on-farm training and which has been approved by the appropriate State approving agency in accordance with the provisions of paragraph (2) of this subsection shall be eligible to receive an educational assistance allowance as follows: $153 per month, if he has no dependents; $182 per month, if he has one dependent; $211 per month, if he has two dependents; and $10 per month, for each dependent in excess of two.

"(2) The State approving agency may approve a farm cooperative training course when it satisfies the following requirements:

"(A) The course combines organized group instruction in agricultural and related subjects of at least two hundred hours per year (and of at least eight hours each month) at an educational institution, with supervised work experience on a farm or other agricultural establishment; and the course provides for not less than one hundred hours of individual instruction per year, at least fifty hours of which shall be on a farm or other agricultural establishment (with at least two visits by the instructor to such farm or establishment each month). Such individual instruction shall be given by the instructor responsible for the veteran's institutional instruction and shall include instruction and home-study assignments in the preparation of budgets, inventories, and statements showing the production, use on the farm, and sale of crops, livestock, and livestock products.

"(B) The course is developed with due consideration to the size and character of the farm or other agricultural establishment on which the eligible veteran will receive his supervised work experience and to the need of such eligible veteran, in the type of farming for which he is training, for proficiency in planning, producing, marketing, farm mechanics, conservation of resources, food conservation, farm financing, farming management, and the keeping of farm and home accounts.

"(C) The farm or other agricultural establishment on which the veteran is to receive his supervised work experience shall be of a size and character which will permit instruction in all aspects of the management of the farm or other agricultural establishment of the type for which the eligible veteran is being trained, and will provide the eligible veteran an opportunity to apply the major portion of the farm practices taught in the group instruction part of the course.

"(D) Provision shall be made for certification by the institution and the veteran that the training offered does not repeat or duplicate training previously received by the veteran.

"(E) The institutional on-farm training meets such other fair and reasonable standards as may be established by the State approving agency."

(e) The table (prescribing educational assistance allowance rates for eligible veterans pursuing an apprenticeship or other on-job training) contained in section 1683(b) of such title is amended to read as follows:

"Periods of training	No dependents	One dependent	Two or more dependents
First 6 months	$116	$131	$146
Second 6 months	87	102	116
Third 6 months	58	73	87
Fourth and any succeeding 6-month periods	29	43	58".

SEC. 104. (a) Section 1732(a) of title 38, United States Code, is amended to read as follows:

"(a) The educational assistance allowance on behalf of an eligible person who is pursuing a program of education consisting of institutional courses shall be computed at the rate of (1) $190 per month if pursued on a full-time basis, (2) $140 per month if pursued on a three-quarter-time basis, and (3) $90 per month if pursued on a half-time basis."

(b) Section 1732(b) of such title is amended by striking out "$105" and inserting in lieu thereof "$155".

(c) Section 1742(a) of such title is amended to read as follows:

"(a) While the eligible person is enrolled in and pursuing a full-time course of special restorative training, the parent or guardian shall be entitled to receive on his behalf a special training allowance computed at the basic rate of $190 per month. If the charges for tuition and fees applicable to any such course are more than $59 per calendar month the basic monthly allowance may be increased by the amount that such charges exceed $59 a month, upon election by the parent or guardian of the eligible person to have such person's period of entitlement reduced by one day for each $6.20 that the special training allowance paid exceeds the basic monthly allowance."

SEC. 105. (a) Except as provided in subsections (b) and (c) of this section, the amendments made by this title shall become effective on the first day of the second calendar month which begins after the date of the enactment of this Act.

(b) Section 101, section 102(b), section 103, except subsection (d) thereof, and section 104 of this title shall become effective as of September 1, 1969.

(c) Any veteran enrolled in a farm cooperative course under section 1682(d) of title 38, United States Code, prior to the effective date prescribed in subsection (a) of this section may continue in such course to the end of the current academic year under the same terms and conditions that were in effect prior to such effective date.

TITLE II—SPECIAL ASSISTANCE FOR EDUCATIONALLY DISADVANTAGED VETERANS; PREDISCHARGE EDUCATION PROGRAM; VETERANS' OUTREACH SERVICES PROGRAM; MISCELLANEOUS AMENDMENTS TO VETERANS' AND DEPENDENTS' EDUCATION PROGRAMS

SEC. 201. (a) Subsection (b) of section 1652 of title 38, United States Code, is amended by adding at the end thereof a new sentence as follows: "Such term also means any curriculum of unit courses or subjects pursued at an educational institution which fulfill requirements for the attainment of more than one predetermined and identified educational, professional, or vocational objective if all the objectives pursued are generally recognized as being reasonably related to a single career field."

(b) Subsection (c) of section 1652 of such title is amended to read as follows:

"(c) The term 'educational institution' means any public or private elementary school, secondary school, vocational school, correspondence school, business school, junior college, teachers' college, college, normal school, professional school, university, or scientific or technical institution, or other institution furnishing education for adults."

SEC. 202. (a) Chapter 34 of title 38, United States Code, is amended by—

(1) striking out "section 1678 of this title" in section 1661(c) and inserting "subchapters V and VI of this chapter";

(2) striking out section 1678; and

(3) adding at the end of chapter 34 the following new subchapters:

"SUBCHAPTER V—SPECIAL ASSISTANCE FOR THE EDUCATIONALLY DISADVANTAGED

"§ 1690. Purpose

"It is the purpose of this subchapter (1) to encourage and assist veterans who have academic deficiencies to attain a high school education or its equivalent and to qualify for and pursue courses of higher education, (2) to encourage and assist institutions of higher education and other educational institutions in the development of programs which provide special instruction, counseling, tutorial, and other educational and supplementary assistance to such veterans, and (3) to encourage and assist institutions of higher education and other educational institutions in the development of special educational programs and projects for such veterans.

"§ 1691. Elementary and secondary education and preparatory educational assistance

"(a) In the case of any eligible veteran who—

"(1) has not received a secondary school diploma (or an equivalency certificate) at the time of his discharge or release from active duty, or

"(2) in order to pursue a program of education for which he would othewise be eligible, needs refresher courses, deficiency courses, or other preparatory or special educational assistance to qualify for admission to an appropriate educational institution,

the Administrator may, without regard to so much of the provisions of section 1671 as prohibit the enrollment of an eligible veteran in a program of education in which he is already qualified, approve the enrollment of such veteran in an appropriate course or courses or other special educational assistance program.

"(b) The Administrator shall pay to an eligible veteran pursuing a course or courses or program, pursuant to subsection (a) of this section, an educational assistance allowance as provided in sections 1681 and 1682 of this title; except that (1) no enrollment in adult evening secondary school courses shall be approved in excess of half-time training as defined pursuant to section 1684 of this title; and (2) whenever enrollment in a special educational assistance program cannot feasibly be measured under section 1684, such a program shall be considered full-time training for purposes of this chapter, when a minimum of twenty-five net clock hours per week of instruction or other supervised program work is required, and the Administrator shall prescribe the instruction or other work requirements for part-time training for any special educational assistance program.

"§ 1692. Special supplementary assistance

"In the case of any eligible veteran who is enrolled in and pursuing a course of education at an educational institution and who, because of a deficiency in his education or training, needs one or more refresher courses, counseling, tutorial, or remedial assistance, or some other form of special supplementary assistance in order to successfully pursue such course, the Administrator shall, on behalf of the veteran, reimburse the educational institution concerned the reasonable cost of providing such veteran with such special supplementary assistance. The amounts which shall be paid on behalf of an eligible veteran to any educational institution for special supplementary assistance provided him under this subchapter and the terms and conditions under which such assistance shall be provided shall be prescribed in regulations issued by the Administrator after consultation with the Commissioner of Education, but in no event shall the amounts exceed $100 per month on behalf of an eligible veteran.

"§ 1693. Grants and contracts

"(a) To carry out the purposes of this subchapter, the Administrator is authorized, in accordance with regulations issued by him after consultation wtih the Commissioner of Education, to make grants to and enter into contracts with institutions of higher education and other educational institutions to encourage and assist such institutions to—

"(1) plan and develop programs or projects in connection with the special educational and supplementary assistance programs authorized to be provided to eligible veterans by sections 1691 and 1962 of this title; and

"(2) plan, develop, strengthen, or conduct other special educational programs or projects for eligible veterans, including, but not limited to—

"(A) accelerated and concentrated educational programs;

"(B) educational programs extending beyond the usual period for completion of the course of study at an educational institution; and

"(C) encouraging and training such veterans to pursue public service occupations to meet community needs.

"(b) To carry out the purposes of this subchapter and those of subchapter IV of chapter 3 of this title, the Administrator is authorized, in accordance with regulations issued by him after consultation with appropriate departments and agencies of the Government referred to in section 242(6) of this title, to make grants to and enter into contracts with public and private non-profit organizations for the purpose of providing the outreach services specified in that subchapter to educationally disadvantaged eligible veterans.

"(c) There are authorized to be appropriated to carry out this section $15,000,000 for the fiscal year ending June 30, 1970, and $30,000,000 for the fiscal year ending June 30, 1971.

"§ 1694. Effect on other benefits and on approval requirements

"(a) The benefits received by or on behalf of any veteran under this subchapter shall be paid without charge to any period of entitlement the veteran may have earned pursuant to section 1661(a) of this title and shall in no way affect his eligibility or qualification for benefits under other provisions of this title or under other provisions of law.

"(b) The provisions of sections 1673(d) and 1675 of this title shall not apply in the case of programs provided under sections 1691(a)(2), 1692, and 1693 of this title.

"SUBCHAPTER VI—PREDISCHARGE EDUCATION PROGRAM

"§ 1695. Purpose; definition

"(a) The purpose of this subchapter is to encourage and assist veterans in preparing for their future education, training, or vocation by providing them with an opportunity to enroll in and pursue a program of education or training prior to their discharge or release from active duty with the Armed Forces. The program provided for under this subchapter shall be known as the Predischarge Education Program (PREP).

"(b) For the purposes of this subchapter, the term 'eligible person' means any person serving on active duty with the Armed Forces who (1) has served on active duty not less than twelve consecutive months, and (2) has twelve months or less active duty service remaining prior to the time he is expected to be discharged or released from active duty, as certified to the Administrator by the Secretary concerned.

"§ 1696. Payment of training and education expenses

"(a) The Administrator shall, under such regulations as he shall prescribe jointly with the Secretary of Defense and the Commissioner of Education, pay the education and training expenses for any eligible person who enrolls in and pursues a course of education or training offered by an educational institution if such course of education or training is required for or preparatory to any program of education or training or any vocation such eligible person intends to pursue after his discharge or release from active duty with the Armed Forces.

"(b) The education and training expenses which the Administrator shall pay under this subchapter on behalf of any eligible person shall include the cost of determining suitability for enrollment, job placement, and career guidance, and books and supplies furnished to the eligible person by the institution. In no event shall the Administrator pay more than $150 per month for any course of education or training pursued by any eligible person.

"(c) The cost of any education or training course paid for by the Administrator under this subchapter shall be paid directly to the educational institution furnishing such course.

"(d) In no event shall education or training expenses be paid on behalf of any eligible person for any period in excess of twelve months.

"§ 1697. Approved education or training courses and institutions

"The Administrator shall pay the expenses of a course of education or training pursued by an eligible person under this subchapter only if such course and the educational institution providing such course have been approved, without regard to sections 1673(d) and 1675 of this title, by the Administrator in accordance with regulations issued jointly by the Administrator, the Secretary of Defense, and the Commissioner of Education.

"§ 1698. Educational and vocational guidance

"The Administrator shall be responsible for arranging for and coordinating educational and vocational guidance and job placement assistance to persons eligible for education and training under this subchapter.

"§ 1699. Effect on educational entitlement and benefits

"(a) Education and training expenses under this subchapter shall be paid without charge to any period of entitlement an eligible person may earn pursuant to section 1661(a) of this title.

"(b) No person shall be eligible to receive educational benefits under this subchapter for any period for which he is receiving an educational assistance allowance under subchapter IV of this chapter."

(b) The table of sections at the beginning of chapter 34 of title 38, United States Code, is amended by striking out

"1678. Special training for the educationally disadvantaged.";

and by adding at the end thereof the following:

"SUBCHAPTER V—SPECIAL ASSISTANCE FOR THE EDUCATIONALLY DISADVANTAGED

"1690. Purpose.
"1691. Elementary and secondary education and preparatory educational assistance.
"1692. Special supplementary assistance.
"1693. Grants and contracts.
"1694. Effect on other benefits and on approval requirements.

"SUBCHAPTER VI—PREDISCHARGE EDUCATION PROGRAM

"1695. Purpose; definition.
"1696. Payment of training and education expenses.
"1697. Approved education or training courses and institutions.
"1698. Educational and vocational guidance.
"1699. Effect on educational entitlement and benefits."

(c) Section 1681(a) of such title is amended by inserting ", except subchapter VI," immediately after "this chapter".

SEC. 203. (a) Section 1684(a) of title 38, United States Code, is amended by—

(1) striking out "and" after the semicolon in clause (2); and

(2) striking out clause (3) and inserting in lieu thereof the following:

"(3) an academic high school course requiring sixteen units for a full course shall be considered a full-time course when a minimum of four units per year is required. For the purpose of this paragraph, a unit is defined to be not less than one hundred and twenty sixty-minute hours or their equivalent of study in any subject in one academic year; and

"(4) an institutional undergraduate course offered by a college or university on a quarter- or semester-hour basis for which credit is granted toward a standard college degree shall be considered a full-time course when a minimum of fourteen semester hours or its equivalent is required; except that where such college or university certifies, upon the request of the Administrator, that (A) full-time tuition is charged to all undergraduate students carrying a minimum of less than fourteen semester hours or the equivalent thereof, or (B) all undergraduate students carrying a minimum of less than fourteen semester hours or the equivalent thereof are considered to be pursuing a full-time course for other administrative purposes, then such an institutional undergraduate course offered by such college or university with such minimum number of semester hours, for which credit is granted toward a standard college degree, shall be considered a full-time course, but in the event such minimum number of semester hours under (B) is less than twelve hours or the equivalent thereof, then twelve semester hours or the equivalent thereof shall be considered a full-time course.

Notwithstanding the provisions of clause (4), a veteran shall be considered to be pursuing a full-time course at a junior college, college, or university if (A) he is carrying a number of semester hours, or the equivalent thereof, necessary to be considered a full-time course under clause (3), (B) credit is granted toward a standard college degree for not less than half the number of those hours, and (C) he is carrying one or more courses not paid for under section 1692 of this title and for which no credit is granted toward such a degree but which he is required to take because of a deficiency in his education."

(b) Section 1733(a)(3) of such title is amended to read as follows: "(3) an institutional undergraduate course offered by a college or university on a quarter- or semester-hour basis for which credit is granted toward a standard college degree shall be considered a full-time course when a minimum of fourteen semester hours or its equivalent is required; except that where such college or university certifies, upon the request of the Administrator, that (A) full-time tuition is charged to all undergraduate students carrying a minimum of less than fourteen semester hours or the equivalent thereof, or (B) all undergraduate students carrying a minimum of less than fourteen semester hours or the equivalent thereof are considered to be pursuing a full-time course for other administrative purposes, then such an institutional undergraduate course offered by such a college or university with such minimum number of semester hours, for which credit is granted toward a standard college degree, shall be considered a full-time course, but in the event such minimum number of semester hours under clause (B) is less than twelve hours or the equivalent thereof, then twelve semester hours or the equivalent thereof shall be considered a full-time course."

SEC. 204. (a) Chapter 3 of title 38, United States Code, is amended by adding at the end thereof a new subchapter:

"SUBCHAPTER IV—VETERANS OUTREACH SERVICES PROGRAM

"§ 240. Purpose; definition

"(a) The Congress declares that the outreach services program authorized by this subchapter is for the purpose of insuring that all veterans, especially those who have been recently discharged or released from active military, naval, or air service and those who are eligible for readjustment or other benefits and services under laws administered by the Veterans' Administration and other governmental programs, receive personalized educational, vocational, social services, and job placement assistance in order to aid them in applying for and obtaining such benefits and services, in achieving a rapid social and economic readjustment to civilian life, and in obtaining a higher standard of living for themselves and their dependents. The Congress further declares that the outreach services program authorized by this subchapter is for the purpose of charging the Veterans' Administration with the affirmative duty of seeking out eligible veterans and eligible dependents and providing them with such services through, to the maximum extent possible, one integrated Federal program which utilizes personnel who are able to communicate with and provide such assistance in the most effective and meaningful manner and which places maximum emphasis upon personal contact.

"(b) For the purposes of this subchapter (1) the term 'other governmental programs' shall include all programs under State or local laws as well as all programs under Federal law other than those authorized by this title, and (2) the term 'eligible dependent' shall mean an 'eligible person' as defined in section 1701(a)(1) of this title.

"§ 241. Veterans assistance centers and outreach services

"(a) The Administrator shall establish and maintain veterans assistance centers at such places throughout the United States, its territories, Commonwealths, and possessions, as he determines to be necessary to carry out the purposes of this subchapter, with due regard for the geographic distribution of veterans recently discharged or released from active military, naval, or air service, the special needs of educationally disadvantaged veterans, and the necessity of providing appropriate outreach services in less populated areas.

"(b) Veterans assistance centers shall seek especially to provide the outreach services provided for in this subchapter to educationally disadvantaged veterans and such centers shall, to the maximum practicable extent, be located in communities where large numbers of those veterans reside rather than in Federal or other business-district office buildings.

"(c) Special efforts shall be made to employ at veterans assistance centers veterans who themselves reside in the community served or in similar communities and, where possible, who themselves have received assistance from such centers. Personnel assigned to such centers shall be selected with major regard to their ability to communicate with and provide the outreach services authorized in this subchapter directly to educationally disadvantaged veterans in the most effective and meaningful manner.

"(d) Those outreach services that the Administrator shall provide to all eligible veterans and eligible dependents shall include, but shall not be limited to, the following:

"(1) The distribution of full information regarding all benefits and services to which they may be entitled under laws administered by the Veterans' Administration and to which they are entitled under other governmental programs, including training and manpower programs.

"(2) Arranging for and conducting, to the maximum extent possible, person-to-person interviews to explain and answer questions regarding the programs referred to in paragraph (1), and planning an individual program of education, training, or employment as may be best suited to the eligible veteran or eligible dependent concerned, and, in the case of an eligible veteran, an individual program which will also aid him in making a rapid social and economic readjustment to civilian life.

"(3) Providing job and other appropriate referrals and job placement assistance when appropriate, undertaking especially to match the particular qualifications of an eligible veteran or eligible dependent with an available job, on-job training opportunity, or apprenticeship opportunity which is commensurate with his qualifications or vocational objectives, and, if every effort to locate such an opportunity in his home area reveals no such opportunity, furnishing him with a listing of such opportunities available in other parts of the Nation.

"(4) Providing social and other special services necessary to aid them in obtaining maximum assistance from the benefits and services to which they are entitled.

"(5) Providing aid and assistance in the preparation and presentation of claims under this title and in connection with any other governmental program.

"(6) Maintaining full records of the outreach services offered and conducting periodic followup checks to determine the success of individual assistance provided and the success of the program generally.

"(e)(1) The Administrator shall pay the reasonable travel expenses, including per diem for food and necessary lodging, of any eligible dependent in connection with any interview of such veteran or dependent with an employer or training or apprenticeship director where such interview results from services provided through the outreach services program. The amount paid to any veteran or dependent under this paragraph as a per diem allowance and for travel expenses shall not exceed the amount authorized for such purposes under the Standardized Government Travel Regulations.

"(2) The Administrator shall pay a reasonable moving allowance to any eligible veteran or eligible dependent who obtains employment or is placed in a training or apprenticeship program as a result of services provided through the outreach services program, if (A) every effort made to locate suitable employment or placement in a training or apprenticeship program in the veteran's or dependent's home area has revealed no such opportunity, (B) a moving allowance or similar relocation assistance is not available under any other existing Federal program, and (C) a moving allowance is not provided as a matter of established policy by the employer or by the training or apprenticeship program in which the veteran or dependent is to participate. Such allowance may include reasonable travel expenses for the veteran or dependent and dependent members of his immediate family; reasonable expenses for moving his personal effects and household goods; and reasonable expenses for lodging for not more than a two-week period while seeking housing in the new location. In no case may the amount paid for moving the personal effects and household goods of a veteran or dependent exceed the maximum amount authorized to be paid pursuant to regulations issued by the President under section 5724 of title 5, United States Code, in connection with the transfer of an employee of the Federal Government.

"(3) The Administrator shall, after consultation with the Secretary of Labor, prescribe regulations to carry out the provisions of this subsection.

"(f) To the maximum extent possible, the Administrator shall begin providing the outreach services authorized in this subchapter to members of the Armed Forces prior to their discharge or release from active duty. Such services shall be provided such members at Army, Navy, and Air Force installations, especially those in foreign countries, pursuant to the authority of section 231 of this title.

"§ 242. Coordination with Federal and other agencies

"In carrying out the purposes of this subchapter, the Administrator shall—

"(1) utilize the facilities and services of any other Federal department or agency pursuant to proper agreement with the Federal department or agency concerned;

"(2) cooperate with and use the services of any State or local governmental agency or recognized national or other organization;

"(3) where appropriate, make referrals to any Federal department or agency or State or local governmental unit or recognized national or other organization;

"(4) at his discretion, make payment to cover the cost of services either in advance or by way of reimbursement as may be provided by agreement with any such Federal department or agency, State or local governmental unit or other organization;

"(5) at his discretion, furnish available space and office facilities for the use of authorized representatives of such governmental unit or other organization providing services under contract or agreement; and

"(6) conduct studies, in consultation and coordination with the Department of Health, Education, and Welfare, the Office of Economic Opportunity, the Department of Defense, the Department of Labor, the Department of Housing and Urban Development, and the Urban Affairs Council, to determine the most effective program design to carry out the purposes of this subchapter with respect to locating educationally disadvantaged veterans and assisting and motivating them to pursue education and training under this title.

"§ 243. Reports to Congress

"The Administrator shall submit to the Congress not later than September 1 and March 1 each year a report on the activities carried out under this subchapter, each report to include (1) an appraisal of the effectiveness of the programs authorized herein and the degree of cooperation received from other Federal departments, agencies, other governmental programs, and service organizations, with particular reference to section 241(d)(6) and 242(6) of this title, and (2) recommendations for the improvement or more effective administration of such programs."

(b) The table of sections at the beginning of chapter 3 of such title is amended by inserting immediately after

"236. Administrative settlement of tort claims arising in foreign countries."

the following:

"SUBCHAPTER IV—VETERANS OUTREACH SERVICES PROGRAM

"240. Purpose; definition.
"241. Veterans assistance centers and outreach services.
"242. Coordination with Federal and other agencies.
"243. Reports to Congress."

SEC. 205. Section 1677(a)(1) of such title is amended by deleting "or must have satisfactorily completed the number of hours of flight training instruction required for a private pilot's license,".

SEC. 206. Section 1681(d) of title 38, United States Code, is amended by inserting below clause (2) the following: "Notwithstanding the foregoing, the Administrator may pay an educational assistance allowance representing the initial payment of an enrollment period, not exceeding one full month, upon receipt of a certificate of enrollment."

SEC. 207. Section 1712 of title 38, United States Code, is amended by—

(1) deleting in subsection (a)(3) the words "first occurs" immediately preceding "(A)" and inserting in lieu thereof "last occurs"; and

(2) adding at the end thereof a new subsection as follows:

"(e) The term 'first finds' as used in this section means the effective date of the rating or date of notification to the veteran from whom eligibility is derived establishing a service-connected total disability permanent in nature, whichever is more advantageous to the eligible person."

SEC. 208. (a) Chapter 35 of title 38, United States Code, is amended by adding at the end of subchapter VI thereof a new section as follows:

"§ 1763. Notification of eligibility

"The Administrator shall notify the parent or guardian of each eligible person defined in section 1701(a)(1)(A) of this chapter of the educational assistance available to such person under this chapter. Such notification shall be provided not later than the month in which such eligible person attains his thirteenth birthday or as soon thereafter as feasible."

(b) The table of sections at the beginning of chapter 35 of such title is amended by inserting immediately below

"1762. Nonduplication of benefits."

the following:

"1763. Notification of eligibility."

SEC. 209. Chapter 36 of title 38, United States Code, is amended as follows:

(1) by inserting at the end of section 1772 thereof the following new subsection (c):

"(c) In the case of programs of apprenticeship where—

"(1) the standards have been approved by the Secretary of Labor pursuant to section 50a of title 29 as a national apprenticeship program for operation in more than one State, and

"(2) the training establishment is a carrier directly engaged in interstate commerce which provides such training in more than one State,

the Administrator shall act as a 'State approving agency as such term is used in section 1683(a)(1) of this title and shall be responsible for the approval of all such programs.";

(2) by deleting section 1781 of subchapter II in its entirety and inserting in lieu thereof the following:

"§ 1781. Limitations on educational assistance

"No educational allowance or special training allowance granted under chapter 34 or 35 of this title shall be paid to any eligible person (1) who is on active duty and is pursuing a course of education which is being paid for by the Armed Forces (or by the Department of Health, Education, and Welfare in the case of the Public Health Service); or (2) who is attending a course of education or training paid for under the Government Employees' Training Act and whose full salary is being paid to him while so training."; and

(3) by deleting in the table of sections at the beginning of such chapter the following:

"1781. Nonduplication of benefits."

and inserting in lieu thereof the following:

"1781. Limitations on educational assistance."

SEC. 210. The amendments made by this title shall become effective on the first day of the second calendar month which begins after the date of enactment of this Act, except that the amendments made by section 208 shall become effective July 1, 1970.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FANNIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADMINISTRATION POLICY ON VIETNAM

Mr. FANNIN. Mr. President, the Senator from South Dakota (Mr. McGOVERN), certainly a well educated, cultured, and patriotic man is, nevertheless, once again attempting to put the monkey on the wrong back.

In a speech he made on the Senate floor today, he talks of secret commitments and preparations as if they were of the Vice President's and this administration's doing.

Surely he knows better. He is too simplistic. Can it be that he hopes the people do not?

This administration inherited a foreign policy filled with secret commitments and secret preparations.

And whom did they inherit from? Why, the party of the Senator from South Dakota.

Where was the Senator's righteous indignation during the Kennedy years and the Johnson years?

We have a right to have an answer to that question. It is indeed strange to watch how strongly indignation waxes when the President is a member of the other party.

Mr. HANSEN. Mr. President, the Senator from South Dakota talks today of patriotism, and nobody doubts his. His record in World War II is a distinguished one.

It is merely his judgment that is called into question by today's speech.

Though he couches it in high-flown phrases, the fact remains: the Senator from South Dakota, for whatever reason or from whatever motive, advocates surrender.

He can attack the President and the Vice President all he chooses, he can obfuscate the issue in any way he wishes, but the fact remains that the Senator from South Dakota advocates surrender and has allied himself with others of the same mind.

I for one am proud that this Nation has both a President and a Vice President who are willing to honor the commitment made by the Senator's own party. I am proud that this administration puts the long-range security of our Nation ahead of the short-range political benefits that might be gained from a move that the entire world, including most Americans, could only view as a defeat that would surely damage our country in other parts of the world as well.

Mr. MURPHY. Mr. President, will the Senator yield for a question?

Mr. HANSEN. I yield.

Mr. MURPHY. In the discussion of the so-called moratorium, very often we hear of its leaders. Does the Senator know who the actual leaders of the organization are? I believe some of the remarks I heard were that they demanded certain things of the President. Do we know who these people are?

Mr. HANSEN. May I say to the distinguished Senator from California that I am not certain who all the leaders are. I know of no one who has sought to incriminate all of the persons who were involved in the moratorium. I think it would be fair to say that there were people of a great number of persuasions. There were people who appeared at the moratorium for a great number of reasons.

The point that I think ought to be kept in mind is simply that there undoubtedly were, among those who were active on the day of the moratorium, some who were not seeking to serve the best interests of this country.

Insofar as the Senator from Wyoming knows, I think it would be accurate and fair to say that the huge majority of them were good, patriotic American citizens.

I think it must be observed, though, that there were some whose purposes were not designed to serve the national interest.

Mr. MURPHY. I ask the distinguished Senator another question: I am reading from a copy of the remarks made by the distinguished Senator from South Dakota (Mr. McGOVERN), in which he said:

> The youth of America are not about to swallow the old schemes of forced killing in foreign crusades.

Does he consider that this war is a scheme that was put together for the purpose of forced killing, and if so, would he accuse the former Presidents of the United States who sent the troops there of perpetrating the scheme? Would that be his intent, does the Senator think?

Mr. HANSEN. I would have to say that I do not subscribe to that statement, that this is a scheme to bring about forced killings in foreign crusades.

As a former Governor of Wyoming, it was my privilege on several occasions to support the efforts of former President Johnson as it related to Vietnam. As the Senator from California knows, I am of a different political persuasion than was he. I do not think that President Johnson had the choice of deciding whether or not we should be in the war, but I think he recognized, just as I believe President Nixon recognizes, that once this country of ours has made a commitment, it is important not only in that area of the world, but worldwide, that people know they can believe in what America says; that, having said we will do something, it is our intention to carry forward and attempt to fulfill our commitments.

I find every reason to believe that, as President Nixon is carrying on in these extremely trying circumstances today, he is trying to keep our country's commitments, and at the same time to bring this most unfortunate war to a conclusion.

His concern is that this must be done in a fashion so as not to damage us in other parts of the world, so as not to give false encouragement to other people in other places that America does not stand by her commitments, and thereby tend to undermine the impression that other people and other nations have of us.

Mr. MURPHY. I wonder if the Senator knows that yesterday I inserted in the RECORD parts of a letter provided me by a man who had served in positions of great trust in the Eisenhower administration and the administration of President John F. Kennedy. He pointed out that

when President Eisenhower and Vice President Nixon left office, we had 800 military advisers in South Vietnam and about 800 civilian advisers and when Mr. Nixon came back as President of the United States a few years later, he inherited a situation where we have 550 military in South Vietnam.

Mr. HANSEN. Does the Senator mean 550,000?

Mr. MURPHY. Five hundred and fifty thousand; I thank my distinguished colleague. But it seems that there is an attempt to imply, somehow or other, that the responsibility for this unfortunate situation rests with President Nixon. From time to time he is given an ultimatum of "get out, and get out immediately."

It is my understanding that this President has offered far more in the way of an honorable, peaceful settlement than the previous administration. Nevertheless, it is implied that he is not doing enough. He brings home 25,000 troops, and immediately the cry arises, "That is not enough." This is the first troop reduction that I know of.

Then he increases the number to 60,000, a meaningful percentage of our combat troops. Actually, it seems to be forgotten that for each fighting man in South Vietnam, we have five backup personnel. So out of every six there, one is fighting. In the Air Force the percentage is even greater—the percentage is 20 to 1.

So I wonder why people do not realize that President Nixon actually has done more in the 9 short months since he has been in office to reduce the troop levels than the two previous administrations accomplished in their entire time in office. For the first time we are decreasing these levels, decreasing them, may I say, in a thoughtful way, in a way to preserve our national security, and not by surrendering. Certainly, if the Senator from South Dakota feels that the entire intervention in Vietnam was a mistake, I think that he has waited an extremely long time to express himself.

But there is one other point, still more important: The composition of the group who organized the so-called moratorium. I am not quite sure who they are. I have inquired, and I have some names. I have the name of David Hawk. I do not know his background. I have the names of Sam Brown, Jr., David Mixner, Marge Sklencar, Mike Driva, Mike Mazoloff, and Sheridan Bailey. I have never heard of them until this particular event, moratorium.

Is it the suggestion of the distinguished Senator from South Dakota that we stop listening to the elected representatives of the people, and listen hereafter to this group, because they did not suggest, they demanded immediate withdrawal? Is it his suggestion that we also listen hereafter only to them, and that it would be proper to turn over not only this decision, but perhaps many other decisions of the Government to them; that we forget about the elected representatives and let anybody who can get a large group to march in Washington, or Detroit, or Los Angeles, or Berkeley, dictate our national policies? Is that what he suggests? And is it improper for the Vice President to disagree with that suggestion? The Vice President was also elected just as was the Senator from South Dakota.

This is part of the confusion that I do not understand. In the last sentence, the Senator from South Dakota said:

> I believe that increasing numbers of Americans, young and old, of every political persuasion, in every walk of life, are determined to have a voice in those issues that affect their lives.

I thought that was what our whole system had been about from its very beginning. We have a franchise, and all those of us who qualify to vote may go and make our wishes known, in an orderly, dignified, constructive fashion. We do not have to take to the streets in mobs, and we do not have to march in vigils. We leave the affairs of Government to those who stand for election, who expose themselves to the public with their beliefs, and their past records. Our elected officials are tested by whether they are decent or honorable, and by whether they are capable.

I submit most respectfully that there is nothing new about the people of America having a voice in these issues. I think this is what America is all about.

I know that I have spent a great deal of my time for the last 30 years urging Americans to take the time to understand the issues, to know the qualifications of the candidates, and then to go with full knowledge and exert their power at the ballot box.

I do not think it is an improvement on this system to say, "Let's get a lot of signs, and let's get some candles and march around the White House and chant some slogans."

This march, last Wednesday, of course, was very orderly. I think one of our distinguished colleagues made great mention of the fact that this was an orderly march. There was not any rioting or bad language.

I sincerely hope that if the marches continue, they will at least be conducted in this fashion.

It does not seem that there is anything particularly new involved here except that there seems to be a suggestion that perhaps we should not determine the importance of a matter by legislative debate but, rather, by the number in the picket line, by the clamor they make, by the publicity they get, and by the television coverage their demonstration attracts.

I do not think the Vice President meant that the people do not have the right of dissent. He did not imply that, at least to me. However, I do think he said that the President has the right to decide and administer policies. And I think the Vice President is correct in pointing out that perhaps some people with ulterior motives have been misleading and using some of these good, honest, independent young students by telling them only half of the story.

I continue to read comments about the South Vietnamese Government and the confusion in General Thieu's corrupt military dictatorship.

I heard about the so-called corrupt military dictatorship of China. We then turned China over to the Communists. That same so-called corrupt dictatorship went to Taiwan where they are now doing a magnificent job.

We heard about the corruption in Korea. And suddenly we find that the South Koreans are not any more or less corrupt than perhaps some of the men in the Government of the United States.

I was there as an observer when the Thieu government was elected. And I assure the distinguished Senator from Wyoming that I never saw a more determined attempt at democracy or a stronger attempt to make an election honest and fair.

Certainly there were some troublemakers that were locked up. There were one or two. I recall that the same procedure used then is taking place in many other countries.

I do not think the Thieu government does anything but represent the people.

I said yesterday that there were those who marched in the demonstration on the basis that they want to stop the killing. Lord knows, I would like to stop the killing. I wish the killing had never started. However, if they insist on our immediate withdrawal, they will see killing in South Vietnam the like of which we have not seen since we heard and watched and listened to and shuddered at the atrocities committed during World War II.

Mr. HANSEN. Mr. President, is it not true that a number of America's finest young men are being held prisoners of war in North Vietnam at the present time? So far as I know, the number has not been established. There has been no official word from North Vietnam as to the number of prisoners they hold in their country. These men have been taken from the ranks of the gallant fighting men of our country.

What about those prisoners? If we were to get out of Vietnam by boat, as some have suggested, would we not be leaving those men who are perhaps being held captives by the North Vietnamese at the present time at the mercy of a country which has no compassion, a country which has demonstrated by a great series of acts of violence that human life is of little or no consequence?

Is there any reason to believe that the North Vietnamese would be willing to turn these prisoners back to us if we were to leave there? Is this not another consideration that ought to be included among the issues that must be resolved if we seek to bring this war that has been engaged in by our country for a longer period of time than any war in our history to a conclusion?

Mr. MURPHY. Mr. President, the Senator is absolutely right. I know he is right when he says that we do not have information as to the prisoners. The Communist government in Hanoi has absolutely ignored all the rules and all the ordinary concessions made with respect to information on prisoners.

I also point out that I received figures the other day that showed that in this year, aside from the military, 22,500 South Vietnamese have been victims of unbelievable atrocities and terrorism.

My figures indicate that of the 22,500—

and these are civilians—14,000 were murdered. The fate of the rest is unknown. Some have disappeared. Some have been kidnaped. Others have been so badly treated in some cases that it might have been better if they had been killed quickly. It would have certainly been less horrible than the treatment they received. These are the conditions that exist there.

I am amazed that the people who state continually that America is in Vietnam illegally, are willing to make such a contention. It is not true.

The former President of the United States, President John F. Kennedy, decided to send American fighting men to Vietnam. Before he did so, President Eisenhower decided that it was in the best interests of the United States to send military advisers there. President Johnson continued to act in the belief that it was in the best interests of the United States to continue to fight in Vietnam.

Who are these people who were opposed to the actions of the last three Presidents of the United States and who confront the present President with the cry that he must get out and get out immediately?

I do not quite understand their sense or the logic. I do not know why these Americans suddenly feel it their duty to attack our present administration or the duly elected government in South Vietnam—perfect or not. Certainly no government is perfect. However, it was elected by the Vietnamese people.

I do not see the logic or the propriety of suddenly saying we must get out merely because of demonstrations by a group of people well organized, highly publicized, and led by I am not quite sure whom. As I have said on the floor of the Senate before, we are not sure what the result of this will be, but we are sure of one thing: they have created good international propaganda for the enemy, for the Communist enemy.

I was pleased to hear this cited very clearly the other night. The identity of the enemy is not America. We are not the aggressor. We went there to protect people who asked for our protection.

I wonder if those who complain have thought of what will happen to the 2 million people of the Catholic religion who, in objection to the Communist takeover in Hanoi, walked from the North to the South when they had the choice. What will happen to them if we pull out?

I just cannot understand the reasoning; I cannot understand the logic; I cannot understand the desire of so many people to say that we must get out immediately, to save American boys. How long do you save them, and under what conditions do you save them? And where is the next battle to take place? There is no change in the Communist program; not the slightest evidence of change. To the contrary, wherever there is a vacuum, they move in quicker than they did before. Their military strength, we know from the protracted debate in this Chamber, is greater than before.

Why are the Communists building their military strength? To have a bigger parade on May Day? I do not think so. I think they are building it for the exact purpose they stated many years ago.

I read Hitler's book, "Mein Kampf," and I said, "This man means what he says. We have to believe him." Many did not believe him, until it was almost too late.

Again, today, all the evidence would say that we had better have the best brains, we had better have the finest information, we had better have the most mature thought, and we had better have full debate before we make military decisions.

I do not think this should be left to a group, no matter how dedicated or patriotic or well-meaning, which suddenly marches and says, "We are numerically strong; therefore, Mr. President, you must accede to our demands." I think that would be dangerous, and I think that those who advocate this should take another long, hard look at the mischief and precedents they might be creating—certainly not by design, but by what might result from their unfortunate suggestions.

Mr. HANSEN. I thank my distinguished colleague for the contribution he has made.

I think it is perfectly clear that the President and the Vice President of the United States realize, as the Senator from California has so thoughtfully pointed out, that theirs is a responsibility not to any one group, not to any one movement that may be demonstrating, albeit very lawfully and peacefully.

I quite agree with the distinguished majority leader that there can be no question about the right peacefully to protest or to demonstrate, as they did, so long as they do it peacefully. That is guaranteed by the Bill of Rights. But the important thing we must keep in mind—and the distinguished senior Senator from California has it clearly in mind—is that the responsibility of the President and the Vice President goes to all Americans. Their duty is to see that they represent all Americans, all 200 million plus of them, and I think that is what they are trying to do.

I would refer once again to the distinguished majority leader in just taking note of the fact that he finds much for which to commend the President in the course of action he is now pursuing.

Mr. MURPHY. Mr. President, will the Senator yield?

Mr. HANSEN. I yield.

Mr. MURPHY. I believe that yesterday or the day before yesterday the distinguished majority leader said something in the Senate that was extremely important. He said that he would hope there could be an association of free nations—I am paraphrasing, but this was the sense of his remarks—that would absolutely guarantee the freedom and the freedom of choice of all of Southeast Asia. I concur in that statement completely and enthusiastically. That is the only reason I know of why American troops, American advisers, and American fighting men went to Southeast Asia in the first place. Certainly, it was for no other reason of which I know.

I thank my distinguished colleague.

Mr. HANSEN. I thank the distinguished Senator.

Mr. THURMOND. Mr. President, I should like to comment briefly on a statement of the Senator from South Dakota concerning the Vice President's recent speech in New Orleans. What the Vice President counsels is patience and responsibility. What the Senator from South Dakota counsels, it seems to me, is peace at any price rather than peace on terms which consider the historic moral commitment of America in Asia.

Disengagement in Vietnam immediately and without qualification is irresponsible and those who advocate it must answer for their statements. There must be those elected leaders willing to say precisely this and risk the contempt of those who seek a settlement in Vietnam inconsistent with the American tradition.

Mr. President, I, like the Vice President, simply intend to caution the well-meaning followers against the ill-considered position of "peace at any price" advocated by far too many of the moratorium leaders. Those who choose to follow such a position may well inherit an infamous peace and the lasting scorn of a generation of Americans to follow. As a great power we must live with Asia and I, for one, intend to live honorably with Asia. This Senator has no intention of repeating for this country the dishonor of England in accepting "peace at any price" at Munich.

THE MORATORIUM

Mr. DODD. Mr. President, the Senator from South Dakota (Mr. McGOVERN) has taken exception to the comment on the Vietnam moratorium made in New Orleans over the weekend by Vice President AGNEW. He has accused the Vice President of impugning the patriotism of all those who disagree with the administration's policies in Vietnam.

Apparently, the Senator took exception to two basic statements. The first statement was that moratorium day was an unwise demonstration "encouraged by an effete corps of impudent snobs who characterize themselves as intellectuals."

The second statement by the Vice President to which he objected most strongly was his warning that "hard-core dissidents and professional anarchists" within the peace movement were planning "wilder, more violent" antiwar demonstrations on November 15.

One does not have to agree with every statement made by the Vice President or with every phrase he used in order to recognize the basic validity of his criticism of the moratorium movement and of his warning about the November 15 demonstration.

That the majority of the demonstrators were being used for purposes which they did not approve or understand was apparent from the glowing official tribute of the North Vietnamese Government.

I think it is clear from the Vice President's statement that his remarks were intended to apply not to the great mass of demonstrators who participated out of a variety of confused motivations but to the self-proclaimed leaders of the recent moratorium and to the leaders of the forthcoming march on Washington.

I have no doubt that there are some

innocents in both groups of leaders. On the other hand, there are many people whose antecedents are open to very serious question.

The principal spiritual organizer of the moratorium was the notorious Dr. Spock, who has consistently attempted to corrupt young Americans by urging them to dodge the draft.

Dr. Spock, for two decades, was the foremost apostle of the permissive upbringing of children, and the baneful influence which he had on the several generations of young American parents who read his books on child care played a major role in producing the current generation of campus extremists.

Dr. Spock was a disaster as a baby doctor. He has been an even greater disaster as a self-appointed leader of the American peace movement.

To describe him as "an effete and impudent snob" is to understate the case.

Not only has he visited Hanoi a number of times, but he has made it clear by repeated statements that he would personally prefer a Vietcong victory to an allied victory in the Vietnam war.

The ranks of the moratorium leaders also include one, David Hauk, an apt disciple of Dr. Spock, who is now on trial for draft evasion.

They included Mr. Sam Brown, who has referred to the United States as "the greatest imperialist aggressor nation in the world," and who has also made it clear that he would prefer a Vietcong victory over an allied victory.

As for the New Mobilization Committee To End the War in Vietnam, its steering committee is packed with known Communists and pro-Communists, including Arnold Johnston, the public relations director of the U.S. Communist Party.

There was some speculation that the moratorium leaders were essentially a more moderate lot than the mobilization leaders, and that they might wish to steer clear of involvement with the known Communists and Trotskyists and Maoists and assorted leftwing extremists who are organizing the November 15 march on Washington. But this morning's papers brought the news of a formal agreement between the moratorium committee and the New Mobilization. Sam Brown, the chief spokesman for the moratorium committee, told the press that there was no split between the groups. Rather, he said, "there is a difference in emphasis."

Mr. President, the time has come to stop mincing words. There should be no question in the mind of any informed person that the ranks of the organizers of the November 15 march on Washington contain numerous treasonable elements, who are committed to the overthrow of our own Government, who seek the victory of our enemies, and who are acting in collusion with and under the orders of Hanoi.

There have been numerous evidences of coordination between Hanoi and the antiwar demonstrators in the United States. For example, on April 22, 1968, at a time when Hanoi was getting ready to launch its abortive summer offensive, the Vietcong ambassador in Havana, Hoan Bich Son, broadcast the following statement to the demonstrators in this country over Radio Havana:

Your struggle against the warmongers in the Pentagon and White House is a hard blow at the heart of our common enemy, because your activities will take place precisely at the time that the South Vietnamese people, in urban areas and the countryside, have risen with tremendous strength to smash the General Headquarters of the U.S. aggressors and their puppets in all the cities of South Vietnam. This way, our struggle for liberty is entering a new phase, more favorable for the Vietnamese people.

Mr. President, many of those who participated in the moratorium or who endorsed the moratorium, unlike some of their leaders, would prefer not to see a Vietcong victory.

But I wonder if they have ever stopped to ask themselves what the outcome of World War II might have been if, a year before its conclusion, hundreds of thousands of our citizens had taken to the streets to call for immediate peace and an end to the killing.

The Vietnam Moratorium was not a victory for peace. It was, let us be blunt about it, a victory for the Vietcong.

Mr. President, I ask unanimous consent to have printed in the RECORD the following items: "The President's Case," editorial in the Wall Street Journal, October 21, 1969; "Reds in Paris Net Moratorium Profit," by Andrew Borowiec, Evening Star, October 17, 1969 and; " 'Other war' in United States Riles GI's" by Don Tate, Washington Daily News, October 14, 1969.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Oct. 21, 1969]

THE PRESIDENT'S CASE

We hope by the time of President Nixon's November 3 speech on Vietnam he will be ready not only for one speech but for a well-considered campaign to put his case before the public. The President has an excellent case, but somehow he must find a way to present it more persuasively than he has so far.

The President, after all, has started to bring troops home. The casualties have fallen. His policy is to end American participation in the war. His only reservation is that this be done in a way that promotes "lasting" peace.

Mr. Nixon quite cogently believes lasting peace will not result if America lurches out of Vietnam and lets the pieces fall where they may. That course would encourage instability everywhere. It would also confirm and cement the American habit of all-or-nothing foreign policy—a dangerous habit in a nuclear age. There is little excuse for mindless capitulation at the moment, when there seems to be some chance to end the American fighting on honorable terms through the policy of Vietnamization.

The most notable thing about the Vietnam Moratorium was the turnout of people who did not in fact sympathize with its ostensible purpose of immediate unilateral withdrawal. Thus its real meaning is that the President's case has not come through. We think this is primarily the fault of those who fail to understand, for the case should be clear enough to anyone who looks. But it is also true that the President has not made his arguments as forcefully as he might.

There are some excellent reasons, to be sure President Nixon came into office asking us to "lower our voices." His purpose has been to calm the passions of the nation, not a purpose served by being too aggressive in campaigning for his policies. And up until Labor Day, this low-key salesmanship proved astonishingly effective—too effective, perhaps, for its succes lulled the Administration into persisting with that rhetorical strategy when its time had passed.

The Administration has also been inhibited in defending its policies by the knee-jerk reflexes of much of the Washington press corps, which sticks so close to the President's political opponents it has picked up the unlovely attitude that it's unfair for the kicked dog to bite back. Who can deny, for example, that the outpouring of dissent makes any kind of negotiated settlement all but impossible for any practical purposes? The President did not invent that dilemma, it is a fact of life. Why do so many commentators—not to mention ostensibly objective newsmen—belittle him for stating plain fact?

By now it is pretty clear that the President's opponents have denied him the option of lowering voices. The Moratorium was, after all, a mob in the streets—with the threat of violence always implicit even if it was avoided this time. It is equally clear that the President need not worry too much about inflaming his political opponents on Capitol Hill—they can do nothing to him they are not already preparing to do. At the moment the President's option is to take the rhetorical offensive.

The last thing we mean by that is a lot of defensive talk about the need for unity or how best to promote a compromise at Paris. Such topics call for candor; that is, an admission that neither appears to be in the cards at the moment. What we do mean is that the President should hit the protesters in their weak point, which is that they have no realistic alternative to the policy the Administration has already adopted.

The President has every right and duty to ask the protesters what precisely they want him to do. How many of the common citizens who marched in the Moratorium really want an unthinking withdrawal? Have they pondered the slaughter that would probably ensue in Vietnam? Have they thought about peace a few years hence, about the encouragement of our enemies and discouragement of our friends?

Are they really ready for the possible political backlash here at home if the United States capitulates when another option still seems open? (News item: George Wallace plans to leave on an "information-gathering" trip to Vietnam November 1). If they do ponder all these things, are they not then willing to see a couple of years of gradual troop withdrawals in the name of ending the war in a thoughtful way?

The point of the Administration's rhetorical campaign—and one speech is only a beginning—should be to make the real alternatives clear to the American people. The President stands for ending the war with a considered plan. The militant protesters stand for a helter-skelter pullout. If Mr. Nixon can make that clear, we would be most surprised if he fails to win the quiet, unhappy but resigned support he needs.

[From the Washington Star, Oct. 17, 1969]

REDS IN PARIS NET MORATORIUM PROFIT

(By Andrew Borowiec)

PARIS.—The Communist side at the Vietnam peace talks has reaped considerable profit from the U.S. Moratorium Day movement.

The Hanoi and Viet Cong negotiators have become strengthened in their previously demonstrated conviction that time plays in their hands and that no compromise on their part is necessary to attain their objectives.

They demonstrated this attitude clearly during yesterday's session of the deadlocked

negotiations during which they praised "the opposition movement of the American people," heaped abuse on President Nixon and reactivated a proposal for direct and secret talks between the United States and the self-styled Viet Cong government.

The proposal appeared to be carefully timed with the Moratorium demonstrations. It had the appearance of a new initiative, but it was not. And it was aimed directly at embarrassing the United States and exposing its relations with the Saigon government to additional strain.

Committed to support the Saigon regime for better or worse, the United States is hardly in a position to bypass it in seeking a solution to the Vietnam conflict. Hence chief U.S. negotiator Henry Cabot Lodge brushed aside the Communist proposal, at the same time trying to avoid the impression of outright rejection.

(In Washington, White House Press Secretary Ronald L. Ziegler said that the United States would not meet alone with the Viet Cong. He said, however, that if the Saigon government arranged talks with the National Liberation Front, the United States would be willing to participate even if Hanoi were absent from the discussions.)

Thus, after 38 weekly sessions of the conference, it seemed on the surface that the initiative was in the hands of the Communists.

Lodge limited himself to repeating that "We are ready and willing to carry on private and direct talks in which all those represented on each side at these meetings will participate."

Neither he nor his press spokesman, Stephen Ledogar, would say flatly whether the statement represented rejection, because rejection of an "opening" at the talks at this time would mean slamming the door on peace.

The Communist "peace move" was carefully planned to get a maximum of attention and publicity at a time when newspapers and radio stations were full of U.S. Moratorium reports.

Had the Communists wanted to break the stalemate, they did not have to make any public announcement but simply use a channel opened all the time for both parties to communicate on urgent matters in secrecy.

Lodge's statement that he was "surprised" by the Communist move was in itself surprising. Newsmen in Paris had expected exactly this sort of headline-catching proposal that was bound to embarrass the allies.

And while Ledogar agreed that the Communist side attempted "to distort the Moratorium to its advantage," the South Vietnamese spokesman calmly announced that the Red proposal had nothing to do with it.

The Communist view, repeated countless times, is that the Viet Cong and its provisional government are the only legal authority in South Vietnam and if the United States wants to solve the problem, it must talk with it.

The Saigon "puppet regime" simply does not enter into the picture, according to the Communists. Having obtained the American halt of the raids over North Vietnam, having, in a way, caused the withdrawal of 60,000 U.S. troops from South Vietnam, the Communists now want the United States to disavow the regime it is helping to maintain in power.

For obvious reasons, Lodge could not answer this challenge more directly. He contented himself with a reaffirmation that the Saigon government "is a legitimate government without which nothing of importance can be done in South Vietnam."

But the seed of discord has been planted and the Communists are now waiting for more signs of protest within the United States and more cracks between the allies.

[From the Washington Daily News, Oct. 14, 1969]

"OTHER WAR" IN UNITED STATES RILES GI'S

(By Don Tate)

SAIGON, October 14.—As tomorrow's war "moratorium" will demonstrate, there are two Vietnam wars—the one Americans fight in Vietnam, and the one Americans fight in the U.S. Observers here say the decisive battleground is in the U.S.

They point out that short of a highly successful Communist offensive, which is extremely unlikely, or a dramatic allied strategy change, such as renewed bombing of North Vietnam, the killing war in South Vietnam is apt to rock along in its fight-lull-fight rhythm much as it has been, at least until many more U.S. troops are withdrawn.

Meanwhile, the war to win American public opinion and, particularly, the mind of Richard M. Nixon, is waxing hotter. What happens in the U.S. will determine what happens here. As the President warns Americans not to buckle and run, protesters prepare to hit the streets, many of them demanding immediate, unilateral withdrawal of all American troops. That translates here as "bugout."

GI DISDAIN "BUGOUT"

It is difficult to find an American soldier here who wants to leave Vietnam that way, or as one GI put it, "with our tails dragging." It is difficult to find one—even among those most disgusted with the war—who wishes simply to abandon the South Vietnamese to a Communist bloodbath.

It is difficult to find one who thinks the value of the American word would be worth a dime anywhere in the world if they did, or that a humiliating U.S. defeat by a blustering Communist midget would do anybody but the Communists any good.

These consequences are apparent to most Americans here, and they are not acceptable. It is largely a matter of national backbone. Most express hope that President Nixon sticks to seeking a reasonable solution to the war.

There are, of course, many critics of war critics here. They charge that a number of war critics in the U.S. are using the same tactics Hanoi has shown—the more you give them the more they demand, and they both demand total, immediate and unconditional everything.

In the two wars—one group of Americans is convinced of the rightness and necessity of bringing this bitter war to a conclusion by presenting a united front to Hanoi, the other protesting group is more or less convinced the only way out of Vietnam is to get out fast regardless of consequences.

MYSTERY IN VIETNAM

There is often the feeling here that the war is only a secondary feature to the show of exposed nerves going on in the U.S. What the war has done to the U.S. is the biggest mystery of all here.

"It seems like any American who ever wanted to protest anything has found his cause in the Vietnam war", one veteran analyst contends, "and yet 95 per cent of them have suffered little direct personal hardship because of the war.

"You hear so much of the war-weary American, and how exhausted he is by the war. Yet this exhaustion of the mightiest power on earth is a relative thing. It hasn't been bombed, or invaded, or lived under the Communists a single day. It's manpower loss has been a drop in the bucket compared to that of either North or South Vietnam, and its suffering has been a thousand times less. "Many Americans would hardly know the war was going on if it wasn't for newspapers and TV. Suppose Americans had to face what the South Vietnamese people have yet to face? America's exhaustion is a self-induced state of mind, composed mostly of confusion."

One rankled American, with invested years and effort in Vietnam, condemned some of the rantingest protesters as the "most confused of all."

WEARY OF "POPPING OFF"

"Soldiers do the dying," he said, "and these others do the popping off. I'm tired of hearing these so-sure people who haven't shed a nosebleed in this war scream pig this and obscene that and run around protesting for the hell of it.

"I'm tired of hearing what politicians who sound like Hanoi radio demand, what well-meaning but awfully uninformed students demand, what ivory-tower doves who wouldn't dirty their hands over here demand. I'm weary of hearing how much Sen. (J. William) Fulbright, D. Ark., wants out. We all want out. We all protest the war. We all want peace. But not by saying: 'Here Hanoi, take 17 million people. We'll pretend we were never involved. We quit.'"

Many here feel that some of the protesters would do well to focus their moral wrath less on President Nixon and more on the Communists.

It is the Communists, they stress, who are killing Americans. It is the Communists who butchered, as a matter of policy, the civilians of Hue and so many other places, and it is the Communists who will murder methodically thousands more Vietnamese if the U.S. totally, immediately and unconditionally abandons them, as many protesters advocate.

To Americans who have put in their time here, it is not good enough to dismiss blandly such realities with an: "Oh, well, it is up to the Vietnamese to work out their own problems."

Many here, eyewitnesses to the war, have become anti-war in the truest sense, but they have also become resolutely anti-bugout.

THE OIL-DEPLETION ALLOWANCE

Mr. MURPHY. Mr. President, oil has a special importance to California, and Californians have a great interest in the depletion allowance.

The citizens of my State consume more petroleum products than do the people of any other State—674 gallons annually per man, woman and child at the last count, and the amount is rising.

We produce more oil than Canada, and still it is not enough to meet our needs.

We are known as the Golden State, but finding, producing, transporting and marketing oil has earned a living for many, many more Californians than gold ever did.

In addition to being first in consumption of oil products, we are second in refining and third in producing among the 50 States of the Union.

I say all this not to boast, but to be sure that I make plain the gravity with which I contemplate the economic impact on my State—whose population comprises one out of every 10 Americans—of a substantial change in the depletion allowance, and not least of all upon the payrolls of the petroleum industry in California.

The most optimistic among those who urge cutting back the depletion allowance admit that to do so will cause unemployment among petroleum industry workers in every State, as marginal facilities are shut down, and that many installations not now considered marginal would become marginal. They know, and admit, that this would cause cutbacks in exploration, as well as the death of

producing oilfields, transportation facilities, suppliers to the industry, and perhaps some refineries.

Stripper wells constitute 66 percent of the total producing wells. There is a total of 573,159 producing wells, of which 376,851 are stripper wells. Sixteen percent of the production comes from stripper wells. A stripper well is one that produces 10 barrels or less per day.

Those who support depletion cuts apparently believe that disruption in the oil industry and consequent unemployment is acceptable, if Americans as a whole will benefit.

And how would they benefit? The assumption is that Treasury revenues would increase. That prices of oil products would fall as cheaper foreign oil took the place of marginal domestic production, and replaced oil no longer being discovered within our borders to augment our reserves.

Let us examine that argument. Instead of concerning ourselves with Californians and Texans and Oklahomans who may lose their livelihoods, let us look at what that proposal will mean to the average American, whether or not he has any direct connection with petroleum.

First of all, since the oil industry now and for many years has paid greater-than-average local taxes, citizens will soon discover that their own pocketbooks must be tapped more heavily for taxes no longer paid by domestic petroleum companies. Federal and State treasuries will also experience loss of taxes from the incomes of affected industry employees and suppliers.

The cost of gasoline will not fall. It will rise, perhaps by as much as 5 cents per gallon. Increased levies of Federal taxes will be paid by consumers.

If America's demand for gasoline greatly exceeds our supplies, you may be sure that the nations abroad, who have the oil, will soon raise the cost of that once-cheap foreign crude in order to take the fullest possible advantage of our need.

Already, a number of foreign oil-producing countries are operating in close concert principally to force higher prices on consuming nations.

Some have pointed to the new strikes on the Alaskan north slope as evidence that our oil worries are over. It is still too early to know how much oil actually will be produced there. But even if reserves on the north slope prove as large as some of the most optimistic "guesstimates," we will soon need more finds equal to it, just to stay even, due to rapidly increasing demand. And at the same time development of the north slope is beginning, excess capacity seems to be falling off in such traditional areas as Texas and Oklahoma.

Yet there is plenty of petroleum still underground. Most of the "easy oil" has been found. According to the U.S. Department of the Interior, the estimated oil originally under U.S. soil may be as much as 2,000 billion barrels. Thus far only a miniscule amount of this has been located and produced. Production up to now has been about 80 billion barrels. We will have to drill deeper, more expensive wells, and go to more remote areas, like the north slope, to find it.

Spending on exploration should be doubled. We are using petroleum so fast now that consumption will double by 1980.

Tampering with policies that encourage exploration for petroleum is playing a dangerous game.

Reserves of natural gas, even now in jeopardy, will be still more drastically affected. The same people who will not be exploring so energetically for oil any more will not be looking for natural gas, either. They will not be able to afford to. And natural gas cannot be imported cheaply from overseas.

If incentives are cut, who will want to invest hard cash in an industry that—in the best of times—finds significant deposits of oil and gas under the earth and under the seas only once out of every 48 times? So the price of natural gas must also rise, perhaps prohibitively.

Concurrent with higher prices for gasoline and natural gas will come inevitably higher costs for other petroleum products.

Consumers of these products run the complete range from very poor to very rich. I cannot imagine anyone so poor or living in such a remote location in America that he does not employ some product of the oil industry, even if it is only to burn in a kerosene lamp or to oil a squirrel rifle.

The average American uses a great many more oil industry products, from heating oil, clothing, floorwax and toothbrush handles, to airplane fuel, electric power and medicines. So an extremely broad spectrum of consumer goods and services is involved.

It follows that higher prices for petroleum-derived items will pinch those of limited incomes far more than the rich. Thus, we have an area of legitimate widespread concern.

Often, those who must use the most gasoline are the very people who can least afford a price rise. Many families of moderate incomes are forced by housing costs to live a great distance from their jobs, and have to drive to and from work. A sharp rise in gasoline prices would work a real hardship on them.

Others depend on automobile transportation because it is the only way they can do their jobs. The salesman who has to call on his prospects is one example; another is the farmer, who plows and harvests by means of a gasoline-powered tractor and hauls produce to market in his truck.

If the cost of a basic product like petroleum rises, secondary effects must also be expected. Let me carry my example of the farmer just a bit further. Besides gasoline, he makes major use of fertilizers, pesticides, insecticides, lubricants and other petroleum derivatives in order to grow and market his crops. As a Californian, I can give assurance that these elements of the farmer's costs have a direct influence on the price of canned and fresh fruits and vegetables, and grains, livestock, and cotton.

Another undesirable effect of a depletion cut is that disruption of established crude and product supply patterns is likely to make many fixed installations, such as pipelines and storage facilities, useless. Skilled workers will—eventually—be absorbed by other industries. Petroleum research and technological progress—which touches the life of the average American in countless ways—will have to slow down. Where once America led, we shall have to learn to follow.

Worse, however, than all of these negative consequences, is the fact that America would become increasingly dependent on foreign suppliers in an unstable world. Placing our national security at the mercy of these foreign suppliers is something we just should not do.

During the 1967 crisis in the Middle East, our allies in Europe were saved from the serious consequences of an oil shortage largely because of the resources and flexibility of the American oil industry.

With no strong domestic producing industries of their own to fall back upon, Western Europe's leaders faced grave political dangers, with the possibility of having to look to the Communists for their petroleum needs. Either that, and gratefully accept the oil Russia permitted them to have, or see their nation's roads empty of traffic and their industries slow down or stop.

Fortunately, American emergency surplus production, plus the worldwide transportation resources of the American petroleum industry, helped to permit a third alternative. The vital energy supply of Britain, France, Italy, Germany, the Low Countries, and Scandinavia continued without substantial interruption.

Without the support of a healthy domestic American oil industry, who can say how the course of history might have been turned?

Having looked at the potential dangers on the international scene, should depletion incentives be cut? Having visualized the likely course of domestic events, including higher prices—and perhaps higher taxes—let us look again at conditions as they are now. Let us see if we want to pay the price of making the change.

How are things today for the American who uses oil company products? He would like to pay lower taxes, that is certain. So would the oil industry, which, I reiterate, already pays a higher percent of its income to Federal, State, local, and foreign governments than most other industries.

Nevertheless, despite taxes, and ever-rising costs and wages, the oil industry has provided the consumer with many of the best bargains in the world.

If the price of gasoline has gone up at the pump, it is mostly because sales and excise taxes have gone up and up.

The oil industry says that the price of gasoline has risen—excluding taxes—from an average of 22 cents a gallon in 1926 to an average of only 24 cents a gallon last year. And the gasoline is vastly improved over 1926. I have heard no one refute those figures.

How much has the price of milk gone up in that same period? The price of rent? The price of automobiles? One can still buy a gallon of gasoline in this country for less—considerably less—than it would cost for a gallon of distilled water.

So it can be seen that the burden on the consuming public is not now a heavy

one where the price of oil products is concerned. Would the average American really consider it so much of a boon if the oil companies paid more in Federal taxes and raised the price of his gasoline a nickel a gallon? What will he say if it costs him more to heat his house?

Mr. President, I believe that the American consumer, when he discovers the alternatives, will agree with me when I say that this argument over depletion is a classic case of the wisdom of the old saw: Let well enough alone.

ORDER OF BUSINESS

Mr. HANSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BYRD of West Virginia in the chair). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HANSEN in the chair). Without objection, it is so ordered.

PROGRAM

Mr. BYRD of West Virginia. Mr. President, for the information of Senators, the pending business is H.R. 11959, the Veterans' Education and Training Assistance Amendments Act of 1969. This measure will become the unfinished business on tomorrow.

The PRESIDING OFFICER. The Senator is correct.

Mr. BYRD of West Virginia. It is hoped that action can be completed on this meausre tomorrow, thus allowing the Senate to go over until Monday next.

ADJOURNMENT

Mr. BYRD of West Virginia. Mr. President, if there is no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 6 o'clock and 8 minutes p.m.) the Senate adjourned until tomorrow, Thursday, October 23, 1969, at 12 o'clock noon.

NOMINATIONS

Executive nominations received by the Senate October 22, 1969:

FEDERAL RESERVE SYSTEM

Arthur F. Burns, of New York, to be a member of the Board of Governors of the Federal Reserve System for a term of 14 years from February 1, 1970, vice William McChesney Martin, Jr., term expiring.

DIPLOMATIC AND FOREIGN SERVICE

Lewis Hoffacker, of the District of Columbia, whom I nominated on October 13, 1969, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federal Republic of Cameroon, to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Equatorial Guinea.

WITHDRAWAL

Executive nomination withdrawn from the Senate October 22, 1969:

U.S. CIRCUIT JUDGE

Charles A. Bane, of Illinois, to be U.S. circuit judge for the Seventh Circuit, Vice Elmer J. Schnackenberg, deceased, which was sent to the Senate on May 28, 1969.

HOUSE OF REPRESENTATIVES—*Wednesday, October 22, 1969*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Blessed are they who observe justice and who do righteousness at all times.—Psalm 106: 3.

We come to Thee, our Father, voicing the aspirations of our hearts in prayer, endeavoring to become aware of Thy presence, and seeking strength and wisdom for the tasks of this troubled time. During the pressure of daily duties we often forget Thee and in so doing we stifle the nobler impulses of our human nature. In this moment of prayer we would regain the feeling of our kinship with Thee. Help us to keep alive the sense of Thy spirit amid the labors of this day.

Enrich the life of our Nation with righteousness and truth. Make us equal to our high tasks, reverent in the use of freedom, just in the exercise of power, generous in the protection of weakness, and genuine in the spreading of good will: to the glory of Thy holy name. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 2768. An act to amend title 38 of the United States Code in order to eliminate the 6-month limitation on the furnishing of nursing home care in the case of veterans with service-connected disabilities; and

H.R. 3130. An act to amend title 38, United States Code, to provide that the Administrator of Veterans' Affairs may furnish medical services for non-service-connected disability to any war veteran who has total disability from a service-connected disability.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 693. An act to amend title 38 of the United States Code to provide that veterans who are 72 years of age or older shall be deemed to be unable to defray the expenses of necessary hospital or domiciliary care, and for other purposes;

H.R. 9334. An act to amend title 38, United States Code, to promote the care and treatment of veterans in State veterans' homes;

H.R. 9634. An act to amend title 38 of the United States Code in order to improve and make more effective the Veterans' Administration program of sharing specialized medical resources; and

H.R. 13763. An act making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 13763) entitled "An act making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MONTOYA, Mr. PROXMIRE, Mr. YARBOROUGH, Mr. PEARSON, and Mr. COTTON to be conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1279. An act to create a rebuttable presumption that a disability of a veteran of any war or certain other military service is service connected under certain circumstances.

SPEAKER McCORMACK

(Mr. HÉBERT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HÉBERT. Mr. Speaker, this is for the record. Today I received a call from a newspaperman who was writing a story about Speaker JOHN MCCORMACK. He asked me my evaluation of him. My unhesitating reply was:

If John McCormack has any fault, that fault is being a Congressman's Speaker and that is exactly what he is. I have never known a more compassionate, understanding, accommodating individual in all these years that I have been in the Congress.

It irks me no end to hear snide remarks and read comments in the news media by some not worthy to polish his boots. Undoubtedly, criticism is a part of the game, but unfair and unjust innuendo is an assassin of character. JOHN MCCORMACK has stood the test of time in public life and the white toga which drapes his shoulders is as immaculate today as the day he first wore it.

I am glad I know JOHN MCCORMACK. I am glad JOHN MCCORMACK is Speaker of this body. I am glad I can call him a friend in whose debt I am. I am proud to pay tribute to JOHN MCCORMACK and to say to him, "I salute you, sir. You are indeed a great American."

REMARKS IN TRIBUTE TO SPEAKER McCORMACK

(Mr. KLUCZYNSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KLUCZYNSKI. Mr. Speaker, the author of the Book of Proverbs writes:

The just man walketh in his integrity.

I can think of no more appropriate phrase to describe the life and charac-

ter of the distinguished Speaker of this House than these words from the venerable Hebrew Bible. It is very easy, in the agitation generated by newspaper headlines, to permit our judgment and experience to be momentarily confused. Happily, those of us who have worked closely through the years with the Speaker in the deliberations of this House are most deeply aware of those qualities of mind and heart which mark his public and private life alike. He has played a crucial role in the effecting of major decisions and policies shaping the destiny of this Nation and thus of the world at large. He has served his country with distinction, with honor, and with quiet dignity.

I believe that this is the time for those of us who best know these things to declare them, and to assure the Speaker—were such assurance needed, which it surely is not—of our heartfelt respect for and loyalty to him. He has borne immense burdens and discharged awesome responsibilities with tact, with fairness, and with consideration. We share the distress which he must feel during this difficult time. But, more significantly, we share that pride in duty honorably, patiently, and skillfully fulfilled, and we pray for him many future years of dedicated service to the common good.

REPRESENTATIVE GOODLING IN NO WAY ASSOCIATED WITH REVOKING TONKIN GULF RESOLUTION

(Mr. GOODLING asked and was given permission to address the House for 1 minute.)

Mr. GOODLING. Mr. Speaker, in the October 17 issue of the Congressional Quarterly, on page 1976, this statement appears in the lower left-hand corner:

> In preparation—a House concurrent resolution by McCloskey (R., Calif.), Button (R., N.Y.) and Goodling (R., Pa.), revoking Tonkin Gulf Resolution Dec. 31, 1970, unless Congress by concurrent resolution decides otherwise.

I want the membership of this House to know I was in no way associated with this resolution nor do I subscribe to its intent.

When a fighter steps into the ring his handlers do not tie his hands behind his back. While I yield to no one in my desire to end the Vietnam conflict, honorably, at the earliest possible moment, I want no part of any plan that proposes to tie the hands of the President to a timetable.

I have asked that the Congressional Quarterly correct this misstatement in its next issue. I have been assured this will be done.

A LETTER FROM A FIGHTING MAN IN VIETNAM IN SUPPORT OF PRESIDENT NIXON'S EFFORT TO END THE WAR

(Mr. BEALL of Maryland asked and was given permission to address the House for 1 minute.)

Mr. BEALL of Maryland. Mr. Speaker, amidst all of the talk and conversation about the war in Vietnam, I think it appropriate to read at this time a letter that I have received from one of my constituents who is fighting in that part of the world. I think his remarks are most pertinent. His letter is as follows:

DEAR SIR: I am writing you not only as one of your constituents, but also as an American, fighting in the Republic of Vietnam. I am an Infantry combat platoon leader with a little over one month time in country. I want to inform you of not only my personal feelings, but also of the attitude and feelings of the men under my command.

We have all come to do our job in ending this war with nothing less than a victory for freedom. I urge you to give your full support to President Nixon in his efforts to end this war. I have worked with the Vietnamese Army, and I can honestly say that they have been pulling their share of the load since I've been here. The term "Vietnamization" is becoming a reality here.

In no way am I asking you to ignore the protestors. The right to protest is a part of our continual struggle to maintain true freedom. I do ask though that you examine the motives of those that protest this war and weigh them against our desire to complete our job here, and return to our free nation.

We desire that our President be given a fair chance to end this conflict. We have a great amount of confidence in his ability to lead our nation forward, and out of our present troubles. We feel he can and will, if he is given the support back home that he is receiving here.

Thank you.

——— ———.

HONORING THE NATION'S WORKING WOMEN

(Mr. QUILLEN asked and was given permission to address the House for 1 minute.)

Mr. QUILLEN. Mr. Speaker, during the week of October 19 to 25, the National Federation of Business and Professional Women's Clubs, Inc., will honor the Nation's working women with the observance of National Business Women's Week.

The State of Tennessee is proud to have 81 BPW clubs with 3,183 outstanding members. We are especially honored to claim as our own, Osta Underwood, Nashville, as first vice president of the national federation.

The 180,000 members of the national federation represent every State in the Union, the District of Columbia, the Virgin Islands, and Puerto Rico.

These federation members will lead the observance of National Business Women's Week. They realize the vital contributions that working women make to the Nation's economy. BPW's goals; to elevate the standards, promote the interests, bring about a spirit of cooperation, and to extend the opportunities for all business and professional women who epitomize the very foundation on which this Nation was built.

To implement these goals, the National Federation has set forth a bold legislative platform for 1969–70 designed to further the interests of all working women, including tax reform, uniform jury service qualifications for men and women, and amendments to the present Social Security Act.

I applaud these objectives and urge my colleagues, in praise of the federation's impressive efforts for the past 50 years, and in recognition of all working women, to pause to give thought to the accomplishments of our Nation's employed women as they observe National Business Women's Week.

THE ADMINISTRATION'S OCCUPATIONAL SAFETY AND HEALTH ACT

(Mr. LANDGREBE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANDGREBE. Mr. Speaker, President Nixon recently sent to Congress comprehensive and long-overdue occupational safety and health legislation. Despite all that industry, labor, and government—State and Federal—have done in this century, 14,000 American workers are killed on the job every year, 2 million more are disabled, and 250 million man-days of production are lost to the economy—five times more than from strikes. And work injury rates are rising.

This bill creates a top echelon board of five, appointed by the President, to develop and promulgate national safety and health standards, as well as utilize voluntary standards already developed by representatives of industry, labor, and government.

Historically, safety and health laws in this country have been State laws. So this bill provides Federal grants up to 90 percent for States to plan improvements in their own standards, administrative procedures, employee training, and research and statistics. Thereafter, the bill provides Federal grants up to 50 percent to assist States in administering these improved safety programs.

The bill also recognizes the need for research, especially into the prevention of occupational disease, and for more professionally trained personnel.

This comprehensive approach toward a solution of this growing national problem deserves the support of every Member of the Congress.

APPOINTMENT OF CONFEREES ON S. 1857, NATIONAL SCIENCE FOUNDATION AUTHORIZATION ACT, 1970

Mr. MILLER of California. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 1857) authorizing appropriations for activities of the National Science Foundation pursuant to Public Law 87–507, as amended, with House amendments thereto, insist on the House amendments, and agree to the conference requested by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from California? The Chair hears none, and appoints the following conferees: Messrs. MILLER of California, DADDARIO, DAVIS of Georgia, BROWN of California, FULTON of Pennsylvania, BELL of California, and MOSHER.

HEARINGS ON INTERNATIONAL EXECUTIVES, H-VISAS, AND FIANCEES

(Mr. FEIGHAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FEIGHAN. Mr. Speaker, the Immigration and Nationality Subcommittee of the Committee on the Judiciary has scheduled hearings to commence on October 27, 1969, in room 2141, Rayburn House Office Building, at 10:30 a.m. and to be continued in room 2141, Rayburn House Office Building, on October 28, 1969, at 10 a.m.

These hearings continue the series begun on October 6, 1969, to examine the subjects of temporary admission of specialist personnel and executives, the temporary admission of workers to fill jobs permanent in nature when the domestic labor force is unable to supply needed workers, and the temporary admission of fiancees and fiances of U.S. citizens.

Officials from the Department of Labor will testify on October 27 and officials from the Department of Justice on October 28.

Additional hearings will be scheduled early in November at which the AFL-CIO, the National Foreign Trade Council, U.S. corporations conducting international business, the Association of Immigration & Nationality Lawyers, and others will testify.

PERSONAL EXPLANATION

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. KOCH. Mr. Speaker, I was speaking at Yale University on Monday, October 20, 1969, when the House passed H.R. 14195, the Federal Contested Election Act, on rollcall No. 235. Had I been present, I would have voted "nay."

APPOINTMENT OF CONFEREES ON H.R. 474, ESTABLISHMENT OF COMMISSION ON GOVERNMENT PROCUREMENT

Mr. HOLIFIELD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 474), to establish a Commission on Government Procurement, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from California? The Chair hears none, and appoints the following conferees: Messrs. HOLIFIELD, ST GERMAIN, and HORTON.

PERMISSION FOR SUBCOMMITTEE NO. 5, COMMITTEE ON THE JUDICIARY, TO SIT DURING GENERAL DEBATE OCTOBER 23

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that Subcommittee No. 5 of the Committee on the Judiciary may sit during general debate on October 23.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. GERALD R. FORD. Mr. Speaker, reserving the right to object—and I hesitate to do so—previously I had spoken to the distinguished chairman of the Committee on the Judiciary as well as to the ranking minority member on the basis that if this subcommittee was going to meet during general debate on matters before it that I thought the other subcommittees of the Committee on the Judiciary which have on their agenda legislative programs recommended by the President, also ought to meet. Subcommittee No. 5 is meeting on the conglomerate matters, as I recall. It seems to me the other subcommittees also ought to be doing some work on the President's legislative program, and those subcommittees do have such matters before them.

Mr. Speaker, I will not object today, but I do want to reaffirm on the floor of the House what I have told the chairman of the committee, that I will not agree to it in the future unless the other subcommittees likewise meet to consider various aspects of the President's anti-crime package.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Oklahoma.

Mr. ALBERT. Mr. Speaker, I think the gentleman's support of the President's position on bills and recommendations has been made very clear this morning, but this request was made by me, I am informed, after clearance with the distinguished gentleman from Ohio (Mr. MCCULLOCH).

Mr. GERALD R. FORD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

CALL OF THE HOUSE

Mr. GROVER. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 239]

Arends	Fascell	O'Neill, Mass.
Ashley	Findley	Ottinger
Aspinall	Fraser	Passman
Bingham	Gallagher	Pike
Brooks	Gray	Pollock
Burton, Utah	Hays	Powell
Cahill	Hébert	Quie
Celler	Howard	Reid, N.Y.
Clark	Karth	Rivers
Clay	Kirwan	Rodino

The SPEAKER. On this rollcall 373 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

HOUSING AND URBAN DEVELOPMENT ACT OF 1969

Mr. PATMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 13827) to amend and extend laws relating to housing and urban development, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Texas.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 13827, with Mr. FLOOD in the chair.

The CHAIRMAN. If there is no objection, the Chair would like to make an observation. The Chair is very grateful to the Members for their full and complete cooperation which the Chair had yesterday in the maintenance of order in the House. The Chair hopes today it will be better. The Chair makes the same request today.

The Chair would like all employees of the House except one employee on each side of the aisle to leave the floor. The Chair again admonishes the pages, especially in the right-hand corner, on the Democratic side, to be quite and to refrain from disturbance there.

The Chair takes for granted that any conversations on the floor will be dispensed with and the Members will leave for the cloakrooms or the Speaker's lobby if they wish to converse.

For the benefit of Members, the parliamentary situation is this. General debate was concluded. The Chair directed the Clerk to read the bill by title. The Clerk read page 1 through line 4, at which point the gentleman from Georgia (Mr. STEPHENS) posed a parliamentary inquiry, and asked whether an amendment could be offered at that point. The Chair ruled the amendment could be offered at that point and told the gentleman from Georgia the Chair would direct the Clerk to report the amendment, adding however, that at the conclusion of the reading of the amendment if by chance a motion were made for the Committee to rise, and it did rise, the Chair would recognize as the first order of business the gentleman from Georgia in support of his amendment. The Committee did rise, so at this time the Chair will recognize the gentleman from Georgia for 5 minutes in support of his amendment; and, for the benefit of the Members, directs the Clerk to reread the amendment.

AMENDMENT OFFERED BY MR. STEPHENS

The Clerk read as follows:

Amendment offered by Mr. Stephens: Page 1, after line 4, insert the following new section:

"SEC. 2. Section 305(g) of the National Housing Act is amended—

"(1) by striking out '$1,000,000,000' and inserting in lieu thereof '$2,500,000,000';

"(2) by inserting 'at par' immediately after 'and to purchase'; and

"(3) by striking out '$15,000', '$17,500', and '$22,500' and inserting in lieu thereof '$17,500', '$20,000', and '$25,000', respectively."

The CHAIRMAN. The Chair recognizes the gentleman from Georgia.

Mr. STEPHENS. I thank the Chairman.

Mr. Chairman, the homebuilding industry is confronted with a bitter year. In the September recess I met with Georgia homebuilders to discuss the current dilemma. During our conversation I asked about the proposals of Operation Breakthrough. This is how the answer came back to me:

"If you can give us the mortgage money, we will provide the breakthrough."

It seems to be just that simple. My amendment seeks to help along that line.

My amendment is not complicated. It would provide an additional $1.5 billion for the Government National Mortgage Association to purchase mortgages on low-cost FHA and VA housing. I am informed that there is approximately $500 million remaining under the section 305(g) GNMA authorization for this purpose, so if my amendment is adopted and becomes law, GNMA would then have about $2 billion available for this purpose. In addition, my amendment would raise the maximum mortgage amount on mortgages eligible for purchase, which was set at $15,000 in 1966, to $17,500. This is necessary because of the increase in housing costs which has taken place during the last 3 years. Finally I would require that mortgages purchased by GNMA pursuant to section 305(g) be purchased at par, that is, without discount. Now, my amendment is not mandatory.

I believe the need for my amendment to be self-evident. The housing industry is fast approaching a state of near chaos. I believe it is clear that the present tight money situation is bearing down unfairly and disproportionately on the building industry of this Nation. This year housing starts declined precipitously from 1.8 million in January to 1.3 million in August. While September has witnessed a modest recovery in starts, building permits, a reflection of future housing activity, continued to decline. We in the Congress here have enacted legislation aimed at assuring all Americans decent, safe, and sanitary housing. Yet housing starts are now at a level below that of 1950 in which year we started almost 2 million. I would remind the House that in 1950 this Nation's population stood at 152 million. Our current estimated population is 203 million.

The gentleman from Illinois (Mr. ANDERSON) is offering an amendment to assist in the "Operation Breakthrough" of HUD. I will support his amendment and cite his arguments for the need for help in homebuilding which he distributed to all of us with his proposal:

If we are to meet our goal of 26 million units in the next decade we will obviously have to apply this new approach. This year we may not even achieve one million housing starts. The Congressional mandate calls for 2.7 million starts annually. Last year there were approximately 1.5 million starts. We are falling behind rather than forging ahead in our attempts to meet this most critical housing shortage.

I have stated that the housing industry is approaching a state of near chaos, but there is something a great deal more fundamental involved here than the economic well-being of one segment of our economy, important as it may be. Since I have been a Member of this body I have consistently supported these programs. I have consistently voted for a workable public housing program. I am proud to state that I led the fight for the successful enactment of the rent supplement program in 1965. I am in favor of direct aid to our cities in the form of urban renewal, model cities, and community facilities grants. The Federal Government, should and will, I feel certain, have to play an increasingly larger role in the much needed physical and social renovation of urban America. But, Mr. Chairman, ours is a free enterprise economy and the great bulk of housing for low- and moderate-income people is going to have to be supplied by the private housing industry. In the enactment last year of the FHA section 235 homeownership program, Congress took official cognizance of this fact. Section 235 cannot work, other FHA programs cannot work, nor the VA home loan program meet the housing needs of our moderate-income veterans, unless an adequate supply of mortgage money is available. My proposal will go a long way toward bringing this about. The $2 billion which will be available to GNMA for low-cost housing, should my amendment prevail, should directly produce some additional 125,000 individual homes.

Its effect, however, will be far more reaching. Twice before when the Nation was experiencing a mortgage credit crunch in 1958 and 1966, the Congress enacted almost identical legislation. On both occasions, it was our experience that private lenders, knowing that mortgage money would be available to builders from the Federal Government, relaxed their credit restrictions and made funds available for housing. This in turn resulted in the construction of still more housing units. In effect, the Government's secondary mortgage market under these circumstances, acts as a yardstick. This is as it should be. Section 301 of the National Housing Act establishing GNMA, as drafted by the Eisenhower administration and placed on the statute books by the Republican 83d Congress, states that the Congress declares the purpose of this title is, among other things, to provide special assistance to home mortgages generally as a means of retarding or stopping a decline in mortgage lending and homebuilding activities which threatens materially the stability of our high level national economy.

The adoption of my amendment will carry out this congressional mandate. It is a mandate which I sincerely feel this body has an obligation to fulfill and do so immediately. I say this, because I am exceedingly fearful that we are now witnessing a repetition of the unfortunate sequence of events which triggered our most serious postwar recession, that of 1957–58; 1957 saw an acute tight mortgage money market accompanied by a drastic decline in housing starts. Sickness in the housing industry in 1957 spread like a deadly virus through the economic body and was a major cause of the 1958 recession. I would remind the House that in the spring of 1958 unemployment reached a figure of 5 million. It was necessary at that point for the Congress to take action of a more direct nature to pump prime the economy with large infusions of Government money. This in turn contributed to a large Government deficit in 1959.

Mr. Chairman, I believe by enacting my amendment today the House can ward off a repetition of unhappy events of 1957 to 1959. Again, I conclude by repeating, we must assist the homebuilders find mortgage money. However, this method I propose is permissive and not mandatory for GNMA, but if used—which I hope it would be—it will help the homebuilders and prospective homeowners.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I yield to the chairman of the committee.

Mr. PATMAN. For the information of the gentleman from Georgia, I canvassed the committee on this side, and we are willing to support the gentleman's amendment.

Mr. STEPHENS. Thank you very much, Mr. Chairman.

Mr. PATMAN. Mr. Chairman, I rise in support of the amendment offered by our distinguished colleague on the Banking and Currency Committee, Mr. STEPHENS. This amendment would provide $1,500 million in additional available funds to the Government National Mortgage Association to assist low-income people secure housing.

GNMA, as this institution is called, has taken over all the special assistance housing programs of FNMA, which the members will recall we did in the 1968 Housing Act. The use of these funds is discretionary with the President.

We know full well that the housing industry is in a state of depression and the effects of this fall most heavily on home construction and availability of home mortgage funds for the poor. It is an excellent amendment. It will provide funds to construct housing for the elderly, low-income families, and military housing.

Mr. Chairman, I hope the Members will support the amendment.

We want to assure that there is no discrimination against the low- and moderate-income cooperative homeownership projects through the denial of the new "tandem" financing for such housing projects.

It is the clear intent of Congress that cooperative homeownership projects should receive the benefits of the tandem financing program. In approving the tandem program, Congress has responded to the needs of cooperatives for par financing without discounts on mortgages covering housing for low- and moderate-income families. The building of such housing should not be jeopardized by fluctuations in the money market. Cooperatives have no way to pay discounts, since the lower income families cannot afford to pay them through higher down-payments. Such discounts would make cooperative homeownership impossible for these families who urgently need housing.

The record of repayments on cooperative mortgages is the best of any FHA-insured program. The Douglas Commission found that "the cooperative program under 221(d)(3) has achieved a remarkable record. There has not been a single default in any cooperative mortgage although the default rate on BMIR rental projects is over 3 percent." Through cooperatives, thousands of lower income families have achieved homeownership and better communities because they have a stake in their community.

In passing the housing bill today, Congress is giving the administration a mandate to use the tandem plan to purchase cooperative mortgages under the interest reduction and rent supplement programs.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I am glad to yield to the gentleman.

Mr. BARRETT. I want to take this opportunity to commend the gentleman on the very fine work and his dedicated interest to obtain necessary and adequate homes for the people who need it so badly in rural areas; as well as the fine work he has done to obtain necessary housing for the urban areas. In all he has done a splendid job, and I hope his amendment will carry.

Mr. STEPHENS. Thank you very much for your kind words. I appreciate it.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

(By unanimous consent, Mr. STEPHENS was allowed to proceed for 2 additional minutes.)

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I yield to the gentleman from Tennessee, a member of the Committee (Mr. BROCK).

Mr. BROCK. I would like for the gentleman to have an additional 5 minutes if that is possible, because I am very interested in his proposal.

But, for the purpose of clarification, the money would be appropriated from the Treasury to the National Mortgage Association, GNMA, which in turn would use the funds to purchase mortgages from the FHA and VA; is that correct?

Mr. STEPHENS. Yes, sir.

Mr. BROCK. At full parity?

Mr. STEPHENS. Yes.

Mr. BROCK. Mr. Chairman, if the gentleman will yield further, then could it refinance those mortgages by selling its own issues to somebody, or is there a turnover provision as it would apply to this section?

Mr. STEPHENS. I am not positive as to whether there is a turnover provision or not.

Mr. BROCK. If it had to sell those at a discount and if it did have that proviso—and I would assume it would—then it would be at a direct cost or a discount, perhaps, at least to the taxpayers?

Mr. STEPHENS. I like the provision I have here. The discount points are usually paid by the purchaser. This would be a way that the discount could be put into effect.

Mr. BROCK. I am talking about the direct operations of GNMA. This would be somewhat different from the discount, particularly to home buyers, and I would question this procedure because I think the homebuilding industry is in such desperate straits. I question whether the gentleman's amendment would create any additional private money, because I do not think there is any additional private money available. But I do hope that this would open the door for addressing relief to the homeowners and homebuilders. I think it is imperative that this Government act in any capacity it can to relieve the straits in which this industry finds itself and in which the average person who desires to purchase a home finds himself, because he cannot obtain money to build a home at any price.

Mr. STEPHENS. I appreciate the statement which has been made by the gentleman from Tennessee.

The CHAIRMAN. The time of the gentleman from Georgia has again expired.

(On request of Mr. HANNA, and by unanimous consent, Mr. STEPHENS was allowed to proceed for 1 additional minute.)

Mr. HANNA. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I yield to the gentleman from California.

Mr. HANNA. Mr. Chairman, I commend the gentleman upon his proposal. As I indicated yesterday there is a multiplier of 2½ percent in the homebuilding industry. If that is true, the proposal of the gentleman would create in the economy $5 billion.

I have been concerned, as has been the gentleman from Tennessee, over the possibility that when you discount these notes with FNMA, which I hope they will do, there will be a Government expense. I believe that the sum of $5 billion in the economy will generate enough new taxes so that that will create a return that is necessary to service the expense of the discount. I believe that is an extra reason for supporting this particular proposition.

Mr. STEPHENS. I thank the gentleman.

The CHAIRMAN. The time of the gentleman from Georgia has again expired.

(On request of Mr. RANDALL, and by unanimous consent, Mr. STEPHENS was allowed to proceed for 1 additional minute.)

Mr. RANDALL. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I yield to the gentleman from Missouri.

Mr. RANDALL. Mr. Chairman, I want to ask the gentleman in the well a question. Is the purpose of your amendment to provide GNMA more authority to purchase mortgages on low cost housing? Then would GNMA sell its paper, assuming these are not appropriated funds?

Mr. STEPHENS. That is correct.

Mr. RANDALL. We are all quick to question and slow to support any program involving a billion dollars no matter how meritorious or how worthwhile. If I understand this amendment correctly it is not mandatory but simply authorizes the Government National Mortgage Association to purchase more mortgages at par and without discount.

There should be no question about that portion of the amendment which raises the maximum mortgage amount on mortgages eligible for purchase which was set at $15,000 in 1966 to $17,500 because this is absolutely necessary due to the increase in housing costs which has taken place in the last 3 years.

Without going so far as to endorse an increase in authorization as large as is proposed without serious reservations I am reminded that our homebuilding industry has had a most disappointing year. All our homebuilders seem to be asking for is a more plentiful supply of mortgage money. There is a mortgage credit crunch which is almost as bad as any that has been seen since 1958.

Some increase in the supply of mortgage money available to builders is imperative. We have a free enterprise economy and the great bulk of housing for low- and moderate-income people will have to be supplied by the private homebuilding industry.

Whether such a large increase in authorization is warranted depends on how strong a brand of medicine is needed for our homebuilders.

Again, the only question is the size of the increased authorization. I am sure all of us want to be certain that the amendment is not mandatory on GMNA, but is only permissive.

Mr. ALBERT. Mr. Chairman, I support the amendment offered by the gentleman from Georgia (Mr. STEPHENS) because of the vital role the housing industry plays in our national economy.

The impact of new residential construction is a major force in, and spreads throughout, the entire American economic structure. For example, last year's 1½ million new dwelling units generated in construction activity alone approximately $22.5 billion. When you add to this the impact of expenditures which are directly related to the construction of new dwellings, such as schools, community facilities, service industries, durable goods expenditures, and the like, the total directly related impact of housing expenditures amounts to $49 billion, or approximately $1 in every $18 of the total amount of gross national product activity last year.

Each new home built provides about 2 man-years of employment, half offsite, a little more than half onsite. Last year's housing volume thus provided close to 3 million jobs. In addition, what the economists call the multiplier effect of such expenditures is also enormous. For example, it has been calculated that the multiplier effect of construction activity as it spreads through the economy in economic terms is about double the direct dollar expenditures. The thousands of products used in new dwellings come from every area of the country and affect virtually every industry.

It is estimated that the gentleman's amendment will produce directly approximately 125,000 additional units of housing. The committee may be interested in knowing that the construction of 100,000 units of housing would mean an additional $1.2 billion in direct construction expenditures, provide 200,000 man-years of work, half of it onsite and half of it in materials production. Specifically, the construction of an adtional 100,000 houses would mean a mar-

ket for 975 million board feet of lumber, 115 million board feet of finish wood flooring, 104 million square feet of softwood, plywood, 470 million bricks, 230 million pounds of cement, 1.9 million gallons of paint, 200,000 tons of steel, 156,000 water closets, 127,000 bath tubs, 73,000 warm air furnaces, with ducts, 11 million square feet of ceramic tile, 10 million square feet of linoleum floor covering, 20 million square feet of asphalt tile flooring, 1 million squares of asphalt roofing shingles, 140 million square feet of wall and ceiling insulation, 2.5 million convenience outlets, 1.1 million electric switches, 32,000 garbarge disposal units, 55,000 kitchen exhaust fans, 7,000 air conditioners, 1 million kitchen cabinets, 1.4 million window frame; interior wall gypsum board for 48,000 houses and gypsum lath for another 40,000—close to a half billion square feet of gypsum board products in all; 1.2 million doors, 27,000 single-garage doors; 32,000 double-garage 1- door; and 10,000 double-garage 2-doors.

Mr. WIDNALL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, personally I am very reluctant to disagree with my very good friend and extremely competent colleague, the gentleman from Georgia.

The price tag on the housing bill that we are bringing to the House right now is $3 billion. The amendment proposed by the gentleman from Georgia would increase the budgetary cost by $1.5 billion, bringing the price tag of the bill to $4.5 billion. Here, the first amendment offered to the bill today would increase the budgetary cost of the bill by 50 percent. I do not think we can proceed on that basis.

We have to hold the line tight on the budgetary costs that we authorize and the Congress cannot shirk its responsibility to do its part in bringing inflation into control.

I was rather shocked to hear some testimony before our committee offered by Chairman Preston Martin, the new head of the Federal Home Loan Bank Board. They had just pumped $1,900,000,000—I believe it is—into the housing market. On questioning before the committee, he stated that average mortgage that was taken with that money was for $28,000 to $30,000. That is the mortgage—not the value of the house. I was shocked at that testimony as before I had understood that the thrust of what we are trying to do here in the Congress is to provide opportunities for low-income people and low-middle-income people, and housing for those people.

It would indicate to me, that if $1,500,000,000 more goes into GNMA, as proposed by this amendment, we are probably going to end up with the same thing—financing of high cost housing—which I do not object to—but I think other things have priority and should have as much help as possible.

Mr. STEPHENS. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman.

Mr. STEPHENS. I believe you will find language in my amendment that this is to be limited to low-income-priced houses of $17,500 and in high cost areas to a comparably higher figure. I have that as a limitation and I do not see how that could happen under the circumstances, for them to take this permissive authority.

Mr. WIDNALL. But your amendment raises the ceiling, the current ceiling; does it not?

Mr. STEPHENS. That is correct. But to conform with the language of the bill, it does the same thing, it recognizes the cost of living, and this was necessary to make it conform to the balance of the bill. I thank my colleague for yielding.

Mr. ANDERSON of Illinois. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman.

Mr. ANDERSON of Illinois. I understood in the colloquy that went on a moment ago between the gentleman from Missouri (Mr. RANDALL) and the gentleman who has offered the amendment, the gentleman from Georgia (Mr. STEPHENS), that there was no budgetary impact during the fiscal year 1970 with respect to this amendment and that it merely was to make more flexible the authority that GNMA now has to dispense these special assistance funds in order to support or prop up the home mortgage market.

I would appreciate a further explanation from the gentleman who has offered the amendment to clarify that particular point as to what precisely the budgetary impact would be during the balance of the current fiscal year.

Mr. WIDNALL. I yield to the gentleman from Georgia.

Mr. STEPHENS. Mr. Chairman, I think it would depend on GNMA and how it operates in the market as to what the budgetary effect of it would be.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman.

Mr. BROCK. Mr. Chairman, I am under some misunderstanding as well.

If GNMA has authority to market this paper on the open market, there is no budgetary impact. But if under the authority of this amendment they have the direct ability to take $1,500,000,000 additional money from the Treasury, then it has an immediate budgetary impact.

I would like to inquire, what is the effect of the amendment?

Mr. WIDNALL. Yes, and that is established forever.

Mr. STEPHENS. No, it only takes the existing figures of the present bill, and it will be part of it. It does not change any procedures whatsoever as to what the budgetary effect will be.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. STEPHENS).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TITLE I—MORTGAGE CREDIT

EXTENSION OF PROGRAMS

SEC. 101. (a) Section 2(a) of the National Housing Act is amended by striking out "1969" in the first sentence and inserting in lieu thereof "1970".

(b) Section 217 of such Act is amended—

(1) by striking out "or title X" and inserting in lieu thereof "title X, or title XI"; and

(2) by striking out "1969" and inserting in lieu thereof "1970".

(c) Section 221(f) of such Act is amended by striking out "1969" in the fifth sentence and inserting in lieu thereof "1970".

(d) Section 809(f) of such Act is amended by striking out "1969" in the second sentence and inserting in lieu thereof "1970".

(e) Section 810(k) of such Act is amended by striking out "1969" in the second sentence and inserting in lieu thereof "1970".

(f) Section 1002(a) of such Act is amended by striking out "1969" in the second sentence and inserting in lieu thereof "1970".

(g) Section 1101(a) of such Act is amended by striking out "1969" in the second sentence and inserting in lieu thereof "1970".

LOWER DOWNPAYMENTS FOR FHA-FINANCED SALES HOUSING

SEC. 102. (a) Section 203(b)(2) of the National Housing Act is amended by striking out "$20,000" each place it appears and inserting in lieu thereof "$25,000".

(b) Section 220(d)(3)(A)(i) of such Act is amended by striking out "$20,000" each place it appears and inserting in lieu thereof "$25,000".

(c) Section 222(b)(3) of such Act is amended by striking out "$20,000" each place it appears and inserting in lieu thereof "$25,000".

(d) Section 234(c) of such Act is amended by striking out "$20,000" each place it appears and inserting in lieu thereof "$25,000".

MOBILE HOMES

SEC. 103. (a)(1) Section 207(a) of the National Housing Act is amended—

(A) by striking out "trailer coach mobile dwellings" in paragraph (1) and inserting in lieu thereof "mobile homes";

(B) by striking out "trailer court or park" in paragraph (6) and inserting in lieu thereof "mobile home court or park"; and

(C) by striking out "trailer coach mobile dwellings" in paragraph (6) and inserting in lieu thereof "mobile homes".

(2) Section 207(c)(3) of such Act is amended by striking out "trailer courts or parks" and inserting in lieu thereof "mobile home courts or parks".

(b) Section 207(c)(3) of such Act is amended by striking out "$1,800 per space" and inserting in lieu thereof "$2,500 per space".

(c) The last paragraph of section 207(c) of such Act (immediately following paragraph numbered (3)) is amended by inserting after "such term as the Secretary shall prescribe" in the first sentence the following: "(not exceeding 20 years in the case of a mortgage for a mobile home court or park)".

MAXIMUM MORTGAGE AMOUNT UNDER SECTION 220 MULTIFAMILY HOUSING PROGRAM

SEC. 104. Section 220(d)(3)(B)(i) of the National Housing Act is amended to read as follows:

"(i) not exceed $50,000,000;".

MORTGAGE INSURANCE ON CONDOMINIUM UNITS FOR SERVICEMEN

SEC. 105. Section 222(b)(1) of the National Housing Act is amended by inserting "or 234(c)," immediately after "221(d)(2),".

ASSISTANCE PAYMENTS UNDER SECTION 235 FOR PURCHASER ASSUMING MORTGAGE

SEC. 106. (a) Section 235(c) of the National Housing Act is amended by striking out "subsection (j)(4)" and inserting in lieu thereof "subsection (i) or (j)(4)".

(b) Section 235(b)(2) of such Act is

amended by striking out the first proviso and inserting in lieu thereof the following ": *Provided*, That if any cooperative member who has received assistance payments transfers his membership and occupancy rights to another person who satisfies the eligibility requirements prescribed by the Secretary and undertakes the obligation to pay occupancy charges, the new cooperative member may qualify for assistance payments upon the filing of an application with respect to the dwelling unit involved to be occupied by him".

AUTHORIZATION FOR ASSISTANCE PAYMENTS UNDER SECTIONS 235 AND 236

SEC. 107. (a) The second sentence of section 235(h) of the National Housing Act is amended by striking out "by $100,000,000 on July 1, 1970" and inserting in lieu thereof "by $125,000,000 on July 1, 1970."

(b) The second sentence of section 236(l)(1) of such Act is amended by striking out "by $100,000,000 on July 1, 1970" and inserting in lieu thereof "by $125,000,000 on July 1, 1970."

ASSISTANCE PAYMENTS WITH RESPECT TO EXISTING DWELLINGS UNDER SECTION 235

SEC. 108. Section 235(h)(3) of the National Housing Act is amended—

(1) by inserting "and" at the end of subparagraph (A); and

(2) by striking out subparagraphs (B) and (C) and inserting in lieu thereof the following:

"(B) 30 per centum of the total additional amount of contracts for assistance payments authorized by appropriation Acts to be made prior to July 1, 1971,".

10 PER CENTUM INCREASE IN MAXIMUM MORTGAGE AMOUNTS UNDER FHA INSURANCE PROGRAMS

SEC. 109. (a)(1) Section 203(b)(2) of the National Housing Act is amended by striking out "$30,000", "$32,500", and "$37,500" wherever they appear and inserting in lieu thereof "$33,000", "$35,750", and "$41,250", respectively.

(2) Section 203(h) of such Act is amended by striking out "$12,000" and inserting in lieu thereof "$13,200".

(3) Section 203(i) of such Act is amended by striking out "$13,500" and inserting in lieu thereof "$14,850".

(4) Section 203(m) of such Act is amended by striking out "$15,000" and inserting in lieu thereof "$16,500".

(b)(1) Section 207(c)(3) of such Act is amended by striking out "$9,000", "$12,500", "$15,000", "$18,500", and "$21,000 wherever they appear and inserting in lieu thereof "$9,900", "$13,750", "$16,500", "$20,350", and "$23,100", respectively.

(2) Section 207(c)(3) of such Act is further amended by striking out "$10,500", "$18,000", "$22,500", and "$25,500", and inserting in lieu thereof "$11,550", "$19,800", "$24,750", and "$28,050", respectively.

(c)(1) Section 213(b)(2) of such Act is amended by striking out "$9,000", "$12,500", "$15,000", "$18,500", and "$21,000" wherever they appear and inserting in lieu thereof "$9,990", "$13,750", "$16,500", "$20,350", and "$23,100", respectively.

(2) Section 213(b)(2) of such Act is further amended by striking out "$10,500", "$18,000", "$22,500", and "$25,500" and inserting in lieu thereof "$11,550", "$19,800", "$24,750", and "$28,050", respectively.

(d)(1) Section 220(d)(3)(A)(i) of such Act is amended by striking out "$30,000", "$32,500", "$37,500", and "$7,000" wherever they appear and inserting in lieu thereof "$33,000", "$35,750", "$41,250", and "$7,700", respectively.

(2) Section 220(d)(3)(B)(iii) of such Act is amended by striking out "$9,000", "$12,500", "$15,000", "$18,500" and "$21,000" wherever they appear and inserting in lieu thereof "$9,900", "$13,750", "$16,500", "$20,350", and "$23,100", respectively.

(3) Section 220(d)(3)(B)(iii) of such Act is further amended by striking out "$10,500", "$18,000", "$22,500", and "$25,500" wherever they appear and inserting in lieu thereof "$11,550", "$19,800", "$24,750", and "$28,050", respectively.

(4) Section 220(h)(2) of such Act is amended by striking out "$10,000" and inserting in lieu thereof "$11,000".

(e)(1) Section 221(d)(2) of such Act is amended by striking out "$15,000", "$17,500", "$20,000", "$27,000", and "$33,000" wherever they appear and inserting in lieu thereof "$16,500", "$19,250", "$22,000", "$29,700", and "$36,300", respectively.

(2) Section 221(d)(2) of such Act is further amended by striking out "$25,000", "$32,000", and "$38,000" and inserting in lieu thereof "$27,500", "$35,200", and "$41,800", respectively.

(3) Section 221(d)(3)(ii) of such Act is amended by striking out "$8,000", "$11,250", "$13,500", "$17,000", and "$19,250" wherever they appear and inserting in lieu thereof "$8,800", "$12,375", "$14,850", "$18,700", and "$21,175", respectively.

(4) Section 221(d)(3)(ii) of such Act is further amended by striking out "$9,500", "$16,000", "$20,000", and "$22,750" and inserting in lieu thereof "$10,450", "$17,600", "$22,000", and "$25,025", respectively.

(5) Section 221(d)(4)(ii) of such Act is amended by striking out "$8,000", "$11,250", "$13,500", "$17,000", and "$19,250" wherever they appear and inserting in lieu thereof "$8,800", "$12,375", "$14,850, "$18,700", and "$21,175", respectively.

(6) Section 221(d)(4)(ii) of such Act is further amended by striking out "$9,500", "$16,000", "$20,000", and "$22,750" and inserting in lieu thereof "$10,450", "$17,600", "$22,000", and "$25,025", respectively.

(7) Section 221(h)(6)(A) of such Act is amended by striking out "$15,000" and inserting in lieu thereof "$16,500".

(f) Section 222(b)(2) of such Act is amended by striking out "$30,000" and inserting in lieu thereof "$33,000".

(g)(1) Section 231(c)(2) of such Act is amended by striking out "$8,000", "$11,250", "$13,500", "$17,000", and "$19,250" wherever they appear and inserting in lieu thereof "$8,800", "$12,375", "$14,850", "$18,700", "$21,175", respectively.

(2) Section 231(c)(2) of such Act is further amended by striking out "$9,500", "$16,000", "$20,000", and "$22,750" and inserting in lieu thereof "$10,450", "$17,600", "$22,000", and "$25,025", respectively.

(h)(1) Section 234(c) of such Act is amended by striking out "$30,000" and inserting in lieu thereof "$33,000".

(2) Section 234(e)(3) of such Act is amended by striking out "$9,000", "$12,500", "$15,000", "$18,500", and "$21,000" wherever they appear and inserting in lieu thereof "$9,900", "$13,750", "$16,500", "$20,350", and "$23,100", respectively.

(3) Section 234(e)(3) of such Act is further amended by striking out "$10,500", "$18,500", "$22,500", and "$25,500" and inserting in lieu thereof "$11,550", "$19,800", "$24,750", and "$28,050", respectively.

(i) Section 235 of such Act is amended by striking out "$15,000", "$17,500", and "$20,000" wherever they appear and inserting in lieu thereof "$16,500", "$19,250", and "$22,000", respectively.

(j) Section 237(c)(2) of such Act is amended by striking out "$15,000" and "$17,500" and inserting in lieu thereof "$16,500" and "$19,250", respectively.

INCREASE IN GNMA PURCHASE AUTHORITY

SEC. 110. Section 302(b) of the National Housing Act is amended—

(1) by striking out "exceeds or exceeded $17,500" in clause (3) of the proviso in the first sentence and inserting in lieu thereof "exceeds or exceeded $22,000";

(2) by striking out "that exceeds $17,500" in the second sentence and inserting in lieu thereof "that exceeds the otherwise applicable maximum amount"; and

(3) by striking out "did not exceed $17,500" in the second sentence and inserting in lieu thereof "did not exceed the otherwise applicable maximum amount".

GNMA SPECIAL ASSISTANCE PURCHASES

SEC. 111. Section 305 of the National Housing Act is amended by adding at the end thereof the following new subsection:

"(j) Notwithstanding any other provision of this Act, the Association is authorized to purchase pursuant to commitments or otherwise mortgages otherwise eligible for purchase under this section at a price equal to the unpaid principal amount thereof at the time of purchase, with adjustments for interest and any comparable items, and to sell such mortgages at any time at a price within the range of market prices for the particular class of mortgages involved at the time of sale as determined by the Association."

Mr. PATMAN (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will read the committee amendments to title I.

The Clerk read as follows:

Committee amendments: Page 6, lines 5, 6, 9, and 10, strike out "1970" and insert "1969".

The CHAIRMAN. The question is on the committee amendments.

The committee amendments were agreed to.

AMENDMENT OFFERED BY MR. BRASCO

Mr. BRASCO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BRASCO: Page 6, after line 10, insert the following new section:

"INTEREST REDUCTION PAYMENTS UNDER SECTION 236 ON CERTAIN PROJECTS FINANCED UNDER STATE OR LOCAL HOUSING PROGRAMS

"SEC. 108. The proviso in section 235(b) of the National Housing Act is amended by striking out 'with respect to a rental or cooperative housing project' and inserting in lieu thereof 'with respect to a mortgage or part thereof on a rental or cooperative housing project'."

And renumber the succeeding sections accordingly.

The CHAIRMAN. The gentleman from New York is recognized.

Mr. BRASCO. Mr. Chairman, this is a technical amendment which, I am told, must be enacted to allow sponsors of moderate income projects to apply for only those funds for which they qualify and which they require under section 236(b) of the national housing interest subsidy program.

I would like, if I may, to cite an example which I feel best illustrates the defect that I believe this amendment would cure. Under the present law a sponsor of such a project—and for purposes of this discussion I would like to assume that the project in question is a 100-unit project—must apply for an interest subsidy under section 236(b) on the entire 100 units.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. BRASCO. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. Mr. Chairman, we have no objection to the amendment, if that is agreeable to the minority side.

Mr. BROCK. I would like to have an explanation of the amendment.

Mr. BRASCO. I shall proceed. This means, very simply, that the prospective tenants must qualify under the section 236 income guidelines. What this does is to make it extremely difficult to service the housing needs of the community where the project is being built, for it deprives a family living in that community whose income is barely over the guidelines from obtaining decent housing. Furthermore, it prevents an advantageous economic mix in these projects, and it frustrates additional housing starts under this program by preventing the money from being spread out.

Through our committee I checked with those individuals who were formerly staff attorneys of HUD, and who drew up this particular section they suggest. The only way this defect could be cured was to enact this amendment.

I want to emphasize, and I want to be emphatic about it, that this amendment does not call for expenditure of additional moneys, for the program remains limited by the money already authorized for its use. What it does simply is to allow the sponsor of this 100-unit project, assuming he has only 60 families in the project that qualify under the 236(b) program, the interest subsidy, to apply for only 60 percent of the interest subsidy instead of a subsidy on the entire mortgage.

Mr. HANNA. Mr. Chairman, will the gentleman yield?

Mr. BRASCO. I yield to the gentleman from California.

Mr. HANNA. Mr. Chairman, does the gentleman have any limitation as to where the qualifications will end?

In other words, the gentleman is talking about a mix of those who qualify and those who do not. What is the limitation?

Mr. BRASCO. Very simply, this does not change any qualifications. All it does is to allow a sponsor of this project, instead of applying for the 100-percent mortgage, when he has a project in which only 60 percent of the families qualify under the 236(b) program, to apply for only 60-percent mortgage subsidy. I think that is certainly equitable and fair. It does not change anything that exists.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. BRASCO. I yield to the gentleman from Tennessee.

Mr. BROCK. Mr. Chairman, this amendment would not have the effect of having this Government participate in interest subsidy for those individuals whose incomes exceeded the amount specified?

Mr. BRASCO. No.

Mr. BROCK. The effect of the gentleman's amendment would be to allow more projects in, because there would be less than 100-percent funding. Is that correct?

Mr. BRASCO. Yes. One of the things would be obvious that instead of tying up or applying for a 100-percent interest subsidy on a particular mortgage, where facts indicate he should be getting only 60 percent, then to the extent there is money in the program—and it does not add any other money—it would allow that money to be used for another housing project.

Mr. BROCK. Mr. Chairman, where does the builder of this particular project get the other 40 percent?

Mr. BRASCO. He is not entitled to interest subsidy on that. That may be a combination of any city or State programs.

Mr. BROCK. Then the gentleman is saying the effect of the present law is that it requires a person who is going to have one or more of his units under the program to get 100 percent or nothing?

Mr. BRASCO. Yes. That rather surprised me to see there was such an interpretation placed on it. Apparently our staff in checking it out with HUD people found their legal interpretation of this section is that, unless we get this additional language which indicates a sponsor can apply for a subsidy on a part of a mortgage he must apply for it all.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. BRASCO).

The amendment was agreed to.

AMENDMENT OFFERED BY MRS. SULLIVAN

Mrs. SULLIVAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. SULLIVAN: Page 12, after line 6, add the following new section:

"MORTGAGE LOANS TO HOMEOWNERS

"SEC. 112. (a) The Congress finds that the many programs of Government, intended to assure good housing for the American family at prices it can afford, are incapable of achieving their goals during recurring periods of tight money and high interest rates. Many credit-worthy families are being and have been denied mortgage financing on reasonable terms, not because of their inability to repay the obligation but because private funds needed for home financing have been diverted into other investment avenues. Such funds as are available for home mortgages are frequently offered only at unconscionable rates of interest. It is therefore the policy of the Congress and the purpose of this section to stabilize mortgage availability and establish machinery for assuring moderate income families access to mortgage financing within their means, and thus to enable the average family to achieve its goal of home ownership, by providing direct housing loans through a Federal instrumentality to individuals in those instances where private enterprise cannot or will not extend loans at reasonable rates to credit-worthy applicants.

"(b) There is hereby established in the executive branch of the Government an independent agency to be known as the Home Owners Mortgage Loan Corporation (hereinafter referred to as the "Corporation").

"(c) All the powers and duties of the Corporation shall be vested in a Board of Directors (hereinafter referred to as the 'Board'), which shall consist of the Commissioner of the Federal Housing Administration and eight members appointed by the President with the advice and consent of the Senate. The Board shall consist of at least five public members who are not officials or employees of any branch of government, Federal, State, or local. Members of the Board other than the Federal Housing Administration Commissioner shall be appointed for terms of six years; except that (1) any members appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term, and (2) the terms of office of the members first appointed shall expire, as designated by the President at the time of appointment, three at the end of two years, three at the end of four years, and two at the end of six years, after the date of the enactment of this Act. The Board shall annually elect a Chairman and Vice Chairman from among its members. Public members shall be paid $100 per day for each day of work, plus travel expenses.

"(2) Subject to the provisions of this section, the Board shall determine the general policies which shall govern the operations of the Corporation, and shall have power to adopt, amend, and repeal bylaws governing the performance of the functions, powers, and duties granted to or imposed upon the Corporation by law.

"(3) The Board shall select and appoint qualified persons to serve as the officers of the Corporation, with such functions, powers, and duties as may be prescribed by the bylaws or by the Board; and such persons shall discharge all of the executive functions, powers, and duties of the Corporation. The Board shall also provide for the appointment of such additional officers and employees as may be necessary for the exercise of the Corporation's functions, powers, and duties.

"(4) The Board shall meet at the call of its Chairman or a majority of its members, but not less often than once each month.

"(5) The Corporation shall maintain such offices as may be necessary or appropriate in the conduct of its business.

"(6) No person shall serve as an officer or employee of the Corporation, while he is serving as a full-time officer or employee of any other department, agency, or instrumentality of the Federal Government.

"(7) In the performance of and with respect to the functions, powers, and duties vested in it by this section, the Corporation shall (in addition to any authority otherwise vested in it) have the same functions, powers, and duties as those prescribed for the Secretary of Housing and Urban Development by section 402 (except subsection (c)(2)) of the Housing Act of 1950.

"(d)(1) It shall be the function of the Corporation, in order to carry out the purpose of this section, to make loans to assist in the purchase or construction of housing by individuals and families of moderate income who are unable to meet their housing needs at reasonable interest rates with the financing or other assistance which is available from other sources.

"(2) A loan under this subsection may be made only for the purchase or construction of a single-family dwelling (or for the purchase of a single-family unit in a cooperative or condominium project) to be owned and occupied by the borrower, and may be made only to an individual or family who—

"(A) has an annual income of not more than $12,000 unless the Board after full consideration determines a higher or lower maximum income level is advisable to carry out the purpose of this section;

"(B) is unable to secure the necessary funds from other public or private sources in the community at an interest rate considered by the Board to be reasonable and in no case higher than 6½ per centum per annum;

"(C) would be an acceptable credit risk for purposes of whichever mortgage insurance program under title II of the National Housing Act involves housing of the most comparable type; and

"(D) satisfies the requirements of this section and such additional requirements and standards as may from time to time be prescribed and published by the Board.

"(3) Any loan made under this subsection shall be in a principal amount not exceeding $24,000 and shall be secured by a first mortgage on the property. The Corporation may require the borrower to make a downpayment (not exceeding the downpayment which would be required if the housing were being purchased with the assistance of a mortgage insured under section 203(b) of the National Housing Act).

"(4) Any loan made under this subsection shall be repayable within such period not exceeding thirty years as the Board may determine; and shall bear interest at a rate which shall be determined by the Board.

"(5) Under arrangements to be entered into by the Corporation and the Secretary of Housing and Urban Development, loan applications under this subsection shall be processed by the Secretary on behalf of the Corporation, which shall pay to the Secretary (in advance or by way of reimbursement) the costs incurred therein.

"(e)(1) There is hereby created a revolving fund to be known as the Home Owners Mortgage Loan Fund (hereinafter referred to as the 'Fund'), which shall be available to the Corporation without fiscal year limitation for carrying out the provisions of this section.

"(2) The moneys in the Fund shall be used for making and servicing loans under subsection (d), including the cost of processing loan applications as provided in subsection (d)(5) (but not including any other administrative expenses which may be incurred by the Corporation in the exercise of its functions, powers, and duties under this section).

"(3) The Fund shall be credited with appropriations made pursuant to paragraph (4), with all repayments of principal and interest on loans made under subsection (d), and with any other amounts which may be received in connection with the program under this section. Any amounts in the Fund not needed for current expenditure may be invested in obligations issued or guaranteed by the United States.

"(4) To provide the capital for the Fund, there is authorized to be appropriated the sum of $2,000,000,000 in each of the first five fiscal years ending after the date of the enactment of this Act, and such additional sum in each fiscal year thereafter as may be necessary to ensure that the total amount received in the Fund during that year (including repayments and other receipts) will be at least $2,000,000,000. Any portion of the amount authorized to be appropriated in any of the first five fiscal years ending after the date of the enactment of this Act which is not so appropriated may be appropriated in any subsequent fiscal year.

"(f) In carrying out its functions, powers, and duties under this section the Corporation shall regularly and fully consult with the Secretary of Housing and Urban Development and all other Federal departments, agencies, and instrumentalities having functions related to those of the Corporation, in order to ensure that the purpose of this section is carried out efficiently, effectively, and without unnecessary duplication of effort.

"(g) The Corporation shall prepare and submit to the President and to the Congress each year a full and complete report of its activities, together with any recommendations it may have for additional legislative, administrative, and other action to achieve the purpose of this section.

"(h) There are authorized to be appropriated such sums as may be necessary for the administrative expenses incurred by the Corporation in carrying out this section.

"(i)(1) Section 101 of the Government Corporation Control Act is amended by inserting 'Home Owners Mortgage Loan Corporation;' after 'Government National Mortgage Association;'.

"(2) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following:

"'(92) Members, Board of Directors of the Home Owners Mortgage Loan Corporation.'"

Mrs. SULLIVAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read. I think I can quickly explain what this amendment does, and it is quite simple.

Mr. BROCK. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard. The Clerk will proceed to read the amendment.

The Clerk proceeded to read the amendment.

Mrs. SULLIVAN (during the reading). Mr. Chairman, again I ask unanimous consent that the amendment be considered as read so that I may explain its contents.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Missouri?

Mr. BROCK. I am sorry, Mr. Chairman, but I must object.

The CHAIRMAN. Objection is heard. The Clerk will continue to read the amendment.

The Clerk concluded the reading of the amendment.

The CHAIRMAN. The gentlewoman from Missouri (Mrs. SULLIVAN) is recognized for 5 minutes in support of her amendment.

Mrs. SULLIVAN. Mr. Chairman, this is an amendment to build houses and to sell homes to moderate-income families. It is the only proposed portion of this legislation which will help the average family get a home at mortgage interest rates it can afford.

This amendment says to the financial structure of this country: "Unless you turn loose funds for home mortgages for the average family at a rate of 6½ percent or less, the Government will provide the funds."

This is strong medicine—but the housing market for families earning up to $12,000 a year is sick—dying. So strong medicine is required.

Mr. Chairman, instead of wringing our hands about high interest rates, and telling constituents who want to buy homes that we would like to help them but cannot do so because of tight money, let us loosen some money to help them.

This amendment consists of a bill cosponsored with me by the chairman of the Housing Subcommittee, the gentleman from Pennsylvania (Mr. BARRETT). The National Association of Home Builders on October 13, 1969, through its board of directors, endorsed, and now supports, this proposal. It regards it, as I do, as a way to finance homes for the middle income family now priced out of the mortgage market.

Here is what it does:

First. It creates the Home Owners Mortgage Loan Corporation to make direct loans, at 6½ percent or less, to credit-worthy families with incomes of $12,000 or less, to buy homes costing up to $24,000.

Second. It provides for appropriations to the HOMLC of $2 billion a year for 5 years. This money then becomes a revolving fund.

Third. A Board of Directors of nine members, of which at least five are not Federal, State or local officials, would set policies. The Commissioner of FHA would serve on the Board but could not be Chairman. The loans would be extended through existing FHA offices so no new bureaucracy would be established.

Fourth. This agency would be permanent, but would extend loans only when interest rates are so high that the average family cannot obtain a mortgage at reasonable rates.

We have used direct loan programs before, and they are effective. They work. We need them only during periods like the present, but we need this program now.

If this amendment is adopted and enacted, we can pull the teeth of the credit crunch monster, which hurts the average family the most—we can build homes and finance them. This is a proposal to help the forgotten man—the fellow who pays for everybody else's assistance program but seldom if ever gets any help himself.

We have programs of rent subsidy and mortgage subsidy for the poor. The rich do not need any help. But the family in the middle is out in the cold when it comes to buying a home today.

If they get some help through this proposal, it will not cost the Government a cent. The money will all come back to the Treasury at 6½ percent, or whatever the rate is on these loans. The Government will get a long-term return higher than it gets on any of its other investments. And we will get housing for the family above the poverty level but below the level of income needed to be able to afford a mortgage at today's rates.

In the general debate here yesterday, I discussed this proposal at some length, and this information appears on pages 30814–30816 of the CONGRESSIONAL RECORD. In the debate, many Members described the plight of the family above the public housing income level—able to pay its way—in getting a mortgage. The door is now closed to them. This amendment opens that door to a home purchase by providing a new source of funds.

Farmers and rural families can get direct loans. This amendment provides a similar avenue to home financing for urban families, too. Once the Government is authorized to make such loans, there will be a change of attitude, I am sure, on the part of the mortgage industry, and you will finally see some action in meeting the greatest problem now facing the average family.

Mr. BARRETT. Mr. Chairman, will the gentlewoman yield for a question?

Mrs. SULLIVAN. I would be happy to yield to the chairman of the Subcommittee on Housing.

Mr. BARRETT. Are we not here trying to do what the President said on the radio the other night; namely, that he was going to bring interest rates down in the interest of giving homes to the 6 million people who are living in substandard homes?

Mrs. SULLIVAN. That is right. We

promised them a dream, and we have not provided the funds—funds are not available to have them realize this dream.

The CHAIRMAN. The time of the gentlewoman from Missouri has expired.

(By unanimous consent (at the request of Mr. PUCINSKI) Mrs. SULLIVAN was allowed to proceed for 5 additional minutes.)

Mr. PUCINSKI. Mr. Chairman, I move to strike out the last word and rise in support of the amendment.

Mr. Chairman, I want to congratulate the gentlewoman from Missouri for offering this amendment. I would make $1.5 billion available for home construction loans at no more than 6½ percent interest. This in my judgment is the first meaningful piece of legislation to come before this Congress to do something to help the homebuilding industry of this country. I do not think there is a Member of this House who is not aware of the fact that the home building industry is now in a full scale depression and it is going to get markedly worse before it gets better unless we do something similar to what the gentlewoman is proposing here.

There is no question but that today unless you are earning $15,000 or more per year, you are out of the market for buying a home. You just cannot buy a house in America today unless your annual income is in excess of $15,000 a year.

So what the gentlewoman is proposing here is a program that would make housing available to those under $12,000 a year, those who can buy a $24,000 home, and those who could find the financing that they need at 6½ percent interest or less to get a home.

I submit that this is the kind of legislation that would be very interesting and useful to young newlyweds who most often have very limited resources for housing. They are hopelessly out of the market in buying homes today. So are our senior citizens who would like to buy a smaller home—they are out of the market becase of prohibitive interest rates.

I also submit that this legislation may be the first meaningful, significant, anti-inflationary proposal that we have had presented to us in this session, because by holding interest rates to 6½ percent, in my judgment it would compel conventional lending institutions to come down on their interest rates to meet the competition.

So it occurs to me that this amendment does offer a great deal of help. In my district I have a very large number of people who are engaged in the building trades. I see these people every Saturday morning in my office, and I am appalled and amazed at the high rate of unemployment that we now have among those engaged in the homebuilding industry. Many of you have spoken to the homebuilding contractors who were here in Washington a couple of weeks ago from your own communities. They have told you that homebuilding projects are at a complete standstill and there is absolutely no relief in sight unless we can come up with a program like this.

It would be my hope that this House would follow the leadership of the gentlewoman from Missouri. I think she has made a tremendous contribution here toward alleviating one of our biggest problems. I am sure my colleagues are aware of the fact that the economy of this country rests on three pillars—the transportation industry, the automobile industry, and the building industry. If the building industry suffers then the whole economy suffers. Every one of our recessions started with a slowdown in the building industry. The building industry affects 20 million jobs in America.

In my judgment, if we do not do something meaningful to prop up the building industry at this time, we could see the worst economic setback that this country has suffered in the last 10 years. It would be my hope that the Congress would get behind this amendment and would give this amendment a chance to operate.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman.

Mr. GROSS. Where is it proposed to borrow the $2 billion a year or a total of $10 billion—from what source?

Mr. PUCINSKI. It would be an appropriation. But, as the gentlewoman made very clear, this money comes back. It is not a giveaway.

Mr. GROSS. You hope it will not be a giveaway.

Mr. PUCINSKI. This Corporation would lend the money at these interest rates and the money would come back and it would go into a revolving fund so it could be expected that in the next 5 years or so we would probably see $10 billion poured into the building industry.

Mr. GROSS. What interest rate would be paid on that $10 billion that the Government would have to borrow?

Mr. PUCINSKI. I think that is problematical. I would believe that it would be somewhere in the area of 5 to 5½ percent. The gentlewoman from Missouri advises me right now that the Government is borrowing money, I believe, at 5½ percent on long-term loans. Perhaps I can yield to the gentlewoman to answer the gentleman's question.

Mr. GROSS. The gentleman from Illinois ought to know that figure and I am sure he does.

Mr. PUCINSKI. Yes, I do.

Mr. GROSS. Treasury bills are going for between 7 percent and 8 percent.

Mr. PUCINSKI. But that is on short-term notes.

Mr. GROSS. You can call them whatever you want.

Mr. PUCINSKI. The gentlelady's proposal calls for 30-year loans. You know and I know that on the 30-year loans, they are not going at that rate. It has been historical and traditional in this country that short-term notes always go at a higher rate. That is the nature of the loan.

Mr. GROSS. But the Federal Government has no truly long-term borrowings.

Mr. PUCINSKI. Look—let me tell the gentleman that you and I can argue here the rest of the day on this matter that you are pursuing. But I would like to ask my friend to look at the alternative, if we fail to act. If we fail to act, what are you going to do if we have an unemployment rate of between 8 percent and 12 percent in this country? Look at what it will cost America in terms of public aid programs and a lot of other things if we have another serious recession.

And, my friend, I am not exaggerating. You listened to the same people I did 2 or 3 weeks ago. You had building contractors from your area come and talk to you, as they came and talked to me. These people today are in a full-scale depression. Make no bones about that. So the gentleman can argue about who is going to pay for it and how much it is going to cost. I will ask him, before the afternoon is over, to look at the alternative.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. GROSS. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. The gentleman from Iowa is recognized.

Mr. GROSS. Let me say to the gentleman from Illinois that if you keep on borrowing and spending money that you do not have, for things this country does not need—and I am not applying that exclusively to housing—you are going to have a money panic; you are going to have the depression you are talking about, and all hell will not stop it. You had better believe that.

Mr. PUCINSKI. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Illinois.

Mr. PUCINSKI. The gentleman knows that I have joined him on a number of occasions in voting for a reduction in spending. I believe he is an intelligent Representative in Congress, and examines into priorities. The building industry is in a depression. In my judgment, housing requires the highest priority right now.

Mr. GROSS. If the gentleman joined me more than once or twice in the last several years on cutting some of this spending, I do not know anything about it. Perhaps my memory does not serve me well. But make no mistake about it. You are going to have a depression, you are going to have a panic if you keep spending money at the rate you have been spending it for a lot of things we do not need. You will get an opportunity one of these days—I hope before Christmas Eve—to vote on a foreign aid bill. Let us see how you gallop up and stop that "gravy train." Let us see how you operate on that.

Mrs. SULLIVAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I am glad to yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. What I would like to know is whether the gentleman is against the Government lending money at 6½ percent.

Mr. GROSS. If the Government can find money at 6½ percent, perhaps it could lend it at 6½ percent, but I do not know of any 6½-percent money that is available, and I do not believe the gentlewoman does, either.

Mrs. SULLIVAN. Yes, I do.

Mr. GROSS. Where?

Mrs. SULLIVAN. The average cost of

money on long-term Government issues is around 5 percent and there are the various trust funds. What we are asking now is that these mortgages be given at 6½ percent or less, depending on the market. The Government can make money on this.

Mr. GROSS. The Government can make money simply by starting the printing presses and turning out the "green stuff." It can make unlimited amounts of the "funny money" that the Banking and Currency Committee has promoted. Sure you can make money. Round up the nickel and copper nowadays and run it through a mint and you have currency. Crank up the printing presses and you have more money.

Mrs. SULLIVAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. I would like to ask the gentleman whether there is any better investment than housing for homeownership? We know there are people who have worked hard for everything they have gotten, and they are the ones who are paying the taxes——

Mr. GROSS. I will say to the gentlewoman—and I have contended this for a long time—we need housing in this country far more than we need to spend billions of dollars each year on foreign ingrates who never do anything for this country except give us trouble.

Somewhere Congress must draw the line. If this Government is going to fight wars; if it is going to continue to police and finance the world; if we are going to do all these things, then there is not going to be enough left to operate in this country all of these programs. We had better make up our minds here and now what we are going to do if national bankruptcy is to be avoided.

Mrs. SULLIVAN. Mr. Chairman, if the gentleman will yield further, this is the first thing we have done for the low- and middle-income group. I think we have to fight to help them. I intend to fight for this amendment.

Mr. GROSS. Mr. Chairman, but it is not necessary to make a gravy train out of this bill and that is what certain provisions amount to.

Mr. BROCK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the gentlewoman from Missouri is a very able and articulate spokesman for her cause. I take this time just to note a few inadequacies in this particular proposal.

I think this represents a very fundamental shift in the philosophy of this Government and I think the Members of this body should be aware of what such a switch entails. In terms not only of the homebuilding industry, but also of all industry in America.

First of all, if the Federal Government goes into a direct loan program, I find it difficult to conceive how any bank or savings and loan institutions can continue to compete with the massive institution we call the Federal Government.

The gentlewoman is going to rip the savings and loan institutions and the banks right out of the homebuilding business. If we put a ceiling of 6.5 percent interest in this bill and say the home loan banks and savings and loan institutions must compete, how can they compete when they do not have any money?

Mrs. SULLIVAN. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. Mr. Chairman, are the savings and loan institutions and the home loan banks today making loans or mortgages to families whose income is up only to $12,000?

The gentleman from Tennessee has been on the committee, and he has been able to hear their complaints.

Mr. BROCK. There are loans being made. They are very few and far between simply because there is no money available.

If the gentlewoman really wants to help the homeowners of America, I would join the gentleman from Iowa in suggesting she begin by opposing some of the Federal programs which have been irresponsible. In the last year of the administration of the President of the gentlewoman's party, this Government had a $25 billion deficit. It had to get that money from the private sector. That took $1 out of every $3 created in new money by the entire productivity of America in a given year. If we take $1 out of $3 out of the market, how can we wonder what happens to the market? Of course, it is going to go through the ceiling. The Federal Government was directly responsible for the current crisis. Its policies created the problem.

Mrs. SULLIVAN. Mr. Chairman, did the gentleman from Tennessee vote for the ABM system?

Mr. BROCK. Yes.

Mrs. SULLIVAN. Does the gentleman intend to vote for the SST?

Mr. BROCK. I have not made my decision on that. I supported the ABM.

Mrs. SULLIVAN. The gentleman, I suggest, should ask some of us how we voted on those programs.

Mr. BROCK. Mr. Chairman, I am delighted the gentlewoman has exercised her options, but I do not think they have been fully exercised to reduce this Government's fiscal irresponsibility, which is by and large responsible for the problem we have.

Let us talk about what the real impact of the gentlewoman's bill would be. If we go into the market with $2 million a year in Federal direct loans to any prospective home purchaser with a $12,000 income, lending money at 6.5 percent, when the savings and loan institutions have to lend at 7.5 or 8.5 percent, what is going to happen? We are going to put those savings and loan institutions out of business.

Private initiative is the real source of all productivity. It rests with the private sector. Since when does government want to replace the private sector as the producer of wealth in this country? The Federal Government is not competent to do so. It makes no meaningful contribution in this regard. It never can, because the private sector is where new funds are created.

Now with regard to the Government borrowing funds, the Government cannot get any 30-year money at 5 percent. The party of the gentleman from Illinois has for years fought an amendment to remove the ceiling on long-term debt, and the Federal Government cannot get money at 4.5 percent for 30 years.

Nobody is a fool. Nobody is going to be irresponsible, to loan money at a rate below the rate of inflation.

The gentleman's administration created a 6 percent inflation. What does he expect the American people to do? Does he expect them to loan money at 4½ percent? They are not stupid. They will not lend money to Washington at a rate which will not even maintain the value of their loan.

Mr. PUCINSKI. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the gentleman from Illinois.

Mr. PUCINSKI. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for an additional minute.

The CHAIRMAN. The time of the gentleman from Tennessee has not yet expired.

Mr. PUCINSKI. I wonder if my colleague would try to give his attention to some figures I placed in the RECORD not too long ago, showing that the banks in this country across the board, coast to coast, border to border, enjoyed a 20-percent increase—increase, mind you—in profits in the first 6 months of 1969. When we looked at 50 at random we saw increases in profits ranging from 49 percent for a bank in Michigan to 11 percent for a bank in Illinois.

So, my friend asks, if we begin to make money available at 6½ percent what will happen? I will tell him. They will feel the competition and bring their own rates down. That is what will happen. This is the first significant anti-inflation move presented to this Congress.

Mr. BROCK. The gentleman is in error.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

(On request of Mr. KYL, and by unanimous consent, Mr. BROCK was allowed to proceed for 5 additional minutes.)

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the gentleman from Iowa.

Mr. KYL. I was introduced to the amendment of the gentlewoman from Missouri on yesterday and have not had the opportunity to get information on this point. Does this amendment in any way remove the program which was authorized last year or the previous year for the 1-percent-interest loans for low-income families?

Mr. BROCK. It has no effect on existing law. That bill was passed. It is in application now.

This is an entirely new bill, which would create a new corporation of the Federal Government which would be authorized to take $2 billion a year from the Treasury for a period of 5 years. It is a $10 billion amendment.

It would have no effect whatsoever on the 1-percent mortgage supplement program.

Mr. KYL. Can the gentleman tell us how that program has been working?

Mr. BROCK. Well, the program is very much in its inception stages. I do not know that we are really in a position to gage it yet.

Mrs. SULLIVAN. Mr. Chairman, will the gentleman yield to me?

Mr. BROCK. I yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. I would say, so far as the money is concerned and the money appropriated for that program, it is working but very, very slowly.

This program I am introducing is not a subsidy program at all. The program the gentleman mentioned is an interest rate subsidy program for the very low income families. I am now talking about families with incomes between $7,000 and $12,000 who cannot buy a home today.

Mr. KYL. Mr. Chairman, will the gentleman yield further?

Mr. BROCK. I yield to the gentleman from Iowa.

Mr. KYL. If we have this precedent for establishing a pseudoprivate governmental bank corporation for loaning money for housing, is there anything which would stop further consideration of a similar financial institution for loaning money at special rates to municipalities for cleaning up water, air pollution, et cetera, or for any other private consumption market?

Mr. BROCK. No. The gentleman harks back to my original point. This opens Pandora's box. It puts the Federal Government in the position of making direct personal loans to individuals. There is no end to that.

This is a rather broad version of the old RFC, if we want to put it that way. Frankly, I cannot imagine anything that would be more detrimental to the private sector of the economy, and in particular to the savings and loan institutions, because they are having a pretty tough go of it right now, as it is, with the inflation which has been created. I cannot think of anything more detrimental to the savings and loan institutions or, frankly, to the taxpayers of this Nation, than this kind of a provision. I believe it would be terribly destructive.

This must be defeated.

Mr. TEAGUE of Texas. Mr. Chairman, will the gentleman yield to me for a question to the chairman of the committee?

Mr. BROCK. Surely.

Mr. TEAGUE of Texas. I would like to ask the chairman of the committee where there is anything in this bill that affects interest rates on veterans' loans in any way, form or fashion?

Mr. PATMAN. In one sense there is. You see, this extends the law, taking the limitation off of interest rates applying to the FHA and VA loans beyond the end of December. It came about in this way: This bill expected to extend it for another year, but during that time a joint resolution was passed in the Senate to extend it for 90 days while the committee had an opportunity to extend the law now on the statute books. That resolution came to the House and we agreed to it. So the interest rate limitation is off until the end of December. Therefore we have a committee amendment that would change the date so as to include the date of January 1, 1970. That is when the limitation would be off.

In the meantime, the Committee on Banking and Currency of the House is going to consider this matter. So will the committee in the Senate, and both Houses then will pass on it before the end of December. Therefore it is unnecessary to have it in this bill. For that reason I will offer a committee amendment, which was overlooked a while ago when committee amendments were asked for. This is in title I, and I expect to offer it as a committee amendment.

The CHAIRMAN. The time of the gentleman from Tennessee has again expired.

Mr. BROCK. Mr. Chairman, I ask unanimous consent to proceed for an additional 3 minutes.

Mr. PATMAN. Mr. Chairman, reserving the right to object, may I inquire on this? We have taken quite a bit of time on this, which is all right. We all agree that we should have freedom of debate, but I wonder if we can have a limitation from now on? We have had 30 or 40 or 50 minutes already on this amendment, and the Members standing up, of course, such as the gentleman from Georgia (Mr. BLACKBURN), would like to be heard and will be heard, and we will take that into consideration.

However, I wonder if we can agree on 20 minutes as a limitation?

Mr. BROCK. Mr. Chairman, if the gentleman will yield, I simply wanted to address myself to the statement of the gentleman from Texas.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas (Mr. PATMAN) that all debate on this amendment end in 20 minutes?

Mr. TEAGUE of Texas. Mr. Chairman, there is objection at this time.

Mr. PATMAN. We will make it 5 minutes each. There are four on the floor, and myself, and that is 25 minutes. Is that all right?

Mr. TEAGUE of Texas. At this time I object, Mr. Chairman.

The CHAIRMAN. Objection is heard. If there is no objection, the gentleman from Tennessee (Mr. BROCK) will proceed for an additional 3 minutes.

There was no objection.

Mr. TEAGUE of Texas. Mr. Chairman, will the gentleman yield to me for one more question of the chairman?

Mr. BROCK. Yes.

Mr. TEAGUE of Texas. We had inquired in the Veterans' Affairs Committee, and we were told that in no way, form or fashion would this bill affect veterans' loans. I find now that it is quite different. We passed the bill in the House saying that the Veterans' Affairs Administrator has the authority until 1972 to adjust interest rates. What you just said, Mr. Chairman, is that this bill will override that bill, and it is up until December 31, that he would have the right to adjust interest rates.

Mr. PATMAN. That bill passed the House, but it has not passed the Senate. Therefore it is not the law. I was here when the amendment was offered by the gentleman from Virginia to take off the limitations on the usury law on veterans' loans. I was very much disappointed in it. Of course, a point of order was made on it, but it went through. That has not passed the Senate yet, however, and therefore it is not the law. I think that the general law applying to interest rates for everybody would be respected, and that Congress should respect and recognize it, and not pick out any group. I do not see any reason to exempt the veterans' loans from the usury laws, and charge the veteran 15 percent interest and hold the others down to 7.5 percent. I just do not see that.

Mr. TEAGUE of Texas. Of course, the gentleman well knows when he said 15 or 20 percent, that that is not a fair statement in any way, form or fashion. The usury laws in the District of Columbia are something about which I do not know, but I think it is 7 or 8 percent.

Mr. PATMAN. But I think the usury law was repealed for veterans.

Mr. BROCK. Mr. Chairman, I would like to respond to the question which has been propounded by the gentleman from Texas (Mr. TEAGUE), because in my opinion it is pertinent. I fully agree with the gentleman's statement and I share his concern. I am very much concerned over the fact that we may not have adequate hearings on the bill relating to VA and FHA prior to the end of the year.

Further, in my opinion one reason that we have had chaos in the money market is the fact that our committee did not accept its responsibility and vote to address itself to the pending change in the law. The reversal took place in October and yet we simply extended it for 90 days.

Mr. Chairman, we desperately need a more adequate extension on this if we are going to put some stability back into the money market.

Mr. PATMAN. Mr. Chairman, if the gentleman will yield, we are considering that question in the committee of which the gentleman from Tennessee is a member.

Mr. BROCK. If the chairman of the committee will remember, we have been considering it all year long and we have done absolutely nothing about it. Now it is October and the committee has done nothing and I question whether or not the committee is interested in doing anything about it.

Mr. BLACKBURN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the proposal and I do so on the basis of several reasons.

One of the most compelling reasons that I find myself taking this position is the fact that we have had no hearings whatsoever in committee on this proposal. I think that the gentlewoman from Missouri who has offered this amendment will agree that when we consider a question of this nature we are dealing with a very fundamental question of philosophy and that is the degree to which the Federal Government should begin to intrude into an area in which it has never extended itself before, and that is, the general mortgage business for homebuilders or home purchasers.

I think we should have the benefit of expert testimony on this point. I think we should know what is the volume of private homebuilding each year in the United States in private home financing. If we should find that the volume of private home financing is $200 billion a year then, of course, a $2 billion subsidy the

first year is going to have little or no impact across the country. I do not suggest that that is the case, but I say we do not have sufficient facts upon which to make an intelligent evaluation of the matter.

Mrs. SULLIVAN. Mr. Chairman, will the gentleman yield?

Mr. BLACKBURN. I yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. I thoroughly appreciate the fact that the bill was introduced too late to be considered in the Housing Subcommittee or the full Committee on Banking and Currency. However, this idea has been discussed at length since the first of this year in connection with the work of the National Commission to study mortgage interest rates. That Commission was established in order to study ways of getting more mortgage money into the market at "reasonable interest rates."

If the gentleman will read the minority views contained in that report, the gentleman will see where the chairman of our committee, the gentleman from Texas (Mr. PATMAN), and I disagreed with the findings of the majority in that report, because they did not come up with any ways of creating more mortgage money, or of lowering interest rates.

This amendment that I have just offered is intended, really, to shame the lending industry and the banks into accepting the rate of 6.5 percent as a fair return upon fully insured long-term mortgages. The gentleman talked about the danger this amendment might do to competition. We would not be in competition with the savings and loan institutions or with the banks, because they are not making loans today to the people this amendment would help.

Before a family in the $12,000 or under income bracket could get a loan under this direct loan program, they would have to exhaust all regular channels to get a loan from private sources. If they could not get a loan at a reasonable rate, then they could get it from the Government, providing they were eligible and could meet the credit requirements of FHA and so on.

If I may mention just one more thing: we have a quarter of a million loans made to families in rural areas through the Farmers Home Administration, and these are all guaranteed loans, for, I believe 33 years. We have had other examples of how direct loan programs can be conducted. There is nothing brand new about this idea; it is, however, "an idea whose time has come."

Mr. BLACKBURN. If I may, I do not like to cut the gentlewoman off, but I must respond. The mere fact that for the first time I, as a member of the Committee on Banking and Currency, am being exposed to the arguments of the gentlewoman and those who might support her amendment, is reason enough in my mind to say, let us take this matter up in an orderly fashion, let us hear testimony from those in the homebuilding industry; let us hear from those who are engaged in the savings and loan and banking and insurance industries who are directly concerned with the operation of the money market. To me the fundamental question we have to ask ourselves ultimately is this: Do we believe in a free market economy or do we not? To me, this would thrust the Federal Government into an area that it has never been in before.

If we start off with a $12,000 a year limitation on income, tomorrow it would be pushed up to $15,000 and the next day to $20,000. Before we initiate such a move into an area in which we have never thrust ourselves before, I say let us proceed with great caution. I would urge the members of the committee to join with me in defeating this proposed amendment on the basis that it does deserve far more attention and deliberation than it has had up to this time.

Mr. SANDMAN. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. The gentleman from New Jersey is recognized.

Mr. TEAGUE of Texas. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 240]

Abbitt	Devine	O'Konski
Anderson, Tenn.	Diggs	O'Neill, Mass.
Aspinall	Dingell	Powell
Bingham	Edwards, Ala.	Price, Tex.
Blanton	Fascell	Pryor, Ark.
Brooks	Giaimo	Quie
Burton, Utah	Gray	Reid, N.Y.
Cahill	Hansen, Wash.	Rivers
Carey	Hays	Rosenthal
Clark	Karth	Ruppe
Clay	Kirwan	Scheuer
Corman	Kleppe	Talcott
Culver	Long, La.	Ullman
Daddario	Lukens	Whalley
Dawson	Mailliard	Wilson, Charles H.
de la Garza	Martin	
	Morse	

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. FLOOD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 13827, and finding itself without a quorum, he had directed the roll to be called, when 383 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey.

Mr. SANDMAN. Mr. Chairman, I believe that every Member of the House is concerned with two things insofar as the amendment is concerned. I for one would like very much to support this kind of amendment. However, I have some reservations because of some questions that I do not feel have been answered yet. We all must recognize, and I think we all believe that something has to be done because there is not sufficient money available to finance homes for those incomes up to $12,000 annually, and I want to do something to help those people, as I am sure the gentlewoman from Missouri wants to do also. But I wonder if we are taking the right approach.

It has been said here by those in opposition that this measure will cost approximately $2 billion a year for 5 years. This money, of course, must come from the public segment. It must be borrowed and siphoned off what is not in circulation. It in turn economically, I think, has to increase and not decrease interest rates. So that the siphoning off of $10 billion over the next 5 years I am not convinced is going to make our position any better then than it will now.

However, I am even willing to gamble with that if we do something else.

It has been argued that this is not going to put the Government in competition with the savings and loan associations or the banks, and I agree with that position. But there is one thing here I see happening that I, for one, would not want to see happen, and it is the simple fact that the banks just do not want to lend any money for mortgages. They are more interested in short-term credit, and they would much prefer to lend it to corporations than to individuals because this is their little trick in getting around the usury laws. We all know this. For that reason banks do not want to put money into mortgages unless they absolutely have to.

The question that I have for the gentlewoman from Missouri, and the thing that bothers me the most about your amendment is that once we do this, will we not forever place the Federal Government in the mortgage business in a way where it will last until eternity comes, because the banks do not want to be in the mortgage business at the present time or the foreseeable future?

Previously, with FHA and VA mortgages the Federal Government was the guaranteeing agency. However, for the first time in your measure we are in the direct loan business. My question to you, my friend, is, How do we get out of this business once we start it, once we are taking over that segment of the banking field that I am sure the banks do not want?

Mrs. SULLIVAN. Mr. Chairman, will the gentleman yield for an answer?

Mr. SANDMAN. I yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. Mr. Chairman, first I want to say this is not the first time that such a thing has been done. Remember, we have a direct-loan program under the Farm Home Administration and also we have direct loans under the Veterans' Administration. These are going mostly to the rural areas. This will set up a permanent body which will be a small bookkeeping body that will be permanent but active only in times of tight money, as we have at present.

In order to qualify for a loan, a person must go to any private financial agency like a savings and loan institution or a bank to attempt to get a loan, just as is done under small business and some other things. If the person cannot get the loan, then he comes to the FHA office and makes a request for a direct loan for the mortgage he is after. His income must be under $12,000, and the mortgage must be for no more than $24,000.

The second question the gentleman raised was that this would raise the interest rates. Frankly, it would not raise them any more than price support programs raised the interest rates. We

would have to get $2 billion out of general revenue for that year's appropriation, but I am hoping—and I hope with all my heart—that we can cut down on many of these other programs in order to have this. Immediately, when these mortgages are made, the money will start coming back to the Government at the rate of 6.5 percent or less.

The other question is, when do we get out of it? We get out of it when interest rates begin to come down to where they should be.

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

(On request of Mrs. SULLIVAN, and by unanimous consent, Mr. SANDMAN was allowed to proceed for 2 additional minutes.)

Mr. SANDMAN. Mr. Chairman, may I ask this question: Once we have this, does the gentlewoman not feel the banks will say:

> Good, we are out of the mortgage business, and we will let Uncle Sam take it over?

What do we do when that happens?

Mrs. SULLIVAN. Is it not true that today the banks will not give mortgages on these kinds of loans?

The savings and loan institutions say they have no money and cannot do it, so these people are left in limbo. There is no place where they can go and get the mortgage.

Mr. SANDMAN. Does the gentlewoman feel the banks should take this up?

Mrs. SULLIVAN. I do believe that, but we have not been very successful in that. Since the first of the year, banker after banker and financial institution after financial institution, has come before the Banking and Currency Committee and all they say is, there is an increase in interest rates because the demand is so heavy. But when we talk to them about who is doing the demanding, we find a big portion of it comes from big business, and they are committed to make these big loans to create the expansion of business. They are not interested in making these kinds of loans.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. SANDMAN. I yield to the gentleman from Tennessee.

Mr. BROCK. Mr. Chairman, I would simply point out the banks have today substantially more than $2 billion invested in mortgage loans and more than that is invested in those every year. If we drive the bankers out of the business of mortgages with this bill, it will cost the home owners more. The bill will be self-defeating.

Mr. PUCINSKI. Mr. Chairman, will the gentleman yield?

Mr. SANDMAN. I yield to the gentleman from Illinois.

Mr. PUCINSKI. Mr. Chairman, I think it is important to point out that nobody can borrow under this program unless he first goes to the financial institutions, to the conventional institutions, and only after the conventional institutions say they cannot do it, will this apply. Then the borrower would have to show he had gone to the financial institution, and applied for this only after the financial institution failed him.

Mr. TEAGUE of Texas. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, what I have to say does not concern the amendment offered by the gentlewoman from Missouri. My amendment will concern section 414 on page 44. If section 414 becomes law, on January 1, 1970, it will become mandatory that the interest rate for veterans revert to 6 percent interest.

Just recently we passed a bill which said the Administrator of the Veterans' Administration would be permitted to establish a rate not in excess of such rate as he may from time to time find the loan market demands.

Mr. Chairman, I was told that this bill did not apply to veterans in any way, form, or fashion, but I find out that it does apply to veterans. It repeals what we did here about 2 weeks ago.

At the proper time I shall offer an amendment either to exempt the veterans program from the January 1, 1970, deadline or to allow more time for consideration. What is wrong with giving the Committee on Banking and Currency and the Committee on Veterans' Affairs a little time to try to work out something on interest rates?

The bill before us makes the date January 1, 1970, an expiration date which means the Congress will be out of session. There will be nothing we can do. It will mandatorily go back to 6 percent, and veterans will not get any housing.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. TEAGUE of Texas. I yield to the gentleman from Texas.

Mr. PATMAN. I say to the distinguished gentleman from Texas, this only applies to the National Housing Act. It does not intend to apply to veterans.

The bill which the gentleman authored, which went to the Senate recently, taking off the limits on interest rates for veterans, if it becomes law, will make the veteran separate and distinct from the National Housing Act and other legislation, FHA and everything.

Mr. TEAGUE of Texas. Will the gentleman tell the House why we did that? It was because he would not agree and would not go in to make it apply to all Government housing programs.

Mr. PATMAN. I was not willing to charge the veterans high rates of interest. I tried to keep them low.

Mr. TEAGUE of Texas. I want the veteran to have an opportunity to get a house. If he does not want to pay 7 percent interest or 7½ percent interest, he does not have to. To say that he cannot pay more than 6 percent will mean he will not get a house.

Mr. PATMAN. The gentleman is entirely mistaken about this taking precedence over the bill which was passed here, if it is passed by the Senate. Of course, like it is now, it is not the law, just a bill. Until that becomes a law there is no difference, and it is still tied to the FHA rate.

Mr. TEAGUE of Texas. Will the gentleman tell the House what will happen on January 1, 1970, if this becomes law? Am I correct in saying that it will be mandatory that the interest rate for veterans housing be 6 percent?

Mr. PATMAN. There is no danger of the problem arising as my friend indicates.

Mr. TEAGUE of Texas. On January 1, 1970, it will be mandatory that the veteran can pay only 6 percent.

Mr. PATMAN. I will yield to the gentleman from Pennsylvania (Mr. BARRETT).

Mr. TEAGUE of Texas. The gentleman does not have the floor. I will yield to the gentleman.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. TEAGUE of Texas. I am glad to yield to the gentleman from Pennsylvania.

Mr. BARRETT. I just want to ease the mind of the gentleman from Texas. I know of his interest in housing programs for veterans.

There is not anything in this bill that will have any effect in any way on the veterans housing program? We will have a bill coming out in the year 1970, and if it is necessary to have the Committee on Veterans' Affairs participate in respect to that bill I would be the first one to call the gentleman to come over and have a look at it, to let us work in conjunction to bring out what we consider might be in the best interest of the veterans to purchase homes.

There is no reason for anyone to have alarm about anything in this bill, as to having the slightest effect on veterans housing.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. TEAGUE of Texas. I yield to the gentleman from Tennessee.

Mr. BROCK. I should like to respond to the gentleman's question. I do not believe he has a response yet.

If this bill passes, and nothing else comes out of this committee, on January 1 there is not going to be one dime of money in the United States for a veteran to buy a house. That is what will happen. This bill will have a direct impact on the veterans, and the gentleman knows it.

Mr. BLACKBURN. Mr. Chairman, will the gentleman yield?

Mr. TEAGUE of Texas. I yield to the gentleman from Georgia.

Mr. BLACKBURN. I should like to ask the gentleman in the well a question. Is it not true that the act of May 7, 1968, Public Law 90–301, is the result of a bill his committee considered and passed, and that is the bill referred to on this page 44, at the bottom, under the "authority"?

Mr. TEAGUE of Texas. The bill of May 7, 1968, says that until October, 1969, the Administrator of Veterans' Affairs and the Administrator of HUD would join together in setting interest rates. As of October 1, 1969, this would be repealed and it would go back to a mandatory 6-percent interest rate. That is the whole story. When they say it does not affect Veterans' Affairs, I do not agree with them.

The CHAIRMAN. The time of the gentleman from Texas (Mr. TEAGUE) has expired.

(On request of Mr. PATMAN, and by unanimous consent, Mr. TEAGUE of Texas was allowed to proceed for 3 additional minutes.)

Mr. PATMAN. Mr. Chairman, will the gentleman yield to me?

Mr. TEAGUE of Texas. I yield to the gentleman.

Mr. PATMAN. Let us read this language. It is very plain.

SEC. 414. Section 3(a) of the act of May 7, 1968, Public Law 90–301, is amended by striking out "October 1, 1969" and inserting in lieu thereof "January 1, 1970."

That refers——

Mr. TEAGUE of Texas. Will the gentleman read section 3(a) and let the House decide what it says?

Mr. PATMAN. The section refers to the National Housing Act.

Mr. TEAGUE of Texas. Will the gentleman read it, please?

Mr. PATMAN. It does not refer to any Veterans' act.

Mr. TEAGUE of Texas. But will the gentleman read it?

Mr. PATMAN. Let us talk about it briefly. The gentleman has a bill passed here that will separate the veteran from the FHA interest rate. It is now over in the other body. If that bill prevails and becomes law, of course, the two rates do not go back together.

Mr. TEAGUE of Texas. The chairman is just killing time. We are talking about this bill and about section 3(a). Will you please read it, and let the House know what is in there?

Mr. PATMAN. The gentleman has no complaint of any kind because if the bill is enacted which comes from your committee then everything you want will be provided. If it is not passed, of course anything can happen, including the VA rate being connected up with the FHA rate. But if your bill passes, and if it becomes law, it will separate them, and you will have exactly what you want.

Mr. TEAGUE of Texas. Mr. Chairman, at the proper time I shall offer an amendment that I hope, my staff hopes, and the Legislative Reference Service hopes will separate the veterans program from the one that the Committee on Banking and Currency has supervision over.

Mr. PATMAN. You already have the VA law passed the House, and it is now pending in the Senate. The VA rate had always been attached to the FHA rate, but you passed a bill here that will separate it. If it prevails you have no problems at all. None.

Mr. TEAGUE of Texas. Mr. Chairman, I completely disagree with the chairman of the Committee on Banking and Currency. I shall get my time at the proper time, and I will get section 3(a) and will read it to you, which he will not do, because he knows that it contains veterans housing in it.

Mr. PATMAN. It is the National Housing Act that it refers to.

Mr. TEAGUE of Texas. And it also says that it brings in the Administrator of Veterans' Affairs.

Mr. BINGHAM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the gentlewoman from Missouri (Mrs. SULLIVAN).

Mrs. SULLIVAN. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, there has been so much discussion on other matters since my amendment was read that I want to make sure the Members know just what the pending amendment is, and what it does. It is a direct-loan program for the middle-income family. I repeat what I said earlier: That this amendment consists of a bill cosponsored by me and the chairman of the Housing Subcommittee, the gentleman from Pennsylvania (Mr. BARRETT). The National Association of Home Builders on October 13 of this year, through its board of directors, endorsed, and now supports, the proposal and regards it, as I do, as a way to finance homes for the middle-income family now priced out of the mortgage market.

Very briefly, here is what it does. First, it creates the Home Owners Mortgage Loan Corporation to make direct loans up to $24,000, at 6.5 percent or less to credit-worthy families with incomes of $12,000 or less.

Next, it provides for appropriations to the Home Owners Mortgage Loan Corporation of $2 billion a year for 5 years. This money then becomes a revolving fund.

Third, a board of directors of nine members of which at least five are not Federal, State, or local officials, will set the policies to be followed by the HOMLC. The Commissioner of the FHA would serve on this board, but could not be the chairman. The loans would be extended under the existing FHA offices, so no new bureaucracy would be established.

Fourth, this agency would be permanent, but it would extend loans only when interest rates are so high that the average family cannot obtain a mortgage at reasonable rates and then only after the family or the individual had exhausted every other means to get a loan at this rate from private financing companies.

Mr. Chairman, I urge the adoption of the amendment.

Mr. PATMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. PATMAN. Mr. Chairman, I appreciate the fact that the gentleman from Texas (Mr. TEAGUE) has rendered a great service in many fields, particularly the veterans field and in protecting them at every turn. However, the gentleman is entirely wrong in what he says concerning this bill regulating the VA interest rates.

I have before me the section to which he referred, section 3(a) and I will read it to you because it is section 3(a) that the gentleman says fixes the veterans' rates. Section 3(a) reads as follows :

Notwithstanding the provisions of sections 203(b)(5),—

And several other sections—

of the National Housing Act regarding the maximum interest rates which the Secretary of Housing and Urban Development may establish for certain mortgage insurance programs authorized by that Act, the Secretary is authorized, until October 1, 1969— to set the maximum interest rates for such programs at not to exceed such per centum per annum on the amount of the principal obligation outstanding at any time as he finds necessary to meet the mortgage market, and during that time the interest rates so set shall be deemed to be for all purposes the interest rates in effect under the provisions of said section 203(b)(5) and the other sections referred to above: *Provided*, That in determining the rate to be applicable for the said section 203(b)(5) program, the Secretary shall consult with the Administrator of Veterans' Affairs regarding the rate which the Administrator considers necessary to meet the mortgage market for guaranteed or insured home loans to veterans under chapter 37 of title 38, United States Code.

Mr. TEAGUE of Texas. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. We are not changing the law in the bill before us.

Mr. TEAGUE of Texas. Read that second sentence that you just read again.

Mr. PATMAN. Let me read these three lines. Let me go back and start at the first:

That in determining the rate to be applicable for the said section 203(b)(5) program, the Secretary shall consult with the Administrator of Veterans Affairs regarding the rate which the Administrator considers necessary to meet the mortgage market for guaranteed or insured home loans to veterans under chapter 37 of title 38, United States Code.

So, you see, he only confers with the VA Administrator. He is not required to take his advice. Neither one can take any independent action because they are not in the business of negotiating. They just consult to find out what he says is necessary in the way of determining the interest rate.

So, there is nothing here that goes into the question which the gentleman from Texas believes has been done. I assure him that there is no intent here to do anything to interfere with veterans housing interest rates, and if the bill which the gentleman got through the House here and which is now pending in the Senate becomes law, they are definitely separated for good—VA is separated from FHA. I hope the gentleman will consider that as a sufficient explanation.

Mr. TEAGUE of Texas. Mr. Chairman, the members of the Commitee heard the gentleman read section 3(a) and I do not believe there is one Member on this floor after hearing him read it who would say that the VA is not tied into this housing program, because they are. In the last 3 years this is the first time in the history of our program that that has been required. I do not think anyone on this floor believes that the administration is going to set an interest rate on housing where they do not make the VA and the FHA set the same interest rates.

Mr. PATMAN. That is not the question, I will say to the gentleman from Texas.

The gentleman said that this section 414 affected veterans rates. Definitely, it does not. That is the only question involved.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman.

Mr. BROCK. Maybe the chairman does not quite understand the thrust of the gentleman's remarks. Section 414 simply

postpones the date of application of previous loans.

If section 414 is involved in the committee amendment then we postpone until the 1st of January and it will revert to the 6-percent interest ceiling on VA loans. If nothing is done between now and the 1st of January to change that situation, and you pass this bill as written with the committee amendment, on the 1st of January the rates will revert back to the loan rate which puts a 6-percent ceiling on.

Mr. PATMAN. The gentleman is mistaken. It was only put in there to negotiate with the extension time of 90 days, for the committee to extend this law that expired on October 1.

Mr. BROCK. But if Fanny May does not, what is going to happen then?

Mr. PATMAN. Just a moment. During that time—our committee is considering it right now. We definitely are going to pass out a bill for the purpose of extending that. There is no question about that.

Mr. BROCK. I have been on the committee for 7 years, and it is news to me that the committee is considering that right now. We are not.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman.

Mr. WIDNALL. Our committee is not considering that at the present time. It is considering interest rates on shares.

Mr. PATMAN. Well, it is the whole thing—we have two laws we are considering.

Mr. TEAGUE of Texas. I would like to ask the chairman to answer one simple question.

Will the gentleman tell us when January 2 comes, if this bill becomes law, what happens to the interest rates on veterans' loans.

Mr. PATMAN. They will be just the same as they are now.

Mr. TEAGUE of Texas. They would not be the same as they are now, and you know they would not.

Mr. PATMAN. But listen, unless that bill which the gentleman secured passage of in the House is signed into law——

Mr. TEAGUE of Texas. That is not the correct answer.

Mr. PATMAN. If the gentleman will wait just a moment, I will answer the gentleman.

If that bill is passed and signed by the President and becomes the law, of course, you have exactly what you want.

Mr. TEAGUE of Texas. Let us talk about this bill. If this bill becomes law on January 2, the question was—what happens to the interest rate on veterans' loans? The gentleman knows as well as I do that it will be 6 percent.

Mr. PATMAN. Well, we do not know because if the bill passes that you have, there is no interest limitation at all.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. TEAGUE of California. Mr. Chairman, I move to strike out the last word for the purpose of associating myself with the remarks of the chairman of my committee, the gentleman from Texas (Mr. TEAGUE), and also the remarks of the gentleman from Tennessee (Mr. BROCK). I do this as ranking Republican member of the Committee on Veterans' Affairs.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Missouri (Mrs. SULLIVAN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mrs. SULLIVAN. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mrs. SULLIVAN and Mr. WIDNALL.

The Committee divided, and the tellers reported that there were—ayes 78, noes 111.

So the amendment was rejected.

The CHAIRMAN. Are there any further amendments to title I?

For what purpose does the gentleman from Georgia rise?

AMENDMENT OFFERED BY MR. BLACKBURN

Mr. BLACKBURN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BLACKBURN: Page 6, after line 21, insert the following new section:

"SECTION 236 PROJECTS FOR ELDERLY OR HANDICAPPED FAMILIES

"SEC. 109. (a) Section 236(a) of the National Housing Act is amended by inserting after 'occupancy by lower income families' the following: '(including a project designed primarily by occupancy by lower income elderly or handicapped families)'.

"(b) The second sentence of section 236(e) of such Act is amended by striking out 'at intervals of two years' and inserting in lieu thereof 'at intervals of five years in the case of elderly or handicapped families and two years in any other case'.

"(c) The second sentence of section 236(f) of such Act is amended by striking out 'or such greater amount' and inserting in lieu thereof 'or (except in the case of a dwelling unit in a project designed primarily for occupancy by lower income elderly or handicapped families) such greater amount'.

"(d) The first sentence of section 236(i)(2) of such Act is amended—

"(1) by striking out 'shall in no case exceed 90 per centum' and inserting in lieu thereof 'shall in no case exceed (A) $5,500 a year for an individual or $6,600 a year for a couple in the case of an elderly or handicapped family, or (B) 90 per centum'; and

"(2) by inserting before the period at the end thereof the following: 'in any other case'.

"(e) The second sentence of section 236(1)(2) is amended by inserting 'in any project' after 'accord a preference'.

"(f) Section 236(j)(2) of such Act is amended—

"(1) by inserting 'and' after the semicolon at the end of subparagraph (A),

"(2) by striking out subparagraph (B), and

"(3) by redesignating subparagraph (C) as subparagraph (B).

"(g) Section 236 of such Act is further amended by adding at the end thereof the following new subsection:

"'(n)(1) In making and contracting to make interest reduction payments and insuring mortgages under this section in the case of projects designed primarily for occupancy by elderly or handicapped families, and in administering the provisions of this section insofar as they involve or relate to such projects, the Secretary shall to the maximum extent possible apply the same definitions, terms, and conditions and utilize the same personnel, facilities, and procedures as in the case of loans under section 202 of the Housing Act of 1959.'

"(b) As used in this section, the term 'elderly or handicapped families' shall have the same meaning as in section 202 of the Housing Act of 1959."

And renumber the succeeding sections accordingly.

Mr. PATMAN (during the reading). Mr. Chairman, I ask unanimous consent—and I wonder if the gentleman from Georgia will agree—that the amendment be considered as read and printed in the RECORD, in view of the fact that it is available to all Members, and they know what it is.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BLACKBURN. Mr. Chairman, I rise today to propose an amendment that will establish administrative guidelines to be followed by personnel in the Department of Housing and Urban Development when administering the 236 interest subsidization program to elderly housing projects.

Up until the passage of the 1968 Housing and Urban Development Act, Federal assistance for elderly housing was carried out under section 202 of the Housing Act of 1959. This section provided for direct 3-percent loans from the Federal Government to certain nonprofit corporations which are engaged in private housing for the elderly. Earlier this year the Bureau of the Budget froze all funds for the 202 program and required that groups appyling for grants under this program would have to apply in the future under the section 236 interest subsidization program.

Section 236 is a program to provide housing for low-income families and as such has certain provisions which make it inappropriate to housing projects specifically for the elderly. The administration and Bureau of the Budget are not going to allow the future operation of the section 202 program. Therefore, I feel compelled to offer the following amendments. Specifically, I would provide guidelines for HUD to follow when administering this program.

First, section 236 of the Housing and Urban Development Act shall be amended to provide that housing projects for the elderly shall be defined and administered in the same fundamental terms as found under section 202 of the Housing and Urban Development Act of 1959. Under Secretary of the Housing and Urban Development Van Dusen has openly acknowledged that section 202 was a splendid program and should somehow be preserved. This amendment is intended to give the administration the legislative direction it desires and deserves.

Second, under the terms of my amendment the requirement that rents be set at 25 percent of the tenant's income shall be waived for elderly housing projects and a level rental from the tenants in a project shall be established. The elderly peoples income is low at best and basing the rent on individual incomes creates an unnecessary need for investigation and calculation by the project management. I feel that since all incomes are low it would be advisable to

set rents at a break-even level instead of using the complicated procedures found under section 236. Under my system the best apartments can command a premium thus making some apartments cheaper.

Third, income limits for eligibility shall be continued at 135 percent of those required under public housing programs provided that the income of the tenants shall not exceed $5,500 for a single person and $6,600 for a couple. Section 236 requires that rents shall be set at 25 percent of the tenant's income and not exceed 135 percent of the public housing formulas. I believe to set income limits with a ceiling and a flat rental rate will make for simpler management and less cost in interest subsidy to the Treasury Department.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. BLACKBURN. I yield to the gentleman from Texas.

Mr. PATMAN. Mr. Chairman, I understand the ranking minority Member, the gentleman from New Jersey (Mr. WIDNALL), is in favor of this amendment. If the gentleman is in favor of it, we are willing to accept it. It will be subject to conference anyway.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. BLACKBURN. I yield to the gentleman from New Jersey.

Mr. WIDNALL. Mr. Chairman, I support the amendment offered by the gentleman from Georgia (Mr. BLACKBURN).

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. BLACKBURN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WIDNALL

Mr. WIDNALL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIDNALL: Page 6, after line 21, insert the following new section:

"EXPANSION OF FHA NURSING HOME PROGRAM TO INCLUDE INTERMEDIATE CARE FACILITIES

"SEC. 109. Section 232 of the National Housing Act is amended—

"(1) by striking out subsection (a) and inserting in lieu thereof the following:

"'(a) The purpose of this section is to assist in the provision of facilities for either of the following purposes or for a combination of such purposes:

"'(1) The development of nursing homes for the care and treatment of convalescents and other persons who are not acutely ill and do not need hospital care but do require skilled nursing care and related medical services.

"'(2) The development of intermediate care facilities for the care of persons who, while not in need of nursing home care and treatment, nevertheless are unable to live fully independently and who are in need of minimum but continuous care provided by licensed or trained personnel.';

"(2) by striking out 'and' at the end of paragraph (1) of subsection (b);

"(3) by redesignating paragraph (2) of subsection (b) as paragraph (3) and inserting after paragraph (1) of such subsection the following new paragraph:

"'(2) the term "intermediate care facility" means a proprietary facility or facility of a private nonprofit corporation or association licensed or regulated by the State (or, if there is no State law providing for such licensing and regulation by the State, by the municipality or other political subdivision in which the facility is located) for the accommodation of persons who, because of incapacitating infirmities, require minimum but continuous care but are not in need of continuous medical or nursing services; and';

"(4) by striking out 'a new or rehabilitated nursing home' in the matter preceding paragraph (1) in subsection (d) and inserting in lieu thereof 'a new or rehabilitated nursing home or intermediate care facility or combined nursing home and intermediate care facility';

"(5) by striking out 'operation of the nursing home' in paragraph (2) of subsection (d) and inserting in lieu thereof 'operation of the home or facility';

"(6) by striking out paragraph (4) of subsection (d) and inserting in lieu thereof the following:

"'(4) The Secretary shall not insure any mortgage under this section unless he has received, from the State agency designated in accordance with section 604(a)(1) of the Public Health Service Act for the State in which is located the nursing home or intermediate care facility or combined nursing home and intermediate care facility covered by the mortgage, a certification that (A) there is a need for such home or facility, and (B) there are in force in such State or other political subdivision of the State in which the proposed home or facility would be located reasonable minimum standards of licensure and methods of operation governing the home or facility. No such mortgage shall be insured under this section unless the Secretary has received such assurance as he may deem satisfactory from the State agency that such standards will be applied and enforced with respect to any home or facility located in the State for which mortgage insurance is provided under this section,'; and

"(7) by adding at the end thereof the following new subsections:

"'(g) The Secretary shall prescribe such regulations as may be necessary to carry out the provisions of this section relating to intermediate care facilities, after consulting with the Secretary of Health, Education, and Welfare with respect to any health or medical aspects of the program which may be involved in such regulations.

"'(h) The Secretary shall also consult with the Secretary of Health, Education, and Welfare as to the need for and the availability of intermediate care facilities in any care facilities in any area for which an intermediate care facility is proposed under this section.'"

And renumber the succeeding sections accordingly.

Mr. WIDNALL (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in full in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. WIDNALL. Mr. Chairman, this is a recommendation of HUD and also HEW. It would expand the FHA section 232 nursing home program to include intermediate care facilities for persons who do not need full nursing home care but do need the aid of professional personnel.

It requires the States to prescribe reasonable minimum standards of licensure and methods of operation; and also, to consult with HEW and the State agency on the need for such facilities in any area.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman from Texas.

Mr. PATMAN. Does this amendment contemplate the construction of nursing homes all over the country? If so, who will furnish the money for the construction, and how will it be provided?

Mr. WIDNALL. This would be handled through the FHA, the same as nursing homes.

Mr. PATMAN. How much would it cost?

Mr. WIDNALL. I do not have the faintest idea. I do not know how many would apply. It would be an FHA program.

Mr. PATMAN. This is for the purpose of helping people who are not 100 percent disabled, just partially disabled?

Mr. WIDNALL. They are people who do not have to be hospitalized.

Mr. PATMAN. In other words, this is short of hospitalization, which is short of a nursing home, then?

Mr. WIDNALL. That is right.

Mr. PATMAN. This would be an entirely different kind of nursing home for partially disabled people?

Mr. WIDNALL. It would be what we might call an expansion of the present nursing home operation.

Mr. PATMAN. And there is no estimate as to cost, or how many homes there would be?

Mr. WIDNALL. I do not see how one could estimate it.

Mr. PATMAN. Until we know the demand; I agree, until we know the demand.

Is it anticipated there would be a large expenditure or a small expenditure?

Mr. WIDNALL. I would anticipate a small expenditure.

Mr. PATMAN. Say $2 billion or something like that?

Mr. WIDNALL. Far below that.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman from Ohio.

Mr. ASHLEY. I am curious as to whether this was the subject of discussion during our hearings before the Subcommittee on Housing.

Mr. WIDNALL. We did briefly discuss this at the time of our hearings on housing. At that time, however, the recommendation of HUD and also of Health, Education, and Welfare had not been made.

They have advised me that they do support this and feel it will be very beneficial to the general health program.

Mr. ASHLEY. I do not mean to be obstreperous, but we deferred consideration of our housing bill for months and months and months awaiting the position of the public departments in question. If they were unable to respond by midsummer to the inquiries, and if they were unable to be responsive to the legislative proposals that our subcommittee was making, it would seem to me this is not the time, particularly, to foist upon this body suggestions that now come from the Department.

Would you not think you would agree with that?

Mr. WIDNALL. I had hoped to have the full endorsement of the Department

earlier than this. I just recently received it in the last couple of days. They wanted to straighten it out with HEW. HUD and HEW had different ideas about it. They have gotten together on it, and believe it is an affirmative program, and will be very helpful.

Mr. ASHLEY. If the gentleman will yield further, we had two sets of hearings with respect to the legislation before us. The amendment offered by my good friend from New Jersey may well be a meritorious one, but I submit that it is impossible to determine that in 15 or 20 minutes of discussion on what is most certainly a complex proposal.

Mr. ST GERMAIN. Mr. Chairman, I move to strike the requisite number of words.

If I might ask the gentleman from New Jersey for a little further information. This is brand new to me also. This is not a hospital, and not a nursing home, but does it live up to any of the requirements of a nursing home?

Mr. WIDNALL. Oh, yes. It would have to live up to standards set in the States by which they are licensed.

Mr. ST GERMAIN. Does the gentleman know which States have standards for these intermediatery sort of things, whatever they are?

Mr. WIDNALL. May I read to you from the CONGRESSIONAL RECORD of January 21, 1969, the statement that Senator MONTOYA made, who introduced this bill on the other side:

> There appears to be a great need for a program to provide for "sheltered care facilities" for the care of persons who, while not in need of nursing home care and treatment, nevertheless are unable to live fully independently and who are in need of minimum but continuous care provided by semi-professional personnel. This bill which I am introducing would make possible such sheltered care facilities.

Mr. ST GERMAIN. I asked the gentleman if he knows how many States, if any, do license this type of institution, and does the gentleman know whether it takes care of alcoholics, drug addicts, or what?

Mr. WIDNALL. It is presumed that the majority of these patients would be healthy ones. They do not need full hospitalization. It would enable them to obtain care and treatment at far less cost than in ordinary nursing home facilities.

Mr. ST GERMAIN. I ask the gentleman once again: Do any States have any licensing standards, or does HEW have any standards for this type of facility?

Mr. WIDNALL. It is provided in the bill that they should be subject to standards set up by the States that license them throughout the United States.

Mr. ST GERMAIN. I ask the gentleman once again: Have any States set up any standards?

Mr. WIDNALL. I believe they have, and I believe a number of the States presently have facilities that would fit into this category.

Mr. ST GERMAIN. I might say to the gentlemen I, too, would suggest that we wait until we write another housing bill next year. Would it not be wise to get a little more information on this subject and discuss it at length during the hearings? To the best of my knowledge this was not brought before the subcommittee because there was no information and we did not take any action on it. Insofar as its having been looked into during the hearings, there were no witnesses who testified on this subject during the course of our hearings.

Mr. WIDNALL. I would like to point out to the gentleman that the bill says that no such mortgage shall be insured under this section unless the Secretary has received such assurance as he may deem satisfactory from the State agency that such standards will be applied and enforced with respect to any such facility.

Mr. ST GERMAIN. Well, would it not be wise, I will say to the gentleman from New Jersey, to allow the Secretary, when we have our next hearings, to come up and describe this type of facility to us and let us know what the details are and how such a program is to be operated and then we can consider this in a deliberate fashion?

Mr. WIDNALL. What the gentleman from Rhode Island is talking about is again postponing action upon something that could provide immediate relief for many of our elderly or handicapped people.

Mr. ST GERMAIN. The point is this: We do not know that there is any need for this. There has been no testimony on it. No one is aware of the full import of such a program. We do not have the facts. Might I say I have never heard of the reasons for it. To the best of my knowledge I do not know of any State standards that now exist.

It seems to me that before we take this step—and I have nothing against providing for these needy people—let us find out what type of facility this is to be, because we all know that nursing homes were in existence and have been for a long time and, as a matter of fact, standards still have not been set, nationally, for nursing homes. They still do not have the regulations complete. I would not want to see the same situation apply here. If it is deemed necessary to have this kind of facility then we should go thoroughly into all questions pertaining thereto.

The CHAIRMAN. The time of the gentleman from Rhode Island has expired.

Mr. COLLIER. Mr. Chairman, I move to strike the requisite number of words.

First, let me say that my friend from Rhode Island has questioned whether or not there is a need for this type of housing facility. I am somewhat surprised that there is doubt because I do not believe there is a Member presently on this floor who does not realize that this is an area where there exists one of the greatest needs for housing in this country today.

What is proposed is not a new concept in financing, as I understand—and I believe I do—the type of facility that would be covered under this program, would be similar to the type of operation that many organizations have been operating throughout the country for years. In my own district, for example, there is a facility called the British Old People's Home. There is another called the Scottish Old People's Home. These are not nursing homes. They are merely housing facilities for the elderly—very necessary facilities, let me say, where older folk, most of whom have survived their spouses, are able to live at a comparatively low cost with people of their own age and station in life. These are not nursing homes, as we generally know them.

As I further understand this proposal, what this would do would be to make available FHA loans for the construction or the expansion of this type facility. May I ask the author of the amendment if that is correct?

Mr. WIDNALL. That is correct.

Mr. COLLIER. So that whatever existing standards there may be, whether they be in the jurisdiction of health department or other local authority as are the type facility that I previously described, such regulations would be applicable in these cases, would they not?

Now as to the investment of the Federal Government, that would be determined only to the extent that the loan for this construction would be in default since the FHA merely guarantees the loan or in entirely the same way it does in the standard loan or any type of construction or improvement loan. Is that correct?

Mr. WIDNALL. That is correct.

Mr. COLLIER. Then I cannot see that any problem exists in approving this proposal. As the gentleman from New Jersey has stated, how you could calculate the cost without knowing the number of applications or subsequent defaults would develop.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. COLLIER. I yield to the gentleman.

Mr. ST GERMAIN. The gentleman described the British home which I believe is in his district. Are these residents permanent residents?

Mr. COLLIER. Oh, yes, the facilities are housing facilities for older people.

Mr. ST GERMAIN. As I understand the way the gentleman from Illinois is describing it, he is referring to section 202, type housing.

Mr. COLLIER. It is my understanding that this is basically what it would be.

Mr. ST GERMAIN. Right. The gentleman from New Jersey explaining the amendment referred to States with the licensed professional personnel. Are there any licensed professional personnel in the British home?

Mr. COLLIER. Let me tell the gentleman that in any of these establishments, while there is not a license per se for the facilities, there is indeed a necessity to license certain types of professional and custodial help that serve the residents of these facilities.

Mr. ST GERMAIN. I will say to the gentleman that I am not opposed to the concept. The only thing I ask is that since there seems to be a little confusion here as a matter of fact, and the gentleman from Illinois and the gentleman from New Jersey describe it differently, why not wait a few months and have hearings and let us look at it a little more closely.

Mr. COLLIER. I have no objection to that, but I repeat to the gentleman that if ever there was a need for housing, this

is the type of housing that is sorely in demand in this country today. I support the gentleman's amendment.

Mr. PATMAN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I am sympathetic to anything the distinguished gentleman from New Jersey proposes. I am biased in his favor.

But in this case I feel, we are starting out on a program that we do not know anything about. We do not have any evidence. This is carrying medical care, if it is medical care, to a point that we have never gone before.

Page 2 of the amendment says, "the term intermediate care facilities"—you see this is not a hospital or a nursing home; it is something new. It is known as an intermediate care facility. It means "a proprietary facility or facilities to provide nonprofit corporation or association licensed or regulated by the State for the accommodation of persons who"—now who are these persons—they are not just older people because there is no age given—"for the accommodation of persons who because of incapacity or infirmities require minimum—require minimum but continuous care but are not in need of continuous or medical or nursing services."

Now this contains phrases for which there are no definitions. We do not know what they mean by "minimum care." I just feel the gentleman from New Jersey should, if he would, introduce a bill and I see no reason why our committee could not give consideration to it at the very first opportunity on its merits. If it is necessary, I think the Members will be fully sympathetic toward it. Now, we just have no adequate information to guide us, none in the world. So far as we know, that the number of cases like this could be very small, and how far it would go as to the flexibility of it and how it would be expanding in cost and everything else. I do not think anyone could comprehend what the possibilities are. We just do not have sufficient information.

I feel that the gentleman should ask that the amendment be withdrawn, and that he should either introduce a bill and have hearings on it and bring it to the floor on its merits, or the next time we have the hearings before the Housing Subcommittee to get up a housing bill, we will put it in there for consideration and have actual testimony from experts, people who know and who support the contentions in what this amendment implies. Then we would have something to go on. Otherwise, as much as I would like to support the gentleman from New Jersey, I would hesitate to do so under the circumstances.

Besides, may I invite the gentleman's attention to this. This amendment is in the Senate bill. Therefore, it is sure to be in conference. So why run the risk of doing something that will cement it into the law and it will not even be in conference? If we put this amendment in the bill today, and since it is in the Senate bill, when the conferees meet, they cannot even consider this. It will have been cemented into the law. So why should we run the risk of cementing this into the law now when we could go to conference on what the Senate has provided, the same thing, and if we find out it is good and we want to agree to it, we can agree to it then. We will have a chance to do so. If the gentleman withdraws his amendment, it would not kill the provision. It would not kill the bill at all. It would merely defer to the conference between the House and the Senate to take it up and consider it.

If the conferees agree to it, it will be accepted. If they do not agree to it, it will not be accepted. So I just wonder if the gentleman from New Jersey, in view of our inability to get sufficient facts to justify starting out on a new policy that is liable to involve billions of dollars, at a time when we are trying to cut down expenses and keep the Government from obligating itself as much as possible, whether or not we should do that. So I suggest to the gentleman that he consider that suggestion.

Mr. GROSS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this seems to be a propitious moment to ask the gentleman from Texas a question. Since the report does not bring together in one place the cost of this proposed legislation, could the gentleman give us some idea of the total?

Mr. PATMAN. I defer to the gentleman from New Jersey, who initiated the amendment, to do that.

Mr. GROSS. I am not talking about the amendment. I am talking about the entire bill.

Mr. PATMAN. Oh, about $3 billion.

Mr. GROSS. How Much?

Mr. PATMAN. It is $3 billion.

Mr. GROSS. How does this compare with the actual appropriations for last year?

Mr. PATMAN. I do not recall, but the gentleman has the figures available.

Mr. GROSS. I do not. Where are they?

Mr. PATMAN. They are in the Appropriations Committee.

Mr. GROSS. I am looking at your report, but I cannot get a handle on the amount or any comparison.

Mr. PATMAN. I can give it to the gentleman. I did not want to take up his time, but if he wants me to do so, here it is:

Mr. Chairman, there are only a few money authorizations in this bill. Altogether they add up to $3.1 billion. This amount, of course, would not be all spent in 1 year because of the long-term nature of urban development programs. The largest single item is $2 billion for the urban renewal program for the next fiscal year. This is a modest increase over the $1.75 billion authorized for the current year. The next largest item of the bill is the $750 million authorized to be appropriated for the model cities program for next year. This is the same amount that was originally requested by the previous administration for the current year. The third largest item is the authorization of an additional $150 million for loans to finance housing for the elderly. The bill also would authorize the appropriation of an additional $100 million for water and sewer grants.

Mr. GROSS. Wait a minute. Stop right there. For water and sewer grants?

Mr. PATMAN. Yes.

Mr. GROSS. Did we not just authorize or appropriate $600 million, or something like that amount, for grants for the same purpose?

Mr. PATMAN. No; that was the Public Works Committee. This relates generally to small towns that need sanitation and water facilities.

Mr. GROSS. Does that not have considerations of pollution?

Mr. PATMAN. No; this is not considered in the pollution appropriation.

Mr. GROSS. That was $600 million the other day, and there is another $400 million here.

Mr. PATMAN. That is out of public works.

Mr. GROSS. I understand that perfectly.

Mr. PATMAN. Well, there is a difference, because this is for homes.

Mr. GROSS. How about rent supplements? How much is in this bill for that purpose?

Mr. PATMAN. There is nothing here for rent supplements. Let me finish this. It will not take more than a minute.

The existing authority for each of the interest subsidy programs for homeownership and for rental housing would be increased by $25 million.

Finally, the bill would add $20 million in annual contribution contract authority to the public housing program to provide for modernization and rehabilitation of existing projects and would increase the interest subsidy for college housing by $4.2 billion.

Let me say to the gentleman that this is the smallest housing bill that has come to the floor in many years but it is an important one because these authorizations and the extensions of existing authority, including FHA mortgage insuring authority, are needed to continue our existing programs.

Mr. GROSS. If this is a small bill, I would hate to see a big one come out of the gentleman's committee.

Mr. DEL CLAWSON. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from California.

Mr. DEL CLAWSON. Mr. Chairman, I understand the gentleman from Texas said there was $2 billion in this for urban renewal programs. I believe we just passed an amendment for $1.5 billion, and that makes $3.5 billion immediately.

Mr. PATMAN. Mr. Chairman, will the gentleman yield for just one suggestion?

Mr. GROSS. I yield.

Mr. PATMAN. Mr. Chairman, the Senate bill authorizes $6.4 billion.

Mr. GROSS. I do not pay much attention to their asking price over there. They have the reputation of being the upping body of the Congress.

While the gentleman is on his feet, will he tell me, please, about the grants for fellowships, totaling $30 million, in this bill?

Mr. PATMAN. I do not see any fellowships in here.

Mr. GROSS. What are these fellowships? What do these fellows do?

Mr. PATMAN. There is nothing new in here for grants at all.

Mr. GROSS. There is $30 million on

page 29 for fellowships. What do these fellows do?

Mr. PATMAN. That is in existing law.

Mr. GROSS. I do not care whether it is existing or nonexisting law. I want to know what those fellows will do for $30 million.

Mr. PATMAN. This is only the authorization. We have to provide this in order for the Appropriations Committee to be able to pass on this.

Mr. GROSS. But the gentleman wants them to have $30 million?

Mr. PATMAN. Yes.

Mr. GROSS. What do they do?

Mr. PATMAN. It is subject to approval of the Appropriations Committee. They will go into this and make a good case or they will turn it down.

Mr. GROSS. Is there any member of the Banking and Currency Committee that can tell me what these $30 million fellows will do?

The CHAIRMAN. The time of the gentleman from Iowa has expired.

(By unanimous consent, Mr. GROSS was allowed to proceed for 2 additional minutes.)

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. Mr. Chairman, I would like to point out to the gentleman from Iowa, and I think he ought to know this, in the urban renewal planning and engineering areas we are short of this type training. These people will be trained and put right into the urban areas to study the urban areas, to study problems such as model cities and the like. If we do not train these people, they will be attracted to other areas and then later on we will have no knowledgeable person to carry on this type work. Hence the reason for the training and the fellowships.

Mr. GROSS. That is a dandy. It takes $30 million to get some fellows to tell us how to spend $3.5 or $4 billion? Is this what we are talking about?

Mr. BARRETT. Mr. Chairman, will the gentleman yield again?

Mr. GROSS. Do they have to be trained to take care of "Open Space, Urban Beautification, and Historic Preservation Grants"? Do we have to spend $30 million to be told how to handle that?

Mr. BARRETT. Mr. Chairman, I can say to the gentleman that part of the $30 million would be spent on those persons' training. If we do not do this, we would be putting amateurs in there.

Mr. GROSS. Or perhaps they will tell us how the pedestrians can walk in the malls or maybe about climate controls, whatever they are, to be installed in the malls.

Mr. BARRETT. It is certainly necessary to have knowledgeable and trained people.

Mr. GROSS. With 3 million employees already on the payroll, would we have to spend $30 million for that?

The CHAIRMAN. The time of the gentleman from Iowa has expired.

(On request of Mr. HANNA, and by unanimous consent, Mr. GROSS was allowed to proceed for 1 additional minute.)

Mr. HANNA. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I am glad to yield to the gentleman from California.

Mr. HANNA. I would suggest to the gentleman that the program referred to has had some rather important payout. It has been recognized by the gentleman's party, because Mr. Moynihan is one of the products of this kind of program. I notice he has just been elevated in the administration, so I would assume they feel it has some value.

Mr. GROSS. I do not know what the gentleman is talking about. It is a riddle to me.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. WIDNALL).

The question was taken; and on a division (demanded by Mr. WIDNALL) there were—ayes 39, noes 42.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. STEPHENS

Mr. STEPHENS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STEPHENS: On page 12, line 6, insert before the quotation mark the following new sentence: "Mortgages issued under title V of the Housing Act of 1949, except mortgages for above moderate income families issued under section 517(a) of such act, are eligible for purchase under this section."

Mr. STEPHENS. Mr. Chairman, section 111(j) of the act extends the special assistance provisions of the Government National Mortgage Association to the low- and moderate-income housing programs of the Department of Housing and Urban Development and only to these two programs. If HUD were extending its services equally to rural as well as urban America I would not move to change this section of the act. But anyone who is aware of the Nation's housing problems and what is being done about them knows that HUD has concentrated its efforts on large metropolitan areas and has left to the Farmers Home Administration of the Department of Agriculture the job of meeting the housing problems of rural America as best as this relatively small agency can.

By HUD's own admission, the housing problems of rural America are massive. Two-thirds of the Nation's substandard housing, 4.2 million units, are in rural areas. By the same token, rural America has nearly half of the Nation's poverty stricken. Both of these conditions exist despite the fact that rural areas have only 30 percent of the Nation's population.

I say these things, Mr. Chairman, to point up the inescapable conclusion that the housing problems of rural areas are proportionately far more severe than those of urban centers. Farmers Home is the only agency—for that matter the only financial vehicle—which is consistently supplying funds for low- and moderate-income housing in this vast section of the Nation. Local banks in many rural communities simply lack the capacity to make long-term home loans and meet the other credit needs of residents.

As you know, Farmers Home operates a direct, insured home loan program which is based on the revolving fund principle. As a result it must, as soon as possible, sell the mortgages it originates in order to continue to function. It almost ceased to function last spring when tight money, high interest conditions in the market, combined with the nonstandard character of its paper, prevented sale of a large amount of mortgages. At one point Farmers Home was told by the administration that it would have to close down if it did not dispose of its unsold paper. A temporary solution was later found when the Federal National Mortgage Association agreed to take $100 million in mortgages.

Mr. Chairman, the rural housing section of this bill contains provisions for streamlining the procedure for sale of Farmers Home paper. I will not go into that subject at this time. But I do want to stress the point that the specter of being confronted with a large amount of unsold paper is still a very real possibility in the future of the agency, especially since there is no indication of a letup in the prevailing tight money, high interest rate policies now being used to fight inflation and no assurance that FNMA will step into the picture again.

The logical solution to the problem is simply to extend the special assistance provisions of the Government National Mortgage Association to the Farmers Home low- and moderate-income housing programs which are comparable to those HUD programs sections 111(j) in its present form now covers. In this way some of the pressure on Farmers Home could be relieved during those times when there is a jam-up in the sale of mortgages it originates, notes which are backed by those mortgages, and mortgages which it must repurchase and sell for a second time on the market.

My proposal stems from one of a number of recommendations that were eventually produced in a joint study of rural housing conditions conducted by HUD and Farmers Home. Unfortunately the study was completed after the housing bill had been marked up and printed. Nevertheless, there is still an opportunity to embody the recommendation in the bill and I sincerely believe that it would be a serious oversight to fail to do so. I mentioned the idea expressed in the committee and at that time suggested the matter be required. However, I have altered that thought and my amendment does not direct action by GNMA.

Mr. Chairman, it is for these reasons as well as for reasons of justice and equity, that I offer my amendment to extend the provisions of section (j) to Farmers Home so that it will be able to meet the enormous housing problems of rural areas without the risk of being unnecessarily crippled.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I am glad to yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Chairman, I want to commend the gentleman from Georgia both for this amendment and for the work that he has done on this bill in trying to help rectify the situation which exists with regard to housing in rural areas and housing in smaller cities and towns in this country. For most of the

last 30 years people who have been migrating from one place to another and young couples have not been able to find a house in a rural area in a small town, with a small downpayment, because the programs have been administered in such a way that builders could not secure commitments for financing for the housing with a low downpayment.

There has been a rank discrimination against those who want to live in smaller towns in this country. Sewer and water programs and housing programs have been administered in a way that discriminated against those seeking housing in these more rural areas and small towns. This has resulted in a resistance to the natural spreading of the population to the extent that today the polls show that 35 percent of the people in this country would rather live in a smaller town or city than where they do live.

Too many people in both the executive and legislative branches of Government have erroneously assumed that everyone wants to live in a large city. Too many who groan about urban problems do not look at where these people are coming from and why. Some 50,000 per year migrate from the rural areas and small towns of one State to the ghettos and urban areas of the North and most of them would prefer to go to a smaller community, but the availability of housing under Federal programs has been greatly restricted in those rural areas. And, I think it is about time that we started to turn these programs around and to treat people in all areas on an equal basis.

Mr. Chairman, I want to commend the gentleman from Georgia for the good job wihch he has done, and urge adoption of the amendment.

Mr. STEPHENS. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. STEPHENS).

The amendment was agreed to.

The CHAIRMAN. Are there any further amendments to title I?

AMENDMENT OFFERED BY MR. RYAN

Mr. RYAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RYAN: Page 6, after line 10, insert the following new section:

"MAXIMUM RENTALS FOR UNITS IN SECTION 236 PROJECTS AND UNITS QUALIFYING FOR RENT SUPPLEMENT PAYMENTS

"SEC. 109. (a) The second sentence of section 236(f) of the National Housing Act is amended by striking out '25 per centum of the tenant's income' and inserting in lieu thereof '20 per centum of the tenant's income'.

"(b) Section 101(d) of the Housing and Urban Development Act of 1965 is amended by striking out 'one-fourth of the tenant's income' and inserting in lieu thereof '20 per centum of the tenant's income'."

And renumber the succeeding sections accordingly.

Mr. RYAN. Mr. Chairman, this amendment would lower from 25 percent to 20 percent the part of a tenant's income that is spent for rent in the section 236 program and in the rent supplement program.

The high costs of housing have caused serious problems for many tenants who cannot afford to pay 25 percent of their income for rent.

Under the section 235 homeownership program, the owner of a private home has to pay only 20 percent of his income. In addition, he receives a tax deduction on the interest payments that he makes.

However, the section 236 rentor not only has to pay 25 percent of his income, but receives no tax deduction. I believe that this glaring inequity must be corrected, and that the way to correct it is by lowering the figure to 20 percent for a tenant who pays rent or a cooperator who pays carrying charges.

The rent supplement program is also plagued by the problem of high rents. Large families are forced to pay rents that they are unable to afford.

My amendment would change the requirement that a rent supplement tenant pay 25 percent of his income for rent to 20 percent, as I have proposed for those affected by the section 236 program. The rent supplement program must be made relevant to the needs of the people it is supposed to serve.

As the cost of living rises and families face increased prices for food and other essentials, it is all the more difficult for them to allocate 25 percent of their incomes for rent. It is clearly unfair to require urban residents, who rent their apartments and for most of whom under present conditions homeownership is unobtainable, to pay a higher percentage of their income for housing under the section 236 program than homeowners, who have the added advantage of income tax deductions for their interest payments, are required to pay under the Section 235 program.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. RYAN. I would be happy to yield to the gentleman from Pennsylvania.

Mr. BARRETT. Mr. Chairman, I see no reason why we should oppose the gentleman's amendment. Therefore, if it is agreeable with the minority side, we will accept this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. RYAN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BRASCO

Mr. BRASCO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BRASCO: On page 12, after line 6, insert the following new section:

"RENT SUPPLEMENT UNITS IN SECTION 236 PROJECTS"

"SEC. 112. Section 101(j)(1)(D) of the Housing and Urban Development Act of 1965 is amended by inserting before the period a comma and the following: 'except that the foregoing limitation may be increased to 40 per centum of the dwelling units in any such property if the Secretary determines that such increase is necessary and desirable in order to provide additional housing for individuals and families meeting the requirements of subsection (c)'."

Mr. BRASCO. Mr. Chairman, this amendment would authorize the Secretary of Housing and Urban Development to increase to as high as 40 percent the maximum percentage of units in any section 236 project which may be occupied by tenants receiving the benefits of rent supplement payments.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. BRASCO. I yield to the gentleman from Texas.

Mr. PATMAN. Of course, this is not in the other bill and so far as I am concerned, if the minority is willing to accept it, we are willing to accept it.

Mr. WIDNALL. Mr. Chairman, the minority is unwilling to accept it.

Mr. PATMAN. Mr. Chairman, if the gentleman will yield further, I did not know it was in the Senate bill. I will withdraw the suggestion which I made. This would cement it in. The gentleman is all right now. It will be in conference anyway.

Mr. BRASCO. We have gone this far, Mr. Chairman, I thank the gentleman for his remarks, but I would like to continue.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. BRASCO. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. Would it not be advisable for the gentleman to withdraw his amendment and give us an opportunity to discuss it in conference? It is in the Senate bill. You run the risk of having your amendment defeated here. It may be better for you if we have the opportunity to discuss this in conference.

Mr. BRASCO. May I ask the distinguished chairman of the subcommittee, the gentleman from Pennsylvania (Mr. BARRETT), a question? Not being a member of the subcommittee—I was not at the subcommittee hearings with respect to this, but I understand that this was a matter that was discussed in subcommittee; was it not, in terms of having testimony presented for this particular amendment?

Mr. BARRETT. It was discussed in subcommittee. But I am pointing out the opposition of the minority to your amendment and it may be voted down here. I thought in the best interest of the gentleman from New York that he might withdraw his amendment and give us a chance to discuss it in conference.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. BRASCO. I yield to the gentleman.

Mr. ST GERMAIN. I might say to the gentleman that not only the minority objects to this, but there are Members on the majority side who disagree with this amendment also. This has been discussed at length in committee not only this year but in previous years.

If the gentleman is familiar with the background here, the whole reason for this limitation is that in addition to the rent supplement program providing housing, it provides a social mix. There is a sociological problem involved here.

For this reason, we have objected to too high a percentage. We do not want to make ghettos out of these rent supplement projects.

Mr. BRASCO. I thank the gentleman for his contribution. Inasmuch as we

have this expression of opinion by some Members of the majority and the minority, it does not leave me much to do except to proceed.

In any event, as I was saying, under existing law, only 20 percent of units in section 236 projects may be occupied by tenants receiving the benefit of rent supplements.

I wish to emphasize that this increase would not in any way be considered mandatory. The Secretary would be permitted to make such an increase only if he determined that it was necessary and desirable in order to provide additional housing for qualified tenants under the rent supplement program.

I believe that this flexibility would be most helpful in meeting the needs of many families trapped in the web of totally inadequate housing. This discretionary authority would be especially meaningful in our large metropolitan areas where it is obvious that a large number of low- and moderate-income families are in immediate need of housing and an adequate number of new units cannot—as we discussed all day today—cannot be built because of high construction, land, and interest costs.

By permitting section 236 projects to be occupied by a greater number of tenants receiving the benefit of rent supplement payments, we would provide the Secretary with an additional tool for combating the critical housing problems of our large cities.

Further, I want to make it emphatically clear that this amendment in no way involves the expenditure of additional funds. What it does is to enable present programs to assist twice as many people who qualify under the program that we enacted by permitting them additional housing in one project.

That is all it does. I suggest again, and all of us know the critical need for housing. The programs in question have been enacted for people we said we want to help, who have no place to go and unless we can increase this 20 percent to 40 percent, the programs are of no avail to them.

I would like to answer my good friend, the gentleman from Rhode Island, with respect to his observations. No one intends, and certainly I do not, by virtue of this amendment to complicate any additional problems that we already have by virtue of the fact that this amendment seeks to increase from 20 percent to 40 percent the number of housing units available to people eligible for rent supplements.

Certainly, I do not through the use of this amendment want to create any additional ghettos. But the fact is these projects are constructed right in the neighborhoods that we are trying to rebuild and the people who are going into them are basically from that community and the only difference that may separate some of them is that they have made some modest strides toward economic—not stability—but at least progress, so they are separated from their neighbors by a few dollars difference in income. We are talking of the same area. You are not talking about creating any additional problems.

I suggest that the 60/40-percent mix is not rocking the boat in any way, and I would hope that the House Members would see fit to support this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. BRASCO).

The question was taken; and on a division (demanded by Mr. BRASCO) there were—ayes 13, noes 29.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. RYAN

Mr. RYAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RYAN: Page 6, after line 10, insert the following new section:

"ASSISTANCE UNDER SECTION 236 AND RENT SUPPLEMENT PROGRAMS FOR RENTAL AND COOPERATIVE HOUSING PROJECTS BUILT WITH STATE OR LOCAL FINANCING

"SEC. 110. (a) Section 236(b) of the National Housing Act is amended by striking out 'which prior to completion of construction or rehabilitation is approved' and inserting in lieu thereof: 'which prior to completion of construction or rehabilitation, or prior to obtaining permanent financing, is approved'.

"(b) The second sentence of section 101 (b) of the Housing and Urban Development Act of 1965 is amended by striking out 'which prior to completion of construction or rehabilitation is approved' and inserting in lieu thereof: 'which prior to completion of construction or rehabilitation, or prior to obtaining permanent financing, is approved'."

And renumber the succeeding sections accordingly.

Mr. RYAN (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The gentleman from New York is recognized.

Mr. RYAN. Mr. Chairman, a major innovation of the Housing and Urban Development Act of 1968 was the section 236 interest subsidy program which has made it possible to hold rents down for lower income families through interest reduction payments. In addition to housing insured under section 236(j), Congress provided in section 236(b) that:

Interest reduction payments may be made with respect to a rental or cooperative housing project owned by a private nonprofit corporation or other private nonprofit entity, a limited dividend corporation or other limited dividend entity, or a cooperative housing corporation, which is financed under a State or local program providing assistance through loans, loan insurance, or tax abatements, and which prior to completion of construction or rehabilitation is approved for receiving the benefits of this section.

The House Subcommittee on Housing included this provision at my suggestion in order to make the section 236 interest subsidy program applicable to State and locally financed limited-profit middle-income housing, such as the New York State and city Mitchell-Lama programs. This type program exists in seven States—Connecticut, Illinois, Massachusetts, Michigan, New Jersey, New York, and Pennsylvania.

Last year's amendment required that approval for interest subsidies be given prior to completion of construction. Therefore, it did not apply to existing projects. At the same time, Mitchell-Lama housing was made eligible for rent supplements.

Many existing projects need assistance in order to keep rents, carrying charges, and interest rates within reach of middle-income residents. Therefore, I introduced H.R. 49—H.R. 4308 with cosponsors—to extend the section 236 interest subsidy and rent supplement programs to existing projects.

The purpose of my amendment is simply to extend the section 236 interest subsidy and rent supplement programs to State and municipally financed projects which have not obtained permanent financing although they may have been constructed or rehabilitated prior to 1968.

The problem is illustrated by the Mitchell-Lama program in New York—a program intended to provide middle-income housing. However, high interest rates and high construction costs, have resulted in rents and carrying charges that middle-income people are unable to afford. Many of the original tenants of Mitchell-Lama housing find it impossible to remain in their homes, having invested most of their savings to make the equity payments on their apartments.

The Mitchell-Lama program is in severe financial difficulty. Approximately 58,000 units of Mitchell-Lama housing built between 1963 and 1969—which originally was supposed to be financed at interest rates of 3 percent to 3½ percent—are on temporary financing at 4½ percent. It is expected that permanent financing will be at a rate of at least 6 percent. This means that families living in Mitchell-Lama developments will have to pay a large increase in their carrying charges—an increase of 20 percent or higher.

It is essential to keep carrying charges and rents at a level commensurate with the income of middle-income tenants.

Such a program would be less expensive for the Federal Government than the regular section 236 program. It would cost less to subsidize the interest rates on State and locally financed housing programs down to 1 percent than it would to do the same for a privately financed project. This is because the interest rates on housing projects like the Mitchell-Lama program are already below the regular market price.

Under the Mitchell-Lama program in New York, the State floats bonds, the proceeds of which may be lent to sponsors of middle-income housing. In order to be able to borrow funds, the sponsor must agree to limit his rate of return on the housing facility. Costs are also kept down by abatement or real estate taxes. A similar program exists in New York City. However, costs are on the rise—in 1961, the per room cost was $26. In 1968, it was $36. Today it is reaching $60.

This amendment will help to alleviate the crisis facing State and local housing programs, which has been caused by spiraling interest rates.

If our middle-income families are going to be able to stay in our inner cities, they will have to be able to find housing

within their financial ability. My proposal would make the continued existence of such housing possible.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. RYAN. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. The gentleman's amendment refers to the Mitchell-Lama Projects?

Mr. RYAN. That is correct.

Mr. BARRETT. The gentleman knows that this is a very complicated amendment. It needs to be studied further. I think the gentleman ought to give us an opportunity to bring this back into the committee next year, and certainly we will be glad to make a full study of it and do what we can to aid those people in the Mitchell-Lama projects. I would hope that the gentleman would withdraw his amendment at this time.

Mr. RYAN. Mr. Chairman, in view of the statement of the distinguished Chairman of the subcommittee and the assurances which he has given us that the committee will make a thorough study and investigation of the problem facing occupants of Mitchell-Lama type housing, and also in view of my own knowledge of the gentleman's expressed concern with this problem, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The amendment has been withdrawn.

If there was no further amendments to title I, the Clerk will read.

The Clerk read as follows:

TITLE II—URBAN RENEWAL AND HOUSING ASSISTANCE PROGRAMS

URBAN RENEWAL GRANT AUTHORITY

SEC. 201. (a) The first sentence of section 103(b) of the Housing Act of 1949 is amended by inserting before the period at the end thereof the following: ", of which increase at least $400,000,000 shall be for grants under part B, and which amount shall be further increased by $2,000,000,000 on July 1, 1970, of which increase at least 35 per centum shall be for grants under part B".

(b) The first paragraph of section 103(b) of such Act is further amended by adding at the end thereof (immediately after the sentence amended by subsection (a) of this section) the following new sentence: "In making any grants under this title, the Secretary shall give priority to applications for projects which are identified and scheduled to be carried out as projects or activities included within approved comprehensive city demonstration programs assisted under the provisions of section 105(c) of the Demonstration Cities and Metropolitan Development Act of 1966."

NEIGHBORHOOD DEVELOPMENT PROGRAMS

SEC. 202. (a) Section 131 of the Housing Act of 1949 is amended by striking out "annual" in subsection (b) and (c)(1) and inserting in lieu thereof "twenty-four month".

(b) Section 132 of such Act is amended—

(1) by striking out "twelve-month period" in subsections (a)(1) and (b) and inserting in lieu thereof "twenty-four month period"; and

(2) by striking out "twelve months" in subsection (a)(1) and inserting in lieu thereof "twenty-four months".

(c) Section 133(b) of such Act is amended by striking out "twelve-month period" and inserting in lieu thereof "twenty-four month period".

(d) Section 134(a) of such Act is amended by striking out "annual" in paragraphs (3) and (5) and inserting in lieu thereof "twenty-four month".

(e) Section 134(b) of such Act is amended to read as follows:

"(b) The approval by the Secretary of financial assistance for one or more twenty-four-month increments of a neighborhood development program shall not be considered as obligating him to provide financial assistance for subsequent increments; except that amounts approved by the Secretary for the succeeding twenty-four-month increment shall be reserved for obligation out of grant funds which may be provided under section 193(b) for the fiscal year applicable to such subsequent increment."

(f) The amendments made by this section shall apply with respect to contracts under part B of title I of the Housing Act of 1949 executed on and after July 1, 1970; and any contract under such part B executed prior to July 1, 1970, shall, at the request of the municipality involved, be amended (effective on or after such date) to reflect such amendments.

EXTENSION OF PERIOD OF ELIGIBILITY OF LOCAL GRANTS-IN-AID FOR CERTAIN URBAN RENEWAL AND NEIGHBORHOOD DEVELOPMENT PROJECTS

SEC. 203. (a) The second paragraph of section 110(d) of the Housing Act of 1949 is amended—

(1) by inserting "(except the second sentence of this paragraph)" after "any other provision of this subsection"; and

(2) by adding at the end thereof the following new sentence: "In connection with any project for which an application is filed not later than the date of the enactment of the Housing and Urban Development Act of 1969 and which has not received Federal recognition (other than a project to which clause (2) of the second sentence of section 133(a) applies), the three-year period referred to above shall be extended to a period of four years prior to the authorization by the Secretary of a contract for loan or capital grant for the project."

(b) Section 133(a) of such Act is amended—

(1) by striking out "For" and inserting in lieu thereof "Except as otherwise provided in this subsection, for";

(2) by striking out "the second paragraph" and inserting in lieu thereof "the first sentence of the second paragraph"; and

(3) by adding at the end thereof the following new sentence: "In connection with any neighborhood development program for which an application is filed not later than the date of the enactment of the Housing and Urban Development Act of 1969 and for which no contract for financial assistance under the program has been authorized by the Secretary, the three-year period referred to above shall be extended to a period of four years prior to authorization of (1) the first contract for financial assistance under the program which includes the urban renewal area benefited by the public improvement or facility for which credit is claimed, or (2) a contract for a loan or capital grant for an urban renewal project authorized after the date of the enactment of the Housing and Urban Development Act of 1969, in an area which is benefited by the public improvement or facility for which credit is claimed and which was included in the neighborhood development program application."

INCLUSION OF ENCLOSED PEDESTRIAN MALLS AS ELIGIBLE URBAN RENEWAL ACTIVITIES

SEC. 204. (a) Section 110(c)(3) of the Housing Act of 1949 is amended by inserting after "playgrounds," the following: "pedestrian malls and walkways (including in the case of an enclosed mall or walkway any necessary roofs, walls, columns, lighting, and climate control facilities),".

(b) The first sentence of the second unnumbered paragraph following paragraph (10) of section 110(c) of such Act is amended by inserting after "provided" the following: "in paragraph (3) with respect to enclosed pedestrian malls and walkways and as provided".

REHABILITATION GRANTS

SEC. 205. Section 115(c) of the Housing Act of 1949 is amended by striking out "or (2) $3,000" and inserting in lieu thereof "or (2) $3,500".

LOCAL GRANT-IN-AID CREDIT FOR CERTAIN FACILITIES BUILT ON BEHALF OF PUBLIC UNIVERSITIES

SEC. 206. Clause (A)(ii) of the second proviso in section 110(d) of the Housing Act of 1949 is amended by striking out "by a public university" and inserting in lieu thereof "by or on behalf of a public university".

INCOME LIMITATION UNDER REHABILITATION LOAN PROGRAM

SEC. 207. Section 312(a) of the Housing Act of 1964 is amended by striking out the last sentence and inserting in lieu thereof the following:

"In making loans with respect to residential property under this section, priority shall be given to applications made by persons whose annual income, as determined pursuant to criteria and procedures established by the Secretary, is within the limitations prescribed by the Secretary for occupants of projects financed with below-market interest rate mortgages insured (in the area involved) under section 221(d)(3) of the National Housing Act."

LOANS FOR PUBLIC HOUSING PROJECTS

SEC. 208. Section 9 of the United States Housing Act of 1937 is amended by striking out the third sentence.

PUBLIC HOUSING ANNUAL CONTRIBUTIONS

SEC. 209. (a) The proviso in section 10(b) of the United States Housing Act of 1937 is amended by inserting after "any contract" the following: ", although not limited to debt service requirements,".

(b) The first sentence of section 10(e) of such Act is amended by striking out "on July 1 in each of the years 1969 and 1970" and inserting in lieu thereof "on July 1, 1969, and $170,000,000 on July 1, 1970".

ROOM COST LIMITATIONS FOR PUBLIC HOUSING PROJECTS

SEC. 210. The first sentence of section 15(5) of the United States Housing Act of 1937 is amended by striking out "$2,400", "$3,500", "$4,000", and "$750" wherever they appear and inserting in lieu thereof "$2,640", "$3,850", "$4,400", and "$825", respectively.

MANAGEMENT AND SERVICES IN PUBLIC HOUSING PROJECTS

SEC. 211. The last sentence of section 15(10) of the United States Housing Act of 1937 is amended by striking out "July 1, 1970" and inserting in lieu thereof "July 1, 1971".

ELIMINATION OF WORKABLE PROGRAM REQUIREMENT WITH RESPECT TO LOW-RENT HOUSING IN PRIVATE ACCOMMODATIONS AND OTHER LOW-RENT PUBLIC HOUSING, AND WITH RESPECT TO MORTGAGE INSURANCE UNDER SECTION 221(d)(3) PROGRAM

SEC. 212. (a) Section 101(c) of the Housing Act of 1949 is amended—

(1) by striking out "or for annual contributions or capital grants pursuant to the United States Housing Act of 1937, as amended, for any project or projects not constructed or covered by a contract for annual contributions prior to August 1, 1956,";

(2) by striking out "or section 221(d)(3)";

(3) by striking out "(i)", and "or (ii) section 221(d)(3) of the National Housing Act

if payments with respect to the mortgaged property are made or are to be made under section 101 of the Housing and Urban Development Act of 1965,", in the first proviso; and

(4) by striking out "or a contract for annual contributions or capital grants was entered into pursuant to the United States Housing Act of 1937,".

(b) The second proviso in section 10(e) of the United States Housing Act of 1937 is amended by striking out "no such new contract" and all that follows down through "Housing Act of 1949, and".

(c) Section 23(f) of the United States Housing Act of 193' is amended by striking out all that follows "this Act" and inserting in lieu thereof 'shall not apply to low-rent housing assisted or to be assisted under this section."

AUTHORIZATION FOR HOUSING FOR THE ELDERLY OR HANDICAPPED

SEC. 213. Section 202(a)(4) of the Housing Act of 1959 is amended to read as follows:

"(4) There is authorized to be appropriated for the purposes of this section not to exceed $500,000,000, which amount shall be increased by $150,000,000 on July 1, 1969. Amounts so appropriated shall constitute a revolving fund to be used by the Secretary in carrying out this section."

AUTHORIZATION FOR COLLEGE HOUSING DEBT SERVICE GRANTS

SEC. 214. Section 401(f)(2) of the Housing Act of 1950 is amended by striking out all that follows "exceed" and inserting in lieu thereof "$20,000,000 which amount shall be increased by $4,200,000 on July 1, 1970."

Mr. PATMAN (during the reading). Mr. Chairman, since all Members have copies of the bill before them, I ask unanimous consent that further reading of title II be dispensed with, that it be printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there any objection to the request of the gentleman from Texas?

There was no objection.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: On page 20, line 9, insert "where it first appears" after "Act".

The committee amendment was agreed to.

AMENDMENT OFFERED BY MR. WIDNALL

Mr. WIDNALL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIDNALL: Page 17, after line 19, insert the following new section and renumber the remaining sections of Title II accordingly:

"SEC. 208. The proviso in the first paragraph of section 102(c) of the Housing Act of 1949 is amended by—

"(1) striking ', if';

"(2) striking ', the interest rate on such a loan from a source other than the Federal Government is greater than the rate at which funds could be made available under the Federal loan contract,';

"(3) striking 'from such sources' and inserting in lieu thereof 'from a source other than the Federal Government'; and

"(4) inserting 'or a supplemental grant in an amount which he determines is necessary to enable a local public agency to obtain funds from a source other than the Federal Government' immediately following 'contract rate'."

Mr. WIDNALL. Mr. Chairman, the urban renewal law presently authorizes the Secretary of Housing and Urban Development to make supplemental grants to local public agencies under certain circumstances so that these agencies may continue to secure loan funds for their urban renewal projects from private sources instead of borrowing from the Federal Government. This amendment would make the Secretary's present supplemental grant authority more flexible to enable him to cover some additional cases, not previously anticipated, which could arise because of changes in the money market. Without this amendment there could be cases where local public agencies would be forced to secure their loan funds from the Federal Government, even if the applicable rate of interest for a Federal loan is higher than the rate charged by the private lender.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman from Texas.

Mr. PATMAN. Mr. Chairman, in view of the gentleman's interest, we have given special consideration to this amendment and we are on this side willing to accept it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. WIDNALL).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PICKLE

Mr. PICKLE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PICKLE: Page 20, after line 11, insert the following new section:

"REVIEW OF RELOCATION PLANS UNDER URBAN RENEWAL PROGRAM

"SEC. 213. Section 105(c) of the Housing Act of 1949 is amended by adding at the end thereof the following new paragraph:

"'(3) Within one year after the date of enactment of this paragraph, and every two years thereafter, the Secretary shall review each locality's relocation plan under this subsection and its effectiveness in carrying out such plan.'"

And renumber the succeeding sections accordingly.

Mr. PICKLE. Mr. Chairman, yesterday in general debate I pointed out that the report indicated that there was no current plan to make a complete evaluation of relocation plans on urban renewal of neighborhood development programs. It was admitted that relocation of families is the biggest single worry we have in these two programs. While the urban renewal agencies have done commendable work, we all realize that we need to do better. The only way we know if these relocation plans are working satisfactorily or not is for us to be furnished with full, complete information by the Secretary. I do not think it is enough to suppose simply that this will be done by report in the next 2 or 3 years. I think we should direct the Secretary to make an immediate study and evaluation on relocation of families and make this report to the Congress within the next year. Thereafter it might be sufficient to require this report every 2 years.

I have talked with various groups in my own city of Austin, Tex., about this problem and I think we all recognize that we need to do all we can to see that the least inconvenience possible be made to those persons who are displaced. The study and evaluation directed by this amendment would be sizable but I think there is a need for it and I strongly recommend its enactment.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Texas.

Mr. PATMAN. Mr. Chairman, we have studied the amendment offered by the gentleman from Texas (Mr. PICKLE) and we on our side are willing to accept it. We think it is very reasonable and an improvement.

Mr. PICKLE. Mr. Chairman, I thank the chairman of the committee.

Mr. WIDNALL. Mr. Chairman, if the gentleman from Texas will yield, the minority finds the amendment acceptable and approves it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. PICKLE).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HANLEY

Mr. HANLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HANLEY: Page 15, after line 5, insert the following new subsection:

"(b) Section 112(b) of such Act is amended—

"(1) by striking out 'No expenditure' and inserting in lieu thereof 'Subject to the second sentence of this subsection, no expenditure'; and

"(2) by adding at the end thereof the following new sentence: 'In connection with any project for which an application is filed not later than the date of the enactment of the Housing and Urban Development Act of 1969 and which has not received Federal recognition (other than a project to which clause (2) of the second sentence of section 133(a) applies), the seven-year period referred to in clause (1) of the preceding sentence shall be extended to a period of eight years prior to the authorization by the Secretary of a contract for a loan or capital grant for the project.'"

Page 15, line 6, strike out "(b)" and insert "(c)".

Page 15, lines 19 through 21, strike out "the three-year period referred to above shall be extended to a period of four years" and insert "the three-year and seven-year periods referred to above shall be extended to periods of four and eight years, respectively,".

Page 15, line 24, after "facility" insert ", or the expenditures,".

Page 16, line 4, after "facility" insert ", or the expenditures,".

Mr. BARRETT (during the reading). Mr. Chairman, I ask unanimous consent to dispense with further reading of the amendment and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. HANLEY. Mr. Chairman, H.R. 13827 recognizes that communities which opted for neighborhood development programs instead of "lump sum" urban renewal programs are facing un-

due delays which are endangering certain local grants-in-aid which are charged against the local share. H.R. 13827 extends the 3-year limit to a 4-year limit for other eligible credits for public improvements or facilities for projects with pending applications.

It is felt that H.R. 13827 ought also to extend the time period devised for expenditures made by colleges and hospitals in urban renewal areas and which can be counted as local grants-in-aid. Section 112 of the Housing Act deals with this matter.

It is felt that Syracuse, and certainly other communities with pending applications for projects with heavy hospital and university participation are going to be losing credits which they have counted on solely because of the Federal delay now being experienced. We feel that H.R. 13827 ought to be amended to provide some consideration to section 112 credits that it provides to credits arising out of section 110(d).

Communities, in good faith, followed the urging of HUD and moved over to NDP, in the hope of moving faster on their projects. The damage and hard feelings created by the delays ought not to be compounded by the forced loss of needed credits against the local share.

Mr. MOORHEAD. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I yield to the gentleman from Pennsylvania.

Mr. MOORHEAD. Mr. Chairman, section 209 of the committee bill provides vital assistance to 15 local public housing authorities which are now threatened with bankruptcy because their rental income is too low to meet normal operating expenses.

As many Members know, public housing authorities in our large cities are being called upon to provide housing for a progressively larger proportion of the Nation's very poor families, and the rents these families can afford to pay simply cannot keep pace with sharply increasing operating costs. As a result, 15 housing authorities now face—and many others may soon face—serious financial problems because their normal operating expenses cannot be met out of project income.

Under existing law, the Federal Government makes annual contributions to local housing authorities in amounts necessary to assure the low-rent character of the projects. However, these contributions have been limited to amounts required to cover debt service on the capital cost of the project, even though amounts covering debt service are below the statutory maximum permitted under the U.S. Housing Act of 1937. The local authority is expected to cover operating expenses out of the project's rental income.

Section 209 would permit HUD to make annual contributions in excess of the project's debt service requirements. However, HUD could not make contributions in amounts higher than the statutory maximum permitted in the act—currently 7⅝ percent, the going Federal rate plus 2 percent, on the development cost of the project.

It is my understanding that, in the case of the 15 authorities in "serious financial condition," HUD intends to make contributions above debt service requirements only in the amounts necessary to meet each authority's operating deficit for the year. For example, if, first, the maximum annual contribution permitted by law were $10 million; second, the fixed contribution permitted for debt service were $6 million; and, third, the authority incurred a $1.5 million deficit in operating expenses, HUD would cover only the authority's $1.5 million operating deficit, even though the new formula would permit an additional subsidy of up to $4 million.

Mr. Chairman, this provision is essential in order to avert bankruptcy for housing authorities in 15 of our largest cities—Washington, D.C.; Kansas City, Mo.; San Francisco, Calif.; St. Louis, Mo.; Columbus, Ohio; New York City; New Haven, Conn.; Omaha, Nebr.; Boston, Mass.; Newark, N.J.; Chicago, Ill.; Los Angeles, Calif.; Philadelphia, Pa.; Louisville, Ky.; and Detroit, Mich. For fiscal year 1970, these authorities will need approximately $6.5 million in additional subsidy under the revised formula. In subsequent years, other authorities may well require similar assistance.

Mr. BARRETT. Mr. Chairman, if the gentleman from New York will yield, we have had an opportunity to examine the amendment and find no reason to oppose it.

Mr. WIDNALL. Mr. Chairman, if the gentleman will yield, we have no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. HANLEY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WEICKER

Mr. WEICKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEICKER: Page 20, after line 11, insert the following new section:

"REQUIREMENT OF SUBSTANTIAL RESIDENTIAL REDEVELOPMENT WHERE PROJECT INVOLVES DEMOLITION OR REMOVAL OF RESIDENTIAL STRUCTURES

"SEC. 213. Section 105 of the Housing Act of 1949 is amended by adding at the end thereof the following new subsection:

"'(h) In the case of any project which includes the demolition or removal of any residential structure or structures and which receives Federal recognition after the date of the enactment of this subsection (whether or not it is a project taken into account for purposes of applying subsection (f))—

"'(1) the redevelopment of the urban renewal area shall include the provision of standard housing units for low and moderate income families and individuals at least equal in number to the total number of dwelling units in the structure or structures demolished or removed; and

"'(2) the portion of the total cost of such redevelopment which is attributable to the provision of standard housing units for low and moderate income families and individuals (as determined by the Secretary) shall be at least 35 per centum or, if greater, a percentage bearing the same ratio to 100 as the total appraised value of such residential structure or structures bore to the total appraised value of all the structures in the urban renewal area immediately prior to their demolition or removal (as determined by the Secretary, without regard to any decrease in such value which may have resulted from the imminence of such demolition or removal).'"

And renumber the succeeding sections accordingly.

Mr. WEICKER. Mr. Chairman, this amendment adds a direction, not money, to the bill.

At the present time when the term "urban renewal" is used it is the general belief that housing is involved. On the other hand, as urban renewal has been actually used I would say the emphasis has been placed not on housing but on office complexes and shopping centers.

It is all right to go ahead and say that relocation takes care of that problem. I supported and was delighted to support the amendment of the gentleman from Texas. But the fact remains that no new housing is created in a city through relocation.

The Urban Renewal Act, as it now stands, does not have any requirement for housing. Only if housing is a part of the urban renewal plan is it then necessary to have a percentage go into low- and moderate-income housing. But there is no requirement that there be any housing whatsoever.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. WEICKER. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. I want to call attention to the fact that there is a requirement here. I read the following:

The Senate bill contained a provision requiring that a majority of the housing units in urban renewal areas to be developed for predominately residential uses be for low- and moderate-income families. The House amendment required that a majority of the housing units in each community's urban renewal projects to be developed for predominately residential uses be for low and moderate income families and that at least 20 percent of the total units in such projects in each community be for low-income families.

Mr. WEICKER. With due respect to the gentleman from Pennsylvania, the fact remains this is exactly the point I am trying to make. If housing is called for in the plan then, yes, 20 percent has to be devoted to low- and moderate-income housing. The way the law presently reads there is no requirement there be any housing in the plan whatsoever.

What is happening is that they go into areas, raze the residential substandard housing, and put in shopping centers and office complexes. They are not replacing them with any new housing. That is the fact of the situation.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. WEICKER. I yield to the gentleman from Ohio.

Mr. ASHLEY. Does the gentleman really mean to say that we in Washington should determine for the local communities the kind of renewal they should have?

Mr. WEICKER. No. I do not mean to say that.

Mr. ASHLEY. But that is what the gentleman's amendment would do.

Mr. WEICKER. All right. Then if the

gentleman puts that interpretation on it, he is entitled to do so. What I am saying is that as far as urban renewal is concerned, if the area contains no housing there is no requirement that any housing be put back into it, but where housing—residences—are being razed, there should be some requirement that a certain minimum number should go back in. At the present time, certainly in the cities in the Northeast, they do not have this requirement. Relocation creates nothing new. Cities go ahead and ask the surrounding towns why they do not go ahead and take care of their own particular problems. As far as this program is concerned, it is not urban renewal, but is urban withdrawal now.

This amendment very simply gives direction. It does not cost 1 cent. The amendment says, and I repeat, that when housing is to be torn down in an area scheduled for urban renewal, then said plan of renewal shall call for at least an equivalent number of standard housing units.

This amendment says that the consideration of building up the tax list going on in the cities cannot override the priority of building decent homes.

If the surburbs are bedroom towns, then the cities in my State are becoming office, shipping center complexes. That is not urban renewal; it is urban withdrawal.

If under present practical use of our urban renewal laws urban renewal has become comfortable and secure because it rests on the affluence of commerce, then I believe the time has come to remind the potential users of these funds that the Federal role is a gamble for people, not a sure loan for beauty, convenience, and profits.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. WEICKER. I yield to the gentleman from New Jersey.

Mr. WIDNALL. In connection with the existing housing law, it provides that in a residential renewal project at least 20 percent must be for low-income housing. Would your amendment affect the existing law?

Mr. WEICKER. Yes; to the extent where your amendment takes over there is a plan for housing, but the situation I am trying to cover here is when there is an urban renewal project and there is no plan for housing whatsoever, yet housing has been torn down, yes, it makes the community recognize that it has been torn down, and makes it put it back into the housing stream.

Mr. WIDNALL. I thank the gentleman.

Mr. BARRETT. Mr. Chairman, I rise in opposition to the amendment. The urban renewal law already includes carefully worked out language to assure the production of housing for low- and moderate-income families. In committee and in conference we worked hard to perfect this language, and in my judgment it would be an error to accept this statement without careful study. The fact is that many urban renewal projects are aimed at reducing overcrowing in our cities and it would be a mistake to require a unit-for-unit replacement in every case. Moreover, to achieve the income balance which is generally considered desirable, it would be a mistake to make urban renewal projects simply new income ghettos. Also the amendment fails to recognize the need for some commercial redevelopment where this is desirable for the neighborhood and for the city as a whole. The objective of the gentleman from Connecticut is laudable but the problem is too complex to be met with oversimplified language like this. The provision of low- and moderate-income housing is not the responsibility of urban renewal alone, but calls for the use of all of our housing programs including our urban renewal programs, public housing, interest subsidies, below-market interest rate loans, housing for the elderly, and so forth. Let me assure the gentleman that the committee is working to achieve his goal but I hope that this amendment will be defeated.

Mr. WEICKER. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. Yes, I would be glad to yield to the gentleman.

Mr. WEICKER. Is it not true that many of the subsequent programs that have come forth in the housing field might very well be the product of the urban renewal program in that it has displaced people insofar as housing is concerned but did not create any new housing and thus it might also be true that Federal funds used for urban renewal have created a housing problem in this field?

Mr. BARRETT. I would say to the gentleman that this is probably right in some cities. But there are many other cities that have been very, very careful on relocation of families as well as businesses and have done a wonderful job.

Mr. WEICKER. Mr. Chairman, if the gentleman will yield further, would the gentleman indicate as to whether or not relocation does not create a new housing development?

Mr. BARRETT. Relocation in some respects creates housing.

Mr. WEICKER. Creates new housing?

Mr. BARRETT. The relocation procedure, of which I am speaking, is to use existing housing. It is supervised very carefully to see that those people who are relocated from a slum live in a better home. We want the people who live in the urban renewal neighborhood to have a better environment in the new area in which they are relocated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. WEICKER).

The question was taken; and on a division (demanded by Mr. WEICKER) there were—ayes 26, noes 27.

Mr. WEICKER. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. WEICKER and Mr. PATMAN.

The Committee again divided, and the tellers reported that there were—ayes 48, noes 50.

So the amendment was rejected.

The CHAIRMAN. Are there any further amendments to title II? If not, the Clerk will read.

The Clerk read as follows:

TITLE III—MODEL CITIES AND METROPOLITAN DEVELOPMENT PROGRAMS

AUTHORIZATION FOR MODEL CITIES PROGRAM

SEC. 301. (a) Section 111(b) of the Demonstration Cities and Metropolitan Development Act of 1966 is amended—

(1) by striking out "and" the third time it appears;

(2) by inserting before the period at the end thereof the following: ", and not to exceed $750,000,000 for the fiscal year ending June 30, 1971"; and

(3) by adding at the end thereof the followng new sentence: "Under regulations prescribed by the Secretary, 10 per centum of the amounts appropriated pursuant to this subsection for the fiscal year ending June 30, 1970, and for any fiscal year thereafter shall be used for assistance to city demonstration agencies in smaller cities, and may be so used (to the extent specifically provided in such regulations) without regard to the limitation set forth in the first sentence of section 105(c)."

(b) Section 111(c) of such Act is amended by striking out "1970" and inserting in lieu thereof "1971".

AUTHORIZATION FOR COMPREHENSIVE PLANNING GRANTS

SEC. 302. The fifth sentence of section 701 (b) of the Housing Act of 1954 is amended by striking out "and not to exceed $390,000,000 prior to July 1, 1970" and inserting in lieu thereof "and not to exceed $390,000,000 prior to July 1, 1971".

URBAN INFORMATION AND TECHNICAL ASSISTANCE SERVICES

SEC. 303. (a) Section 701(a) of the Housing Act of 1954 is amended—

(1) by striking out "and" at the end of paragraph (10);

(2) by striking out the period at the end of paragraph (11) and inserting in lieu thereof "; and"; and

(3) by adding after paragraph (11) the following new paragraph:

"(12) States, including statewide agencies or instrumentalities of a State or its political subdivisions which are designated by the Governor of the State and acceptable to the Secretary, for programs focused upon the needs of communities having populations less than one hundred thousand which provide information and data on urban needs and urban assistance programs and activities and technical assistance to such communities with respect to the solution of local problems."

(b) Title IX of the Demonstration Cities and Metropolitan Development Act of 1966 is repealed.

AUTHORIZATION FOR OPEN SPACE, URBAN BEAUTIFICATION, AND HISTORIC PRESERVATION GRANTS

SEC. 304. The first sentence of section 702(b) of the Housing Act of 1961 is amended by striking out "and not to exceed $460,000,000 prior to July 1, 1970" and inserting in lieu thereof "and not to exceed $460,000,000 prior to July 1, 1971".

AUTHORIZATION FOR NEW COMMUNITY SUPPLEMENTARY ASSISTANCE GRANTS

SEC. 305. Section 412(d) of the Housing and Urban Development Act of 1968 is amended by striking out "July 1, 1970" and inserting in lieu thereof "July 1, 1971".

COMMUNITY FACILITIES GRANTS

SEC. 306. (a) Section 708(b) of the Housing and Urban Development Act of 1965 is amended by striking out "1970" and inserting in lieu thereof "1971".

(b) The second sentence of section 708(a) of such Act is amended by inserting before the period at the end thereof the following: ", and not to exceed $100,000,000 for the fiscal year commencing July 1, 1970".

TRAINING AND FELLOWSHIP PROGRAMS

SEC. 307. Title VIII of the Housing Act of 1964 is amended to read as follows:

"TITLE VIII—TRAINING AND FELLOWSHIP PROGRAMS

"FINDINGS AND PURPOSE

"SEC. 801. (a) The Congress finds that the rapid expansion of the Nation's urban areas and urban population has caused severe problems in urban and suburban development and created a national need to (1) provide special training in skills needed for economic and efficient community development, and (2) support research in new or improved methods of dealing with community development problems.

"(b) It is the purpose of this title to provide fellowships for the graduate training of professional city planning and urban and housing technicians and specialists, and to assist and encourage the States, in cooperation with public or private universities and colleges and urban centers and with business firms and associations, labor unions, and other interested associations and organizations, to (1) organize, initiate, develop, and expand programs which will provide special training in skills needed for economic and efficient community development to those technical, professional, and other persons with the capacity to master and employ such skills who are, or are training to be, employed by a governmental or public body which has responsibility for community development, or by a private nonprofit organization which is conducting or has responsiility for housing and community development programs, and (2) support State and local research that is needed in connection with housing programs and needs, public improvement programing, code problems, efficient land use, urban transportation, and similar community development problems.

"FELLOWSHIPS FOR CITY PLANNING AND URBAN STUDIES

"SEC. 802. (a) The Secretary is authorized to provide fellowships for the graduate training of professional city planning and urban and housing technicians and specialists as herein provided. Persons shall be selected for such fellowships solely on the basis of ability and upon the recommendation of the Urban Studies Fellowship Advisory Board established pursuant to subsection (b). Fellowships shall be solely for training in public and private nonprofit institutions of higher education having programs of graduate study in the field of city planning or in related fields (including architecture, civil engineering, economics, municipal finance, public administration, and sociology), which programs are oriented to training for careers in city and regional planning, housing, urban renewal, and community development.

"(b) There is hereby established the Urban Studies Fellowship Advisory Board (hereinafter referred to as the 'Board'), which shall consist of nine members to be appointed by the Secretary as follows: Three from public institutions of higher learning and three from private nonprofit institutions of higher education, who are the heads of departments which provide academic courses appropriately related to the fields referred to in subsection (a), and three from national organizations which are directly concerned with problems relating to urban, regional, and community development. The Board shall meet upon the request of the Secretary and shall make recommendations to him with respect to persons to be selected for fellowships under this section. Members of the Board shall be entitled to receive transportation expenses and a per diem in lieu of subsistence as authorized for members of advisory committees created pursuant to section 601 of the Housing Act of 1949.

"MATCHING GRANTS TO STATES

"SEC. 803. (a) Subject to the provisions of this title and in accordance with regulations prescribed by him, the Secretary may make matching grants to States to assist in—

"(1) organizing, initiating, developing, or expanding programs to provide special training in skills needed for economic and efficient community development to those technical, professional, and other persons with the capacity to master and employ such skills who are, or are training to be, employed by a governmental or public body which has responsibilities for community development, or by a private nonprofit organization which is conducting or has responsibility for housing and community development programs; and

"(2) supporting State and local research that is needed in connection with housing programs and needs, public improvement programing, code problems, efficient land use, urban transportation, and similar community development problems, and collecting, collating, and publishing statistics and information relating to such research.

"(b) No grants may be made to a State under this section unless the Secretary has approved a plan for the State which—

"(1) sets forth the proposed use of the funds and the objectives to be accomplished;

"(2) explains the method by which the required amounts from non-Federal sources will be obtained;

"(3) provides such fiscal control and fund accounting procedures as may be reasonably necessary to assure proper disbursement of, and accounting for, Federal funds paid to the State under this section;

"(4) designates an officer or agency of the State government who has responsibility and authority for the administration of a statewide research and training program as the officer or agency with responsibility and authority for the execution of the State's program under this section; and

"(5) provides that such officer or agency will make such reports to the Secretary, in such form, and containing such information, as may be reasonably necessary to enable the Secretary to perform his duties under this section.

"(c) No grant may be made under this section for any use unless an amount at least equal to such grant is made available from non-Federal sources for the same purpose and for concurrent use.

"STATE LIMIT

"SEC. 804. Not more than 10 per centum of the total amount appropriated for the purposes of this title may be used for making grants to any one State.

"TECHNICAL ASSISTANCE, STUDIES, AND PUBLICATION OF INFORMATION

"SEC. 805. In order to carry out the purpose of this title, the Secretary is authorized to provide technical assistance to State and local governmental or public bodies and to undertake such studies and publish and distribute such information, either directly or by contract, as he shall determine to be desirable. Nothing contained in this title shall limit any authority of the Secretary under any other provision of law.

"APPROPRIATIONS

"SEC. 806. There is authorized to be appropriated for the purpose of making grants and providing fellowships under this title, without fiscal year limitation, not to exceed $30,000,000. Any amounts appropriated under this section shall remain available until expended.

"MISCELLANEOUS

"SEC. 807. (a) As used in this title the term 'State' means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands; and the term 'Secretary' means the Secretary of Housing and Urban Development.

"(b) There are authorized to be appropriated such sums as may be necessary for administrative and other expenses in carrying out this title."

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments: On page 23, strike out lines 16 through 18 and insert:

"SEC. 306. (a) Section 702(c) of the Housing and Urban Development Act of 1965 is amended by striking out '1969' in clause (2) and inserting in lieu thereof '1970'.

"(b) Section 708(b) of such Act is amended by striking out '1970' and inserting in lieu thereof '1971'."

And on line 25 strike out "(b)" and insert "(c)".

The committee amendments were agreed to.

AMENDMENT OFFERED BY MR. WIDNALL

Mr. WIDNALL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIDNALL: Page 24, after line 3, insert the following new section:

"URBAN MASS TRANSPORTATION

"SEC. 307. (a) The first sentence of section 4(b) of the Urban Mass Transportation Act of 1964 is amended—

"(1) by striking out 'and' the second time it appears; and

"(2) by striking out the period and inserting in lieu thereof '; and $300,000,000 for fiscal year 1971.'

"(b) Section 5 of such Act is amended by striking out '1970' and inserting in lieu thereof '1971'."

And renumber the succeeding section accordingly.

Mr. WIDNALL. Mr. Chairman, as is becoming more abundantly apparent day by day, one of the major problems facing our cities is the crisis in public transportation. Right here in Washington, most of us get a daily demonstration of the snarled traffic, the increased pollution, the delay, waste, and frustration that ever increasingly blight our urban areas, both large and small.

In August, I had introduced the most massive, long-range, and comprehensive transit program ever submitted to the Congress, the administration's 12-year, $10 billion program, the Public Transportation Assistance Act of 1969.

This bill would offer the long-term Federal commitment that our cities find so necessary as they seek large matching sums locally to fund the programs which will keep our urban areas from the strangulation that is engulfing them.

Hearings on the administration's bill will be held in the near future before the Subcommittee on Housing of the Banking and Currency Committee. But, pending the passage of that legislation, it is important that we take steps to insure the continuity of the present public transportation program.

Since the beginning of the program with the Urban Mass Transportation Act of 1964, a 1-year advance appropriation has been provided. The most recent was under the Housing and Urban Develop-

ment Act of 1968, when advance appropriations were made for fiscal years 1969 and 1970.

I am, therefore, introducing an amendment authorizing an advance appropriation of $300 million for fiscal year 1971, and thus insuring the continuity of the public transportation program pending the passage of major new legislation.

The 1-year extension would, of course, be superseded should the new program be passed during this fiscal year.

I call for acceptance of this amendment as a step in the all-out attack so necessary if we are to keep the flow of goods and people in our Nation's cities from grinding to a virtual standstill.

Mr. HANNA. Mr. Chairman, the purpose of the amendment is to extend for 1 year the urban mass transportation program, to June 30, 1971. Its adoption is necessary if a serious break in the continuity of the program is to be avoided pending enactment of the new program which was only 2 weeks ago, sent to the Congress.

The amendment has two facets. First, it provides an additional authorization of the $300 million to fund the program through fiscal year 1971. This step would square with the practice followed from the beginning of the program in 1964. In fiscal year 1969, for example, funds were appropriated for fiscal 1970—the year beginning July 1, 1969, and ending June 30, 1970. The extension of the expiration date and the parallel increase in the authority would permit advance funding of the program for fiscal 1971, this fiscal year. The major advantage of advance planning is that it enables both the grantors and the grantee to better plan and program urban transportation projects.

This amendment also extends for 1 year the provisions of the act allowing jurisdictions which are in the process of meeting the comprehensive planning requirements set by HUD to receive limited urban mass transportation assistance. The burden of this planning requirement is heavy. Many jurisdictions—large and small—have not satisfied it. To date less than 30 jurisdictions have passed the test imposed by DOT. Their failure to do so is a product of the complexity of the requirement and the resultant cost of meeting it. Federal urban planning assistance funds have not been available in sufficient supply to significantly assist communities in satisfying the standard. Many jurisdictions, I am told, are nearing completion of their plans. Hopefully this 1-year extension recommended will provide ample time for all of them to pass the test.

The administration has posed no objection to the amendment. I have a letter to this effect signed by Under Secretary James M. Beggs. It is dated October 21, 1969. I insert it in the RECORD at this point:

THE UNDER SECRETARY OF TRANSPORTATION,
Washington, D.C., October 21, 1969.

Hon. RICHARD T. HANNA,
House of Representatives,
Washington, D.C.

DEAR MR. HANNA: This will confirm my telephone conversation in which I stated that the Department of Transportation has no objection to an amendment for the inclusion of the 1971 budget authorization of $300 million for the Urban Mass Transportation Administration's program. This is, of course, in consonance with the Public Transportation Assistance Act of 1969, which would provide this same amount of money in 1971 as contract authority.

As you know, we are currently working with the Senate Committee on Banking and Currency to work out a five year contract authority in the amount of $3.1 billion with a limitation of expenditures for each of the five years.

Sincerely,

JAMES M. BEGGS.

Mr. Chairman, in closing let me emphasize that this is a temporary stopgap measure intended only to insure no lapse in the program during the period that we are considering the new urban mass transportation measure. I urge my colleagues to join me in enacting this necessary measure.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the chairman of the committee.

Mr. PATMAN. Members on our side have studied the gentleman's amendment and we think it is a worthy amendment. It is very constructive, and we are willing to accept it.

Mr. WIDNALL. I thank the Chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. WIDNALL).

The amendment was agreed to.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. The gentleman from Connecticut is recognized.

Mr. GIAIMO. Mr. Chairman, I do not intend to offer an amendment at this time, but I would like to make reference to one of the practices which has been taking place in the model cities program, and that is in regard to the requirement of section 103 of the basic act, which states that communities may be eligible for assistance only if, among other things, the plan provides for widespread citizen participation in the program. I am not opposed to widespread citizen participation in these programs, but this language grew out of the theory which began in the Congress over the past several years, that the way to get many of our urban programs moving was to bypass established local government and the mayor's office, and to put the authority in citizens' councils, unofficial citizens groups, and the like. This also has taken place in some of our model cities programs. The result has been, in my opinion, a slowdown in the development of programs and a slowdown in getting maximum feasible model cities programs into existence and operation. Although we wish to have widespread advisory citizen participation, the responsibility and the authority for model cities programs, in my opinion, should and must reside in the local government.

I am delighted that from testimony and from statements of the present Secretary of Housing and Urban Development he intends to go in this direction. As a result of hearings we have had before the Independent Offices Subcommittee of the Appropriations Committee on changes in the model cities program, I am convinced in my own mind that HUD intends to more strongly vest authority for model cities programs in the local government.

I would hope that as a result of this discussion today HUD will be encouraged to emphasize this new direction in the model cities program. Quite frankly, I think it a worthwhile new direction.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Ohio.

Mr. ASHLEY. I am a little surprised at the comments of the gentleman because I thought that the basic act made it abundantly clear that the ultimate responsibility vested with the local governing authorities. The city councils, after all, must approve the model cities applications. The act makes it clear that it is the local governing bodies that do have basic and final authority and responsibility for the implementation of the model cities program. Is that not so?

Mr. GIAIMO. Mr. Chairman, I am sorry if the gentleman is surprised. The gentleman and I both have been in Congress for enough years to know that in many instances—in this case, in the case of OEO, in the case of juvenile delinquency, and in other cases—we often write basic law in this Chamber, only to find that the guidelines and regulations of the agencies involved have literally thwarted that law and done other than as we intended. This has happened in some of the cities. I am delighted the new Secretary of Housing and Urban Development has said definitely he will vest decisive power in the local government.

Mrs. GREEN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentlewoman from Oregon.

Mrs. GREEN of Oregon. Mr. Chairman, I would like to associate myself with the remarks made by the gentleman from Connecticut. May I cite a situation in my area in Portland. This was in public housing but in a "model cities" area. After the PHA Commissioners, who were, after all, volunteering their efforts, had spent countless hours on the public housing plan in the model cities area and had gone to regional offices of the HUD Department and received tentative approval, they were advised by the regional HUD representative, they would have to have the approval of the citizens' advisory committee.

I am also advised the public housing units—duplexes—had been approved by the city council and the planning commission. With the amount of money available under the lease turnkey plan—they could have more units if the contractor built duplexes. More families could be accommodated. Land costs, per unit, would be lower. But the citizens' advisory committee then met and vetoed this and said they would not allow those, they would not give their approval to any construction of duplexes. They demanded single-family dwellings. Already months of delay had occurred; construction costs were up. Therefore the housing authorities had to go through all of the roadblocks and all of the plans which they had laboriously gone through for several months prior to this time.

It seems to me this is something which

should not be allowed. I join with the gentlemen in hoping the new Secretary would see that the citizen participation does not come to the place where the citizens' advisory committee and not the Public Housing Commissioners are going to be administering the program and have veto power over plans approved by the Public Housing Authority, approved by the City Council, approved by the Planning Commission.

By what authority, in this instance, did the regional HUD office in San Francisco require citizens' advisory committee approval before the Public Housing officials could proceed with the program? It was a disservice, increased the costs and decreased the number of units that could be made available. So-called advisory committees without knowledge, without experience, without responsibility for what happens can exercise new found authority but sometimes with disastrous results. Let us return the authority and responsibility to the duly elected and/or appointed officials. They have been chosen through the democratic process.

Mr. FARBSTEIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the legislation.

Mr. Chairman, the fact that H.R. 13827 fails to excite the imagination as did the Housing and Urban Development Act of 1968 is easy to understand. The broad and bold features of that landmark measure were the culmination of many years of thinking, fortunate timing, and a vigorous public concern with the housing problems of our Nation. We had the Douglas Commission, the Kaiser Commission and many other manifestations of that interest and concern, which are apparently absent today.

But that this bill fails to face up to two of the great needs of the housing sector is not so easily explained away. The bill fails to come to grips with the economic realities of urban housing costs. It establishes a limitation on construction cost per room which will mean that no new public housing can be constructed under Federal financing in the cities of New York, Boston, and San Francisco. The bill fails, as well, to come to grips with the problem of urban space by making no proviso for the disposal of excess Federal property at a reasonable price for low- and moderate-income housing. In both these areas, the Senate has demonstrated a boldness which the House, unfortunately, is unwilling to emulate.

The existing cost limits per unit of public housing has made it virtually impossible for the New York City Housing Authority to construct any new residential structures in the past year. Indeed, the only residential construction which has taken place occurred in connection with two facilities in model cities areas and then only because the city was willing to put up huge monetary subsidies to bring the Federal cost per unit down below the statutory limit.

Otherwise no public residential construction has taken place in New York despite the huge need for residential units in the low-income price range. For some units, the housing authority has taken bids, but they so far exceeded the statutory limits that they could not be built. For others, the architects' estimates made it abundantly clear that it was not even worth taking bids, so great was the discrepancy between the minimal cost per room in New York City and the statutory ceiling.

The existing limits on construction cost per room for public housing are just not realistic and simply serve to prevent the construction of any new public housing in New York. If they are not substantially increased, the housing crisis in New York City and almost every other city in the United States is just going to get worse and worse until no one but the slum dweller and the gold coast resident will be able to afford to live in any large central city.

The Senate increase in the limits barely brings them within the scale of New York City's housing costs. The 10-percent increase provided for in the House bill does not even begin to come close to the need. According to the National Association of Housing and Redevelopment Officials, it would still leave New York, San Francisco, and Boston unable to construct any new public housing units and would mean that many other cities would also be priced out of the market within a few months.

Another major obstacle to the construction of low- and moderate-income housing in our central cities is simply the unavailability of space upon which to construct residential units and the excessively high cost of the land that is available.

All too often the Federal Government has surplus property located in or near residential areas in our central cities which could be used to alleviate the shortage of low- and moderate-income housing units; but because section 203 (a) (3) (G) of the Federal Property and Administrative Services Act requires the Government to secure "fair market value" on the sale of its excess real property, only the commercial or high income residential builder can afford to acquire the sites.

Section 412 of the Senate version of the bill we have before us today faces this problem squarely by making provision for the sale of underutilized land by the Department of Housing and Urban Development at an economic value commensurate with the use to which the property will be put. This will enable low- and moderate-income housing to be built on the many unused sites the General Services Administration estimates exist in our central cities. Precedent for permitting the sale of surplus Government property for low-income housing for less than fair market value is found in the urban renewal law, which provides for partial Federal compensation for local jurisdictions for acquisition of Federal property for low-income housing.

Unfortunately, as was the case with the cost-per-room limitation on public housing, the bill we have before us fails to face up to an urgent housing need in this country.

The bill before us is not totally without redeeming features. To my mind one section has the potential to be extremely exciting. This is the removal of the limitation on payment to public housing units for debt service only. While still maintaining the current allocation formula, section 209 makes it possible for public housing authorities, like that in New York City, which are coming closer and closer to bankruptcy, to receive additional Federal financial assistance and thus stave off total collapse for at least another couple of years. I say this has the "potential" to be exciting for we still have to see if the administration will ask for the additional money, if it is going to be appropriated, and, if appropriated, spent by an administration more interested in a budget surplus than in the housing shortage.

The CHAIRMAN. If there are no further amendments to title III, the Clerk will read.

The Clerk read as follows:

TITLE IV—MISCELLANEOUS

AUTHORIZATION FOR PROPERTY ACQUISITIONS IN APPLYING ADVANCES IN TECHNOLOGY TO HOUSING AND URBAN DEVELOPMENT

SEC. 401. The first sentence of section 1010(c) of the Demonstration Cities and Metropolitan Development Act of 1966 is amended—

(1) by inserting "(1)" after "authorized" and

(2) by inserting before the period at the end thereof the following: ", and (2) notwithstanding any other provision of law, to acquire, use, and dispose of land and other property as he deems necessary to carry out the purposes of subsection (a)(1) of this section".

EMPLOYMENT OPPORTUNITIES FOR LOWER INCOME PERSONS IN CONNECTION WITH HUD-ASSISTED PROJECTS

SEC. 402. Section 3 of the Housing and Urban Development Act of 1968 is amended to read as follows:

"EMPLOYMENT OPPORTUNITIES FOR LOWER INCOME PERSONS IN CONNECTION WITH ASSISTED PROJECTS

"SEC. 3. In the administration by the Secretary of Housing and Urban Development of programs providing direct financial assistance in aid of housing, urban planning, development, redevelopment, or renewal, public or community facilities, and new community development, the Secretary shall—

"(1) require, in consultation with the Secretary of Labor, that to the greatest extent feasible opportunities for training and employment arising in connection with the planning and carrying out of any project assisted under any such program be given to lower income persons residing in the area of such project; and

"(2) require, in consultation with the Administrator of the Small Business Administration, that to the greatest extent feasible contracts for work to be performed in connection with any such project be awarded to business concerns, including but not limited to individuals or firms doing business in the field of planning, consulting, design, architecture, building construction, rehabilitation, maintenance, or repair, which are located in or owned in substantial part by persons residing in the area of such project."

URBAN PROPERTY PROTECTION AND REINSURANCE—ENTRY INTO REINSURANCE CONTRACTS

SEC. 403. Section 1222(d) of the National Housing Act is amended by striking out all that follows "thereafter" the first time that word appears and inserting in lieu thereof a period.

URBAN PROPERTY PROTECTION AND REINSURANCE—STATE SHARE OF REINSURED LOSSES

SEC. 404. Section 1223(a) of the National Housing Act is amended by striking out paragraph (1) and inserting in lieu thereof the following:

"(1) in any State which has not, after the close of the second full regular session of the appropriate State legislative body following the date of the enactment of this title, adopted appropriate legislation, retroactive to the date of the enactment of this title, under which the State, its political subdivisions, or a governmental corporation or fund established pursuant to State law, will reimburse the Secretary for any reinsured losses in that State in any reinsurance contract year, in an amount up to 5 per centum of the aggregate property insurance premiums earned in that State during the calendar year immediately preceding the end of the reinsurance contract year on those lines of insurance reinsured by the Secretary in that State during the contract year, to the extent that reinsured losses paid by the Secretary for such year exceed the total of (A) reinsurance premiums earned in that State during that reinsurance contract year plus (B) the excess of (i) the total premiums earned by the Secretary for reinsurance in that State during a preceding period measured from the end of the most recent reinsurance contract year with respect to which the Secretary was reimbursed for losses under this title over (ii) any amounts paid by the Secretary for reinsured losses that were incurred during such period;".

STUDY OF REINSURANCE AND OTHER PROGRAMS

SEC. 405. Section 1235(b) of the National Housing Act is amended by striking out "one year following the date of the enactment of this title" and inserting in lieu thereof "December 31, 1969".

NATIONAL FLOOD INSURANCE PROGRAM—ADOPTION OF LOCAL FLOOD CONTROL MEASURES

SEC. 406. (a) Section 1305(c)(2) of the Housing and Urban Development Act of 1968 is amended by striking out "June 30, 1970, permanent" and inserting in lieu thereof "December 31, 1971, adequate".

(b) Section 1315 of such Act is amended—

(1) by striking out "June 30, 1970" and inserting in lieu thereof "December 31, 1971"; and

(2) by striking out "permanent" and inserting in lieu thereof "adequate".

(c) Section 1361(c) of such Act is amended by striking out "permanent" and inserting in lieu thereof "adequate".

INTERSTATE LAND SALES

SEC. 407. The second sentence of section 1403(a)(10) of the Housing and Urban Development Act of 1968 is amended to read as follows: "As used in this paragraph, the terms 'liens', 'encumbrances', and 'adverse claims' do not refer to property reservations which land developers commonly convey or dedicate to local bodies or public utilities for the purpose of bringing public services to the land being developed nor to taxes and assessments imposed by a State, by any other public body having authority to assess and tax property, or by a property owners' association, which, under applicable State or local law, constitutes liens on the property before they are due and payable, nor to covenants, conditions, and restrictions imposed to control future use of the property and the types and locations of structures to be placed thereon, if (A) the developer, prior to the time the contract of sale or lease is entered into, has furnished each purchaser with a statement setting forth in clear and understandable terms the types and amounts of all such reservations, taxes, assessments, covenants, conditions, and restrictions which are applicable to the lot to be purchased, and (B) receipt of such statement has been acknowledged in writing by the purchaser, and a copy of the acknowledged statement is filed with the Secretary."

REPORTS

SEC. 408. Section 1603 of the Housing and Urban Development Act of 1968 is amended by striking out "January 15" and inserting in lieu thereof "February 15".

RURAL HOUSING

SEC. 409. (a) Sections 513, 515(b)(5), and 517(a)(1) of the Housing Act of 1949 are each amended by striking out "October 1, 1969" wherever it appears and inserting in lieu thereof "October 1, 1970".

(b) Section 517(c) of such Act is amended by striking out all that follows "section" and inserting in lieu thereof a period.

(c) Section 517 of such Act is amended by adding at the end thereof the following new section:

"(k) Any sale by the Secretary of loans individually or in blocks, pursuant to subsections (c) and (g), shall be treated as a sale of assets for the purposes of the Budget and Accounting Act, 1921, notwithstanding the fact that the Secretary, under an agreement with the purchaser, holds the debt instruments evidencing the loans and holds or reinvests payments thereon as trustee and custodian for the purchaser."

(d) Section 520 of such Act is repealed.

(c)(1) Title V of such Act is amended by adding at the end thereof the following new section:

"FINANCIAL ASSISTANCE TO NONPROFIT ORGANIZATIONS TO PROVIDE SITES FOR RURAL HOUSING FOR LOW- AND MODERATE-INCOME FAMILIES

"SEC. 524. (a) The Secretary may make loans, on such terms and conditions and in such amounts as he deems necessary, to public or private nonprofit organizations for the acquisition and development of land as building sites to be subdivided and sold to families, nonprofit organizations, and cooperatives eligible for assistance under section 235 or 236 of the National Housing Act or section 521 of this Act. Such a loan shall bear interest at a rate prescribed by the Secretary taking into consideration the rate determined annually by the Secretary of the Treasury as the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, adjusted to the nearest one-eighth of 1 per centum, and shall be repaid within a period not to exceed two years from the making of the loan or within such additional period as may be authorized by the Secretary in any case as being necessary to carry out the purposes of this section.

"(b) In determining whether to extend financial assistance under this section, the Secretary shall take into consideration, among others factors, (1) the suitability of the area to the types of dwellings which can feasibly be provided, and (2) the extent to which the assistance will (A) facilitate providing needed decent, safe, and sanitary housing, (B) be utilized efficiently and expeditiously, and (C) fulfill a need in the area which is not otherwise being met through other programs, including those being carried out by other Federal, State, or local agencies."

(2) Section 517(b) of such Act is amended by striking out "and 515" and inserting in lieu thereof ", 515", and by adding after "(b)(4))," the following: "and 524,".

AUTHORITY TO TRANSFER ADDITIONAL AMOUNTS FROM GENERAL INSURANCE FUND TO SPECIAL RISK INSURANCE FUND

SEC. 410. Section 238(b) of the National Housing Act is amended by striking out "the sum of $5,000,000" in the first sentence and inserting in lieu thereof ", at such times and in such amounts as he may determine to be necessary, a total sum of $20,000,000".

SAVINGS AND LOAN ASSOCIATIONS

SEC. 411. (a) Section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)) is amended by adding at the end thereof the following new paragraph:

"Without regard to any other provision of this subsection, any such association is authorized to invest in shares of stock issued by a corporation authorized to be created pursuant to title IX of the Housing and Urban Development Act of 1968, and is authorized to invest in any partnership, limited partnership, or joint venture formed pursuant to section 907(a) or 907(c) of that Act."

(b)(1) Section 404(d)(2)(B) of the National Housing Act (12 U.S.C. 1727(d)(2)(B)) is amended by striking out "1966" and inserting in lieu thereof "1965".

(2) Section 6(b) of the Act of September 21, 1968 (Public Law 90-505), is amended by striking out "1968" and inserting in lieu thereof "1965".

MISCELLANEOUS AND TECHNICAL AMENDMENTS

SEC. 412. (a) Section 235(c) of the National Housing Act is amended by inserting immediately before the period at the end of the first sentence the following: ": *Provided further*, That the Secretary is authorized to continue making such assistance payments where the mortgage has been assigned to the Secretary".

(b) Section 236(b) of such Act is amended by striking out "*Provided*, That" and inserting in lieu thereof the following: "*Provided*, That the Secretary is authorized to continue making such interest reduction payments where the mortgage has been assigned to the Secretary: *Provided further*, That".

(c) Section 223(d) of such Act is amended by inserting at the end thereof the following new sentence: "A loan involving a project covered by a mortgage insured under section 213 that is the obligation of the Cooperative Management Housing Insurance Fund shall be the obligation of such fund, and loans involving projects covered by mortgages insured under section 236 or under any section of this title pursuant to section 223(e) shall be the obligation of the Special Risk Insurance Fund."

(d) Section 214 of such Act is amended by inserting "or mobile home courts or parks" in the first sentence after "construct dwellings".

(e) Section 1101(c)(2) of such Act is amended—

(1) by striking out "value of the property or project" and inserting in lieu thereof "replacement cost of the property or project"; and

(2) by striking out "The value" and inserting in lieu thereof "The replacement cost".

Mr. PATMAN (during the reading). Mr. Chairman, I ask unanimous consent that we dispense with further reading of title IV, that it be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to to request of the gentleman from Texas?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 33, line 17, strike out "December 31, 1969" and insert "June 30, 1970".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 33, after line 17, insert the following:

"EMERGENCY FLOOD INSURANCE PROGRAM

"SEC. 406. Part A of chapter II of title XIII of the Housing and Urban Development Act of 1968 is amended by adding at the end thereof the following new section:

"'EMERGENCY IMPLEMENTATION OF PROGRAM

"'SEC. 1336. (a) Notwithstanding any other provision of this title, for the purpose of providing flood insurance coverage at the earliest possible time, the Secretary shall carry out the flood insurance program authorized under chapter I during the period ending December 31, 1971, in accordance with the provisions of this part and the other provisions of this title insofar as they relate to this part but subject to the modifications made by or under subsection (b).

"'(b) In carrying out the flood insurance program pursuant to subsection (a), the Secretary—

"'(1) shall provide insurance coverage without regard to any estimated risk premium rates which would otherwise be determined under section 1307; and

"'(2) shall utilize the provisions and procedures contained in or prescribed by this part (other than section 1334) and sections 1345 and 1346 to such extent and in such manner as he may consider necessary or appropriate to carry out the purpose of this section.'"

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee Amendment: Page 34, after line 15, insert the following:

"EXTENSION OF FLOOD INSURANCE PROGRAM TO COVER LOSSES FROM WATER-CAUSED MUDSLIDES

SEC. 407. (a) Section 1302 of the Housing and Urban Development Act of 1968 is amended by adding at the end thereof the following new subsection:

"'(f) The Congress also finds that (1) the damage and loss which results from mudslides is related in cause and similar in effect to that which results directly from storms, deluges, overflowing waters, and other forms of flooding, and (2) the problems involved in providing protection against this damage and loss, and the possibilities for making such protection available through a Federal or federally sponsored program, are similar to those which exist in connection with efforts to provide protection against damage and loss caused by such other forms of flooding. It is therefore the further purpose of this title to make available, by means of the methods, procedures, and instrumentalities which are otherwise established or available under this title for purposes of the flood insurance program, protection against damage and loss resulting from mudslides that are caused by accumulations of water on or under the ground.'

"(b) Section 1370 of such act is amended by inserting '(a)' after 'Sec. 1370.', and by adding at the end thereof the following new subsection:

"'(b) The term "flood" shall also include inundation from mudslides which are caused by accumulations of water on or under the ground; and all of the provisions of this title shall apply with respect to such mudslides in the same manner and to the same extent as with respect to floods described in paragraph (1), subject to and in accordance with such regulations, modifying the provisions of this title (including the provisions relating to land management and use) to the extent necessary to insure that they can be effectively so applied, as the Secretary may prescribe to achieve (with respect to such mudslides) the purposes of this title and the objectives of the program.'

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 36, line 5, strike out "406" and insert "408".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 36, line 16 strike out all through line 14, page 37 and insert the following:

"INTERSTATE LAND SALES

"SEC. 409. Section 1403(a)(10) of the Housing and Urban Development Act of 1968 is amended to read as follows:

"'(10) the sale or lease of real estate which is free and clear of all liens, encumbrances, and adverse claims if each and every purchaser or his or her spouse has made a personal on-the-lot inspection of the real estate which he purchased and if the developer executes a written affirmation to that effect to be made a matter of record in accordance with rules and regulations of the Secretary. As used in this subparagraph, the terms 'liens,' 'encumbrances', and 'adverse claims' do not refer to property reservations which land developers commonly convey or dedicate to local bodies or public utilities for the purpose of bringing public services to the land being developed, nor to taxes and assessments imposed by a State or other public body having authority to assess and tax property which, under applicable State or local law, constitute liens on the property before they are due and payable, nor to beneficial property restrictions which would be enforceable by other lot owners or lessees in the subdivision, if (A) the developer, prior to the time the contract of sale or lease is entered into, has furnished each purchaser or lessee with a statement, the form and content of which has been approved by the Secretary, setting forth in descriptive and concise terms all such reservations, taxes, assessments, and restrictions which are applicable to the lot to be purchased or leased, and (B) receipt of such statement has been acknowledged in writing by the purchaser or lessee, and a copy of the acknowledged statement is filed with the Secretary in accordance with such rules and regulations as he may require.'

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 39, line 2, strike out "408" and insert "410".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 39, line 6, strike out "409" and insert "411".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 39, line 23, insert the following:

"(d) Section 517 of such Act is further amended by adding at the end thereof (after subsection (k), as added by subsection (c) of this section) the following new subsection:

"'(l) The Secretary may also, upon the application of lenders, builders, or sellers and upon compliance with requirements specified by him, make commitments upon such terms and conditions as he shall prescribe to make or insure loans under this section to eligible applicants.'

"(e)(1) Section 517 of such Act is further amended by adding at the end thereof (after subsection (l), as added by subsection (d) of this section) the following new subsection:

"'(m) The assets and liabilities of, and authorizations applicable to, the Rural Housing Direct Loan Account are hereby transferred to the Fund, and such Account is hereby abolished. Such assets and their proceeds, including loans made out of the Fund pursuant to this section, shall be subject to all of the provisions of this section.'

"(2) The first sentence of section 517(d) of such Act is amended—

"(A) by striking out '(a) and (b)' and inserting in lieu thereof '(a), (b), and (m)'; and

"(B) by inserting 'or otherwise acquired by' after 'loans made from'.

"(3) Section 518 of such Act is repealed.

"(4) Section 519 of such Act is amended by striking out 'or the Rural Housing Direct Loan Account' and 'or Account'."

PARLIAMENTARY INQUIRY

Mrs. SULLIVAN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentlewoman will state it.

Mrs. SULLIVAN. Is this a direct loan program, which the Clerk just read?

The CHAIRMAN. The Chair did not hear the inquiry.

Mrs. SULLIVAN. On page 39—is that a direct loan program for housing?

The CHAIRMAN. The committee amendment now pending, as the Chair understands it, is at the bottom of page 39, line 23, and goes to the end of page 40, line 26. That is the pending committee amendment.

Mrs. SULLIVAN. Then it is a direct loan program? That is what I asked.

The CHAIRMAN. The Chair will say to the gentlewoman that the Chair will not attempt to interpret the amendment under any circumstances.

Mrs. SULLIVAN. I thank the Chairman.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 41, line 1, strike out "(d)" and insert "(f)".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 41, strike out line 2 down through and including line 12 of page 42.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 42, line 16, strike out "410" and insert "412".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 42, strike out lines 22 through 24 and insert:

"SEC. 413. (a) Section 5 of the Federal Home Loan Bank Act (12 U.S.C. 1425) is amended to read as follows:

" 'SEC. 5. No institution shall be admitted to or retained in membership, or granted the privileges of nonmember borrowers, if the combined total of the amounts paid to it for interest, commission, bonus, discount, premium, and other similar charges, less a proper deduction for all dividends, refunds, and cash credits of all kinds, creates an actual net cost to the home owner in excess of the lawful contract rate of interest applicable to such transactions, or, in case there is no lawful contract rate of interest applicable to such transactions, in excess of such rates as may be prescribed in writing by the Board acting in its discretion from time to time. This section applies only to the home mortgage loans on single-family dwellings.'

"(b) Section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)) is amended by adding at the end thereof the following new paragraph:".

Mrs. SULLIVAN. Mr. Chairman, I rise in opposition to the committee amendment.

Mr. Chairman, adoption of section 413 (a) of the bill will mean that Congress has gone on record in favor of raising already exorbitantly high mortgage interest rates still higher.

Adoption of 413(a) means that Congress is saying that an 8-percent interest rate is too little to pay for the cost of mortgage funds even though the purchaser of a $20,000 home will have to pay as much as $32,000 in interest alone during the term of a 30-year mortgage.

Adoption of 412(a) means the establishment of an unfortunate, even tragic example which says to the legislatures of 22 States that their interest rate ceilings of 7 to 8 percent for home mortgages should, in the judgment of Congress, be increased to 9 or 10 percent or more.

Mr. Chairman, section 413(a) would eliminate the maximum effective interest rate ceiling of 8 percent for savings and loan associations and other Federal Home Loan Bank borrowers in those States which do not have their own interest rate ceilings and allow the Home Loan Bank Board to set a higher ceiling. It became part of the housing bill without real discussion of its merits either in the Housing Subcommittee or in the full committee. In my judgment, it is absolutely necessary that the section be removed from the bill so that its effect may be fully explored and so that Congress may be informed of these findings before action is taken. To do otherwise is to blindly adopt what I think is a very bad piece of legislation.

The rationale offered in support for the section is based on the contention that the effective interest rates for FHA and VA mortgages is already at or beyond the 8-percent ceilings when the ½-percent insurance and 1-percent origination fees are added to the 7½-percent rate fixed by the Secretary of Housing and Urban Development and the Administrator of Veterans' Affairs. Unless the interest rate ceiling is raised, so the rationale goes, Federal Home Loan Bank borrowers will be unable to make FHA and VA loans in those States that do not have interest rate ceilings of their own.

All of this seems to be very tidy and innocent looking. But how tidy and innocent when certain questions are raised, namely:

Is not this amendment a way of permitting all Federal Home Loan Bank borrowers in those States that do not have interest rate ceilings of their own to raise interest rates for all mortgages, conventional as well as FHA insured and VA guaranteed?

How many States will really be affected by the section, the few that do not have interest rate ceilings of their own, or others that do not have effective rate ceilings because of vague legislative language or legislative loopholes?

In view of the fact that the addition of points has raised the effective FHA rate to a national average of 8.25 percent, have Federal Home Loan Bank borrowers actually been violating the law in making such loans and want this amendment to make their actions legal?

Mr. Chairman, these questions were presented in written form to Preston Martin, Chairman of the Federal Home Loan Bank Board, when he appeared before the House Banking and Currency Committee to testify on another piece of legislation earlier this month. He answered—or I should say replied to—them earlier this week.

First of all, Mr. Martin states that the Federal Home Loan Bank Board did not originate or sponsor section 413(a) and has not taken any position on it.

Second, Mr. Martin states that the law establishing the effective interest rate ceiling of 8 percent for Home Loan Bank borrowers in States that do not have interest rate ceilings of their own is not at all clear about what really is an effective interest rate.

Third, Mr. Martin states that he is not sure whether the law on setting the 8-percent ceiling applies to all mortgages, FHA and VA as well as conventional.

Fourth, in answer to the question of whether Home Loan Bank borrowers have been violating the law setting the 8-percent ceiling in those States where it applies, Mr. Martin simply says that the composition of the Home Loan Bank Board has changed completely in the last few months, that the Board has a new general counsel, and that in view of the legal questions involved in construing the law on interest rate ceilings, the Board is examining the matter and hopes to make a report soon.

It seems to me that a fair interpretation of what Mr. Martin is saying is that the Home Loan Bank Board is not advocating lifting the 8-percent interest rate ceiling and that, even if it did, it would not really know what it was doing.

My fifth, last, and most important point, Mr. Chairman, is this: On Monday Mr. Martin appeared again before the House Banking and Currency Committee where I asked him if he did not think Congress should delay a decision on the section until members of the House Banking and Currency Committee have had a chance to study this complex subject in hearings. Mr. Martin emphatically replied that he thought such a delay and study would be well justified.

Accordingly, Mr. Chairman, I ask the membership to vote down this committee amendment on page 43 from line 1 to 15.

I include the letter at this point with my remarks:

FEDERAL HOME LOAN BANK BOARD,
Washington, D.C., October 20, 1969.

Hon. LEONOR K. SULLIVAN,
House of Representatives,
Washington, D.C.

DEAR CONGRESSWOMAN SULLIVAN: Your letter of October 7, 1969, requested answers to three questions which you intended to ask me orally in the course of hearings before the House Committee on Banking and Currency on H.R. 13939 of the present Congress.

The first question is:

"Mr. Martin, as you know, a section of the proposed Housing Act of 1969 in the House provides for elimination of the 8 percent effective mortgage interest rate ceiling for the Federal Home Loan Bank borrowers on the grounds that it prevents borrowers from making FHA and VA loans.

"Isn't this another way of saying the FHLBB wants to raise interest rates on all mortgage loans in the states where the 8 percent ceiling is effective?"

The Federal Home Loan Bank Board does not desire that interest rates be raised on all mortgage loans in the states where the 8 percent ceiling rate is effective. (My answer to your question No. 2 indicates that a reference to "states where the 8 percent ceiling is effective" raises a complex legal issue which is not susceptible to a categorical answer.)

This Board did not originate nor did it sponsor the provision in question, which appears in subsection (a) of Section 413 of H.R. 13827 as reported to the House Committee on Banking and Currency. The Board has not taken any position on the provision.

The second question is:

"There seems to be a lot of confusion over whether the FHLBB 8 percent effective interest rate ceiling applies only to five states which do not have interest rate ceilings of their own or whether it, in fact, applies to many other states which have legislation which is vague or is full of loopholes.

"What is your view of this situation?"

Our General Counsel believes that there are less than five states which do not have interest rate ceilings which are applicable to at least some types of transactions included within Section 5 of the Federal Home Loan Bank Act (or would be so applicable except for exemptions from usury laws).

He also points out that in a number of other states state law contains a provision that the state imposed interest rate ceilings applicable to "home mortgage loans" shall not be applicable to FHA and VA loans (or merely FHA loans).

A brief analysis of Section 5 of the Federal Home Loan Bank Act is appropriate. It provides that no institution shall be admitted to or retained in Federal Home Loan Bank membership or granted the privilege of nonmember borrowers if "the combined total of the amounts paid to it for interest, commission, bonus, discount, premium, and other similar charges, less a proper deduction for all dividends, refunds, and cash credits of all kinds" creates "an actual net cost to the home owner" in excess of—

"The maximum legal rate of interest or, in case there is a lawful contract rate of interest applicable to such transactions, in excess of such rate (regardless of any exemption from usury laws), or, in case there is no legal rate of interest or lawful contract rate of interest applicable to such transactions, in excess of 8 percentum per annum in the State where such property is located."

The last sentence of the section provides: "This section applies only to home mortgage

loans made after the enactment of this Act." (The Federal Home Loan Bank Act was enacted on July 22, 1932.)

Section 5 is, therefore, applicable (and applicable only) in cases where (1) there is, in the state where the property is located, a "legal rate of interest or lawful contract rate of interest" which either is applicable to "such transactions" or would be applicable to them except for exemption from usury laws, (2) the combined total of the charges referred to in the section, less the deduction referred to therein, creates "an actual net cost to the home owner" in excess of that rate, and (3) the loan is a "home mortgage loan" within the meaning and coverage of the section.

The terms "such transactions" and "exemptions" are not defined in the Act. Thus, it is not at all clear whether the words "such transactions" mean all home mortgage loans made by a member institution regardless of whether the type of loan is FHA, VA or conventional. Distinctions as to type of loan may be relevant to the proper interpretation of the statute, for, as previously indicated, a number of states specifically exclude FHA and VA loans (or only FHA loans) from the state's usury law. Other states exempt any loans made by savings and loan and building and loan associations. Depending upon whether one terms such type of loan or source of loan as an "exemption" or an "exclusion" and whether or not one defines "such transactions" to include all loans or only specific types of loans may determine whether the 8 percent limit in Section 5 is applicable. For example, if "such transactions" cannot be broken down into types of loans and so long as any type of home mortgage loan is covered by the state usury law, then the 8 percent limitation of Section 5 would not be applicable. Thus, as indicated in my answer to question No. 1, this is not a simple matter.

Interest rates normally have been sufficiently low that these legal issues were not a matter of major policy. Furthermore, if the one-half percent FHA insurance charge is not considered "interest, commission, bonus, discount, premium [or] other similar charge", the 8.25 percent interest rate referred to in your question would be, in fact, 7.75 percent which is below the statutory ceiling.

The third question is:

"The volume of FHA and VA mortgages outstanding during the first eight months of the year appears to indicate FHLBB borrowers are issuing as many FHA and VA mortgages now as they were last year at this time, despite the fact that the effective FHA interest rate nationally is at least 8.25 percent.

Have you looked into the possibility that some of your borrowers may be violating the 8 percent interest ceiling? If you have found violations, what action have you taken?"

The composition of the Board has changed completely within the last few months. We also have a new General Counsel. In view of the difficult legal questions involved in construing Section 5 of the Bank Act, the present Board is examining the matter and hopes to be able to report to you in the near future the results of its examination.

Sincerely,

PRESTON MARTIN,
Chairman.

The CHAIRMAN. The time of the gentlewoman from Missouri has expired.

Mr. BROCK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the committee amendment and in opposition to the proposal of the gentlewoman from Missouri (Mrs. SULLIVAN). I shall not take the entire 5 minutes but only wish to point out the fact that this would not affect all 50 States, but somewhere in the range of 13 or 14 States whose laws happen to be in some conflict with the law as it exists today. If you strike this amendment, we would be operating to literally cut off FHA and VA loans in those particular States. I think it would be a very unfortunate thing for this House to act against the best interest of a few States who perhaps through their Representatives are not aware of the impact of this particular provision.

Mrs. SULLIVAN. Mr. Chairman, if the gentleman will yield, who says it would cut them off?

Mr. BROCK. That is my understanding. The thrust of the proposal was to guarantee equality of treatment across the board.

Mrs. SULLIVAN. Have you no faith in the man who heads the Home Loan Bank Board? He says that this would not be done; that we should really give it some thought.

Mr. BROCK. I have a great deal of faith in the gentleman, but I also have faith in the work of the committee. The testimony that we had from the Savings and Loan League was in favor of this. It seems to me it would be the better part of valor to see that we treated all States fairly and then if some inequities should develop as a result of this, I am quite sure that the gentlewoman would have support to correct such inequities.

Mrs. SULLIVAN. Would the gentleman show me where in the hearings we discuss this?

Mr. BROCK. I do not have them in hand, but I would point out to the gentlewoman that in her dissenting views as contained in the report that there was reference to some testimony.

Mrs. SULLIVAN. No, I did not. I point out the fact that there was no testimony on this particular subject.

Mr. BROCK. Well, then, there was a position taken by the Savings and Loan League. Perhaps it is not in the testimony.

Mrs. SULLIVAN. It was taken up at the very last moment with no discussion on it at all.

Mr. BROCK. I might quote from the gentlewoman's own dissenting views wherein she says that an official of the U.S. Savings and Loan League, replying to questions on the subject, said it was his opinion that the section not only applies to the five States mentioned above but may also apply to an additional 16 States which have their own interest rate ceilings from which Federal Housing Administration and Veterans' Administration insured and guaranteed mortgages are exempted. That is your statement and not mine.

You also say this:

The thrust of the Federal Home Loan Bank Board and U.S. Savings and Loan League argument follows the line that the latest increase in FHA and VA rates to 7½ percent in January has put savings and loan associations against the wall in terms of making loans of this type in the States in question.

Mrs. SULLIVAN. All right, but I will have to tell the gentleman that that was written after the committee acted, because there was nothing during the committee consideration of this matter either in the subcommittee or the full committee and I did not know about it until I saw this in the bill, because I was absent during the first day of the committee hearings attending a funeral at home.

When I saw this in the bill, and I was absent from the first day of the committee hearings because I was home for a funeral—but when I saw this I immediately put in my dissenting views.

Mr. BROCK. I simply feel that the gentlewoman's amendment is punitive in terms of a few States. I think it is ill considered. It should be fully considered in committee before we take any such action and, I would oppose it.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: On page 44, line 3, strike out "(b)" and insert "(c)".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: On page 44, line 9, insert:

"(d) Section 12 of the Federal Home Loan Bank Act (12 U.S.C. 1432) is amended by adding at the end thereof the following new subsection:

"'(c) Subject to such regulations as may be prescribed by the Board, one or more Federal home loan banks may acquire, hold, or dispose of, in whole or in part, or facilitate such acquisition, holding, or disposition by members of any such bank, of loans (or interests in loans) having the benefit of insurance under section 221(d)(3), 221(h), 235, or 236 of the National Housing Act, as now or hereafter in effect, or any commitment or agreement therefor.'"

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: On page 44, line 20, insert:

"TEMPORARY EXTENSION OF FLEXIBLE INTEREST RATE AUTHORITY

"SEC. 414. Section 3(a) of the Act of May 7, 1968 (Public Law 90-301), is amended by striking out 'October 1, 1969' and inserting in lieu thereof 'January 1, 1970'."

AMENDMENT TO THE COMMITTEE AMENDMENT OFFERED BY MR. TEAGUE OF TEXAS

Mr. TEAGUE of Texas. Mr. Chairman, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment to the committee amendment offered by Mr. TEAGUE of Texas: On page 44, line 24, insert immediately before the period the following: ", and by amending the proviso to such section to read as follows: 'Provided, That notwithstanding any other provision of law, the Administrator of Veterans' Affairs is authorized, until October 1, 1971, to establish a maximum interest rate for guaranteed or insured loans to veterans under chapter 37 of title 38, United States Code, not in excess of such rates as he may from time to time find the loan market demands.' ".

Mr. TEAGUE of Texas. Mr. Chairman, this is the exact wording of a bill pertaining to veterans' housing which passed this House recently by a vote of 200 and something to 20 and something.

What this amendment does is to permit the present regulation as far as veterans' housing is concerned to continue until next October 1. By that time we hope that this matter might be settled.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. TEAGUE of Texas. I yield to the gentleman.

Mr. PATMAN. If I understand the gentleman's amendment, it only applies to veterans' loans?

Mr. TEAGUE of Texas. That is correct, and the reason it does apply only to veterans' loans is because I am not trying to control the business of the Committee on Banking and Currency.

Mr. PATMAN. Well, let us see. Why would the gentleman want to advance the date a couple of years when higher interest rates will be imposed on the veterans?

Mr. TEAGUE of Texas. I would be glad by unanimous consent to withdraw this amendment and make it also apply to the FHA, if that is what the gentleman wants?

Mr. PATMAN. I am not talking about that. If the gentleman wants to apply this to veterans and to make them pay higher rates than other people, that is up to him. But may I suggest that the gentleman has a bill in his committee to use the veterans' trust funds, of the insurance reserve, up to $5 billion to make these loans to veterans.

In other words, to make the veterans use their own money that they have paid into the reserve funds and get loans at 6 percent. It occurs to me that being a good proposition, I think this amendment if you get it adopted will probably deny us the privilege of passing on that particular bill.

The gentleman is obligated to bring it up, because we had it here on the floor offered as an amendment. It was held nongermane. Therefore, it could not be passed upon by the House. But the gentleman said here on the floor—and I commend him for it—that he was going to keep on, that he would bring out a bill—he expected to, if he could, from his committee—and then it would not be subject to a point of order.

That would mean that veterans could use $5 billion of their own money at 6 percent interest. They would not have to pay this 8 percent and 10 percent that the amendment would require them to pay. So I hope the gentleman will not insist upon the amendment, and that he will get that bill out of his committee and bring it here. It will not then be subject to a point of order. By doing so, he will do the greatest service to the veterans that they have ever had in the way of loans for any purpose with a low-interest rate. I hope the gentleman will do that.

Mr. TEAGUE of Texas. Mr. Chairman, I do insist on my amendment. The reason for the amendment is to keep veterans' interest rates from going to a mandatory 6 percent on January 1. Furthermore, as far as the chairman of this committee is concerned, everything possible is going to be done to bring that bill to the floor.

Mr. TEAGUE of California. Mr. Chairman, will the gentleman yield?

Mr. TEAGUE of Texas. I yield to the gentleman from California.

Mr. TEAGUE of California. I fully support the gentleman's amendment. Obviously it is the only practical thing to do to continue the veterans' loan program. I urge all Members to support the gentleman from Texas (Mr. TEAGUE) in his amendment.

Mr. SAYLOR. Mr. Chairman, will the gentleman yield?

Mr. TEAGUE of Texas. I yield to the gentleman from Pennsylvania (Mr. SAYLOR) a member of the committee.

Mr. SAYLOR. Mr. Chairman, I merely wish to say that I support very heartily the position taken by my colleague, the gentleman from Texas (Mr. TEAGUE). The House settled this matter, we thought, several weeks ago when we passed the bill that is referred to in this amendment. Then the Banking and Currency Committee has tried, in the bill that is before you now, to repeal what Congress did by a record vote. All we are doing is making this apply to veterans. We are not trying to tell the Banking and Currency Committee how to run their affairs.

If you want to know why the Veterans' Affairs Committee has to get into veterans' housing, it is because the Banking and Currency Committee years ago refused to get into it. That is the reason we got in.

I urge that the amendment be adopted.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. TEAGUE of Texas. I yield to the gentleman from Tennessee.

Mr. BROCK. I thank the gentleman. I am heartily in support of the amendment. I see no alternative to the course of action that the gentleman from Texas has taken in the light of the action of the Committee on Banking and Currency, although I happen to be a member of that committee. I regret the fact that the gentleman's amendment does not include FHA. I would like to inform him that the situation of the nonveteran home buyer is as bad as that for the veteran. I would hope the gentleman would support an amendment which I intend to offer after the pending amendment is adopted. I shall offer an amendment to put FHA under the same type of extension, a 1-year extension.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. TEAGUE of Texas. I am glad to yield to the chairman of the committee.

Mr. PATMAN. Is the bill providing for use of the $5 billion Veterans' Trust Fund or the Reserve Fund of insurance in committee now? Is it being actively considered?

Mr. TEAGUE of Texas. Let me tell the gentleman the exact status of that bill. In the Housing Subcommittee it was voted 5 to 4 to lay the bill aside until we had further conferences with the administration. We have had meetings with the administration. We had expected to have an answer before this, which we have not. I, as chairman, have written the administration and reminded them that they were going to give us an answer. So at the moment I am waiting for an answer from them before going back to the subcommittee for another vote.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. PATMAN. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The gentleman from Texas is recognized.

Mr. PATMAN. Mr. Chairman, I cannot see that it makes any sense to require the veterans to pay more and more interest when they have $7 billion in a reserve fund that should be invested in mortgages on their own homes. It is about the best investment you could have on earth.

The gentleman from Texas (Mr. TEAGUE) is to be commended for presenting a bill to do that very thing—to use $5 billion of that fund—and that would really help all the veterans who are eligible to get these loans.

Furthermore, they would get them for at least 6 percent and not over that, because the fund now is not getting 6 percent on the average. It would be a great benefit to the fund, the veterans' insurance fund, to get as much as 6 percent. That would solve this situation 100 percent.

I know the gentleman from Texas is sincere. He told us before that he is waiting on a favorable reply or a reply from the administration and he has not received it. That was a good while ago. Now that he has not received a reply, I think he would be justified in going on and presenting that bill to the House of Representatives so that we could do the veterans of this country a great favor by letting them have housing loans at 6 percent interest from their own reserve fund that they paid in themselves to build up.

How could we have a fairer way than by letting the veterans borrow their own money for the purpose of building their own homes and getting a reduced rate of interest? If we defeat this amendment the gentleman has offered, I believe that will spur him on to bring that bill out. I believe the House will pass it almost unanimously—possibly there would be a few against it, but not many.

So we have the solution within our grasp. If we want to take advantage of it, we should defeat this amendment, and let the gentleman from Texas, Mr. TEAGUE, know we want that bill to come out of his committee, and we want it quickly, so we can set aside $5 billion of that insurance reserve fund for the purpose of making loans to veterans at 6 percent. I believe that would get something done.

I do not know who the gentlemen are who are holding up the bill, but I hope they will give this consideration. It is not treating the veterans right to single them out for an increase in their loan rates. We are jumping the gun on that right now, and we will do it for 2 years. The veterans will be the only ones guaranteed to get a higher rate of interest.

If interest rates would bring more money into the housing market, whether

for veterans or not, I possibly would not mind increasing the interest rates, but we have tried it, and that will not bring more money into the market. We know it. So why should we pay more and more interest when it will not get any more opportunities for them to acquire homes by purchase at lower rates of interest?

Mr. GROSS. Mr. Chairman, if the gentleman will yield, if the veterans' fund is depleted, if the participation certificates have been issued against the fund and the money is gone, where will the Government get the money to replenish the reserve fund except on the market?

Mr. PATMAN. Mr. Chairman, the gentleman is asking a good question. I commend him. It shows he is thinking as much about the situation as I am.

There is money flowing into that fund every day, and they could certainly make the loans against the money coming in, and they could dispose of the paper they have, but now they could tomorrow morning if the NSLI bill were law, commence taking this paper and making loans to veterans at 6-percent interest, which is higher than the fund has gotten in the past. This would help the veteran out of his insurance reserve fund and it would help the veteran who wants to borrow some of his own money to buy a home at 6-percent interest.

Mr. BROCK. Mr. Chairman, the chairman is aware that his administration in the last few years has completely depleted that veterans' fund by borrowing against it. There is not a dime in that fund, and the chairman is misleading this body by saying there is $7 billion available. There is not.

Mr. PATMAN. Mr. Chairman, how can the gentleman gripe about that when he is doing that right now in his party? It is just changing the shots. We are trying to change it so they will now, immediately, take the money, when it comes in, for veterans' housing. It can be done. There is no reason why it cannot be done. So let us take a constructive and helpful step and not charge the veterans 8 percent or 10-percent interest when we do not have to do it.

We have the money they can borrow, that they paid in themselves, and they can get it at 6-percent interest, and it would help everybody and help the housing market and help the country generally.

Mr. Chairman, I hope this amendment is defeated and that we will get onto the bill, and see if we can get the reserve fund set up and get the housing loans made.

Mr. SAYLOR. Mr. Chairman, I rise in support of the amendment.

I take this time to direct a question or two to the chairman of the Committee on Veterans' Affairs, the gentleman from Texas (Mr. TEAGUE).

At the time the Veterans' Affairs Committee, under the gentleman's leadership, brought to the floor a few weeks ago, a bill which became Public Law 90–301, did the testimony before our committee in support of that legislation carry the support of the American Legion, the Veterans of Foreign Wars, the DAV, and all other veterans' organizations?

Mr. TEAGUE of Texas. Mr. Chairman, will the gentleman yield?

Mr. SAYLOR. I yield to the gentleman from Texas.

Mr. TEAGUE of Texas. That is correct. The language I have just offered as an amendment was in the bill we passed, which every veterans group supported. I cannot believe, with all due respect to my colleague from Texas, that the veterans groups who came before my committee and testified for legislation would do so against the best interests of the veterans.

Mr. BURKE of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. SAYLOR. I am happy to yield to the gentleman from Massachusetts.

Mr. BURKE of Massachusetts. I might point out that I am a member of the VFW, of the American Legion, and a few other veterans' organizations. I do not recall my posts ever going on record in favor of VA interest rates going up to 8 or 9 or 10 percent.

Mr. SAYLOR. I did not ask anyone whether or not his post asked for interest rates to go up. I just asked whether the organizations to which the gentleman belongs came before our committee and supported the legislation. We now have testimony that they did.

I believe the House has to decide whether or not the gentleman from Texas (Mr. TEAGUE), who has been chairman of the committee for almost 20 years and who has never brought out a piece of legislation against the veterans, who is a man responsible for more legislation for veterans than any other man or woman in the history of the country, is right, or whether the gentleman from Texas who represents the Banking and Currency Committee is right.

I urge all Members to support my colleague from Texas (Mr. TEAGUE).

Mr. TEAGUE of Texas. Mr. Chairman, I ask unanimous consent to be permitted to put in the RECORD at this point the testimony of the veterans groups concerning this specific amendment I have offered.

The CHAIRMAN. The Chair will say to the gentleman from Texas, that permission will have to be secured in the House.

Mr. BURKE of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. SAYLOR. I yield to the gentleman from Massachusetts.

Mr. BURKE of Massachusetts. I wish to inform the gentleman from Pennsylvania that I take issue with the leaders of the American Legion and the VFW and anyone else who justifies before the Veterans' Affairs Committee any type of bill or any type of measure that will allow the veterans of this Nation to be gouged to the extent of 8 or 9 or 10 percent interest. It is about time we had some courage in this House and put a ceiling on these rates, and that we not allow the veterans of this Nation to be gouged to the extent that they are.

I am not concerned too much with the testimony of the heads of the American Legion or the VFW when they are in error. They are in error when they come in here and say an amendment of this type, that will allow the head of the VA to set interest rates, when he knows nothing about them, is something we should have.

Mr. SAYLOR. I will take back my time and just say that since the gentleman is as big as he is he ought to go to the national conventions of the organizations to which he is a member and present resolutions, to see what happens to them when they get to the floor of those conventions.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. BURKE of Massachusetts. Mr. Chairman, I rise in opposition to the amendment.

I want to point out to my good friend from Pennsylvania that several years ago the late beloved John F. Kennedy took the American Legion on because of their failure to support the veterans on a proper housing bill.

There is a need for courage here. I say that the American Legion or the VFW, when they favor any bill that allows the gouging of veterans with interest rates up to 8 or 9 or 10 percent, are wrong, and those leaders are not speaking for the rank and file veterans of this country.

With this amendment that was offered here, if they would come in with a ceiling on the rates, there might be some justification for it.

However, to allow the floodgates to open is something else. We have had the experience of the past 2 years, and now the banks in this country that have no need for raising these rates are looking to the guaranteed loans of veterans that are guaranteed by this Government. They are going to gouge them to the extent of 8.5, 9, or 9.5 percent, and even up to a 10-percent interest rate.

Mr. TEAGUE of California. Mr. Chairman, will the gentleman yield?

Mr. BURKE of Massachusetts. I am happy to yield to the gentleman.

Mr. TEAGUE of California. I am curious to know where you can borrow money at 4, 5, or 6 percent these days. We are talking about guaranteed insured loans.

Mr. BURKE of Massachusetts. The gentleman from Texas, the chairman of the Committee on Banking and Currency, gave you that answer. Let us make these GI national life insurance funds available to the veterans and let them borrow it at rates not exceeding 6 percent per annum.

Mr. TEAGUE of California. That is another proposition. In the meantime, we must have a guaranteed insured interest loan program, and the only way we can do it is to authorize the director to set such rates at such rates where money can be borrowed. I do not know of anywhere that you can borrow money at 6 percent.

Mr. BURKE of Massachusetts. No, and you will never be able to as long as you let the banks get away with what they are doing today. They are repeating the same mistake that they made in 1929 when they gouged the public. That resulted in wholesale foreclosures of homes by the banks, and the banks then ran dry of money and closed. We had complete chaos in this country as a result. Until banks face their responsibility, the

only thing we can do is take the advice of the chairman of the Committee on Banking and Currency and allow this money to be available, and let this other bill come out of the Committee on Veterans' Affairs. I admire and respect the chairman of that committee, the gentleman from Texas (Mr. TEAGUE), but I differ with him on this. I think anyone who will recognize the facts will realize that the banks of this country are gouging the public.

Mr. BROCK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise simply to correct the RECORD. There have been some rather confusing and confused statements made in the last few minutes. I want to point out first of all to the gentleman from Massachusetts and the gentleman from Texas, the chairman of the Committee on Banking and Currency, that it is an obfuscation to talk about the utilization of trust funds for veterans loans. NSLI was depleted of every dime that it had in the bank by the previous President of this Nation for his own uses in whatever programs he deemed necessary. There is not any $7 billion there. That money cannot be borrowed. To talk about it is simply to confuse the issue.

The point of this amendment does not have anything to do with trust funds. The gentleman from Texas, the chairman of the Committee on Veterans Affairs (Mr. TEAGUE), is simply trying to say that if we do not change this law, in January, on the first of January of this coming year, 1970, there will be no money available for veterans loans, period.

You can talk about all of this business of gouging, which is a very cute way of confusing the issue, but it does not relate to the fact. The fact of the matter is that unless this law is changed there will be no money available for the veteran or the average home buyer. I do not understand all of this talk about gouging when there is no money available at 6 percent. That is the fact of the matter.

Now, let us talk about the issue. Let us quit crawling around and talking about something that does not have a doggoned thing to do with it. If you are going to deal with the problem do it honestly.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the chairman.

Mr. PATMAN. The gentleman said that the fund is depleted.

Mr. BROCK. It is.

Mr. PATMAN. Of course it has all kinds of obligations in there that have been purchased, and the average interest rate will probably go to 3.5 or 4 percent. Those obligations can be sold in the open market, and veterans can use that money.

Mr. BROCK. Does the chairman know of a 3.5-percent interest rate, and what it will bring on the open market? It will bring about 50 percent of book value—parity. Do you want NSLI to take that kind of a loss? Do you not know they cannot afford to do that? They cannot by law jeopardize funds that veterans invest in that fund over the years.

Mr. PATMAN. They could possibly go into the open market and get some for early maturity?

Mr. BROCK. Who will they sell them to?

Mr. PATMAN. The people that want them.

Mr. BROCK. At 3½ percent when they can buy U.S. Government bonds at 6½ percent? No sane person would buy at issue price, and they cannot sell for less.

Mr. PATMAN. Why would the gentleman get so heated up about using the money that is now coming in? Why not use it? It is not invested in anything.

Mr. BROCK. I am delighted to do that, but do not throw out this dream figure of $7 billion and say you are going to solve the veterans' housing problem in that fashion. Let us get down to facts.

Mr. PATMAN. The Secretary of the Department of Housing and Urban Development testified to this recently and we had a committee that went into it for months. The first question asked was, would it get more money, and there was testimony that it would.

Mr. BROCK. If you keep it at 6 percent, Mr. Chairman, you have no money; you have got none. You are going to prevent every veteran in this country from funding his housing program and I do not think it is right.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. BARRETT. Mr. Chairman, I move to strike the requisite number of words.

I think what we are honestly missing here today is what is needed to keep the interest rates down. Back in the Eisenhower administration the interest rates were raised to 4¼ percent. Two years afterward, it was raised to 4¾ percent. Then the Veterans' Committee was asked to raise it to 6 percent. A short time after that HUD raised the interest rates to 6¾ percent. I am sorry. I meant to say FHA raised it to 6¾ percent. Almost immediately after that HUD raised it to 7½ percent. Almost immediately after that the American Bankers Association raised the prime interest rate to 8½ percent.

What the gentlewoman from Missouri is trying to do here today is what we have tried several times on this floor to do and that is to get a downward trend in the interest rates.

The chairman of the full Committee on Banking and Currency is absolutely trying to get a downward trend in the interest rates rather than a spiral in interest rates, because they seem to follow a pattern. When you raise the interest rate 1 percent, then everyone else after that raises their interest rates.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I yield to the gentleman from Texas.

Mr. PATMAN. When I came here many years ago there was a very pressing campaign on the part of the veterans of World War I to have an adjustment in their pay. Some called it a "bonus" for the purpose of trying to make it appear unfavorable to the people. There was a bill which I introduced calling for $3.5 billion, H.R. 1, to pay that debt in full because they needed the purchasing power all over the Nation and because the debt should have been paid. I could not get consideration of the House to put a petition on the Speaker's desk under the rules. If 145 Members had signed it the bill would have been brought out for consideration. I got nearly 145 signatures and that figure was raised to 218 and we went ahead and got that.

We did that four times. That bill passed. Every veteran in this Nation on June 15, 1936, received a letter from Uncle Sam including a bond for the amount that he was entitled to, the average amount, $1,015. He could take those bonds—and everyone of them received them on the same day from the Post Office or from the rural carrier at the general delivery window—and they all got their money, $3,700,000,000 less the amount that had been borrowed which, of course, the veterans did not like because they did not borrow that much because the interest rates were high. They were all paid off. And four times by the petition of the American Legion. I attended the American Legion convention and the veterans themselves would, of course, endorse it. But the American Legion leaders who are good people and endorse many good things would not endorse it and it kept them from being paid for years and years.

Finally, it was vetoed by President Roosevelt and we passed it over his veto here in the House and it was sent to the Senate. It lacked eight votes of passing. But the next year we passed it without any trouble, with the help of the people. I do not accept just the leadership of the American Legion on this. I would insist with the gentleman from Texas (Mr. TEAGUE), let us settle it here now and tell the other body by defeating this amendment that we want to get that bill out of committee and bring it to the floor of the House here and let us vote on it. Let it be passed by the Senate and approved by the President and set up a $5 billion fund out of the $7 billion they have and let the veterans borrow their own money to buy their own homes at reasonable interest rates.

The CHAIRMAN. The question is on the amendment to the committee amendment offered by the gentleman from Texas (Mr. TEAGUE).

The amendment to the committee amendment was agreed to.

AMENDMENT TO THE COMMITTEE AMENDMENT OFFERED BY MR. BROCK OF TENNESSEE

Mr. BROCK. Mr. Chairman, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment to the committee amendment offered by Mr. BROCK: On page 44, line 24, strike out " 'January 1, 1970' " and insert in lieu thereof " 'October 1, 1971' ".

Mr. BROCK. Mr. Chairman, I do not need much time on this. It is simply a restatement of the past debate. We successfully amended the law to extend the provision for VA loans for another year.

I am suggesting that there should be no differential. There never has historically been any differential between the VA and the FHA. It seems to me to be the better part not only of valor but of judgment to extend this provision to the average homeowner as well as to the

veteran and apply it to FHA loans as well as to veterans' loans.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the gentleman.

Mr. PATMAN. Does the gentleman give as his reason that we should raise the FHA loans for all of the people because we are raising it on veterans?

Mr. BROCK. No, I do not, Mr. Chairman. I give as my reason the same reason I gave in supporting the amendment by the gentleman from Texas (Mr. TEAGUE). If we do not amend this law today, then there is not going to be any money for any person at any rate. I am not advocating an increase in interest rates. The chairman knows me better than that. I am simply saying that we want some money available for homebuilding in this country—and there is not any today. If the gentleman has his way, if we follow his way, if the ceiling is held as of the first of the year there is not going to be any money available to the average home buyer. I do not think that is fair.

Mr. PATMAN. Will the gentleman advise me of any evidence, documentary or otherwise, that would justify your saying or us in believing that if interest rates are raised, you will get more money. The evidence is that raising rates will not get more money.

Mr. BROCK. The chairman and I have had an argument going back 7 years about interest rates, and I do not think I need to repeat our difference in philosophy at this time. I am not advocating an increase in interest rates, as the chairman knows full well. I am merely saying that the market determines what the supply of money is. If we put on a false ceiling which prohibits money from becoming available to the average home purchaser, where does he go? What right do you have to shut off his efforts? If he wants to pay the 4 percent and can get it, more power to him. If he wants a mortgage and is willing to pay 7 percent and can get money at that rate, is that not his right of choice? By what right do you have to say that the average American family cannot buy a home because it does not fit some preconceived notion of yours about what interest rates should be? Who are you to make such a decision?

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. I believe the gentleman would certainly agree that rising interest rates will not give you more housing.

Mr. BROCK. I have not heard anyone suggest that.

Mr. BARRETT. Increasing interest rates has a tendency not to get more building started. It does in some respects have the tendency to encourage builders to go to the construction of high-cost housing. What we are interested in here, as we pointed out before, is in giving the 6 million people who are living in substandard homes adequate homes and good environment, and the only way we can do that is to get building construction—builders of all types—to go into the lower- and moderate-income housing categories. If they can make an equal profit in that field, as they can in building for the rich, certainly we ought to be going in that direction and providing adequate money to do so. But you cannot do it with high interest rates.

Mr. BROCK. I do not think the chairman, or the chairman of the subcommittee, is addressing himself to the point at hand. I do not advocate a raise in interest rates. All I am saying is that we should make money available for homebuilding at a competitive price so that the average American can make up his own mind as to whether he wants to buy or not. I am a little tired in observing those who point their finger at the average American and say, "You do not have the intelligence to make up your own mind." Give him a chance, will you? Let him have an opportunity to exercise his own free will, and I think he will do all right. He has for 200 years.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mrs. SULLIVAN. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The gentlewoman from Missouri is recognized.

Mrs. SULLIVAN. Mr. Chairman, I shall not take 5 minutes. I would like to ask the gentleman who preceded me a question. You served on the Commission on Mortgage Interest Rates?

Mr. BROCK. Yes, I did.

Mrs. SULLIVAN. And presumably, you agreed with the majority report, because you did not sign the minority views. But do you think the commission brought forth any solution for the mortgage interest rate problem?

Mr. BROCK. I think it suggested a number of very specific solutions. I think what we fail to recognize is that interest rates are not creatures of the moment. They have been pushed up by irresponsible action on the part of many people over many years, and I do not think you are ever going to get interest rates down until the Federal Government quits spending money that it does not have, because it has to take that money from the free market. When it creates a shortage of money in the market, it drives the price of that money up.

Let us get down to the basics. That is where your interest rates come in here. If we want to pull interest rates down, let us do something about that problem.

We also suggested many other specifics, as the gentlewoman knows.

Mrs. SULLIVAN. But in the long run, that was the basis of the majority report of the commission charged with studying mortgage interest rates: balance the budget and take off the ceiling on FHA and VA loans. This was their main suggestion. But they have come out with nothing concrete to make more mortgage money available at reasonable rates of interest, and that is what we were supposed to do in this study, the gentleman will remember.

Mr. BROCK. We could well do that if we just created money. I am not sure it would be worth it.

Mr. PATMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, in January 1969, housing starts were estimated at 1,900,000 for the year. After that estimate was made, Mr. Romney raised the rates three-quarters of 1 percent, to 7.5 percent. Did that cause housing starts to increase? It would have, if increasing the interest rates would cause more money to come into the market, but it did not. It did not get any more money into the housing market. Housing starts went down to 1.5 million, recently to 1.3 million and most recently it is estimated they will go down to less than 1 million starts by the end of this year.

This refutes the argument that if we raise interest rates we will get more housing started. That is absolutely ridiculous. We know it and everybody knows it.

The gentleman from Tennessee (Mr. BROCK) argues for high interest. He has a right to do that. He has as much right to his opinion as I have to mine. But I invite the attention of the Members to the fact that from 1938 to 1953 for 15 years, the Democrats under Presidents Roosevelt and Truman held interest rates on long-term Government issues down to 2.5 percent and below. During 15 years of the hardest times in this Nation that was done. That shows it can be done if we want to do it.

But commencing in 1953, under President Eisenhower, the first two bond issues were sold at 2⅞ and 2½ percent. That shows the Democrats delivered the matter of interest rates to the Republicans in good condition, and they immediately commenced raising the rates. Then for 18 years under Chairman Martin of the Federal Reserve Board it was raised. It was raised because they said it would be a deterrent to inflation. They said if we raised interest rates it would stop inflation.

We know the opposite is true. If we raise interest rates, the price of everything is raised, even of goods for sale which are on the shelves. That creates inflation.

On June 9 of this year, one of the Wall Street banks announced the prime rate would go up to 8.5 percent. That is the rate which General Electric and General Motors and IBM pay, but that is not the rate other people have to pay. They pay much higher rates. The prime rate was raised to 8.5 percent, an increase of one whole point. Do Members know how much that raise cost, going from 7.5 to 8.5 percent? Never before was it raised by more than one-quarter percent at one time, except once, when it was raised by one-half, but this time they raised it by one point.

The entire debt structure of this Nation was affected. The public and private debt amounts to more than a trillion five hundred billion dollars. If we pay the interest at the increased rate, that 1 percent on the debt, we will pay $15 billion every year on account of that interest rate increase to 8.5 percent on June 9.

Do Members know how much that will amount to? Every family in this country—and there are about 55 million families—will have to pay its share of that $15 billion a year increase. We should be looking after those families and

not working against them. They will have to pay several hundred dollars each this year and each year hereafter to pay their share of that $15 billion a year increase. That is not justice.

That is gouging the people. I commend the gentleman from Massachusetts (Mr. BURKE), for using the phrase, "Gouging the people." That is gouging in a way that really puts this country in jeopardy. It just should not be done.

I think the amendment offered by the distinguished gentleman from Tennessee (Mr. BROCK), should be defeated. The gentleman's only claim for it is in a logical way that we are raising the interest for the veterans so we should raise it for the others, too. I do not think that is a good argument.

We must tell the gentleman from Texas (Mr. TEAGUE), and others on the Veterans' Committee, that we want that bill to use NSLIC funds for veterans' housing to come out on the floor at once—at once—at once.

That bill would set aside $5 billion of the veterans' own reserve money which they paid in themselves. We can use that money as they get more money in for the purpose of permitting the veterans to purchase their homes. These are the veterans who went to war and bared their breasts to the enemy's bullets.

Our veterans are entitled to a square deal. We can give them a square deal by letting them borrow their own money at 6 percent instead of charging the exorbitant and usurious rate of 9 or 10 percent.

I hope the amendment will be voted down.

Mr. DEL CLAWSON. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, unfortunately the chairman of our committee has tried to distort the amendment into a high interest rate debate.

The gentleman from Tennessee has no intention of increasing interest rates, any more than did the gentleman from Texas (Mr. TEAGUE), when he offered the amendment which we passed in connection with the Veterans' Administration.

As I understand the amendment—and the gentleman who offered it can certainly correct me if I am wrong—it would merely extend the present authority of the Secretary for 1 year, making this authority coterminous with the provision passed in the amendment of the gentleman from Texas (Mr. TEAGUE), for the Veterans' Administration.

There is no effort nor intention to raise interest rates. None of us wants to raise rates. What we are doing is extending authority.

We are not for high interest rates.

When the chairman of the committee referred to a point of delivery made from a previous Democratic administration to a Republican administration, he could not have meant the latest delivery of the Democrats to the Republicans. I believe we had an altogether different situation from the one which was described by the chairman. We had high interest rates then. We had the high cost of money last January, just as today.

Mr. BLACKBURN. Mr. Chairman, will the gentleman yield?

Mr. DEL CLAWSON. I yield to the gentleman from Georgia.

Mr. BLACKBURN. I thank the gentleman for yielding. I just want to make an observation.

The gentleman from Texas, my chairman, has tried to make this a partisan issue.

First, let me point out that I personally supported the previous administration in its request that we remove the ceiling for interest rates on FHA loans. That move was not made by the previous administration because the previous administration liked high interest rates. Nobody likes high interest rates. I am sure the gentleman from Tennessee (Mr. BROCK), does not like high interest rates.

This move by the previous administration, which I supported, was nothing more than a recognition of the economic facts of life; that is, if money is to be made available to that money market, we have to pay the going rate of interest.

I thank the gentleman for yielding.

Mr. DEL CLAWSON. I thank the gentleman.

This amendment merely extends what was done in the previous administration for 1 more year.

I believe the gentleman's amendment should be passed.

While I am on my feet, I want to make another observation. Unfortunately, there has been a misunderstanding in connection with the sponsorship of this bill. My name was placed on it as a sponsor, without my permission. I was not and have not yet been contacted to join in the sponsorship of the bill personally. Because I did not object nor protest the reporting of the bill in the subcommittee or the full committee, my support must have been assumed. That assumption was erroneously made.

There are a number of provisions in the bill with which I do not agree. I do not always favor all the provisions of an omnibus bill, and certainly there are some sections of this bill which do not warrant my support. It may be that I will have to vote against it.

However, there are other sections that represent the type of housing provisions we should continue; FHA, housing for the elderly and the handicapped, GNMA, FNMA, and the extension of other programs that have been successful. There are others, however, such as rent supplements, interest subsidy, the public housing expansion of contributions in this bill that do not warrant the support of the committee.

In connection with the specific amendment before us, it certainly should be accepted by the Committee, and I hope every Member will support it.

The CHAIRMAN. The question is on the amendment to the committee amendment offered by the gentleman from Tennessee (Mr. BROCK).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 70, noes 61.

Mr. PATMAN. Mr. Chairman, I demand tellers.

Tellers were ordered, and the chairman appointed as tellers Mr. BROCK and Mr. PATMAN.

The Committee again divided; and the tellers reported that there were—ayes 82, noes 71.

So the amendment to the committee amendment was agreed to.

The CHAIRMAN. The question now recurs on the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

Mr. DON H. CLAUSEN. Mr. Chairman, I rise today in support of H.R. 13827, the Housing and Urban Development Act of 1969.

The Federal Government's announced homebuilding goal is 26 million housing units in the next decade, and the congressional mandate calls for 2.7 million housing starts annually to meet this goal. Last year there were approximately 1.5 million starts. This year, current trends would suggest we may not even achieve 1 million starts. Thus, it is obvious that, rather than forging ahead boldly to meet this Nation's critical housing shortage, we are falling seriously behind. In fact, as we approach calendar 1970, we find that we are already facing a national deficit of some 2.9 million housing starts.

This basic legislation which is now before us is a 1-year bill which strives to continue and extend the Nation's homebuilding program. Among its most worthy provisions, in my judgment, are the extension of FHA mortgage insuring authority, improvements in rural housing programs that are desperately needed, and an important new provision to the existing flood insurance program to make this protection more widely and more promptly available.

At a time when the homebuilding industry and the home-buying public are faced with the highest interest rates in a century and a grossly inadequate supply of mortgage credit, this legislation has special meaning for my congressional district; an area that is not only especially hard hit by the homebuilding slump and the present tight money crunch, but one which is heavily dependent on the forest products industry.

It is for these reasons that I am particularly enthusiastic about Operation Breakthrough, introduced as an amendment to this act by the gentleman from Illinois (Mr. ANDERSON), which would accelerate and facilitate the use of improved technology and materials in the homebuilding market, including the use of prefabricated units and products in federally assisted housing projects. Certainly, this amendment is in keeping with the 1966 Housing Act wherein the Congress is on record as strongly endorsing the promotion, acceptance and application of new technology and techniques in order to reduce costs, improve quality and increase the production of housing units.

Operation Breakthrough is a bold, new program to provide low-cost high-quality housing on a volume basis.

If there was ever a time when dynamic thinking, new innovations, and improved techniques were needed to meet this Nation's housing goal and its commitment to the housing needs of the American people, that time is now.

I share the concern of many of my colleagues over the situation which has developed with regard to the neighborhood development program. As a result

of a funding freeze imposed on HUD programs since April 30 of this year, many cities are now losing non-cash local grant-in-aid credits. Now, with many of these credits having reached their 3-year maturity and expiration date, I strongly endorse and support the provision in this act which extends non-cash credits from 3 to 4 years. This will have the effect of providing a much-needed breathing spell for cities such as Napa, Calif., that are trying to help themselves, and I feel very strongly that such cities must be given every opportunity to do so by the Federal Government.

Therefore, in view of the foregoing, I believe passage of this vital legislation to be in the best interest of the Nation, and I urge my colleagues to consider it favorably in light of the critical housing shortage that now confronts the country.

Mr. BYRNE of Pennsylvania. Mr. Chairman, as we are considering H.R. 13827, the Housing and Urban Development Act of 1969, I am pleased to bring to the attention of my colleagues a a speech delivered on this subject by the distinguished mayor of Philadelphia, the Honorable James H. J. Tate. He spoke before the National Association of Housing and Redevelopment Officials at Bal Harbour, Fla., on October 14, 1969:

REMARKS BY MAYOR JAMES H. J. TATE, NATIONAL ASSOCIATION OF HOUSING AND REDEVELOPMENT OFFICIALS, BAL HARBOUR, FLA., OCTOBER 14, 1969

I am very happy to join you today in the attempt to find clarity and unity in the overwhelming national problem of housing—the task of providing decent homes for the vast American public. Of course I am most familiar with the housing and development programs of the city of Philadelphia. I do believe that my city's efforts in this field have had a profound iinfluence on the national scene.

To begin with, one of the cornerstones of the Philadelphia approach has been to develop programs to suit people—not to move people to suit some artificial criteria. Right from the first urban renewal program for Philadelphia, more than twenty years ago, my city has striven to minimize relocation—to deal with the problems within the neighborhoods on the scene.

When I was still a member of City Council, I supported people-oriented housing programs. I was distressed then to see the approach developing at the time—of individual projects instead of total resolutions—of "project" concentration rather than the neighborhood approach.

Our concentration turned to the neighborhoods, in our attempt to find total solutions for the communities. We began to acquire scattered, vacant, and derelict properties, and thus the "used house" program began to shape itself.

These neglected houses, once vacated, became breeding places for crime and disease. They were the centers of rat infestation that threatened entire blocks of homes. They were sites for gang meetings, vagrants, and even of rapes and murders.

That is when we began our program to eliminate derelict properties. I moved the thrust from individual demonstration projects to facing up to the whole range, dealing directly with the total housing picture.

When I found the usual resistance on the Federal level I went to Washington to insist on this new idea for older houses.

Finally federal assistance did come through, and it enabled us to accomplish 5,000 rehabilitations of neglected vacant properties in a two-year period—a record which I believe was unsurpassed in the nation. We still have 40,000 to go.

These rehabilitations—the "used house" program—have served a number of social purposes. Initially, they became a social stimulus—a source of pride—for the entire block.

Other residents who were beginning to accept environmental deterioration as inevitable were encouraged to undertake their own private rehabilitation program—to turn a fresh face toward the street. We have in Philadelphia, for example a marvelous phenomenon called the "Philadelphia More Beautiful Committee," which has organized volunteers of more than 3200 "Clean Blocks" throughout the city.

These "used homes" are made available to low-income buyers, enabling these families to avoid the unfortunate stigma of project housing.

Thereafter, as the Federal government moved toward more community-oriented programs, Philadelphia was well prepared. My city in fact, led all cities of the United States in the use of the tools for public housing, urban renewal, and rehabilitation activities, mainly because we in Philadelphia had already commenced many of these same programs.

We are still moving ahead in our efforts to make decent housing a reality for every Philadelphia family.

In preparation for an entirely new look on housing, Philadelphia has just adopted a completely new Building Code, which I believe will have an enormous impact on our housing problem. Not only does the new Code open the way for using the newest construction materials, but it establishes new standards based on performance, rather than rigid adherence to a set of arbitrary and obsolete specifications.

Citizen involvement is manifested in the fact that Philadelphia has more than thirty non-profit housing corporations involved in housing rehabilitation. These include all manner of citizens groups united in housing for their own immediate neighborhoods—the communities they know best.

Foremost among these is the Philadelphia Housing Development Corporation, a quasi-public agency which administers its own programs of rehabilitation and construction and aids other neighborhood-based non-profit housing corporations. More than forty percent of all units produced in the entire nation by OEO-assisted corporations were produced by our own PHDC.

Recently we have centralized responsibility in our housing efforts. To give direction to our overall program, first, I appointed a Deputy Managing Director for Housing. He is Gordon Cavanaugh, an active member of NAHRO. Gordon also wears two other hats—"hard hats" of course. He is Chairman of the Philadelphia Housing Authority as well as Executive Vice President of the Philadelphia Housing Development Corporation of which I just spoke.

Gordon deserves a lot of credit for our "scattered site" housing program, and carried the ball on the local Administration plan just approved by the City Council which will permit small numbers of public housing units to be built in "any" neighborhood throughout the city, without prior Councilmanic approval.

This new legislation manifests the possibility of a great expansion in public housing, and without affecting existing neighborhoods. By limiting each proposed development to no more than ten housing units, we can avoid the adverse effects on schools, traffic, parking, playgrounds, and other facilities with which I am sure you are all so familiar, and which are constantly raised as arguments against public housing.

Now I do not mean to give the impression that we in Philadelphia have overcome our housing problem entirely. We still have an estimated 28-thousand derelict properties in the city—a real problem of immense proportions.

But I definitely *do* mean that we are engaged in a determined fight to bring decent housing to our deserving citizens in Philadelphia.

With PHA and PHDC cooperation we are now using the "used house" approach to make homes available at low cost. These private homes are offered to public housing rental tenants as their incomes reach beyond PHA limits, and some of these tenants are now becoming home owners.

We have found for that by virtue of our basically sound housing stock, Philadelphia is ideal for housing rehabilitation. The older sections of the city are characterized by block after block of single-family brick row homes, and many of these areas are now under rehabilitation, thus producing good housing and good tax ratables.

As I said earlier, we are determined to help *people*, not abstract projects. If we can effectively restore these derelict homes, we can help communities to stay alive and healthy—which is recognized as the very heart of urban living.

Most people want to stay in their own neighborhoods, if only those neighborhoods can be made livable and attractive. This enables people to retain their neighborhood ties to schools, churches, and community friendships, and local merchants or stores.

On the other hand, the precious American right to social mobility must be preserved. At a recent meeting with Secretary Romney, we discussed the issue of integration in the suburban communities.

We, the mayors of the big cities, pointed out to Secretary Romney that we have the problems of overcrowding while the suburbs have the space. The urban centers have the unemployment while the suburbs have fresh job opportunities. The urban centers have the poor people while the suburbs have the middle class.

Obviously a large percentage of the new housing to be developed in the next decade must be produced outside the central cities. Hopefully this will be done under better conceived planning as recommended by the Advisory Commission on Inter-Governmental Relations with respect to the endless suburban sprawl, restrictive zoning, and wasted land.

There is a specific need for the immediate establishment of a national urban policy for guiding the location and character of future urbanization involving the federal, State and local governments in collaboration with the private sector. Such a policy also would call for influencing the movement of population and economic growth among different types of communities in different ways so as to achieve generally a greater degree of population dispersion within metropolitan areas.

Secretary Romney said he recognized the problem, and promised to use the full range of federal powers to make these open spaces truly open to all, and not just the affluent.

Human responsibilities, he said, cannot be contained by urban boundaries. He suggested the expansion of these responsibilities to the state and suburban levels. But, like everything else, nothing has happened in ten months. We're still waiting.

I truly believe that the vast potential of "Operation Breakthrough" may become a reality. We in Philadelphia have committed ourselves to assist this monumental undertaking in every way we can.

"Operation Breakthrough" can help to fulfill the promise of the 1968 Housing Act, and I am looking forward to its implementation. The demand and the opportunity is present "now." I am hopeful we can move ahead without bureaucratic fumbling and with more adequate funding by the Federal Congress and our Federal Administration. That's real unity.

The cornerstone of Philadelphia's housing and neighborhood improvement programs has been to provide full opportunity to all of the segments of our population for decent housing in an attractive environment. Our goal is to create desirable residential communities throughout the city so that there is full and free choice for all groups. Those who want to leave the ghetto should be given that chance. Those who want to remain in their present neighborhood should be assisted in making their area attractive and free from blight.

We continue to devise new programs and new approaches in order to meet these objectives. We face similar obstacles—not enough money, a prejudice in certain areas against minority groups, and insufficient land areas to develop new housing. Nevertheless, we continue to advance towards the goals and have made significant progress.

Permit me in closing to refer to our strong presentation to the National Commission that the Bicentennial be observed in 1976 with Philadelphia as a focal point.

In preparing for the Bicentennial, we—with full involvement of those in the slums and ghettos—have proposed an Agenda for Action which is designed to eliminate the substandard conditions in these areas and to demonstrate to the world that we are capable of providing a good life for all segments of our population, regardless of income or race.

Mr. FRASER. Mr. Chairman, I am happy to note that H.R. 13827 repeals the provision in the 1968 Housing Act which established income limitations for the section 312 rehabilitation loan program.

I know that housing and redevelopment agencies throughout the country are discovering that the income limits seriously impede the operation of many rehabilitation and code enforcement programs. In some areas the income limits are so restrictive as to make the section 312 program virtually inoperable as a neighborhoodwide rehabilitation tool.

In my district, the Minneapolis Housing and Redevelopment Authority estimates that 50 percent of the people who had been eligible for section 312 loans prior to the enactment of the 1968 act are no longer eligible. Most of these people are younger homeowners with incomes slightly above the 221(d)(3) limits. These are the people we need most to provide stability in our older residential neighborhoods. But we are actually encouraging these people to leave the neighborhood when we tell them that they must comply with rehabilitation standards established for the project area but that they can no longer obtain the 3-percent loans.

As a sponsor of legislation to repeal the income limits, along with the gentleman from Rhode Island (Mr. ST GERMAIN), I would have liked to have seen this bill repeal the limits without any qualifications. However, the committee saw fit to qualify the repeal by adding a proviso which states that in processing applications for loans the local public agencies would be required to give priority to those persons within the 221(d)(3) limits.

If a system of priorities does become necessary because of a limitation of loan funds, this system should certainly not result in any permanent rejection of loan applications by HUD because the applicant is over income. At the most, approval of these applications should be delayed until additional funds are available. Once a local public agency certifies that it has met the loan needs of project area residents with eligible incomes, the local agency should be able to start processing over-income applications without any further delay.

Guidelines with this flexibility will, I am sure, help to make the section 312 program more operable.

Mr. PATMAN. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. FLOOD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 13827) to amend and extend laws relating to housing and urban development, and for other purposes, had come to no resolution thereon.

VIETNAM MORATORIUM

(Mr. BURLESON of Texas asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. BURLESON of Texas. Mr. Speaker, the so-called Vietnam moratorium started last week, and reportedly to continue until the middle of November, can have no other effect than grave damage to the United States. At the minimum, the publicity these activities are receiving will encourage the North Vietnamese Communists to continue and intensify their intransigence already demonstrated in the months of futile talks in Paris.

There are mountains of evidence to indicate that this vocal minority does not speak for the millions of silent Americans whose deep desire for peace burns as brightly as the fires of our fighting men's camps but who know that a peace without honor and justice is no peace at all.

While many college campuses and the streets echo the rabble of the dissenters, there are the voices of the quiet and the rational to give encouragement.

I take great pride in the counteraction to the so-called moratorium, by a representative group of college students in Abilene, Tex., who observed a special day of Prayer for Peace on October 15.

I am pleased to submit an exact copy of a telegram sent to the President, affixed with over 1,200 signatures of collegians in Abilene, signing their message as "Christian Collegians Praying for Peace":

ABILENE, TEX.,
October 14, 1969.

President RICHARD M. NIXON,
The White House,
Washington, D.C.:

DEAR MR. PRESIDENT: As world citizens who are directly a part of the struggle for the control of men's minds, and more particularly as concerned collegiates who are attempting to interpret the world events which are shaping our destiny, we have become increasingly aware of the awesome responsibility which you share in making decisions which directly affect literally millions of lives. Naturally, we are concerned; indeed deeply troubled at the loss of lives on both sides of the present conflict, and this sense of human concern is acutely heightened by our unique Christian commitment. We, the undersigned represent a significant portion of the 6,000 college students in Abilene, Texas who are convinced that there is a better way in prayer and we have covenanted ourselves together especially for this day October 15, in a concerted day of prayer in your behalf. Please know that we are continually praying for your wisdom, insight, and perception and ask the Creator that He aid you in bringing peace on earth once again.

Respectfully,
CHRISTIAN COLLEGIANS PRAYING FOR PEACE.

NARCOTICS PENALTIES

(Mr. POFF asked and was given permission to address the House for 1 minute.)

Mr. POFF. Mr. Speaker, it is an error to say that the Justice Department favors less punishment for drug offenses. Rather, the Department recommends a realistic readjustment in statutory penalties which will achieve more equitable, more efficient, and more effective enforcement of criminal drug laws.

Statutory penalties, no matter how great, seldom deter crime. Convictions, not statutes, deter crime. Convictions can best be achieved by making the punishment fit the crime. This gives the law the credibility it must have to command citizen respect.

The present drug penalty structure invites citizen disrespect. It is riddled with inconsistencies, conflicts, and contradictions. The penalty for possession of marijuana is a minimum of 2 years, while the penalty for possession of LSD has a maximum of only 1 year with no minimum whatever. For the second offense of possession of marijuana, the penalty is about the same as the penalty for manslaughter or sabotage. Such statutory absurdities are self-defeating. The prosecutor is reluctant to prosecute. The jury is reluctant to convict. The judge is reluctant to impose the penalty. And the drug offender gets a de facto pardon while society is penalized.

The Justice Department has devised three new penalty packages and invited Congress to choose the package it considers most appropriate. While penalties are graded differently among the three packages, all three have certain features in common.

First, all three distinguish among drug offenders by types—the user, the peddler, and the professional criminal.

Second, all three penalty packages distinguish between possession offenders by types—the user-possessor and the seller-possessor.

Third, all three distinguish between the first offender and the repeat offender.

Fourth, all three packages include a mandatory parole component built into every felony penalty except those fixed for the professional criminal, the purpose of which is to compel every felon to undergo a period of supervised rehabilitation before he is released to the streets again.

I am not yet prepared to say which of the three penalty packages is best. However, whichever package the Congress chooses will be a realistic, hardheaded

improvement over the present penalty system which barks so loud and bites so easy.

RESOLUTION DIRECTING COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE TO INVESTIGATE PRACTICES OF WASHINGTON GAS LIGHT CO.

(Mr. CUNNINGHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CUNNINGHAM. Mr. Speaker, I am today introducing a resolution authorizing and directing the Committee on Interstate and Foreign Commerce to conduct a full and complete investigation and study of the practices of the Washington Gas Light Co. in the District of Columbia and environs in the sale, installation, and servicing of heating and air-conditioning units.

From personal experience, an installation they made in my home was the poorest workmanship I have ever seen. Their service is bad, and in talking with the installers, I found out some things that lead me to believe—and I feel I have evidence—that there are a lot of underhanded methods used between the Washington Gas Light Co. and their contract-out installers. I would also point out that a representative from the Washington Gas Light Co., from whom I bought the unit, was to inform the company that I was to receive a compact unit different from the monstrosity which was installed, which is a Bryant unit and which is practically falling apart after just a short period of time.

I would also want to bring this to the attention of those in the Congress who are interested, as I am, in consumer protection. I earnestly hope that the Interstate and Foreign Commerce Committee, of which I am a member, will investigate these policies and practices of the Washington Gas Light Co. in the near future.

In my district we can rely fully upon our gas company and our power company and when we have dealings with them there is never any trouble afterwards. So I single out the Washington Gas Light Co. because throughout the country other gas companies are reliable, but my personal experience would indicate that the Washington Gas Light Co. is totally unreliable.

When such an investigation can be made is not definite at this time because of other pressing business, but I am going to pursue this matter until the resolution I am introducing today is heard by the full committee or perhaps by the investigations subcommittee, of which I am a member. When I spoke previously on this matter here in the House I received numerous calls from persons who feel as I do about the shenanigans of the Washington Gas Light Co. and the poor workmanship of the Bryant units.

ITALIAN-BORN SALVADOR E. LURIA WINS NOBEL PRIZE

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ANNUNZIO. Mr. Speaker, in 1965, the Congress of the United States passed amendments to the Immigration and Nationality Act which for the first time did away with the discriminatory national origins quota system.

Four Presidents—Truman, Eisenhower, Kennedy, and Johnson—had urged that the archaic national origins quota system be repealed before the Congress of the United States took this historic action 4 years ago. I am pleased to say that I was one of the early supporters of this immigration reform bill which was enacted in the 89th Congress.

One of the great benefits which has accrued to our country since the repeal took place was to clear the backlog of prospective immigrants from the Eastern Hemisphere countries, thereby permitting the scientists, doctors, professors, lawyers, teachers, nurses, and other professional people wishing to immigrate to the United States to come here without encountering lengthy delays because quota numbers were unavailable.

Immigrants, and the sons of immigrant parents, have made tremendous contributions to the growth and development of America, and to the well-being, not only of Americans, but of all mankind.

I want to share with my colleagues another vivid example of an immigrant who came to our shores, and by his dedication to his profession, his hard work, and his determination, made a great contribution not only to man's never-ending fight to conquer disease, but to his adopted country—America.

America is proud of her adopted son—Italian-born Salvador E. Luria—of the Massachusetts Institute of Technology, who was named on October 16, along with Max Delbreuck and Alfred D. Hershey, to jointly receive the $75,000 Nobel Prize for physiology and medicine in recognition of their efforts to solve the mysteries of viruses and virus diseases.

In announcing the three winners, the Caroline Institute said that the work of the three researchers, centering on bacteriophage—a type of virus that infects bacteria rather than ordinary cells—since around 1940, has had great impact on biology in general. The researchers worked independently of each other, and Salvador Luria, who is 57 years old, stated that he first was struck with the idea of working on viruses while sitting on a streetcar in Rome in 1938. Professor Luria was at his home in Lexington, Mass., when he first learned of the Nobel Prize he had won. The Caroline Institute referred to Luria, Delbrueck, and Hershey as the three leading figures of bacteriophage research and expressed deep gratitude for their work.

Mr. Speaker, the Congress, by making a major revision of our immigration law in 1965, has made it possible for our country and our people to benefit from the outstanding contributions of many more great men like Professor Luria.

I take this opportunity to express my appreciation for the virus research which has taken place as a result of the efforts of Nobel Prize winners Luria, Delbrueck, and Hershey, and to congratulate them on meriting this high honor. I want to extend to them my best wishes for abundant good health and continuing success in their endeavors in the years ahead.

At this point in the CONGRESSIONAL RECORD, I would like to include an article from the October 24, 1969, edition of Time magazine about these three eminent biologists. The article follows:

A NOBEL THREESOME

Dr. Salvador Luria, 57, washing the breakfast dishes in Lexington, Mass., was incredulous when a neighbor interrupted to report what he had just heard over the radio. Dr. Alfred Hershey, 60, also was skeptical when word reached him at Cold Spring Harbor, N.Y. Dr. Max Delbrück, 63, was disgruntled; it was only 5 a.m. in Pasadena when a reporter called him. Telegrams from Stockholm soon confirmed the news. The three biologists (only Luria is an M.D.) had been jointly awarded the 1969 Nobel Prize in Physiology and Medicine for their work between 1940 and 1952 in microbiology and genetics. The three will divide equally the award of $73,000.

All three of the biologists were honored for their experiments with bacteriophages, a group of viruses that infect bacteria. Scientists had long know that after it invades, a bacterial cell, a virus multiplies rapidly into such great numbers that the cell bursts, releasing a host of identical viruses that seek out and enter other cells, where the process is repeated. By studying these viruses, researchers hoped to learn how more complex forms of life reproduce and pass on hereditary traits.

Coat of Protein. Delbrück, who was born in Germany, and Luria, from Italy, met at Vanderbilt University in 1940 and began to cooperate in their studies of bacteriophages. Luria soon discovered that mutations (a variation in characteristics from one generation to the next) occurred in the viruses, and that these changes were passed on to succeeding generations. Delbrück found that the genetic materials of different kinds of viruses, infecting the same cell sometimes combined, producing a new and different kind of virus.

Michigan-born Hershey, who began exchanging information with Delbrück and Luria in 1942, found more conclusive evidence for the genetic recombination that Delbrück had discovered. In 1952, Hershey proved that the virus, which consists simply of nucleic acid (DNA) surrounded by a coat of protein, leaves its coat behind as it invades a cell. So it must be the DNA that contains the genetic information.

These and other discoveries led scientists to concentrate on the structure of the DNA molecule. The finding in 1953 by James Watson and Francis Crick that the typical DNA molecule consists of a double helix enabled scientists to reduce to relatively simple chemical terms the process by which inherited traits are passed on. But it was the contributions of Delbrück, Luria and Hershey that, in the words of the Nobel committee "set the solid foundation on which modern molecular biology rests."

The three winners are still actively engaged in research, Delbrück at the California Institute of Technology, Luria at M.I.T. and Hershey at the Carnegie Institution of Washington's genetic-research unit at Cold Spring Harbor. Only a fortnight ago, when the three met and compared notes, none had any idea of the honor that the next week would bring.

NOVEMBER 13 PEACE PROTEST BEING ORGANIZED BY PROS

(Mr. PUCINSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PUCINSKI. Mr. Speaker, the No-

vember 13, 14, and 15 peace march scheduled for Washington is being organized by some of the Nation's top apologists for the Communists—professionals who have made a reputation of denouncing the United States and glorifying all of those things emanating from the Soviet Union.

Let there be no mistake. This second so-called moratorium scheduled for Washington is not being organized by the same young idealists how, by the tens of thousands, participated in last Wednesday's moratorium throughout the Nation as a peaceful protest against America's involvement in Vietnam.

The November exercise is being headed up by such professionals as David Dellinger and Jerry Rubin—both presently under indictment and standing trial in Chicago for conspiracy to incite a riot last August.

Also moving in and out of the November demonstration plan for Washington is Sidney Lens, an old pro in Soviet apologia and a self-styled Chicago-based historian who has consistently failed to see the real menace of communism and its threat to world peace.

I participated in a 2-hour radio program Sunday in Chicago over station WMAQ with Mr. Lens on the effects of the moratorium.

This House should be advised that Mr. Lens and his followers do not want an accommodation to end the war in Vietnam; they want a confrontation for American surrender of South Vietnam to the Communists.

Mr. Lens made it very clear that unless there is a total capitulation by the United States of South Vietnam to the Communists, he and his associates will continue to escalate demonstrations against America's involvement in the Vietnamese conflict.

When I asked Mr. Lens whether his group would continue its demonstrations, even if President Nixon were to announce an orderly withdrawal of troops from Vietnam and guarantee an American disengagement, Mr. Lens replied that this would not alter their plans for continued mass demonstrations.

Mr. Lens' ultimatum to the President that we immediately withdraw all of our troops unilaterally from Vietnam and sever our relations with the Thieu government is nothing more than an echo of the Communist line and far transcends the principles of responsible free speech and orderly dissent.

I hope the young people of America, who deserve the highest praise for their orderly behavior last Wednesday, will now join President Nixon and the rest of the American people in denouncing the tactics of these hard-core apologists for the Communists, who are sponsoring the November demonstrations here in Washington.

I hope the young people of America will join the President in serving notice on Hanoi that the United States, indeed, does want to disengage itself from the Vietnam conflict but that it will not do so at the cost of surrendering the South Vietnamese people to the most brutal bloodbath in man's history.

Sidney Lens and his followers cannot understand that we are not fighting only for a piece of real estate known as South Vietnam. Our struggle in South Vietnam is a manifestation against the global Communist conspiracy which continues in its evil design to take over all of Southeast Asia; the Middle East; Africa, and, ultimately, South America.

I hope, Mr. Speaker, that between now and November 13 we will be able to place in proper perspective the role that young Americans, with all of their idealism for the future of the world, can play in developing an orderly American foreign policy which will help us prevent future wars, but at the same time help us provide protection for people who seek nothing more than the same liberties we enjoy as Americans.

America need not be the policeman of the world but it must provide the leadership for victory of human dignity over tyranny.

I call upon the faculties of American universities to rise to the great challenges of our time and to rally their students to a deeper understanding of the continuing threat that the Soviet Union poses to man's freedom.

I call upon the scholars of this country to put before their students the totality of the problem and not to limit themselves only to the narrow confines of the Vietnam conflict.

I call upon the intellectuals of this country who have the highest responsibilities for leadership to rally the forces of America toward an understanding that the Soviet Union has kept the world in turmoil for 22 years since the end of World War II and today continues its conspiracy to undermine those institutions which allow our intellectuals the great privilege of self-expression and intellectual pursuits.

I call upon the intellectuals of this country to look at Czechoslovakia and see the tragic consequences that ensued just recently when the scholars of that Communist-dominated country tried to develop greater freedom in their intellectual pursuits. The brutal destruction of their efforts by Soviet troops should be a sober lesson to all of those in this country who profess to cherish intellectual freedom.

Mr. Speaker, I call upon the Members of this House to rally behind President Nixon and to show a unified front both in this Chamber and in the other Chamber. Let us in Congress provide the leadership for the American people to rally around the Commander in Chief of our Armed Forces and the constitutional President of the United States who has the awesome responsibility of leading us out of war and charting for this Nation and this world a course of enduring peace and freedom for mankind.

We here in this Congress ought to put aside whatever differences there might be and show Hanoi that America is united behind its President.

This in my judgment is the most meaningful, the most fruitful, and the shortest road to peace in Southeast Asia.

MILROW NUCLEAR CALIBRATION TEST ON AMCHITKA ISLAND

(Mr. HOLIFIELD asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. HOLIFIELD. Mr. Speaker, I reported to this House on October 6, 1969, about my trip to Amchitka Island to observe the Milrow nuclear calibration event which took place on October 2. In my report to this House I stated that the test was a complete success.

I have a report, which will be made public by the Atomic Energy Commission this afternoon, on the first complete assessments of the results of the detonation. Studies are continuing and a final report will be available in some 6 months or so. Specifically, I can report that there was very little damage to a few utilities and hutments near ground zero; there was generated a ripple in the water near the island which did not exceed 2 inches; there was not experienced the increase in seismic activity, as had been expected; there appears to have been no appreciable surface motion on the Rifle Range Fault, the closest known fault to ground zero; there was no significant damage to the ecological systems at Amchitka and the surrounding waters, and this included trout and salmon, the king crab and the sea otter; no radiation levels above background have been detected.

I can state that this calibration test, Milrow, went as smoothly as a textbook laboratory experiment. There are still clamors that some sort of commission look into the AEC's activities and report to the President on what is being accomplished and not accomplished in the underground testing field. Do these people really believe that the AEC is a free agent, that the AEC unilaterally decides what will be done and then goes ahead and does it? I would guess that these people never heard of the budget process. I am positive that they are not aware of reviews the AEC makes to insure safety. On that basis I would like to include later in the RECORD an AEC document, "Reviews To Insure Safety of Nuclear Operations."

I would like to point out there are two further reviews made of the AEC's testing program. The first is done by the so-called Under Secretary's Committee of the National Security Council which is chaired by the Under Secretary of State. The other members of this prestigious group are the Deputy Secretary of Defense, the Director of the CIA, the Director of the Bureau of the Budget, the Director of the Arms Control and Disarmament Agency, the Chairman of the

Atomic Energy Commission, the Chairman of the Joint Chiefs of Staff, and the President's science adviser. The deliberations of this body are subject to further review by the President.

I would further like to point out to those who are unaware of the governmental review processes that the Joint Committee on Atomic Energy holds open and executive hearings on all phases of the AEC's plans and budget. There are other committees in this Congress that hold the same kind of hearings.

Now we get to the visceral question of risk versus benefit. Until such time as this country decides to stop underground nuclear testing either unilaterally or by treaty, the AEC must follow a mandate established by the U.S. Senate which calls for four safeguards to our national security. One of these safeguards calls for an effective program of underground testing. The AEC is conducting such a program.

The sponsors of these various bills to appoint commissions want to have studies made on what could likely happen. The AEC makes these studies. The weapons laboratories do these studies on the world's best computers using inputs from the world's greatest experts in every discipline involved. These results are then examined by just about all the safety panels under contract to the AEC. But there comes a time when one has to fish or cut bait, when one must decide when to stop studying and go do it. This is what the AEC has done; they built this test experience by conducting four high yield tests in Nevada, Faultless, Boxcar, Benham, and Jorum. The data from these tests were analyzed and it was stated that the megaton-sized Milrow test would provide no surprises at Amchitka. There were no surprises unless we consider the fact that the after detonation seismic activity was much less than anticipated. This might be called a pleasant surprise.

The material referred to follows:

PRELIMINARY REPORT ON EFFECTS OF MILROW DETONATION, AMCHITKA ISLAND, ALASKA, OCTOBER 2, 1969

The following early assessment of the effects of the Project Milrow nuclear test has been compiled by the Atomic Energy Commission's Nevada Operations Office. Only minor effects have been observed.

Milrow was detonated 4,000 feet under the surface of Amchitka Island, Alaska, at 12:06 p.m. Bering Daylight Time, October 2, 1969. The detonation had an explosive force of about a megaton of TNT and registered 6.5 on the Richter scale as had been publicly predicted.

AMCHITKA GROUND MOTION EFFECTS

A few rock slides and earth slumps occurred along the cliffs on the island. Examinations of the terrain of the island have shown only minimal damage consisting of minor cracking in fill sections of the roadways, sloughing of water saturated embankments, and slight displacements of some of the temporary hutments and facilities. No damage resulted to the airfield, microwave communications systems, power plant, water system (except for two broken water pipes which were quickly repaired), harbor facilities, or permanent camp.

Damage assessment teams reentered the Amchitka main camp, airport and Constantine Harbor facilities about two hours after the detonation. The main camp was reopened for feeding and housing services by 8:00 p.m. the day of the shot and normal jet air service was resumed at the Amchitka airfield on the following day.

The building near ground zero in which the nuclear device components and accompanying instruments were assembled in a 50-foot long steel tube is still standing. However, some siding panels were jarred loose as a result of the blast.

As predicted, ground motion was felt as fairly strong by personnel at the control point 28 miles from ground zero on the northwest tip of Amchitka, and there was no damage. The ground motion was barely perceptible to observers on Adak about 200 miles away. Beyond Adak, the motion was only detectable by sensitive seismographs.

Aboard the USS Princeton, the shock waves were strongly felt at about 11 seconds after zero time. The Princeton was positioned approximately eight miles off-shore from the NW control point.

TSUNAMI—WATER WAVE—EFFECTS

No effects were measured, other than a very slight ripple not exceeding two inches, which was noted near the island.

EARTH TREMORS, AFTERSHOCKS, SUBSIDENCE

Seismic activity in the vicinity of Amchitka, which had been expected to increase in the manner of the many small aftershocks recorded in Nevada following underground explosions of similar magnitude, appeared to be about normal for the region during the several days following the Milrow experiment. The only activity was the usual activity in close proximity to the detonation point, where hundreds of tiny tremors, mostly associated with cavity collapse, were recorded during the first several hours after the event. This activity stopped when the broken rock above the explosion-induced cavity apparently collapsed to the surface about 37 hours after the detonation.

Further study will be made of the natural earthquake patterns. Tremors measured seemed to follow the pattern of pre-detonation activity, which is believed related to normal stress release in this seismic region.

The surface subsidence as viewed from the air is in the form of an uneven saucer-shaped depression in the tundra, with a maximum depth of about 20 feet and a diameter of many hundreds of feet.

HYDROLOGY, GEOLOGY

Acrial and ground visual reconnaissance has indicated no appreciable surface movement along the Rifle Range fault, the closest known fault to ground zero.

Overpressure results available from three water wells close to ground zero showed the normal sharp pressure rise as the seismic wave passed, following which the measured pressures dropped rapidly to pre-shot values. Early information indicates no change in the level of the water table.

Final determination of the geological effects of Milrow must await the evaluation of detailed field observations and surveys.

BIOENVIRONMENTAL EFFECTS

The initial post-event observations verify predictions that the Milrow nuclear test would not produce significant damage to the ecological systems at Amchitka. All live animal boxes and holding pens for test time exposure experiments have been checked and a cursory survey has been made of the environments between one-half mile and five miles of surface ground zero (SGZ).

Aerial photographs have been taken of the test site environs for comparison with similar photographs taken before the detonation. Although a few sea stacks (vertical rocks) were damaged, eagles and other birds that inhabit the stacks were seen perched on the stacks about three hours after the detonation.

There was some movement of tundra, especially along the sea cliffs.

In an experiment to study the effects of the test on freshwater fish, eight live boxes containing fish were located at various distances from surface ground zero. Early observations showed that the Dolly Varden trout and salmon were able to withstand the over pressures produced in lakes and streams as close to SGZ as one-half mile. However, a number of sticklebacks (small fish about one to two inches in length) were found dead from concussions in ponds close to SGZ.

Fish and invertebrates, including king crab held in live boxes in the marine environment, were not affected. Sea otters held in a pen on the shore about 4,500 feet from SGZ appeared normal and all ate food offered four hours after the shot. A few of these otters will be examined to determine if they sustained any detectable internal damages from the nuclear test.

The remainder of the otters from the experiments, including those in floating pens located at greater distances from SGZ, have been moved to the Constantine dock pens for several days of observation in search of possible delayed effects. One otter in the floating pen was found dead—apparently from handling stresses—and the actual cause of death probably will not be known. An autopsy indicated no evidence of pressure injury.

After observations of the live otters is completed within a few days, they will be released into their natural habitat.

RADIATION MONITORING, CONTAINMENT

No radiation levels above natural background have been detected. A total of nineteen continuously operating radiation monitoring units were emplaced in circular arrays about SGZ to distances of 5,000 feet. In addition, eighteen air sampling units were located on the outer circular array of radiation instrumentation and no fresh fission or activation products were detected from these units.

Thermoluminescent and film dosimeters were placed at strategic locations around the island and were also issued as personnel dosimeters. Results from these detectors are not yet available but there is no reason to believe that there will be any positive exposures.

Water and vegetation samples have been collected both pre- and post-event at various on-island locations. Preliminary results indicate no changes in the pre-shot radiation background levels.

In summary, no radiation levels above background have been detected to date, which is a positive indication that containment was complete. However, future monitoring on Amchitka as well as throughout the State of Alaska could become complicated by the anticipated fallout from the recent Chinese atmospheric test.

REVIEWS TO INSURE SAFETY OF NUCLEAR OPERATIONS

(By the U.S. Atomic Energy Commission, Nevada Operations Office, Las Vegas, Nev.)

The Atomic Energy Commission is responsible for public safety for all U.S. nuclear detonations. Within the continental United States, the Commission implements this responsibility through its Nevada Operations Office, which in turn is directly supported by the weapons laboratories, associated government agencies, specialized contractors and independent consultants.

The Nevada Operations Office conducts those studies and reviews which are necessary to predict reliably the effects of nuclear detonations which may affect the safety of people and property. We do not consider ourselves infallible in defining safety problems or arriving at credible and practical solutions to these problems. For this reason, recognized experts in the pertinent scientific disciplines are consulted. These disciplines include, but are not limited to: health physics, biology, meteorology, seismology, hydrology, geology, ecology, structural response to ground motion, and rock mechanics.

This continuing effort on the part of NVOO, its contractors, and consultants has permitted the execution of over 300 nuclear weapons tests with minimal property damage and only two cases of minor personal injury to persons not related to the program. In 1953 an elderly Nevada resident reportedly sprained his shoulder as a result of falling when startled by the air shock from a nuclear explosion. Although corroborative evidence was lacking, the coincidence of the atmospheric test with his fall and in consideration of the fact that an injury was sustained, that portion of his claim relating directly to medical treatment was allowed by the Commission. In another case, a person was injured by a falling brick during an underground nuclear test in Mississippi. Medical expenses incurred as a result of this accident were paid by the Commission.

Preparation for the safe conduct of an event is based upon prediction of the effects of the maximum credible accident which could accompany that event. Precautionary measures are taken to ensure that public safety will be protected, should an accident materialize. NVOO measures and documents the actual effects of the test in order to take emergency action to protect life and property, if necessary, and to improve the accuracy of the predictive effort for future tests. Effects measurements also provide a basis for settlement of valid damage claims and for protection against invalid claims. A strong effort is made to ensure that effects data are properly interpreted and made accessible to the public and interested organizations.

Prior to any nuclear detonation there are a series of reviews to ensure that the detonations are conducted safely and within the constraints of the Limited Test Ban Treaty. All nuclear tests do not necessarily involve all of my individual steps; however, unusual tests may receive reviews from the entire system. Enclosure I shows a listing of various safety review organizations.

The sponsoring laboratory performs safety evaluations related to nuclear systems safety, that is, procedures associated with assembly of the device, transportation, and emplacement, as well as the detonation system. These nuclear safety procedures are later independently reviewed by a group of knowledgeable persons (nuclear safety survey group or nuclear safety study group) and when appropriate, recommendations are made to assure safe assembly, transportation, etc.

The laboratories evaluate and assess those man-made and natural conditions which influence containment of the explosion. Each event is then reviewed by a Test Evaluation Panel composed of individuals with considerable experience in nuclear testing. Most events are reviewed several times. The organizations furnishing Panel members are the Los Alamos Scientific Laboratory, Lawrence Radiation Laboratory, Sandia Laboratory, Department of Defense, Air Resources Laboratory—Las Vegas, U.S. Public Health Service, AEC, and independent consultants. Every aspect of the event which might affect containment is reviewed by this Panel as preparations for the event are made. A detailed study of the geological features around the shot point is made by the U.S. Geological Survey and presented to the Panel. If there are indications of possible faults or other geologic anomalies which may affect containment, new shot points are recommended by the Panel. A careful study is made of the drilling, casing, and grouting history of each of the emplacement and satellite holes to ensure that there will be no man-made path to the surface. The proposed stemming plan (that is, the method to be used for filling the emplacement and instrument holes) is approved by the Test Evaluation Panel. The same type of reviews are made to assure containment of a test to be made in a tunnel instead of a drilled hole.

For selected tests, normally those involving a new medium of an off-NTS location, or in the yield range that will be readily perceptible offsite or may possibly damage critical onsite structures, or for cratering and industry-related Plowshare tests, or for other unusual situations, an Effects Evaluation Report is prepared. This report is reviewed by experts within the test organization and by independent panels of experts. A general review is made by a panel which is composed of experts in the disciplines of special concern. For some effects, such as earthquake phenomena and ground motion effects upon structures, a special panel may be established.

The Effects Evaluation Report is based upon the output of six Scientific Management Centers which provide technical coordination of NVOO contractors assigned to study special effects, e.g., Sandia Laboratory is the Scientific Management Center for ground motion and structural response supported by the Environmental Research Corporation and the John A. Blume organization. These contractors provide predictions of ground motion and the response of structures to this phenomena. The Lawrence Radiation Laboratory, the Scientific Management Center for seismicity, is supported by participating government agencies and contractors such as the U.S. Geological Survey's Office of Earthquake Research and Crustal Studies, ESSA's Earthquake Mechanism Laboratory, U.S. Coast and Geodetic Survey, and by special arrangements with the California Institute of Technology, University of Nevada at Reno, University of California at Los Angeles, and others. The Centers and support are summarized in Enclosures IIIA through IIIG.

For selected events, an Effects Evaluation Scientist is appointed from one of the Centers and a NVOO professional from the Effects Evaluation Division is assigned. This team prepares a comprehensive effects evaluation prediction based upon output from each of the Centers. This report is then reviewed by 1) the Centers, for accuracy and completeness; 2) NTS/STS Planning Board, particularly by its Ground Shock Subcommittee; 3) NVOO Panel of Safety Consultants; 4) the Test Manager's Staff; 5) a special panel of experts if unusual effects are involved, e.g., seismicity or tsunami; and 6) the Manager, NVOO, and Scientific Advisors comprised of senior scientists from the three (weapons) laboratories. For industry-sponsored events, e.g., Project Rulison, another review is made by the NVOO Plowshare Advisory Group composed of laboratory, industry, and Department of Interior representatives.

AEC Headquarters staff, and finally the Commission, review the safety of each event, and if they are satisfied, grant authority for its execution.

Even though these reviews are made and every possible precaution has been taken to ensure that no radioactivity will reach the surface, preparations for detonation of the device assume that the maximum credible release of radioactivity will occur. Plans are made for the prompt evacuation of populated areas on or off the site in the unlikely event a release of radioactivity occurs with unacceptable levels of radiation. When predicted levels of ground motion or other effects indicate it to be prudent, evacuation of the affected populace is accomplished prior to detonation of the nuclear device.

The U.S. Public Health Service places offsite radiation monitors in the downwind direction in order that full information may be obtained for corrective action if there is an accidental release.

The Test Manager has established an Advisory Panel made up of specialists in meteorology, radiation, and medicine to advise him as to the hazards to be expected from each event. Other disciplines are added to the Panel as conditions warrant. The Panel chairman is a scientist who is familiar with the nuclear device, timing, and firing systems, and program objectives.

Although the Test Manager's Advisory Panel may meet several times, months in advance, to discuss specific problems on difficult or unusual shots, the Panel always meets the day before the detonation to hold a readiness briefing in which the control plans are reviewed. A weather prediction for shot time meteorological conditions is provided and a review is made of the preparation for onsite and offsite safety and population control. The Advisory Panel meets continuously in the period immediately prior to firing to insure that the acceptable conditions have been established. If it is determined that, with the maximum credible accident, the test can be safely carried out, a recommendation is made to the Test Manager that the detonation may proceed. The Test Manager's Advisory Panel also reviews the last-minute preparation to ensure that requirements of operational and safety plans have been implemented.

Radiation monitoring instruments are installed and operated on each event to record the existence or absence of radiation. At shot time, at least two airplanes—one equipped with monitoring instruments, the other with sampling equipment—are air airborne. Samples are immediately brought back to the Southwestern Radiological Health Laboratory for analysis.

Testing has been carried out at the Nevada Test Site for 18 years; underground detonations for about 12 years. Three or more camp sites are operated constantly. The largest of these is at Mercury. There are also camps in the forward area. The population at these camps may vary from 500 to 2500 people. The total NTS working population varies from 8,500 to 10,500 people. Although this relatively large number of people live and work within a few miles of ground zero of even the largest yield tests, there has never been an injury among them as a direct result of a detonation. These people are provided drinking water from wells located in the active test area; continuous monitoring confirms freedom from contamination of this water.

We are constantly striving to improve the accuracy of our prediction capabilities in all areas, and have made much progress. This progress in prediction capability and containment techniques was necessitated by the increased complexity of experiments. All those involved in the test program recognize the potential hazards involved in it, but rely with confidence on a proven system based upon taking those actions necessary to protect against the effects of the maximum credible accident.

SAFETY ORGANIZATIONS FOR NUCLEAR DETONATIONS

Organization	Responsibility	Membership	Reviews are performed: Number of times	Reviews are performed: During phase [1]
I. FIELD ORGANIZATIONS				
A. Sponsoring laboratory	Review to determine feasibility of fielding experiment	Appropriate laboratory personnel (LASL, LRL, DASA, Sandia Laboratory).	Continuing	I, II, III.
B. Ground shock subcommittee	Advise the manager, NVOO through the NTS Planning Board on ground motion problems which may affect the NTS or STS facilities and programs.	Sandia Laboratory, NVOO, LASL, LRL, TC/DASA	do	II.
C. Radioactive effluent subcommittee	Advise the manager, NVOO, through the NTS Planning Board of the adequacy of NTS radiation measurement systems. Evaluates radiation effluent data from nuclear tests and reports their findings through the NTS Planning Board.	LASL, NVOO, Sandia Laboratory, AFSWC, LRL, AFTAC, TC/DASA.	do	II.
D. Scientific management centers	Advise the manager, NVOO, through effects evaluation scientist and NVOO effects evaluation review. Provide for continual study of effects phenomena in specialized areas. Provide continuing predictions. Provide technical scope for research. Design effects measurement programs and provide analysis of observed phenomena.	USGS, LASL, LRL, Sandia Laboratories, ESSA/ARL, Battelle Memorial Institute.	3	I, II, III.
E. NVOO panel of safety consultants	Composed of eminent scientists in the fields of geology, hydrology, rock mechanics, soil mechanics, earthquake seismology, etc, to evaluate programs and prepare safety evaluations for specific events and series of events.	G. B. Maxey, University of Nevada; L. S. Jacobsen, California Institute of Technology; N. M. Newmark, University of Illinois; D. U. Deere, University of Illinois; T. F. Thompson, Geological Engineering; L. G. von Lossberg, Sheppard T. Powell & Associates; S. D. Wilson, Shannon & Wilson, Inc.	As requested by manager, NVOO.	II.
F. Test evaluation panel	Advises the manager, NVOO, on the containment aspects of proposed nuclear explosive tests. Performs periodic reviews of technical data and containment plans to determine their adequacy in assuring compliance with the Limited Test Ban Treaty.	NVOO, LASL, LRL, Sandia Laboratory USPHS, ESSA/ARL, DASA.	Bimonthly	II.
G. Test manager's advisory panel	A panel composed of experienced advisers who are recognized experts on radiation, weather, fallout, and other subjects. The panel examines predictions of the effects of each event and evaluates field preparations designed to minimize predicted hazards.	NVOO, LASL, LRL, Sandia Laboratory, USPHS, ESSA/ARL, medical consultants.	D-1 days and D-days for each event.	III.
H. Nuclear weapons safety program survey/study groups.	Nuclear safety survey and study groups are convened to assure that prior to beginning any operation involving atomic weapons, positive measures are provided to prevent an accidental or unauthorized nuclear detonation.	NVOO, SAN, ALOO, Sandia Laboratory LRL, LASL	Continuing	II.
II. AEC HEADQUARTERS ORGANIZATION				
A. Divisions of Military Application and/or Peaceful Nuclear Explosives.	Compiles, reviews, and submits pertinent event related documents to AEC Commissioners.	DMA and/or DPNE staff	do	II.
B. Division of Operational Safety	Reviews safety plans on special events	DOS staff	As required	II.
C. AEC Commissioners	Review events and grant execution authority	Commissioners	Continuing	II.

[1] Phase I—conceptual; phase II—planning; phase III—field execution.

NVO EFFECTS EVALUATION PROGRAM
SCIENTIFIC MANAGEMENT RELATIONSHIP

For the conduct of the NVO Effects Evaluation Program, the following organizations, principal members and alternates have been assigned as scientific managers for the disciplinary areas indicated:

Over-all Management: AEC Nevada Operations Office, Effects Evaluation Division; Dr. Elwood M. Douthett.

Ground Motion, Air Blast, Structural Response: Sandia Corporation, Albuquerque, New Mexico; Dr. Byron F. Murphey, Dr. John R. Banister.

Geology, Hydrology: U.S. Geological Survey, Denver Federal Center, Denver, Colorado; Dr. William S. Twenhofel.

Aftershock Seismicity, Product Contamination: Lawrence Radiation Laboratory, Livermore, California; Dr. Harry L. Reynolds, Dr. James W. Hadley.

Tsunami, Eyeburn: Los Alamos Scientific Laboratory, Los Alamos, New Mexico; Dr. William E. Ogle, Dr. Charles I. Browne.

Atmospheric Transport, Fallout, Climatology: ESSA/Air Resources Laboratory, Las Vegas, Nevada; Mr. Philip W. Allen.

Ecology: Battelle Memorial Institute, Columbus, Ohio; Dr. R. S. Davidson.

Sandia Laboratories management area

For the conduct of the NVO Effects Evaluation program, the following functional relationships have been assigned between Sandia Laboratories and the NVO Contractor/Agreement Agencies for the scientific management of the Ground Shock, Air Blast, and Structural Response Programs:

Scientific Management: Sandia Laboratories, Albuquerque, New Mexico; Dr. Byron F. Murphey, Dr. John R. Bannister.

Ground Motion Measurements: ESSA/U.S. Coast and Geodetic Survey, Special Projects Party, Las Vegas, Nevada; Mr. Kenneth W. King.

Ground Motion Evaluation: Environmental Research Corporation, Alexandria, Virginia; Mr. O. Allen Israelson.

Structural Dynamic Effects: John A. Blume & Associates, San Francisco, California; Dr. John A. Blume.

Mine and Well Studies: U.S. Bureau of Mines, Denver Mining Research Center, Denver, Colorado; Dr. Paul L. Russell.

U.S. Geological Survey management area

For the conduct of the NVO Effects Evaluation Program, the following functional relationships have been assigned between the U.S. Geological Survey and the NVO contractors for the scientific management of the Geology and Hydrology Programs:

Scientific Management: U.S. Geological Survey, Denver, Colorado; Dr. William S. Twenhofel.

Internal Geological Studies: U.S. Geological, Denver, Colorado; Dr. William S. Twenhofel.

Hydrological Studies: U.S. Geological Survey, Denver, Colorado; Mr. Samuel West.

Ground Water Contamination: Isotopes, Inc., Palo Alto, California; Dr. Paul R. Fenske.

Central Nevada Studies: University of Nevada, Desert Research Institute, Las Vegas, Nevada; Mr. Alan E. Peckham.

Lawrence Radiation Laboratory area

For the conduct of the NVO Effects Evaluation Program, the following functional relationships have been assigned between the Lawrence Radiation Laboratory and the NVO Contractor/Agreement Agencies for the scientific management of the Aftershock Seismicity Program:

Scientific Management: Lawrence Radiation Laboratory, Livermore, California; Dr. Harry L. Reynolds, Dr. James W. Hadley.

Seismic Measurements: ESSA/U.S. Coast and Geodetic Survey, Special Projects Party, Las Vegas, Nevada; Mr. Kenneth W. King. ESSA/Earthquake Mechanisms Laboratory, San Francisco, California; Dr. Donald Tocher. Colorado School of Mines, Boulder, Colorado; Dr. Maurice W. Major.

University of Nevada, Mackay School of Mines, Seismological Laboratory, Reno, Nevada; Dr. Alan S. Ryall.

U.S. Geological Survey, Denver, Colorado; Mr. Frank A. McKeown. USGS Earthquake Laboratory, Menlo Park, California; Dr. John H. Healy.

California Institute of Technology, Pasadena, California; Dr. Stewart Smith.

University of California, Los Angeles, California; Dr. Leon Knopoff.

Sandia Laboratories, Albuquerque, New Mexico; Mr. William Perret.

Los Alamos Scientific Laboratory management area

For the conduct of the NVO Tamarin Program, the following functional relationships have been assigned between the Los Alamos Scientific Laboratory and the NVO contractors for the Scientific Management of the Water Wave Program:

Scientific Management: Los Alamos Scientific Laboratory, Los Alamos, New Mexico; Dr. William E. Ogle, Dr. Charles W. Browne.

Tsunami: Tamarin Committee; Dr. Kenneth H. Olsen, LASL, Chairman. A. C. Electronics/Defense Research Laboratory; Mr. J. E. McNeil, Santa Barbara, Calif. Tetra Tech; Dr. B. LeMehaute, Pasadena, California. University of Hawaii; Dr. William M. Adams, Honolulu, Hawaii.

Environmental Science Services Administration management area

For the conduct of the NVO Effects Evaluation Program, the following functional relationships have been assigned between the U.S. Environmental Science Services Administration and the NVO contractors for the scientific management of the Fallout Program:

Scientific Management: U.S. Environmental Science Services Administration, Las Vegas, Nevada; Mr. Philip W. Allen.

Fallout Models, Atmospheric and Cratering Events: ESSA Air Resources Laboratory, Silver Spring, Maryland; Dr. Lester Machta.

Radiation Models, Underground and Plowshare Events, Weather and Trajectory Prediction Studies: ESSA Air Resources Laboratory-Las Vegas, Las Vegas, Nevada; Mr. Philip W. Allen.

Long Range Diffusion Study: Meteorology Research, Inc., Altadena, California; Dr. Paul MacCready.

Battelle Laboratories management area

For the conduct of the NVO Effects Evaluation Program, the following functional relationships have been assigned between Battelle-Columbus Laboratories and the NVO Contractor/Agreement Agencies for the scientific management of Ecology Management Programs:

Scientific Management: Battelle Laboratories, Columbus, Ohio; Dr. Richard S. Davidson, Dr. James B. Kirkwood.

Vegetation and Soil Response to Underground Detonations: The University of Nevada at Reno, College of Agriculture, Reno, Nevada; Dr. Paul T. Tueller.

Ecology Research: Battelle Laboratories, Columbus, Ohio; Dr. Richard S. Davidson.

Marine Ecology and Oceanography: U.S. Bureau of Commercial Fisheries, Seattle, Washington; Dr. Bruce McAlister.

Marine Ecology and Oceanography: University of Washington, Seattle, Washington, Fisheries Research Institute; Dr. R. L. Burgner.

COAL MINE HEALTH AND SAFETY ACT AMENDMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. HECHLER) is recognized for 10 minutes.

Mr. HECHLER of West Virginia. Mr. Speaker, when the coal mine health and safety bill comes up, I intend to offer several amendments, the text of which follows:

AMENDMENT TO H.R. 13950 OFFERED BY MR. HECHLER OF WEST VIRGINIA

(To protect miners against losing their jobs or being discriminated against for reporting health and safety violations)

On page 19, between lines 18 and 19, insert:

"(j) (1) No person shall discharge or in any other way discriminate against or cause to be discharged or discriminated against any miner or any authorized representative of miners by reason of the fact that such miner or representative (A) has notified the Secretary or his authorized representative of any alleged violation or danger pursuant to section 103(g) of this title, (B) has filed, instituted, or caused to be instituted any proceeding under this Act, or (C) has testified or is about to testify in any proceeding resulting from the administration or enforcement of the provisions of this Act.

"(2) Any miner or a representative of miners who believes that he has been discharged or otherwise discriminated against by any person in violation of paragraph (1) of this subsection may, within thirty days after such violation occurs, apply to the Secretary for a review of such alleged discharge or discrimination. A copy of the application shall be sent to such person who shall be the respondent. Upon receipt of such application, the Secretary shall cause such investigation to be made as he deems appropriate. Such investigation shall provide an opportunity for a public hearing at the request of any party, to enable the parties to present information relating to such violation. The parties shall be given written notice of the time and place of the hearing at least five days prior to the hearing. Any such hearing shall be of record and shall be subject to section 554 of title 5 of the United States Code.

"Upon receiving the report of such investigation, the Secretary shall make findings of fact. If he finds that such violation did occur, he shall issue an order requiring the person committing such violation to take such affirmative action to abate the violation as the Secretary deems appropriate, including, but not limited to the rehiring or reinstatement of the miner or representative of miners to his former position with back pay. If he finds that there was no such violation, he shall issue an order denying the application. Such order shall incorporate the Secretary's findings therein. Any decision issued by the Secretary under this paragraph shall be subject to judicial review in accordance with the provisions of section 106 of this Act. Violations by any person of paragraph (1) of this subsection shall be subject to the judicial review and civil penalties provisions of this title.

"(3) Whenever an order is issued under this subsection, at the request of the applicant, a sum equal to the aggregate amount of all costs and expenses (including the attorney's fees) as determined by the Secretary to have been reasonably incurred by the applicant for, or in connection with, the institution and prosecution of such proceedings, shall be assessed against the person committing such violation."

(To provide criminal penalties for deliberate violations of closing orders)

On page 36, line 16, strike "(a)".

(To insure that, whatever the instrument used, coal dust measurements will be made, recorded, and analyzed for one shift)

On page 46, lines 6 and 22, and on page 47, line 14, strike, "over several shifts".

SECTION 203

(To allow a miner who shows the incipient stages of pneumoconiosis to be re-assigned to an area where the coal dust level is no more than 1.0 milligrams per cubic meter of air, to provide for autopsies for miners with consent of next of kin and to control the noise level in coal mines)

On page 49, line 16, strike all through the period on page 50, line 9, and substitute the following: "shows evidence of the development of pneumoconiosis shall be assigned by the operator for such period or periods as may be necessary to prevent further development of such disease, to work, at the option of the miner, in any working section or other area of the mine, where the average concentration of respirable dust in the mine atmosphere to which the miner is exposed during each shift is at or below 1.0 milligrams of dust per cubic meter of air."

On page 50, between lines 11 and 12, insert:

"(c) Beginning six months after the operative date of this title, and at intervals of at least every six months thereafter, the operator of each mine shall conduct tests by a qualified person of the noise level at the mine in a manner prescribed by the Secretary and certify the results to the Secretary. If the Secretary determines, based on such tests or any conducted by his authorized representative, that the standards on noise prescribed under the Walsh-Healey Public Contracts Act, as amended, or such improved standard as the Secretary may prescribe, are exceeded, such operator shall immediately undertake to install protective devices or other means of protection to reduce the noise level in the affected area of the mine, except that the operator shall not require the use of any protective device or system which the Secretary or his authorized representative finds will be hazardous or cause a hazard to the miners in such mine.

"(d) If the death of any active miner occurs in any coal mine, or if the death of any active or inactive miner occurs in any other place, the Secretary of Health, Education and Welfare shall provide that an autopsy shall be performed on such miner, with the consent of his surviving widow or, if he has no such widow, then with the consent of his next of kin. The results of such autopsy shall be submitted to the Secretary of Health, Education, and Welfare and, with the consent of such survivor, to the miner's physician or other interested person. Such autopsy shall be paid for by the Secretary of Health, Education, and Welfare."

(To give miners the right to sue in the case of mine accidents where the operator is grossly negligent)

On page 117, after line 17, insert:

"TITLE IV—JUDICIAL REMEDY

"SEC. 501. Any miner in a coal mine subject to this Act who shall suffer personal injury in the course of his employment as a result of the gross negligence of the operator, may, at his election, maintain an action for damages at law, with the right of trial by jury, against the operator of the coal mine, and in such action all statutes of the United States modifying or extending the common-law right or remedy in cases of personal injury to railway employees shall apply; and, in case of death of any coal miner as a result of any such personal injury, the personal representative of such coal miner may maintain an action for damages at law, with the right of trial by jury, against the operator of the coal mine, and in such action all statutes of the United States conferring or regulating the right of action for death in the case of railway employees shall be applicable. Jurisdiction in such actions shall be under the court of the district in which the operator resides or in which his principal office is located. This section shall not preempt any existing State statutes or other provisions of this Act which provides for compensation for coal miners. Any recovery obtained under this section shall be reduced by any amounts received under such compensation statutes."

REFORM OF THE DRAFT

The SPEAKER pro tempore. Under a previous order of the House, the gentlemen from Indiana (Mr. HAMILTON) is recognized for 10 minutes.

Mr. HAMILTON. Mr. Speaker, the Nation's Selective Service System operates unfairly, unevenly, and uncertainly, and it needs major reform. I am pleased that the Congress is now moving to correct some of the major deficiencies. In the remarks that follow, I explain in more detail my own views about the draft.

The Nation should adopt a system which would: First, induct eligible men on the basis of a order of call which has been randomly determined; second, reduce the period a young man is exposed

to induction from 7 years to 12 months; third, treat registrants equally without discrimination against the poor and uneducated; fourth, induct younger men before older ones; fifth, make the administration of draft laws more uniform; sixth, enroll men now rejected for service because of lesser mental and physical abilities in programs leading to their eventual enlistment.

The basic problem of the draft was phrased by the National Advisory Commission on Selective Service in 1967 by the question: Who serves when not all serve?

President Johnson noted at the time of the publication of the report that—

> Complete equity can never be achieved when only some must be selected and only some must serve.

Although the problem of the draft has been brought into sharp focus by the war in Vietnam, it is an enduring problem. It is a major cause of the restiveness and dissension so frequently found among our young people. It is incumbent upon the Congress to find a method to procure the manpower necessary to assure the Nation's defense under any circumstances, and, at the same time, to find a system which functions fairly and uniformly, with due regard for individual rights, and with minimum interference in lives into which it intrudes.

In a free society few laws are more difficult to write than a law based on compulsion. Many interests have to be balanced, and the impact of compulsion softened where possible. The law must strive for fairness to all citizens, meet military manpower requirements, minimize uncertainty and interference with individual lives, harmonize with social and economic goals, and conform to budgetary and administrative considerations. It is a formidable challenge to deal in a fair and democratic manner with classification and selection of registrants, qualification for military service, grounds for deferment and exemption, procedure of appeal and protection of individual rights, and the organization of a nationwide system.

I. THE DRAFT IS NECESSARY

A draft system to provide the Nation with adequate manpower in changing circumstances is necessary. But increased efforts must seek to make the armed services more attractive and to provide opportunities for more men and women to serve in the Armed Forces, thus reducing the number of men who must be involuntarily called.

A. VOLUNTEER SYSTEM

The military services have placed great emphasis upon volunteers; they have contributed two-thirds of the military force since 1950. The Defense Department estimates that about four out of 10 volunteers in the years prior to Vietnam were motivated by the existence of the draft. But the basic emphasis upon volunteer service is clear.

The idea that volunteer service could eliminate the need for the draft altogether is attractive. But the draft has been necessary because the Nation has not been able to get enough volunteers to meet military manpower needs since 1940.

Further study of the volunteer system should continue and be supported by Congress, with the intention of adequately investigating all potential alternatives to the present system.

Before the all volunteer system can be accepted three main objections must be met: First, capacity to meet fluctuating manpower levels; second, cost; and third, social consequences.

1. ACHIEVEMENT OF MANPOWER LEVELS

World conditions change and the requirements of the military for manpower change with them. An exclusively voluntary system could not meet the changing demands.

The Civilian Advisory Panel on Military Manpower Recruitment—headed by Gen. Mark Clark—concluded in its 1967 study that the volunteer system would "risk jeopardizing the security of America by depending on an uncertain method of military manpower procurement, while abandoning the invaluable flexibility inherent in current systems."

The Defense Department, also in a 1967 study, supported these sentiments, citing these qualitative considerations: better educated entrants would be apt to opt for civilian employment, medical personnel could not likely be induced to enlist, Reserve forces would be both smaller and older than they are now, and total enlistment figures would decrease—based on the fact that 70 percent of enlistment were then, and are still, draft motivated.

Substantiating evidence for the last point comes from a study of Australia's volunteer army system—the draft was abolished there in 1960. In that country in the early sixties, 1.9 percent of the male population, age 19 to 45, was in the military, compared with 6 percent in the United States. The entry pay in Australia for privates was $163, roughly twice that of the U.S. recruit in absolute dollars. Yet, Australia found it difficult to maintain a force of 52,000 men—the equivalent of 850,000 men in the U.S. military. It had to reinstitute a draft system in 1964, when a decision was made to increase their military strength by 25 percent. Recruitment of officers under the volunteer system was particularly difficult.

An all-volunteer system just does not appear capable of meeting the widely fluctuating needs for manpower dictated by international events.

2. COST

An exclusively volunteer system would be very expensive, although the Defense Department does not give any solid estimate of the cost.

The cost figures vary quite widely when the volunteer army is discussed. The Defense Department, in 1966, estimated a range of $4 to $17 billion for a manpower level of 2.65 million. The cost of maintaining a volunteer force at 3.3 million, the current level in December 1966, was not estimated because "maintenance of such a force under current wartime conditions was considered totally unfeasible."

Dr. Walter Oi—Department of Economics, University of Washington; ex-Defense analyst—made cost estimates that were considerably lower than the Defense Department's: $4 billion in peacetime, 2.7 million men; $8 billion in wartime, 3.1 to 3.2 million men. Dr. Oi said, however, that—

> If you're talking about raising forces from 3 to 4.5 million men, then I say we're in an all-out war, and to talk about a voluntary system here is academic.

In reaching his estimates, Dr. Oi assumed that: First, each man has his price for entering the military; and second, the military is like any other occupation. These assumptions are subject to serious question.

The Defense Department has summed up the arguments on costs by concluding in its 1967 study that the costs of attempting to attain an all-volunteer force would be very high and that the yields would be varying and uncertain. There is, it was found, no "scientific method of predicting the precise relationship between increased pay and increased recruitment in a dynamic society." I would support increased material and psychic rewards for military service, but I am not persuaded that they can be sufficiently increased at an acceptable cost.

3. SOCIOPOLITICAL RAMIFICATIONS

Some persons see unfavorable social consequences in an all volunteer force. Margaret Mead, noted sociologist, says that—

> The substitution of volunteers for a limited period, even if it were to provide a sufficient number of men, has the disadvantage of drawing on men with specific types of character and temperament. . . If the armed services—through some sort of nationwide draft—are continually faced with the task of absorbing recruits to whom the military way of life is basically uncongenial, or even repellent, there is a useful check on the development of a highly differentiated counter-civilian ethos. A professional army, with life-long career commitment, is even more cut-off from civilian style as those with inappropriate character can be cut-off all through the recruitment and training and advancement process.

The arguments she raises demonstrate why the problems inherent in the establishment of such a system should be assiduously examined.

I do not contend that an all volunteer system will never be feasible in the United States, but I am persuaded that it would not permit sufficient flexibility in crisis. The Nation must have the machinery to produce great numbers of men quickly, and so I conclude that a draft is necessary. The concept of an all-volunteer force should continue to be studied, but it remains extremely difficult—though perhaps not impossible—to maintain an all-volunteer professional force of the size required.

B. UNIVERSAL MILITARY TRAINING

Under this system all young men would be required to enroll at age 18 for a period of service of 4 months to a year. Proponents of this system—referred to as UMT—argue that it would strengthen the Nation, inculcating a sense of discipline, civic consciousness, and patriotism. They see it as a solution to the service problem of training, educating many Americans who fail to qualify for the service. It must be rejected, however, on three grounds: First, UMT is geared to the age of mass armies, not supersonic planes and nuclear weapons, and, there is no military requirement for it. Second, the training cost and turnover rate would

be tremendous—men would be discharged just when they began to be efficient as soldiers. Third, the additional cost in monetary and budgetary terms would be enormous and far beyond that of a volunteer system.

In sum, UMT would simply provide quantity, not quality, and the general public would not tolerate having all men under arms without the necessity of war.

C. NATIONAL SERVICE

The alternative of national service would mean compulsory service for all young men, and young women, in which everyone affected would serve the Government in either a military or a civilian status. This degree of compulsion and regimentation on a national scale has unfortunate totalitarian implications, and would endanger the democratic foundation of our society. Its implementation would provide many more youths than any present governmental program could effectively utilize. Moreover, no fair way has yet been devised to equate the sacrifices of military service with civilian service.

II. THE EXISTING SYSTEM

The present draft law expires June 30, 1971. Under it, every young man reaching 18 years of age registers with his local board. The board classifies him. At the age of 19, every qualified youth is placed in a pool of maximum eligibility, where he remains until his 26th birthday. Local draft boards—over 4,000 of them—select men from the pool for induction on an oldest-first basis.

If a young man is deferred for occupational reasons, or as a student, he is placed back into the maximum eligibility pool when the deferment ends. If he is already 26, he is placed in a power priority pool reserved for use if the maximum eligibility is exhausted. His eligibility in the power priority pool runs until his 35th birthday.

The deficiencies in this system are numerous and frequently condemned, including these:

A. REGISTRANT/LOCAL BOARD RELATIONS

The National Advisory Commission on Selective Service, headed by Burke Marshall—former Assistant Attorney General—recognized the fact that the "neighborly" concept of the local board exists more in theory than in fact. Local boards, except in rural areas, do not know the background of the registrant, and the registrant does not know who the members of his local board are.

Many local boards are overburdened with work, most of it of a routine nature. and have little time for the personalized service that is so essential for equitable and "neighborly" operation. They are, instead, caught up in a sterile numbers game, dispensing decisions that are predominately automatic in nature, that is, student deferment expirations, et cetra.

B. LACK OF ADMINISTRATIVE STANDARDS

The National Advisory Commission also noted that there was a "critical need for policy uniformity through the application of clear regulations consistently applied." As it now operates, the system reveals a distinct lack of standardization in the guidance local boards receive.

The result has been that each local board follows its own inclinations without adequate supervision and direction from above. This causes great consternation and unhappiness with the draft system.

Under the operations of the present system there is a great difference in a young man's chance of entering military service, depending on social and economic considerations. Men with less than an eighth grade education and Negro high school dropouts are not apt to enter because more of them fail the examination. Graduate students are less likely to enter because they get student deferments until they are 26, become fathers, or get occupational deferments.

The local boards apply a variety of standards with the result that two boys, living in adjoining counties and in similar circumstances, will be treated differently. Student deferments have caused much confusion, and local boards operating under ambigious guidelines, have adopted different policies. Some boards reclassify, others never do.

This variance of administrative standards has led to the type of situation in which efficiency is minimized and uniformity generally absent. More registrants in New York City hold agricultural deferments than do in the whole State of Nebraska, a state of affairs that shows the urgent need for administrative reform.

C. ORDER OF INDUCTION

By drafting the oldest first, as required under the present system, the youngest are never certain about their draft status. A 7-year period of vulnerability, from age 19 through 25, results, and it is most disruptive and disconcerting, impeding as it does long-range planning by the young men involved.

The order of induction from oldest to youngest has disadvantages for others as well: for employers, it means the loss of trained personnel, settled in their jobs; for the Selective Service System, it means a proliferation of deferment applications and appeals; for the Armed Forces, it means older recruits, less adaptable to the rigors and regimentation of military training.

D. INEQUITY

The most unfair, uneven, and unpredictable aspect of the present system arises from the fact that not every eligible man must be called upon to serve. It is intensified when the number of men needed is relatively small in relation to the numbers available.

Consider these estimates: in 1948, less than 1.2 million male Americans were 18 years old. Today that number has increased about 60 percent to almost 1.9 million, and will exceed 2 million in the 1970's. Because of this population increase, many more men are available for military duty than are required. A decade ago, about 70 percent of the group eligible for duty had to serve the Armed Forces to meet our military needs. Today, the need is for less than 50 percent and only about a third or less of this number must be involuntarily inducted—even under conditions of war.

The danger of inequities arising in these circumstances is great. Only a random selection system whereby each man—rich or poor, graduate student or high school dropout—has an equal chance of being selected first, second, or not at all will alleviate the risk of inequity.

These deficiencies of the present system have a real impact upon the Nation's youth. Senator RIBICOFF has noted that—

> One of the great tragedies of the Vietnam conflict is that it has alienated the young of America. * * * Their attitude toward the draft is one of alienation from their nation.

The degree of their alienation is manifested in statistics like these: First, as of May 1969, 5,000-plus young men had fled to Canada, Sweden, or other locales from which they could not be extradited. Second, cases of draft law violations numbered 239 in 1960, 1,192 in 1968, and an estimated 3,000 in 1969. Third, there were 615 draft law violators in prison in May 1969, but this number is expected to soar soon, what with all the cases now in the courts. Fourth, finally, in 1961, 14,000 registrants were carried on the books as delinquent—those who failed to conform in some manner with the present draft laws—the number is now approximately 23,000.

These figures are not apt to diminish as long as the present system exists, There is no love lost between draft board registrant and draft law administrator when the latter—General Hershey—insists that "in determining what would best serve the national interest, the registrant's wishes are not relevant."

These are only the more obvious deficiencies in the system as it exists today; others will be discussed in the process of outlining the type of random selection system which should be established.

III. SUPPORT FOR REFORM

Reform is desired by a vast majority of the population, as recent opinion polls amply demonstrate, indicating that only 32 percent of the population favor continuation of the draft in its present form, while 65 percent advocate a change, either to a lottery or to a volunteer system. These results show that American citizens want a change. It is time for Congress to act constructively and progressively.

The need for change has been rightly recognized by both Presidents Johnson and Nixon. President Johnson correctly noted more than 2 years ago that—

> There is no perfect solution. For the unavoidable truth is that complete equity can never be achieved when only some must be selected and only some must serve. I have concluded that the only method which approaches complete fairness is to establish a(n) . . . impartial random system of selection which will determine the order of call for all eligible men.

Two years later, President Nixon submitted draft legislation to the Congress which would reduce the period of prime vulnerability for young Americans from 7 years to 12 months, and which provide for a switch from an oldest-first to a youngest-first order of induction through a random selection system. He reiterated his appeal for draft reform in a message to Congress on October 13, 1969, and gave it first priority on his list of desired reforms.

Demand for reform has also come from

the findings of two studies initiated by President Johnson: the National Advisory Commission on Selective Service—the Marshall Commission, and the Civilian Advisory Panel on Military Manpower Procurement—the Clark panel. The former recommended a lottery; the latter favored the present method of induction, but advocated a change to the induction of the youngest first. President Nixon has instituted a third study—an Advisory Commission on a All-Volunteer Armed Force.

I also note the strong desire for reform among my own constituents. Some of them have expressed their wishes and complaints:

I would urge you to vote in favor of the lottery system over the present out-dated system.

I believe the draft lottery would be more fair to all concerned.

I favor the lottery system * * *. I believe that what is fair for one man is fair for all men.

This period of waiting to be drafted is far too long.

IV. THE PROPOSAL

The draft needs a basic law providing for tighter administration and with assurances of equal treatment for those in like circumstances. The law should include the following provisions:

First. The youngest men, beginning at age 19, should be taken first.

Second. Eligible men should be inducted by the order of call based on a random selection method. For 1 year the men in the pool would be exposed to maximum vulnerability to the draft. Induction would be in the sequence determined by the random process.

Third. Student and occupational deferments should be provided at the President's direction, but student deferments should end automatically in periods of national emergencies.

The bill I introduce includes other provisions to correct existing deficiencies of the present system.

Some of its provisions are:

A. RANDOM SELECTION

The random selection system which works as follows: A young man would register with the Selective Service System immediately upon his 18th birthday, according to rules and regulations prescribed by the President. As soon as practical after registration, each registrant would be examined physically and mentally in order to determine his suitability for induction for training and service in the Armed Forces. As soon as practical after this examination, the Selective Service System would classify him. After classification, the registrant would not be immediately available for induction until he has reached the age of 19.

At age 19, the registrant would enter the prime age group for a period of time not to exceed 12 months. His name would be placed in a pool of equally eligible registrants. The President could determine whether he wanted these pools created on a monthly basis, a semiannual basis, an annual basis, or any other period of time.

For example, if on a monthly basis: The order of actual induction from among this prime selection group would be determined by random selection. The Director of Selective Service would publish each month a list of numbers corresponding to the days in that month. These numbers would be arranged in a random sequence determined by a computer or some other means. The numbers for January, in this example, might read 11, 22, 7, 18, and so on until all the numbers from 1 to 31 are listed. The President would be given the discretion to determine whether the monthly prime selection group should be a national, regional, area, or some other group.

For the sake of illustration, let us consider regional pools.

If a regional office under this proposal had a quota of 1,000 men for January it might have 7,000 men eligible for induction. To choose the 1,000 it would refer to the list published by the Selective Service Director for January. Under this example, the first number was 11, the second 22, the third 7, and so forth. Those with birthdays on those dates would be chosen until the quota of 1,000 men had been reached. Those 1,000 men would then be inducted. The remaining 6,000 men would not be called, but would, of course, continue to remain liable in the event of a national emergency. But since they would not be called until the pool of men in the following month had been exhausted, those not selected could be reasonably certain of their status and make plans accordingly.

Under the example illustrated above, the effective eligibility of a registrant would be for 1 year, not the 7 years that it now is. As the registrant grows older, he becomes less likely to be drafted, and is better able to plan his future without interruption.

The actual workings of a yearly lottery would be similar to that described earlier for the monthly lottery. A whole calendar year would be scrambled at once and the people born within that year would be ranked accordingly.

B. ORGANIZATION OF THE SELECTIVE SERVICE SYSTEM

Area offices in each State would be the registration and classification centers. A civil service staff, applying regulations established by the National Selective Service headquarters, would classify each registrant within the jurisdiction of each area office in a uniform and impartial manner. Automatic data processing equipment for handling the vast amounts of information involved would facilitate the operation of the system nationally.

Since fairness can be achieved only when there are ways in which an individual's relationship with a system can be personalized, a major virtue of the proposed organization is that it would provide facilities and avenues for such personalization. Registrants confused or intimidated by the selective service process could visit their area offices for a more individual treatment of their registration and classification.

Since 90 percent of the classifications now made by a local board are automatic, these classifications can be dealt with far more economically and efficiently in centralized area offices. Problems requiring large amounts of discretion, such as hardship deferments and conscientious objector classification, would also be made at the area level. However, any registrant who is unhappy about his individual treatment could take his problem to an appeal board.

If the local boards become appeal boards, as I suggest, the time and efforts of local board members will be much more prudently utilized, because it is in acting on appeals that their personal knowledge of registrants can be best devoted to the welfare of the individual. If the local board denies the registrant's request for reclassification, he would be able to appeal to the regional appeal board, which would be the second stage of the appeal process. They would be guided by the same criteria used in the area offices. If the registrant is still dissatisfied, he could appeal to the National Appeal Board, as he is now able to do.

Two other changes should be made in the organization of the present system: First, the term of the office of the National Director of Selective Service should be limited to 6 years, and the holder—or nominee—should come under the periodic scrutiny of the Congress; second, the maximum age of local board members should be reduced from 75 to 65, thereby insuring that they are more representative of the communities they serve.

C. STUDENT DEFERMENTS

The issue of student deferments is a very sensitive one. Deferments should not become exemptions, as often happens under the present system. A strong argument can be made that no student deferments should be given. There is no evidence that abolishment of student deferments would deter young men from going to college and interrupt the output of college trained men in the country. Nonetheless, education is essential to the improvement of our society, and we cannot risk such a possibility. Their elimination would have a harmful impact on the educational process of the country, and would unduly complicate the officer procurement problem—80 percent of each year's crop of new officers come from colleges. I, therefore, favor their continuance, but not under the present administrative arrangement.

It should be noted that the criticism of student deferments relates more to the abuses of the principle of deferment than to the principle itself. The proposal in the bill I introduce does not permit a deferment to be converted into a permanent exemption and does not permit the student to defer himself into a period of tranquillity, thus avoiding a shooting war.

Under the proposed plan the President is authorized to "provide for the deferment from training and service in the Armed Forces of persons requesting such deferment who are satisfactorily pursuing a course of instruction at a bona fide college, junior college, community college, university, or similar institution of learning, or at a vocational school, or who are enrolled in and satisfactorily pursuing an apprentice program or similar occupational program." The above definition of a "student" is one that is expanded from the present interpretation.

Student deferments would continue until registrants reach their 25th birth-

day or complete their undergraduate study. Furthermore, when casualties in an armed conflict reach 10 percent of the number of persons inducted during a 3-month period, all student deferments would end automatically. The bill allows students to postpone their vulnerability to the draft for a period of 2 to 3 years. In no way would they be able to avoid a shooting war under the 10-percent clause, and no other kind of deferment would be available to a student after he completed his course of study that would not have been available when he was 18 or 19 years old. Thus, the requirements of equity and fairness are met, while at the same time allowing for the value placed by our society on education and acquiring vocational skills.

D. OCCUPATIONAL DEFERMENTS

The Military Selective Service Act of 1967 authorizes the President to provide for the deferment from training and service in the Armed Forces of any or all categories of persons whose employment is found to be necessary to the maintenance of the national health, safety, or interest. This is a vital provision which should be included in any subsequent draft legislation.

Under present conditions, the administration of occupational deferments is quite haphazard—witness the number of agricultural deferments in New York City. Their administration should be more tightly regulated, so as to allow only those with a clearly demonstrated need the privilege of receiving such a deferment, and should adhere to uniform national criteria.

My bill continues in substance if not in fact the intent of previous legislation on this issue. It states that—

> Nothing herein shall be construed to prohibit the President, under such rules and regulations as he may prescribe, from establishing a separate and distinct selection system for persons found by him to have special skills essential to the national defense.

E. RIGHT TO COUNSEL

It is a confused, frightening, and generally disturbing experience for a young man when he appears before his draft board. Many times, because of ignorance of the draft laws and/or stage fright, the registrant does not adequately present his case, with consequences that are undesirable. To alleviate this situation, it is necessary that the registrant have the right to be represented by counsel to insure that the registrant has full understanding of the proceedings and that fair and equitable treatment occurs. The registrant should also have the right to appear in person before regional and area offices, as well as before local appeal boards. My bill would provide for the establishment of all the procedures just mentioned.

F. TREATMENT OF ALIENS

It is patently unfair that an alien, in temporary residence, be drafted into our Armed Forces without having the right of free choice between permanent citizenship—with its inherent duty to serve, if chosen—and eventual repatriation at the time his visa expires. Those who do not wish to become U.S. citizens should not be obligated to assume responsibilities identical to those who do.

The bill I introduce would continue to provide for the selection of aliens who remain in the United States for over 1 year and who do not otherwise qualify for deferment or exemption. It allows an alien who is ordered for induction, however, to change his status to that of "non-immigrant," thus becoming exempt from military service and at the same time becoming permanent ineligible to become a U.S. citizen.

G. PHYSICAL AND MENTAL STANDARDS

Another improvement in the present system which must be made is the elimination of the situation whereby a person who wants to enlist can be rejected on physical and/or mental grounds, but can be later inducted under the draft. The bill would insure that a person who volunteers for military service and who is rejected on mental or physical grounds cannot later be inducted into the Armed Forces unless there is some subsequent mental or physical change that would make him eligible for enlistment.

H. CONSCIENTIOUS OBJECTORS

The present draft law states that—

> Nothing contained in this title shall be construed to require any person to be subject to combatant training and service in the Armed Forces of the United States who, by reason of religious training and belief, is conscientiously opposed to participation in war in any form.

This language is too restrictive, and should be expanded to include that of the Supreme Court's in United States against Seeger. The decision in that case was that religious training and belief "does include a sincere and meaningful belief, which occupies a place in the life of its possessor parallel to that filled by an orthodox belief in God." The effect of this inclusion would be to eliminate confusion among local draft boards, and to make the guidelines for conscientious objection classifications clearer and more readily available to registrants.

The National Council of Churches says:

> Conscience is not a monopoly of Christians or of the religious traditions. Neither is there one kind of conscience that is "religious" or another that is "non-religious," but only the *human* conscience, which Christians see as God's gift, whether or not every individual so understands it.

The freedom of choice to participate or not to participate in war is a highly personal and moral one; and broad latitude to make this choice should be included in the law.

Another necessary addition to the present law concerning conscientious objectors is a requirement for a hearing by the Department of Justice when a local board decision denying conscientious objector status to a registrant is appealed. This would provide the appeal board with impartial information concerning a claimant's sincerity and "religious training and belief," information which the normally busy appeal board would not have the time to acquire. The reinstitution of Justice Department review of these cases will make it easier for registrants who do qualify for conscientious objector classification to obtain it, while making it much harder for draft evaders to escape service through the route of conscientious objection.

I. OTHER PROVISIONS

In addition to the basic provisions described above, the bill I introduce provides for the institution of four basic and necessary studies that might lead to future beneficial alterations in draft legislation.

A. VOLUNTEER ARMY

This alternative has been discussed earlier and conditionally rejected, at least for the present. Problems with cost, ability to provide desired manpower levels, and sociopolitical ramifications are yet to be solved. Its potential for future application, however, needs to be further studied.

B. MILITARY YOUTH OPPORTUNITY SCHOOLS

Many of the men presently declared unfit for service in the Armed Forces could, with a minimum of expense, be so trained as to meet both the mental and physical requirements for military service. Such men could be trained, on a voluntary basis, in military youth opportunity schools.

The advantages of such a program are many:

First. Many men who desire to join the Armed Forces would be given an opportunity to serve that would not otherwise be theirs.

Second. Many unemployed and perhaps unemployable men would be given the opportunity to learn skills, such as reading and vocational skills, which could be used later in civilian life.

Third. Many men would not have to be drafted involuntarily, because their place would be taken by others who have much to gain, rather than lose, from military service.

C. NATIONAL SERVICE CORPS

The intent of this study would be to determine the feasibility and desirability of considering some National Service Corps programs—potential ones would be the Peace Corps and VISTA—as alternatives to fulfilling one's obligation of service to the country. A person should have the right to determine the form his service shall take; freedom of choice should not be eliminated in the course of accepting the responsibilities of national service.

At present I do not see a fair way to equate nonmilitary with military service, and do not believe they can be considered an alternative to the draft. I see no objection and possible gain, however, in further exploration of the concept.

D. AMNESTY STUDY

A study should be conducted as to the appropriateness of granting amnesty in the near future to those registrants presently outside the United States who are liable to prosecution under selective service law, and who return to this country within 5 years of expatriation. They would return knowing that they would be free of criminal persecution, but also knowing that they would have to accept their responsibilities under selective service law and be exposed to the draft in the prime age group just like other registrants.

It might be an act of great future benefit to the country if amnesty were granted if it resulted in even a partial diminishment of the present war-inspired divisions in the population. As

George Washington said in his proclamation of amnesty on July 10, 1795:

It appears to me no less consistent with the public good than it is with my personal feelings to mingle in the operations of Government every degree of moderation and tenderness which the national justice, dignity, and safety may permit.

CONCLUSION

The provisions of my bill discussed above describe specific alterations in the present draft system which I think are both necessary and desirable. They are oriented toward the immediate future, and should be instituted as quickly as possible in order to correct the faults that are so rampant in the selective service law. I have supported these provisions not merely because I agree with the precise recommendations they incorporate, however. I support them as well because of the type of alterations they suggest and because the intent of the bill is to make changes that I find identical to those I would recommend. Thus, regardless of the success of this bill in becoming law, I will continue to advocate that the Selective Service system evolve toward the type of structure just outlined.

General Hershey urged in May 1969, that the Congress act "promptly and favorably" on legislation to reverse the present order of induction and to establish a random selection system. Indication of his support should signal the fact that the present system is not apt to be long lived. The time to change to a random selection system has come. Margaret Mead noted, in the same speech cited earlier, that—

A nationwide draft helps to underline a sense of national commitment and the urgency of total national involvement in the maintenance of an orderly world.

Action is needed now to make this "nationwide draft" an equitable, fair, and predictable one.

My bill, as introduced, follows:

H.R. 14466

A bill to amend the Military Service Act of 1967 to provide for a fair and random system of selecting persons for induction into military service, to provide for the uniform application of Selective Service policies, to raise the incidence of volunteers in military service, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Selective Service Act of 1969."

TITLE I—PURPOSE AND DEFINITIONS

Sec. 101. Short Title
Sec. 102. Findings and Declaration of Purpose
Sec. 103. Definitions
Sec. 104. Saving Provision
Sec. 105. Effective Date

TITLE II—SELECTIVE SERVICE SYSTEM

Sec. 201. Organization
Sec. 202. Emergency Medical Care
Sec. 203. Penalties
Sec. 204. Nonapplicability of Certain Laws
Sec. 205. Selection
Sec. 206. Authority to order Reserve Components to Active Federal Service

TITLE III—THE INDIVIDUAL AND THE SELECTIVE SERVICE SYSTEM

Sec. 301. Registration
Sec. 302. Classification, Training and Service
Sec. 303. Right to Counsel; Right to Appearance
Sec. 304. Induction
Sec. 305. Length of Service
Sec. 306. Enlistment
Sec. 307. Pay and Allowances
Sec. 308. Decrease in Period of Service
Sec. 309. Medical and Dental Officers
Sec. 310. Exemptions from Registration, Training, and Service
Sec. 311. Veterans' Exemptions
Sec. 312. Reserve Components Exemptions
Sec. 313. Officers' Training; Officials; Ministers of Religion
Sec. 314. Student and Apprentice Deferments; Casualty Ratio
Sec. 315. Conscientious Objectors
Sec. 316. Duration of Exemptions or Deferment
Sec. 317. Minority Discharges

TITLE IV—MISCELLANEOUS

Sec. 401. Military Youth Opportunity Schools
Sec. 402. Volunteer Army Study
Sec. 403. National Service Corps Study
Sec. 404. Amnesty Study

SHORT TITLE

SEC. 101. This Act may be cited as the "Selective Service Act."

FINDINGS AND DECLARATION OF PURPOSE

SEC. 102. (a) The Congress finds that the maintenance of an adequate armed force is essential to the security of the United States.

(b) The Congress further finds that so long as all eligible persons are not required to serve in the Armed Forces, those who are required to serve should be selected under a system which is fair, just, and adequate to meet the needs of the national defense and at the same time consistent with the enhancement of an effective national economy.

(c) The Congress further finds that the military manpower needs of the Nation should be met to as high a degree as practicable by reliance upon voluntary accessions to military duty.

(d) The Congress further finds that civilian personnel shall be used wherever practical in noncombat positions within the military establishment, and that women should be encouraged to serve both in the Armed Forces and in civilian positions in support of such forces.

(e) It is, therefore, the purpose of this Act to establish procedures for the fair and equitable selection of qualified young men to meet the continuing military manpower needs of the Nation.

DEFINITIONS

SEC. 103. When used in this title—

(a) The term "between the ages of eighteen and twenty-six" shall refer to men who have attained the eighteenth anniversary of the day of their birth and who have not attained the twenty-sixth anniversary of the day of their birth; and other terms designating different age groups shall be construed in a similar manner.

(b) The term "United States", when used in a geographical sense, means the several States, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam.

(c) The term "Armed Forces" includes the Army, the Navy, the Marine Corps, the Air Force, and the Coast Guard.

(d) The term "district court of the United States" includes the courts of the United States for the territories and possessions of the United States.

(e) The term "Director" means the Director of the Selective Service System.

(f) (1) The term "duly ordained minister of religion" means a person who has been ordained, in accordance with the ceremonial ritual, or discipline of a church, religious sect, or organization established on the basis of a community of faith and belief, doctrines and practices of a religious character, to preach and to teach the doctrines of such church, sect, or organization and to administer the rites and ceremonies thereof in public worship, and who as his regular and customary vocation preaches and teaches the principles of religion and administers the ordinances of public worship as embodied in the creed or principles of such church, sect, or organization.

(2) The term "regular minister of religion" means one who as his customary vocation preaches and teaches the principles of religion of a church, a religious sect, or organization of which he is a member, without having been formally ordained as a minister of religion, and who is recognized by such church, sect, or organization as a regular minister.

(3) The term "regular or duly ordained minister of religion" does not include a person who irregularly or incidentally preaches and teaches the principles of religion of a church, religious sect, or organization and does not include any person who may have been duly ordained a minister in accordance with the ceremonial, rite, or discipline of a church, religious sect, or organization, but who does not regularly, as a vocation, teach and preach the principles of religion and administer the ordinances of public worship, as embodied in the creed of principles of his church, sect, or organization.

(g) The term "organized unit," when used with respect to a reserve component, means a unit in which the members thereof are required satisfactorily tc participate in scheduled drills and training periods as prescribed by the Secretary of Defense.

(h) The term "reserve component of the Armed Forces" includes, unless the context otherwise requires, the federally recognized National Guard of the United States, the federally recognized Air National Guard of the United States, the Officers' Reserve Corps, the Regular Army Reserve, the Air Force Reserve, the Enlisted Reserve Corps, the Naval Reserve, the Marine Corps Reserve, and the Coast Guard Reserve, and shall include, in addition to the foregoing, the Public Health Service Reserve when serving with the Armed Forces.

SAVING PROVISION

SEC. 104. Nothing in this title shall be deemed to amend any provision of the National Security Act of 1947 (61 Stat. 495).

EFFECTIVE DATE

SEC. 105. This title shall become effective immediately; except that unless the President, or the Congress by concurrent resolution, declares a national emergency after the date of enactment of this Act, no person shall be inducted or ordered into active service without his consent under this title within ninety days after the date of its enactment.

TITLE II—SELECTIVE SERVICE SYSTEM

Organization

SEC. 201. (a) (1) There is hereby established in the executive branch of the Government an agency to be known as the Selective Service System, and a Director of Selective Service who shall be the head thereof.

(2) The Selective Service System shall be composed of (A) the National Selective Service System Office, to be located in Washington, District of Columbia; (B) eight regional headquarters distributed throughout the United States; and (C) such area offices, ap-

peal boards, and other agencies as are hereafter provided.

(3) The Director shall be appointed by the President for a term of six years, with the advice and consent of the Senate.

(4) The Selective Service System shall, to the maximum extent practicable, utilize automatic data processing equipment in carrying out the provisions of this title.

(5) The functions of the Office of Selective Service Records (established by the Act of March 31, 1947) and of the Director of the Office of Selective Service Records are hereby transferred to the Selective Service System and the Director of Selective Service, respectively. The personnel, property, records, and unexpected balances (available or to be made available) of appropriations, allocations, and other funds of the Office of Selective Service Records are hereby transferred to the Selective Service System. The Office of Selective Service Records shall cease to exist upon the taking of effect of the provisions of this title: *Provided*, That, effective upon the termination of this title and notwithstanding such termination in other respects, (A) the said Office of Selective Service Records is hereby reestablished on the same basis and with the same functions as obtained prior to the effective date of this title, (B) said reestablished Office shall be responsible for liquidating any other outstanding affairs of the Selective Service System, and (C) the personnel, property, records, and unexpended balances (available or to be made available) of appropriations, allocations, and other funds of the Selective Service System shall be transferred to such reestablished Office of Selective Service Records.

(b) The President is authorized—

(1) to prescribe the necessary rules and regulations to carry out the provisions of this title;

(2) to appoint a regional director for the Selective Service System for each regional headquarters, who shall be in immediate charge of the regional headquarters; to employ such number of civilians, and upon declaration by the President of a state of national emergency to order to active duty with their consent and to assign to the Selective Service System such officials of the selective service section of the various State headquarters and headquarters detachments and such other officials of the federally recognized National Guard of the United States and other Armed Forces personnel (including personnel of the Reserve components thereof), as may be necessary for the administration of the national and of the several regional headquarters and area offices of the Selective Service System;

(3) to create and establish one or more area offices in each State with an area of jurisdiction to be established by the Director of the Selective Service on a population basis. Each area office shall consist of a civilian area director, assisted by appropriate civilian staff. Each area director shall have the power within the respective jurisdiction of such an area office to hear and determine, in strict conformity with the rules and regulations prescribed by the President, and subject to a right of appeal to the local board and from the local board to the appeal boards herein authorized, all questions or claims with respect to inclusion for, or examination or deferment from training and service under this title, of all individuals within the jurisdiction of such area offices, together with such other duties as may be assigned under this title; and

(4) to create and establish within the Selective Service System civilian local boards as well as such other civilian agencies of appeal, as may be necessary to carry out its functions. Each local board shall function in conjunction with an area office as provided in section 24(b)(3) of this title and shall consist of three or more members. The local board shall, under rules and regulations prescribed by the President, and under appropriate precedents have the power within the jurisdiction of such area office to hear and determine appeals from the decisions of an area director subject to the right of further appeal to the appeal boards herein authorized and all other questions relating to inclusion for, or exemption or deferment from, training and service arising under this title. There shall be not less than one appeal board, together with such additional separate panels thereof as may be prescribed by the President, located within the area of each regional headquarters of the Selective Service System. Appeal boards within the Selective Service System shall be composed of civilians who are citizens of the United States and who are not members of the Armed Forces. The decision of such appeal boards shall be final in cases before them on appeal unless modified or changed by the President.

(c) No citizen shall be denied membership in any component of the Selective Service System established pursuant to this section on account of race, color, creed, or sex. Composition of the membership on local and appeal boards shall represent, as far as practicable, all elements of the public which the board serves. No citizen shall serve on any such component for more than twenty-five years, or after he has attained the age of sixty-five years.

(d) No person who is a civilian officer, member, agent, or employee of the Office of Selective Service Records, or the Selective Service System, or of any local board or appeal board or other agency of such Office or System, shall be excepted from registration or deferred or exempted from training and service, as provided for in this title, by reason of his status as such civilian officer, member, agent, or employee.

(e) The President is authorized—

(1) to appoint pursuant to the provisions of title 5, United States Code, and to classify and pay pursuant to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, such officers, agents, and employees as he may deem necessary to carry out the provisions of this title: *Provided*, That their compensation may be fixed without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title: *Provided further*, That any officer on the active or retired list of the Armed Forces, or any reserve component thereof with his consent, or any officer or employee of any department or agency of the United States who may be assigned or detailed to any office or position to carry out the provisions of this title may serve in and perform the functions of such office or position without loss of or prejudice to his status as such officer in the Armed Forces or reserve component thereof, or as such officer or employee in any department or agency of the United States.

(2) to utilize the services of any or all departments and any and all officers or agents of the United States, and to accept the services of all officers and agents of the several States, territories, and possessions, and subdivisions thereof, and the District of Columbia, and of private welfare organizations, in the execution of this title;

(3) to purchase such printing, binding, and blankbook work from public, commercial, or private printing establishments or binderies upon orders placed by the Public Printer or upon waivers issued in accordance with section 12 of the Printing Act approved January 12, 1895, as amended, and to obtain by purchase, loan, or gift such equipment and supplies for the Selective Service System, as he may deem necessary to carry out the provisions of this title, with or without advertising or formal contract;

(4) to prescribe eligibility, rules, and regulations governing the parole for service in the Armed Forces, or for any other special service established pursuant to this title, or any person convicted of a violation of any of the provisions of this title;

(5) subject to the availability of funds appropriated for such purpose, to procure such space as he may deem necessary to carry out the provisions of this title and Public Law 26, Eightieth Congress, approved March 31, 1947, by lease pursuant to existing statutes, except that the provisions of the Act of June 30, 1932 (47 Stat. 412), as amended by section 15 of the Act of March 3, 1933 (47 Stat. 1517; 40 U.S.C. 278a), shall not apply to any lease entered into under the authority of this title;

(6) subject to the availability of funds appropriated for such purposes, to determine the location of such additional temporary installations as he may deem essential; to utilize and enlarge such existing installations; to construct, install, and equip, and to complete the construction, installation, and equipment of such buildings, structures, utilities, and appurtenances (including the necessary grading and removal, repair or remodeling of existing structures and installations), as may be necessary to carry out the provisions of this title; and, in order to accomplish the purpose of this title, to acquire lands, and rights pertaining thereto, or other interests therein, for temporary use thereof, by donation or lease, and to prosecute construction thereon prior to the approval of the title by the Attorney General as required by section 355, Revised Statutes, as amended;

(7) subject to the availability of funds appropriated for such purposes, to utilize, in order to provide and furnish such services as may be deemed necessary or expedient to accomplish the purposes of this title, such personnel of the Armed Forces and of reserve components thereof with their consent, and such civilian personnel, as may be necessary. For the purposes of this title, the provisions of section 14 of the Federal Employees' Pay Act of 1946 (Public Law 390, Seventy-ninth Congress) with respect to the maximum limitations as to the number of civilian employees shall not be applicable to the Department of the Army, the Department of the Navy, or the Department of the Air Force.

(8) to delegate any authority vested in him under this title, and to provide for the subdelegation of any such authority.

(f) In the administration of this title, gifts of supplies, equipment, and voluntary services may be accepted.

(g) The Chief of Finance, United States Army, is authorized to act as the fiscal, disbursing, and accounting agent of the Director in carrying out the provisions of this title.

(h) The Director is authorized to make final settlement of individual claims, for amounts not exceeding $50, for travel and other expenses of uncompensated personnel of the Office of Selective Service Records, or the Selective Service System, incurred while in the performance of official duties, without regard to other provisions of law governing the travel of civilian employees of the Federal Government.

(i) The Director of Selective Service shall submit to the Congress semiannually a written report covering the operation of the Selective Service System and such report shall include, by States, information as to the number of persons registered under this Act; the number of persons inducted into the military service under this Act; the number of deferments granted under this Act and the basis for such deferments; and such other specific kinds of information as the Congress may from time to time request.

EMERGENCY MEDICAL CARE

SEC. 202. Under such rules and regulations as may be prescribed by the President, funds available to carry out the provisions of this title shall also be available for the payment of actual and reasonable

expenses of emergency medical care, including hospitalization, of registrants who suffer illness or injury, and the transportation, and burial, of the remains of registrants who suffer death, while acting under orders issued under the provisions of this title, but such burial expenses shall not exceed an amount to be determined by the President.

PENALTIES

SEC. 203. (a) Any member of the Selective Service System or any other person charged as herein provided with the duty of carrying out any of the provisions of this title, or the rules or regulations made or directions given thereunder, who shall knowingly fail or neglect to perform such duty, and any person charged with such duty, or having and exercising any authority under said title, rules, regulations, or directions who shall knowingly make, or be a party to the making, of any false, improper, or incorrect registration, classification, physical or mental examination, deferment, induction, enrollment, or muster, and any person who shall knowingly make, or be a party to the making of, any false statement or certificate regarding or bearing upon a classification or in support of any request for a particular classification, for service under the provisions of this title, or rules, regulations, or directions made pursuant thereto, or who otherwise evades or refuses registration or service in the Armed Forces or any of the requirements of this title, or who knowingly counsels, aids, or abets another to refuse or evade registration or service in the Armed Forces or any of the requirements of this title, or of said rules, regulations, or directions, or who in any manner shall knowingly fail or neglect or refuse to perform any duty required of him under or in the execution of this title, or rules, regulations, or directions made pursuant to this title, or any person or persons who shall knowingly hinder or interfere or attempt to do so in any way, by force or violence or otherwise, with the administration of this title or the rules or regulations made pursuant thereto, or who conspires to commit any one or more of such offenses, shall, upon conviction in any district court of the United States of competent jurisdiction, be punished by imprisonment for not more than five years or a fine of not more than $10,000, or by both such fine and imprisonment, or if subject to military or naval law may be tried by court martial, and, on conviction, shall suffer such punishment as a court martial may direct. No person shall be tried by court martial in any case arising under this title unless such person has been actually inducted for the training and service prescribed under this title or unless he is subject to trial by court marshal under laws in force prior to the enactment of this title. Precedence shall be given by courts to the trial of cases arising under this title, and such cases shall, upon request of the Attorney General, be advanced on the docket for hearing at the earliest practicable date.

(b) Any person (1) who knowingly transfers or delivers to another, for the purpose of aiding or abetting the making of any false identification or representation, any registration certificate, alien's certificate of nonresidence, or any other certificate issued pursuant to or prescribed by the provisions of this title, or rules or regulations promulgated hereunder; or (2) who, with intent that it be used for any purpose of false identification or representation, has in his possession any such certificate not duly issued to him; or (3) who forges, alters, knowingly destroys, knowingly mutilates, or in any manner changes any such certificate or any notation duly and validly inscribed thereon; or (4) who, with intent that it be used for any purpose of false identification or representation, photographs, prints, or in in any manner makes or executes any engraving, photograph, print, or impression in the likeness of any such certificate, or any colorable imitation thereof; or (5) who has in his possession any certificate purporting to be a certificate issued pursuant to this title, or rules and regulations promulgated hereunder, which he knows to be falsely made, reproduced, forged, counterfeited, or altered; or (6) who knowingly violates or evades any of the provisions of this title or rules and regulations promulgated pursuant thereto relating to the issuance, transfer, or possession of such certificate, shall, upon conviction, be fined not to exceed $10,000 or be imprisoned for not more than five years, or both. Whenever on trial for a violation of this subsection the defendant is shown to have or to have had possession of any certificate not duly issued to him, such possession shall be deemed sufficient evidence to establish an intent to use such certificate for purposes of false identification or representation, unless the defendant explains such possession to the satisfaction of the jury.

NONAPPLICABILITY OF CERTAIN LAWS

SEC. 204. (a) Nothing in section 203, 205, or 207 of title 18 of the United States Code, or in the second sentence of subsection (a) of section 9 of the Act of August 2, 1939 (53 Stat. 1148), entitled "An Act to prevent pernicious political activities", as amended shall be deemed to apply to any person because of his appointment under authority of this title or the regulations made pursuant thereto as an uncompensated official of the Selective Service System, or as an individual to conduct hearings on appeals of persons claiming exemption from combatant or noncombatant training because of conscientious objections, or as a member of the National Selective Service Appeals Board.

(b) All functions performed under this title shall be excluded from the operation of the Administrative Procedure Act (60 Stat. 237) except as to the requirements of section 3 of such Act.

(c) In computing the lump-sum payments made to Air Force Reserve officers under the provisions of section 2 of the Act of June 16, 1936, as amended (U.S.C., title 10, sec. 300a), and to Reserve officers of the Navy or to their beneficiaries under section 12 of the Act of August 4, 1942, as amended (U.S.C., title 34, sec. 850k), no credit shall be allowed for any period of active service performed from the effective date of this title to the date on which this title shall cease to be effective. Each such lump-sum payment shall be prorated for a fractional part of a year of active service in the case of any Reserve officer subject to the provisions of either such section, if such Reserve officer performs continuous active service for one or more years (inclusive of such service performed during the period in which this title is effective) and such active service includes a fractional part of a year immediately prior to the effective date of this title, or immediately following the date on which this title shall cease to be effective, or both.

SELECTION

SEC. 205. (a) The selection of persons for training and service shall be made in a fair and impartial manner from the persons who are liable for such training and service and who at the time of selection are registered and classified, but not deferred or exempted.

(b) The order of induction of registrants found qualified for induction shall be determined as follows:

(1) Selection of persons for induction to meet the military manpower needs shall be made from persons in the prime selection group, after the selection of delinquents and volunteers.

(2) The term "prime selection groups" means persons who are liable for training and service under this title, and who at the time of selection are registered and classified and are—

(A) nineteen years of age and not deferred or exempted;

(B) between nineteen and thirty-five years of age and, on or after the effective date of the Selective Service Act of 1969, were in a deferred status but are no longer in such status; or

(C) between twenty or twenty-six years of age on the effective date of the Selective Service Act of 1969 and are not deferred or exempted.

(3) A person shall remain in the prime selection group for a period of twelve months, unless inducted into the Armed Forces during such period. Any person in a deferred status upon reaching the age of nineteen shall, upon the termination of such deferred status, and if qualified, be liable for twelve months for induction as a registrant within the prime selection group irrespective of his actual age, unless he is otherwise deferred. Any person removed from the prime selection group because of a deferment shall again be placed in the prime selection group, if he otherwise qualifies, whenever such deferment is terminated. But no person shall remain in the prime selection group for any period or periods totaling more than twelve months.

(4) On the effective date of the Selective Service Act of 1969, any person who comes within the provisions of clause (B) or (C) of paragraph (3) of this subsection shall be placed in the prime selection group as follows:

(A) A person who has attained the twenty-fourth anniversary of the date of his birth prior to such effective date shall be placed in the prime selection group during the first twelve-month period following such effective date.

(B) A person between twenty-two and twenty-four years of age on such effective date shall be placed in the prime selection group during the second twelve-month period following such effective date.

(C) A person between twenty and twenty-two years of age on such effective date shall be placed in the prime selection group during the third twelve-month period following such effective date.

(5) The order of call for induction from among those persons in the prime selection group shall be determined as follows:

Under such rules and regulations as the President shall prescribe—

(A) the Selective Service System shall from time to time publish, for each month in the year, a list of numbers randomly arranged, corresponding to the number of days in such month;

(B) those persons first called from the prime selection group for the particular month will be those whose day of birth is the same as the first number on the list; those next called will be those whose day of birth is the second number on the list; and this procedure shall be followed until the particular month's quota is met;

(C) the Selective Service System shall also from time to time publish a list of the letters of the alphabet randomly arranged. In the event that the procedure described in clause (B) just above does not serve to distinguish clearly an order of call as between two or more persons, then reference shall be made to the list of letters and the first letter of the last names of such persons to determine such an order of call; and

(D) the determination of order of call may be made upon a national, regional, or local or other basis, as the President shall determine.

(c) Nothing herein shall be construed to prohibit the President, under such rules and regulations as he may prescribe, from establishing a separate and distinct selection system for persons found by him to have special skills essential to the national defense.

(d) There shall be no discrimination against any person on account of race, color, or creed in the selection of persons for training and service under this title or in the

interpretation and execution of any provision of this title.

(e) No order for induction shall be issued under this title to any person who has not attained the age of nineteen years unless the President finds that such action is in the national interest.

(f) Notwithstanding any other provision of law, except section 314 of the Immigration and Nationality Act (8 U.S.C. 1425), no person who is qualified in a needed medical, dental, or allied specialist category, and who is liable for induction under section 4 of this title, shall be held to be ineligible for appointment as a commissioned officer of an armed force of the United States on the sole ground that he is not a citizen of the United States or has not made a declaration of intent to become a citizen thereof, and any such person who is not a citizen of the United States and who is appointed as a commissioned officer may, in lieu of the oath prescribed by section 1331 of title 5, United States Code, take such oath of service and obedience as the Secretary of Defense may prescribe.

(g) For the purposes of regulations issued under this Act, a delinquent is a person who is required to be registered under this Act and who fails to perform or who violates any duty, with respect to his own status, required of him under the provisions of this Act and the regulations issued thereunder.

AUTHORITY TO ORDER RESERVE COMPONENTS TO ACTIVE FEDERAL SERVICE

SEC. 206. Until July 1, 1953, and subject to the limitations imposed by section 2 of the Selective Service Act of 1948, as amended, the President shall be authorized to order into the active military or naval service of the United States for a period of not to exceed twenty-four consecutive months, with or without their consent, any or all members and units of any or all Reserve components of the Armed Forces of the United States and retired personnel of the Regular Armed Forces. Unless he is sooner released under regulations prescribed by the Secretary of the military department concerned, any member of the Inactive or Volunteer Reserve who served on active duty for a period of twelve months or more in any branch of the Armed Forces between the period December 7, 1941, and September 2, 1945, inclusive, who is now or may hereafter be ordered to active duty pursuant to this section, shall upon completion of seventeen or more months of active duty since June 25, 1950, if he makes application therefor to the Secretary of the branch of service in which he is serving, be released from active duty and shall not thereafter be ordered to active duty for periods in excess of thirty days without his consent except in time of war or national emergency hereafter declared by the Congress: *Provided,* That the foregoing shall not apply to any member of the Inactive or Volunteer Reserve ordered to active duty whose rating or specialty is found by the Secretary of the military department concerned to be critical and whose release to inactive duty prior to the period for which he was ordered to active duty would impair the efficiency of the military department concerned.

The President may retain the unit organizations and the equipment thereof, exclusive of the individual members thereof, in the active Federal service for a total period of five consecutive years, and upon being relieved by the appropriate Secretary from active Federal service, National Guard, or Air National Guard units, shall, insofar as practicable, be returned to their National Guard or Air National Guard status in their respective States, territories, the District of Columbia, and Puerto Rico, with pertinent records, colors, histories, trophies, and other historical impediments.

TITLE III—THE INDIVIDUAL AND THE SELECTIVE SERVICE SYSTEM

REGISTRATION

SEC. 301. (a) It shall be the duty of every male citizen of the United States, and of every male alien in the United States in the status of an alien admitted for permanent residence, upon attaining the eighteenth anniversary of his date of birth to register with the Selective Service System in accordance with such rules and regulations as may be prescribed by the President. Any male alien in the United States in the status of an alien admitted for permanent residence who has not heretofore registered with the Selective Service System shall be required to do so within six months after the date of enactment of the Selective Service Act of 1969.

(b) It shall be the duty of every registrant to keep the Selective Service System informed as to his current address and changes in status according to the terms of such rules and regulations as the President may prescribe.

CLASSIFICATION, TRAINING, AND SERVICE

SEC. 302. (a) Except as otherwise provided in this title, every person registered under the provisions of section 3 of this title who is between the ages of eighteen years and six months and twenty-six years shall be liable for training and service in the Armed Forces of the United States.

(b) Each registrant shall be liable immediately for classification and examination, and shall, as soon as practicable following his registration, be examined physically and mentally in order to determine his suitability for induction for training and service in the Armed Forces. Each registrant shall be classified on the basis of such examination to indicate his availability for induction for training and service in the Armed Forces.

(c) Notwithstanding any other provision of law, any registrant who has failed or refused to report for a physical and mental examination in order to determine his suitability for induction for training and service in the Armed Forces, shall continue to remain liable for such examination and induction until relieved of this liability under such condtions as the President shall prescribe.

(d) Any alien admitted for permanent residence shall not be liable for training and service until he has resided in the United States for a total period of one year: *Provided,* That any alien relieved from liability for training and service under an existing treaty shall be permanently ineligible to become a citizen of the United States: *Provided further,* That any alien shall be relieved from liability for training and service under this title if, prior to his inducton, his status is adjusted to that of a nonimmigrant, but any alien who obtains such an adjustment pursuant to section 247(c) of the Immigration and Nationality Act, as amended, shall be permanently ineligible to become a citizen of the United States: *And provided further,* That any alien who has been in the United States as a nonimmigrant and whose status is adjusted to that of a permanent resident, or who is readmitted to the United States as a permanent resident within one year of his departure shall have his liability for training and service extended as if he had been deferred and his liability had been extended under the provisions of this title.

(d) Nothing in this section shall be construed as superseding the provisions of any existing treaties of the United States.

RIGHT TO COUNSEL; RIGHT OF APPEARANCE

SEC. 303. Each registrant shall be afforded the opportunity to appear in person before the area office, regional office, local board, or any other agency of the Selective Service System to present testimony or other evidence regarding his status. Each registrant shall further have the right to be represented before such office, board, or other agency by private counsel. If any registrant is financially unable to provide his own counsel, upon his request such counsel shall be made available without charge, under such rules and regulations as the President may prescribe.

INDUCTION

SEC. 304. (a) The President is authorized to select and induct for training and service in the Armed Forces such number of persons as may be required to provide and maintain the strength of the Armed Forces. This authority shall obtain whether or not a state of war exists, and shall be exercised in the manner provided in this title.

(b) Persons inducted into the Armed Forces for training and service under this title shall be assigned to stations or units of such forces. Persons inducted into the land forces of the United States pursuant to this title shall be deemed to be members of the Army of the United States; persons inducted into the naval forces of the United States pursuant to this title shall be deemed to be members of the United States Navy or the United States Marine Corps or the United States Coast Guard, as appropriate; and persons inducted into the air forces of the United States pursuant to this title shall be deemed to be members of the Air Force of the United States.

(c) Every person inducted into the Armed Forces pursuant to the authority of this section shall, following his induction, be given full and adequate military training for a period of not less than four months, and no such person shall, during this four months period, be assigned for duty at any installation located on land outside the United States, its territories and possessions (including the Canal Zone).

(d) No person in the medical, dental, and allied specialist categories shall be inducted under the provisions of this section if he applies or has applied for an appointment as a Reserve officer in one of the Armed Forces in any of such categories and is or has been rejected for such appointment on the sole ground of a physical disqualification.

(e) No person, without his consent, shall be inducted for training and service in the Armed Forces, except as otherwise provided in this title, after he has attained the twenty-sixth anniversary of the day of his birth.

(f) No person shall be inducted into the Armed Forces for training and service under this title until his acceptability in all respects, including his physical and mental fitness, has been satisfactorily determined under standards prescribed by the Secretary of Defense. The physical and mental standards which a person must meet in order to qualify for induction shall be no lower than those prescribed for persons who voluntarily enlist for service in the Army of the United States.

(g) No person shall be inducted for such training and service until adequate provision shall have been made for such shelter, sanitary facilities, water supplies, heating and lighting arrangements, medical care, and hospital accommodations for such persons as may be determined by the Secretary of Defense (or the Secretary of Transportation with respect to the United States Coast Guard) to be essential to public and personal health.

(h) Notwithstanding any other provision of law, any registrant who has failed or refused to report for induction shall continue to remain liable for induction until relieved of this liability under such conditions as the President shall prescribe.

LENGTH OF SERVICE

SEC. 305 (a) Each person inducted into the Armed Forces under the provisions of this title shall serve on active training and service for a period of twenty-four consecutive months, unless sooner released, transferred, or discharged in accordance with procedures prescribed by the Secretary of Defense (or

the Secretary of Transportation with respect to the United States Coast Guard) or as otherwise prescribed by this title. The Secretaries of the Army, Navy, and Air Force, with the approval of the Secretary of Defense (and the Secretary of Transportation with respect to the United States Coast Guard), may provide, by regulations which shall be as nearly uniform as practicable, for the release from training and service in the Armed Forces prior to serving the periods required by this section of individuals who have volunteered for and are accepted into organized units of the Army National Guard, the Air National Guard, and other reserve components of the Armed Forces.

(b) Each person who hereafter and prior to the enactment of the 1951 Amendments to the Universal Military Training and Service Act is inducted, enlisted, or appointed and serves for a period of less than three years in one of the Armed Forces and meets the qualifications for enlistment or appointment in a reserve component of the armed force in which he serves, shall be transferred to a reserve component of such armed force, and until the expiration of a period of five years after such transfer, or until he is discharged from such reserve component, whichever occurs first, shall be deemed to be a member of such reserve component and shall be subject to such additional training and service as may now or hereafter be prescribed by law for such reserve component: *Provided,* That any such person who completes at least twenty-one months of service in the Armed Forces and who thereafter serves satisfactorily (1) on active duty in the Armed Forces under a voluntary extension for a period of at least one year, which extension is hereby authorized, or (2) in an organized unit of any reserve component of any of the Armed Forces for a period of at least thirty-six consecutive months, shall, except in time of war or national emergency declared by the Congress, be relieved from any further liability under this subsection to serve in any reserve component of the Armed Forces of the United States, but nothing in this subsection shall be construed to prevent any such person, while in a reserve component of such forces, from being ordered or called to active duty in such forces.

ENLISTMENT

SEC. 306. (a) Any person between the ages of eighteen years and six months and twenty-six years shall be offered an opportunity to enlist in the Regular Army for a period of service equal to that prescribed in this title: *Provided,* That, notwithstanding the provisions of this or any other Act, any person so enlisting shall not have his enlistment extended without his consent until after a declaration of war or national emergency by the Congress after the date of enactment of the Selective Service Act of 1969.

(b) Any enlisted member of any reserve component of the Armed Forces may, during the effective period of this title, apply for a period of service equal to that prescribed in section 6 of this title, and his application shall be accepted if his services can be effectively utilized and his physical and mental fitness for such service meet the standards prescribed by the head of the department concerned. Active service performed pursuant to this section shall not prejudice the status of any such as a member of a reserve component. Any person who was a member of a reserve component on June 25, 1950, and who thereafter continued to serve satisfactorily in such reserve component, shall, if his application for active duty made pursuant to this paragraph is denied, be deferred from induction under this title until such time as he is ordered to active duty or ceases to serve satisfactorily in such reserve component.

(c) Any person between the ages of eighteen years and six months and twenty-six years shall be afforded an opportunity to volunteer for induction into the Armed Forces of the United States for the training and service prescribed in section 5, but any person who so volunteers shall be inducted for such training and service so long as he is deferred after classification, only as prescribed by the President.

(d) Any person after attaining the age of seventeen shall, with the written consent of his parents or guardian, be afforded an opportunity to volunteer for induction into the Armed Forces of the United States for the training and service prescribed in section 5.

PAY AND ALLOWANCES

SEC. 307. (a) With respect to the persons inducted for training and service under this title, there shall be paid, allowed, and extended the same pay, allowances, pensions, disability and death compensation, and other benefits as are provided by law in the case of other enlisted men of like grades and length of service of that component of the Armed Forces to which they are assigned. Section 3 of the Act of July 25, 1947 (Public Law 239, Eightieth Congress), is hereby amended by deleting therefrom the following: "Act of March 7, 1942 (56 Stat. 143–148, ch. 166), as amended". The Act of March 7, 1942 (56 Stat. 143–148), as amended, as hereby made applicable to persons inducted into the Armed Forces pursuant to this title.

(b) Notwithstanding any other provision of law, any person who is inducted into the Armed Forces under this Act and who before being inducted, was receiving compensation from any person may, while serving under that induction, receive compensation from that person.

DECREASE IN PERIOD OF SERVICE

SEC. 308. (a) Upon a finding by him that such action is justified by the strength of the Armed Forces in the light of national and international conditions, the President, upon recommendations of the Secretary of Defense, is authorized by Executive order, which shall be uniform in its application to all persons inducted under this title but which may vary as to age groups, to provide for (1) decreasing periods of service under this title but in no case to a lesser period of time than can be economically utilized, or (2) eliminating periods of service required under this title.

MEDICAL AND DENTAL OFFICERS

SEC. 309. (a) The President may order to active duty (other than for training), as defined in section 101(22) of title 10, United States Code, for a period of not more than twenty-four consecutive months, with or without his consent, any member of a reserve component of the Armed Forces of the United States who is in a medical, dental, or allied specialist category, who has not attained the thirty-fifth anniversary of the date of his birth, and has not performed at least one year of active duty (other than for training). This subsection does not affect or limit the authority to order members of the reserve components to active duty contained in section 672 of title 10, United States Code.

(b) For the purposes of computation of the periods of active duty (other than for training) referred to in subsection (1), credit shall be given to all periods of one day or more performed under competent orders, except that no credit shall be allowed for periods spent in student programs prior to receipt of the appropriate professional degree or in intern training.

(c) Any person who is called or ordered to active duty (other than for training) from a reserve component of the Armed Forces of the United States after September 5, 1950, and thereafter serves on active duty (other than for training) as a medical, dental, or allied specialist for a period of twelve months or more shall, upon release from active duty or within six months thereafter, be afforded an opportunity to resign his commission from the reserve component of which he is a member unless he is otherwise obligated to serve on active military training and service in the Armed Forces or in training in a reserve component by law or contract.

(d) Any physician or dentist who meets the qualifications for a Reserve commission in the respective military department shall, so long as there is a need for the services of such a physician or dentist, be afforded an opportunity to volunteer for a period of active duty (other than for training) of not less than twenty-four months. Any physician or dentist who so volunteers his service, and meets the qualifications for a Reserve commission shall be ordered to active duty (other than for training) for not less than twenty-four months, notwithstanding the grade or rank to which such physician or dentist is entitled.

(e) Notwithstanding any other provision of law, any qualified person who—

(1) is liable for induction; or

(2) as a member of a reserve component is ordered to active duty,

as a physician, or dentist, or in an allied specialist category in the Armed Forces of the United States, shall, under regulations prescribed by the President, be appointed, reappointed, or promoted to such grade or rank as may be commensurate with his professional education, experience, or ability: *Provided,* That any person in a needed medical, dental, or allied specialist category who fails to qualify for, or who does not accept, a commission, or whose commission has been terminated, may be used in his professional capacity in an enlisted grade.

EXEMPTIONS FROM REGISTRATION, TRAINING, AND SERVICE

SEC. 310. (a) Foreign diplomatic representatives, technical attachés of foreign embassies and legations, consuls general, consuls, vice consuls, and other consular agents of foreign countries who are not citizens of the United States, and members of their families, shall not be required to be registered under section 3 and shall be relieved from liability for training and service under section 4.

(b) Any person who subsequent to June 24, 1948, serves on active duty for a period of not less than twelve months in the armed forces of a nation with which the United States is associated in mutual defense activities as defined by the President, may be exempted from training and service, but not from registration, in accordance with regulations prescribed by the President, except that no such exemption shall be granted to any person who is a national of a country which does not grant reciprocal privileges to citizens of the United States: *Provided,* That any active duty performed prior to June 24, 1948, by a person in the armed forces of a country allied with the United States during World War II and with which the United States is associated in such mutual defense activities, shall be credited in the computation of such twelve-month period: *Provided further,* That any person who is in a medical, dental, or allied specialist category not otherwise deferred or exempted under this subsection shall be liable for registration and training and service until the thirty-fifth anniversary of the date of his birth.

(c) Commissioned officers of the Public Health Service and members of the reserve of the Public Health Service while on active duty and assigned to staff the various offices and bureaus of the Public Health Service including the National Institutes of Health, or assigned to any endeavor which the President determines is necessary to the maintenance of the national health, safety, or interest shall be exempted from training and service, but not from registration.

VETERANS' EXEMPTIONS

SEC. 311. (a) No person who served honorably on active duty between September 16, 1940, and the date of enactment of this title for a period of twelve months or more, or be-

tween December 7, 1941, and September 2, 1945, for a period in excess of ninety days, in the Army, the Air Force, the Navy, the Marine Corps, the Coast Guard, the Public Health Service, or the armed forces of any country allied with the United States in World War II prior to September 2, 1945, shall be liable for induction for training and service under this title, except after a declaration of war or national emergency made by the Congress subsequent to the date of enactment of this title.

(b) No person who served honorably on active duty between September 1, 1940, and the date of enactment of this title for a period of ninety days or more but less than twelve months in the Army, the Air Force, the Navy, the Marine Corps, the Coast Guard, the Public Health Service, or the armed forces of any country allied with the United States in World War II prior to September 2, 1945, shall be liable for induction for training and service under this title, except after a declaration of war or national emergency made by the Congress subsequent to the date of enactment of this title, if—

(1) the local board determines that he is regularly enlisted or commissioned in any organized unit of a reserve component of the armed force in which he served, provided such unit is reasonably accessible to such person without unduly interrupting his normal pursuits and activities (including attendance at a college or university in which he is regularly enrolled), or in a reserve component (other than in an organized unit) of such armed force in any case in which enlistment or commission in an organized unit of a reserve component of such armed force is not available to him; or

(2) the local board determines that enlistment or commission in a reserve component of such armed force is not available to him or that he has voluntarily enlisted or accepted appointment in an organized unit of a reserve component of an armed force other than the armed force in which he served.

Nothing in this paragraph shall be deemed to be applicable to any person to whom subsection (a) of this section is applicable.

(c) Notwithstanding any other provision of this Act, no person who (1) has served honorably on active duty after September 16, 1940, for a period of not less than one year in the Army, the Air Force, the Navy, the Marine Corps, or the Coast Guard, or (2) subsequent to September 16, 1940, was discharged for the convenience of the Government after having served honorably on active duty for a period of not less than six months in the Army, the Air Force, the Navy, the Marine Corps, or the Coast Guard, or (3) has served for a period of not less than twenty-four months (A) as a commissioned officer in the Public Health Service or (B) as a commissioned officer in the Environmental Science Services Administration (previously the Coast and Geodetic Survey), shall be liable for induction for training and service under this Act, except after a declaration of war, or national emergency made by the Congress subsequent to the date of enactment of this Act.

(d) No person who is honorably discharged upon the completion of an enlistment pursuant to section 7 shall be liable for induction for training and service under this title, except after a declaration of war or national emergency made by the Congress subsequent to the date of enactment of this Act.

(e) For the purposes of computation of the periods of active duty referred to in paragraphs (a), (b), or (c) of this subsection, no credit shall be allowed for—

(1) periods of active duty training performed as a member of a reserve component pursuant to an order or call to active duty solely for training purposes;

(2) periods of active duty in which the service consisted solely of training under the Army specialized training program, the Army Air Force college training program, or any similar program under the jurisdiction of the Navy, Marine Corps, or Coast Guard;

(3) periods of active duty as a cadet at the United States Military Academy or United States Coast Guard Academy, or as a midshipman at the United States Naval Academy, or in preparatory school after nomination as a principal, alternate, or candidate for admission to any of such academies;

(4) periods of active duty in any of the Armed Forces while being processed for entry into or separation from any educational program or institution referred to in paragraphs (2) or (3); or

(5) periods of active duty performed by medical, dental, or allied specialists in student programs prior to receipt of the appropriate professional degree or in intern training.

RESERVE COMPONENT'S EXEMPTIONS

SEC. 312. (a) Persons who, on February 1, 1951, were members of organized units of the federally recognized National Guard, the federally recognized Air National Guard, the Officers' Reserve Corps, the Regular Army Reserve, the Air Force Reserve, the Enlisted Reserve Corps, the Naval Reserve, the Marine Corps Reserve, the Coast Guard Reserve, or the Public Health Service Reserve, shall, so long as they continue to be such members and satisfactorily participate in scheduled drills and training periods as prescribed by the Secretary of Defense, be exempt from training and service by induction under the provisions of this title, but shall not be exempt from registration.

(b)(1) Any person, other than a person referred to in subsection (d) of this section, who—

(A) prior to the issuance of orders for him to report for induction; or

(B) prior to the date scheduled for his induction and pursuant to a proclamation by the Governor of a State to the effect that the authorized strength of any organized unit of the National Guard of that State cannot be maintained by the enlistment or appointment of persons who have not been issued orders to report for induction under this title; or

(C) prior to the date scheduled for his induction and pursuant to a determination by the President that the strength of the Ready Reserve of the Army Reserve, Naval Reserve, Marine Corps Reserve, Air Force Reserve, or Coast Guard Reserve cannot be maintained by the enlistment or appointment of persons who have not been issued orders to report for induction, under this title;

enlists or accepts appointment, before attaining the age of twenty-six years, in the Ready Reserve of any reserve component of the Armed Forces, the Army National Guard, or the Air National Guard, shall be deferred from training and service under this title so long as he serves satisfactorily as a member of an organized unit of such Reserve or National Guard in accordance with section 270 of title 10 or section 502 of title 32, United States Code, as the case may be, or satisfactorily performs such other Ready Reserve service as may be prescribed by the Secretary of Defense. Notwithstanding the provisions of section 16, no person deferred under this paragraph who has completed six years of such satisfactory service as a member of the Ready Reserve or National Guard, and who during such service has performed active duty for training with an armed force for not less than four consecutive months, shall be liable for induction for training and service under this Act, except after a declaration of war or national emergency made by the Congress after August 9, 1955. In no event shall the number of enlistments or appointments made under authority of this paragraph in any fiscal year in any reserve component of the Armed Forces or in the Army National Guard or the Air National Guard cause the personnel strength of such reserve component or the Army National Guard or the Air National Guard, as the case may be, to exceed the personnel strength for which funds have been made available by the Congress for such fiscal year.

(2) A person who, under the provision of law, is exempt or deferred from training and service under this Act by reason of membership in a reserve component, the Army National Guard, or the Air National Guard, as the case may be, shall, if he becomes a member of another reserve component, the Army National Guard, or the Air National Guard, as the case may be, continue to be exempt or deferred to the same extent as if he had not become a member of another reserve component, the Army National Guard, or the Air National Guard, as the case may be, so long as he continues to serve satisfactorily.

(3) Except as provided in section 13 and the provisions of this section, no person who becomes a member of a reserve component after February 1, 1951, shall thereby be exempt from registration or training and service by induction under the provisions of this Act.

(4) Notwithstanding any other provision of this Act, the President, under such rules and regulations as he may prescribe, may provide that any person enlisted or appointed after October 4, 1961, in the Ready Reserve of any reserve component of the Armed Forces (other than under section 511(b) of title 10, United States Code, the Army National Guard, or the Air National Guard, prior to attaining the age of twenty-six years, or any person enlisted or appointed in the Army National Guard or the Air National Guard or enlisted in the Ready Reserve of any reserve component prior to attaining the age of eighteen years and six months and deferred under the prior provisions of this paragraph as amended by the Act of October 4, 1961, Public Law 87–378 (75 Stat. 807), or under section 262 of the Armed Forces Reserve Act of 1952, as amended, who fails to serve satisfactorily during his obligated period of service as a member of such Ready Reserve or National Guard or the Ready Reserve of another reserve component or the National Guard of which he becomes a member, may be selected for training and service and inducted into the armed force of which such reserve component is a part, prior to the selection and induction of other persons liable therefor.

OFFICERS' TRAINING; OFFICIALS; MINISTERS OF RELIGION

SEC. 313. (a)(1) Within such numbers as may be prescribed by the Secretary of Defense, any person who (A) has been or may hereafter be selected for enrollment or continuance in the senior division, Reserve Officers' Training Corps, or the Air Reserve Officers' Training Corp, or the Naval Reserve Officers' Training Corps, or the naval and Marine Corps officer candidate training program established by the Act of August 13, 1946 (60 Stat. 1057), as amended, or the Reserve officers' candidate program of the Navy, or the platoon leaders' class of the Marine Corps, or the officer procurement programs of the Coast Guard and the Coast Guard Reserve, or appointed an ensign, United States Naval Reserve, while undergoing professional training; (B) agrees, in writing, to accept a commission, if tendered, and to serve, subject to order of the Secretary of the military department having jurisdiction over him (or the Secretary of Transportation with respect to the United States Coast Guard), not less than two years on active duty after receipt of a commission; and (C) agrees to remain a member of a regular or reserve component until the eighth anniversary of the receipt of a commission in accordance with his obligation under the first sentence of section 4(d)(3) of this Act, or until the sixth anniversary of the receipt of a commission in accordance with his obligation under the

second sentence of section 4(d)(3) of this Act, shall be deferred from induction under this title until after completion or termination of the course of instruction and so long as he continues in a regular or reserve status upon being commissioned, but shall not be exempt from registration. Such persons, except those persons who have previously completed an initial period of military training or an equivalent period of active military training and service, shall be required while enrolled in such program to complete a period of training equal (as determined under regulations approved by the Secretary of Defense or the Secretary of Transportation with respect to the United States Coast Guard) in duration and type of training to an initial period of military training. There shall be added to the obligated active commissioned service of any person who has agreed to perform such obligatory service in return for financial assistance while attending a civilian college under any such training program a period of not to exceed one year. Except as provided in paragraph (5), upon the successful completion by any person of the required course of instruction under any program listed in clause (A) of the first sentence of this paragraph, such person shall be tendered a commission in the appropriate reserve component of the Armed Forces if he is otherwise qualified for such appointment. If, at the time of, or subsequent to, such appointment, the armed force in which such person is commissioned does not require his service on active duty in fulfillment of the obligation undertaken by him in compliance with clause (B) of the first sentence of this paragraph, such person shall be ordered to active duty for training with such armed force in the grade in which he was commissioned for a period of active duty for training of not less than three months or more than six months (not including duty performed under section 270(a) of title 10, United States Code), as determined by the Secretary of the military department concerned to be necessary to qualify such person for a mobilization assignment. Upon being commissioned and assigned to a reserve component, such person shall be required to serve therein, or in a reserve component of any other armed force in which he is later appointed, until the eighth anniversary of the receipt of such commission pursuant to the provisions of this section. So long as such person performs satisfactory service, as determined under regulations prescribed by the Secretary of Defense, he shall be deferred from training and service under the provisions of this Act. If such person fails to perform satisfactory service, and such failure is not excused under regulations prescribed by the Secretary of Defense, his commission may be revoked by the Secretary of the military department concerned.

(2) In addition to the training programs enumerated in paragraph (1) of this subsection, and under such regulations as the Secretary of Defense (or the Secretary of Transportation with respect to the United States Coast Guard) may approve, the Secretaries of the military departments and the Secretary of Transportation are authorized to establish officer candidate programs leading to the commissioning of persons on active duty. Any person heretofore or hereafter enlisted in the Army Reserve, the Naval Reserve, the Marine Corps Reserve, the Air Force Reserve, or the Coast Guard Reserve who thereafter has been or may be commissioned therein upon graduation from an officers' candidate school of such armed force shall, if not ordered to active duty as a commissioned officer, be deferred from training and service under the provisions of this Act so long as he performs satisfactory service as a commissioned officer in an appropriate unit of the Ready Reserve, as determined under regulations prescribed by the Secretary of the department concerned. If such person fails to perform satisfactory service in such unit, and such failure is not excused under such regulations, his commission may be revoked by such Secretary.

(3) Nothing in this subsection shall be deemed to preclude the President from providing, by regulations prescribed under section 16, for the deferment from training and service of any category or categories of students for such periods of time as he may deem appropriate.

(4) It is the sense of the Congress that the President shall provide for the annual deferment from training and service under this title of the numbers of optometry students and premedical, preosteopathic, preveterinary, preoptometry, and predental students at least equal to the numbers of male optometry, premedical, preosteopathic, preveterinary, preoptometry, and predental students at colleges and universities in the United States at the present levels as determined by the Director herein.

(5) Notwithstanding paragraph (1), upon the successful completion by any person of the required course of instruction under any Reserve Officers' Training Corps program listed in clause (A) of the first sentence of paragraph (1) and subject to the approval of the Secretary of the military department having jurisdiction over him, such person may, without being relieved of his obligation under that sentence, be tendered, and accept, a commission in the Environmental Science Services Administration instead of a commission in the appropriate reserve component of the Armed Forces. If he does not serve on active duty as a commissioned officer of the Environmental Science Services Administration for at least six years, he shall upon discharge therefrom, be tendered a commission in the appropriate reserve component of the Armed Forces, if he is otherwise qualified for such appointment, and, in fulfillment of his obligation under the first sentence of paragraph (1), remain a member of a reserve component until the sixth anniversary of the receipt of his commission in the Environmental Science Services Administration. While a member of a reserve component he may, in addition to as otherwise provided by law, be ordered to active duty for such period that, when added to the period he served on active duty as a commissioned officer of the Environmental Science Services Administration, equals two years.

(6) Fully qualified and accepted aviation cadet applicants of the Army, Navy, or Air Force who have signed an agreement of service shall, in such numbers as may be designated by the Secretary of Defense, be deferred, during the period covered by the agreement but not to exceed four months from induction for training and service under this title but shall not be exempt from registration.

(c) The Vice President of the United States; the Governors of the several States, territories, and possessions, and all other officials chosen by the voters of the entire State, territory, or possession; members of the legislative bodies of the United States and of the several States, territories, and possessions; judges of the courts of record of the United States and of the several States, territories, possessions, and the District of Columbia shall, while holding such offices, be deferred from training and service under this title in the Armed Forces of the United States.

(d) Regular or duly ordained ministers of religion, as defined in this title, the students preparing for the ministry under the direction of recognized churches or religious organizations, who are satisfactorily pursuing full-time courses of instruction in recognized theological or divinity schools, or who are satisfactorily pursuing full-time courses of instruction leading to their entrance into recognized theological or divinity schools in which they have preenrolled, shall be exempt from training and service (but not from registration) under this title.

STUDENT AND APPRENTICE DEFERRENTS; CASUALTY RATIO

SEC. 314. (a) Except as otherwise provided in this subsection, the President is authorized, under such rules and regulations as he may prescribe, to provide for the deferment from training and service in the Armed Forces of persons requesting such deferment who are satisfactorily pursuing a course of instruction at a bona fide college, junior college, community college, university, or similar institution of learning, or at a vocational school, or who are enrolled in and satisfactorily pursuing an apprentice training program or similar occupational instruction program. A deferment granted to any person under authority of this subsection shall continue until such person completes the requirements for his baccalaureate degree, completes the training program, fails to pursue satisfactorily his course of instruction, or attains the twenty-fifth anniversary of the date of his birth, whichever first occurs. Deferments provided for under this paragraph shall be restricted or terminated by the President (1) whenever he finds, with respect to persons who have been inducted into the Armed Forces under this title, that the number of such persons killed, wounded, or missing in action as the result of armed conflict during the three-month period immediately preceding his finding exceeds a number equal to 10 per centum of the total number of persons so inducted during such three-month period; or (2) whenever he determines that the needs of the Armed Forces and of national security require such action. Such restrictions or terminations shall be in effect for the twelve calendar months next following the month in which the conditions set out in the preceding sentence are met. Whenever members of the Armed Forces of the United States are engaged in armed conflict in any area of the world, the President shall, for the purposes of clause (1) of the preceding sentence, make a finding not later than the tenth day of each calendar month respecting the number of persons killed, wounded, or missing in action in the three immediately preceding months. No person who has received a deferment under the provisions of this paragraph shall thereafter be granted a further deferment except for extreme hardship to dependents (under regulations governing hardship deferments).

(b) The President is authorized, under such rules and regulations as he may prescribe, to provide for the deferment from training and service in the Armed Forces (1) of any or all categories of persons in a status with respect to persons (other than wives alone, except in cases of extreme hardship) dependent upon them for support which renders their deferment advisable, and (2) of any or all categories of those persons found to be physically, mentally, or morally deficient or defective. For the purpose of determining whether or not the deferment of any person is advisable because of his status with respect to persons dependent upon him for support, any payments of allowances which are payable by the United States to the dependents of persons serving in the Armed Forces of the United States shall be taken into consideration, but the fact that such payments of allowances are payable shall not be deemed conclusively to remove the grounds for deferment when the dependency is based upon financial considerations and shall not be deemed to remove the ground for deferment when the dependency is based upon other than financial considerations and cannot be eliminated by financial assistance to the dependents. Except as otherwise provided in this subsection, the President is also authorized, under such rules and regulations as he may prescribe, to provide for the deferment from training and service in the Armed Forces of any or all

categories of persons who have children, or wives and children, with whom they maintain a bona fide family relationship in their homes. No deferment from such training and service in the Armed Forces shall be made in the case of any individual except upon the basis of the status of such individual. There shall be posted in a conspicuous place in each area office a list setting forth the names and classifications of those persons who have been classified by such area office. Notwithstanding any other provision of this title the President shall establish national standards and criteria for the classification and deferment of persons registered under this title. Such standards and criteria shall be administered uniformly and impartially throughout all levels of the Selective Service System.

(c)(1) Any person who is satisfactorily pursuing a course of instruction at a high school or similar institution of learning shall, upon the facts being presented to the area office, be deferred (A) until the time of his graduation therefrom, or (B) until he attains the twentieth anniversary of his birth, or (C) until he ceases satisfactorily to pursue such course of instruction, whichever is the earliest.

(2) Any person who while satisfactorily pursuing a full-time course of instruction at a college, university, or similar institution is ordered to report for induction under this title, shall, upon the facts being presented to the local board, be deferred (A) until the end of such academic year, or (B) until he ceases satisfactorily to pursue such course of instruction, whichever is the earlier: *Provided*, That any person who has heretofore had his induction postponed under the provisions of section 6(i)(1) of the Selective Service Act of 1948; or any person who has heretofore been deferred as a student under section 6(h) of such Act, or any person who hereafter is deferred under the provision of this subsection, shall not be further deferred by reason of pursuit of a course of instruction at a college, university, or similar institution of learning except as may be provided by regulations prescribed by the President pursuant to the provisions of this section. Nothing in this paragraph shall be deemed to preclude the President from providing, by regulations prescribed in this section, for the deferment from training and service in the Armed Forces of any category or categories of students for such periods of time as he may deem appropriate.

CONSCIENTIOUS OBJECTORS

SEC. 315. (a) Nothing contained in this title shall be construed to require any person to be subject to combatant training and service in the Armed Forces of the United States who, by reason of religious training and belief, conscientiously opposed to participation in war in any form. As used in this section, the term "religious training and belief" does not include essentially political, sociological, or philosophical views, or a merely personal moral code, but it does include a sincere and meaningful belief, which occupies a place in the life of its possessor parallel to that filled by an orthodox belief in God.

(b) Any person claiming exemption from combatant training and service because of such conscientious objections whose claim is sustained by the Selective Service System shall, if he is inducted into the Armed Forces under this title, be assigned to noncombatant service as defined by the President, or shall, if he is found to be conscientiously opposed to participation in such noncombatant service, in lieu of such induction, be ordered by the Selective Service System, subject to such regulations as the President may prescribe, to perform for a period equal to the period prescribed in section 305 such civilian work contributing to the maintenance of the national health, safety, or interest as the Selective Service System pursuant to Presidential regulations may deem appropriate. Any such person who knowingly fails or neglects to obey any such order from the Selective Service System shall be deemed, for the purposes of section 203 of this title, to have knowingly failed or neglected to perform a duty required of him under this title.

(c) Any person claiming exemption from combatant training and service because of such conscientious objections shall, if such claim is not sustained by the area office or local board, be entitled to an appeal to the regional appeal board. Upon the filing of such appeal, the appeal board shall refer any such claim to the Department of Justice for inquiry and hearings. The Department of Justice, after appropriate inquiry, shall hold a hearing with respect to the character and good faith of the objections of the person concerned, and such person shall be notified of the time and place of such hearing. If after such hearings the Department of Justice finds—

(1) that the objections are sustained, it shall make recommendations to the appeal board in accordance with the procedures of subsection (b) of this section; or

(2) that the objections are not sustained, it shall so recommend to the appeal board. The appeal board shall, in making its decision, give consideration to but not be bound to follow the recommendation of the Department of Justice, together with the record on appeal from the local board.

DURATION OF EXEMPTION OR DEFERMENT

SEC. 316. No exception from registration, or exemption or deferment from training and service, under this title, shall continue after the cause therefor ceases to exist.

MINORITY DISCHARGES

SEC. 317. Notwithstanding any other provisions of law, no person between the ages of eighteen and twenty-one shall be discharged from service in the Armed Forces of the United States while this title is in effect because such person entered such service without the consent of his parent or guardian.

MORAL STANDARDS

SEC. 318. No person shall be relieved from training and service under this title by reason of conviction of a criminal offense, except where the offense of which he has been convicted may be punishable by death, or by imprisonment for a term exceeding one year.

SOLE SURVIVING SON

SEC. 319. Except during a period of a war or a national emergency declared by the Congress, if the father or one or more sons or daughters of a family were killed in action or died in the line of duty while serving in the Armed Forces of the United States, or subsequently died as a result of injuries received or disease incurred during such service, the sole surviving son of such family shall not be inducted for service under the terms of this title unless he volunteers for induction.

BOUNTIES; SUBSTITUTES; PURCHASES OF RELEASE

SEC. 320. No bounty may be paid to induce any person to be inducted into an armed force. A clothing allowance authorized by law is not a bounty for the purposes of this section. No person liable for training and service under this Act may furnish a substitute for that training or service. No person may be enlisted, inducted, or appointed in an armed force as a substitute for another. No person liable for training and service under section 4 may escape that training and service or be discharged before the end of his period of training and service by paying money or any other valuable thing as consideration for his release from that training and service or liability therefor.

REEMPLOYMENT

SEC. 321. (a) Any person inducted into the Armed Forces under this title for training and service, who, in the judgment of those in authority over him, satisfactorily completes his period of training and service under section 6 shall be entitled to a certificate to that effect upon the completion of such period of training and service. Such certificate shall include a record of any special proficiency or merit attained. Upon the completion of each such person's period of training and service under this title, each such person shall be given another physical examination and, upon his written request, shall be given a statement of physical condition by the Secretary concerned: *Provided*, That such statement shall not contain any reference to mental or other conditions which in the judgment of the Secretary concerned would prove injurious to the physical or mental health of the person to whom it pertains: *Provided further*, That, if upon completion of training and service under this title, such person continues on active duty without an interruption of more than seventy-two hours as a member of the Armed Forces of the United States, a physical examination upon completion of such training and service shall not be required unless it is requested by such person, or the medical authorities of the armed force concerned determine that the physical examination is warranted.

(b) In the case of any such person who, in order to perform such training and service, has left or leaves a position (other than a temporary position) in the employ of any employer and who (1) receives such certificate, and (2) makes application for reemployment within ninety days after he is relieved from such training and service or from hospitalization continuing after discharge for a period of not more than one year—

(A) if such position was in the employ of the United States Government, its territories, or possessions, or political subdivisions thereof, or the District of Columbia, such person shall—

(i) if still qualified to perform the duties of such position, be restored to such position or to a position of like seniority, status, and pay; or

(ii) if not qualified to perform the duties of such position by reason of disability sustained during such service but qualified to perform the duties of any other position in the employ of the employer, be restored to such other position the duties of which he is qualified to perform as will provide him like seniority, status, and pay, or the nearest approximation thereof consistent with the circumstances in his case;

(B) if such position was in the employ of a private employer, such person shall—

(i) if still qualified to perform the duties of such position, be restored by such employer or his successor in interest to such position or to a position of like seniority, status, and pay; or

(ii) if not qualified to perform the duties of such position by reason of disability sustained during such service but qualified to perform the duties of any other position in the employ of such employer or his successor in interest, be restored by such employer or his successor in interest to such other position the duties of which he is qualified to perform as will provide him like seniority, status, and pay, or the nearest approximation thereof consistent with the circumstances in his case,

unless the employer's circumstances have so changed as to make it impossible or unreasonable to do so;

(C) if such position was in the employ of any State or political subdivision thereof, it is hereby declared to be the sense of the Congress that such person should—

(i) if still qualified to perform the duties of such position, be restored to such position or to a position of like seniority, status, and pay; or

(ii) if not qualified to perform the duties of such position by reason of disability sustained during such service but qualified to perform the duties of any other position in the employ of the employer, be restored to

such other position the duties of which he is qualified to perform as will provide him like seniority, status, and pay, or the nearest approximation thereof consistent with the circumstances in his case.

(c)(1) Any person who is restored to a position in accordance with the provisions of paragraph (A) or (B) of subsection (b) shall be considered as having been on furlough or leave of absence during his period of training and service in the Armed Forces, shall be so restored without loss of seniority, shall be entitled to participate in insurance or other benefits offered by the employer pursuant to established rules and practices relating to employees on furlough or leave of absence in effect with the employer at the time such person was inducted into such forces, and shall not be discharged from such position without cause within one year after such restoration.

(2) It is hereby declared to be the sense of the Congress that any person who is restored to a position in accordance with the provisions of paragraph (A) or (B) of subsection (b) should be so restored in such manner as to give him such status in his employment as he would have enjoyed if he had continued in such employment continuously from the time of his entering the Armed Forces until the times of his restoration to such employment.

(d) In case any private employer fails or refuses to comply with the provisions of subsection (b), subsection (c) (1) or subsection (g) the district court of the United States for the district in which such private employer maintains a place of business shall have power, upon the filing of a motion, petition, or other appropriate pleading by the person entitled to the benefits of such provisions, specifically to require such employer to comply with such provisions and to compensate such person for any loss of wages or benefits suffered by reason of such employer's unlawful action: *Provided,* That any such compensation shall be in addition to and shall not be demed to diminish any of the benefits of such provisions. The court shall order speedy hearing in any such case and shall advance it on the calendar. Upon application to the United States attorney or comparable official for the district in which such private employer maintains a place of business, by any person claiming to be entitled to the benefits of such provisions, such United States attorney or official, if reasonably satisfied that the person so applying is entitled to such benefits, shall appear and act as attorney for such person in the amicable adjustment of the claim or in the filing of any motion, petition, or other appropriate pleading and the prosecution thereof specifically to require such employer to comply with such provisions: *Provided,* That no fees or court costs shall be taxed against any person who may apply for such benefits: *Provided further,* That only the employer shall be deemed a necessary party respondent to any such action.

(e)(1) Any person who is entitled to be restored to a position in accordance with the provisions of paragraph (A) of subsection (b) and who was employed, immediately before entering the Armed Forces, by any agency in the executive branch of the Government or by any territory or possession, or political subdivision thereof, or by the District of Columbia, shall be so restored by such agency or the successor to its functions, or by such territory, possession, political subdivision, or the District of Columbia. In any case in which, upon appeal of any person who was employed immediately before entering the Armed Forces by any agency in the executive branch of the Government or by the District of Columbia, the United States Civil Service Commission finds that—

(A) such agency is no longer in existence and its functions have not been transferred to any other agency; or

(B) for any reason it is not feasible for such person to be restored to employment by such agency or by the District of Columbia,

the Commission shall determine whether or not there is a position in any other agency in the executive branch of the Government or in the government of the District of Columbia for which such person is qualified and which is either vacant or held by a person having a temporary appointment thereto. In any case in which the Commission determines that there is such a position, such person shall be restored to such position by the agency in which such position exists or by the government of the District of Columbia, as the case may be. The Commission is authorized and directed to issue regulations giving full force and effect to the provisions of this section insofar as they relate to persons entitled to be restored to positions in the executive branch of the Government or in the government of the District of Columbia, including persons entitled to be restored under the last sentence of paragraph (2) of this subsection. The agencies in the executive branch of the Government and the government of the District of Columbia shall comply with such rules and regulations and orders issued by the Commission pursuant to this subsection. The Commission is authorized and directed whenever it finds, upon appeal of the person concerned, that any agency in the executive branch of the Government or the government of the District of Columbia has failed or refuses to comply with the provisions of this section, to issue an order specifically requiring such agency or the government of the District of Columbia to comply with such provisions and to compensate such person for any loss of salary or wages suffered by reason of failure to comply with such provisions, less any amounts received by him through other employment, unemployment compensation, or readjustment allowances: *Provided,* That any such compensation ordered to be paid by the Commission shall be in addition to and shall not be deemed to diminish any of the benefits of such provisions, and shall be paid by the head of the agency concerned or by the government of the District of Columbia out of appropriations currently available for salary and expenses of such agency or government, and such appropriations shall be available for such purpose. As used in this paragraph, the term "agency in the executive branch of the Government" means any department, independent establishment, agency, or corporation in the executive branch of the United States Government.

(2) Any person who is entitled to be restored to a position in accordance with the provisions of paragraph (A) of subsection (b), and who was employed, immediately before entering the Armed Forces, in the legislative branch of the Government, shall be so restored by the officer who appointed him to the position which he held immediately before entering the Armed Forces. In any case in which it is not possible for any such person to be restored to a position in the legislative branch of the Government and he is otherwise eligible to acquire a status for transfer to a position in the classified (competitive) civil service in accordance with section 2(b) of the Act of November 26, 1940 (54 Stat. 1212), the United States Civil Service Commission shall, upon appeal of such person, determine whether or not there is a position in the executive branch of the Government for which he is qualified and which is either vacant or held by a person having a temporary appointment thereto. In any case in which the Commission determines that there is such a position, such person shall be restored to such position by the agency in which such position exists.

(3) Any person who is entitled to be restored to a position in accordance with the provisions of paragraph (A) of subsection (b) and who was employed, immediately before entering the Armed Forces, in the judicial branch of the Government, shall be so restored by the officer who appointed him to the position which he held immediately before entering the Armed Forces.

(f) In any case which two or more persons who are entitled to be restored to a position under the provisions of this section or any other law relating to similar reemployment benefits left the same position in order to enter the Armed Forces, the person who left such position first shall have the prior right to be restored thereto, without prejudice to the reemployment rights of the other person or persons to be restored.

(g)(1) Any person who after entering the employment to which he claims restoration, enlists in the Armed Forces of the United States (other than a reserve component) shall be entitled upon release from service under honorable conditions to all the reemployment rights and other benefits provided for by this section in the case of persons inducted under the provisions of this title, if the total of his service performed between June 24, 1948, and August 1, 1961, did not exceed four years, and the total of any service, additional or otherwise, performed by him after August 1, 1961, does not exceed four years (plus in each case any period of additional service imposed pursuant to law).

(2) Any persons who, after entering the employment to which he claims restoration, enters upon active duty (other than for the purpose of determining his physical fitness and other than for training), whether or not voluntarily, in the Armed Forces of the United States or the Public Health Service in response to an order or call to active duty shall, upon his relief from active duty under honorable conditions, be entitled to all of the reemployment rights and benefits provided by this section in the case of persons inducted under the provisions of this title, if the total of such active duty performed between June 24, 1948, and August 1, 1961, did not exceed four years, and the total of any such active duty, additional or otherwise, performed after August 1, 1961, does not exceed four years (plus in each case any additional period in which he was unable to obtain orders relieving him from active duty).

(3) Any member of a reserve component of the Armed Forces of the United States who is ordered to an initial period of active duty for training of not less than three consecutive months shall, upon application for reemployment within thirty-one days after (A) his release from that active duty for training after satisfactory service, or (B) his discharge from hospitalization incident to that active duty for training, or one year after his scheduled release from that training, whichever is earlier, be entitled to all reemploymenf rights and benefits provided by this section for persons inducted under the provisions of this title, except that (A) any person restored to a position in accordance with the provisions of this paragraph shall not be discharged from such position without cause within six months after that restoration, and (B) no reemployment rights granted by this paragraph shall entitle any person to retention, preference, or displacement rights over any veteran with a superior claim under the provisions of title 5, United States Code, relating to veterans and other preference eligibles.

(4) Any employee not covered by paragraph (3) of this subsection who holds a position described in paragraph (A) or (B) of subsection (b) of this section shall upon request be granted a leave of absence by his employer for the period required to perform active duty for training or inactive duty training in the Armed Forces of the United States. Upon his release from a period of

such active duty for training or inactive duty training, or upon his discharge from hospitalization incident to that training, such employee shall be permitted to return to his position with such seniority, status, pay, and vacation as he would have had if he had not been absent for such purposes. He shall report for work at the beginning of his next regularly scheduled working period after expiration of the last calendar day necessary to travel from the place of training to the place of employment following his release, or within a reasonable time thereafter if delayed return is due to factors beyond the employee's control. Failure to report for work at such next regularly scheduled working period shall make the employee subject to the conduct rules of the employer pertaining to explanations and discipline with respect to absence from scheduled work. If that employee is hospitalized incident to active duty for training or inactive duty training, he shall be required to report for work at the beginning of his next regularly scheduled work period after expiration of the time necessary to travel from the place of discharge from hospitalization to the place of employment, or within a reasonable time thereafter if delayed return is due to factors beyond the employee's control, or within one year after his release from active duty for training or inactive duty training, whichever is earlier. If an employee covered by this paragraph is not qualified to perform the duties of his position by reason of disability sustained during active duty for training or inactive duty training, but is qualified to perform the duties of any other position in the employ of the employer or his successor in interest, he shall be restored by that employer or his successor in interest to such other position the duties of which he is qualified to perform as will provide him like seniority, status, and pay, or the nearest approximation thereof consistent with the circumstances in his case.

(5) Any employee not covered by paragraph (3) of this subsection who holds a position described in paragraph (A) or (B) of subsection (b) of this section shall be considered as having been on leave of absence during the period required to report for the purpose of being inducted into, entering or determining by a preinduction or other examination his physical fitness to enter the Armed Forces of the United States. Upon his rejection, upon completion of his preinduction or other examination, or upon his discharge from hospitalization incident to that rejection or examination, such employee shall be permitted to return to his position in accordance with the provisions of paragraph (4) of this subsection.

(6) For the purposes of paragraphs (3) and (4), full-time training or other full-time duty performed by a member of the National Guard under section 316, 503, 504, or 505 of title 32, United States Code, is considered active duty for training; and for the purpose of paragraph (4), inactive duty training performed by that member under section 502 of title 32, or sections 206(a), (b), and (d), 301(f), 309(c), 402(f), and 1002(a)–(d) of title 37, United States Code, is considered inactive duty training.

(h) The Secretary of Labor, through the Bureau of Veterans' Reemployment Rights, shall render aid in the replacement in their former positions of persons who have satisfactorily completed any period of active duty in the Armed Forces of the United States or the Public Health Service. In rendering such aid, the Secretary shall use the then existing Federal and State agencies engaged in similar or related activities and shall utilize the assistance of volunteers.

(i) The Secretaries of Army, Navy, Air Force, or Treasury shall furnish to the Selective Service System hereafter established a report of separation for each person separated from active duty.

RIGHT TO VOTE; POLL TAX

SEC. 322. Any person inducted into the Armed Forces for training and service under this title shall, during the period of such service, be permitted to vote in person or by absentee ballot in any general, special, or primary election occurring in the State of which he is a resident, whether he is within or outside such State at the time of such election, if under the laws of such State he is otherwise entitled to vote in such election; but nothing in this subsection shall be construed to require granting to any such person a leave of absence or furlough for longer than one day in order to permit him to vote in person in any such election. No person inducted into, or enisted in, the Armed Forces for training and service under this title shall, during the period of such service, as a condition of voting in any election for President, Vice President, electors for President or Vice President, or for Senator or Member of the House of Representatives, be required to pay poll tax or other tax or make any other payment to any State or political subdivision thereof.

CIVIL RELIEF

SEC. 323. Notwithstanding the provisions of section 604 of the Act of October 17, 1940 (54 Stat. 1191), and the provisions of section 4 of the Act of July 25, 1947 (Public Law 239, 80th Congress), all of the provisions of the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, including specifically article IV thereof, shall be applicable to all persons in the Armed Forces of the United States, including all persons inducted into the Armed Forces pursuant to this title or the Public Health Service, until such time as the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, is repealed or otherwise terminated by subsequent Act of the Congress: *Provided*, That, with respect to persons inducted into the Armed Forces while this title is in effect, wherever under any section or provision of the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, a proceeding, remedy, privilege, stay, limitation, accounting, or other transaction has been authorized or provided with respect to military service performed while such Act is in force, such section or provision shall be deemed to continue in full force and effect so long as may be necessary to the exercise or enjoyment of such proceeding, remedy, privilege, stay, limitation, accounting, or other transaction.

NOTICE OF TITLE; VOLUNTARY ENLISTMENTS

SEC. 324. (a) Every person shall be deemed to have notice of the requirements of this title upon publication by the President of a proclamation or other public notice fixing a time for any registration under section 3.

(b) If any provision of this title, or the application thereof to any person or circumstance, is held invalid, the remainder of the title, and the application of such provision to other persons or circumstances, shall not be affected thereby.

(c) Except as provided in this Act, nothing contained in this title shall be construed to repeal, amend, or suspend the laws now in force authorizing voluntary enlistment or reenlishment in the Armed Forces of the United States, including the reserve components thereof, except that no person shall be accepted for enlistment after he has received orders to report for induction and except that, whenever the Congress or the President has declared that the national interest is imperiled, voluntary enlistment or reenlistment in such forces, and their reserve components, may be suspended by the President to such extent as he may deem necessary in the interest of national defense.

(d) It shall be the duty of the Director to inform every registrant of all rights and procedures available to him under this title regarding classification, deferment, and exemption. Such information shall be in writing and shall be given to every person who registers under this title at the time of his registration, and shall in addition be available subsequently upon request of such registrant.

REPEAL OF CONFLICTING LAWS; APPROPRIATIONS; TERMINATION OF INDUCTION

SEC. 325. (a) Except as provided in this title all laws or any parts of laws in conflict with the provisions of this title are hereby repealed to the extent of such conflict.

(b) There are hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the provisions of this title.

(c) Notwithstanding any other provisions of this title, no person shall be inducted for training and service in the Armed Forces after July 1, 1971, except persons now or hereafter deferred under this title after the basis for such deferment ceases to exist.

ALIENS

SEC. 326. (a) Section 101(a)(15) of the Immigration and Nationality Act, as amended (8 U.S.C. 1101(a)(15)), is amended by changing the period at the end thereof to a semicolon and adding thereafter the following:

"(K) an alien who has requested and received an adjustment of status under section 247(c) and who is not a nonimmigrant within any of the classes (A) through (J) thereof: *Provided*, That any alien whose status has been adjusted to this class (K) shall depart from the United States within one year from such adjustment: *And provided further*, That any alien who is in this class (K) shall not be eligible for any further adjustment of status whatsoever."

(b) The Immigration and Nationality Act, as amended (8 U.S.C. 1101 et seq.), is amended by adding at the end of section 247 thereof the following new subsection:

"(e) The status of an alien lawfully admitted for permanent residence may be adjusted by the Attorney General, under such regulations as he may prescribe, to that of a nonimmigrant in class (K) under section 101(a)(15) of this Act, or in any other class under section 101(a)(15) for which he may be eligible, if such alien requests an adjustment of status in order to be exempted from the requirements of the Universal Military Training and Service Act, as amended."

(c) Section 248 of the Immigration and Nationality Act, as amended (8 U.S.C. 1258), is amended by inserting immediately after the words "paragraph (15)(D)" the words "or paragraph (15)(K)".

(d) Subsection (a) of section 315 of the Immigration and Nationality Act, as amended (8 U.S.C. 1426), is amended to read as follows:

"(a) Notwithstanding the provisions of section 405(b), any alien who is granted exemption under an existing treaty or any alien who requests and obtains an adjustment of status under section 247(c) or who applies or has applied for exemption or discharge from training or service in the Armed Forces of the United States on the ground that he is an alien, and is or was relieved or discharged from such training or service on such basis, shall be permanently ineligible to become a citizen of the United States."

TITLE IV—MISCELLANEOUS

MILITARY YOUTH OPPORTUNITY SCHOOLS

SEC. 401. (a) The Secretary of Defense, with the cooperation and assistance of the Secretary of Labor and the Secretary of Health, Education, and Welfare, and other appropriate Federal agencies, shall conduct a comprehensive study and investigation to determine the feasibility and desirability of establishing and operating military youth opportunity schools which would provide spe-

cial educational and physical training for a period not exceeding one year, to volunteers who fail to meet the minimum physical and mental requirements for military service in order to enable such volunteers to qualify for service in the Armed Forces.

(b) The Secretary of Defense shall submit a written report to the Congress of the results of such study and investigation, together with such recommendations as he deems appropriate, not later than one year after the date of enactment of this section. The Secretary of Defense shall include in such report, findings with respect to—

(1) the average annual number of volunteers for military service who fail to meet the educational and physical standards for such service, but who, with a maximum of one year's training in opportunity schools of the kind referred to in subsection (a) of this section, could qualify for military service;

(2) an estimate of the costs and benefits to the Department of Defense of establishing and operating such opportunity schools;

(3) the administrative capacity of the Department of Defense to carry out such a program;

(4) an estimate of the reenlistment rate which could be expected from volunteers trained in such opportunity schools;

(5) the advisability of requiring longer enlistment periods for volunteers receiving training in such opportunity schools; and

(6) the most effective means and measures for implementing a program of the kind described in subsection (a) of this section.

VOLUNTEER ARMY STUDY

SEC. 402. The President shall conduct a study to determine the cost, feasibility, and desirability of replacing the present system of involuntary induction of persons into the Armed Forces with an entirely voluntary system of enlistments. The President shall submit the results of such study to the Congress, together with such recommendations as he deems appropriate, within six months after the date of enactment of this section.

NATIONAL SERVICE CORPS STUDY

SEC. 403. (a) The President shall conduct a study and investigation to determine the feasibility and desirability of establishing a national service corps in which citizens of the United States who are mentally and physically able and who desire to perform nonmilitary services designed to combat disease, ignorance, and poverty at home and abroad may serve.

(b) The President shall submit a written report to the Congress of the results of such study and investigation, together with such recommendations as he deems appropriate, not later than one year after the date of enactment of this section. The President shall include in such report such information as he deems appropriate, and in the event it is determined that the establishment of a national service corps as described in subsection (a) of this section is feasible and desirable, he shall specifically include in such report—

(1) a review of existing voluntary Federal service programs (nonmilitary) in which hardships are endured by the participants or extraordinary service is required of the participants, such as the Peace Corps and the Volunteers in Service to America, in order to determine the feasibility of establishing an expanded national service program with the broadest possible participation;

(2) a consideration of what the nature and scope of a national service program should be;

(3) the number of service opportunities which would be generated by such a program;

(4) the relationship of such a service system with the Selective Service System and the feasibility of authorizing service in such a national service corps program as an alternative to military service;

(5) the most effective means by which such a service program might be coordinated with appropriate private, local, and State programs of a public service nature;

(6) the impact of such a service program upon the labor force and the economy of the United States;

(7) the effect of such a service program upon secondary education and higher education;

(8) the role of women in such a service program;

(9) the cost of establishing and operating such a service program; and

(10) the mental and physical standards for participation, if any, and the duration of service in such a service program.

AMNESTY STUDY

SEC. 404. The President shall conduct a study to determine the appropriateness of granting amnesty in the near future to those registrants presently outside the United States who are liable for prosecution under section 203 of this title. In conducting this study, the President shall consider the number of such registrants, the implications for the morale of the Armed Forces granting such amnesty would raise, the historical precedent for granting such amnesty, and such other factors as he deems appropriate. The President shall report the results of this study to the Congress, together with appropriate recommendations, within six months of the enactment of this section.

OCTOBER 15 MORATORIUM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. DADDARIO) is recognized for 15 minutes.

Mr. DADDARIO. Mr. Speaker, as reported in major newspapers and magazines around the country, thousands of individually organized expressions of concern on the 15th of October moratorium were carried off with dignity and order. In view of this record, I believe the remarks of Vice President AGNEW, made in New Orleans on Sunday, October 19, were ill conceived and inflammatory. I find it puzzling that Mr. Nixon should allow such statements to be made by the Vice President of an administration conceived under the banner "Bring Us Together" and currently laboring to maintain a calm and rational approach to the solution of the Vietnam war. I join the editorial writers of the Washington Post in concluding that—

It real . will not do for Mr. Ziegler, the White House spokesman, merely to indicate that vice presidential speeches for party gatherings are not cleared in advance by the White House. If Mr. Nixon wishes to be in any way convincing in this matter or to preserve the notion that he is acting in good faith, then he must repudiate the excesses of his vice president or silence him, or—ideally—do both.

I offer the text of the editorial for the RECORD:

MR. AGNEW: NO LONGER A LAUGHING MATTER

By writ and by tradition the vice-presidency is an office in which there is practically nothing to do. The trick of course lies in doing it well—in standing back and learning, in readying oneself for any emergency, in supporting the President backstairs where one can and in doing nothing that goes against his interest. Clearly, then, in the case of Vice President Agnew we are faced with one of two possibilities. One is that Mr. Agnew with his ten-month roadshow of gaffes, goofs, and raw demagoguery hasn't caught on to his job. The other is that he has—that Mr. Nixon is authorizing and/or approving the Vice President's public dicta as part of some elaborate (and foredoomed) political game. Neither is particularly reassuring, but if the latter is the case, we should be told.

In New Orleans on Sunday the Vice President made this necessary with his comments on the war and on the motivations of those involved in last week's Vietnam moratorium:

"If the moratorium had any use whatever, it served as an emotional purgative for those who feel the need to cleanse themselves of their lack of ability to offer a constructive solution to the problem."

And again:

"A spirit of national masochism prevails, encouraged by an effete corps of impudent snobs who characterize themselves as intellectuals. It is in this setting of dangerous oversimplification that the war in Vietnam achieves its greatest distortion."

And again:

"Great patriots of past generations would find it difficult to believe that Americans would ever doubt the validity of America's resolve to protect free men from totalitarian attack. Yet today we see those among us who prefer to side with an enemy aggressor rather than stand by this free nation."

Mr. Agnew also let it be known that those who participated in the moratorium were guilty of the crime of supporting "a massive public outpouring of sentiment against the foreign policy of the President of the United States" and of not caring to "disassociate themselves from the objective enunciated by the enemy in Hanoi."

Now what is interesting in all this is certainly not the Vice President's line of thought or his ham-handed effort to discredit the motivation and question the loyalty of a large and respectable part of the political community; we have seen and heard all that before. It is not even to the main point to observe that Mr. Agnew has outdone himself in assuring the hostility of a part of the electorate Mr. Nixon has some interest in calming down. Nor does the subject upon which Mr. Agnew chose to discourse with such vehemence permit his remarks to be received with the national giggle they so frequently inspire. This time around the only question worth asking is what the President thought of what Mr. Agnew said.

Mr. Nixon is engaged in a highly chancy and complicated maneuver to end the war in Vietnam in a way which will not do utter violence to this country's interests abroad and which will not result in a terrible rending of the social fabric at home—in a right-to-middle uprising based on charges of betrayal and sell-out. At least that is what you can hear any day of the week from those behind the scenes in his administration who argue the case for his method of disengagement and who beg understanding of it. Simultaneously we witness Vice President Agnew out fomenting precisely the kinds of emotions others in the White House profess to fear and claim their strategy is designed in large measure to avoid. It really will not do for Mr. Ziegler, the White House spokesman, merely to indicate that vice presidential speeches for party gatherings are not cleared in advance by the White House. If Mr. Nixon wishes to be in any way convincing in this matter or to preserve the notion that he is acting in good faith, then he must repudiate the excesses of his Vice President or silence him or—ideally—do both.

OPERATIONS FIRES

(Mr. JOHNSON of California asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. JOHNSON of California. Mr. Speaker, yesterday I introduced on behalf of myself, Mr. DON CLAUSEN, Mr.

WYATT, Mr. DELLENBACK, and Mr. SISK, H.R. 14441, a bill to provide a method for paying costs of fires caused without negligence in connection with national forest timber sales operations. It is my hope that this legislation will resolve some problems which have developed in the timber industry over the years.

In the revision of the contract form used for the sale of national forest timber, questions have been raised as to obligations for the cost of suppressing operations fires—fires which result without negligence in the harvest of national forest timber. Such fires are started occasionally through the friction of logs rubbing on the forest floor or through such occurrences as metal striking metal or rock.

Since such fires are the product of chance, they may occur where the greatest of care is exercised. The cost of their control may be relatively great for any one operator. However, for the industry as a whole, the cost is light—in 1963–67, 4.4 cents per thousand board feet, less than one-half of 1 percent of the price paid to the Government for the timber being harvested. In the current year, the cost is expected to be well below that average.

National forest timber receipts of more than $200 million annually would not result without timber harvesting activities which include the risk of occasional nonnegligent operations fires. At present, the cost of suppressing such fires is met primarily with appropriated funds. To require timber buyers to individually bear a major part of the cost of such chance occurrences would be unfair and disastrous for the individual in some instances. If operators are to bear more of the suppression cost, it must be done in such a way as to spread the risk.

It should be clear that we are not concerned here with fires resulting from negligence. There is general agreement that losses resulting from negligently caused fires are the responsibilty of the negligent firm or individual. Timber sale contracts include very specific precautions that must be taken under various conditions of fire risk. Any deviation from these requirements resulting in a forest fire subjects the timber buyer to full responsibility for the cost of fire control and damages resulting from the fire.

Timber operators have other incentives to avoid forest fires. They have valuable equipment in the forest that could be lost in such fires. They usually need the timber badly to supply their mill and meet the needs of their customers. They usually have considerable money invested in felling, bucking and yarding timber that could be lost in a fire. Lost time and disruption of normal operations in firefighting increase costs.

There has been a proposal that timber buyers assume an increased share of the cost of suppressing operations fires and protect themselves with insurance. Such a practice would work only if there was general use of such insurance, and there are reasons to believe that because of self-insurance or other practices, the insurance would not be generally available at reasonable rates. In any event, it would be costly, and the cost would become a part of the operating cost allowance in timber appraisals—reducing stumpage rates. There could be further complications in claims and counter claims between loggers, buyers and insurance firms. Insurance costs money.

Even under the proposal for individuals to bear more of the cost of operations fires, the Government would meet most of the cost for the largest fires with appropriated funds.

The Operations Fire Fund Act is proposed to meet this problem. It would spread the risk of these nonnegligent fires to the entire industry, provide an incentive for care and meet the entire cost of suppressing such fires from deposits by operators.

Section 2 of the act establishes a fund created from deposits by timber purchasers, based on cut of national forest timber. It would limit the amount of the fund to the total cost of suppressing operations fires over the past 3 years, and would transfer excess funds to miscellaneous receipts of the Treasury.

Section 4 of the act would establish a board to fix the rates of deposits into the fund by regions, review expenditures from the fund and establish additional amounts timber purchasers must pay toward the initial cost of suppression. In western regions, it is expected that the purchaser would assume the obligations for the first $2,500 in suppression cost for each operations fire. Because of different conditions in the East, this obligation might be set at a lower level. In any event, the remaining cost of suppression would be met fully from the operations fire fund.

The Operations Fire Fund Act provides an equitable and low-cost way to meet the cost of suppressing the nonnegligent fires that may occur in the harvest of national forest timber.

BRANDT—AN ERA ENDS FOR GERMANY

(Mr. RARICK asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RARICK. Mr. Speaker, yesterday Germany's new Socialist Chancellor, Willy Brandt, took office.

For nearly a quarter of a century, the Christian Democratic Union governed Germany and by its leadership in economics and social policies has brought the German people from the terrible devastation of war to its present position of prosperity and stability, and with the soundest money in Europe—if not the world. But that era now ends for Germany.

The replacement of Chancellor Kiesinger was in no sense a repudiation by the German people of the Chancellor or the proven leadership of his party—which had restored Free Germany to a position of respect among nations.

The CDU received a plurality of the vote. A third party, which is the balance of power, ran last in the election—suffering such a severe loss that it nearly failed to seat any deputies.

The two majority parties—neither of whom could attain a Bundestag majority to elect a Chancellor—were required to deal either with each other or with the splinter party.

Brandt's Socialists led by Herbert Wehner simply made the sharpest, fastest deal.

Press reports show that Brandt was elected Chancellor by only two votes. In the one-candidate election in the Bundestag, which came as a "yes" or "no" vote, four ballots marked "poor Germany" and "no, thank you" were declared invalid. Five additional deputies abstained.

Brandt takes office accompanied by such leadership as: The new Minister of Justice, Gerhard Jahn, who lost his office as Bundestag whip in 1963 for slipping a classified defense document to the magazine, "Der Spiegle." The new Minister of Family is Kaete Strobel, distributor of "Sex Atlas" prepared by the Government to take a frank look at sexual problems.

The world, as well as the Germans, have plainly come to one of the crossroads of history. In order to understand the significance of Chancellor Brandt's election we must understand some of the background which all of the current news stories flagrantly ignore.

It is reasonably well known that Brandt found it desirable to flee from Germany in 1933 because of his activities in the militant Red Falcons, the Socialist Labor Party counterparts of the Nationalist Socialist German Workers Party—Nazi—Brownshirts.

Three years later, still a German citizen, under his newly adopted name of Willy Brandt, he showed up with a forged Norwegian passport as a "correspondent" with the Red forces in the Spanish Civil War.

The Norwegian Minister of Justice at that time was Trygve Lie, later to become the first Secretary General of the United Nations Organization.

When the German Army invaded Norway, Willy Brandt, still a German, found it expedient to hide behind the uniform of a Norwegian soldier to be taken a prisoner of war—rather than be arrested as a fugitive.

Obtaining his freedom within a few days he fled to Sweden while Trygve Lie went to London to become the prime functionary of the Norwegian Government-in-exile. While Brandt was in Sweden and the Norwegian Government was in London, Willy Brandt became a Norwegian citizen.

He next appeared at the Nuremberg trials as a Norwegian correspondent. Because of his fluency in several languages he is said to have been a favorite among the correspondents at the Nuremberg trials.

In 1946, Willy Brandt appeared in Berlin, this time wearing the uniform of a major of the Norwegian Army.

During the next year he renewed his ties with the German Socialist Labor Party, regaining his German citizenship and began his rise to power.

Interestingly enough, one of his old comrades in the party was Herbert Wehner. When Willy Brandt fled in 1933, Wehner went underground with the Communist apparatus in Germany. In 1935, Wehner went to Moscow where he remained until 1947. He now says he is a "former Communist." Upon his affiliation with the Socialist Labor Party, Wehner established himself in Hamburg although he is a native of Silesia in Com-

munist East Germany, where his wife and family still remain.

Mr. Speaker, the significance of Herbert Wehner in the history of Willy Brandt is twofold. First, he assumed totalitarian leadership of the Socialist Labor Party and, following the same technique propounded at that time by American Communist Gus Hall, sought to give it an image of broadly based respectability. Second, Wehner is credited with being the political genius responsible for Brandt's election as Chancellor.

The Norwegian Socialist Labor Party was the party of Trygve Lie. As a young man he had visited Moscow, then had enjoyed a meteoric rise in the party. During the Spanish Civil War, Trygve Lie was Norwegian Minister of Justice and as such personally handled the expulsion from Norway of purged Communist, Leon Trotsky. He arranged Trotsky's transportation to Mexico where he was later murdered by Stalin's agent, a Spanish Communist.

Trygve Lie, as Norwegian Foreign Minister, participated as head of the Norwegian delegation of the UNO in San Francisco together with such American luminaries as Alger Hiss. Thereafter, he became the first Secretary General of the UNO.

What is not well understood in the United States about European politics is the close relationship across national borders between political parties. Thus, interlocking arrangements are frequently made between political parties outside of the structure of government and effectuated when those parties come to control the government of their nation.

As a result of party discipline, the government official who also holds a party title exercises his power, not through the government but through the party apparatus. It is important for all Americans to recognize this power and to realize that while Willy Brandt has become Chancellor of Germany, Germany's policy will be largely made in the Socialist Labor Party, controlled by Herbert Wehner, who reassures us he is no longer a Communist.

Only three nations in the modern world have shown the technical capacity for the production of efficient machine tools—Sweden, Germany, and the United States. For many years, people who understand world politics have recognized the threat to freedom should either German or Swedish technology be permanently allied to the exploitation capacity of the Soviet Union.

In view of the controversial background of Chancellor Brandt and the forces behind his election the world watches very attentively the direction which Germany will now take.

I include a series of pertinent articles following my remarks for the study of the Members:

[From the Washington (D.C.) Post, Oct. 22, 1969]

AN ERA ENDS FOR GERMANY

(By Dan Morgan)

BONN, October 21.—"I see myself," said Willy Brandt a few days ago, "not as chancellor of a defeated Germany but of a liberated one."

Thus the Social Democratic Party's leader, whose active opposition to Hitler has not been an asset in his long journey to the chancellorship, gave the clearest possible sign that his election today ended an era, not only for Germany but for Europe as well.

It was a reminder that a man and a party were coming to power free of any shame for their past—or for being Germans.

This moral self-assurance of the Social Democrats has not always been understood in the 20 years of postwar West German democracy.

In the early days of the republic, the then party leader Kurt Schumacher preached the virtues of a strong "national consciousness." It was too soon. It made the conquering powers uneasy; and the German people, weary from war, rejected Schumacher's raw proletarian philosophy.

ACCEPTED THE DIVISION

Instead, West Germany was built up by the Christian Democrats, who accepted the division of Germany and the concept of "Little Germany."

Willy Brandt and his party have since greatly refined the ideals of Schumacher. They nevertheless bring to the Bonn government a century-old commitment to the German nation based on a policy of peace fitted to present European realities and to the humane traditions of social democracy.

The attitudes of Schumacher and Ernst Reuter, former West Berlin mayor and another key Social Democrat, were mistakenly viewed as nationalistic, Brandt has written.

"National consciousness is something different from arrogance, or overestimating one's worth as to other people," he said. "It rests on a confident evaluation of one's own strength, achievement and virtue—and of one's own limitations."

At the same time, Brandt wrote, whoever fails to accept the consequences of Hitlerism "is unfit to make German policy."

These are some of the strands of thinking that guide the man who is to lead West Germany into the 1970s.

His country is secure as a state, but it is deeply uncertain of its future within the undefined German nation, and the success of Brand't chancellorship may turn on his ability to interpret the longing of its citizens for reconciliation.

In his own historical reflections, Brandt turns to his forefathers in the socialist movement, from August Bebel to Friedrich Ebert. But, surprisingly, he also finds historical lessons to be drawn from two nonsocialists, Otto von Bismarck and Gustav Stresemann. Bismarck—who banned the socialists as enemies of the state—he admires for his rejection of "dogmas, doctrines and ideology." Stresemann he respects more deeply for his courage in seeking reconciliation with German's World War I enemies against the domestic opposition of a powerful right wing.

SEEKS "INTERNAL REFORM"

Both failed in the long run, he believes, because they were unable to "unite the nation from within." Brandt, for his part, has pledged to be the "chancellor of internal reform."

The root of Brandt's diplomacy of reconciliation, in 34 months as foreign minister in the Grand Coalition of Christian Democrats and Social Democrats, has been nonviolence. And one of the stated priorities of his government will be to negotiate treaties renouncing the use of force with the Soviet Union and the other Eastern European countries, including Walter Ulbricht's East Germany.

Brandt has a firm commitment to the Western alliance, but a determination to at least lay the groundwork for a peace in Europe less dependent on Soviet and American power.

Brandt was born Herbert Karl Frahm in 1913, in the northern coastal town of Luebeck. The dark days of Germany paralleled the dark days of Frahm. The illegitimate child of an impoverished mother, he nonetheless achieved a high school degree, which in those days could normally be obtained only by upper-class children or the unusually gifted.

After 1933 and the Hitler persecution of socialists came exile to Norway and Sweden, involvement in Scandinavian socialist work, Norwegian citizenship and adoption of a new name, Willy Brandt.

MAYOR OF WEST BERLIN

Following the war came his much-publicized return to Germany in a Norwegian major's uniform, an event still held against him by many Germans. By 1947, he had become a German citizen again. In 1955 he was elected mayor of West Berlin.

That began the period for which he is internationally known as a symbol of West Berlin's struggle for survival 110 miles inside Communist territory.

Although he was momentarily shocked by the inaction of the allies when the Berlin Wall was built in 1961, it was that period that ultimately cemented his relationship with the Western allies, particularly with Washington.

LESS FORMALITY

It is almost certain that he will reduce the ceremonial level of Bonn's official life.

One diplomat recently recalled that the first year Brandt was foreign minister, the annual diplomatic ball called for white tie. The next year, changes were already evident: black tie or dark suit was sufficient.

While Chancellor Kiesinger and his predecessor, Ludwig Erhard, were disliked in the postwar generation of German intellectuals, Brandt is attracted by them, and vice versa.

He has a close friendship with novelist Guenter Grass.

He is a gifted raconteur, witty and a master of colorful language, particularly late in the evening.

A few months ago in a relaxed mood before journalists he described the Grand Coalition as being similar to the "sexual traffic of elephants . . . everything occurs at a high level, much dust is churned up and the results are long in coming."

His work habits reflect a style that is thorough, reflective and speculative rather than managerial.

"I am no sprinter," he reminded a journalist the other day as he worked on his government program.

The next days and months will determine if Brandt, the long-distance runner, has the wind to outrun the conservative Christian Democrats, who will be nipping at his heels from the opposition benches.

[From the Washington (D.C.) Evening Star, Oct. 21, 1969]

WILLY BRANDT TAKES REINS AS CHANCELLOR

(By Andrew Borowiec)

BONN.—Willy Brandt, a child of Lubeck slums and a longtime political exile, today became West Germany's first Socialist chancellor.

He inherited a strong nation with a strong economy, strong currency—and strong opposition from the Christian Democratic Union (CDU), ousted after 20 years in power.

He has pledged to lead Germany along a more liberal and independent path, no longer a conquered nation with a guilt complex but a country demanding a place in the world commensurate with its economic success.

Brandt was sworn in by President Gustav Heinemann shortly after the new German Bundestag (parliament) elected him to the nation's leadership by 251 votes to 235—two votes more than required.

Five parliament members abstained, four votes were declared invalid and one deputy was absent.

The election was made possible only by a coalition between Brandt's century-old Social Democratic party (SPD) and the small

Free Democratic party (FDP), commanding a 12-seat edge among the 496 members of the legislature.

The coalition resulted from the Sept. 28 legislative elections that gave no clear-cut mandate to any single party. By pooling their forces, the SPD and liberal FDP were able to remove the Christian Democrats from power at least for four years.

Thus, an era dominated by the ghost of the late Konrad Adenauer, architect of post-war West Germany, came to an end. For the first time since the war, left-of-the-center forces are at the helm.

It was a day of jubilation for most of West Germany's post-war generation and a day of bitterness for the Christian Democrats who control 242 seats in the Bundestag and thus present a potential stumbling bloc to many of Brandt's ideas.

The election results were read today in hushed silence in the modernistic Bundestag building.

"Yes, I accept the election," Brandt said.

Minutes later, as the session of the sixth Bundestag was adjourned, former Chancellor Kurt Georg Kiesinger bitterly pledged to lead his Christian Democrats as a strong opposition force.

Assisting Brandt as vice chancellor and foreign minister in the 15-minister cabinet will be Walter Scheel, head of the FPD.

The new government is committed to lead what it calls a "barriers down" policy toward Eastern Europe. It wants to have a more realistic approach to East Germany and would like to end the age-old feud with Poland.

The coalition also wants to move with determination to expand and strengthen the European Common Market.

One of its first acts, however, is expected to be formal revaluation of the German mark, which has soared more than 6 percent over its official value on the free markets.

Brandt will spell out his program in detail next week but no spectacular departures from his electoral campaign platform are expected.

For the 55-year-old Brandt, it was a long and arduous path from his native Lubeck to the white-walled Palais Schaumburg, the official residence of German chancellors, on the banks of the Rhine.

Son of an unwed shopgirl, he was brought up as Herbert Karl Frahm. From early youth, he participated in the socialist movement, eventually adopting the pseudonym of Willy Brandt, which later became his name.

In 1933, with Nazi stormtroopers stamping out opposition, young Brandt fled to Norway, whose uniform he wore at the start of World War II. He fled Nazi armies again in 1940, a hapless exile in a Europe on fire.

But after the war he returned to a devastated and broken Germany, saying "It is better to be the only Democrat in Germany than one of many in Norway . . ."

His career was fast and brilliant. He served as mayor of West Berlin and later, in 1966, became foreign minister in the "grand coalition" government.

[From the Washington Post, Oct. 22, 1969]

BRANDT REPLACES KIESINGER; BECOMES FIRST SOCIALIST RULER OF WEST GERMANY

(By Dan Morgan)

BONN, October 21.—Willy Brandt, the former mayor of West Berlin who failed twice in the past eight years to win the leadership of West Germany, was elected today as the first Social Democratic chancellor of the post war republic.

Brandt's "I accept the election" was greeted by applause from his Social Democratic Deputies in the Bundestag (Parliament) and ended 20 years of Christian Democratic rule.

Brandt's first comments after his election stressed efforts to achieve diplomatic relations and a nonaggression treaty with Poland, and pointed toward a quick German signature on the nuclear nonproliferation treaty.

At the end of the tense secret balloting in the Bundestag chamber, Speaker Kai-Uwe von Hassel announced that Brandt, the sole candidate, had exceeded the required absolute majority of 249 by two votes.

The vote was 251 for Brandt, and 235 against him, with five abstentions and four votes declared invalid, including ballots marked "Poor Germany" and "No thank you."

There had been some uncertainty over whether Walter Sheel's 30 Free Democrats, the Social Democrat's partners in the new coalition, would stay united behind Brandt. At least 27 of them did, and that was enough.

Brandt, 55, became the first Social Democrat since 1930 to lead a German state when he took the oath of office before the plenum this afternoon.

Brandt, who failed to win in 1961 and again in 1965 when the Christian Democrats swamped his party in national voting, acknowledged that his victory was a source of "a little bit of pride."

Though the new government's program will not be announced until next Tuesday, domestic reform, strengthening West European unity and seeking accords with the East are Brandt's guidelines.

Brandt told the German press agency DPA that he would work for diplomatic relations with Poland, as well as a treaty with Warsaw renouncing the use of force. He said there should be no major obstacles in finding "the right basis" for signing the nuclear pact.

The new chancellor, who served as foreign minister for 34 months in the outgoing cabinet of Chancellor Kiesinger, will face some tough problems almost immediately.

The first is the threat of inflation, which a leading West German economic research group said would remain even after a currency revaluation, expected to come in the next few days, possibly Sunday.

The other problems are the crisis in the Common Market over the collapse of the Market's agricultural pricing policy and the French stand against widening the Market.

He also will face the strongest parliamentary opposition in Bonn's history.

Stability is essential for Brandt and his new team of Social Democratic and Free Democratic ministers to carry out their broad program of Domestic reforms, including expansion of university facilities, tax changes and greater promotion of science and research.

At today's parliamentary session, the Christian Democrats sat in silence as the results were announced. When it became obvious that Bonn had just seen its first transfer of political power to the socialists, floor leader Rainer Barzel and Chancellor Kiesinger left their front benches and shook hands stiffly with Brandt.

Then Brandt turned and, exploding with a grin, gave a spontaneous half-hug to Herbert Wehner, the man who 10 years ago masterminded the Social Democratic strategy switch to the moderate policies that resulted in the socialists receiving 42.6 per cent of the national vote last Sept. 28.

Brandt's margin today was two more than the one-vote cushion won by the late Chancellor Adenauer in 1949, and party officials predicted that they would have no trouble staying in charge on the floor.

The new government will be sworn in on Wednesday. The unofficial lineup:

Chancellor: Willy Brandt (SPD).

Foreign Minister: Walter Scheel (FDP). Former foreign aid minister under Ludwig Erhard and a Dusseldorf management consultant.

Defense: Helmut Schmidt (SPD). Party floor leader under outgoing Grand Coalition, reserve Bundeswehr major and a defense specialist.

Economics: Karl Schiller (SPD). The mastermind of the 1967–68 economic recovery who introduced central planning in discreet doses to the German postwar economy.

Finance: Alex Moeller (SPD). One of the old SPD "comrades," but one from the employer manager side, he is director of a Karlsruhe Life Insurance company.

Interior: Hans-Dietrich Genscher (FDP). A lawyer with liberal credentials.

Minister in Chancellory: Horst Ehmke (SPD). Pragmatic and energetic, he is the motor in the Brandt chancellory that will leave the chancellor time for policy and planning.

Justice: Gerhard Jahn (SPD). Lost his post as junior Bundestag whip in 1963 for giving Spiegel magazine a "secret" document from the defense committee.

Transportation: Georg Leber (SPD). Trade unionist and a coming man in the party.

Agriculture: Josef Ertl (FDP). Representative of the party's right wing in the cabinet.

Labor: Walter Arendt (SPD). Trade unionist.

Development aid: Erhard Eppler (SPD). Spartan, progressive, with strong ties in the Protestant Church, both in East and West Germany.

Housing: Lauritz Lauritzen (SPD).

Family: Kaete Strobel (SPD). Distributor of "Sex Atlas" prepared by government that took a frank look at sexual problems.

Science: Prof. Hans Leussink (unaffiliated). Brandt's most controversial choice because of lack of party image; left-wing students and trade unionists suspicious of his conservatism on educational reform.

All-German Affairs: Egon Franke (SPD). Strong ties in Bundestag but otherwise unknown.

NIXON CONGRATULATES ACTUAL BONN WINNER

President Nixon, who committed a minor international blunder by prematurely phoning the winner in Germany's elections, congratulated the new West German Chancellor, Willy Brandt, yesterday.

Mr. Nixon phoned congratulations to then Chancellor Kurt Kiesinger the night of the election when his party had won a plurality but not a majority, with no assurance of his retention as chancellor.

In yesterday's letter, Mr. Nixon told Brandt it gave him "great pleasure to congratulate you on your elevation to the high office of Chancellor of the Federal Republic of Germany. You have already done much for your people, as governing mayor of Berlin and as foreign minister and vice chancellor."

[From the Washington Star, Nov. 21, 1958]

BERLIN'S LORD MAYOR READY FOR CRISIS

BERLIN, November 21.—Willy Brandt is ready to take on whatever the Communists throw at Berlin.

"We've got strong nerves and we're ready for the difficulties ahead," says the handsome 44-year-old Lord Mayor.

Mr. Brandt is a fighting Socialist politician in the tradition of the late Ernst Reuter, Lord Mayor who saw Berlin through the Russian blockade of 1948–9.

Some fellow Social Democrats think Mr. Brandt may one day be Chancellor if West Germany swings left.

His lust for the political rough-and-tumble may stem from his background—voluntary exile during the Hitler years, escape from the Gestapo, marriage to a Norwegian beauty, and a meteoric postwar political rise.

WAR RECORD ARGUED

Controversy centers around his activities in World War II. Some political foes accuse him of treason, claiming that he fought with the Norwegian Army while a political refugee.

Mr. Brandt denies the charge. He says he put on the Norwegian uniform to escape the Gestapo hunt for him after Norway fell in 1940. He succeeded in eluding the Nazis and wound up the war as a Norwegian citizen

in Sweden working as a journalist. In the war he changed his name from Herbert Karl Frahm, given to him by his mother, a former shop girl in Luebeck.

After Germany surrendered, Mr. Brandt returned to Berlin as Press Attache in Norway's military mission.

He readopted German citizenship in 1947. He won a seat in West Germany's Parliament and in 1950 became a West Berlin city legislator.

HIS SOCIALISM IS PRACTICAL

Mr. Brandt was a hard-headed practical Socialist then and is now. Experience with Nazism and Communists has made him shy at too much state power. He sees free enterprise playing a pivotal role in reconstructing West Berlin as a showcase for freedom.

In 1948 Mr. Brandt married Rut Hansen, whom he had met in Scandinavia. The couple and their two boys speak Norwegian at home.

The Brandts live in a four-room apartment of a two-family house.

"For the boys and myself, our parties here take place when my husband is at home. That's not often," said slim, blonde Mrs. Brandt, wistfully.

"The boys sometimes ask me how it is that the father of the children upstairs can come home for lunch."

Mr. Brandt isn't coming home for lunch nowadays—and rarely for dinner. He is too busy speeding around among his 2.2 million people, telling them to stand fast.

[From the Washington Post, Feb. 7, 1959]

GERMAN MAN OF FUTURE?—BRANDT, YOUNG SOCIALIST, HERE TODAY

(By Chalmers M. Roberts)

A 44-year-old German politician on the way up arrives in Washington today with his blond, trim Norwegian-born wife. He is Willy Brandt, Mayor of the city on which the world's eyes are focused—free West Berlin in the midst of Communist East Germany.

Brandt became a Social Democratic Party member at 17. Three years later, when Hitler came to power in 1933, he fled to Norway, where he had relatives. In Oslo, he studied history and worked as a journalist. In 1937, he covered the Spanish Civil War for Scandinavian newspapers. Born Herbert Frahm, he took the pen name Willy Brandt when he first began to write in Norway.

When Norway surrendered to Hitler in 1940, Brandt donned a Norwegian uniform in order to surrender as a soldier rather than risk arrest by the Gestapo. He was released, went to Sweden, was granted Norwegian citizenship in absentia, again worked as a journalist.

After the war ended, he was a Scandinavian newsman in Germany covering the Nuremberg trials. He also served as a political attaché of the Norwegian military mission in Berlin.

In 1947, he settled in Germany for good. Thayer quotes him as saying at the time that "it is better to be a lone democrat in Germany than to be one in Norway where everyone is a democrat."

In Berlin he jumped into party politics and was, successively, chief editor of the Berliner, Stadblatt, a member of the West German Bundestag, a member and president of the Berlin House of Representatives. Today he is not only Mayor of Berlin but also his Party's chairman in the city. He is the author of a recent biograph of Ernst Reuter, the Social Democratic Mayor during the Berlin airlift days and Brandt's political mentor.

The Mayor's party favors some form of East-West disengagement and is strongly opposed to nuclear arms in West Germany. Brandt's own position on some of these points is a bit fuzzy.

The Eisenhower Administration is eager to give Brandt a good reception. It wants him to know how important it feels is his strong leadership in West Berlin—and not just because some $300 million of American aid has been poured into the city since 1947.

Brandt will be entertained here tonight by Eleanor Dulles, the State Department's longtime German expert and sister of Secretary John Foster Dulles.

[From the Harper's magazine, February 1959]

UNDERGROUND IN NORWAY

(By Charles W. Thayer)

The progressive opponents of The Barracks staged an open revolt at the Stuttgart convention last May and managed to throw most of the old left-wingers out of the party's executive committee, replacing them with such modern right-wingers as Willy Brandt. On foreign policy, however, there was little change at Stuttgart. In their appeals for talks with the Kremlin, their denunciation of NATO defense plans, and their opposition to Adenauer's pro-Western policies, the speakers only succeeded in pushing the party further down the dead end street of fuzzy-minded neutralism.

It was clear in Stuttgart that the reformers themselves had not dared to challenge the legacy of Schumacher in front of the minor party officials, the ward leaders who dominated the party convention. What the reformers needed was not an intellectual Socialist—they had plenty of them—but a courageous, dynamic man with the popular appeal to lead a genuine rejuvenation movement. That man, his friends say, is the newly elected national committeeman, Willy Brandt.

Willy's career, like his charm, is unique in several respects. Born in Lübeck on the North Sea, the son of a grocery store saleswoman, Brandt (whose name at birth was Herbert Frahm) became interested in the Social Democratic party as a schoolboy. Still in his teens when Hitler came to power, he saw his older friends being arrested by the Gestapo and decided to flee before he himself was caught. He escaped by fishing boat to Norway. There he immediately began a successful career as a journalist under the pen name of Willy Brandt.

Unlike other Social Democrats who emigrated first to Prague and eventually to London, where they spent their exile huddled in a frustrated little group, some not even learning to speak English, Brandt quickly became active in Norwegian politics. He learned both Norwegian, in which he wrote a number of books and pamphlets, and English, which he still speaks well.

During his exile he acquired a forged Norwegian passport.

"It was a damned good forgery," Willy records. "It fooled all the police in Europe—including the Gestapo."

With it he covered the Spanish Civil War for some Scandinavian newspaper and even visited Berlin to gather material in the Nazi party archives for use in his anti-Hitler pamphlets.

When the Germans invaded Norway, Brandt was working with the Norwegian Red Cross. Fearful that the Gestapo would discover his real identity, his friends got him a Norwegian soldier's uniform in which he was taken prisoner by the Wehrmacht instead of the Gestapo. After a few weeks as a prisoner-of-war, he managed to escape and fled to Sweden.

These circumstances have caused him some political embarrassment, since opponents have charged that while still a German citizen he bore arms against his country. Willy emphatically denies the accusation explaining that he had been deprived of German citizenship by the Nazi government and that in any case he was a Red Cross worker and not an active soldier. Perhaps oversensitive to these charges of treason, Brandt has brought suit against the politician who first published them. The case is still pending.

In Sweden, Brandt finally acquired Norwegian citizenship and worked with the Norwegian Government-in-Exile until the war ended. It was in Stockholm that he first met Ruth, the widow of a fellow journalist. But it was not until he moved to Berlin that he married her.

When the war ended Brandt returned to Germany, first as a journalist to report the Nürnberg trial and then as a political attaché of the Norwegian Military Mission in Berlin. He re-established his contacts with the Social Democratic party, then being revived by Kurt Schumacher, and after two years decided to give up his privileged position as a victorious Norwegian and to resume the citizenship and status of a defeated German.

"It is better," he said at the time, "to be a lone democrat in Germany than to be one in Norway where everyone is a democrat."

In Berlin, Brandt at once allied himself with another ex-emigré, Ernst Reuter—later to become a famous Mayor of Berlin—who was also a Social Democrat with progressive leanings. At that time the local party leader was Franz Neumann. He had spent the Hitler years in "internal emigration" as a locksmith and had sprung to prominence when he successfully resisted Soviet efforts to merge the entire Berlin Social Democratic party with the Communists to form the Soviet-dominated Socialist Unity party which now rules East Germany and the Eastern Sector of Berlin.

Jealous of Reuter's immense prestige, Neumann provoked a quarrel which lasted until Reuter's death. The feud was carried on by Brandt and only ended, for practical purposes, when Brandt ousted Neumann from the local party chairmanship.

Elected to the first Bundestag in Bonn in 1949, Willy (under Reuter's tutelage) slowly built himself a reputation as a practical politician, a highly effective public speaker, an arch-enemy of the Communists, and a stanch ally of the West—and particularly of the United States, which had contributed so much to saving his adopted city during the Blockade. Finally his break came with the crisis at the Brandenburg Gate in 1956 and his election as Mayor a year later.

As soon as he had installed himself in the Mayor's office, Brandt set out on two pilgrimages which since the war have become almost obligatory to aspiring German politicians—to Washington and London. According to the Berlin press both trips were triumphal tours—in brilliant contrast with the tepid reception his national party chief, Erich Ollenhauer, received a year earlier. Berliners of all parties—excepting the Communists—are proud of their new Mayor and consider him the legitimate heir of their beloved Ernst Reuter. British, French, and American officials are no less warm in their praise.

But it is the Social Democratic reformers who hold the highest hopes for Brandt. Not that they expect him suddenly to take over the national party leadership or even to storm The Barracks at Bonn. Willy is still too junior among the rank-conscious Social Democrats, despite his recent leap to fame. Moreover, he is a cautous political strategist, who can wait ten years to gain his ends.

OPPORTUNIST OR PRACTICAL POLITICIAN?

Now that he has risen to the top level of his party, what does Willy hope to achieve for it? In the first place, he believes strongly that an exclusively workers' party is an anachronism. The Social Democrats must spread out in all directions—among white-collar workers and small businessmen, intellectuals and civil servants. At its fringes it should not demand formal party membership but should merge with non-party sympathizers. "People have a perfect right to be politically active without paying dues to a political party," he argues.

Secondly, Brandt believes, that though a party machine to organize elections is necessary, it should not be the tail wagging the dog. Even in the selection of candidates, party functionaries have a tendency to put forward old "comrades," and as a sounding board of

public opinion, Brandt believes, polls are more accurate than the views of prejudiced ward leaders.

Willy is not an extremist, however, about the old symbols that worry Carlo Schmid and other reformers. If the old boys want to drape an old party banner or two behind the speaker's platform, Willy doesn't mind. "But," he adds with a grin, "let's not start making any new red banners. It's not the fashion nowadays."

And if they want to call each other "comrade" and sing a few Socialist songs at the end of a political rally, why not? (Brandt himself regularly addresses his audiences as "Ladies and Gentlemen" and when he took the oath as Mayor of Berlin, he almost shouted the words "So help me God!" thereby shattering an ancient Social Democratic taboo on religious oaths.)

Brandt is not a believer in dogmas and party doctrines. "In this age when politics like everything else is jet-propelled, who can draft a program that will stand up five years hence?" The best one can do, he thinks, is to formulate a few basic principles and stick to them. At the Stuttgart convention, where an elaborate new party program was one of the chief subjects of discussion, Willy was conspicuously silent.

Among the principles Willy would like to see adopted are these four:

(1) "The magic word 'nationalization' is no longer justified in modern politics. The problem is how the various forms of economic activity and how private and public capital are to be harmonized. To the extent that public capital is necessary, for example in the fuel industry, you have to be cautious and not just demand complete socialization."

(2) Recalling the bitter days of 1933, when Hitler was hailed into power by an ignorant electorate, Willy believes that enlightened popular political activity must be vigorously expanded. "It's not enough," he says, "just to give people the vote." In Germany many feudal hangovers from the past curtail the political activity of the citizen. The most burdensome of these—not only of Hitler, but of Bismarck and Wilhelm II—is perhaps the bureaucracy. "Imagine an American civil servant telling a Congressman to go to hell," he says. "Yet that's precisely what many high civil servants do in Germany!" Brandt concedes that you can go too far with this as with any other theory. Lenin, for example, suggested that in the ideal state, street cleaners and mayors should alternate at their jobs. "That's nonsense," he says; "besides I've no great hankering to sweep streets."

(3) Willy believes that the existing monopoly on higher education in Germany must be broken. This, he explains, is a two-pronged problem. The ordinary well-paid German worker—suffering from an old inferiority complex—seldom saves money, as a poor civil servant does, to send his children through college; he feels they don't belong there. On the other hand, many people in Germany, including Adenauer and his adherents, still think that scholastic aptitude is best determined by birth. Rich industrialists perpetuate the educational monopoly by granting scholarships only to sons of white-collar employees. The big university fraternities, with their powerful old grads, do the same by giving preference in jobs to sons of fraternity brethren.

(4) While Willy does not hold much store by the old romantic ideals of an international brotherhood of the working class, he does believe that the more prosperous industrial nations should practice a new brotherhood by helping to develop backward countries.

On the more specific issues of international affairs, Mayor Brandt is careful not to antagonize the policy-makers of his party. Often he takes refuge in the formula that, as Mayor of Berlin, foreign affairs are outside his province. Since his city suffers most acutely from the division of Germany, however, he attaches far more importance to reunification than do Adenauer and his adherents. To achieve reunification he is also prepared to take greater risks than the present government.

Perhaps because he is daily confronted with problems arising from the East-West struggle, Brandt believes that eventually Moscow and Washington will be forced to come to a settlement by world public opinion. He also believes that the pressures within the Soviet Union—unrest among intellectuals, the unsolved problems of modern industrialism, and the problem of the peasantry—will eventually force the Kremlin to modify its methods.

Furthermore, the pressures in the satellites, such as those in Poland and Hungary, will work toward the same end.

For all these reasons, Willy believes that Germany must push for an eventual settlement and see to it that it is made with Germany's consent and not at its expense. At the same time, he thinks that to be prepared for every contingency the West must keep all lines to the East open. Unlike Adenauer—who once refused a West German visa to a Soviet clown—Willy is ready to talk to all visitors who come through Berlin from the East. Shortly after becoming Mayor of Berlin he paid a courtesy call on the Soviet Commander in the East Zone, and when I last saw him he was about to receive some Soviet students returning from England.

In the current debate on "disengagement" Brandt pleads ignorance but, he adds, everyone else appears to be just as ignorant, including Chancellor Adenauer. An American general, for example, told him that the American bases in Germany were useless.

"If that's the case," Willy asked, "why not swap them for some political advantage?"

Until the Western authorities and particularly NATO itself are agreed upon minimum military defense requirements, no one, including Adenauer, knows what we are bargaining with—or for.

Compared to the involved ideologies of some of his fellow politicians, Brandt's principles appear basic to the point of superficiality. In fact, some of his critics accuse him of down-right opportunism. His friends reply that the fundamental difference between him and the doctrinaire theoreticians is that while he was working at practical politics in Scandinavia the theoreticians were debating nineteenth-century dogmas in London. An American diplomat in Berlin who knows and admires Brandt, says: "It is precisely his pragmatic approach to problems that appeals so strongly to outsiders who do business with him."

Willy is the first to recognize that his political philosophy must appear rather commonplace to an American. But, he emphasizes, Germany has never had a chance to adapt its political institutions to what he calls "living democracy." Only during the Weimar Republic would such a development have been possible—and during that hectic period the goal of every politician was not reform but survival. During the occupation the Western Allies—particularly the Americans—did their best to put some of Willy's principles into practice but (though Willy is too polite to say so) they failed. Anyway, Willy believes, such principles cannot be imposed from without but must be developed from within.

[From Time, May 25, 1959]

NO MORE BANNERS

The conflict between Willy and Ollenhauer is also an ideological conflict between two generations of Socialists. Many of the party's senior bureaucrats cling to gospel according to Karl Marx, still talk wistfully of a "state-guided economy." They have lost the last three national elections. Willy argues that "the magic word 'nationalization' is no longer justified. The problem is how . . . private and public capital are to be harmonized." If German Socialism is to get more than its immovable 30% of the votes, he insists, "it must have a wider base than a single class," must become less doctrinaire to win middle-class appeal. "Let's not start making any new red banners," he says. "It's not the fashion nowadays."

THE YOUNG FALCON

Willy's moderate Socialism represents the Scandinavian strain in him—the most important influence in his life. He was born Herbert Karl Frahm, the illegitimate child of a shopgirl in the Baltic German port of Lubeck. The companionship he could not find at home he sought in the "Red Falcons," prewar Germany's Socialist youth movement. He got into his first slugging match with the Nazis at 17, was rarely out of trouble thereafter. By 19 he was writing for Socialist newspapers, serving as a functionary of the far-left Socialist Workers' Party, and was, an old acquaintance recalls, "as close to Red as you can get without actually being Red." In 1933, already in the Gestapo's black books, and disgusted with the German Socialists' collapse before Hitler, he fled to Norway under the pseudonym Willy Brandt—the name he has borne ever since.

In Norway Willy supported himself by newspapering. (In the 1957 German *Who's Who* he still listed himself a journalist.") But his real profession was politics. He became the moving spirit of the German refugee colony in Oslo, won such esteem among Scandinavian Socialists that some of them still argue that he would in time have become Foreign Minister of Norway. Willy gained political maturity there, and a deep affection for Scandinavia that has never left him. Even today he speaks Norwegian at home, and most of the personal friends invited to the Brandt's five-room duplex in Berlin's Zehlendorf district are Scandinavian.

FATHERLY FRIEND

When the Nazis invaded Norway in 1940, Willy found himself in personal danger. Up to his neck in anti-Nazi plots—he had even spent six months back in Nazi Germany using forged Norwegian papers—he was wanted by the Gestapo. At the urging of Norwegian friends, he donned a Norwegian uniform, was flung into a P.W. camp along with the defeated Norwegian army, released as harmless after five weeks. At war's end, after almost five years in refuge in Sweden, he turned up in Germany again, first as a Norwegian correspondent, then as press attaché to the Norwegian military mission in Berlin.

When he arrived in Berlin, a Norwegian citizen with the rank of major in the Norwegian army, Brandt had no intention or resettling in the land of his birth. Already he was planning marriage to Rut Hansen, lovely blonde widow of a Norwegian journalist. (His first marriage, also to a Norwegian girl, ended in divorce in 1947.) His privileged status as a member of the Allied occupation forces assured him of a luxurious existence that no German could dream of matching. But under the influence of Ernst Reuter, whom he still emotionally recalls as his "fatherly friend," Willy's interest in German politics began to revive. In early 1948 he became a German citizen again. His explanation: "It is better to be the only democrat in Germany than one of many in Norway, where everyone understands democracy."

[From the Manchester Guardian Weekly, Sept. 29, 1960]

MAYOR BRANDT OF BERLIN

(By Werner Burmeister)

What kind of man is Willy Brandt and what influences have shaped him? He himself supplies answers to these questions in "My Road to Berlin," which is just published (by Peter Davies, at 25s). In some measure, the story suffers from being retold by an-

other man's pen, or perhaps it is the fault of the translation which sometimes jars on the reader. Still, through Mr. Leo Lanio we have now been given a simple and straightforward account. Brandt's outlook has been vitally influenced by three men, and by his exile in Norway.

The first of the three men was his grandfather in Lübeck where Willy Brandt was born in 1913—as Herbert Frahm, who never knew his father. The grandfather, an agricultural laborourer and later an industrial worker, taught him the rudiments of socialism. At his knee, the boy heard about Marx and Bebel and Lassalle, and how the Social Democrats would end all misery for ever. He got a scholarship to the grammar school, joined the Socialist youth organisation, started to write for the local party newspaper, and met its editor, Julius Leber, who represented Lübeck in the Reichstag, and who was executed by the Nazis in 1944 for his part in the conspiracy to kill Hitler.

During the struggles immediately before Hitler came to power, Julius Leber, the second of his mentors taught Brandt some principles which sound quite simple now but were not so simple then, and which the young Left-wing Socialist must have continued to doubt for a while. They were that Social Democrats were forced to wage war on two fronts—against the Nazis and against the Communists—and that "working class unity" was impossible between two parties, one of which stood for democracy, while the other wanted to establish its own dictatorship. Until the end of the Spanish civil war, and even later, until the Hitler-Stalin pact of 1939, many young Socialists thought that the Communists had similar aims.

Leber was arrested on the day Hitler became Chancellor. A faithful fisherman took Willy Brandt (that was now his party name) to Scandinavia. There he spent some of the happiest and most formative years of his life. Norway became his second home. He was young enough to avoid the self-centred life of political refugees. Soon he spoke the language fluently—so much so that the Germans did not recognise him when, later on, he became their prisoner of war for a short time. Meanwhile, he worked as a journalist and as an active member of the Norwegian Socialist youth movement. The example of a Socialist party in power, too busy mastering the practical problems of running its country to have much time for theoretical debates, clearly produced a lasting change in his outlook.

Equally decisive for him was his assignment as a war correspondent for some Norwegian papers in Spain early in 1937. He saw the Communists at work and noted that, though they contributed greatly to the military organisation of the Republican forces, they did not hesitate to use the most vicious means against their Socialist comrades, to secure exclusive control of Republican policy. It was an experience which later largely determined his political actions and thinking.

After the German conquest of Norway Willy Brandt fled to Sweden where he met exiled Socialists from practically all European countries.

In Sweden, too, he made his first contacts with members of the German conspiracy against Hitler—officers, civil servants, many of them conservative in outlook. At first, he could not believe that the German generals would overthrow the man who was their own creation. But he changed his mind, above all because men like Julius Leber were taking a leading part in the plot. It was their sacrifice, in the holocaust that followed the attempt on Hitler's life in July 1944, which in the end made him determined to return to Germany.

At Christmas, 1946, he arrived in the uniform of a Norwegian major to join the military mission at the Allied Control Council in Berlin. A few days earlier, Ernst Reuter had returned there from Turkey—the third man who was to exercise a profound influence on Brandt's mind. Berlin in 1946 seemed like a no man's land on the edge of the world, though inhabited by three million people. Within a year, he had decided that he must go back to Germany for good; he gave up his Norwegian citizenship and applied for renaturalisation. The West German Social Democrats sent him to Berlin as their spokesman with the Western Allies there.

[From the Manchester Guardian Weekly, Feb. 20, 1964]

HERR BRANDT BECOMES PARTY CHAIRMAN

(By Norman Crossland)

BONN, February 16.—Herr Willy Brandt, Lord Mayor of West Berlin, today became chairman of West Germany's Social Democratic Party and candidate for the Chancellorship at the general election in September next year. As chairman he succeeds the late Herr Erich Ollenhauer.

The SPD is now led by a triumvirate of Herr Brandt, Herr Herbert Wehner, and Herr Fritz Erler, these last two being elected as deputy party chairmen. Herr Wehner will look after the political organisation of the party and Herr Erler will be the party leader in the Bundestag.

An early sign that Herr Brandt's election heralds a period of more pointed political strife was the reaction of the Christian Democrats. The CUD business leader, Herr Josef Hermann Dufhues, said his party wished Brandt the strength to carry out his political task. But, in fact, he added less sweetly, the SPD had no other choice than to elect Brandt when at the last general election he had been projected at such expense by the party's propaganda machine.

The choice of Brandt as chairman had been made in the knowledge that the party was really rejecting the stronger man, namely Herr Erler. This showed how, in the days of mass media, a political party could become the prisoner of its own propaganda.

[From the New York Times, Apr. 11, 1965]

WILLY BRANDT—THE CHAMPION OF FREE BERLIN

(By Philip Shabecoff)

BERLIN, April 10.—When West Berlin's governing Mayor Willy Brandt was turned back by East German police as he tried to drive home through the autobahn last Sunday he must have thought glumly about a speech he made last Dec. 29.

In his annual year-end address to the people of Berlin, Mr. Brandt predicted that there would be no East-West crisis flaring up over their city during 1965.

The formations of MIG's that buzzed Berlin and the blockades of the autobahn during the last week have proved Mr. Brandt a rather dubious prophet. But if his vision of the future was a bit clouded, his reaction to the crisis was characteristically aggressive.

"We will not be frightened by threats," he proclaimed when he finally got back to the city.

Referring to an ultimatum by Nikita Khrushchev in 1958 when the Soviet Premier demanded that the Western Allies get out of Berlin within six months, Mr. Brandt added that "we would not be where we are today if we got down on our knees when Khrushchev issued his ultimatum and threatened us."

CHARM AND COURAGE

It is this characteristic aggressiveness, combined with boyish looks and charm, a delicate sense of political balance and a reputation for personal courage that has carried Willy Brandt, at the age of 51, within striking distance of the apex of West German political power.

As leader of the opposition Social Democratic party since the death of Erich Ollenhauer, Mr. Brandt will be his party's candidate for Chancellor in the West German national elections this September. He failed in a previous try for the country's highest office; but this time, facing a disorganized Christian Democratic party, he is conceded a fair chance of winning.

Mr. Brandt's path to his present political eminence has been a rather tortuous one. He was born Herbert Karl Frahm, the illegitimate son of a shopgirl in the north German city of Lübeck. While still young he joined the Red Falcons, a left-wing Socialist youth movement of pre-war Germany.

When Hitler came to power, Herbert Frahm fled to Norway, using the name Willy Brandt to elude the Nazi security police. In Norway he worked as a journalist and became a leading figure in the Oslo community of German refugees.

Mr. Brandt came close to falling into Nazi hands when the Wehrmacht conquered Norway. But he escaped by getting into the uniform of a Norwegian soldier and getting himself thrown into a prisoner-of-war camp with other members of the defeated army.

Released after five weeks, he made a hasty exit for Sweden, where he remained for the rest of the war.

AT NUREMBERG TRIALS

Mr. Brandt came back to Germany immediately after the war to cover the Nuremberg trials for Norwegian newspapers. A fellow newspaperman at Nuremberg recalled recently that "Brandt was very helpful to the rest of us. He could speak English, Danish, Norwegian, Swedish and French as well as German and he must have acted as a go-between and translator for half of the foreign press corps."

He then came to Berlin, but still as a Norwegian citizen, wearing the uniform of a Norwegian major and harboring no thoughts about staying permanently in Germany.

But once in Berlin, Major Brandt began to get involved in the problems of conquered Germany and active in Socialist affairs. In 1948 he became, formally, a German citizen once again.

"It was better to be the only democrat in Germany than one of many in Norway where everybody understands democracy," he once said of his decision to stay here.

Although again a citizen of Germany, Mr. Brandt kept the name he had used to flee the country. "My old name has no meaning for me," he once replied when asked about it. He explained that his mother had married and taken a new name and that everything of importance he had ever said, written or done had been under the name of Willy Brandt.

As Mr. Brandt moved forward in his political career, his wartime activities became something of a liability. Professional haters and political opponents spread the word that Mayor Brandt had become a "traitor" by leaving Germany during the war and that he had in fact fought against the German people.

Although these accusations continued to boil up every now and again, Mr. Brandt has managed to overcome the effects of their virulence.

Under the spiritual tutelage of Ernst Reuter, the late Mayor of West Berlin and tough old Socialist leader, Mr. Brandt assumed increasing responsibility in the Social Democratic party. For several years he represented West Berlin in the West German Parliament at Bonn.

As Mayor, Mr. Brandt negotiates with the East German regime on matters such as the pass permits that allow West Germans to pass through the Berlin Wall to visit relatives on the other side.

These contacts with the East have given some of Mr. Brandt's opponents the opportunity to charge him with being "too conciliatory" or "too friendly" toward the Communists.

A recent survey made by a West German newspaper indicated that Mr. Brandt is the most popular German in the United States. The sentiment seems to be reciprocated.

When Mr. Brandt accepted leadership of the Social Democratic party early last year, his speech smacked strongly of John F. Kennedy's inaugural address. "For all of us the question is not what the party can do for you, it is what you can do for the community," the West Berliner said.

Mr. Brandt also has spoken admiringly about President Johnson's Great Society and holds it up as a pattern for Germany to emulate.

[From the Central European Observer, Feb. 15, 1946]

SERVANT OF THE WORLD

(By A. J. Fischer)

When the United Nations were electing the President for their London Assembly, M. Gromyko, on behalf of the Russian delegation, proposed the Norwegian Foreign Minister, M. Trygve Lie, but M. Spaak won by a small majority. A few weeks later, the Security Council had to decide on the important appointment of a permanent General Secretary. (The approval of the General Assembly is merely a formality.) This time it was Mr. Stettinius, the American delegate, who proposed M. Trygve Lie. After prolonged debates in the course of which one candidate appeared too much pro-Anglo-Saxon, another too Russophile, the Big Five agreed on the 50-year-old Norwegian.

Strategically Norway's situation is between the Western and the Russian spheres. Well aware of this delicate position, she did not wish to belong to any block with a definite tendency, though every Norwegian is nowadays prepared to fulfill all his duties and obligations within an international security system.

The fact that M. Lie's straightforward political life lifts him above any suspicion as to his favouring any power or power groups, makes him a suitable man to act as "servant of the world," as he modestly interprets his new task. World Citizen No. 1 a title used by many of those congratulating him, he regards as presumptuous. His country, which gladly records this honour as an appreciation of its gallant fight and resistance, is respected by all and feared by none. Above all, Norway is one of those small nations which have two great advantages: Unburdened by inverted inferiority complexes, she is also free of chauvinism. Trygve Lie can look back on a great Norwegian tradition.

In his first speech before the United Nations Assembly, he gave a definition of the phrase "international unity" and mentioned the name of Bjornson, that great national poet of Norway, who had fought for the freedom of the oppressed Slovaks some forty years ago. Frequently he has been referring to yet another famous son of his people: Fridtjof Nansen. Nansen, the explorer and humanitarian, regarded a world peace without Russia's active co-operation as an impossibility. M. Lie holds the same view. In August 1941, he called on the then Soviet ambassador in London, M. Maisky, with the suggestion that the diplomatic relations between the two neighboring countries should be resumed. An eternity seems to have passed since that formal step, which has resulted in a lasting and sincere friendship. Nor was there any loosening in the traditional, emotional, cultural and economic ties existing between Great Britain and Norway. Asked for his sentiments towards England, Trygve Lie replied simply: "I need not think much about this question, for the mentality of the British is so familiar to me that I even think in the same way as they do."

Exiled to Great Britain during the war, he presented his hosts with 4,000,000 tons of Norwegian shipping—invaluable asset for England's war effort, particularly when she stood alone.

Very often comparisons are being made between M. Lie and the British Foreign Secretary, Mr. Bevin; their stocky figures, their popular sense of humour, as well as their backgrounds and political careers bear considerable affinity. Both have risen from the depth of the people. This fact has never been forgotten by Trygve Lie. In his first declaration as General Secretary of UNO he stressed the duty to help the distressed masses of the world, to feed them adequately, to clothe them and warm them. Only the fulfilment of that social mission would ensure that the victims of the second world war had not died in vain. Both Mr. Bevin and M. Lie owe their brilliant political careers to the confidence of the trade unions, which have always remained their chief concern.

In other spheres again there are parallels with Truman's Secretary of State, Mr. James F. Byrnes. The American and the Norwegian are both self-made men, who had to fight hard to pay for their studies. They both started their careers as errand boys. (M. Gerhardsen, Norway's Prime Minister, commenced in the same way.) Actually, M. Lie's political career began even before the professional one. Son of a carpenter, he was a very conscious Labour Party man. At the age of ten, he borrowed a horse and a cart on election days and rode through the outer districts of Aker. Passers-by were politely invited to get in. Having done so, however, they were overwhelmed by a torrent of clever political agitation. Setting down his fares in front of the polling place, young Lie was convinced that they would give their vote to the proper party. In latter years he has also been a successful organiser, though perhaps not always with the same enthusiasm.

Trygve Lie is fond of young people and likes to surround himself with youth. Political friends of the new General Secretary of UNO relate that he used to bribe his three daughters from their fourth year with countless ice-creams in order to have them in the front row of any audience.

As a boy, Trygve Lie belonged to the Trade Union Youth Organisation, at the age of 15 he enrolled as an ordinary member of the Labour Party. Working in the afternoon as an errand boy in order to support his widowed mother, he attended school in the morning and did his prep. at night. He was to become an artisan, like his deceased father and all his brothers. However, a socially-minded teacher recognised his special gifts and advised him to study. Having passed his matriculation with honours, Trygve Lie won a scholarship for the Oslo University, where he enrolled at the age of 19 as a student of law. At the same time he was already a member of the Trade Unions Executive. Norway's future Foreign Minister passed his final exams with distinction.

In 1919 Trygve Lie established himself as a lawyer. He also acted as Secretary to the Central Executive of the Norwegian Labour Party and legal adviser to the Trade Unions. M. Lie's initiative was then already responsible for the most favourable wages agreements and a progessive labour arbitration law. Young and versatile, he also played a prominent part in the administration of his native Aker (near Oslo.)

Norwegians usually travel to the south. Trygve Lie, however, did not go to Italy for his honeymoon, but to Soviet Russia. The young couple burned to see the life and development of a Socialist State. No Soviet complex has ever troubled Trygve Lie. It is his conviction that Russia is equally interested, for security reasons, in a free and independent Norway as England and America.

Trygve Lie is a successful organiser. He adheres to the principle of starting work early and stopping late at night with only a short midday rest. His future UNO colleagues—in the Eight-Men Cabinet and the numerous sub-committees—may find the following hints useful: As a rule their new chief is gentle and good-tempered. Only disturbances when he is tired and engaged in some important work may cause an occasional outburst. An amicable apology invariably comes not later than 30 minutes after.

In 1939, the important Ministry for Supply and Shipping had been entrusted to him. He anticipated that his country might have to suffer under the blockade even if it were kept out of the war. So large stocks of supply were speedily put into storage. Norway was the only country on the continent which was not compelled to introduce petrol rationing during the first months of the war. When Minister Dr. Brauer submitted Germany's ultimatum, the Norwegian State, thanks to M. Lie's foresight, had reserves of rye, wheat, coal, etc., available in unprecedented quantities. Minister Lie accompanied the King and the Crown Prince on their hazardous flight through the whole of Norway to Otta. In a tourist hotel on the hills of Romsdalen, he rejoined the rest of the Norwegian Government. Trygve Lie was still wearing galoshes and a lounge suit, as in all the hurry it had been impossible to find a suitable skiing outfit for his bulky frame.

On reaching Aandalsnes, he made contact with the British Headquarters. The supplies essential for the continuation of the war in Northern Norway were secured under the immense difficulties by Minister Lie. His greatest deed, however, was the salvation of the fleet for the Allied war effort. Working day and night with a number of experts in a small mountain hotel, he managed to snatch 1000 ships or 4,000,000 tons from the Germans, often under their very noses. He worked out provisional measures requisitioning the entire Norwegian fleet for his Government and resulting in the foundation of a Norwegian Trade and Shipping Commission, the largest ship-owning concern in the world. Those 1000 ships have rendered invaluable services to Great Britain in the battle of supplies.

In view of the recent experiences he firmly rejected the impotent policy of neutrality for his country, demanding its integration in the International Security System. The same line will be prosecuted by his successor, M. Halvard Mathey Lange, son of the Nobel prize winner for Peace. In 1933 he was still Secretary of the International Union of Pacifists in London, but two bitter years in Sachsenhausen—together with Prime Minister Gerhardsen—have changed the outlook of this eminent politician and writer.

The first General Secretary of UNO calls himself a servant of the world. He can become that servant if he succeeds in creating an instrument which supplants nationalistic egoism and prestige mania by international collaboration. Trygve Lie is a strong personality abounding with energy. He directed his country's fleet safely to Allied ports. Let us hope to God that he will now be successful in steering the Allied countries into the haven of a lasting peace.

[From the American Swedish Monthly, March 1946]

ELECTION OF TRYGVE LIE OF NORWAY AS FIRST SECRETARY GENERAL OF THE UNITED NATIONS ORGANIZATION EVOKES PRAISE IN SWEDISH PRESS

Having served as a loyal member of the League of Nations, Sweden takes a keen interest in the organization of the UNO, even though it has not yet become a member, and few developments have given it greater satisfaction than the election of Trygve Lie, Foreign Minister of Norway, as the first Secretary General or chief executive. Not only is Swedish public opinion pleased because a man from the North was chosen, and particularly a member of the Norwegian Government who has shown that he

understands the reasons for Sweden's policy during the war and appreciates the aid Sweden was thereby able to render Norway, both during and after the hostilities, but because he represents one of the smaller nations. The Swedish press recalls that, in contrast, the first Secretary General of the first League was an Englishman, Sir Eric Drummond, and that thereafter the post alternated between Englishmen and Frenchmen. Never once did a citizen of a small nation, hold the post. Naturally, having shown his understanding and sympathy during the war. Mr. Lie can be expected to give Sweden a square deal in the future.

"The choice of the Norwegian Foreign Minister, Trygve Lie, as the first Secretary General of the United Nations is a cause for joy from every point of view,' said the widely circulated *Stockholm-Tidningen* on January 1, 1946. "The post he has been selected to fill is incomparably the most important in the whole organization, and the way the first occupant of it discharges his duties will be decisive as to all future developments. As a man and as a political leader Mr. Lie has given proof that he possesses the qualities required by this difficult and exposed position—strength of character, moderation, wisdom, ability to judge objectively, and firm determination to serve the ideals the new world body has adopted. He has thereby won respect and appreciation in all quarters, which, in turn, made it possible for the spokesmen for the various interests to unite on his name. The fact that his own country enjoys the same high regard among the United Nations—and outside—because of its contributions to the principles of justice and democracy, has naturally contributed its share to his selection and thereby gives him still greater moral authority."

In this praise the conservative *Svenska Dagbladet* of Stockholm joins, adding that from now on, since the Secretary General has the right to bring matters directly to the attention of the Security Council, without waiting for a member of UNO to ask him to do so, "size alone will not be decisive in the new world politics and that even the smaller nations may get a hearing. For his own part, Mr. Lie seems to have accepted his new position with a mixture of modesty and pessimism which only his sense of duty was able to overcome. From now on he can no longer regard himself as either a Norwegian or a Social-Democrat, but as the first citizen of the world, who with high impartiality, has to promote only the interests of his new employers. But since such a sublimation of a good Norwegian into a regulation-controlled cosmopolitan is hardly possible in the case of an ordinary mortal, it is clear that the smaller nations particularly those of the North, can count on the personal good will of the new Secretary General."
